

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: City of Maywood Climate Action, Adaptation, and Resilience Plan Project

Lead Agency: City of Maywood

Contact Name: Miguel Leon

Email: miguel.leon@cityofmaywood.org Phone Number: 323-562-5714

Project Location: City of Maywood, Los Angeles County

City

County

Project Description (Proposed actions, location, and/or consequences).

The project involves the adoption and implementation of the City of Maywood's (City) first Climate Action, Adaptation, and Resilience Plan (CAARP), aimed at fostering a healthy, safe, and environmentally responsible community. Through this initiative, the City seeks to create a robust framework that addresses the challenges of climate change by reducing greenhouse gas (GHG) emissions and enhancing community resilience. The CAARP outlines a strategic roadmap with clear goals and actionable measures designed to accelerate emissions reduction efforts. The CAARP not only highlights the importance of strengthening the City's capabilities and those of its residents in adapting to climate impacts but also incorporates a detailed analysis of GHG emissions trends and forecasts to inform effective climate action strategies. Ultimately, the CAARP serves as a vital tool for the City to monitor progress and adjust strategies to achieve its environmental goals.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Based upon the analysis contained in the IS/MND, the proposed Project would have a less than significant impact with mitigation incorporated on the following environmental categories listed from Appendix G of the CEQA Guidelines.

1. Cultural Resources: Mitigation Measure CUL-1, which would require projects with the potential to impact historic or archaeological resources to undergo expert evaluation, documentation, and impact analysis by qualified professionals, while also mandating archaeological sensitivity training for construction workers and the filing of a formal mitigation program prior to ground-disturbing activities.

Mitigation Measure CUL-2, which would require projects with the potential to impact human remains to undergo expert evaluation, documentation, and impact analysis by qualified professionals, while also mandating compliance with Public Resources Codes for human remains.

2. Geology and Soils: Mitigation Measure PR-1, which would require projects with the potential to impact paleontological resources to undergo expert evaluation, documentation, and impact analysis by qualified professionals.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

None.
