Present Land Use/Zoning/General Plan Designation:

Project Description: *(please use a separate page if necessary)*

The main objective of the SCAI rulemaking is to address the need for statewide reductions of nitrogen oxides (NOx), a key precursor for ozone formation, and particulate matter (PM) to meet federal air quality standards and protect public health. California's SCAI has identified four key approaches for emissions reductions:

(1) Controlling emissions from aircraft auxiliary power units for the duration of visit;
(2) Reducing emissions from airport ground support equipment;
(3) Reducing emissions from aircraft taxiing at the airport; and,
(4) Reducing emissions from aircraft take-offs and landings.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "**X**".
If you have already sent your document to the agency please denote that with an "**S**".
