Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Bouldin Island Multi-Benefit Levee Setback Project

Lead Agency: Reclamation District No. 756

Contact Name: Russell E. Ryan

Email: rryan@mwdh2o.com Phone Number: (209) 943-5551

Project Location: Bouldin Island, Sacramento-San Joaquin Delta, San Joaquin County
City *County*

Project Description (Proposed actions, location, and/or consequences).

Reclamation District No. 756 plans to implement a levee setback on approximately 5,000 linear feet of levee along the Mokelumne River on Bouldin Island to create a waterside planting bench for Shaded Riverine Aquatic habitat, rehabilitate the levee to sustainably meet Bulletin 192-82 standards, and replace the District's Camp 5 Pump Station.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

An Initial Study has been prepared to assess the potential effects of the Project on the environment and the significance of those effects. Based on the Initial Study, Reclamation District No. 756 has determined that the Project, including conservation measures that are part of the Project design, would not have significant effects on the environment. The Project would have no impacts on the following: mineral resources, noise, population and housing, public services, recreation, transportation, tribal cultural resources, and wildfire. The Project would result in less than significant impacts on the following: aesthetics, agriculture and forestry resources, air quality, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, and utilities and service systems. Mitigation would be included to reduce potentially significant impacts to less than significant levels for biological resources and cultural resources. Reclamation District No. 756 has agreed to implement each of the identified mitigation measures, which would be adopted as part of the Mitigation Monitoring and Reporting Program.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no areas of controversy known to the Lead Agency.

Provide a list of the responsible or trustee agencies for the project.

- California Department of Water Resources, (funding)
- California Department of Fish and Wildlife (Lake and Streambed Alteration Agreement)
- Central Valley Regional Water Quality Control Board (Section 401 Permit)
- Metropolitan Water District of Southern California (landowner)
