Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The Resource Conservation and Recovery Act Information System

**NIELLO BMW SAAB (Continued)** **1000289601**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System

**GLIDDEN PROFESSIONAL PAINT CENTERS (Continued)** **1006805704**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 12/15/2019. OBSERVATION: After conducting the facility walk through, when paperwork was requested, Mr. Bliss could not provide copies of the manifests since the other owner (his brother) maintains the paperwork and service side of the business. Since he could not locate copies for review at this time, it is unknown if the facility has maintained 3 years worth of hazardous wastes manifests for all waste streams generated on site: Used Oil Filters, Waste Gasoline and Used Oil. While writing the report, Marshall provided some manifests for review, however, only the year of 2018 was available for review. Provide copies from 2017 and 2019 to demonstrate compliance for the 3 year requirement. CORRECTIVE ACTION: Within the time frame specified above, submit copies of the hazardous waste manifests or consolidated manifests for all waste streams observed on site (at least three years worth). If three years are not available, contact your hazardous waste hauler to obtain these copies and [Truncated]

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes: Returned to compliance on 01/10/2022. OBSERVATION: A written hazardous waste tank assessment has not been obtained for the Waste Oil tank system prior to placing system into service. As a large quantity generator of hazardous wastes, waste tank assessments must be conducted prior to utilizing the tanks. However, since these tanks have been in commission for a few years, obtain a tank assessment and conduct re-assessments every 5 years following the initial assessment. **Please note, if one has already been conducted but was not provided to me during today's inspection, please submit that form to this department referring to the comments section at the end of this inspection report. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment for the Waste Oil tank system in accordance with 22 CCR 15 66265.192 and submit a copy to this department. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
