Project Description: (please use a separate page if necessary)

The project will address the management of invasive plant species on 13,000 acres of land under COSCA ownership and management. Guidance presented in the IPMP will facilitate strategic control of invasive plants and ensure that available financial resources are utilized when and where they will yield optimal value for the recovery and enhancement of native habitats. The project does not entail construction of any kind.

The IPMP describes existing conditions in the Project area, identifies target invasive nonnative plant species to be controlled, and establishes treatment priorities. It also describes management goals and methods, infestation prevention and management strategies, monitoring and reporting protocols, adaptive management techniques, and best management practices to avoid environmental impacts.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
