

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Mocho PFAS Treatment Plant

Lead Agency: Zone 7 Water Agency (Alameda County Flood Control and Water Conservation District, Zone 7)

Contact Name: Elke Rank

Email: erank@zone7water.com

Phone Number: 925-454-5005

Project Location: Pleasanton

City

Alameda

County

Project Description (Proposed actions, location, and/or consequences).

The objective of the project is to ensure that all water delivered to customers meets or exceeds applicable drinking water standards, including anticipated new regulations for PFAS, restore water production reliability of the Mocho wellfield, and optimize operation of the Mocho Groundwater Demin Plant to improve groundwater basin salt management. Key components include installation of PFAS treatment vessels, electrical facilities, piping, pump station, landscaping, and site beautification

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Construction is outside of riparian and wetland areas. It is expected that a small number of existing mature trees or shrubs will need to be removed and/or pruned to accommodate the facility footprint. Mitigation measures are in place to protect nesting birds and roosting bats that may be in the area. The project includes post-construction landscaping with native and locally-appropriate species.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

The project is not expected to be controversial since water treatment/supply is important to agencies and to the public alike. Also, the project site is already the location of water treatment facilities.

Provide a list of the responsible or trustee agencies for the project.

STATE

- California Department of Fish and Wildlife – trustee agency for natural resources
- California Department of Water Resources – grant funding agreement
- State Water Resources Control Board/San Francisco Bay Regional Water Quality Control Board – trustee agency for natural resources
- State Water Resources Control Board Division of Drinking Water – operating permit amendment

REGIONAL AND LOCAL

- City of Pleasanton – encroachment permit; land use agreement
- Dublin San Ramon Services District – land use agreement; discharge permit amendmen
