Report date: April 4, 2025
Project Number 25-119

Terms of Use

Ellis Environmental Management, Inc has prepared this report for the exclusive use of:

Forest Lawn Memorial-Park Association

Ellis will distribute any information regarding this assessment and report only upon the request of the client. This report is based upon data and information obtained during site visits performed by Ellis personnel for the property identified herein within the time frames allowed. It is based solely upon the condition of the property on the date of such inspection, supplemented by information and data obtained by Ellis and described herein. Information presented is based on professional interpretation of data available as of the month prior to the date of report. Physical testing of subsurface soils or structures was not performed as part of this assessment. No opinion or warranty is made regarding the existence or location of underground structures or potential contaminants, whether stored or released. In evaluating the property, Ellis has relied in good faith upon representations and information furnished by individuals and agencies noted in the report with respect to operations and existing property conditions, and the historic uses of the property to the extent that they have not been contradicted by data obtained from other sources. Use of this report indicates acceptance and agreement that Ellis will incur no responsibility or liability for any loss, injury, claim or damage arising directly or indirectly from any use or reliance on this report, regardless of whether claimed loss, injury, claim or damage was caused by the deficiency, misstatements, omissions, misinterpretations, or fraudulent acts of persons interviewed. Ellis has performed this work, made findings, and proposed recommendations described in this report in accordance with generally accepted environmental science practices for asbestos and lead-paint surveys in effect at the time the work was performed and within the accelerated time frame requested. Additional information received following issuance of the report may alter initial findings and recommendations. This warranty stands in lieu of all other warranties, expressed or implied. While this report can be used as a guide, it must be understood that it is neither a rejection nor an endorsement of the property, or of the means or methods used in the treatment, storage or disposal of potentially hazardous materials. Changing circumstances in the environment and in the use of the property can alter the conclusions and information contained in the report.

1.0 INTRODUCTION

Ellis Environmental Management, Inc. (Ellis) was contracted by Forest Lawn Memorial-Park Association to perform a Phase 1 Environmental Site Assessment (ESA) for 32123 Da Vall Dr., Cathedral City, CA 92234, hereinafter referred to as the "Site." Ellis Environmental Management, Inc. is pleased to present this Phase I Environmental Site Assessment (ESA) report for the above-referenced location.

1.1 PURPOSE

The purpose of an ESA is to review past and present land use practices and evaluate the presence or likely presence of hazardous substances or petroleum products that may have been discharged into the property structure, underlying soil, groundwater or surface water. This was accomplished by a review of current and readily available information regarding past and present land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site.

A visual assessment of property conditions and an inspection for possible hazardous materials and/or wastes was conducted on March 24, 2025. Surrounding properties were also viewed to observe existing conditions. No geophysical survey or physical sampling was performed. This report provides the results of the Phase 1 ESA performed at the Site.

1.2 INVOLVED PARTIES

To the best of our knowledge, the involved party in this ESA is Forest Lawn Memorial-Park Association. Ellis understands that this ESA is being requested in conjunction with other entitlement activities by the Client. Ellis recognizes this report is to be used exclusively by Forest Lawn Memorial-Park Association, its successors, lenders, and assigns. It is a report upon which Forest Lawn Memorial-Park Association and its successors, lenders, and assigns can rely.

1.3 SCOPE OF SERVICE

This ESA was conducted in accordance with the standards of care and diligence normally practiced by recognized consulting firms performing services of a similar nature. The scope for this ESA consisted of the following:

- A visual inspection of the Site, surrounding properties and the surrounding area for evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs) and other potential environmental hazards.
- A review of current and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps and other accessible records.
- Requests to appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area and permits that may have been issued.
- Preparation of this report to include our findings, along with applicable illustrations and documentation.

Within the allowed time frames, no geophysical or underground storage tank survey was performed to determine the presence of subsurface structures and anomalies. Conclusions and recommendations included in Section 7 must be weighed against the Data Gaps included as Section 8.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The Site is located at the address 32123 Da Vall Dr., Cathedral City, CA 92234, west of Da Vall Drive and just south of Ramon Road. The Site is about 1.5 miles south of the I-10 Interstate Highway. The approximate coordinates are 33°48'52"N 116°26'29"W.

2.2 SITE DESCRIPTION

The Site is a developed 4.8-acre property. The site is occupied by "Security Plus Mini & R.V. Storage" – a facility that formerly provided outdoor vehicle storage and indoor climate-controlled storage, and is no longer operational. Historical Aerial photographs show original development occurred at the Site between 1984 to 1996. According to the Riverside County Assessor, the effective year built is 1994. The site is paved with a few areas of ornamental vegetation and a wall around the perimeter. The storage structures are made of metal sheet siding and there is an office building made of stucco. There is a parking lot on the western side of the property with access via a driveway on Memorial Drive. No development was found at the Site prior to its use as a storage facility.

2.3 ADJACENT PROPERTIES

Adjacent the Site to the north are two parcels, both are part of the existing Forest Lawn Cathedral City Cemetery, including a funeral home (69855 Ramon Road) and a cemetery (69901 Ramon Road). The 1984 historical aerial photograph shows a single residence in the northwest corner of the parcel at 69901 Ramon Road. Building layouts observed in the 1996 photograph appear to be the same as they are today. No other development is observed on these parcels prior to 1984.

Adjacent the Site to the east, across De Vall Drive, is a 6.7-acre parcel currently occupied by "Rehabilitation Hospital of Southern California" with the address 70000 Ramon Road. Aerial photographs indicate this parcel was first developed between 2005 and 2009. Parcel layout appears to have remained unchanged since this original development. Prior to 2005 there was no development at this location.

Adjacent the Site to the south is an 8.2-acre lot currently occupied by a mobile home park with a golf course with the address 69801 Ramon Road. Aerial photographs indicate development began at this location on a previously undeveloped parcel between 1984 and 1996. The site layout appears unchanged. Building permits for various mobile home facilities begin appearing in EDR Permit Records in 1997.

Adjacent the Site to the west is an 8.7-acre lot mobile home park at the address 69801 Ramon Road. Development on this parcel also began between 1984 and 1996. Roads and structures appear to have remained unchanged since initial development. Before its current use, the parcel was undeveloped.

2.4 UTILITIES

Electrical service is supplied by Southern California Edison. Water and sewer services are provided by The Coachella Valley Water District. Trash is collected by Burrtec Waste & Recycling. Natural gas is provided by the Southern California Gas Company.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

The Site is at an elevation of approximately 350 feet above sea level. Regional topography at the Site generally slopes to the northeast, also assumed to be the general direction of water runoff from the Site to the city's storm water collection system.

3.2 GEOLOGIC CONDITIONS AND SOILS

Based on Soil Conservation Service SSURGO data, the soil surface texture is fine and fine sand with a Class A hydrologic group, indicating high infiltration rates and well-drained soil. Soil has a pH between 7.9 to 9 and has a high corrosion potential.

3.3 GROUNDWATER / HYDROGEOLOGIC CONDITIONS

The Site is in the Coachella Valley - Indio Groundwater Basin. Data from the EDR Aquiflow database indicates a general groundwater depth of 500 feet Below Ground Surface (BGS). Direction of groundwater movement was not indicated in Aquiflow reports.

3.4 WETLANDS AND FLOOD ZONE

FEMA designates the Site as within Zone X – an area of minimal flood hazard. The area is determined to be outside the 100-year flood zone.

4.0 SITE RECONNAISSANCE

Ellis visited the site and surrounding properties on March 24, 2025. The Site was walked in a systematic manner from north to south and conditions were visually assessed for evidence of environmental concerns from past or current usage.

4.1 ON-SITE STORAGE TANKS

No visual indicators of above ground or underground storage tanks were identified at the Site or on adjacent properties during the site reconnaissance.

4.2 IDENTIFIED HAZARDOUS MATERIALS

No indications of petroleum products of hazardous chemicals were observed at the Site or adjacent properties.

4.3 ASBESTOS CONTAINING MATERIALS

Physical sampling for asbestos was not requested as part of this investigation. All building materials must be tested for asbestos before disturbance, regardless of building age or construction date. A visual inspection noted the following "suspect asbestos-containing building materials":

- Wallboard & joint compound or plaster
- Flooring and mastic
- Roofing materials
- Insulation materials
- Concrete and stucco
- Pavement

Also see Appendix A. As is true with all projects in Orange County, Los Angeles County, Riverside County, and San Bernardino County, the South Coast Air Quality Management District (SCAQMD) requires a full building survey per Rule 1403 before building demolition and/or renovation.

4.4 LEAD

Physical sampling for lead-containing materials was not requested as part of this environmental site assessment. Paint was noted to be in good condition in inspected locations at the time of the site reconnaissance; however, it is possible that lead-based paint is present on the Site, and lead testing should be performed prior to any disturbance of painted materials.

4.5 POLYCHLORINATED BIPHENYLS

Polychlorinated biphenyls (PCBs) are typically found in electrical transformer cooling coils, fluorescent light ballasts, and various hydraulic oils manufactured prior to 1979. No transformers, hydraulic lifts, or cooling oils were observed at the Site.

4.6 RADIOACTIVE MAN-MADE MATERIALS

No self-luminescent signs or other potentially radioactive man-made materials were observed at the Site and surrounding property during the site reconnaissance.

4.7 PITS, PONDS, AND LAGOONS

No pits, ponds, or lagoons were observed during the site reconnaissance.

4.8 SEPTIC TANKS AND CESSPOOLS

No septic tanks or cesspools were observed during the site reconnaissance.

4.9 WELLS, CISTERNS AND SUMPS

No wells, cisterns, or sumps were observed during the site reconnaissance.

4.10 WASTEWATER INTERCEPTORS / GREASE INTERCEPTORS

No wastewater interceptors or grease interceptors were observed during the site reconnaissance.

4.11 DRINKING WATER

The Site is supplied with potable water by Coachella Valley Water District. Sources of potable water are located in the restrooms and at a sink on the second floor of the office building.

4.12 RADON

The subject site falls into EPA Radon Zone 2 for Riverside County. Federal Area Radon information for Riverside measures average activity for 1st floor living areas at 0.000 pCi/L. Second floor average activity is reported at 0.800 pCi/L. Average basement activity was not reported for area code 92234.

5.0 SITE HISTORY

5.1 HISTORICAL AERIAL PHOTOGRAPHS

A summary of our interpretation of historical land uses and conditions of adjoining and surrounding properties based on historical records obtained from EDR is provided below. EDR Aerial Photos were reviewed including thirteen (13) aerial photographs dating from 1953 to 2020, and are included as Appendix B.

1953 Aerial Photograph

The Site and the surrounding area are an undeveloped desert landscape. A road is present just north of the Site where Ramon Road is currently located today. No other roads or structures are visible.

1959 Aerial Photograph

There is no development on the Site or adjacent properties. Palm Springs Cemetery District appears north of Ramon Road, where it is currently located today. Da Vall Drive is visible north of Ramon Road but not to the south. No other development is visible.

1965 – 1972 Aerial Photographs

The Site and adjacent parcels remain undeveloped. A few cross streets and a pond appear adjacent to the cemetery to the north. No other development is visible.

1984 Aerial Photograph

The Site remains undeveloped. A single residence appears in the northwest corner in the parcel north-adjacent to the Site. The beginnings of the mobile home park are visible in the parcel west-adjacent to the Site. No other developments are visible.

1996 Aerial Photograph

Development on the Site is visible for the first time. Building layout on the Site appears as it exists today. The cemetery and funeral home have replaced the single residence on the parcel that is north-adjacent to the Site. The mobile home park that is present today is visible on the parcels west-adjacent and south-adjacent to the Site. The parcel east-adjacent to the Site remains undeveloped.

2002 - 2020 Aerial Photographs

The Site is unchanged from the 1996 photograph. The funeral home, cemetery, and mobile home park also appear unchanged. A large mobile home park and golf course appears in the southeast in the 2002 photograph. A residential neighborhood appears in the north in the 2005 photograph.

Development of the rehabilitation hospital on the parcel adjacent to the east of the Site first appears in the 2009 photograph. Building layout of the hospital appears the same as it is today.

5.2 HISTORICAL BUILDING PERMITS

EDR provides a listing of building permits for the Site and adjoining properties, if available. The EDR report provides information regarding city building and safety permits for the Site and adjoining properties. Building Department Records searched include Cathedral City, Rancho Mirage, and Riverside County. One building permit for the Site was found for a mechanical unit on the roof related to an air conditioning company. No other permits for the Site were found.

Building permits for adjoining properties involve various mobile home installations. A permit for construction of crypt walls for Forest Lawn Mortuary is recorded from 2017. Permits for underground storage tanks, pump islands, sump and septic tanks were not found in the records.

5.3 HISTORICAL SANBORN FIRE INSURANCE MAPS

Ellis reviewed the EDR collection of Sanborn Fire Insurance Maps that cover the Site and immediate vicinity. The complete holdings of the Sanborn Library, LLC collection was searched for insurance maps and the Site and surrounding properties were not found.

5.4 CITY DIRECTORIES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. The earliest recorded information found is from 2005 which lists the Palm Springs Cemetery District at 31705 Da Vall Drive and Jim Dewyer Landscape Design at 32123 Da Vall Drive. The 2010 record lists the Palm Springs Cemetery District and Security Plus Mini RV Storage (the Site) at 32123 Da Vall Drive. The 2020 record includes Century Park at 30555 Da Vall Drive and Desert Memorial Park and Welwood Murray Cemetery both at 31705 Da Vall Drive. No further information was found in the city directory records.

5.5 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

Ellis requested the User to search for records available to the user for previous environmental reports or if other environmental documents were available for the Site. None were found. The User has also done a land title search for environmental liens and AULs filed and none were found.

5.6 HISTORICAL TOPOGRAPHIC MAPS

To identify natural and physical features of the landscape, historical topographic maps were provided by EDR. The maps display physical changes in geographical development. EDR Historical Topo Map Report with QuadMatch includes twelve (12) historical topographic maps dating from 1904 to 2021 and is attached in Appendix F.

1904 - 1947 Topographic Maps

The Site and surrounding area are represented by undeveloped land. A Pacific Railroad line is present to the north. Contour lines indicate an elevation of 350 feet. In the 1941 map Ramon Road

and the I-10 Interstate Freeway appears north of the railroad line. The Site and surrounding area remain undeveloped.

1958 – 1981 Topographic Maps

Palm Road appears in the 1958 topographic map, along with some cross streets and buildings. Palm Springs District Cemetery is shown just north of the Site. The area is labeled as "Agua Caliente Indian Reservation." The Site and adjacent properties remain undeveloped through the 1981 topographic maps.

2012 - 2021 Topographic Maps

In the 2012 map, the Site and the surrounding properties appear similar to today. The mobile home park to the west of the Site and other developments are visible in the 2012 map. Mission Hills North Golf Course is visible to the east of the Site. In the 2021 map water ponds appear in the golf course.

5.7 HISTORIC OIL AND GAS MAPS

Based on a review of maps provided by the State of California Department of Conservation Division of Oil, Gas & Geothermal Resources (DOGGR), no oil wells are present within a mile of the Site.

5.8 SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT – FIND DATABASE

Ellis reviewed information available on-line through the SCAQMD Facility Information Detail (FIND) database. According to the database there are no wells within a mile of the Site.

5.9 INTERVIEWS

An informal interview was conducted with Martin Rico. Mr. Rico has been employed at the Site for 18 years as a maintenance worker. Rico reports that there are no gas or oil storage tanks, and no sumps at the Site. Mr. Rico also says that oils, tools, and other vehicle maintenance supplies are stored off-site. Mr. Rico is unaware of any environmental hazards at the Site presently or in the past.

5.10 ENVIRONMENTAL LIEN and AULs

Information provided by the EDR report indicates no environmental lien or other activity and use limitations (AULs) for the Site. No environmental liens were reported for the Site address.

5.11 VAPOR ENCROACHMENT CONCERNS

Ellis reviewed an Environmental Data Resources, Inc. Radius Map Report with GeoCheck to evaluate the potential for on-Site vapor encroachment concerns from off-Site sources and nearby facilities. The Radius Map Report includes information from several database management systems such as GeoTracker, LUST, HIST UST, SWF/LF, ENVIROSTOR and others. A copy of the Radius Map Report with GeoCheck provided by EDR is included as Appendix H. No vapor encroachment concerns associated with the Site were identified.

5.11.1 FEDERAL NPL (SUPERFUND) SITES WITHIN A 1-MILE RADIUS

No listings were reported.

5.11.2 FEDERAL DELISTED NPL (SUPERFUND) SITES WITHIN A 1-MILE RADIUS

No listings were reported.

5.11.3 FEDERAL SITES SUBJECT TO CERCLA REMOVALS AND CERCLA ORDERS (ACTIVE & INACTIVE) WITHIN A 1/2-MILE RADIUS

No listings were reported.

5.11.4 FEDERAL CERCLA NO FURTHER ASSESSMENT PLANNED (NFRAP) SITES WITHIN 1/2-MILE RADIUS

No listings were reported.

5.11.5 FEDERAL RCRA FACILITIES UNDERGOING CORRECTIVE ACTION WITHIN A 1-MILE RADIUS

No listings were reported.

5.11.6 FEDERAL RCRA TSD FACILITIES WITHIN A 1/2 -MILE RADIUS

No listings were reported.

5.11.7 FEDERAL RCRA GENERATORS WITHIN A 1/4-MILE RADIUS

No listings were reported.

5.11.8 FEDERAL INSTITUTIONAL CONTROLS/ENGINEERING CONTROLS REGISTRIES WITHIN A 1/2-MILE RADIUS

No listings were reported.

5.11.9 FEDERAL ERNS LIST REGISTRIES WITHIN A 1/8-MILE RADIUS

No listings were reported.

5.11.10 STATE AND TRIBAL (SUPERFUND) EQUIVALENT SITES WITHIN A 1-MILE RADIUS

No listings were reported.

5.11.11 STATE AND TRIBAL HAZARDOUS WASTE FACILITES WITHIN A 1-MILE RADIUS (ENVIROSTOR)

Sunny Sands Elementary School (69310 McCallum Way; distance from the Site: 0.816 miles; relative elevation to the Site: higher.) is listed in DTSC's ENVIROSTOR database due to a request from DTSC for lead-in-soil sampling prior to redevelopment. In accordance with DTSC's Interim Guidance for evaluating school sites, the Site was evaluated for lead. Soil samples were collected from 54 borings and analyzed for lead as part of phase I Addendum. Based on the sampling results,

the Phase I Addendum concluded that all detections were either below screening level or non-detect and recommended no additional sampling. DTSC approved the Phase I Addendum on June 14, 2024. Sunny Sands Elementary School is not expected to be an Environmental Concern for the Site.

Listed as "Proposed High School #4" (address not listed in EDR report; distance from the Site: 0.766 miles; relative elevation to the Site: lower.), this site is the location of a high school and elementary school. A record is found indicating DTSC investigated this location before the school was built and concurred with the conclusions of a Phase I that neither a release of hazardous material nor the presence of a naturally occurring hazardous material, which would pose a threat to public health or the environment under unrestricted land use, was indicated at the site. High School #4 is not expected to be an Environmental Concern for the Site.

5.11.12 STATE AND TRIBAL LANDFILLS & SOLID WASTE DISPOSAL FACILITES WITHIN A 1/2-MILE RADIUS (SWF/LF)

Palm Springs Cemetery District (69920 Ramon Road; distance from the Site: 452 feet; relative elevation to the Site: higher.) An archived record is in the SWF/LF (SWIS) database for Palm Springs Cemetery District. The site is exempt from the regulatory requirement for permits, indicating limited or temporary use. No further information was available. This location is not adjacent to the Site. Palm Springs Cemetery District is not expected to be an Environmental Concern for the Site.

5.11.13 STATE & TRIBAL LEAKING STORAGE TANKS WITHIN A 1/2-MILE RADIUS

No listings were reported.

5.11.14 STATE AND TRIBAL REGISTERED STORAGE TANKS WITHIN A 1/4-MILE RADIUS

No listings were reported.

5.11.15 STATE AND TRIBAL VOLUNTARY CLEANUP SITES WITHIN A 1/2-MILE RADIUS

No listings were reported.

5.11.16 STATE AND TRIBAL BROWNFIELD SITES

No listings were reported.

5.11.17 LOCAL LISTS OF LANDFILL/SOLID WASTE DISPOSAL SITES WITHIN A 1/2-MILE RADIUS

Palm Springs Cemetery District is in the Waste Management Unit Database System with the primary waste type being nonhazardous solid wastes that contain putrescible and non-putrescible materials (wastes such as garbage, paper, demolition constructions waste, manure, etc.). The location is not recorded as having toxic, RCRA or Department of Defense related wastes. Palm Springs Cemetery District is not expected to be an Environmental Concern for the Site.

5.11.18 LOCAL LISTS OF REGISTERED STORAGE TANKS WITHIN A 1/4-MILE RADIUS4

Palm Springs Cemetery District is in the Historical UST Registered Database. A total of two (2) tanks are listed, one for unleaded fuel and one for diesel fuel. Tank capacities are not reported. No leaks or violations have been reported. Palm Springs Cemetery District is not expected to be an Environmental Concern for the Site.

5.12 SUMMARY OF SITE HISTORY

The Site was first developed between 1984 and 1996 as a storage facility, which still exists today. No development was found at the Site prior to its use as a storage facility. Adjacent properties include a funeral home and cemetery, mobile home parks, and a rehabilitation hospital. Development on adjacent properties began around 1984. With the exception of a single residence on the parcel adjacent to the north, all uses of adjacent parcels have not changed since initial development.

6.0 REGULATORY AGENCY REVIEW

The Site is covered by the GeoTracker, DOC CalGEM WellFinder Maps, and ENVIROSTOR databases. Information from these databases is described above. The Site was not listed in the Riverside County Building & Safety Department Records Division or the SCAQMD FINDS Database of facilities who have active, inactive, or archived historical files.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Ellis has performed this ESA of the subject property to the extent possible (see Section 8), in conformance with the scope and limitations of ASTM Practice E1527-21. The investigation was performed for the property at 32123 Da Vall Dr., Cathedral City, CA 92234, aka the Site. Exceptions to, or deletions from, this practice are described in Section 8.0 of this report.

7.1 FINDINGS

ASTM defines recognized environmental conditions (REC) as:

"The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."

No Recognized Environmental Conditions have been found at the Site.

7.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

ASTM defined controlled recognized environmental conditions (CRECs) as:

"Recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or

petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

No known or suspected CRECs have been revealed during the preparation of this ESA.

7.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

ASTM defines historical recognized environmental conditions (HRECs) as:

" A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)."

No known or suspected HRECs have been revealed during the preparation of this ESA.

7.4 OTHER ENVIRONMENTAL CONCERNS

This assessment has revealed the following environmental concerns:

1. Subject Property. An asbestos and lead survey must be performed before any renovation activity. Identified asbestos- and lead-containing materials must be removed and disposed of by a licensed abatement contractor before demolition or renovations.

   Recommendation: Once full access is provided, retain Ellis (or another Cal/OSHA certified consultant) and CDPH certified building inspector to test for asbestos and lead at the subject site.

8.0 LIMITATIONS AND DATA GAPS

To the extent possible and within the time frames allowed, Ellis attempted to comply with the guidelines of ASTM 1527-21. No significant data gaps were encountered. The Site and adjacent properties are not included in the Sanbourn Fire Maps. Due to the Site's late build date, this is not a significant data gap. A PHI Data Gap Summary is in Table 1. Ellis' services did not include efforts outside the scope of the ASTM Practice.

In general, when required information was incomplete, not provided, otherwise not obtained or insufficient, Ellis attempted to use information from other sources to meet the Practices' performance objectives.

9.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in Section 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. See Appendix K for professional certifications.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ellis Environmental Management were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ellis Environmental Management were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EDR Environmental Lien and AUL Search 1980

The EDR Environmental Lien and AUL Search 1980 report provides results from a search of available land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel number and/or legal description
- search for ownership information filed between 1980 and the most current publicly available date
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for publicly available environmental encumbering instrument(s) filed between 1980 and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Property Archives, LLC researched and compiled the land title information contained in this EDR Environmental Lien and AUL Search 1980 report on behalf of EDR.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are

2 ENVIROSTOR sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SUNNY SANDS ELEMENTA	***69310 MCCALLUM WAY***	***NW 1/2 - 1 (0.816 mi.)***	***7***	***25***
Facility Id: 60003750				
Status: No Further Action				

Lower Elevation	Address	Direction / Distance	Map ID	Page
PROPOSED HIGH SCHOOL	***NW AREA OF RAMOND &***	***NNE 1/2 - 1 (0.766 mi.)***	***6***	***23***
Facility Id: 60000176				
Status: No Action Required				

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
PALM SPRINGS CEMETER	***69920 E RAMON RD***	***N 0 - 1/8 (0.086 mi.)***	***A2***	***11***
Database: SWF/LF (SWIS), Date of Government Version: 11/04/2024				
Facility ID: 33-AA-0031				
Operational Status: Closed				
Regulation Status: Exempt				

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: The Waste Management Unit Database System is used for program tracking and inventory of waste management units. The source is the State Water Resources Control Board.

A review of the WMUDS/SWAT list, as provided by EDR, and dated 04/01/2000 has revealed that there is 1 WMUDS/SWAT site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
PS CEMETARY DIST-SWD	***69920 EAST RAMON RD***	***N 0 - 1/8 (0.086 mi.)***	***A3***	***13***

Local Lists of Registered Storage Tanks

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there is 1 HIST UST site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
PALM SPRINGS CEMETAR Facility Id: 00000057502	***69920 RAMON RD***	***N 0 - 1/8 (0.086 mi.)***	***A4***	***16***

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
VIBRA REHABILITATION EPA ID:: CAL000447093	***70077 RAMON RD***	***NE 0 - 1/8 (0.095 mi.)***	***5***	***17***

INDIAN RESERV: This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

A review of the INDIAN RESERV list, as provided by EDR, and dated 12/31/2014 has revealed that there are 3 INDIAN RESERV sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
AGUA CALIENTE INDIAN		S 1/2 - 1 (0.854 mi.)	0	9
AGUA CALIENTE INDIAN		0 - 1/8 (0.000 mi.)	0	9
AGUA CALIENTE INDIAN		N 0 - 1/8 (0.081 mi.)	0	9

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
PALM SPRINGS CEMETAR		N 0 - 1/8 (0.082 mi.)	A1	9

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

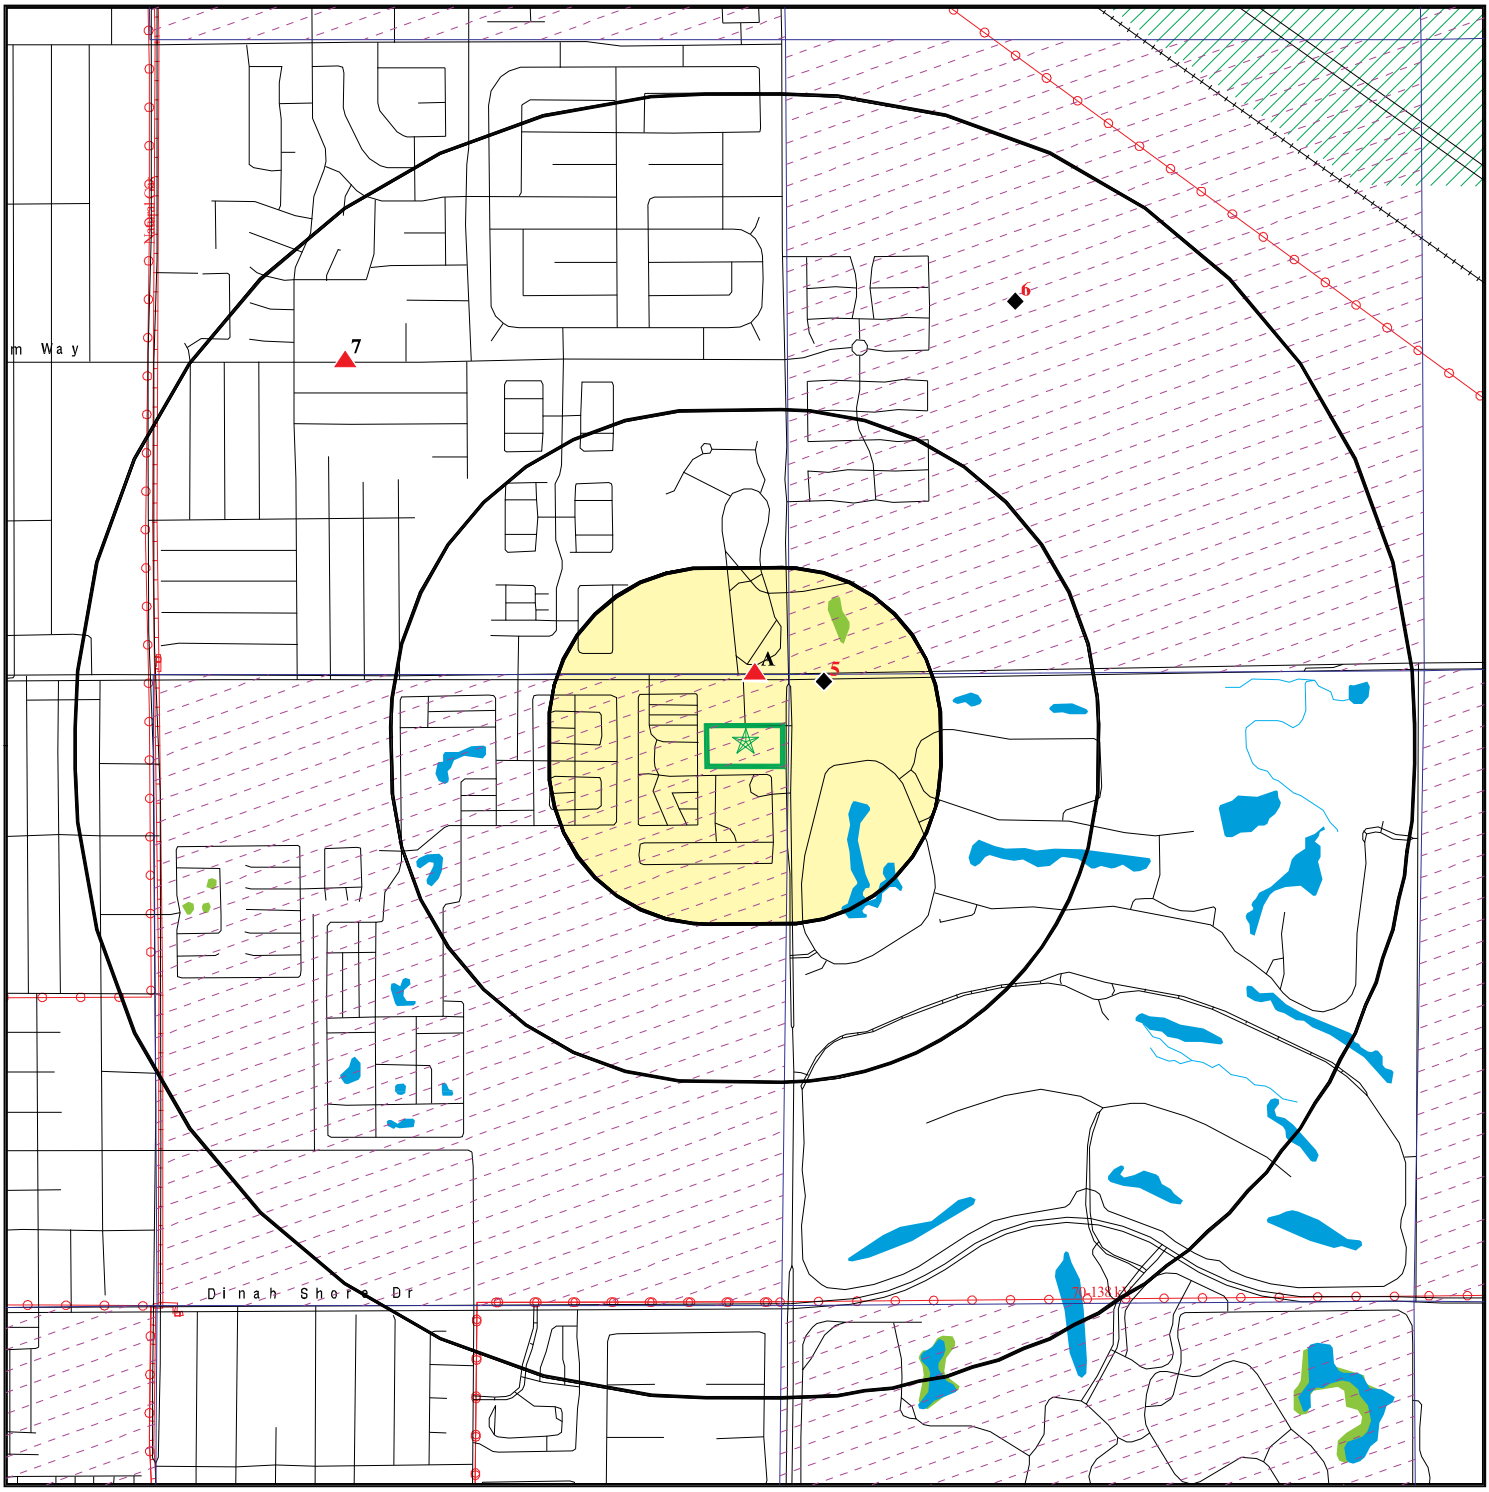

Lower Elevation	Address	Direction / Distance	Map ID	Page

Solid Waste Assessment Test Program: Not reported
Threat to Water Quality: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/20/2024

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER RELEASE: UST Finder Releases Database
US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

UST FINDER: UST Finder Database
EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Next Scheduled EDR Contact: 04/14/2025
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2023

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services

UTM Y (Meters):	3741528.5
Elevation:	347 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50004950 CATHEDRAL CITY, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

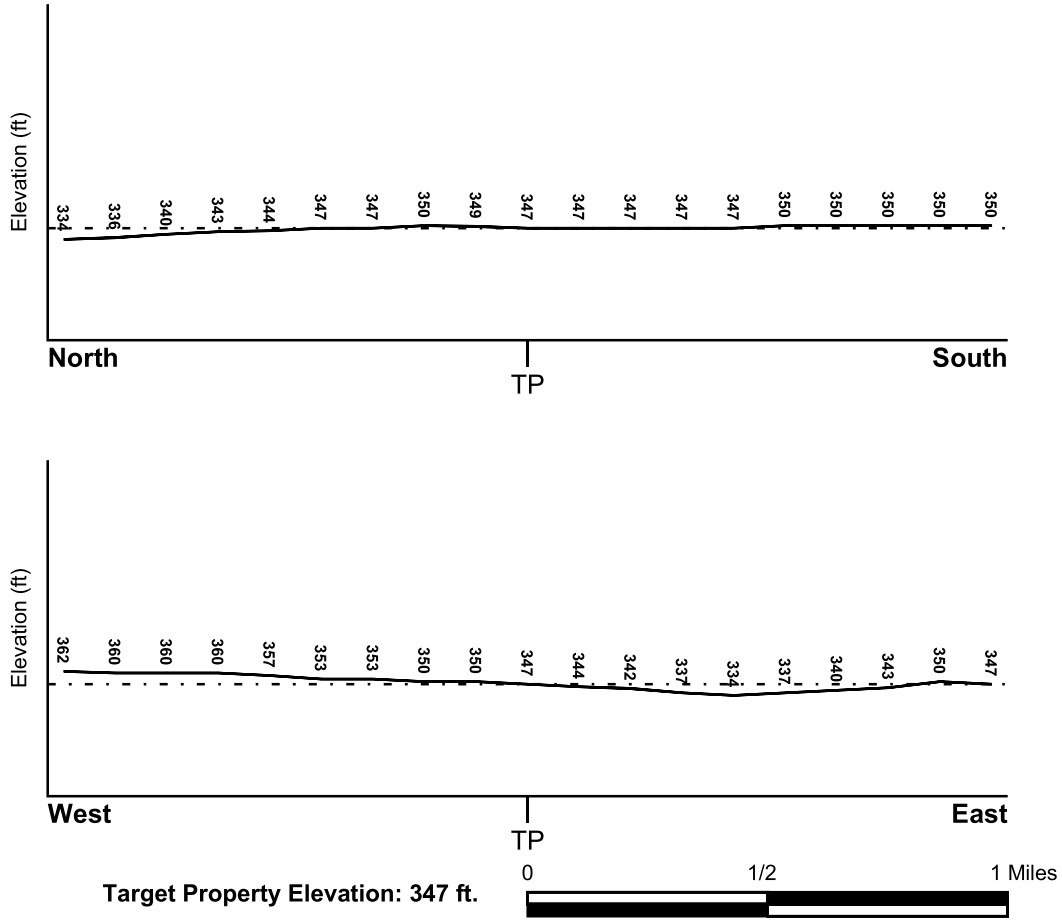

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C1579G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06065C1585G	FEMA FIRM Flood data
06065C1587G	FEMA FIRM Flood data
06065C1595G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CATHEDRAL CITY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Myoma

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 9 Min: 7.9
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 9 Min: 7.9

Soil Map ID: 2

Soil Component Name: Myoma

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 9 Min: 7.9
2	18 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 9 Min: 7.9

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
