Laboratory Analytical Report

# 1 Introduction

At the request of the Sacramento County Department of Transportation (SacDOT) NCE prepared a Caltrans Initial Site Assessment (ISA) and an Aerially Deposited Lead (ADL) evaluation for select street segments associated with the Alta Arden Complete Streets Project (Site, Figures 1 through 6). The Preliminary Environmental Study (PES) form approved by Caltrans requires an ISA and Aerially Deposited Lead (ADL) evaluation as part of the environmental process. Caltrans requested an ISA to assess the potential for hazards that may impact the project.

## 1.1 Background

The Site is located along the Alta Arden Expressway beginning approximately 200 feet east of Howe Avenue and extending eastward to Fulton Avenue (Project alignment, Figures 2 through 6). The draft design A Plans (Appendix A) were provided to NCE by SacDOT and show the proposed sidewalk improvements. Sidewalk construction is proposed for approximately 5,500 lineal feet on each side of the Site. Discussions with SacDOT, review of aerial photography, and review of preliminary design drawings indicate that there are areas slated for sidewalk improvements that have bare soil which may have elevated levels of ADL. The attached A Plans show the proposed project plans (Appendix A).

NCE assumes that construction of the sidewalks, roadway lane reconfigurations, or utility trenching will include excavation to a maximum depth of approximately 2 feet below ground surface (bgs) of soil to make room for structural sections.

Within the Site, historical land use has been a mix of commercial and residential. Commercial uses have presumably included gasoline stations, oil and lube facilities, and other activities with some potential to create impacts to soil and groundwater.

## 1.2 Purpose and Scope

The scope of work included the following:

**ISA**

- Obtain an Environmental Data Resources (EDR) Radius Report. The EDR Report provides the outcomes of an agency records review that looks for sites listed in the public records that may be of concern to the project.
- Review available aerial photography to look for historical land uses that also may be of concern to the project.
- Conduct Site reconnaissance to look for visual evidence of concerns.
    - Look for historical land uses or buildings indicative of service stations or other businesses that may have used hazardous materials.
    - Visually observe on-site conditions for evidence of environmental impacts, such as soil staining, stressed vegetation, ponded liquids, mounded soils, excavations, discarded drums, or monitoring wells.

  - Identify potential environmental concerns such as underground storage tanks, aboveground storage tanks, polychlorinated biphenyl (PCB)-containing materials, or other hazardous materials or wastes present within or adjacent to the project alignment.
  - Assess the Site with respect to surrounding property uses and natural surface features.
- Review available documents such as previously prepared environmental reports.

This objective of the ISA was to look for potential environmental conditions within and adjacent to the Site related to documented environmental issues associated with the use and/or release of hazardous substances into the environment that may impact the project including contamination that could influence or disrupt construction or pose a risk to construction workers. This scope does not include the details or information that would be considered the full scope of work required to comply with ASTM International or All Appropriate Inquiry standards for completing a Phase I Environmental Site Assessment (ESA). The results of this ISA were used to complete a Caltrans ISA Checklist (Appendix B).

**ADL Assessment**

Collect soil samples in areas of bare soil at the Site (Figures 2 through 6) and analyze them for total lead to assess the presence of ADL, evaluate potential worker exposure to elevated levels of lead, and establish disposal and/or handling protocol.

**Report**

- Prepare a report summarizing the findings of the ISA evaluation and ADL Assessment

# 2 Initial Site Assessment

## 2.1 Historical Records Review

The historical records review included researching and examining historical aerial photographs which provide visual documentation of Site conditions at the time of the photographs. Activities such as dumping or industrial use can often be discerned through the review of aerial photographs. NCE reviewed historical aerial photographs provided by EDR and Google Earth for the years 1937, 1947, 1957, 1964, 1966, 1972, 1984, 1993, 1998, 2006, 2009, 2012, 2016, 2020, 2021, 2022, 2023, and 2024 for the Site and adjoining areas. The historical aerial photographs are presented in Appendix C. A summary of the aerial photographs reviewed for the Site and surrounding property is presented below.

- **1937**: Present-day Alta Arden Expressway is not constructed, and the Project alignment consists primarily of agricultural land. North-south arterials Howe Avenue, Bell Street, Wright Avenue, Markston Road, and Fulton Avenue are present in their current configurations. Agricultural dry farming and related residences are adjacent to Alta Arden Expressway along the project alignment. Commercial development is not shown in the vicinity (EDR).
- **1947**: Additional residences are shown along the project alignment and the vicinity. What appears to be cleared land is shown north of Alta Arden Expressway between Howe Avenue and Bell Street (EDR).
- **1957**: A minor road is within the current Project alignment extending east from Bell Street. Additional residences are within and near the project alignment (EDR).
- **1964**: Commercial development is shown near the eastern portion of the Project alignment including a possible gas station which is discussed in section 2.2.1, and several apartment complexes are shown along the Project alignment (EDR).
- **1966**: The western portion of the Site is west of Bell Street is cleared and/or under development. Additional commercial development is shown along the Project alignment (EDR).
- **1972**: Alta Arden Way is now constructed in its present-day alignment. Some additional commercial development is shown along the eastern and western portions of the Project alignment (EDR).
- **1984**: Additional commercial development is shown along the western portion of the project alignment between Howe Ave and Bell Street. Additional multi-family residential development is shown along the project alignment (EDR)**.**
- **1993**: Additional commercial development is shown along the project alignment between Bell Street and Markston Road and between Wright Street and Fulton Avenue (EDR).
- **1998**: No significant changes are shown along the project alignment (EDR).
- **2006 – 2020**: No significant changes are shown along the project alignment (EDR).
- **2022**: No significant changes are shown along the project alignment (Google Earth).

- **2024**: No significant changes are shown along the project alignment (Google Earth).

Uses of land adjacent to the project alignment, including residential and commercial development including commercial retail and multi-family residential development appear to be typical. Industrial land uses were not specifically identified adjacent to the project alignment.

## 2.2 Regulatory Review

### 2.2.1 Radius Map Report and Regulatory Database Review

NCE conducted a records search using electronic database services provided by EDR. EDR published a Radius Report, which is a listing of facilities identified on select federal and state standard source environmental databases, based on our request. NCE reviewed information provided in the Radius Report for each of the sites listed. The following list details current and former facilities provided in the Radius Report to assess if the listed facility possibly stored, used, or had releases to soil and/or groundwater of hazardous substances that may impact the Site. The Radius Report is included as Appendix D.

Where available NCE also reviewed the Department of Toxic Substance Control EnviroStor and Water Resources Control Board GeoTracker websites to look for listed facilities and review previous investigations regarding these facilities to the extent available. Information of interest included soil conditions and groundwater elevation and flow direction, as these pertain to impacts that may affect worker safety and construction.

As part of that review NCE learned that the historical depth to groundwater in the vicinity of the project is approximately 60 feet bgs, and groundwater flow is generally to the north (Gettler-Ryan, Inc. 2002). Since excavations related to project improvement are unlikely to reach groundwater, impacts to groundwater in the Site vicinity are unlikely to affect project construction or worker safety and were not considered further. The following facilities were identified in the EDR, EnviroStor, and/or GeoTracker databases:

- **Union Oil SS 6182 – 1849 Fulton Ave**

This business is listed in the EDR HIST UST database as operating since 1971 and owned by Union Oil Co., headquartered in San Francisco. This former gas station is located on Fulton Avenue approximately 200 feet south of the Project alignment. As of 1988, the facility contained 6 underground storage tanks (USTs): 4 10,000-gallon product tanks containing unleaded and premium fuel, and 2 550-gallon waste oil tanks. The tanks were equipped with stock inventory leak detection systems. No record of removal of the USTs was provided. Based on this distance it is unlikely that this former business presents a risk to the Project.

- **Former Unocal #7243 - 1939 Fulton Ave**

This former gas station, located 300 feet east of proposed project improvements, is listed in the LUST database as having a leak of gasoline affecting groundwater reported in 1990. Three 12,000-gallon USTs were removed in October 1993, with approximately 1,000 cubic yards of contaminated soil which was excavated and removed from the Site. Groundwater monitoring showed significant reductions in

contaminant levels through natural attenuation between 1996 and 2001. A health risk assessment in 2002 concluded that residual hydrocarbons did not pose a threat to human health for commercial uses, and 7 monitoring wells were decommissioned with no further site management required. The regulatory case was closed in May 2002. According to aerial photographs, this former gas station was built sometime between 1957 and 1964 and was razed sometime between 1966 and 1972 when the current Target retail store was constructed at this location. It should be noted that sidewalk improvements are not planned for this portion of the Project alignment. Since this location is approximately 300 feet away from areas planned for improvements, impacts from this facility are unlikely to pose a risk to the Project.

- **Turner Nissan - 1761 Fulton Ave/2551 Trade Wind Ave**

This automotive dealership is listed in the LUST database with 2 separate UST leaks impacting soil, but not groundwater, in 1994. The site had 5 underground tanks - 3 for gasoline and 2 for waste oil. Regulatory oversight of the property was provided by the Sacramento County Environmental Management Department and the Central Valley Regional Water Quality Control Board (CVRWQCB). Soil excavation was conducted as the primary remediation method in 1995. The location of the leak and subsequent soil removal was south of the main facility building which is located approximately 300 feet from the Project alignment. Laboratory analysis of soil samples confirmed low levels of petroleum hydrocarbons remaining after excavation. The first case was closed in 2000, and the second was closed in 1995. Based on the distance from the Project alignment, this facility is unlikely to pose a risk to the Project.

## 2.3 Site Reconnaissance

Mr. Matthew Kinney, an NCE Geologist and qualified Environmental Professional, performed field reconnaissance of the Site and surrounding vicinity on January 16, 2025.

### 2.3.1 Summary of Observations

The Site is comprised of the Alta Arden Expressway corridor, including associated sidewalks, curbs, and gutters, beginning approximately 200 feet east of Howe Avenue and extending eastward to Fulton Avenue. The Site boundary as shown in the draft design A Plans (Figures 2 through 6) indicates areas slated for sidewalk improvements where bare soil is present along much of the length. There are approximately 5,500 lineal feet on each side of the Site that has proposed sidewalk construction. Historical land use adjacent to the Site has been a mix of commercial and residential. Commercial development is near Howe Avenue and Fulton Avenue, and multi-family residential predominantly comprises the central portion of the alignment. The review of historical records, regulatory databases, and Site conditions did not identify concerns that would pose a significant risk to construction activities or worker safety.

## 2.4 Initial Site Assessment Findings and Conclusions

Review of historical aerial photographs, searched databases, and Site reconnaissance indicate that no specific land uses adjacent to the Site are likely to result in significant impacts to worker safety or project construction.

As noted in the Caltrans PES, ADL is a potential concern because Alta Arden Expressway is a high traffic volume road that was developed well before the regulation of lead in automotive gasoline.

# 3 Aerially Deposited Lead Assessment

ADL assessment includes collecting surface and shallow soil samples along the Project alignment in areas where sidewalks are not present as notated in blue in Attachment 1 and in Figures 2 through 6 measuring their ADL concentrations, and comparing these results to published Health-Based Environmental Screening Values and Hazardous Waste Criteria to evaluate potential impacts to worker safety, the environment, and potential soil disposal.

## 3.1 Field Methods and Procedures

### 3.1.1 Field Equipment

Personnel involved in sampling wore appropriate personal protective equipment in accordance with the NCE site-specific Health and Safety Plan. This included nitrile gloves, a hi-visibility safety vest, and protective boots. Field equipment included a writing utensil, field log notebook, map(s) of the Site and sampling locations, boring logs, and chain-of-custody forms. Sampling equipment included a hand auger, digging bar, and laboratory-supplied 9-ounce glass jars. Decontamination equipment included an environmentally friendly phosphate-free detergent (e.g., Alconox), water, and wash and rinse pails.

### 3.1.2 Soil Sampling

On January 16, 2025, NCE used a hand auger and digging bar to advance 21 ADL borings (AA1 through AA21) and collect 42 surface and shallow soil samples at the Site for analysis of ADL. Borings were advanced to a depth of 2 feet bgs at various locations throughout the Site (Figures 2 through 6). ADL soil samples were collected at 0 to 0.5 feet bgs and 1.5 to 2.0 feet bgs intervals.

A copy of the boring logs is provided in Appendix E.

### 3.1.3 Decontamination Procedures

Sampling equipment was decontaminated before and after advancing each boring and prior to departure from the field to ensure sample integrity and avoid contamination according to the following procedure:

1. Non-phosphate detergent and tap water wash using a brush
2. Tap-water rinse
3. Distilled water rinse
4. Second distilled water rinse

Disposable equipment intended for 1-time use was not decontaminated but was packaged for appropriate disposal.

### 3.1.4 Sample Handling Procedures

Samples were collected and transported under chain-of-custody procedures.

- Samples were clearly labeled with pre-assigned, identifiable, and unique numbers for proper identification in the field and tracking in the laboratory. The sample labels contained the following information: project name, unique sample identifier, date and time of collection, and name and company of sampler.
- Sample labels were affixed onto sample containers.
- Glass sample containers were wrapped in bubble wrap to prevent breakage during transit and shipment.
- Sample containers were placed in a cooler for immediate transportation or pick-up by a laboratory courier for shipment to the laboratory.
- The bottom of the cooler was lined with bubble wrap to prevent breakage during shipment.
- Empty space in the cooler was filled with bubble wrap or Styrofoam peanuts to prevent movement and breakage during shipment.
- Ice was necessary to cool the sample containers. Ice was sealed in 2 Ziplock plastic bags and placed on top and around the samples to chill them.
- Each ice chest used was securely taped shut with packing tape, and custody seals were affixed to the front, right, and back of each cooler.

Sample shipments were accompanied by a chain-of-custody record. The chain-of-custody form identified the contents of each shipment and maintained the custodial integrity of the samples. The appropriate chain-of-custody paperwork was enclosed in a Ziplock plastic bag affixed to the underside of the cooler lid.

## 3.2 Analytical Program

Soil samples for total lead according to U.S. Environmental Protection Agency (EPA) Method 6020. To evaluate possible soil disposal options, 5 selected soil samples were analyzed for soluble concentrations of Lead using Waste Extraction Test (WET) methods, and 4 samples were analyzed for soluble concentrations of Lead using Toxicity Characteristic Leaching Procedure (TCLP) methods. WET methods inform options for disposal based on State of California guidance for the classification of hazardous waste, and TCLP methods inform options for disposal based on Resource Conservation and Recovery Act (RCRA) federal guidance for the classification of hazardous waste.

## 3.3 Findings

Findings from the ADL assessment are summarized below. Boring locations and concentrations of detected ADL are presented on Figures 2 through 6.

### 3.3.1 Results of Analysis

Concentrations of lead ranged from 3.1 milligrams per kilogram (mg/kg) in sample AA12-1.5 to 630 mg/kg in sample AA20-0. Review of the data also suggests that the higher lead concentrations are predominately in shallower soil samples (0 to 0.5 feet bgs) with the exception of AA15-1.5 and AA21-1.5,

and that most shallow soil samples had lead concentrations in excess of typical background concentrations. While some deep samples (1.5 to 2.0 feet bgs) had elevated lead concentrations, lead generally attenuated quickly below 1 foot. Although the concentration of lead appears to increase with depth in borings AA15 and AA21, ADL typically attenuates with depth and is unlikely to exceed the RWQCB Construction Worker ESL at a depth greater than 2 feet bgs.

### 3.3.2 Comparison to Health-Based Environmental Screening Values

The results of analyses were compared to the most recent health-based Environmental Screening Levels (ESLs) published by the San Francisco Bay Regional Water Quality Control Board (SFRWQCB 2019) and the Department of Toxic Substances Control (DTSC 2022). The range of concentrations of total lead were compared to RWQCB ESLs for residential and construction worker exposure as shown in Table 1. The presence of lead in soil at concentrations greater than the RWQCB Construction Worker ESL occurred along the western portion of the Project alignment west of Markston Road, and mostly along the westbound shoulder (Figures 2 through 4).

Soil samples in excess of 160 mg/kg occurred in the following samples (these borings are color-coded red in Figures 2 through 6):

- AA10-0
- AA11-0
- AA16-0
- AA18-0
- AA19-0
- AA20-0

To assess whether the concentrations of lead in soil have the potential to affect worker safety and project construction, the 95% upper confidence limit (UCL) of the average total lead concentration for the entire data set was calculated using U.S. EPA ProUCL version 5.1 software. The methodology to do this evaluation is to calculate the average concentration with a 95% confidence interval. The top sample interval and the bottom sample interval were evaluated together and separately. The average total lead concentration in the upper sample interval was 184.3 mg/kg and the average total lead concentration in the bottom sample interval was 48.91 mg/kg. Since lead distribution in the top samples was greater in the western portion of the Site, the average total lead concentration for top samples excluding those from borings AA19 through AA21 was calculated. This concentration was 135 mg/kg, indicating that the average concentration of total lead in samples collected from the top 6 inches of soil does not exceed the RWQCB ESL for construction worker safety of 160 mg/kg across the project alignment with the exception of borings AA19 through AA21. Soil in the 1.5- to 2.0-foot interval does not exceed the RWQCB ESL for construction worker safety. The 95% UCL for total lead in all soil samples was 113.5 mg/kg, which does not exceed the RWQCB ESL for construction worker safety of 160 mg/kg.

### 3.3.3 Comparison to Hazardous Waste Criteria

As part of the project, disposal of soil impacted with ADL may be necessary. To inform disposal options, laboratory analytical results were compared to the current hazardous waste criteria in California and RCRA guidelines that include the Total Threshold Limit Concentration (TTLC), Soluble Limit Threshold Limit Concentration (STLC), and the TCLP. These criteria are shown in Table 1.

#### Total Lead

Lead-containing soil is classified as California hazardous waste if the lead concentration meets or exceeds the TTLC of 1,000 mg/kg. Since the highest reported concentration of total lead in a sample was 630 mg/kg, soil that would be classified as California hazardous waste based on the TTLC was not identified.

#### Soluble Lead

Five samples were analyzed using a Waste Extraction Test (WET) for comparison to the STLC because of their total lead concentrations. The 5 samples selected (and their corresponding total lead concentration) included AA3-0 (110 mg/kg), AA6-0 (66 mg/kg), AA11-0 (320 mg/kg), AA16-0 (220 mg/kg), and AA20-0 (630 mg/kg).

For disposal purposes, soil containing concentrations of total lead exceeding 10 times the STLC threshold of 5.0 milligrams per liter (mg/l) of soluble lead should be assessed for soluble lead concentrations. Concentrations of soluble lead in samples AA3-0, AA6-0, AA11-0, and AA16-0 were 1.2, 0.68, 2.9, and 3.4 mg/l, respectively. These concentrations are below the California hazardous waste threshold of 5.0 mg/L. The concentration of soluble lead in sample AA20-0 was 8.1 mg/L, which exceeds the California hazardous waste threshold of 5.0 mg/L.

# 4 Conclusions and Recommendations

This ADL Assessment was performed to evaluate lead concentrations in surface and shallow soil and conditions within the Site with the potential to impact construction activities, create exposures to workers and the public during construction, and/or impact future Site users, and to inform the County of possible soil disposal options. Considering that the future use of the Site will not change, comparison of analytical results to the RWQCB construction worker exposure ESL seems reasonable.

## 4.1 Conclusions

- In general, soil samples collected from 0 to 0.5 feet bgs exhibited concentrations of lead in excess of the typical background concentrations..
- Concentrations of total lead in soil exceeded the RWQCB construction worker exposure ESL of 160 mg/kg in soil samples collected from 6 of the 21 boring locations, which we located in the eastern portion of the Project alignment.
- The concentration of soluble lead in sample AA20-0 was 8.1 mg/l, which exceeds the California hazardous waste threshold of 5.0 mg/l.
- The soluble concentrations of lead in soil will likely exceed the threshold of California hazardous waste in areas where concentrations of total lead are approximately 500 mg/kg or greater (west of Howe Avenue near boring AA-20, Figure 2).
- The 95% UCL of concentrations of total lead in samples collected from the top 6 inches of soil is 135 mg/kg excluding borings AA19 through AA21, which is below the RWQCB ESL for construction worker safety of 160 mg/kg.
- The 95% UCL of concentrations of total lead in samples collected from the 1.5- to 2.0-foot interval of soil is 48.91 mg/kg, which is below the respective RWQCB ESLs for construction worker safety of 160 mg/kg.

## 4.2 Recommendations

- All soil excavated between the surface and 1.5-foot bgs west of Markston Road in areas that have exposed soil should not be re-used and should be disposed of at an appropriate licensed disposal facility. This soil should be segregated from other excavated soils to avoid mixing.
- Where testing indicated that concentrations of total lead do not exceed approximately 500 mg/kg, soil should be stockpiled for profiling, transportation, and disposal in accordance with a licensed disposal facility.
- All excavated soil from areas where testing indicated that concentrations of total lead exceed 500 mg/kg (west of Howe Avenue in the vicinity of boring AA-20) should be stockpiled separately to avoid commingling soil that may be classified as California hazardous waste. This stockpile should be profiled, transported, and disposed of in accordance with the disposal facility.

The recommendations above are premised on the following:

- Only soil that is exposed to ADL is impacted. Soil beneath existing paved surfaces is assumed to not be impacted.
- Soil below 1.5 feet bgs on average (according to the 95%UCL calculations) is below the construction worker safety health-based safety criteria of 160 mg/kg are acceptable to be left in place.

# 6 Limitations

Information presented in this report does not confirm the presence or absence of subsurface contamination at the property but indicates whether the possibility of such contamination exists. The professional opinions expressed herein are based on limited data; no other warranty is given or implied by this report. A more extensive assessment, including a surface and/or subsurface investigation and chemical analyses of soil and/or groundwater samples, would provide more definitive information concerning Site-specific conditions. This report is complete and accurate to the extent that cited reports and agency information are complete and accurate.

The observations described in this report were made under the conditions stated herein. The conclusions presented in the report were based solely upon the services described herein, and not on scientific tasks or procedures beyond the scope of described services within the constraints imposed by SacDOT. The work described in this report was carried out in accordance with the Terms and Conditions of the contract.

In preparing this report, NCE has relied on certain information provided by federal, state, and local officials and other parties referenced therein, and on information contained in the files of governmental agencies, which were readily available to NCE at the time of this assessment. Although there may have been some degree of overlap in the information provided by these various sources, NCE did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this ISA. Observations were made of the Site and of the structures on the Site as indicated in this report. Where access to portions of the Site or to structures on the Site was unavailable or limited, NCE renders no opinion as to the presence of direct or indirect evidence relating to petroleum substances, hazardous substances, or both, in that portion of the Site and structure. In addition, NCE renders no opinion as to the presence of indirect evidence relating to hazardous material or oil, where direct observation of the ground surface, interior walls, floors, ceiling or a structure is obstructed by objects or materials, including snow, covering on or over these surfaces.

NCE does not represent that the Site referred to herein contains no petroleum or hazardous or toxic substances or other conditions beyond those observed by NCE during the Site reconnaissance.

NCE has produced this document under an agreement between NCE and SacDOT. All terms and conditions of that agreement are included within this document by reference. Any reliance upon this document, or upon NCE's performance of services in preparing this document, is conditioned upon the relying party's acceptance and acknowledgement of the limitations, qualifications, terms, conditions, and indemnities set forth in that agreement, and property ownership/management disclosure limitations, if any. It is not to be relied upon by any party other than SacDOT, nor used for any purpose other than that specifically stated in our Agreement or within this report's Introduction Section without NCE's advance and express written consent.

### Environmental Professional Declaration

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 Code of Federal Regulations § 312.10.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site.

# APPENDIX DD – Preparation Guidelines for Initial Site Assessment Checklist for Hazardous Waste

## ARTICLE 1 Guidelines

### Introduction

The Initial Site Assessment (ISA) Checklist is a guide for district screening and assessment of projects for potential hazardous waste involvement. It is not intended to take a lot of time and effort to complete; however, some assessments may take longer to complete just because of the magnitude and/or location of a proposed project.

### Project Information Section

Be sure that the project manager and project engineer have been identified. Do not begin the initial site assessment until the written project description and location maps have been provided (since hazardous waste could affect project development, it is important to know what type of work is proposed and where it will be located).

### Location Map

It is suggested that the location map provided by design be attached to the initial site assessment checklist to provide a record of the area that has been assessed, as well as the findings. All future project limit changes should cause design to request further assessment for hazardous waste.

### Project Screening Section

Items 1 and 2 are risk indicators that could be used to determine the level of effort required to complete the initial site assessment. Generally, a project that requires new right-of-way, excavation, structure modification or demolition, or utility relocation will have a greater potential for hazardous waste involvement than a project that does not include these features. An urban location would generally present more of a risk

© 2019 California Department of Transportation. All Rights Reserved.

than a rural location; industrial land uses would generally be more risky than commercial uses; and so on.

Items 3 through 6 deal with the actual assessment:

- First, check available records to see if a known site is present. This item should not take a lot of effort, but it will require contacting the appropriate regional water quality control board, the Department of Toxic Substances Control, and the city/county agencies that deal with leaking underground tanks.
- Next, conduct a field inspection to look for indicators of potential hazardous waste or contamination. Identify businesses that store or use potentially hazardous materials (service stations, auto wrecking yards, paint companies, machine shops, metal platers, electronic manufacturers, dry cleaners, agricultural chemical suppliers, etcetera). Other things to look for include landfills and dumps, surface storage of potentially hazardous materials (sumps, pits, steel drums, etcetera), illegal dumping sites (especially on rural projects), and serpentine.
- Based on the field inspection, if there may have been a previous land use that could still present a hazardous waste or contamination risk, it may be necessary to verify the previous land use (for example, abandoned service stations can usually be identified by the type of structure and location and the underground tank may still be there).

## Initial Site Assessment Determination

The ISA determination is simply "Yes" or "No."

NO: No findings have been made that would indicate a known or potential hazardous waste problem within or near the proposed project.

YES: A known, or potential site has been identified that could affect the proposed project and will take more time and effort to define and coordinate cleanup options.

# Initial Site Assessment (ISA) Checklist

## Project Information

District 3 County Sac Route NA Post Mile NA EA NA

Description: Alta Arden Expressway Phase 1 Project. The project occurs along Alta Arden Expressway beginning approximately 350 feet west of Howe Avenue extending eastward to west side of the intersection of Alta Arden Expressway and Fulton Avenue. The project consists of mostly sidewalk improvements.

Is the project on the HW Study Minimal-Risk Projects List? No

Project Manager Katie Wrightson phone # 916-874-2818

Project Engineer _____ phone # _____

## Project Screening

Attach the project location map to this checklist to show location of all known and/or potential HW sites identified.

1. Project Features: New R/W? Yes Excavation? Yes Railroad Involvement? No
   Structure demolition/modification? No Subsurface utility relocation? Un
2. Project Setting Suburban
   Rural or Urban _____
   Current land uses Automotive and pedestrian thoroughfare
   Adjacent land uses Commercial and residential
   (industrial, light industry, commercial, agricultural, residential, etcetera)
3. Check federal, State, and local environmental and health regulatory agency records as necessary, to see if any known hazardous waste site is in or near the project area. If a known site is identified, show its location on the attached map and attach additional sheets, as needed, to provide pertinent information for the proposed project.
4. Conduct Field Inspection. Date January 16, 2024 Use the attached map to locate potential or known HW sites.

   STORAGE STRUCTURES / PIPELINES:

   Underground tanks No Surface tanks No
   Sumps No Ponds No
   Drums No Basins No
   Transformers Yes (pole mounted) Landfill No
   Other NA

© 2019 California Department of Transportation. All Rights Reserved.

# Initial Site Assessment (ISA) Checklist
(continued)

CONTAMINATION: (spills, leaks, illegal dumping, etcetera)

Surface staining No Oil sheen No

Odors No Vegetation damage No

Other No

HAZARDOUS MATERIALS: (asbestos, lead, etcetera)

Buildings No Spray-on fireproofing No

Pipe wrap No Friable tile No

Acoustical plaster No Serpentine No

Paint No Other No

5. Additional record search, as necessary, of subsequent land uses that could have resulted in a hazardous waste site. Use the attached map to show the location of potential hazardous waste sites.

6. Other comments and/or observations: There are facilities adjacent to the Site that at one time has releases of TPHs or VOCs to soil and groundwater. None of these facilities are subject to current regulatory action or have open cases with the water board or DTSC. Review of available reports for these facilities indicates that impacted soil is unlikely to be encountered during Project construction.

## ISA Determination

Does the project have potential hazardous waste involvement? _No_ If there is known or potential hazardous waste involvement, is additional ISA work needed before task orders can be prepared for the Investigation? _No_ If "YES," explain; then give an estimate of additional time required: ____

A brief memorandum should be prepared to transmit the ISA conclusions to the Project Manager and Project Engineer.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

RGA LUST ---------- Recovered Government Archive Leaking Underground Storage Tank

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# EXECUTIVE SUMMARY

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 19 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

# EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 4 CPS-SLIC sites within approximately 0.5 miles of the target property.

***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 10 UST sites within approximately 0.25 miles of the target property.

### *Local Lists of Registered Storage Tanks*

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 23 SWEEPS UST sites within approximately 0.25 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 136 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/13/2024 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER sites within approximately 0.25 miles of the target property.

# EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 25 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 07/19/2024 has revealed that there are 2 HWTS sites within approximately 0.001 miles of the target property.

| RIVER VALLEY BAPTIST | 1813 MARKSTON RD. | 0 - 1/8 (0.000 mi.) | B7 | 19 |

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2023 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 34 EDR Hist Auto sites within approximately 0.125 miles of the target property.

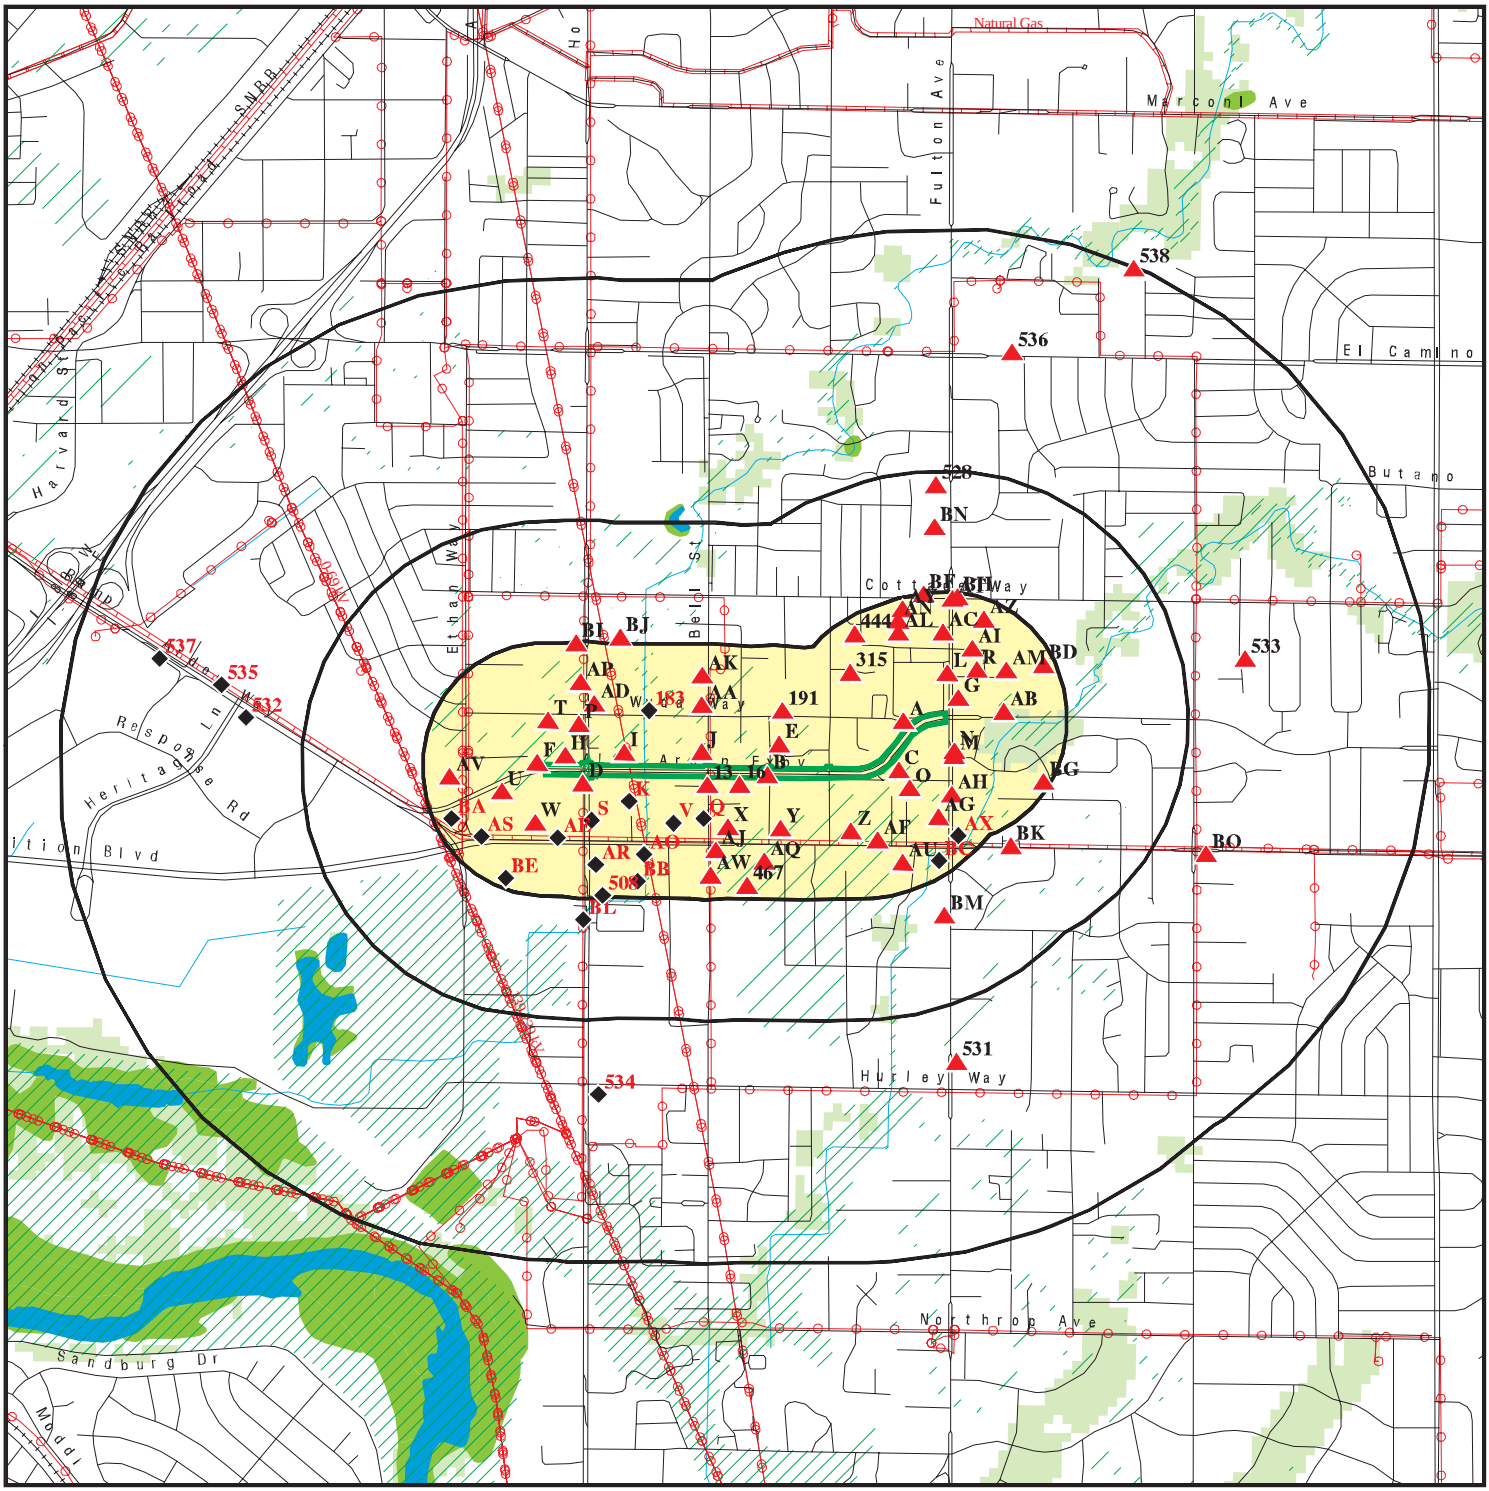
EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.



A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
Registry ID: 110055824746

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

CERS HAZ WASTE:
Name: CVS PHARMACY #16106
Address: 1919 FULTON AVE STE B
City,State,Zip: SACRAMENTO, CA 95825
Site ID: 368304
CERS ID: 10668343
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 368304
Site Name: CVS Pharmacy #16106
Violation Date: 11-08-2019
Citation: HSC 6.5 25123.3(h)(2) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(2)
Violation Description: Failure to determine the status of any hazardous waste if a signed copy of the manifest isn t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isn t received within 60 days of the date the waste was accepted by the initial transporter.
Violation Notes: Returned to compliance on 11/13/2019. OBSERVATION: The designated facility Uniform Hazardous Waste Manifests for manifest numbers 012038853FLE and 0120388534FLE dated 7/22/19 were not available at the time of inspection and it is undetermined if an exception report was submitted to the California Department of Toxic Substances Control (DTSC). CORRECTIVE ACTION: Either locate a copy of the missing designated facility manifests for manifests listed above or prepare and submit an exception report to DTSC. Submit copies to this department.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

| CERS Description: | Chemical Storage Facilities |

Violations:

| | |
|---|---|
| Site ID: | 134273 |
| Site Name: | MERCEDES BENZ OF SACRAMENTO |
| Violation Date: | 03-12-2014 |
| Citation: | 19 CCR 4 2729.2(a)(3) - California Code of Regulations, Title 19, Chapter 4, Section(s) 2729.2(a)(3) |
| Violation Description: | Failure to complete and/or submit an annotated site map if required by CUPA. |
| Violation Notes: | Returned to compliance on 05/05/2014. OBSERVATION: The annotated site map submitted to this department does not include the hazardous |

**MERCEDES BENZ OF SACRAMENTO (Continued)** **S113010316**

materials storage areas found in the service department, side shop, parts warehouse, and sprinter bay. The gas/diesel/used oil tank location and identification on the map are not clear. CORRECTIVE ACTION: Revise the annotated Site Map to clearly include all of the hazardous materials/waste storage areas and submit electronically in this department's e-Reporting Portal or in the California Environmental Reporting System.

Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 134273
Site Name: MERCEDES BENZ OF SACRAMENTO
Violation Date: 03-29-2017
Citation: 22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Description: Failure to label or mark each individual or container or the designated area of universal waste as required. 1) Waste batteries shall be marked with "Universal Waste-Battery(ies) . 2) Mercury containing equipment shall be marked with "Universal Waste -Mercury-Containing Equipment . 3) Lamps shall be marked with Universal Waste-Lamp(s) . 4)Each electronic devices or the container or the designated area shall be marked with Universal Waste-Electronic Device(s) . 5) Each CRTs or the container or the designated area shall be marked with "Universal Waste-CRT(s) . 6) CRT glass or the designated area shall be marked with Universal Waste-CRT glass .
Violation Notes: Returned to compliance on 04/21/2017. OBSERVATION: Universal waste handler failed to label or mark universal waste containers or areas with the words Universal Waste and the type of waste. Observed one plastic trash can located next to the parts department that was not labeled. CORRECTIVE ACTION: Label universal wastes with the required information. Submit documentation to this Department demonstrating that the universal waste is properly labeled.

| Citation: | HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple |
| Violation Description: | Business Plan Program - Operations/Maintenance - General |
| Violation Notes: | Returned to compliance on 04/21/2017. OBSERVATION: The training program for safe handling of hazardous materials has not been adequately implemented. Observed one 5 gallon plastic container of car detail wax located in the back shop that had a hole on the top of the container. Employees must implement their training on safe handling of hazardous materials. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have received training on safe handling of hazardous materials. Close all hazardous materials containers and submit a photo of properly closed containers. Submit a statement documenting how hazardous materials containers will be managed in the future. |

| Violation Description: | Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method. |
| Violation Notes: | Returned to compliance on 04/21/2017. OBSERVATION: Finely divided metal generated are being disposed of as trash. Finely divided metal less than 100 microns in size do not meet the definition of scrap metal. Observed multiple quarts of new motor oil and ATF that were not fully empty located in the trash cans in the side shop. CORRECTIVE ACTION: Immediately stop disposing of finely divided metal. Submit documentation to this department demonstrating that the finely divided metal has been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit manifests/receipts documenting proper disposal and a statement demonstrating how you will manage it in the future. Keep the test results, waste analyses, or other determinations at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal. Submit documentation demonstrating that partially full quart sized containers of new motor oil, new coolant, and new ATF [Truncated] |

Site Name: MERCEDES BENZ OF SACRAMENTO
Violation Date: 03-29-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 06/06/2017. OBSERVATION: An Emergency Response Plan and procedures has been completed and submitted to this department with the incorrect emergency contact information. CORRECTIVE ACTION: Complete the emergency response plan and procedures to include all required content and submit electronically in the California Environmental Reporting System.
Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 134273
Site Name: MERCEDES BENZ OF SACRAMENTO
Violation Date: 03-29-2017
Citation: 22 CCR 15 66265.171 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.171
Violation Description: Failure to accumulate hazardous waste in a container that is in good condition.
Violation Notes: Returned to compliance on 04/21/2017. OBSERVATION: Observed multiple 1 gallon plastic containers of unknown substances located throughout that main shop and in the back shop that were observed to be in plastic containers that had previously been cut. Observed one cracked bottled of sealant located in the trash can in the main shop.

**MERCEDES BENZ OF SACRAMENTO (Continued)** **S113010316**

CORRECTIVE ACTION: Submit photos to this department demonstrating the waste listed above has been transferred into a container that is in good condition or submit a manifest/receipt demonstrating the waste has been properly disposed of by a registered hazardous waste transporter.

Violation Date: 03-12-2014
Citation: 22 CCR 15 66265.35 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 03/25/2014. OBSERVATION: The used oil tank located in the outdoor fenced fuel enclosure did not have adequate aisle space allowing for unobstructed movement. CORRECTIVE ACTION: Submit photos to this department demonstrating that adequate aisle space has been provided.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 134273
Site Name: MERCEDES BENZ OF SACRAMENTO
Violation Date: 03-12-2014
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric

**MERCEDES BENZ OF SACRAMENTO (Continued)** **S113010316**

current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fi

Violation Notes: Returned to compliance on 08/24/2015. OBSERVATION: A written hazardous waste tank assessment for the antifreeze waste tank system was not available at the time of inspection. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment for the antifreeze waste tank system in accordance with 22 CCR 15 66265.192 and submit a copy to this department.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 134273
Site Name: MERCEDES BENZ OF SACRAMENTO
Violation Date: 06-11-2020
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes: Returned to compliance on 10/26/2020. Observations: Facility did not have a written hazardous waste tank system assessment available for review at time of inspection. Facility maintains a used oil tank and waste antifreeze tank on site and is a large quantity generator of Non-RCRA Hazardous Wastes, generating > 1000 kg/wastes a month. Corrective Action: Submit documentation as proof that a hazardous waste tank assessment has been completed for the facility, one that has been certified by a Professional Engineer and has been certified within the last 5 years. If one has not yet been completed, submit documentation demonstrating one will be completed.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

**FULTON BODY SHOP (Continued)** **1000417361**

storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

| | |
|---|---|
| Citation: | 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12 |
| Violation Description: | Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste. |
| Violation Notes: | Returned to compliance on 05/01/2019. OBSERVATION: The generator's EPA ID number CAL000413404 is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Complete and submit an application to the California Department of Toxic Substances Control to reactivate the EPA ID number. Submit a copy of the completed application to this department. |
| Violation Division: | Sacramento County Env Management Department |

| Violation Source: | CERS, |
| | |
| Site ID: | 32067 |
| Site Name: | FULTON AUTO REPAIR |
| Violation Date: | 11-14-2023 |
| Citation: | 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33 |
| Violation Description: | Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency. |
| Violation Notes: | OBSERVATION: At the time of inspection, the fire extinguishers had last been charged October 2022. Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency. CORRECTIVE ACTION: Provide documentation that all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment have been tested and maintained as necessary to assure its proper operation in time of an emergency. |

| Citation: | HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3) |
| Violation Description: | Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities. |
| Violation Notes: | OBSERVATION: At the time of the inspection, one 55 gallon container of an unknown chemical was observed. Mr. Ramirez stated that he thought the container was filled with water or kerosene. Chemical inventory information for all reportable hazardous materials on site at or above reportable quantities have not been completed and electronically submitted to CERS. CORRECTIVE ACTION: Determine the chemical in the 55 gallon container, and, if it is a product, add it to the CERS Hazardous Material Inventory. If it determined to be a waste, dispose of it through a certified hazardous waste hauler. Complete the chemical inventory information for all reportable hazardous materials at or above reportable quantities and submit electronically in the California Environmental Reporting System. |

Violation Date: 08-19-2015
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.
Violation Notes: OBSERVATION: The hazardous waste/materials storage are located throughout the inside and outside of the facility. Adequate aisle space allowing for unobstructed movement to the various storage areas throughout the facility grounds was not adequate . CORRECTIVE ACTION: Submit photos to this department demonstrating that adequate aisle space has been provided.

Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 05/03/2016. OBSERVATION: On 8-19-2015 Mr. Ramirez stated that was unsure how the absorbent waste is disposed of. Manifests documenting proper disposal were not available and a proper waste determination has not been provided as previously requested. OBSERVATION: Oily metal fines/sludge were observed accumulating in the drain channels for each of the transmission tables. On 8-19-2015 Facility employee Jose stated that the sludge is periodically removed and disposed of to the trash. A proper waste determination has not

**FULTON AUTO REPAIR (Continued)** **S102315358**

been provided as previously requested. CORRECTIVE ACTION: Submit documentation to this department demonstrating that the oily absorbent waste and oily metal fines/sludge have been properly characterized to determine if they are a hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future.

| Eval Notes: | * HOME TO FA0009416 Inspection report emailed to Eric Murray, Environmental Site Manager, at em6541@att.com due to COVID-19. No violations observed at the time of inspection. The facility is no longer APSA applicable. The 6,000 gallon tank of Diesel located in the Generator Area is locked out/tagged out. The diesel has been removed from the tank, and a separate 120 gallon belly tank of Diesel is connected to the generator. Mr. Murray stated they are in the process of removing the tank and submitting the hazardous waste tank closure form. |

| Citation: | HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3) |
| Violation Description: | Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities. |
| Violation Notes: | Returned to compliance on 08/02/2023. OBSERVATION: The Hazardous Materials Inventory Chemical Description page for the following hazardous waste and material have not been submitted to this department. 1) Four 55 gallon metal drums of used oil stored located inside shop by the front roll up door 2) Two 55 gallon metal drums of |

**CAPITAL AUTO REPAIR (Continued)** **S118172334**

new oil in located inside by the storage room 3) Two 55 gallon metal drums of drained used oil metal filters. One by the front roll up door and one by the storage room. 4) One 55 gallon metal drum of waste coolant outside on West side of building. 5) Two 55 gallon plastic drum of new coolant inside toward back of shop on the Western wall. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System.

Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 617311
Site Name: 50 INTERSTAE AUTOREPAIR AND TIRES
Violation Date: 03-27-2023
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 06/27/2023. OBSERVATION: Two 55 gallon metal drum of drained used oil filters were observed without a label and an accumulation start date. One located at the entrance of the shop and one located by the storage room with the new oil in 55 gallon metal drums. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the used oil and fuel filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal. Note: New owner took over shop on August 8th, 2022.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Evaluation:

| | |
|---|---|
| Eval General Type: | Compliance Evaluation Inspection |
| Eval Date: | 07-18-2016 |
| Violations Found: | No |
| Eval Type: | Routine done by local agency |
| Eval Notes: | No violations at this time. This is a general announcement for all water purveyors, contractors, or facilities (responsible party) that initiate the rehabilitation of wells, cleaning and or resurfacing of storage tanks, backwash/filter tanks, hydro-pneumatic tanks or removal of accumulated sludge from sumps or previous mentioned vessels; these sites or structures on these sites may have had or will have applied hazardous materials or processes that can create an effluent waste and or a solid waste. Some generated wastes may be a regulated hazardous waste. Reference California Code of Regulations - Title 22, Section 66262.11, Section 66261.22 and 66261.24. As a possible generator of this waste, the responsible party is required by law to make a proper waste determination. To make this determination, the responsible party must characterize their waste by generator knowledge or laboratory analysis. A waste determination, with respect to some of the activities and [Truncated] |

| Violation Notes: | Returned to compliance on 11/05/2014. OBSERVATION: Annual training documentation for all applicable employees has not bee conducted since October of 2011. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan. |
| Violation Division: | Sacramento County Env Management Department |
| Violation Program: | HMRRP |
| Violation Source: | CERS, |
| | |
| Site ID: | 547322 |
| Site Name: | Sprinter of Sacramento |
| Violation Date: | 10-22-2014 |
| Citation: | 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173 |
| Violation Description: | Failure to properly close hazardous waste containers when not in active use. |
| Violation Notes: | Returned to compliance on 11/05/2014. OBSERVATION: Observed bottom portion of brake shavings located under the brake lathe machine located in the shop open. Observed one 5 gallon plastic container os |

**SPRINTER OF SACRAMENTO (Continued)** **S124440216**

used oil located next to the aqueous parts washer located in the shop open. CORRECTIVE ACTION: Submit photos to this department demonstrating that the containers listed above have been properly closed.

Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 547322
Site Name: Sprinter of Sacramento
Violation Date: 10-22-2014
Citation: HSC 6.11 25404.1 - California Health and Safety Code, Chapter 6.11, Section(s) 25404.1
Violation Description: Failure to obtain and/or maintain an active hazardous waste generator permit.
Violation Notes: Returned to compliance on 11/05/2014. OBSERVATION: The generator has not obtained a hazardous waste generator permit from this department. CORRECTIVE ACTION: Immediately pay all permit fees to obtain a new or renewed hazardous waste generator permit and maintain that permit as active as long as the facility is in operation and continues to generate hazardous waste.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Not reported
Eval Division: Sacramento County Env Management Department
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: OBSERVATION: The facility has an aggregate aboveground petroleum storage (e.g. motor oils, used oils, transmission fluid) that is approaching 1,320 gallons. I calculated a total of 1,305 gallons of all petroleum stored in containers or tanks that are 55 gallons or greater at the time of inspection. CORRECTIVE ACTION: Calculate the facility inventory of petroleum storage. Submit a statement to this department within 30 days of this inspection report demonstrating the facility petroleum storage has been evaluated. A facility that has aboveground petroleum storage of 1,320 gallons or greater is required to: 1) Prepare and implement a Spill Prevention, Control, and Countermeasures (SPCC) plan; 2) Declare that the facility is regulated under the Aboveground Petroleum Storage Act (APSA) on the hazardous materials business plan in CERS; 3) Pay applicable fees

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS HAZ WASTE:

| | |
|---|---|
| Name: | HARBOR FREIGHT TOOLS, STORE # 659 |
| Address: | 1900 HOWE AVE |
| City,State,Zip: | SACRAMENTO, CA 95825 |
| Site ID: | 354738 |
| CERS ID: | 10636216 |
| CERS Description: | Hazardous Waste Generator |

Violations:

| | |
|---|---|
| Site ID: | 354738 |
| Site Name: | Harbor Freight Tools, Store # 659 |
| Violation Date: | 07-01-2017 |
| Citation: | 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a) |
| Violation Description: | Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste. |
| Violation Notes: | Returned to compliance on 07/05/2017. OBSERVATION: Signed final Uniform Hazardous Waste Manifests for manifests dated 5/24/17, 2/2/17, and 10/11/16 were not available at the time of inspection. Per the state database HWTS, there were 3 pick ups of hazardous waste in 2016. Only 2 records available for review during inspection. CORRECTIVE ACTION: Locate a copy of all Uniform Hazardous Waste Manifests for the manifests listed above and submit copies to this department. |
| Violation Division: | Sacramento County Env Management Department |
| Violation Program: | HW |
| Violation Source: | CERS, |

| | |
|---|---|
| Site ID: | 354738 |
| Site Name: | Harbor Freight Tools, Store # 659 |
| Violation Date: | 09-05-2023 |
| Citation: | HSC 6.5 25160(b)(3) - California Health and Safety Code, Chapter 6.5, Section(s) 25160(b)(3) |
| Violation Description: | Failure to determine the status of any hazardous waste if a signed copy of the manifest isn t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isn t received within 45 days of the date the waste was accepted by the initial transporter. |
| Violation Notes: | Returned to compliance on 09/18/2023. OBSERVATION: An exception report was not filed with the DTSC after not receiving a destination facility signed copy of the uniform hazardous waste manifest within 45 days of |

**HARBOR FREIGHT TOOLS, STORE # 659 (Continued)** **S121765067**

the waste shipment date. The following manifests are missing the Signed Designated Facility Generator copy: #021911808 (dated 5/10/22), 024896208 (5/12/23) , 024896209 (5/12/23). CORRECTIVE ACTION: Either locate a copy of the missing manifests or prepare and submit an exception report to DTSC (DTSC Report Repository; Generator Information Services Section; P.O. Box 806; Sacramento, CA 95812-0806). Submit copies to this department.

Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 354738
Site Name: Harbor Freight Tools, Store # 659
Violation Date: 09-05-2023
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: OBSERVATION: A 5 gallon plastic container of biohazard waste located in the hazardous waste collection area was observed without the accumulation start date on the label: CORRECTIVE ACTION: CORRECTED AT TIME OF INSPECTION.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-01-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On the Business Owner/Operator page in CERS, update the primary and secondary emergency contacts. Currently list previous employees Matthew Bradley and Jason Dimitt. Add FA0043538 to the Facility ID field. Note that hazardous waste generator permit fees are currently due on 7/7/17. Pay fees by due date to avoid late fees.
