Notice to reader

NOTE: The information on this SDS is based on data which is considered to be accurate. Baker Hughes, however, makes no guarantees or warranty, either expressed or implied of the accuracy or completeness of this information.

The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product.

This SDS was prepared and is to be used for this product. If the product is used as a component in another product, this SDS information may not be applicable.

SAFETY DATA SHEET

Section 1. Identification

Product name : TRETOLITE™ DMO8194HF DEMULSIFIER
™ a trademark of Baker Hughes Incorporated.

Product code : DMO8194HF

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Demulsifier.

Print date : 11/20/2018

Validation date : 11/20/2018

Version : 1.01

Supplier's details : Baker Petrolite LLC
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/SDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. CST, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : FLAMMABLE LIQUIDS - Category 3
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
CARCINOGENICITY - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3
AQUATIC HAZARD (LONG-TERM) - Category 2

GHS label elements

Hazard pictograms :

Signal word : Warning

Hazard statements : Flammable liquid and vapor.
Causes serious eye irritation.
Causes skin irritation.
Suspected of causing cancer.
May cause respiratory irritation.
May cause drowsiness or dizziness.
Toxic to aquatic life with long lasting effects.

Section 2. Hazards identification

Precautionary statements

Prevention : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves: > 8 hours (breakthrough time): Nitrile or Neoprene gloves. 4H gloves.. Wear eye or face protection. Wear protective clothing. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Avoid breathing vapor. Wash hands thoroughly after handling.

Response : Collect spillage. IF exposed or concerned: Get medical attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

Storage : Store locked up. Store in a well-ventilated place. Keep cool.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements : Avoid contact with skin and clothing. Wash thoroughly after handling.

Hazards not otherwise classified : Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
Light aromatic naphtha	30 - 40	64742-95-6
1,2,4-Trimethylbenzene	20 - 30	95-63-6
2-Ethylhexanol	5 - 10	104-76-7
1,3,5-Trimethylbenzene	5 - 10	108-67-8
Xylene	1 - 5	1330-20-7
1,2,3-Trimethylbenzene	1 - 5	526-73-8
Heavy aromatic naphtha	1 - 5	64742-94-5
Cumene	0.1 - 1	98-82-8
Ethylbenzene	0.1 - 1	100-41-4
Naphthalene	0.1 - 1	91-20-3

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Continue to rinse for at least 10 minutes. Check for and remove any contact lenses. Get medical attention.

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Skin contact : Wash skin thoroughly with soap and water or use recognized skin cleanser. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Section 4. First aid measures

Ingestion : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye irritation.

Inhalation : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.

Skin contact : Causes skin irritation. Defatting to the skin.

Ingestion : Can cause central nervous system (CNS) depression.

Over-exposure signs/symptoms

Eye contact : pain or irritation,watering,redness

Inhalation : respiratory tract irritation,coughing,nausea or vomiting,headache,drowsiness/fatigue, dizziness/vertigo,unconsciousness

Skin contact : irritation,redness,dryness,cracking

Ingestion : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Additional information

If product is ingested and vomiting occurs naturally, have person lean forward to reduce the risk of aspiration into the lungs.

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use dry chemical, CO_2, water spray (fog) or foam.

Unsuitable extinguishing media : Do not use water jet.

Specific hazards arising from the chemical : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide,halogenated compounds

Section 5. Fire-fighting measures

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

If RQ (Reportable Quantity) is exceeded, report to National Spill Response Office at 1-800-424-8802.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Section 7. Handling and storage

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Light aromatic naphtha 1,2,4-Trimethylbenzene	None. **ACGIH TLV (United States, 3/2018).** TWA: 123 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016).** TWA: 125 mg/m³, 0 times per shift, 10 hours. TWA: 25 ppm, 0 times per shift, 10 hours. **OSHA PEL 1989 (United States, 3/1989).** TWA: 125 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours.
2-Ethylhexanol 1,3,5-Trimethylbenzene	None. **ACGIH TLV (United States, 3/2018).** TWA: 123 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016).** TWA: 125 mg/m³, 0 times per shift, 10 hours. TWA: 25 ppm, 0 times per shift, 10 hours. **OSHA PEL 1989 (United States, 3/1989).** TWA: 125 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours.
Xylene	**ACGIH TLV (United States, 3/2018).** STEL: 651 mg/m³, 0 times per shift, 15 minutes. STEL: 150 ppm, 0 times per shift, 15 minutes. TWA: 434 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours. **OSHA PEL (United States, 5/2018).** TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** STEL: 655 mg/m³, 0 times per shift, 15 minutes. STEL: 150 ppm, 0 times per shift, 15 minutes. TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours.
1,2,3-Trimethylbenzene	**ACGIH TLV (United States, 3/2018).** TWA: 123 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours.

Section 8. Exposure controls/personal protection

	NIOSH REL (United States, 10/2016). TWA: 125 mg/m³, 0 times per shift, 10 hours. TWA: 25 ppm, 0 times per shift, 10 hours. **OSHA PEL 1989 (United States, 3/1989).** TWA: 125 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours.
Heavy aromatic naphtha	None.
Cumene	**ACGIH TLV (United States, 3/2018).** TWA: 50 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016). Absorbed through skin.** TWA: 245 mg/m³, 0 times per shift, 10 hours. TWA: 50 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018). Absorbed through skin.** TWA: 245 mg/m³, 0 times per shift, 8 hours. TWA: 50 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin.** TWA: 245 mg/m³, 0 times per shift, 8 hours. TWA: 50 ppm, 0 times per shift, 8 hours.
Ethylbenzene	**ACGIH TLV (United States, 3/2018).** TWA: 20 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016).** STEL: 545 mg/m³, 0 times per shift, 15 minutes. STEL: 125 ppm, 0 times per shift, 15 minutes. TWA: 435 mg/m³, 0 times per shift, 10 hours. TWA: 100 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018).** TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** STEL: 545 mg/m³, 0 times per shift, 15 minutes. STEL: 125 ppm, 0 times per shift, 15 minutes. TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours.
Naphthalene	**ACGIH TLV (United States, 3/2018). Absorbed through skin.** TWA: 52 mg/m³, 0 times per shift, 8 hours. TWA: 10 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016).** STEL: 75 mg/m³, 0 times per shift, 15 minutes. STEL: 15 ppm, 0 times per shift, 15 minutes. TWA: 50 mg/m³, 0 times per shift, 10 hours. TWA: 10 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018).** TWA: 50 mg/m³, 0 times per shift, 8 hours. TWA: 10 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** STEL: 75 mg/m³, 0 times per shift, 15 minutes. STEL: 15 ppm, 0 times per shift, 15 minutes. TWA: 50 mg/m³, 0 times per shift, 8 hours. TWA: 10 ppm, 0 times per shift, 8 hours.

Consult local authorities for acceptable exposure limits.

Section 8. Exposure controls/personal protection

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles.

Hand protection : Chemical-resistant gloves: Nitrile or Neoprene gloves. 4H gloves.

Skin protection : Wear long sleeves to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted, air purifying or supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

Appearance

Physical state : Liquid.

Color : Yellow. [Light]

Odor : Aromatic solvent.

Odor threshold : Not available.

pH : 6.1

: 5% of product in 75% water/25% IPA

Melting/freezing point : Not available.

Boiling point : Not available.

Initial Boiling Point : Not available.

Flash point : Closed cup: 43.8°C (110.8°F) [SFCC]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability (solid, gas) : Flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosive (flammable) limits : Not available.

Vapor pressure : Not available.

Vapor density : >1 [Air = 1]

Relative density : 0.88 (15.6°C)

Density : 7.36 (lbs/gal)

Solubility in water : Insoluble

Section 9. Physical and chemical properties

Partition coefficient: n-octanol/water : Not available.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Not available.

VOC : Not available.

Pour Point : Not available.

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials and acids.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Light aromatic naphtha	LD50 Oral	Rat	2900 mg/kg	-
1,2,4-Trimethylbenzene	LC50 Inhalation Vapor	Rat	18000 mg/m³	4 hours

Aspiration hazard

Name	Result
Light aromatic naphtha	ASPIRATION HAZARD - Category 1
Xylene	ASPIRATION HAZARD - Category 1
1,2,3-Trimethylbenzene	ASPIRATION HAZARD - Category 1
Heavy aromatic naphtha	ASPIRATION HAZARD - Category 1
Cumene	ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure : Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects

Section 11. Toxicological information

Eye contact : Causes serious eye irritation.

Inhalation : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.

Skin contact : Causes skin irritation. Defatting to the skin.

Ingestion : Can cause central nervous system (CNS) depression.

Potential chronic health effects

General : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : No known significant effects or critical hazards.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Route	ATE value
Oral	4178.6 mg/kg
Dermal	22214.2 mg/kg
Inhalation (gases)	100973.8 ppm
Inhalation (vapors)	46.86 mg/l

	Acute EC50 2930 to 4400 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 5200 µg/l Marine water	Crustaceans - Americamysis bahia	48 hours
	Acute LC50 4200 µg/l Fresh water	Fish - Oncorhynchus mykiss	96 hours

Section 12. Ecological information

	Chronic NOEC 1000 µg/l Fresh water	Algae - Pseudokirchneriella subcapitata	96 hours
Naphthalene	EC50 2.96 mg/l Fresh water	Algae - Pseudokirchneriella subcapitata	96 hours
	EC50 2.16 mg/l Fresh water	Daphnia	48 hours
	LC50 1.6 mg/l Fresh water	Fish - Oncorhynchus mykiss	96 hours

Persistence and degradability

Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA
UN number	UN1993	UN1993	UN1993	UN1993
UN proper shipping name	FLAMMABLE LIQUID, N.O.S. (Contains: Xylene, Light aromatic naphtha)	FLAMMABLE LIQUID, N.O.S. (Contains: Xylene, Light aromatic naphtha)	FLAMMABLE LIQUID, N.O.S. (Contains: Xylene, Light aromatic naphtha)	FLAMMABLE LIQUID, N.O.S. (Contains: Xylene, Light aromatic naphtha)
Transport hazard class(es)	3 	3 	3 	3 
Packing group	III	III	III	III
Environmental hazards	Yes.	Yes.	Yes.	Yes. The environmentally hazardous substance mark is not required.

Additional information

DOT Classification : This product may be re-classified as "Combustible Liquid," unless transported by vessel or aircraft. Non-bulk packages (less than or equal to 119 gal) of combustible liquids, that are marine pollutants, are not regulated as hazardous materials in package sizes less than the product reportable quantity, unless transported by vessel.
This product is not regulated as a marine pollutant when transported on inland waterways in sizes of ≤5 L or ≤5 kg or by road, rail, or inland air in non-bulk sizes, provided the packagings meet the general provisions of §§ 173.24 and 173.24a.
Reportable quantity 2019.5 lbs / 916.84 kg [275.23 gal / 1041.9 L]. Package sizes shipped in quantities less than the product reportable quantity are not subject to the RQ

Section 14. Transport information

(reportable quantity) transportation requirements.

TDG Classification : Product classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2.18-2.19 (Class 3), 2.7 (Marine pollutant mark).
The marine pollutant mark is not required when transported by road or rail.

IMDG : The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
Emergency schedules F-E S-E

IATA : The environmentally hazardous substance mark may appear if required by other transportation regulations.

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL and the IBC Code : Not available.

DOT Reportable Quantity Xylene, 274 gal of this product.

Marine pollutant Light aromatic naphtha
1,2,4-Trimethylbenzene

North-America NAERG : 128

Section 15. Regulatory information

U.S. Federal regulations : **TSCA 12(b) one-time export**: No products were found.

TSCA 12(b) annual export notification: No products were found.

United States inventory (TSCA 8b): All components are listed or exempted.

Clean Water Act (CWA) 307: Ethylbenzene; Naphthalene

Clean Water Act (CWA) 311: Xylene; Ethylbenzene; Naphthalene; Potassium hydroxide

United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs) :

List name	Status	Ingredient name	Name on list	Conc.
United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs)	Listed	Xylene	Xylenes	1 - 5
United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs)	Listed	Cumene	Cumene	0.1 - 1
United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs)	Listed	Ethylbenzene	Ethyl benzene	0.1 - 1
United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs)	Listed	Naphthalene	Naphthalene	0.1 - 1

SARA 302/304 : No products were found.

SARA 311/312

Classification : Fire hazard
Immediate (acute) health hazard
Delayed (chronic) health hazard

SARA 313

Notice to reader

NOTE: The information on this SDS is based on data which is considered to be accurate. Baker Hughes, however, makes no guarantees or warranty, either expressed or implied of the accuracy or completeness of this information.

The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product.

This SDS was prepared and is to be used for this product. If the product is used as a component in another product, this SDS information may not be applicable.

SAFETY DATA SHEET

Section 1. Identification

Product name : TRETOLITE™ DMO8298X DEMULSIFIER
™ a trademark of Baker Hughes Incorporated.

Product code : DMO8298X

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Demulsifier.

Print date : 1/18/2023

Validation date : 1/18/2023

Version : 2.01

Supplier's details : Baker Petrolite LLC
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/SDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. CST, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : FLAMMABLE LIQUIDS - Category 3
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
CARCINOGENICITY - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract irritation) - Category 3
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3
AQUATIC HAZARD (LONG-TERM) - Category 2

GHS label elements

Hazard pictograms :

Signal word : Warning

Hazard statements : Flammable liquid and vapor.
Causes skin irritation.
Causes serious eye irritation.
May cause respiratory irritation.
May cause drowsiness or dizziness.
Suspected of causing cancer.
Toxic to aquatic life with long lasting effects.

Section 2. Hazards identification

Precautionary statements

Prevention : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Avoid breathing vapor. Wash thoroughly after handling.

Response : Collect spillage. IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or doctor if you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.

Storage : Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Hazards not otherwise classified : None known.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
Light aromatic naphtha	30 - 40	64742-95-6
1,2,4-Trimethylbenzene	20 - 30	95-63-6
1,3,5-Trimethylbenzene	5 - 10	108-67-8
Xylene	5 - 10	1330-20-7
1,2,3-Trimethylbenzene	1 - 5	526-73-8
Cumene	0.1 - 1	98-82-8
Ethylbenzene	0.1 - 1	100-41-4

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Continue to rinse for at least 10 minutes. Check for and remove any contact lenses. Get medical attention.

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Section 4. First aid measures

Skin contact : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Ingestion : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye irritation.

Inhalation : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.

Skin contact : Causes skin irritation.

Ingestion : Can cause central nervous system (CNS) depression.

Over-exposure signs/symptoms

Eye contact : Adverse symptoms may include the following:,pain or irritation,watering,redness

Inhalation : respiratory tract irritation,coughing,nausea or vomiting,headache,drowsiness/fatigue, dizziness/vertigo,unconsciousness

Skin contact : irritation,redness

Ingestion : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use dry chemical, CO_2, alcohol-resistant foam or water spray (fog).

Unsuitable extinguishing media : Do not use water jet.

Specific hazards arising from the chemical : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide

Section 5. Fire-fighting measures

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

If RQ (Reportable Quantity) is exceeded, report to National Spill Response Office at 1-800-424-8802.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Section 7. Handling and storage

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in a segregated and approved area. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Store in original container, protected from direct sunlight. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Light aromatic naphtha	None.
1,2,4-Trimethylbenzene	**NIOSH REL (United States, 10/2020).** TWA: 125 mg/m³, 0 times per shift, 10 hours. TWA: 25 ppm, 0 times per shift, 10 hours. **OSHA PEL 1989 (United States, 3/1989).** TWA: 125 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours. **ACGIH TLV (United States, 1/2022).** TWA: 10 ppm 8 hours.
1,3,5-Trimethylbenzene	**ACGIH TLV (United States, 1/2022).** TWA: 123 mg/m³, 0 times per shift, 8 hours. TWA: 10 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2020).** TWA: 125 mg/m³, 0 times per shift, 10 hours. TWA: 25 ppm, 0 times per shift, 10 hours. **OSHA PEL 1989 (United States, 3/1989).** TWA: 125 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours.
Xylene	**ACGIH TLV (United States, 1/2022).** TWA: 20 ppm 8 hours. **OSHA PEL 1989 (United States, 3/1989).** TWA: 100 ppm 8 hours. TWA: 435 mg/m³ 8 hours. STEL: 150 ppm 15 minutes. STEL: 655 mg/m³ 15 minutes. **OSHA PEL (United States, 5/2018).** TWA: 100 ppm 8 hours. TWA: 435 mg/m³ 8 hours.
1,2,3-Trimethylbenzene	**ACGIH TLV (United States, 1/2022).** TWA: 123 mg/m³, 0 times per shift, 8 hours. TWA: 10 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2020).** TWA: 125 mg/m³, 0 times per shift, 10 hours. TWA: 25 ppm, 0 times per shift, 10 hours. **OSHA PEL 1989 (United States, 3/1989).** TWA: 125 mg/m³, 0 times per shift, 8 hours.

Section 8. Exposure controls/personal protection

	TWA: 25 ppm, 0 times per shift, 8 hours.
Cumene	**ACGIH TLV (United States, 1/2022).** TWA: 5 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2020). Absorbed through skin.** TWA: 245 mg/m³, 0 times per shift, 10 hours. TWA: 50 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018). Absorbed through skin.** TWA: 245 mg/m³, 0 times per shift, 8 hours. TWA: 50 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin.** TWA: 245 mg/m³, 0 times per shift, 8 hours. TWA: 50 ppm, 0 times per shift, 8 hours.
Ethylbenzene	**ACGIH TLV (United States, 1/2022). Ototoxicant.** TWA: 20 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2020).** STEL: 545 mg/m³, 0 times per shift, 15 minutes. STEL: 125 ppm, 0 times per shift, 15 minutes. TWA: 435 mg/m³, 0 times per shift, 10 hours. TWA: 100 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018).** TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** STEL: 545 mg/m³, 0 times per shift, 15 minutes. STEL: 125 ppm, 0 times per shift, 15 minutes. TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours.

Consult local authorities for acceptable exposure limits.

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles.

Hand protection : Chemical-resistant gloves.

Skin protection : Wear long sleeves to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted, air purifying or supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Appearance

Physical state : Liquid. [Clear to hazy.]

Color : Amber.

Odor : Aromatic hydrocarbon.

Odor threshold : Not available.

pH : 6 to 8

: 5% of product in 75% water/25% IPA

Melting point/freezing point : Not available.

Initial Boiling Point : Not available.

Boiling point, initial boiling point, and boiling range : Not available.

Flash point : Closed cup: 45°C (113°F) [PMCC]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability : Highly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosion limit/flammability limit : Not available.

Vapor pressure : Not available.

Relative vapor density : >1 [Air = 1]

Relative density : 0.9199 (15.6°C)

Density : 7.6628 (lbs/gal)

Solubility in water : Insoluble

Partition coefficient: n-octanol/water : Not applicable.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Dynamic (15.6°C): 5 to 7 cP

VOC : Not available.

Pour Point : Not available.

Particle characteristics

Median particle size : Not applicable.

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.

Section 10. Stability and reactivity

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials and acids.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Light aromatic naphtha	LD50 Oral	Rat	2900 mg/kg	-

Aspiration hazard

Name	Result
Light aromatic naphtha	ASPIRATION HAZARD - Category 1
Xylene	ASPIRATION HAZARD - Category 1
1,2,3-Trimethylbenzene	ASPIRATION HAZARD - Category 1
Cumene	ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure : Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects

Eye contact : Causes serious eye irritation.

Inhalation : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.

Skin contact : Causes skin irritation.

Ingestion : Can cause central nervous system (CNS) depression.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : Adverse symptoms may include the following:,pain or irritation,watering,redness

Inhalation : respiratory tract irritation,coughing,nausea or vomiting,headache,drowsiness/fatigue, dizziness/vertigo,unconsciousness

Skin contact : irritation,redness

Ingestion : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Long term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Section 11. Toxicological information

Potential chronic health effects

General : No known significant effects or critical hazards.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Reproductive toxicity : No known significant effects or critical hazards.

Persistence and degradability

Not available.

Bioaccumulative potential

Product/ingredient name	$LogP_{ow}$	BCF	Potential
Light aromatic naphtha	-	10 to 2500	high
1,2,4-Trimethylbenzene	3.63	243	low
1,3,5-Trimethylbenzene	3.42	161	low
Xylene	3.12	8.1 to 25.9	low
1,2,3-Trimethylbenzene	3.66	194.98	low
Cumene	3.55	94.69	low
Ethylbenzene	3.6	-	low

Mobility in soil

Soil/water partition coefficient (K_{OC}) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA

Section 14. Transport information

Environmental hazards	Yes.	Yes.	Yes.	Yes. The environmentally hazardous substance mark is not required.

Additional information

DOT Classification : This product may be re-classified as "Combustible Liquid," unless transported by vessel or aircraft. Non-bulk packages (less than or equal to 119 gal) of combustible liquids, that are marine pollutants, are not regulated as hazardous materials in package sizes less than the product reportable quantity, unless transported by vessel.
This product is not regulated as a marine pollutant when transported on inland waterways in sizes of ≤5 L or ≤5 kg or by road, rail, or inland air in non-bulk sizes, provided the packagings meet the general provisions of §§ 173.24 and 173.24a.
Reportable quantity 1792.8 lbs / 813.95 kg [233.74 gal / 884.82 L]. Package sizes shipped in quantities less than the product reportable quantity are not subject to the RQ (reportable quantity) transportation requirements.

TDG Classification : Product classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2.18-2.19 (Class 3), 2.7 (Marine pollutant mark).
The marine pollutant mark is not required when transported by road or rail.

IMDG : The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
Emergency schedules F-E S-E

IATA : The environmentally hazardous substance mark may appear if required by other transportation regulations.

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to IMO instruments : Not available.

DOT Reportable Quantity Xylene, 234 gal of this product.

Marine pollutant ☑ Light aromatic naphtha
1,2,4-Trimethylbenzene

Notice to reader

NOTE: The information on this SDS is based on data which is considered to be accurate. Baker Hughes, however, makes no guarantees or warranty, either expressed or implied of the accuracy or completeness of this information.

The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product.

This SDS was prepared and is to be used for this product. If the product is used as a component in another product, this SDS information may not be applicable.

SAFETY DATA SHEET

Section 1. Identification

Product name : TECHNI-BREAK 8424
Product code : DMO8424

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Emulsion Breaker.

Print date : 2/5/2015.
Validation date : 2/5/2015.
Version : 1

Supplier's details : Baker Petrolite
A Baker Hughes Company
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/MSDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. cst, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CANUTEC: 613-996-6666 (Canada 24 hours)
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : FLAMMABLE LIQUIDS - Category 3
SKIN CORROSION/IRRITATION - Category 2
CARCINOGENICITY - Category 2
TOXIC TO REPRODUCTION [Unborn child] - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) [Respiratory tract irritation and Narcotic effects] - Category 3
AQUATIC HAZARD (LONG-TERM) - Category 2

GHS label elements

Hazard pictograms :

Signal word : Warning

Hazard statements : Flammable liquid and vapor.
Causes skin irritation.
Suspected of damaging the unborn child.
Suspected of causing cancer.
May cause respiratory irritation.
May cause drowsiness and dizziness.
Toxic to aquatic life with long lasting effects.

Precautionary statements

Section 2. Hazards identification

Prevention : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Wear protective gloves. Wear eye or face protection. Keep away from heat, sparks, open flames and hot surfaces. - No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Avoid breathing vapor. Wash hands thoroughly after handling.

Response : Collect spillage. IF exposed or concerned: Get medical attention. IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing. If skin irritation occurs: Get medical attention.

Storage : Store locked up. Store in a well-ventilated place. Keep cool.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements : Avoid contact with skin and clothing. Wash thoroughly after handling.

Hazards not otherwise classified : Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
Petroleum naphtha	40 - 50	64742-47-8
Ethylbenzene	5 - 10	100-41-4
Isopropanol	1 - 5	67-63-0
Xylene	1 - 5	1330-20-7
Heavy aromatic naphtha	1 - 5	64742-94-5
Toluene	0.1 - 1	108-88-3
Cumene	0.1 - 1	98-82-8

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Continue to rinse for at least 10 minutes. Check for and remove any contact lenses. Get medical attention.

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If necessary, call a poison center or physician. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Skin contact : Wash skin thoroughly with soap and water or use recognized skin cleanser. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Section 4. First aid measures

Ingestion : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye irritation.

Inhalation : Can cause central nervous system (CNS) depression. May cause drowsiness and dizziness. May cause respiratory irritation.

Skin contact : Causes skin irritation. Defatting to the skin.

Ingestion : Can cause central nervous system (CNS) depression. Irritating to mouth, throat and stomach.

Over-exposure signs/symptoms

Eye contact : pain or irritation,watering,redness

Inhalation : respiratory tract irritation,coughing,nausea or vomiting,headache,drowsiness/fatigue, dizziness/vertigo,unconsciousness,reduced fetal weight,increase in fetal deaths,skeletal malformations

Skin contact : irritation,redness,dryness,cracking,reduced fetal weight,increase in fetal deaths,skeletal malformations

Ingestion : reduced fetal weight,increase in fetal deaths,skeletal malformations

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use dry chemical, CO_2, water spray (fog) or foam.

Unsuitable extinguishing media : Do not use water jet.

Specific hazards arising from the chemical : Flammable liquid and vapor. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Section 5. Fire-fighting measures

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Dike spill area and do not allow product to reach sewage system or surface or ground water. Notify any reportable spill to authorities. (See section 12 for environmental risks and 13 for disposal information.) Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

If RQ (Reportable Quantity) is exceeded, report to National Spill Response Office at 1-800-424-8802.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made

Section 7. Handling and storage

from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits		TWA (8 hours)			STEL (15 mins)			Ceiling

	OSHA PEL 1989	50	245	-	-	-	-	-	-	-	[1]

[1]Absorbed through skin.

Consult local authorities for acceptable exposure limits.

Only components of this product with established exposure limits appear in the box above.

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Individual protection measures

Section 8. Exposure controls/personal protection

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles.

Hand protection : Chemical-resistant gloves.

Skin protection : Wear long sleeves to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted, air purifying or supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

Appearance

Physical state : Liquid. [Clear.]

Color : Amber. [Light]

Odor : Hydrocarbon.

Odor threshold : Not available.

pH : Not available.

Melting/freezing point : Not available.

Boiling point : Not available.

Initial Boiling Point : Not available.

Flash point : Closed cup: 25.56°C (78°F) [TCC]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability (solid, gas) : Highly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosive (flammable) limits : Not available.

Vapor pressure : Not available.

Vapor density : Not available.

Relative density : 0.95

Density : 7.914 (lbs/gal)

Solubility in water : Insoluble

Partition coefficient: n-octanol/water : Not available.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Not available.

VOC : Not available.

Pour Point : Not available.

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials, acids and alkalis.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Toluene	ASPIRATION HAZARD - Category 1
Cumene	ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure : Routes of entry anticipated: Dermal, Inhalation.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Potential chronic health effects

General : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : Suspected of damaging the unborn child.

Developmental effects : No known significant effects or critical hazards.

Section 11. Toxicological information

Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

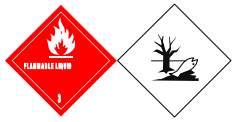
Route	ATE value
Oral	24119.1 mg/kg
Dermal	66290 mg/kg
Inhalation (gases)	301318.3 ppm
Inhalation (vapors)	130.4 mg/l

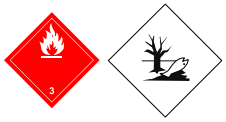
Section 12. Ecological information

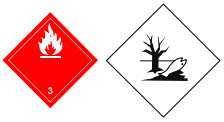
Toxicity

Product/ingredient name	Result	Species	Exposure
Petroleum naphtha	Acute LC50 2200 µg/l Fresh water	Fish - Lepomis macrochirus	4 days
	Acute LC50 2900 µg/l Fresh water	Fish - Oncorhynchus mykiss	96 hours
Ethylbenzene	Acute EC50 4600 µg/l Fresh water	Algae - Pseudokirchneriella subcapitata	72 hours
	Acute EC50 2930 to 4400 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 5200 µg/l Marine water	Crustaceans - Americamysis bahia	48 hours
	Acute LC50 4200 µg/l Fresh water	Fish - Oncorhynchus mykiss	96 hours
	Chronic NOEC 1000 µg/l Fresh water	Algae - Pseudokirchneriella subcapitata	96 hours
Isopropanol	Acute LC50 1400000 µg/l Marine water	Crustaceans - Crangon crangon	48 hours
	Acute LC50 1400000 µg/l	Fish - Gambusia affinis	96 hours
Xylene	Acute LC50 8500 µg/l Marine water	Crustaceans - Palaemonetes pugio	48 hours
	Acute LC50 13400 µg/l Fresh water	Fish - Pimephales promelas	96 hours
Toluene	Acute EC50 433 ppm Marine water	Algae - Skeletonema costatum	96 hours
	Acute EC50 12500 µg/l Fresh water	Algae - Pseudokirchneriella subcapitata	72 hours
	Acute EC50 11600 µg/l Fresh water	Crustaceans - Gammarus pseudolimnaeus	48 hours
	Acute EC50 6000 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 5500 µg/l Fresh water	Fish - Oncorhynchus kisutch	96 hours
	Chronic NOEC 500000 µg/l Fresh water	Algae - Pseudokirchneriella subcapitata	96 hours
	Chronic NOEC 1000 µg/l Fresh water	Daphnia - Daphnia magna	21 days
Cumene	Acute EC50 2600 µg/l Fresh water	Algae - Pseudokirchneriella subcapitata	72 hours
	Acute LC50 7400 to 11290 µg/l Fresh water	Crustaceans - Artemia sp.	48 hours
	Acute LC50 30500 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 2700 µg/l Fresh water	Fish - Oncorhynchus mykiss	96 hours

Persistence and degradability







Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA
UN number	UN1993	UN1993	UN1993	UN1993

Indicates information that has changed from previously issued version.

Notice to reader

NOTE: The information on this MSDS is based on data which is considered to be accurate. Baker Hughes, however, makes no guarantees or warranty, either expressed or implied of the accuracy or completeness of this information.

The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product.

This MSDS was prepared and is to be used for this product. If the product is used as a component in another product, this MSDS information may not be applicable.

SAFETY DATA SHEET

Section 1. Identification

Product name : PETROSWEET™ HSW700 SCAVENGER
™ a trademark of Baker Hughes Incorporated.

Product code : HSW700

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Hydrogen Sulfide Scavenger.

Print date : 10/21/2019

Validation date : 10/21/2019

Version : 2

Supplier's details : Baker Petrolite LLC
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/SDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. CST, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : FLAMMABLE LIQUIDS - Category 3
ACUTE TOXICITY (oral) - Category 4
ACUTE TOXICITY (inhalation) - Category 3
SKIN IRRITATION - Category 2
SERIOUS EYE DAMAGE - Category 1
SKIN SENSITIZATION - Category 1
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (optic nerve) - Category 1
SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) (respiratory tract) - Category 1

GHS label elements

Hazard pictograms :

Signal word : Danger

Section 2. Hazards identification

Hazard statements : Flammable liquid and vapor.
Toxic if inhaled.
Harmful if swallowed.
Causes serious eye damage.
Causes skin irritation.
May cause an allergic skin reaction.
Causes damage to organs. (optic nerve)
Causes damage to organs through prolonged or repeated exposure. (respiratory tract)

Precautionary statements

Prevention : Wear protective gloves: > 8 hours (breakthrough time): Nitrile or Neoprene gloves. 4H gloves. Butyl rubber gloves.. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Do not breathe vapor. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.

Response : Get medical attention if you feel unwell. IF exposed: Call a POISON CENTER or physician. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician. IF SWALLOWED: Call a POISON CENTER or physician if you feel unwell. Rinse mouth. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician.

Storage : Store locked up. Store in a well-ventilated place. Keep cool.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Hazards not otherwise classified : None known.

Additional information

The vapor pressure of the alkanolamine/aldehyde condensate in this product is extremely low. In hydrogen sulfide scavenging applications in oil and gas production or processing of hydrogen streams, mechanically generated mists or aerosols are not expected to be formed. Therefore, in these applications human inhalation exposure to this alkanolamine/aldehyde condensate is not expected to occur.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
Alkanolamine/aldehyde condensate	40 - 50	4719-04-4
Methanol	5 - 10	67-56-1
Monoethanolamine	1 - 5	141-43-5

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Get medical attention immediately. Call a poison center or physician. Immediately flush the eye(s) continuously with lukewarm, gently flowing water for at least 20-60 minutes while holding the eyelid(s) open. Check for and remove any contact lenses. Chemical burns must be treated promptly by a physician.

Section 4. First aid measures

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Skin contact : Get medical attention immediately. Call a poison center or physician. Wash affected area with soap and mild detergent for at least 20 - 60 minutes. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Ingestion : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye damage.

Inhalation : Toxic if inhaled.

Skin contact : Causes skin irritation. May cause an allergic skin reaction.

Ingestion : Harmful if swallowed.

Over-exposure signs/symptoms

Eye contact : pain,watering,redness

Inhalation : No specific data.

Skin contact : pain or irritation,redness,blistering may occur

Ingestion : stomach pains

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use dry chemical, CO_2, alcohol-resistant foam or water spray (fog).

Unsuitable extinguishing media : Do not use water jet.

Section 5. Fire-fighting measures

Specific hazards arising from the chemical : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back.

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide,nitrogen oxides

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

If RQ (Reportable Quantity) is exceeded, report to National Spill Response Office at 1-800-424-8802.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Additional information

The recommended shelf life for this product is 12 months from the manufacturing date.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Alkanolamine/aldehyde condensate Methanol	None. **ACGIH TLV (United States, 3/2018). Absorbed through skin.** STEL: 328 mg/m³, 0 times per shift, 15 minutes. STEL: 250 ppm, 0 times per shift, 15 minutes. TWA: 262 mg/m³, 0 times per shift, 8 hours. TWA: 200 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016). Absorbed through skin.** STEL: 325 mg/m³, 0 times per shift, 15 minutes. STEL: 250 ppm, 0 times per shift, 15 minutes. TWA: 260 mg/m³, 0 times per shift, 10 hours. TWA: 200 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018).** TWA: 260 mg/m³, 0 times per shift, 8 hours. TWA: 200 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin.** STEL: 325 mg/m³, 0 times per shift, 15 minutes. STEL: 250 ppm, 0 times per shift, 15 minutes. TWA: 260 mg/m³, 0 times per shift, 8 hours. TWA: 200 ppm, 0 times per shift, 8 hours.

Section 8. Exposure controls/personal protection

Monoethanolamine	**ACGIH TLV (United States, 3/2018).** STEL: 15 mg/m³, 0 times per shift, 15 minutes. STEL: 6 ppm, 0 times per shift, 15 minutes. TWA: 7.5 mg/m³, 0 times per shift, 8 hours. TWA: 3 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016).** STEL: 15 mg/m³, 0 times per shift, 15 minutes. STEL: 6 ppm, 0 times per shift, 15 minutes. TWA: 8 mg/m³, 0 times per shift, 10 hours. TWA: 3 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018).** TWA: 6 mg/m³, 0 times per shift, 8 hours. TWA: 3 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** STEL: 15 mg/m³, 0 times per shift, 15 minutes. STEL: 6 ppm, 0 times per shift, 15 minutes. TWA: 8 mg/m³, 0 times per shift, 8 hours. TWA: 3 ppm, 0 times per shift, 8 hours.

Consult local authorities for acceptable exposure limits.

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles. If inhalation hazards exist, a full-face respirator may be required instead.

Hand protection : Chemical-resistant gloves: Nitrile or Neoprene gloves. 4H gloves. Butyl rubber gloves.

Skin protection : Wear long sleeves and chemical resistant apron to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

Appearance

Physical state : Liquid.

Color : Light yellow to Straw Yellow.

Odor : Amine like.

Odor threshold : Not available.

pH : 10 to 11.5

: 5% of product in 75% isopropanol / 25% water solution

Melting/freezing point : Not available.

Boiling point : Not available.

Initial Boiling Point : Not available.

Flash point : Closed cup: 52.2°C (126°F) [SFCC]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability (solid, gas) : Flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosive (flammable) limits : Not available.

Vapor pressure : 32.4 kPa (243 mm Hg, 4.7 psig) @ 54.4°C, 130 F (Reid)

Vapor density : >1 [Air = 1]

Relative density : 1.074 (15.6°C)

Density : 8.95 (lbs/gal)

Solubility in water : Soluble

Partition coefficient: n-octanol/water : Not available.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Dynamic (15.6°C): 14 to 16 cP

VOC : Not available.

Pour Point : -37°C (-34.6°F)

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.

Section 10. Stability and reactivity

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials, reducing materials and acids.
Methanol is incompatible and may react with acetyl bromide, alkyl aluminum solutions, beryllium hydride, boron trichloride, nitric acid, cyanuric chloride, dichloromethane, diethylzinc, metals (granulated forms of aluminum and magnesium – including aluminum and zinc salts), phosphorus III oxide, and potassium tert-butoxide.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Alkanolamine/aldehyde condensate	LC50 Inhalation Dusts and mists	Rat - Female	0.338 mg/l	4 hours
	LC50 Inhalation Dusts and mists	Rat - Male	0.4 mg/l	4 hours
	LD50 Oral	Rat	763 mg/kg	-
Methanol	LC50 Inhalation Gas.	Rat	145000 ppm	1 hours
	LC50 Inhalation Gas.	Rat	64000 ppm	4 hours
	LD50 Dermal	Rabbit	15800 mg/kg	-

Specific target organ toxicity (repeated exposure)

Name	Category	Route of exposure	Target organs
Alkanolamine/aldehyde condensate	Category 1	Not determined	respiratory tract

Aspiration hazard

Section 11. Toxicological information

Not available.

Information on the likely routes of exposure : Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects

Eye contact : Causes serious eye damage.

Inhalation : Toxic if inhaled.

Skin contact : Causes skin irritation. May cause an allergic skin reaction.

Ingestion : Harmful if swallowed.

Potential chronic health effects

General : Causes damage to organs through prolonged or repeated exposure. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : No known significant effects or critical hazards.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Route	ATE value
Oral	657.8 mg/kg
Dermal	3077.8 mg/kg
Inhalation (vapors)	30.78 mg/l
Inhalation (dusts and mists)	0.7659 mg/l

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
Alkanolamine/aldehyde condensate	Acute EC50 6.66 mg/l	Algae - Green algae	72 hours
	Acute EC50 11.9 mg/l	Daphnia - Daphnia magna	48 hours
	Acute LC50 16.07 mg/l	Fish - Brachadanio rerio	96 hours

	Acute LC50 180 mg/l	Fish	96 hours

Section 12. Ecological information

Persistence and degradability

Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Packing group	II	II	II	II
Environmental hazards	No.	No.	No.	No.

Additional information

TDG Classification : Product classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2.26-2.36 (Class 6), 2.18-2.19 (Class 3).

IMDG : **Emergency schedules** F-E S-D

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL and the IBC Code : Not available.

DOT Reportable Quantity Methanol, 5988 gal of this product.

Section 14. Transport information

Marine pollutant Not available.

North-America NAERG : 131

Section 15. Regulatory information

U.S. Federal regulations : **TSCA 4(a) final test rules**: Alkanolamine/aldehyde condensate

TSCA 12(b) one-time export: Alkanolamine/aldehyde condensate

TSCA 12(b) annual export notification: No products were found.

United States inventory (TSCA 8b): All components are listed or exempted.

Clean Water Act (CWA) 307: No products were found.

Clean Water Act (CWA) 311: No products were found.

United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs) :

List name	Status	Ingredient name	Name on list	Conc.
United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs)	Listed	Methanol	Methanol	5 - 10

SARA 302/304 : No products were found.

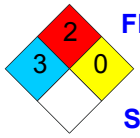
SARA 311/312

Classification : Fire hazard
Immediate (acute) health hazard
Delayed (chronic) health hazard

SARA 313

	Product name	CAS number	%
Supplier notification	Methanol	67-56-1	5 - 10

California Prop. 65



⚠ **WARNING**: This product can expose you to methanol, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

Canada

Canada (CEPA DSL): : All components are listed or exempted.

SAFETY DATA SHEET

Section 1. Identification

Product name : PAO2000 PARAFFIN DISPERSANT

Product code : PAO2000

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Paraffin Dispersant.

Print date : 1/29/2020

Validation date : 1/28/2020

Version : 2

Supplier's details : Baker Petrolite LLC
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/SDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. CST, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : FLAMMABLE LIQUIDS - Category 3
ACUTE TOXICITY (dermal) - Category 4
ACUTE TOXICITY (inhalation) - Category 4
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
CARCINOGENICITY - Category 2
TOXIC TO REPRODUCTION (Unborn child) - Category 2
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3
SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) (hearing organs) - Category 2

GHS label elements

Hazard pictograms :

Signal word : Warning

Section 2. Hazards identification

Hazard statements : Flammable liquid and vapor.
Harmful in contact with skin or if inhaled.
Causes serious eye irritation.
Causes skin irritation.
Suspected of damaging the unborn child.
Suspected of causing cancer.
May cause drowsiness or dizziness.
May cause damage to organs through prolonged or repeated exposure. (hearing organs)

Precautionary statements

Prevention : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves: > 8 hours (breakthrough time): 4H gloves. Viton gloves. Nitrile gloves.. Wear eye or face protection. Wear protective clothing. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Do not breathe vapor. Wash hands thoroughly after handling.

Response : Get medical attention if you feel unwell. IF exposed or concerned: Get medical attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician if you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Call a POISON CENTER or physician if you feel unwell. Take off contaminated clothing and wash it before reuse. If skin irritation occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

Storage : Store locked up. Store in a well-ventilated place. Keep cool.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements : Avoid contact with skin and clothing. Wash thoroughly after handling.

Hazards not otherwise classified : Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
Xylene	60 - 70	1330-20-7
Alkylaryl sulfonates	10 - 20	Trade secret.
Ethylbenzene	10 - 20	100-41-4
Toluene	1 - 5	108-88-3

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Continue to rinse for at least 10 minutes. Check for and remove any contact lenses. Get medical attention.

Section 4. First aid measures

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Skin contact : Wash skin thoroughly with soap and water or use recognized skin cleanser. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. If necessary, call a poison center or physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Ingestion : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye irritation.

Inhalation : Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.

Skin contact : Harmful in contact with skin. Causes skin irritation. Defatting to the skin.

Ingestion : Can cause central nervous system (CNS) depression.

Over-exposure signs/symptoms

Eye contact : pain or irritation,watering,redness

Inhalation : nausea or vomiting,headache,drowsiness/fatigue,dizziness/vertigo,unconsciousness, reduced fetal weight,increase in fetal deaths,skeletal malformations

Skin contact : irritation,redness,dryness,cracking,reduced fetal weight,increase in fetal deaths,skeletal malformations

Ingestion : reduced fetal weight,increase in fetal deaths,skeletal malformations

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Additional information

If product is ingested and vomiting occurs naturally, have person lean forward to reduce the risk of aspiration into the lungs.

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use dry chemical, CO_2, alcohol-resistant foam or water spray (fog).

Unsuitable extinguishing media : Do not use water jet.

Specific hazards arising from the chemical : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back.

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide,nitrogen oxides,sulfur oxides

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

If RQ (Reportable Quantity) is exceeded, report to National Spill Response Office at 1-800-424-8802.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Xylene	**ACGIH TLV (United States, 3/2018).** STEL: 651 mg/m³, 0 times per shift, 15 minutes. STEL: 150 ppm, 0 times per shift, 15 minutes. TWA: 434 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours. **OSHA PEL (United States, 5/2018).** TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** STEL: 655 mg/m³, 0 times per shift, 15 minutes. STEL: 150 ppm, 0 times per shift, 15 minutes. TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours.
Alkylaryl sulfonates	None.
Ethylbenzene	**ACGIH TLV (United States, 3/2018).** TWA: 20 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016).** STEL: 545 mg/m³, 0 times per shift, 15 minutes. STEL: 125 ppm, 0 times per shift, 15 minutes. TWA: 435 mg/m³, 0 times per shift, 10 hours. TWA: 100 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018).** TWA: 435 mg/m³, 0 times per shift, 8 hours.

Section 8. Exposure controls/personal protection

Toluene	TWA: 100 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** STEL: 545 mg/m³, 0 times per shift, 15 minutes. STEL: 125 ppm, 0 times per shift, 15 minutes. TWA: 435 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours. **ACGIH TLV (United States, 3/2018).** TWA: 20 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016).** STEL: 560 mg/m³, 0 times per shift, 15 minutes. STEL: 150 ppm, 0 times per shift, 15 minutes. TWA: 375 mg/m³, 0 times per shift, 10 hours. TWA: 100 ppm, 0 times per shift, 10 hours. **OSHA PEL 1989 (United States, 3/1989).** STEL: 560 mg/m³, 0 times per shift, 15 minutes. STEL: 150 ppm, 0 times per shift, 15 minutes. TWA: 375 mg/m³, 0 times per shift, 8 hours. TWA: 100 ppm, 0 times per shift, 8 hours. **OSHA PEL Z2 (United States, 2/2013).** AMP: 500 ppm, 0 times per shift, 10 minutes. CEIL: 300 ppm, 0 times per shift, 0 hours. TWA: 200 ppm, 0 times per shift, 8 hours.

Consult local authorities for acceptable exposure limits.

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles.

Hand protection : Chemical-resistant gloves: 4H gloves. Viton gloves. Nitrile gloves.

Skin protection : Wear long sleeves to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted, air purifying or supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

Appearance

Physical state : Liquid.

Color : Amber. [Light]

Odor : Aromatic solvent.

Odor threshold : Not available.

pH : 4 to 8

: 10% of product

Melting/freezing point : Not available.

Boiling point : Not available.

Initial Boiling Point : Not available.

Flash point : Closed cup: 29°C (84.2°F) [Unknown]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability (solid, gas) : Highly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosive (flammable) limits : Not available.

Vapor pressure : 9.7 kPa (72.4 mm Hg (1.4 psig)) @ 54.44°C (130 F) (Reid)

Vapor density : >1 [Air = 1]

Relative density : 0.894 (15.6°C)

Density : 7.45 (lbs/gal)

Solubility in water : Insoluble

Partition coefficient: n-octanol/water : Not available.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Not available.

VOC : Not available.

Pour Point : -29°C (-20.2°F)

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials and acids.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Xylene	LC50 Inhalation Gas.	Rat	5000 ppm	4 hours
	LD50 Dermal	Rabbit	>1700 mg/kg	-
	LD50 Oral	Male rat	3523 mg/kg	-
	LD50 Oral	Rat	4300 mg/kg	-
Ethylbenzene	LD50 Dermal	Rabbit	15400 mg/kg	-
	LD50 Oral	Rat	3500 mg/kg	-
Toluene	LC50 Inhalation Vapor	Female rat	5100 ppm	4 hours
	LC50 Inhalation Vapor	Rat	49000 mg/m³	4 hours
	LD50 Oral	Rat	636 mg/kg	-

Irritation/Corrosion

No applicable toxicity data

Sensitization

No applicable toxicity data

Mutagenicity

No applicable toxicity data

Carcinogenicity

Product/ingredient name	OSHA	IARC	NTP
Xylene	-	3	-
Ethylbenzene	-	2B	-
Toluene	-	3	-

Reproductive toxicity

No applicable toxicity data

Teratogenicity

No applicable toxicity data

Specific target organ toxicity (single exposure)

Name	Category	Route of exposure	Target organs
Xylene	Category 3	Not applicable.	Narcotic effects
Toluene	Category 3	Not applicable.	Narcotic effects

Specific target organ toxicity (repeated exposure)

Name	Category	Route of exposure	Target organs
Ethylbenzene	Category 2	Not determined	hearing organs

Aspiration hazard

Name	Result
Xylene	ASPIRATION HAZARD - Category 1
Toluene	ASPIRATION HAZARD - Category 1

Information on the likely routes of exposure : Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects

Eye contact : Causes serious eye irritation.

Section 11. Toxicological information

Inhalation : Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.

Skin contact : Harmful in contact with skin. Causes skin irritation. Defatting to the skin.

Ingestion : Can cause central nervous system (CNS) depression.

Potential chronic health effects

General : May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : Suspected of damaging the unborn child.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Route	ATE value
Oral	2135.1 mg/kg
Dermal	1578.2 mg/kg
Inhalation (gases)	7173.6 ppm
Inhalation (vapors)	90.64 mg/l

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
Xylene	Acute LC50 8500 µg/l Marine water	Crustaceans - Palaemonetes pugio	48 hours
	Acute LC50 13400 µg/l Fresh water	Fish - Pimephales promelas	96 hours
Ethylbenzene	Acute EC50 4600 µg/l Fresh water	Algae - Pseudokirchneriella subcapitata	72 hours
	Acute EC50 2930 to 4400 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 5200 µg/l Marine water	Crustaceans - Americamysis bahia	48 hours
	Acute LC50 4200 µg/l Fresh water	Fish - Oncorhynchus mykiss	96 hours

	Chronic NOEC 1000 µg/l Fresh water	Daphnia - Daphnia magna	21 days

Section 12. Ecological information

Persistence and degradability

Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA

SAFETY DATA SHEET

Section 1. Identification

Product name : TRETOLITE™ RBW6560 WATER CLARIFIER
™ a trademark of Baker Hughes Incorporated.

Product code : RBW6560

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Water clarifier.

Print date : 1/19/2023

Validation date : 1/19/2023

Version : 2.02

Supplier's details : Baker Petrolite LLC
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/SDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. CST, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.

Classification of the substance or mixture : Not classified.

GHS label elements

Signal word : No signal word.

Hazard statements : No known significant effects or critical hazards.

Precautionary statements

Prevention : Not applicable.

Response : Not applicable.

Storage : Not applicable.

Disposal : Not applicable.

Hazards not otherwise classified : None known.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
No hazardous ingredient		

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

Skin contact : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

Ingestion : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : No known significant effects or critical hazards.

Inhalation : No known significant effects or critical hazards.

Skin contact : No known significant effects or critical hazards.

Ingestion : No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact : No specific data.

Inhalation : No specific data.

Skin contact : No specific data.

Ingestion : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media : None known.

Section 5. Fire-fighting measures

Specific hazards arising from the chemical : In a fire or if heated, a pressure increase will occur and the container may burst.

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8).

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Consult local authorities for acceptable exposure limits.

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Appropriate engineering controls : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles.

Hand protection : Chemical-resistant gloves: Neoprene gloves.

Skin protection : Wear long sleeves to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted, air purifying or supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Appearance

Physical state : Liquid.

Color : Milky-white.

Odor : Sweet.

Odor threshold : Not available.

pH : 6.5

: 5% in water

Melting point/freezing point : Not available.

Initial Boiling Point : Not available.

Boiling point, initial boiling point, and boiling range : Not available.

Flash point : Closed cup: >93.4°C (>200.1°F) [TCC]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability : Slightly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosion limit/flammability limit : Not available.

Vapor pressure : Not available.

Relative vapor density : >1 [Air = 1]

Section 9. Physical and chemical properties

Relative density : 1.019 (15.6°C)

Density : 8.48 (lbs/gal)

Solubility in water : Soluble

Partition coefficient: n-octanol/water : Not applicable.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Not available.

VOC : Not available.

Pour Point : -1°C (30.2°F)

Particle characteristics

Median particle size : Not applicable.

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : No specific data.

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

No available toxicity data.

Irritation/Corrosion

No available toxicity data.

Sensitization

No available toxicity data.

Mutagenicity

No available toxicity data.

Carcinogenicity

Classification

No available toxicity data.

Reproductive toxicity

No available toxicity data.

Teratogenicity

No available toxicity data.

Section 11. Toxicological information

Specific target organ toxicity (single exposure)

Not applicable.

Specific target organ toxicity (repeated exposure)

Not applicable.

Aspiration hazard

Not available.

Information on the likely routes of exposure : Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects

Eye contact : No known significant effects or critical hazards.

Inhalation : No known significant effects or critical hazards.

Skin contact : No known significant effects or critical hazards.

Ingestion : No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : No specific data.

Inhalation : No specific data.

Skin contact : No specific data.

Ingestion : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Long term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Potential chronic health effects

General : No known significant effects or critical hazards.

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : No known significant effects or critical hazards.

Reproductive toxicity : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Not available.

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
TRETOLITE™ RBW6560 WATER CLARIFIER	Acute EC50 >1000 mg/l	Algae	96 hours
	Acute EC50 810 mg/l	Algae	96 hours
	Acute LC50 >3200 mg/l	Fish	96 hours
	Acute LC50 >3200 mg/l	Fish	96 hours

Persistence and degradability

Not available.

Bioaccumulative potential

Not available.

Mobility in soil

Soil/water partition coefficient (K_{OC}) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.
UN proper shipping name	-	-	-	-
Transport hazard class(es)	-	-	-	-
Packing group	-	-	-	-
Environmental hazards	No.	No.	No.	No.

Additional information

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Section 14. Transport information

Transport in bulk according to IMO instruments : Not available.

DOT Reportable Quantity Not applicable.

Marine pollutant Not available.

North-America NAERG : Not available.

Section 15. Regulatory information

U.S. Federal regulations : **TSCA 12(b) one-time export**: No products were found.
TSCA 12(b) annual export notification: No products were found.
United States inventory (TSCA 8b): All components are active or exempted.
Clean Water Act (CWA) 307: No products were found.
Clean Water Act (CWA) 311: No products were found.

United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs) :

List name	Status	Ingredient name	Name on list	Conc.
None of the components are listed.				

SARA 302/304 : No products were found.

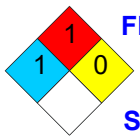
SARA 311/312

Classification : Not applicable.

SARA 313

Supplier notification : No products were found.

California Prop. 65



This product does not require a Safe Harbor warning under California Prop. 65.

Canada

Canada (CEPA DSL): : All components are listed or exempted.

Section 16. Other information

History

Date of printing : 1/19/2023

Key to abbreviations : ATE = Acute Toxicity Estimate
BCF = Bioconcentration Factor
GHS = Globally Harmonized System of Classification and Labelling of Chemicals
IATA = International Air Transport Association
IBC = Intermediate Bulk Container
IMDG = International Maritime Dangerous Goods
LogPow = logarithm of the octanol/water partition coefficient
MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)
N/A = Not available
SGG = Segregation Group
UN = United Nations

Section 16. Other information

Indicates information that has changed from previously issued version.

Notice to reader

NOTE: The information on this SDS is based on data which is considered to be accurate. Baker Hughes, however, makes no guarantees or warranty, either expressed or implied of the accuracy or completeness of this information.

The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product.

This SDS was prepared and is to be used for this product. If the product is used as a component in another product, this SDS information may not be applicable.

SAFETY DATA SHEET

Section 1. Identification

Product name : FORSA™ SCW4056 SCALE INHIBITOR
™ a trademark of Baker Hughes Incorporated.

Product code : SCW4056

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Scale Inhibitor.

Print date : 4/6/2017

Validation date : 4/6/2017

Version : 2.01

Supplier's details : Baker Petrolite LLC
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/SDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. CST, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CANUTEC: 613-996-6666 (Canada 24 hours)
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
RESPIRATORY SENSITIZATION - Category 1
SKIN SENSITIZATION - Category 1

GHS label elements

Hazard pictograms :

Signal word : Danger

Hazard statements : Causes serious eye irritation.
Causes skin irritation.
May cause allergy or asthma symptoms or breathing difficulties if inhaled.
May cause an allergic skin reaction.

Precautionary statements

Prevention : Wear protective gloves: > 8 hours (breakthrough time): Nitrile or Neoprene gloves. 4H gloves.. Wear eye or face protection. Wear respiratory protection. Avoid breathing vapor. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.

Section 2. Hazards identification

Response : IF INHALED: If breathing is difficult, remove person to fresh air and keep comfortable for breathing. If experiencing respiratory symptoms: Call a POISON CENTER or physician. IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

Storage : Not applicable.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Hazards not otherwise classified : None known.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
Phosphonate salt	10 - 20	Trade secret.
Sodium bisulfite	0.1 - 1	7631-90-5

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Continue to rinse for at least 10 minutes. Check for and remove any contact lenses. Get medical attention.

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. In the event of any complaints or symptoms, avoid further exposure.

Skin contact : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Ingestion : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye irritation.

Inhalation : May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Skin contact : Causes skin irritation. May cause an allergic skin reaction.

Ingestion : No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact : pain or irritation,watering,redness

Section 4. First aid measures

Inhalation : wheezing and breathing difficulties,asthma

Skin contact : irritation,redness

Ingestion : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media : None known.

Specific hazards arising from the chemical : In a fire or if heated, a pressure increase will occur and the container may burst.

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide,nitrogen oxides,phosphorus oxides,halogenated compounds,metal oxide/oxides

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Section 6. Accidental release measures

Small spill : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Dike spill area and do not allow product to reach sewage system or surface or ground water. Notify any reportable spill to authorities. (See section 12 for environmental risks and 13 for disposal information.) Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

If RQ (Reportable Quantity) is exceeded, report to National Spill Response Office at 1-800-424-8802.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Phosphonate salt	None.
Sodium bisulfite	**ACGIH TLV (United States, 3/2015).** TWA: 5 mg/m³, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** TWA: 5 mg/m³, 0 times per shift, 8 hours.

Consult local authorities for acceptable exposure limits.

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Section 8. Exposure controls/personal protection

Appropriate engineering controls : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles.

Hand protection : Chemical-resistant gloves: Nitrile or Neoprene gloves. 4H gloves.

Skin protection : Wear long sleeves to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted, air purifying or supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

Appearance

Physical state : Liquid. [Clear.]

Color : Yellow. to Yellow. [Light]

Odor : Mild.

Odor threshold : Not available.

pH : 4.6

: 5% in water

Melting/freezing point : Not available.

Boiling point : 100°C (212°F)

Initial Boiling Point : Not available.

Flash point : Closed cup: >93.4°C (>200.1°F) [SFCC]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability (solid, gas) : Slightly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosive (flammable) limits : Not available.

Vapor pressure : 20.7 kPa (155.1 mm Hg (3 psig)) @ 54.44°C (130 F) (Reid)

Vapor density : >1 [Air = 1]

Relative density : 1.1035 (15.6°C)

Density : 9.19 (lbs/gal)

Solubility in water : Soluble

Partition coefficient: n-octanol/water : Not available.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Not available.

Section 9. Physical and chemical properties

VOC : Not available.

Pour Point : Not available.

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : No specific data.

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Sodium bisulfite	LD50 Oral	Rat	2 g/kg	-

Irritation/Corrosion

No applicable toxicity data

Sensitization

No applicable toxicity data

Mutagenicity

No applicable toxicity data

Carcinogenicity

No applicable toxicity data

Reproductive toxicity

No applicable toxicity data

Teratogenicity

No applicable toxicity data

Specific target organ toxicity (single exposure)

Name	Category	Route of exposure	Target organs
Sodium bisulfite	Category 3	Not applicable.	Respiratory tract irritation

Specific target organ toxicity (repeated exposure)

Not applicable.

Aspiration hazard

Section 11. Toxicological information

Not available.

Information on the likely routes of exposure : Routes of entry anticipated: Dermal.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Potential chronic health effects

General : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : No known significant effects or critical hazards.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Route	ATE value
Oral	78188.5 mg/kg

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
Sodium bisulfite	Acute LC50 1.94 ppm Fresh water	Crustaceans - Ceriodaphnia dubia	48 hours
	Acute LC50 119000 µg/l Fresh water	Daphnia - Daphnia magna - Adult	48 hours
	Acute LC50 26.2 ppm Fresh water	Fish - Pimephales promelas	96 hours

Persistence and degradability

Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA
UN number	Not regulated.	Not regulated.	Not regulated.	Not regulated.
UN proper shipping name	-	-	-	-
Transport hazard class(es)	-	-	-	-
Packing group	-	-	-	-
Environmental hazards	No.	No.	No.	No.
Additional information	-	-	-	-

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL and the IBC Code : Not available.

DOT Reportable Quantity Not applicable.

Marine pollutant Not available.

North-America NAERG : Not available.

Section 15. Regulatory information

U.S. Federal regulations : **TSCA 12(b) one-time export**: No products were found.

TSCA 12(b) annual export notification: No products were found.

United States inventory (TSCA 8b): All components are listed or exempted.

Clean Water Act (CWA) 307: No products were found.

Clean Water Act (CWA) 311: Sodium bisulfite

United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs) :

List name	Status	Ingredient name	Name on list	Conc.
None of the components are listed.				

Section 15. Regulatory information

SAFETY DATA SHEET

Section 1. Identification

Product name : FORSA™ SRW156 SCALE INHIBITOR
™ a trademark of Baker Hughes Incorporated.

Product code : SRW156

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Scale Inhibitor.

Print date : 1/20/2023

Validation date : 1/20/2023

Version : 4.01

Supplier's details : Baker Petrolite LLC
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/SDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. CST, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : CORROSIVE TO METALS - Category 1
ACUTE TOXICITY (inhalation) - Category 4
SKIN CORROSION - Category 1
SERIOUS EYE DAMAGE - Category 1
CARCINOGENICITY - Category 2

GHS label elements

Hazard pictograms :

Signal word : Danger

Hazard statements : May be corrosive to metals.
Causes severe skin burns and eye damage.
Harmful if inhaled.
Suspected of causing cancer.

Precautionary statements

Prevention : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep only in original packaging. Use only outdoors or in a well-ventilated area. Avoid breathing vapor. Wash thoroughly after handling.

Section 2. Hazards identification

Response : Absorb spillage to prevent material damage. IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a POISON CENTER or doctor. IF SWALLOWED: Immediately call a POISON CENTER or doctor. Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. Immediately call a POISON CENTER or doctor. Wash contaminated clothing before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor.

Storage : Store locked up. Store in a corrosion resistant container with a resistant inner liner.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Hazards not otherwise classified : None known.

Additional information

Corrosive to aluminum and steel.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
Sodium edetate	30 - 40	Trade secret.
Sodium hydroxide	1 - 5	1310-73-2
Trisodium nitrilotriacetic acid	0.1 - 1	5064-31-3

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Get medical attention immediately. Call a poison center or physician. Immediately flush the eye(s) continuously with lukewarm, gently flowing water for at least 20-60 minutes while holding the eyelid(s) open. Check for and remove any contact lenses. Chemical burns must be treated promptly by a physician.

Inhalation : Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Skin contact : Get medical attention immediately. Call a poison center or physician. Wash affected area with soap and mild detergent for at least 20 - 60 minutes. Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Section 4. First aid measures

Ingestion : Call a poison center or physician. Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye damage.

Inhalation : Harmful if inhaled.

Skin contact : Causes severe burns.

Ingestion : No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact : Adverse symptoms may include the following:,pain,watering,redness

Inhalation : No specific data.

Skin contact : pain or irritation,redness,blistering may occur

Ingestion : Adverse symptoms may include the following:,stomach pains

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media : None known.

Specific hazards arising from the chemical : In a fire or if heated, a pressure increase will occur and the container may burst.

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide,nitrogen oxides,metal oxide/oxides

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Absorb spillage to prevent material damage. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Absorb spillage to prevent material damage. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

If RQ (Reportable Quantity) is exceeded, report to National Spill Response Office at 1-800-424-8802.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. Absorb spillage to prevent material damage.

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Store in a corrosion resistant container with a resistant inner liner. Store locked up. Keep away from metals. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Sodium edetate	None.
Sodium hydroxide	**ACGIH TLV (United States, 4/2014).** C: 2 mg/m³, 0 times per shift, 0 hours. **NIOSH REL (United States, 10/2013).** CEIL: 2 mg/m³, 0 times per shift, 0 hours. **OSHA PEL (United States, 2/2013).** TWA: 2 mg/m³, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989).** CEIL: 2 mg/m³, 0 times per shift, 0 hours.
Trisodium nitrilotriacetic acid	None.

Consult local authorities for acceptable exposure limits.

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles. If inhalation hazards exist, a full-face respirator may be required instead.

Hand protection : Chemical-resistant gloves.

Skin protection : Wear long sleeves and chemical resistant apron to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted, air purifying or supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Appearance

Physical state : Liquid. [ ]

Color : Yellow. [Light]

Odor : Amine like. [Slight]

Odor threshold : Not available.

pH : 11 to 11.8

: Neat-without dilution.

Melting point/freezing point : -31°C (-23.8°F)

Initial Boiling Point : Not available.

Section 9. Physical and chemical properties

Boiling point, initial boiling point, and boiling range : 106°C (222.8°F)

Flash point : Closed cup: >93.4°C (>200.1°F) [TCC]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability : Slightly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosion limit/flammability limit : Not available.

Vapor pressure : 20.7 kPa (155.1 mm Hg (3 psig)) @ 54.44°C (130 F) (Reid)

Relative vapor density : >1 [Air = 1]

Relative density : 1.31 (15.6°C)

Density : 10.91 (lbs/gal)

Solubility in water : Soluble

Partition coefficient: n-octanol/water : Not applicable.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Not available.

VOC : Not available.

Pour Point : Not available.

Particle characteristics

Median particle size : Not applicable.

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : No specific data.

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials, metals, acids, alkalis and moisture.
This material is highly corrosive and may react with metals to produce flammable hydrogen gas. Do not use aluminum, copper/copper alloys, or zinc for transportation, handling, or storage. Do not use mild steel for transportation, handling or storage.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
FORSA™ SRW156 SCALE INHIBITOR	LD50 Dermal	Rabbit	>5000 mg/kg	-
	LD50 Oral	Rat	3030 mg/kg	-
Sodium edetate	LD50 Oral	Rat	10 g/kg	-
Trisodium nitrilotriacetic acid	LD50 Oral	Rat	1100 mg/kg	-

Irritation/Corrosion

No available toxicity data.

Sensitization

No available toxicity data.

Mutagenicity

No available toxicity data.

Carcinogenicity

Classification

Product/ingredient name	OSHA	IARC	NTP
Trisodium nitrilotriacetic acid	-	2B	-

Reproductive toxicity

No available toxicity data.

Teratogenicity

No available toxicity data.

Specific target organ toxicity (single exposure)

Not applicable.

Specific target organ toxicity (repeated exposure)

Not applicable.

Aspiration hazard

Not available.

Information on the likely routes of exposure : Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects

Eye contact : Causes serious eye damage.

Inhalation : Harmful if inhaled.

Skin contact : Causes severe burns.

Ingestion : No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : Adverse symptoms may include the following:,pain,watering,redness

Inhalation : No specific data.

Skin contact : pain or irritation,redness,blistering may occur

Ingestion : Adverse symptoms may include the following:,stomach pains

Section 11. Toxicological information

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Long term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Potential chronic health effects

General : No known significant effects or critical hazards.

Carcinogenicity : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.

Mutagenicity : No known significant effects or critical hazards.

Reproductive toxicity : No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates

Product/ingredient name	Oral (mg/kg)	Dermal (mg/kg)	Inhalation (gases) (ppm)	Inhalation (vapors) (mg/l)	Inhalation (dusts and mists) (mg/l)
FORSA™ SRW156 SCALE INHIBITOR	3030	Not available.	Not available.	Not available.	3.8

Trisodium nitrilotriacetic acid	1100	Not available.	Not available.	Not available.	Not available.

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
Sodium edetate	Acute LC50 486000 to 500000 µg/l Fresh water	Fish - Lepomis macrochirus	96 hours
Sodium hydroxide	Acute EC50 40.38 mg/l Fresh water	Crustaceans - Ceriodaphnia dubia - Neonate	48 hours
	Acute LC50 125 ppm Fresh water	Fish - Gambusia affinis - Adult	96 hours
Trisodium nitrilotriacetic acid	Acute LC50 185000 µg/l Fresh water	Algae - Navicula seminulum	96 hours
	Acute LC50 560000 to 1000000 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 252000 µg/l Fresh water	Fish - Lepomis macrochirus	96 hours
	Chronic NOEC 100000 µg/l Fresh water	Algae - Algae - Exponential growth phase	96 hours
	Chronic NOEC 100000 µg/l Fresh water	Daphnia - Daphnia magna	21 days

Persistence and degradability

Not available.

Section 12. Ecological information

Bioaccumulative potential

Product/ingredient name	$LogP_{ow}$	BCF	Potential
Sodium edetate	5.01	1.8	low
Trisodium nitrilotriacetic acid	-2.62	-	low

Mobility in soil

Soil/water partition coefficient (K_{OC}) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA
UN number	UN3267	UN3267	UN3267	UN3267
UN proper shipping name	CORROSIVE LIQUID, BASIC, ORGANIC, N.O.S. (Contains: Sodium edetate, Sodium hydroxide)	CORROSIVE LIQUID, BASIC, ORGANIC, N.O.S. (Contains: Sodium edetate, Sodium hydroxide)	CORROSIVE LIQUID, BASIC, ORGANIC, N.O.S. (Contains: Sodium edetate, Sodium hydroxide)	CORROSIVE LIQUID, BASIC, ORGANIC, N.O.S. (Contains: Sodium edetate, Sodium hydroxide)
Transport hazard class(es)	8 	8 	8 	8 
Packing group	III	III	III	III
Environmental hazards	No.	No.	No.	No.

Additional information

TDG Classification : Product classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2.40-2.42 (Class 8).

IMDG : **Emergency schedules** F-A S-B

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to IMO instruments : Not available.

DOT Reportable Quantity Sodium hydroxide, 6111 gal of this product.

Section 14. Transport information

Marine pollutant Not available.

North-America NAERG : 153

Section 15. Regulatory information

U.S. Federal regulations :

TSCA 12(b) one-time export: No products were found.

TSCA 12(b) annual export notification: No products were found.

United States inventory (TSCA 8b): All components are active or exempted.

Clean Water Act (CWA) 307: No products were found.

Clean Water Act (CWA) 311: sodium hydroxide

United States - Clean Air Act Section 112(b) Hazardous Air Pollutants (HAPs) :

List name	Status	Ingredient name	Name on list	Conc.
None of the components are listed.				

SARA 302/304 : No products were found.

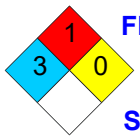
SARA 311/312

Classification :
CORROSIVE TO METALS - Category 1
ACUTE TOXICITY (inhalation) - Category 4
SKIN CORROSION - Category 1
SERIOUS EYE DAMAGE - Category 1
CARCINOGENICITY - Category 2

SARA 313

Supplier notification : No products were found.

California Prop. 65



This product does not require a Safe Harbor warning under California Prop. 65.

Canada

Canada (CEPA DSL): : All components are listed or exempted.

Section 16. Other information

National Fire Protection Association (U.S.A.)

Flammability
Health
Instability
Special

History

Date of printing : 1/20/2023

Key to abbreviations :
ATE = Acute Toxicity Estimate
BCF = Bioconcentration Factor
GHS = Globally Harmonized System of Classification and Labelling of Chemicals
IATA = International Air Transport Association
IBC = Intermediate Bulk Container
IMDG = International Maritime Dangerous Goods
LogPow = logarithm of the octanol/water partition coefficient
MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution)
N/A = Not available
SGG = Segregation Group
UN = United Nations

Section 16. Other information

Indicates information that has changed from previously issued version.

Notice to reader

NOTE: The information on this SDS is based on data which is considered to be accurate. Baker Hughes, however, makes no guarantees or warranty, either expressed or implied of the accuracy or completeness of this information.

The conditions or methods of handling, storage, use and disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of this product.

This SDS was prepared and is to be used for this product. If the product is used as a component in another product, this SDS information may not be applicable.

SAFETY DATA SHEET

Section 1. Identification

Product name : WCW7918 COMBINATION INHIBITOR

Product code : WCW7918

Relevant identified uses of the substance or mixture and uses advised against

Identified uses : Scale and Corrosion inhibitor

Print date : 4/9/2020

Validation date : 4/8/2020

Version : 2.01

Supplier's details : Baker Petrolite LLC
12645 W. Airport Blvd.
Sugar Land, TX 77478
For Product Information/SDSs Call: 800-231-3606
(8:00 a.m. - 5:00 p.m. CST, Monday - Friday) 281-276-5400

Emergency telephone number (with hours of operation) : CHEMTREC: 800-424-9300 (U.S. 24 hour)
Baker Petrolite: 800-231-3606
(001)281-276-5400
CHEMTREC Int'l 01-703-527-3887 (International 24 hour)

Section 2. Hazards identification

OSHA/HCS status : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Classification of the substance or mixture : FLAMMABLE LIQUIDS - Category 3
ACUTE TOXICITY (oral) - Category 3
ACUTE TOXICITY (dermal) - Category 3
ACUTE TOXICITY (inhalation) - Category 3
SKIN IRRITATION - Category 2
EYE IRRITATION - Category 2A
SKIN SENSITIZATION - Category 1
SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (optic nerve) - Category 1
SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) (heart, liver) - Category 2
AQUATIC HAZARD (ACUTE) - Category 3
AQUATIC HAZARD (LONG-TERM) - Category 3

GHS label elements

Hazard pictograms :

Signal word : Danger

Section 2. Hazards identification

Hazard statements : Flammable liquid and vapor.
Toxic if swallowed, in contact with skin or if inhaled.
Causes serious eye irritation.
Causes skin irritation.
May cause an allergic skin reaction.
Causes damage to organs. (optic nerve)
May cause damage to organs through prolonged or repeated exposure. (heart, liver)
Harmful to aquatic life with long lasting effects.

Precautionary statements

Prevention : Wear protective gloves: > 8 hours (breakthrough time): Nitrile or Neoprene gloves. 4H gloves. Butyl rubber gloves.. Wear eye or face protection. Wear protective clothing. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Do not breathe vapor. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.

Response : Get medical attention if you feel unwell. IF exposed: Call a POISON CENTER or physician. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER or physician. IF SWALLOWED: Immediately call a POISON CENTER or physician. Rinse mouth. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Take off immediately all contaminated clothing and wash it before reuse. Wash with plenty of soap and water. Call a POISON CENTER or physician if you feel unwell. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.

Storage : Store locked up. Store in a well-ventilated place. Keep cool.

Disposal : Dispose of contents and container in accordance with all local, regional, national and international regulations.

Supplemental label elements : Avoid contact with skin and clothing. Wash thoroughly after handling.

Hazards not otherwise classified : Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

Ingredient name	%	CAS number
Methanol	30 - 40	67-56-1
Amine salts	10 - 20	Trade secret.
2-Butoxyethanol	5 - 10	111-76-2
Phosphonate salt	1 - 5	Trade secret.
Sulfur compound	1 - 5	Trade secret.
Oxyalkylated alkylphenol	0.1 - 1	Trade secret.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Continue to rinse for at least 10 minutes. Check for and remove any contact lenses. Get medical attention. If necessary, call a poison center or physician.

Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Skin contact : Wash skin thoroughly with soap and water or use recognized skin cleanser. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. If necessary, call a poison center or physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Ingestion : Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact : Causes serious eye irritation.

Inhalation : Toxic if inhaled. Causes damage to organs following a single exposure if inhaled.

Skin contact : Toxic in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.

Ingestion : Toxic if swallowed. Causes damage to organs following a single exposure if swallowed.

Over-exposure signs/symptoms

Eye contact : pain or irritation,watering,redness

Inhalation : No specific data.

Skin contact : irritation,redness,dryness,cracking

Ingestion : No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments : No specific treatment.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media : Use dry chemical, CO_2, alcohol-resistant foam or water spray (fog).

Unsuitable extinguishing media : Do not use water jet.

Specific hazards arising from the chemical : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

Hazardous thermal decomposition products : carbon dioxide,carbon monoxide,nitrogen oxides,sulfur oxides,phosphorus oxides, halogenated compounds,metal oxide/oxides

Special protective actions for fire-fighters : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.

Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 6. Accidental release measures

If RQ (Reportable Quantity) is exceeded, report to National Spill Response Office at 1-800-424-8802.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
Methanol	**ACGIH TLV (United States, 3/2019). Absorbed through skin.** STEL: 328 mg/m³, 0 times per shift, 15 minutes. STEL: 250 ppm, 0 times per shift, 15 minutes. TWA: 262 mg/m³, 0 times per shift, 8 hours. TWA: 200 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016). Absorbed through skin.** STEL: 325 mg/m³, 0 times per shift, 15 minutes. STEL: 250 ppm, 0 times per shift, 15 minutes. TWA: 260 mg/m³, 0 times per shift, 10 hours. TWA: 200 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018).** TWA: 260 mg/m³, 0 times per shift, 8 hours. TWA: 200 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin.** STEL: 325 mg/m³, 0 times per shift, 15 minutes. STEL: 250 ppm, 0 times per shift, 15 minutes. TWA: 260 mg/m³, 0 times per shift, 8 hours.

Section 8. Exposure controls/personal protection

	TWA: 200 ppm, 0 times per shift, 8 hours.
Amine salts	None.
2-Butoxyethanol	**ACGIH TLV (United States, 3/2019).** TWA: 20 ppm, 0 times per shift, 8 hours. **NIOSH REL (United States, 10/2016). Absorbed through skin.** TWA: 24 mg/m³, 0 times per shift, 10 hours. TWA: 5 ppm, 0 times per shift, 10 hours. **OSHA PEL (United States, 5/2018). Absorbed through skin.** TWA: 240 mg/m³, 0 times per shift, 8 hours. TWA: 50 ppm, 0 times per shift, 8 hours. **OSHA PEL 1989 (United States, 3/1989). Absorbed through skin.** TWA: 120 mg/m³, 0 times per shift, 8 hours. TWA: 25 ppm, 0 times per shift, 8 hours.
Phosphonate salt	None.
Sulfur compound	**AIHA WEEL (United States, 7/2018). Absorbed through skin.** TWA: 0.2 ppm, 0 times per shift, 8 hours.
Oxyalkylated alkylphenol	None.

Consult local authorities for acceptable exposure limits.

If OSHA permissible exposure levels are shown above they are the OSHA 1989 levels or are from subsequent OSHA regulatory actions. Although the 1989 levels have been vacated the 11th Circuit Court of Appeals, Baker Hughes recommends that these lower exposure levels be observed as reasonable worker protection.

Appropriate engineering controls : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection : Wear chemical safety goggles. When transferring material wear face-shield in addition to chemical safety goggles.

Hand protection : Chemical-resistant gloves: Nitrile or Neoprene gloves. 4H gloves. Butyl rubber gloves.

Skin protection : Wear long sleeves to prevent repeated or prolonged skin contact.

Respiratory protection : If a risk assessment indicates it is necessary, use a properly fitted supplied air respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Section 9. Physical and chemical properties

Appearance

Physical state : Liquid. [Clear.]

Color : Amber.

Odor : Pungent.

Odor threshold : Not available.

pH : 6.5

: Neat - without dilution.

Melting/freezing point : -62.2°C (-80°F)

Boiling point : Not available.

Initial Boiling Point : Not available.

Flash point : Closed cup: 26.67°C (80°F) [SFCC]

Burning time : Not applicable.

Burning rate : Not applicable.

Evaporation rate : Not available.

Flammability (solid, gas) : Highly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge and heat.

Lower and upper explosive (flammable) limits : Not available.

Vapor pressure : Not available.

Vapor density : >1 [Air = 1]

Relative density : 0.9772 (15.6°C)

Density : 8.14 (lbs/gal)

Solubility in water : Soluble

Partition coefficient: n-octanol/water : Not available.

Auto-ignition temperature : Not available.

Decomposition temperature : Not available.

Viscosity : Not available.

VOC : Not available.

Pour Point : Not available.

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.

Chemical stability : The product is stable.

Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.

Section 10. Stability and reactivity

Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials, reducing materials and alkalis.
Methanol is incompatible and may react with acetyl bromide, alkyl aluminum solutions, beryllium hydride, boron trichloride, nitric acid, cyanuric chloride, dichloromethane, diethylzinc, metals (granulated forms of aluminum and magnesium – including aluminum and zinc salts), phosphorus III oxide, and potassium tert-butoxide.

Hazardous decomposition products : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Methanol	LC50 Inhalation Gas.	Rat	145000 ppm	1 hours
	LC50 Inhalation Gas.	Rat	64000 ppm	4 hours
	LD50 Dermal	Rabbit	15800 mg/kg	-
	LD50 Oral	Human	500 mg/kg	-
	LD50 Oral	Rat	5600 mg/kg	-
2-Butoxyethanol	LC50 Inhalation Gas.	Rat	450 ppm	4 hours
	LC50 Inhalation Vapor	Rat	2.2 mg/l	4 hours
	LD50 Dermal	Guinea pig	>2000 mg/kg	-
	LD50 Dermal	Rabbit	200 mg/kg	-
	LD50 Dermal	Rabbit	99 mg/kg	-
	LD50 Oral	Guinea pig	500 to 2000 mg/kg	-
	LD50 Oral	Rabbit	320 mg/kg	-
Sulfur compound	LC50 Inhalation Vapor	Rat - Male	2 mg/l	4 hours
	LD50 Dermal	Rabbit	112 to 224 mg/kg	-
	LD50 Oral	Rat	98 to 162 mg/kg	-

Irritation/Corrosion

No available toxicity data.

Sensitization

No available toxicity data.

Mutagenicity

No available toxicity data.

Carcinogenicity

Classification

Product/ingredient name	OSHA	IARC	NTP
2-Butoxyethanol	-	3	-

Reproductive toxicity

No available toxicity data.

Teratogenicity

No available toxicity data.

Specific target organ toxicity (single exposure)

Name	Category	Route of exposure	Target organs
Methanol	Category 1	Oral	optic nerve

Section 11. Toxicological information

Specific target organ toxicity (repeated exposure)

Name	Category	Route of exposure	Target organs
Sulfur compound	Category 2	Not determined	heart and liver

Aspiration hazard

Not available.

Information on the likely routes of exposure : Routes of entry anticipated: Dermal, Inhalation.

Potential acute health effects

Eye contact : Causes serious eye irritation.

Inhalation : Toxic if inhaled. Causes damage to organs following a single exposure if inhaled.

Skin contact : Toxic in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.

Ingestion : Toxic if swallowed. Causes damage to organs following a single exposure if swallowed.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact : pain or irritation,watering,redness

Inhalation : No specific data.

Skin contact : irritation,redness,dryness,cracking

Ingestion : No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Long term exposure

Potential immediate effects : Not available.

Potential delayed effects : Not available.

Potential chronic health effects

General : May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : No known significant effects or critical hazards.

Teratogenicity : No known significant effects or critical hazards.

Developmental effects : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

Numerical measures of toxicity

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
Methanol	Acute EC50 16.912 mg/l Marine water	Algae - Ulva pertusa	96 hours
	Acute EC50 10000000 µg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 2500000 µg/l Marine water	Crustaceans - Crangon crangon	48 hours
	Acute LC50 100 mg/l Fresh water	Fish - Pimephales promelas	96 hours
	Chronic NOEC 9.96 mg/l Marine water	Algae - Ulva pertusa	96 hours
2-Butoxyethanol	Acute EC50 >1000 mg/l Fresh water	Daphnia - Daphnia magna	48 hours
	Acute LC50 1000 mg/l Marine water	Crustaceans - Chaetogammarus marinus - Young	48 hours
	Acute LC50 1250000 µg/l Marine water	Fish - Menidia beryllina	96 hours

Persistence and degradability

Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	DOT Classification	TDG Classification	IMDG	IATA
UN number	UN1993	UN1993	UN1993	UN1993
UN proper shipping name	FLAMMABLE LIQUID, N.O.S. (Contains: Methanol)	FLAMMABLE LIQUID, N.O.S. (Contains: Methanol)	FLAMMABLE LIQUID, N.O.S. (Contains: Methanol)	FLAMMABLE LIQUID, N.O.S. (Contains: Methanol)
Transport hazard class(es)	3 	3 	3 	3 
Packing group	III	III	III	III
Environmental hazards	No.	No.	No.	No.

Additional information

DOT Classification : **Reportable quantity** 16622.3 lbs / 7546.5 kg [2040.1 gal / 7722.6 L]. Package sizes shipped in quantities less than the product reportable quantity are not subject to the RQ (reportable quantity) transportation requirements.

TDG Classification : Product classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2.18-2.19 (Class 3).

Special precautions for user : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL and the IBC Code : Not available.

DOT Reportable Quantity Methanol, 2042 gal of this product.

Marine pollutant Not available.

North-America NAERG : 128

Section 15. Regulatory information

U.S. Federal regulations : **TSCA 12(b) one-time export**: No products were found.

TSCA 12(b) annual export notification: No products were found.

United States inventory (TSCA 8b): All components are listed or exempted.

NOTES:

1. Clean storm water, collected only in the designated sumps, is pumped to the 10" carbon steel sch-40 collecting header.
2. To be used during cleaning and maintenance operations.
3. Total holding capacity for both evaporation ponds is 70,000 bbls, or 2,940,000 gallons.
4. Based on the 25-year rain for the area, the total one-day storm water is estimated to be at 35,000 bbls/24 hour, or 1,470,000 gallons.
5. New gravity drain line shall be a 10" sch-80 pipe, which is estimated to provide a gravity flow capacity of about 450 to 880 gpm, depending on collected water level in the ponds.
6. The drain line shall be of PVC Sch-80 piping material beyond the second valve, after the Halliburton Turbine Meter. For protection purposes, both valves and the meter shall be installed inside of individual under-ground concrete vaults.
7. Halliburton Turbine Meter with mechanical flow analyzer.
8. Top of the Berm elevation varies from 35' - 0" to 35' - 9" with the lowest point at a 3 to 4 foot wide depression for storm water overflow.

Dear Mr. Saremi:

SUBJECT: GAS PLANT ADJACENT TO BOLSA CHICA WETLANDS
HUNTINGTON BEACH, ORANGE COUNTY

Please find attached our 2nd quarter 1995 Groundwater Monitoring and Project Status Report for the CalResources Gas Plant at Huntington Beach, CA. The groundwater plume remains under control and confined to the site.

Plant demolition is complete. Interim remediation activities consisting of biotreatment of surficial oil-impacted soils is proceeding.

Sincerely,

Sub Sen
Staff Environmental Engineer

Re: Underground Storage Tank (UST) Case

Cal Resources
20101 Goldenwest Street
Huntington Beach, CA
O.C.H.C.A. Case #88UT110

Dear Mr. Sen:

This letter confirms the completion of site investigation and remedial action for the underground storage tanks formerly located at the above-described location. Enclosed is the Case Closure Summary regarding the above-referenced site for your records.

Based upon the available information, including the current land use, and with the provision that the information provided to this Agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721(e).

Please telephone Peter Peuron at (714) 667-3719 if you have any questions regarding this matter.

Sincerely,

Karen L. Hodel

Ethylbenzene	**177**	**180**	**4.7**	**0.00094**					

Comments (Depth of Remediation, etc.): **Soon after tanks were removed, extensive excavation of soil was performed. Soil was removed to a depth of about 35 feet below ground surface, where groundwater was encountered. A total of 956 tons of contaminated soil was disposed at Casmalia Resources. The "after" soil contamination levels shown above are concentrations left in place after soil excavation was performed. Due to the proximity of contaminated soil to the water table, a groundwater investigation was required and wells were installed. Significant groundwater contamination levels were found. Remaining soil and groundwater contamination was addressed using vapor extraction. The vapor extraction system operated from May of 1993 to September of 1995. During this time about 22,300 pounds of Total Petroleum Hydrocarbons were removed. Post-remedial monitoring demonstrated a steady decline in groundwater contaminant concentrations. All groundwater contaminant concentrations are below the MCLs. Also, the site is located seaward of the Newport-Inglewood Fault Zone. Therefore (since the site has been adequately characterized and no free product is present) the site can be classified as "low risk". Remaining contamination at this site presents no threat to drinking water, human health or the environment.**

IV. Closure

Does completed corrective action protect *existing* beneficial uses per the Regional Board Basin Plan? **yes**		
Does completed corrective action protect *potential* beneficial uses per the Regional Board Basin Plan? **yes**		
Does corrective action protect public health for current land use? **yes**		
Site management requirements: **none**		
Should corrective action be reviewed if land use changes? **no**		
Monitoring wells decommissioned: **no**	Number decommissioned:	Number Retained: **7**
List enforcement actions taken: **none**		
List enforcement actions rescinded: **NA**

Santa Ana, CA 92705

Dear Mr. Peuron:

SUBJECT: CHARACTERIZATION REPORT
OCHCA CASE #88UT110
UNDERGROUND STORAGE TANK SITE
SHELL WESTERN E&P INC.
20101 GOLDENWEST STREET
HUNTINGTON BEACH, ORANGE COUNTY

As explained in Shell Western E&P Inc.'s (SWEPI) March 4, 1991 Quarterly Report, characterization of the subject former underground tank site is complete. The original tank removal was performed in April 1989. A subsequent closure request dated August 7, 1989 with accompanying site characterization was denied by your letter of September 1, 1989 with a request for further characterization. We believe that the requested additional investigation is now complete.

Enclosed is a final characterization report in two volumes (Phase I & Phase II) prepared by Groundwater Technology (SWEPI consultant). The information contained in the report is in addition to that in the original August 1989 report prepared by Aman Environmental (former SWEPI consultant). In order to tie the two reports together, a brief summary of the information in the three volumes is also enclosed.

CBBY9109204 - 0001.0.0

We look forward to meeting with you to discuss the need for further action upon completion of your review of the enclosed reports. If you have any questions, please contact Sub Sen of our staff at (805) 326-5129.

Sincerely,

J. A. Ruhl
Manager Health, Safety & Environment
West Coast Production Division

SUMMARY OF CHARACTERIZATION STUDIES
OCHCA CASE #88UT110
UNDERGROUND STORAGE TANK SITE
HUNTINGTON BEACH, ORANGE COUNTY

HISTORY

Two 10,000 gallon underground tanks were removed in April 1989. Their former locations are shown in Figure 1. Samples below each end of the gasoline tank and one end of the Stoddard solvent tank (GT-EX-1, GT-EX-2, ST-EX-2) at 12 feet below grade were clean. However, sample ST-EX-1 (12 feet below grade) below the eastern end of the Stoddard solvent tank found elevated levels of hydrocarbons; ST-EX-1A at 14 feet below grade also found hydrocarbons. The hydrocarbon-containing soil was excavated down to 35 feet as shown in Figures 1 & 2. Further samples ST-EX-3, 4, 7 & 8 were taken during the excavation. The stockpiled soils were sampled (SP-GS-1) and removed. Three subsurface borings (PB-1, PB-2 & PB-3: Figures 1 & 2) down to groundwater at 35 feet vertical below grade showed no significant contamination remaining. Table 1 shows the analytical results from Aman Environmental's investigation. However, a request for closure was denied, and further investigation required.

In November 1989, SWEPI retained Groundwater Technology Inc. to further characterize the site. Phase I of the investigation included drilling and sampling soil and groundwater from 5 groundwater monitoring wells (GTW1 through GTW5) and a vapor extraction test through a soil probe and well GTV2. A Phase I report was completed in June 1990. However, due to the level of groundwater hydrocarbons found in well GTW-5, a Phase II investigation was initiated to define the limits of elevated groundwater TPH. Wells GTW-6 (upgradient) and GTW-7 (downgradient) completed this investigation, along with a pump-test on well GTW-5. A Phase II report was completed in March 1991. Figures 3 (plan) and 4 (cross-section) show the locations of all the wells, hydrocarbons and the isoTPH contours. Tables 2 and 3 show soil analytical results from Phase I and II. Tables 4 & 5 show the groundwater analytical results from Phase I & II.

CONCLUSIONS

It is deduced from the data above that:

1) A hydrocarbon plume originally extended from one end of the Stoddard solvent tank down to groundwater around Well GTW-5 as shown in Figure 4.

2) Most of the source hydrocarbon-bearing soil has been excavated. The highest remaining TPH level of 3700 ppm was found at 31 feet in well GTV-1 with next highest at 140 ppm.

3) The groundwater in well GTW-5 had 53,000 - 80,000 ppb of TPH. The upgradient well GTW-6 had low TPH levels, and the downgradient GTW-7 had non-detectable levels. Well GTW-5 also had 2,000 - 3,800 ppb of benzene, but other wells had less than 3.5 ppb. The hydrocarbon plume is now well defined and concentrated around well GTW-5, as shown in Figure 3.

4) Groundwater in the vicinity is brackish (TDS 9,700 ppm) and not used for any purpose. The site is within 0.25 mile of the shoreline.

GTW5-30	ND		0.22	0.89	0.21	1.2
GTV1-31	3,700	ND	11	240	180	970
GTV2-31	5	ND	0.34	0.19	0.38	1.8

ND = Not detected
All values are in parts per million (ppm).
TPH = Total Petroleum Hydrocarbons.
Minimum Detection Limits (ppm): TPH (gasoline) 1.0; TPH (stoddard solvent) 1.0; benzene 0.05; toluene 0.05; ethylbenzene 0.05; xylenes 0.05.
Exception: GTW5 TPH (gasoline) = 10

TABLE 3

**Summary of EPA Methods 8015/8020 (TPH/BTEX) Analysis
Results on Soil Samples Collected from Borings
During Well Installation in the Shell Production Unit
Gas Pump Area**

Sampled December 17, and 18, 1990

SAMPLE #	DATE SAMPLED	TPH	BENZENE	TOLUENE	ETHYL-BENZENE	XYLENES
GTW-6-15	12/18/90	ND	ND	ND	ND	ND
GTW-6-30	12/18/90	ND	ND	ND	ND	ND
GTW-7-15	12/17/90	ND	ND	ND	ND	ND
GTW-7-30	12/17/90	ND	ND	ND	ND	ND

- All concentrations measured in parts per million (ppm)
- ND = Levels below detection limits
- TPH = Total petroleum hydrocarbons (analyzed as gasoline)
- BTEX = benzene, toluene, ethylbenzene, and total xylenes
- Detection limits: TPH 10.0 ppm; benzene 0.05; toluene 0.05; ethylbenzene 0.05; xylenes 0.05 ppm

TABLE 4

Summary of 602/8015 (BTEX/TPH) Analyses
on Groundwater Samples Obtained During Well Development
in The Shell Production Unit, Tank Excavation
Shell Western Exploration and Production, Inc.
Huntington Beach, California

Sampled October 17, December 19, 1989
and June 5, 1990

Sample No.	TPH (Gasoline)	TPH (Stoddard)	Benzene	Toluene	Ethyl-Benzene	Xylenes

GROUNDWATER TECHNOLOGY, INC.

WCPD HS&E - SUBSURFACE & WASTE MGMT
QUARTERLY PROJECT STATUS SUMMARY

UNIT: HUNTINGTON BEACH DATE:10/11/91

PROJECT: UST SITE CONDENSATE REMEDIATION RESP: SS

DESCRIPTION: Two 10M gallon UST's (gasoline & solvent) were removed in 4/89 from the HB Strip Facility area. Contaminanted soils were excavated; however, further assessment showed a plume of gasoline leading under a building down to groundwater. TPH values as high as 80,000ppb and benzene up to 3800ppb were found in the groundwater at one well. Characterization is complete.

STRATEGY: Close the gasoline contamination site at lowest cost by soil vapor extraction to remove the source of the groundwater problem, followed by purging of the contaminated groundwater for a couple of months. The key to cost minimization is to have DOG allow reinjection of the contaminated water into waterfloods; otherwise water treatment would increase costs.

TIMING/DEADLINES: The County is impatient with the two years that have passed with no remedial activities for the plume. Continue operations with due diligence till closure.

COSTS (M$):

TOTAL		EXPECTED SCHEDULE OF EXP	
AFE'D	: 335	PRE 1991	: 256
COSTS TO DATE	: 310	1991	: 104
EXPECTED ULTIMATE	: 450	1992	: 90
		1993 +	:

CURRENT STATUS: RAP report routing to County. County has informally approved plan. An AFE supplement to perform remediation is routing.

COMPLETED THIS QUARTER: RAP prepared and reviewed with County involves soil vapor extraction through 3 wells and only monthly purging and quarterly monitoring of groundwater. County approved concept, and no groundwater remediation will be required if natural processes and monthly purging brings water benzene levels down. Since this is governed by LUFT standards, soil TPH will need to be around 100ppm and benzene around 1ppb in the water before final closure.

NEXT QUARTER PLANNED: Obtain formal approval for RAP. Continue monthly purging and quarterly groundwater monitoring. Supplement AFE for remedial action. Begin remediation by using permitted portable IC engine while carbon adsorption VE system is being permitted.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS)

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID # (1.)	CERS ID (A1.)	DATE OF PLAN PREPARATION/REVISION (A2.)
— —	10446451	1/1/2017

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* (3.)
Huntington Beach Field and Platform Emmy - SoCal Holding, LLC

BUSINESS SITE ADDRESS (103.)
20101 Goldenwest St.

BUSINESS SITE CITY (104.)		ZIP CODE (105.)
Huntington Beach	CA	90648

TYPE OF BUSINESS (e.g., Painting Contractor) (A3.)	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) (A4.)
Crude Oil and Gas Production	Crude Oil and Gas Production

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply) (A5.)

☒ 1. HAZARDOUS MATERIALS; ☐ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply) (B1.)

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☐ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:

1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply) (C1.)

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☒ 3. TELEPHONE;
☐ 4. PAGERS; ☒ 5. ALARM SYSTEM; ☒ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY: (Check all that apply) (C2.)

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☒ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

EMERGENCY RESPONSE PHONE NUMBERS:		
	AMBULANCE, FIRE, POLICE AND CHP	9-1-1
	CALIFORNIA EMERGENCY MANAGEMENT AGENCY (CAL/EMA)	(800) 852-7550
	NATIONAL RESPONSE CENTER (NRC)	(800) 424-8802
	POISON CONTROL CENTER	(800) 222-1222
	LOCAL UNIFIED PROGRAM AGENCY (UPA/CUPA)	(714) 573-6250 (C3.)
	OTHER (Specify): (C4.)	(C5.)
NEAREST MEDICAL FACILITY / HOSPITAL NAME:	Huntington Beach Hospital (C6.)	(714) 842-1473 (C7.)
AGENCY NOTIFICATION PHONE NUMBERS:	CALIFORNIA DEPT. OF TOXIC SUBSTANCES CONTROL (DTSC)	(916) 255-3545
	REGIONAL WATER QUALITY CONTROL BOARD	(951) 781-6288 (C8.)
	U.S. ENVIRONMENTAL PROTECTION AGENCY (US EPA)	(800) 300-2193
	CALIFORNIA DEPT OF FISH AND GAME (DFG)	(916) 358-2900
	U.S. COAST GUARD	(202) 267-2180
	CAL/OSHA	(916) 263-2800
	STATE FIRE MARSHAL	(916) 445-8200
	OTHER (Specify): SCAQMD (C9.)	(909) 396-2000 (C10.)
	OTHER (Specify): DOGGR (C11.)	(714) 816-6847 (C12.)

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and. preventing and mitigating associated harm to persons, property, and the environment.)

D1.

- ☒ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- ☒ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
- ☒ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
- ☒ 4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
- ☒ 5. BUILT-IN BERM IN WORK / STORAGE AREA;
- ☒ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- ☒ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
- ☒ 8. STOP PROCESSES AND/OR OPERATIONS;
- ☒ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- ☒ 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
- ☒ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
- ☒ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
- ☒ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
- ☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
- ☐ 15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
- ☒ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- ☒ 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
- ☒ 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
- ☐ 21. OTHER (Specify):

D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY): E1.

- ☐ 1. BELLS;
- ☒ 2. HORNS/SIRENS;
- ☒ 3. VERBAL (I.E., SHOUTING);
- ☒ 4. OTHER (Specify): Cell Phone

E2.

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.) E3.

Primary onshore assembly area: Flagpole near main office buildings

Primary offshore assembly area: Satellite deck

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

☒ EVACUATION ROUTE MAP(S) POSTED AS REQUIRED E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following) F1.

- ☐ 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- ☒ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

F2.

Onshore: Patriot Environmental has been contracted to proved 24-hour emergency response cleanup services for the onshore facility. Patriot's phone number is (800) 624-9136.

Offshore: MSRC has been contracted to provide 24-hour emergency response cleanup services for the offshore facility. MSRC's phone number is (800) 645-7745.

G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g., ☒ CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

TYPE	EQUIPMENT AVAILABLE	LOCATION	CAPABILITY *(If applicable)*
Safety and First Aid	1. ☒ CHEMICAL PROTECTIVE SUITS, APRONS, OR VESTS (G1.)	G2. Warehouse	G3. Available to employees as needed
	2. ☒ CHEMICAL PROTECTIVE GLOVES	G4. Warehouse, each person	G5. Available to employees as needed
	3. ☒ CHEMICAL PROTECTIVE BOOTS	G6. Warehouse	G7. Available to employees as needed
	4. ☒ SAFETY GLASSES / GOGGLES / SHIELDS	G8. Each person	G9. All employees wear protective eyewear
	5. ☒ HARD HATS	G10. Each person	G11. All employees wear hard hats
	6. ☐ CARTRIDGE RESPIRATORS	G12.	G13.
	7. ☒ SELF-CONTAINED BREATHING APPARATUS (SCBA)	G14. Tank Farm Office/Emmy	G15. Units available for specific tasks
	8. ☒ FIRST AID KITS / STATIONS	G16. Warehouse, vehicles, office	G17. All vehicles carry first aid kits
	9. ☒ PLUMBED EYEWASH FOUNTAIN / SHOWER	G18. Various field locations	G19.
	10. ☒ PORTABLE EYEWASH KITS	G20. Various field locations and vehicles	G21. All vehicles carry eye wash bottles
	11. ☒ OTHER	G22. All employees wear H2S or 4-gas monitors	G23.
	12. ☒ OTHER	G24. All employees wear fire resistant clothing (FRC)	G25.
Fire Fighting	13. ☒ PORTABLE FIRE EXTINGUISHERS	G26. Vehicles	G27. 20 and/or 30 lbs. units in vehicles
	14. ☒ FIXED FIRE SYSTEMS / SPRINKLERS / FIRE HOSES	G28. Gas Plant (DCU)	G29. Deluge system for gas plant
	15. ☐ FIRE ALARM BOXES OR STATIONS	G30.	G31.
	16. ☐ OTHER	G32.	G33.
Spill Control and Clean-Up	17. ☐ ALL-IN-ONE SPILL KIT	G34.	G35.
	18. ☒ ABSORBENT MATERIAL	G36. Warehouse, field vehicles	G37.
	19. ☐ CONTAINER FOR USED ABSORBENT	G38.	G39.
	20. ☒ BERMING / DIKING EQUIPMENT	G40. Warehouse, Storage	G41. Secondary containment at all storage tanks
	21. ☒ BROOM	G42. Warehouse	G43. several
	22. ☒ SHOVEL	G44. Warehouse	G45. 10+ available
	23. ☐ SHOP VAC	G46.	G47.
	24. ☐ EXHAUST HOOD	G48.	G49.
	25. ☒ EMERGENCY SUMP / HOLDING TANK	G50. Tank Farm 1 Highlands	G51.
	26. ☐ CHEMICAL NEUTRALIZERS	G52.	G53.
	27. ☐ GAS CYLINDER LEAK REPAIR KIT	G54.	G55.

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply)	H1.	LOCATIONS (e.g., shop, outdoor shed, forensic lab)	
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA		crude oil storage tanks	H2.
☒ 2. PROCESS LINES / PIPING			H3.
☐ 3. LABORATORY			H4.
☐ 4. WASTE TREATMENT AREA			H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply)	H6.	LOCATIONS	
☒ 1. SHELVES, CABINETS AND RACKS			H7.
☒ 2. TANKS (EMERGENCY SHUTOFF)			H8.
☒ 3. PORTABLE GAS CYLINDERS			H9.
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES		shutoff valves	H10.
☒ 5. SPRINKLER SYSTEMS			H11.
☒ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)		pressure vessel	H12.

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);
- Decontamination procedures;
- Evacuation procedures;
- Control and containment procedures;
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply) I1.

☐ 1. FORMAL CLASSROOM; ☒ 2. VIDEOS; ☒ 3. SAFETY / TAILGATE MEETINGS;

☒ 4. STUDY GUIDES / MANUALS (Specify): CRC HSE Manual I2.

☒ 5. OTHER (Specify): All employees participate in online safety coursework (viaTrainingMine), contractors undergo orientation upon hire I3.

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

J. LIST OF ATTACHMENTS

(Check one of the following) J1.

☒ 1. NO ATTACHMENTS ARE REQUIRED; *or*

☐ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2.

K. SIGNATURE / CERTIFICATION

Certification: Based on my inquiry of those individuals responsible for obtaining the information, I certify under penalty of law that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete, and that a copy is available on site.

MANAGEMENT APPROVAL

Socal Holding, LLC will fully implement the procedures outlined in this Spill Prevention, Control, and Countermeasure (SPCC) Plan and will take the steps necessary to minimize the potential for petroleum releases to navigable waters of the United States or shorelines.

The SPCC Plan has the full approval of management at the level of authority to commit the necessary resources to fully implement the SPCC Plan. Per Title 40 of the Code of Federal Regulations Part 112 Section (e) [40 CFR 112.3(e)], a copy of this SPCC Plan will be maintained at the facility at all times and will be made available to the U.S. EPA Regional Administrator for on-site review during normal working hours.

- The spill prevention, control, and countermeasures for this facility will be implemented and maintained as herein described in the SPCC Plan.

- The manpower, equipment, and materials required to control and remove any quantity of oil that may be discharge are hereby authorized.

AMENDMENTS

Technical amendments are certified by a Professional Engineer [Section (§) 112.5(c)].

Examples of changes include, but are not limited to, commissioning or decommissioning containers; replacement, reconstruction, or movement of containers; reconstruction, replacements, or installation of piping systems; construction or demolition that might alter secondary containment structures; changes of product or service; or addition/deletion of standard operation or maintenance procedures related to discharge prevention measures. It is the responsibility of the facility to determine, and confirm with the regulatory authority as necessary, what constitutes a technical amendment. The preamble of the rule states that an amendment is required only "when there is a change that materially affects the facility's potential to discharge oil" (67 FR 47091).

An amendment made under this section will be prepared within six (6) months of the change and implemented as soon as possible but not later than six (6) months following preparation of the amendment.

Technical amendments affecting various pages within the SPCC Plan can be P.E. certified on those pages, certifying those amendments only, and will be documented on the log form below.

Management will review this SPCC Plan at least each five (5) years and document the review on the form below [§112.5(b)]. By signature below, signor confirms that management has completed a review and evaluation of this SPCC Plan.

1.0 FACILITY OWNER AND OPERATOR

Socal Holding, LLC (Socal Holding) acquired the Huntington Beach Oil Field and Platform Emmy properties in September 2014. The Huntington Beach Oil Field consists of oil production leases located at 20101 Goldenwest Street in Huntington Beach, California, and Platform Emmy is located offshore in California State Waters.

2.0 REGULATORY APPLICABILITY [40 CFR 112.1, §112.7(a)(1), §112.9, §112.10, and §112.11]

The U.S. Environmental Protection Agency (U.S. EPA), in response to the "Regulations on Oil Pollution Prevention" included in the Federal Water Pollution Control Act (FWPCA) passed by Congress in 1973, has established rules for the prevention of water pollution by oil discharged from "non-transportation related onshore and offshore facilities." These regulations were originally promulgated on December 11, 1973, and are set forth in Title 40, Code of Federal Regulations (CFR), Part 112 (40 CFR 112); the current regulations became effective on July 17, 2002. U.S EPA has added several extensions to this date. Current proposed effective dates are November 10, 2011, for SPCC Plan revisions and for implementation. Socal Holding, LLC (Socal Holding) is included under the current regulations according to the criteria set forth in 40 CFR 112, Section (§) 1, paragraphs (b) and (d)(2) [also referred to as §112.1(b) and §112.1(d)(2)]. This SPCC Plan has been developed in accordance with the guidelines set forth in §112.7 and is based upon site visits and discussions with Socal Holding facility operations and environmental personnel.

Since the appropriate aboveground storage capacity of the Huntington Beach facilities exceed 1,320 gallons of oil, an SPCC Plan is required for the facilities per §112.7(c). In addition, this SPCC Plan was prepared in accordance with the procedures, methods, equipment, and other requirements established in §112.1(a) to prevent the discharge of oil and oil products from Socal Holding's Huntington Beach Oil Field and Platform Emmy facilities into navigable waters of the United States.

2.1 Purpose and Scope of SPCC

The purpose of the SPCC Plan is to provide engineering, operation, maintenance, and management strategies to minimize the potential of a spill or release of oil products (i.e. fuel and petroleum/lubricating oil) from certain storage and operational equipment and activities, and in the event of a spill, to prevent the spill from entering a waterway.

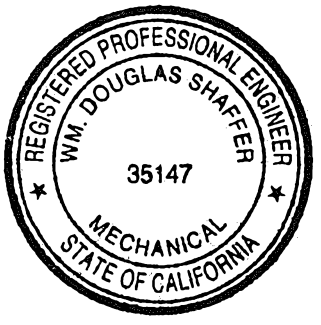
The scope of this SPCC Plan are oil-containing containers, equipment, structures, and devices with a 55-gallon or greater capacity [§112.1(d)(2)] owned, operated, and/or maintained by Socal Holding. Completely buried underground storage tanks (USTs) are excluded from this Plan [§112.1(d)(2)(i)]. United States Department of Transportation (U.S. DOT) regulated transportation-related activities are generally excluded from SPCC Plan requirements [§112.1(d)(i) and (ii)].

2.2 General Applicability

This SPCC Plan was written to comply with the requirements of 40 CFR 112, Oil Pollution Prevention. Part 112 establishes the requirements for procedures, methods, and equipment to assist in preventing an accidental discharge of oil or any material containing oil from entering into or upon the navigable waters of the United States or adjoining shorelines. These procedures, methods, and equipment are referred to as the SPCC Plan. Title 40 of the CFR, Part 112 applies to those owners or operators of non-transportation related, onshore and offshore facilities, engaged in drilling, producing, gathering, storing, processing, refining, transferring, distributing, or consuming oil or oil products [§112.7(b)]. The specific requirements of 40 CFR 112.1 through 112.7 (Subpart A – Applicability, Definitions, and General Requirements for All Facilities and All Types of Oils), 40 CFR 112.9 (Spill Prevention, Control, and Countermeasure Plan requirements for onshore oil production facilities), 40 CFR 112.10 (Spill Prevention, Control, and Countermeasure Plan requirements for onshore oil drilling, production, or workover facilities), and 40 CFR 112.11 (Spill Prevention, Control, and Countermeasure Plan requirements for offshore oil drilling, production, or workover facilities) applies to Socal Holding's Huntington Beach Oil Field and Platform Emmy facilities.

3.0 REGISTERED PROFESSIONAL ENGINEER CERTIFICATION [40 CFR 112.3(d)]

I hereby attest to the following:



1. I am familiar with the requirements of Title 40, Code of Federal Regulations Part 112 (40 CFR 112).
2. I visited and examined the facilities on March 30, 2012 and April 30, 2012.
3. This SPCC Plan has been prepared with good engineering practices, including consideration of applicable industry standards, and with the requirements of 40 CFR 112.
4. Inspection and testing procedures have been established.
5. This SPCC Plan is adequate for the facility.

Signed: _____

Wm. Douglass Shaffer

State: ***CA***

Certification Date: *October 2019*

4.0 MANAGEMENT APPROVAL AND COMMITMENT OF MANPOWER [40 CFR 112.4, §112.5, and §112.7]

The SPCC Plan for the Socal Holding Huntington Beach facilities (Oil Field and Platform Emmy) will be implemented and maintained as herein described. The manpower, equipment, and materials required to control and remove any quantity of oil that may be discharged are hereby authorized, as presented on the Management Approval certification page (page i).

In accordance with 40 CFR 112.5(b), this SPCC Plan will be reviewed at least every five (5) years. As a result of the review, the SPCC plan will be amended within six (6) months of the review to include more effective prevention and control technology if: (1) such technology will significantly reduce the likelihood of a spill event, and (2) if such technology has been field-proven at the time of the review. This review will include at a minimum: applicability of new prevention and control technology which may significantly reduce the likelihood of a spill event if such technology has been field-proven at the time of the review, accuracy of the SPCC Plan is compared to the current facility operation and SPCC regulations, capacity and structural integrity of secondary containment structures, SPCC inspections and records to ensure continuity of records for a minimum of five (5) years.

The SPCC Plan will also be amended whenever there is a change in the facility design, construction, operation, or maintenance that will materially affect the facility's potential for the discharge of oil into or upon navigable waters of the United States or adjoining shorelines [§112.5(a)]. Such technical amendments to the SPCC Plan will be certified by a Registered Professional Engineer in accordance with 40 CFR 112.5(c). If re-certification is necessary, a new certification page will be sealed, signed, and inserted into the SPCC Plan. Minor administrative or non-substantive changes, such as name or telephone number changes or modifications of procedures referenced in this Plan that have no 'material impact on spill risk' do not require re-certification but must be noted in the Record of Amendment (page ii). Once certified, these amendments will be implemented as soon as possible, but within six (6) months after such change occurs.

Changes which require revision may include, but are not limited to:

- Replacement, reconstruction, or movement of containers;
- Commission or decommission of containers;
- Reconstruction, replacement, or installation of piping systems;
- Construction or demolition that might alter secondary structures or drainage systems; and
- Revision of standard operation, inspection, and/or maintenance procedures at the facility.

SPCC Plan amendments or submittals to the U.S. EPA Regional Administrator due to the occurrence of reportable spills, or other SPCC Plan amendments by the U.S. EPA Regional Administrator, may require re-certification by a Registered Professional Engineer.

4.1 Conformity with Regulations [40 CFR 112.7 (a)(1) and (2)]

This plan has been prepared in accordance with good engineering practices and has the full approval of Socal Holding management. The management of Socal Holding is committed to providing the manpower, equipment, facilities, and materials required to establish precautionary measures and to expeditiously control and remove any harmful quantity of oil and oil product discharged from the facility.

General facility information is provided below:

Business Name:	Socal Holding, LLC
Facility Name:	Huntington Beach Oil Field Facilities and Platform Emmy
Facility Street Address:	20101 Goldenwest Street Huntington Beach, California 92648
Facility Mailing Address:	20101 Goldenwest Street Huntington Beach, California 92648
24-Hour Facility Phone Number:	(562) 624-3452
Nearest Surface Water Body:	Pacific Ocean
Approximate Distance:	0 – ¼ mile
Owner Name:	Socal Holding, LLC
Owner Address:	1 World Trade Center, Suite 1500 Long Beach, CA 90831

Huntington Beach Oil Field:

Location of Facility:	Located adjacent to Pacific Coast Highway, in the city of Huntington Beach, in Northern Orange County.
Site Characteristics:	Situated across from the Pacific Coast Highway on flat terrain. The oil field encompasses over 1,300 acres and includes three geographical components: The Highlands, Lowlands, and Townlot Leases.
Current Operations:	Produces oil and gas from onshore bases and processes oil and gas from onshore and State tidelands leases. Treated crude oil is stored in the facility and transferred offsite via pipeline. Treated natural gas is transferred to Southern California Gas Company via pipeline.
Size of the facility:	Approximately 1,300 acres

Platform Emmy:

Location of Facility:	Located in California State waters 1.3 miles offshore of the intersection of Goldenwest Street and Pacific Coast Highway in the City of Huntington Beach on California State Oil & Gas Lease PRC 425.
Site Characteristics:	Situated in 46 feet of water, approximately 1.3 miles offshore Huntington Beach.
Current Operations:	Produces oil, water, and gas from State leases PRC 392, 425, and 426. No oil and gas separation is performed on the platform. Produced crude and gas are transported via pipelines to Huntington Beach Production Unit for treatment.
Date Platform Installed:	1962

This SPCC Plan is organized in accordance with the sequence presented in 40 CFR 112.7 and meets the applicable requirements specified in the regulations.

4.2 Certification of Applicability of Substantial Harm Criteria [40 CFR 112.20(e)]

CERTIFICATION OF THE APPLICABILITY OF THE SUBSTANTIAL HARM CRITERIA

Facility Name: ***Socal Holding, LLC***

Facility Address: 20101 Goldenwest Street, Huntington Beach, California 92648

1.	Does the facility transfer oil over water to or from vessels and does the facility have a total oil storage capacity greater than or equal to 42,000 gallons?		
		Yes XX	No ___
2.	Does the facility have total oil storage capacity greater than or equal to 1 million gallons and does the facility lack secondary containment that is sufficiently large to contain the capacity of the largest aboveground oil storage tank plus sufficient freeboard to allow for precipitation within any aboveground oil storage tank area?		
		Yes ___	No XX
3.	Does the facility have a total oil storage capacity greater than or equal to 1 million gallons and is the facility located at a distance such that a discharge from the facility could cause injury to fish and wildlife and sensitive environments?		
		Yes ___	No XX
4.	Does the facility have total oil storage capacity greater than or equal to 1 million gallons and is the facility located at a distance such that a discharge from the facility would shut down a public drinking water intake?		
		Yes ___	No XX
5.	Does the facility have total oil storage capacity greater than or equal to 1 million gallons and has the facility experienced a reportable oil spill in an amount greater than or equal to 10,000 gallons within the last 5 years?		
		Yes ___	No XX

CERTIFICATION

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document, and that based on my inquiry of those individuals responsible for obtaining this information, I believe that the submitted information is true, accurate, and complete.

Signature

Dean Persinger, Operations Surface Manager

4.3 Submission of Plan [40 CFR 112.4(a)]

An SPCC Plan is not required to be filed with the U.S. EPA or the State, but a copy must be available for onsite review by the U.S. EPA Regional Administrator or the Santa Ana Regional Water Quality Control Board (SARWQCB) during normal working hours. The jurisdictional Certified Unified Program Agency (CUPA) may also review a copy during inspections.

Socal Holding shall submit this SPCC Plan to the U.S. EPA Regional Administrator within sixty (60) days whenever the facility has a discharge event(s) from potential spill sources which meets one of the following conditions:

- Discharge of more than 1,000 gallons of oil into or upon the navigable waters of the United States or adjoining shorelines in a single spill event; or,
- Discharges of oil in harmful quantities into or upon the navigable waters of the United States, or adjoining shoreline in two spill events greater than 42-gallons within any 12 month period.

Documentation to be included in the Plan submission includes the following:

- Name of the facility;
- Name(s) of the owner or operator of the facility;
- Location of the facility;
- Date and year of initial facility operation;
- Maximum storage or handling capacity of the facility and normal daily throughput;
- Description of the facility, including plot plans, flow diagrams, and topographical maps;
- The cause(s) of the spill, including a failure analysis of the system or sub-system in which the failure occurred;
- The corrective actions and/or countermeasures taken, including an adequate description of equipment repaired and/or replaced;
- Additional preventative measures taken or contemplated to minimize the possibility of recurrence; and
- Such information the U.S. EPA Regional Administrator may reasonably require, pertinent to the SPCC Plan or spill event.

5.0 FACILITY DESCRIPTION [40 CFR 112.7 (a)(3), §112.9, §112.10, §112.11]

The physical layout of the Socal Holding Huntington Beach Oil Field Facility consists of oil production leases at five (5) sub-locations referred to as the Highlands Strip (Highlands or "Strip"; Figures 6 through 6D), the North and South Bolsa Production Leases or Lowlands Area (Figures 4 and 5), the State Lease (Figure 2), Fort Apache (Figure 3), and Platform Emmy (Figures 8, 9A and 9B). Figure 1 provides a layout of the Huntington Beach Operating Areas. Platform Emmy, located 1.3 miles offshore in 46 feet of water, and Fort Apache are not contiguous with the main Highlands facility but are connected to it by pipelines.

Figures 1 through 9B, located in the "Figures" section of this SPCC Plan, provide the following detail and location information (as applicable):

- Process equipment, operating equipment, electrical equipment;
- Loading/unloading racks (not applicable to the Huntington Beach Field);
- Loading/unloading areas;
- Fixed aboveground storage tanks;
- Transfer stations and connecting lines;

- Completely buried and bunkered tanks;
- Mobile and portable container storage areas; and
- The contents of all containers.

The facility has a handling capacity of 8,000 barrels of crude oil and 150,000 barrels of produced water. The tanks and vessels are operated at rates and/or volumes less than their maximum capacity.

5.0.1 Onshore facilities

Each sub-area includes wells, well test stations, flow lines and gathering lines, and other related process piping and equipment. Oil, gas, and water produced from the reservoirs are pumped to a central processing facility on the Highlands. The Highlands also includes a produced water handling facility.

5.0.2 Onshore Oil Drilling and Workover Facilities

Normally, contract equipment is used for drilling and workover programs. A blowout preventer (BOP) assembly and well control system is installed before drilling below any casing string and is required during workover operations. Typically, up to seven rigs that can be used at any one time and are typically only used for the workover (maintenance) program. Company supervision and a firm contract ensure that all safety and environmental regulations are followed. When active drilling or workover operations are in progress, drainage is controlled.

5.0.3 Offshore Facilities

Platform Emmy has the following equipment: surge containers, pressure containers, scrubbers, automatic well testers (AWT), flowlines, and piping on the platform as well as sub-marine.

5.1 Oil and Oil Product Storage [40 CFR 112.7 (a)(3)(i), §112.9, §112.10, §112.11]

Tables 1 through 6, located in the "Tables" Section in this SPCC Plan, describe the type of oil in each fixed container and its storage capacity.

Tables 1 through 4 provides information about the aboveground fixed containers, mobile and portable containers, operational equipment (i.e. transformers, hydraulic equipment, lubricants, etc.), process vessels (i.e. separator tanks, etc.), and piping at the onshore facilities, which includes the Highlands, State Lease, the Lowlands, and Fort Apache [§112.7 and §112.9].

Table 5 provides information about the mobile and portable containers covered under §112.10, the onshore oil drilling and workover facilities, which include various areas in the Highlands, State Lease, and the Lowlands.

Table 6 provides information about the fixed containers, oil-filled operational equipment, mobile and portable containers, and other potential sources (piping) on Platform Emmy [§112.11 for offshore oil drilling, production, or workover facilities].

5.2 Discharge Prevention Measures [40 CFR 112.7 (a)(3)(ii)]

5.2.1 Onshore Facilities

Tank overfill prevention at all facilities is provided by high-level alarms (in most cases) and piping to equalize overflow to other tanks. Some tanks are also equipped with low level alarms. Smaller, portable tanks that are not equipped with alarms are loaded manually following written standard operating procedures that include tank level monitoring. Written procedures are in place for various loading and unloading activities. A scheduled system is in place for maintenance and testing of level switches and alarms. Work orders are generated and maintained at the Health, Environmental, and Safety (HES) Department records. Additional information is provided in Socal Holding's Oil Spill Contingency Plan, *Section 3.0 – Spill Response Procedures* and *Section 4.0 – Spill Response Resources*.

V-904 (condensate vessel located in Containment A, northwest of T-101 and adjacent to Containment #1) is equipped with high level alarm. The high-level alarm on this vessel is included within the maintenance and testing schedule. This system is a designed control system to prevent overfill of the vessel, ensuring condensate collection will not exceed containment capacity of Containment A.

5.2.2 Onshore Oil Drilling and Workover Facilities

A BOP assembly and well control system is installed before drilling below any casing string or during workover operations. The BOP assembly and well control system is capable of controlling wellhead pressure that may be encountered while the BOP assembly and well control system are on the well.

5.2.3 Offshore Facilities

Platform Emmy (the offshore facility) consists of the following list of equipment:

- Atmospheric Storage (Surge Containers)
  - Atmospheric storage or surge containers are equipped with high liquid level sensors that activate an alarm or control the flow, or otherwise prevent discharges.
- Pressure Containers
  - Pressure containers are equipped with high and low-pressure sensors that activate an alarm or control flow.
- The CVR Scrubber and East AWT
  - Externally painted and internally coated. Anodes are installed inside the vessels to provide cathode protection to the interlay wall where coating holidays may occur.
- Manifolds (headers) Equipped with Individual Flowlines
  - The flowlines are equipped with high pressure sensing device and shut-in valve at the wellhead. If shut-in well pressure is greater than the working pressure of the flowline and manifold valves up to and including the header valves.
  - Piping
  - Corrosion protection for piping is provided by wrapping and coating.
- Piping (sub-marine)
  - An annual diver-based inspection is conducted for debris, unsupported spans due to bottom sediment erosion, and damages to the pipeline are documented. A close interval cathodic protection survey is performed annually. A smart pig inspection, in accordance CSLC regulations, is also performed in accordance with timing approved by CSLC.

Individual surface well shut-in valves are activated by the well's flow line high-pressure switch (PSH) or low-pressure switch (PSL) safety devices. Subsurface gas well shut-in valves are activated on all wells by the following devices:

- Fusible plug loops (1-9);
- Ultra Violet/Infrared (UV/IR) detectors (1-9);
- Manual electrostatic sensitive device (ESD) stations at various locations on Platform Emmy (1-14);
- Twenty Gas Detection devices (1-20) on board alarm at 20% of the lower explosive limit (LEL), and they alarm and initiate the Emergency Shutdown System at 40% LEL; and
- Smoke detection devices 1, 2, 4, 6, and 8 will sound an alarm and are located at various locations on Platform Emmy.
- All of Platform Emmy's oil wells are equipped with surface safety valves that shut automatically if Platform Emmy's Emergency Shutdown System is activated. The production engineer maintains a "safe chart" mapping the subsurface safety valves for the oil wells. This system is tested every month, with oversight from CSLC.
- Platform Emmy also has two operating natural gas wells equipped with subsurface safety valves that can be shut-in to stop the flow of natural gas in an emergency. Platform Emmy's emergency shutdown system closes these subsurface safety valves on the natural gas wells. The production engineer maintains a "safe chart" mapping the subsurface safety valves for the natural gas wells.

The Emergency Shutdown System can also be activated manually by an operator on the platform or remotely from the nearby onshore facility. There are continuous monitoring systems on Platform Emmy for fire, natural gas leaks, and abnormal system pressure that activate the Emergency Shutdown System.

5.3 Discharge and Drainage Controls [40 CFR 112.7 (a)(3)(iii)]

5.3.1 Onshore Facilities

Tank battery and separation and treating area dike/containment drains, where applicable, are closed and sealed at all times except when draining uncontaminated rainwater. The operator visually inspects any storm water for hydrocarbons (sheen) and only discharges the water if no sheen is visible. Some containment areas are not equipped with drainage valves and accumulated storm water is removed by vacuum truck to prevent damage to containers/equipment. Flapper type valves are not used to drain diked areas. Some containment areas have pits or trenches equipped with pumps to transfer accumulated stormwater into processing facilities. Drainage from undiked areas is confined in a catchment basin or holding pond.

Drainage from most process areas (including the areas surrounding the process equipment, AWT locations, and facility piping) that are not within secondary containment is typically directed toward pipe chases, ditches, or sumps where it can be controlled. Some facilities have secondary containment provided by diversion berms, which route the flow of liquids to an adjacent containment basin.

If oil is detected in containment areas or in field drainage systems, any hydrocarbon spills will be removed by vacuum truck or other appropriate means.

5.3.2 Offshore Facilities

Platform Emmy utilizes oil drainage collection equipment, with facility drains directed toward a central collection sump, to prevent and control small oil discharges around pumps, glands, valves, flanges, expansion joints, hoses, drain lines, separators, treaters, tanks, and associated equipment in order to prevent the facility from having a discharge.

The drilling deck, production deck, satellite platform and helideck are equipped with an open drain system. The collected fluid is directed from each deck into individual liquid seals. The discharge lines from the liquid seals are then directed through individual control valves before the tie-in to the Atmospheric Drain Tank (T-203 ADT),

which has a capacity of 117 barrels. Liquids accumulated in T-203 ADT are pumped out and directed into the production header, which then ties directly into the 12-inch Emmy Production Line to shore. The lower deck and satellite open deck drains are individually collected and then directed into a single liquid seal before directing the flow into the Satellite Drip Tank (T-207 SDT). The Satellite Drip Tank is a double-walled horizontal cylindrical tank that is 30-inches in diameter by 10-feet in length. The fluids collected in T-207 SDT are pumped out based on level switches by and directed into T-203 ADT. Oil collection equipment is emptied frequently to prevent overflow.

5.4 Countermeasures [40 CFR 112.7 (a)(3)(iv) and (v)]

The discharge response objectives are to (1) protect human health and safety and the environment, and then (2) to control the source (i.e. close a valve, plug a leak, shutdown operations). If a spill occurs outside of containment, the appropriate response and resources will be enacted, per Socal Holding's Oil Spill Contingency Plan, based on conditions at the time of a release.

The Oil Spill Contingency Plan contains information on the procedures (*Section 3.0 – Spill Response Procedures*) and resources available, including equipment and response contractors (*Section 4.0 – Spill Response Resources*). The procedures include the notification and immediate response actions, assessment, containment and recovery, sensitive area protection, shoreline and terrestrial cleanup, waste management disposal, and waste management/disposal.

5.5 Methods of Disposal [40 CFR 112.7 (a)(3)(v)]

An effort will be made to minimize the amount of waste resulting from a spill. Recovered oil will be transferred to the production process for reuse. Any contaminated soil, cleanup materials such as oily rags, spill booms, and sorbent materials will be collected, stored in United Nations/Department of Transportation (UN/DOT) approved-containers in regulated areas, and eventually sent off-site for disposal to an approved facility. Waste minimization through the use of recycling, recovery, or treatment will be given a high priority.

Wastes deemed unsuitable for returning to the production process will be shipped to approved waste management sites. Requirements for labeling, placarding, manifesting, and permitting for these waste shipments will follow federal/state requirements.

The need to decant oil-contaminated water back into the environment is not anticipated. If such a need arises, pre-approval from the Federal On-Scene Commander must be obtained and other permits may be required due to environmental sensitivities. The HES Department will be responsible for obtaining all such approvals and permits.

Additional Information about waste management and disposal is provided in the Socal Holding's Oil Spill Contingency Plan, *Section 3.6 – Waste Management/Disposal.*

5.6 Emergency Contacts [40 CFR 112.7 (a)(3)(vi)

The following table provides the names and telephone numbers of Socal Holding's emergency response individuals, as well as an oil spill response contractor, National Response Center, and other federal, state, and local agencies that must be contacted in the event of a reportable discharge.

Socal Holding Main Office Contacts	
Main Office	(562) 624-3400
24-hour Contact Number – Dispatcher	(562) 624-3452 (562) 624-3453
Socal Holding Oil Spill Incident Commanders (Qualified Individuals)	
Dean Persinger	Office (562) 999-8405
Kristy Monji	Cell (562) 505-8657
Field Operations Supervisor	Office (714) 969-3260 Cell (562) 244-8639
Field Operators	(714) 969-3201 (562) 624-3452
Third Party Contractors	
Marine Spill Response Corporation (MSRC) - spill/drill call-out	(562) 981-7600 (Long Beach Office) (800) 259-6772 (800) 645-7745
Ancon Marine	(562) 326-5900 (310) 522-5110
Patriot Environmental Services (24-Hour Response) - Shoreline/onshore response	(800) 624-9136
For any significant spill of 1 barrel (42 gallons) or more, or spill of any quantity to a waterway or area likely to enter a waterway, call:	
National Response Center	(800) 424-8802
California Emergency Management Agency (EMA) - Office of Emergency Services Warning Center	(800) 852-7550 (800) 645-7911
Office of Spill Prevention and Response (OSPR) - 24 Hour Telephone (ask for OSPR Duty Officer)	(916) 778-9338 (916) 445-9338
US Coast Guard, Marine Safety office	(800) 221-8724
City of Huntington Beach Fire Department	911 (714) 536-5411 (8:00 AM to 5:00 PM) (714) 536-5469 (5:00 PM to 8:00 AM)
Orange County Fire Department, CUPA, Health Hazmat Division, Emergency Response Section	911
If the oil spill may affect surface or groundwater, call:	
Santa Ana Regional Water Quality Control Board - Stephen D. Mayville, Enforcement Chief	(951) 782-4992
If the oil spill may affect wildlife, call:	
California Oiled Wildlife Care Network (OWCN)	(877) 823-6926 (530) 752-4167
If the oil spill may present a fire or health hazard, call:	
City of Huntington Beach Fire Department	911 (714) 536-5411 (8:00 AM to 5:00 PM) (714) 536-5469 (5:00 PM to 8:00 AM)
Orange County Fire Department, CUPA, Health Hazmat Division, Emergency Response Section	911
For any amount of oil spilled in a storm drain or flood control system, or during rainfall, call:	
Orange County Department of Public Works	(877) 897-7455
US Coast Guard, Marine Safety office	(800) 221-8724

5.7 Spill Reporting and Spill History [40 CFR 112.4 and 112.7 (a)(3)(vii)]

For any observed accumulation of oil, or release of oil from the facility, the operator will complete an incident report for each event. No process fluids or storm water should be released from any of the facilities due to the well cellars, the containment walls for the large aboveground storage tanks, and the containment berms along the perimeter of each site that surrounds the production, wastewater treatment, and re-injection equipment. Socal Holding utilizes a stormwater release log and a copy is provided in Appendix A.

For reportable oil spill/discharge events (any release of oil in any volume into a storm drain or offsite), the appropriate Notification Form will be completed (Appendix B). On this form, the following information is recorded:

- The exact address or location and phone number of the facility;
- The date and time of the discharge;
- The type of material discharged;
- Estimates of the total quantity discharged;
- The source of the discharge;
- The cause of the discharge;
- Any damages or injuries caused by the discharge;
- Actions being used to stop, remove, and mitigate the effects of the discharge;
- Evacuation requirements needed, if any, and
- The names of individuals and/or organizations who have also been contacted.

Regardless of any other emergency spill reporting, there are specific additional reporting requirements for oil spills under SPCC Plan regulations. If a discharge occurs in excess of 1,000 gallons in a single event, or two discharges over 42 gallons each within any rolling 12-month period, a written report must be made to the U.S. EPA Region IX Administrator and a copy of this SPCC Plan must be submitted within 60 days. The requirements of §112.4 will be followed for this reporting.

6.0 SPILL POTENTIAL [40 CFR 112.7 (B)]

See Tables 1 through 6, which provide the following information:

- Equipment Name;
- Location;
- Oil Source;
- Contents (oil type);
- Source capacity;
- Cause of potential failure/spill;
- Rate of flow;
- Direction of flow; and
- Containment Systems.

The volume, cause of potential failure/spill, rate of flow, and direction of flow is described in each table accordingly.

7.0 BULK STORAGE TANKS, SECONDARY CONTAINMENT AND DIVERSION STRUCTURE, AND OIL SPILL CONTINGENCY PLAN AND MANPOWER [40 CFR 112.7 (c)]

See Tables 1 through 6 for description of the potential spill, direction of flow, and containment systems for each piece of equipment required to be described in this SPCC Plan. Secondary containment at the unit consists of:

- Containment walls (cement block or earthen diked sealed with pavement);
- Berms; and
- Pipe chase areas and recovery systems providing regional secondary containment sufficient for spill containment onsite even in a 25-year, 24-hour storm event for all facilities without their own walls or berms on the Highlands.

7.1 Onshore Facilities [40 CFR 112.7 (c)]

The material and construction of bulk storage containers are compatible with the material stored and conditions of storage such as pressure and temperature. All bulk storage container installations are constructed so that a means of secondary containment is provided for the entire capacity of the largest single container plus sufficient freeboard to contain precipitation.

Diked areas are sufficiently impervious to contain discharged oil. The secondary containment areas are constructed of either concrete block walls or compacted earthen material with sufficient clay content to retain "oil" until cleanup occurs.

The tank battery installation is provided with overflow equalizing lines which exist between containers so a full container can overflow to an adjacent container. The tank battery also has high-level sensors which generate and transmit an alarm signal to the computer where the facility is subject to a computer production control system.

Temporary storage containers, such as Baker Tanks or frac tanks or mobile/portable tanks, may be present at the facility depending on the current needs of the facility. These tanks may contain oily water, oily sludge, or process fluids mixed with wastewater and/or storm water. When these tanks are used, several methods of containment may be used. They may be placed in existing secondary containments that are capable of containing the contents of the temporary tank, or they may be located in an area where any fluid release would flow to an existing drainage system, such as the long below-grade well cellars. A temporary tank may be located in a flat uncontained area if a continuous earthen berm is constructed around it, with sufficient containment volume in case of a release from the temporary tank. Lastly, a temporary tank may be located in a low-lying area where any release would be contained in the vicinity of the tank due to the low elevation.

7.2 Onshore Oil Drilling and Workover Facilities [40 CFR 112.10(c)]

All mobile drilling or workover equipment is provided with appropriate secondary containment. The mobile drilling and workover equipment is positioned to prevent a discharge [§112.10 (b)].

Each well has a well cellar where drilling fluids are drained and contained. The returns bins, which are lined, would overflow to general containment (e.g. berms and well cellars). Fueling from the fuel truck is performed using drip catchment and /or plastic if needed to augment draining to general containment. The mud pump engine tank is situated to overflow into general containment [§112.10 (c)].

A BOP assembly and well control system is installed before drilling below any casing string or during workover operations [§112.10 (d)].

7.3 Offshore Facilities [40 CFR 112.11(c)]

There are no crude oil storage tanks on Platform Emmy. All tanks and vessels on the platform are associated with spill and drainage control, and operations. The decks of the production platform and satellite platform are constructed of steel plate with integrated and sealed kick plates to prevent spills from discharging to the water. In addition, each deck includes drains to a drip/drain tank for the containment and control of any spills.

The facility has an Atmospheric Drain Tank (T-203 ADT), which is located on the Lower Deck. All drainage from upper decks, including spillage, rainwater, and vessel drains, are gathered via gravity drain lines into T-203 ADT and drains from the platform come into two liquid sealed units that allow for the breakout of any gas in the liquid. There are two pumps used to pump fluid from the tank into the 12" production line to shore. There is a Pressure Drain Tank located on the Lower Deck, which collects fluids from the pressure relief systems on the V-100 AWT. The Satellite Drip Tank (T-207 SDT) is located below the lower deck on the northernmost side of the platform. The tank holds all the fluid from the drains on the Satellite Deck and the Lower Deck. The fluid is them pumped from the tank into T-203 ADT.

7.4 Oil Spill Contingency Plan and Manpower [40 CFR 112.7 (d)]

Please refer to the facility's *Oil Spill Contingency Plan*

8.0 INSPECTIONS, TESTS, AND RECORDS

8.1 Onshore Facilities [40 CFR 112.7 (e)]

Each container of oil is visually inspected for deterioration and maintenance needs, including the foundation and support of each container located on or above the surface of the ground. In the event that a field-constructed aboveground container undergoes a repair, alteration, reconstruction, or a change in service, the container will be evaluated for the risk of discharge or failure due to brittle fracture or other catastrophe. Field drainage systems (i.e. field drainage ditches or road ditches) and oil traps, sumps, or skimmers are inspected for accumulations of oil.

The facility conducts an inspection of the following aboveground facility transfer operation appurtenances:

- Transfer operation piping and valves;
- Valve glands and bodies;
- Drip pans;
- Pipe supports;
- Pumping well polish rod stuffing boxes; and
- Bleeder and gauge valves.

The facility also conducts an inspection of the produced water handling facilities.

Facility personnel make regular observations of the equipment during normal working hours. Inspections or observations are conducted on the wellheads, pipelines, separation equipment, and tanks. Pipelines are inspected by the following non-invasive methods every two years: guided long range ultrasound (GUL), x-ray inspections on cement-lined pipe, and ultrasonic (UT) inspections. Visual pipeline inspections are performed annually, which

is in compliance with the Department of Oil, Gas, and Geothermal Resources (DOGGR) Assembly Bill 1960 (AB-1960), *Section 1773.3 "Pipeline Inspection and Testing"*. Internal tank inspections and API certified tank inspections are conducted after tank construction. In compliance with AB-1960, in-service tanks are inspected monthly. Inspection forms utilized by Socal Holding personnel for inspections are provided in Appendix A.

Records of the inspections and tests (including those maintained under usual and customary business practices) are retained on file for a minimum period of three (3) years. (Note: Existing inspections and tests kept under usual and customary business practices will suffice if approved by the certifying engineer).

Flowline Inspections

Oil and produced water flowline corridors are observed by operating personnel during travel to and from the well sites. Line and well surveillance is also performed twice per day. Check valves which are installed on header manifolds isolate individual flowlines and wellheads. High-level pressure controllers and anti-corrosion chemicals are used as needed. Flowline maintenance includes repair or replacement of lines based on leak frequency. All leaks are immediately repaired.

The flowline maintenance program includes periodic examinations, corrosion protection (as appropriate), and flowline replacement for the facility. Copies of the inspection forms are provided in Appendix A.

8.2 Onshore Oil Drilling and Workover Facilities [40 CFR 112.10]

Rig Site personnel make regular observations of the Rig Site during normal working hours. Periodic inspections or observations are made of the Rig Site where there is a potential for spills (containers and process equipment). The company keeps additional inspections and records of the drilling rig's components on file, as required.

In the event that a field-constructed aboveground container undergoes a repair, alteration, reconstruction, or a change in service, the container will be evaluated for the risk of discharge or failure due to brittle fracture or other catastrophe.

Records of the inspections and tests (including those maintained under usual and customary business practices) signed by the appropriate supervisor or inspector are retained on file for a minimum period of three (3) years. (Note: Existing inspections and tests kept under usual and customary business practices will suffice if approved by the certifying engineer). Copies of the inspection forms for onshore oil drilling and workover facilities are provided in Appendix A.

8.3 Offshore Facilities [40 CFR 112.11]

The Platform Emmy Facility has prepared and maintains a sub-marine piping inspection and testing program as well as written procedures for scheduled periodic inspection and testing of the facility pollution prevention equipment and systems (including liquid level and pressure sensors, sump pump systems, corrosion prevention equipment, valves, and alarms). Simulated discharges are used to test/inspect human and equipment pollution control and countermeasure systems.

The Platform Emmy facility has the following inspection and test procedures in-place:

- Maintenance plans are located in Socal Holding's HES file management system for equipment containing oil, including vessels, pipelines, tanks, and drainage systems. In addition, alarms and sensors are tested monthly, witnessed by CSLC inspector. Visual inspections of decking and drainage systems are performed and logged monthly.

- Daily and monthly operator tasks have been defined to assure reliable operation of the liquid removal system and pump start-up devices (Pumps P-203A/B and P-207).
- In the event that a field-constructed aboveground container undergoes a repair, alteration, reconstruction, or a change in service, the container will be evaluated for the risk of discharge or failure due to brittle fracture or other catastrophe.
- Records of the inspections and tests (including those maintained under usual and customary business practices), signed by the appropriate supervisor or inspector are retained on file for a minimum period of three (3) years. (Note: Existing inspections and tests kept under usual and customary business practices will suffice if approved by the certifying engineer).

A copy of the Platform Emmy Inspection Forms is provided in Appendix A.

9.0 TRAINING AND DISCHARGE PREVENTION [40 CFR 112.7 (f)]

9.1 Personnel Training [40 CFR 112.7 (f)(1)]

Socal Holding maintains the responsibility and provides the following minimum training to oil-handling personnel prior to assignment of job responsibilities:

- Operation and maintenance of equipment to prevent oil discharges;
- Oil discharge procedure protocols;
- Routine handling, loading, unloading, and transfer of products, including crude oil;
- Routine start up and shut down, emergency shutdown, and emergency responses;
- Inspection procedures for pipeline oil leaks, tank integrity, and containment structures;
- Applicable oil spill prevention (State & Federal) laws, rules, and regulations;
- General facility operations; and
- The contents of the facility SPCC Plan and applicable pollution control laws, rules, and regulations.

Training sessions are held at various times throughout the year, but at least annually, for education on spill prevention, control, and response. Individual personnel are trained on an annual basis. Responsible personnel may review potential spill dangers and methods to prevent spill dangers with field personnel during monthly safety meetings. Facility operation procedures and reporting and record keeping procedures are also reviewed with operating personnel. All employees working onsite and potentially exposed to hazardous substances (including oils) health hazards, or safety hazards receive Hazard Communication training. Personnel are generally trained to perform their duties in a manner that ensures worker safety, appropriate (defensive) emergency response, and compliance to hazardous material rules.

SPCC Plan-specific oil spill prevention training is conducted for those employees with specific responsibilities handling oil and oil-containing equipment and containers. These personnel include those responsible for inspections of oil-containing equipment and filling of oil-field operation equipment and implantation of this SPCC Plan. Employee training includes:

- Review of operation and maintenance of equipment to prevent discharges;
- Discharge (spill response) procedure protocols;
- Applicable pollution control laws; and,
- Contents of this SPCC Plan.

Socal Holding has a five level program of continuous on-the-job training for employees involved in field operations. The purpose of the program is to train personnel in the efficient and safe performance of their specific job classifications. The five levels are:

Phase 1 Operation
Phase II Piping, Regulations, Valves, and Gauges (Theory)
Phase III General Services (Theory)
1) Housekeeping
2) Equipment and Tools
Phase IV Advanced Training (Theory)
1) Systems Familiarization
a. Well Production
b. Well Testing
c. Gas Gathering
d. Safety Shut-In
e. Communication
f. Water Systems, etc.
Phase V Field Application of Training
1) Performance of skills and procedures demonstrated in the piping of installations in the field.
2) Housekeeping Services
a. Clean up performance at well servicing or drilling locations
3) Flow Splitters, Treaters, FWKO clean-out
4) Oil spill (land) clean up

Additional information on Socal Holding's Spill Response and Prevention Training Program is provided in the Oil Spill Contingency Plan, *Section 7.3.*

Periodic Briefings

Briefings for oil-handling personnel are conducted at least once a year to assure adequate understanding of the SPCC Plan for the facility. These briefings include:

- Known spill events or failures;
- Discussion of potential discharges;
- Component failures; and,
- Precautionary measures.

SPCC Plan training is conducted for all field operating personnel. Additionally, spill response trainings and briefings are provided prior to or during annual spill drills and may be conducted during daily or monthly safety meetings. Operators are required to review the training material on the pipeline visual leak inspection program prior to performing the annual inspection.

Documentation

Documentation of these Personnel, Training, and Discharge Prevention Briefing programs is maintained for a minimum period of three (3) years. Training Logs and Discharge Prevention Briefing Logs are provided at Socal Holding's HES Filing System.

10. SECURITY [40 CFR 112.7 (g)]

The five (5) sub-locations which comprise Socal Holding's Huntington Beach Oil Field and Platform Emmy (Highlands, the Bolsa Production Leases, the State Lease, and Fort Apache) and Platform Emmy are secured with either fencing or cement block walls, or in the case of Platform Emmy, is located offshore. The Highlands and Fort Apache Site have cement block walls and Site access is controlled through a gate. A security guard is located at the east gate entrance off Golden West Street. To access the Bolsa Production Leases and State Lease, there is a security gate located off Seapoint Avenue.

Access to Platform Emmy is limited to helicopters and boat access, and access to the Site must be approved by passenger manifests prior to visiting the platform.

There is at least one person on duty 24 hours per day, 7 days per week, and 52 weeks per year at both the onshore facility and offshore facility.

11. TANK CAR AND TANK TRUCK LOADING AND UNLOADING [40 CFR 112.7 (h), §112.9, and §112.10]

Tank truck loading/unloading occurs at the Highlands facility for the onshore oil drilling and workover facilities [112.9 and 112.10]. The truck loading/unloading areas utilize the following containment and/or diversionary structures for the loading/unloading area(s):

- Dikes, berms, or retaining walls;
- Curbing or drip pans (transfers are continuously monitored);
- Culverting, gutters, or other drainage systems; and
- Earthen or natural structures that can contain and prevent discharges.

Tank truck loading/unloading does not occur at the Platform Emmy facility.

TABLES

Huntington Beach Oil Fields Equipment List
Aboveground Fixed Containers

	Oil Source		Dimensions	Associated Substance (Contents) (Oil)	Source Capacity (bbls unless noted)	Net Containment Volume (see calculation sheets for dimensions and containment details)	Potential Failure	Rate of Flow (bbls/hr)	Direction of Flow	Observations
Containment #1	T-101	Tank	30 dia. X 16	Crude oil	2,000	3,676.1 BBL	overfill, leak, rupture	2,000	Inside Containment	Containment is concrete bottom and sides.

APPENDIX A
INSPECTION LOGS

SPCC FACILITY MONTHLY INSPECTION FORM

Lease/Facility: _____

Name of Person Inspecting: _____

Date of Inspection: _____

		YES	Describe Required Maintenance	Maximo Work Order	N/A
1	Access road is capable of providing safe entry and truck loading?				
2	**Containment berms and containment area are:**				
	A) Free of vegetation and debris at or on the berm?				
	B) Is in good condition and not damaged or compromised by equipment or foot traffic?				
	C) Free of fluids and rainwater?				
	D) Has no evidence of oil or other spills?				
3	No unauthorized equipment is being stored on top of or outside of the facility's secondary containment (site perimeter berm)?				
4	All rain water valves on secondary containment are closed and secured (unless in use for rain water management)?				
5	Storm drains that release rainwater from site have valves in the locked position?				
6	**Aboveground Bulk Storage Containers:**				
	A) All chemical totes, drums and other bulk storage containers are stored within secondary containment?				
	B) Containers are in good condition with no signs of corrosion, cracks, deterioration or discharge?				
	C) Containers' supports or foundations are in good condition?				
	D) Containers are not stored near storm drains?				
7	**Tanks and tank foundations:**				
	A) Tanks are in good condition, well maintained and show no signs of leakage or liquid accumulation at the base, seams, and associated piping, plugs and fittings?				
	B) Tanks and foundations show no signs of corrosion or shell distortions?				
	C) Bolts and/or welds intact with no deterioration of gaskets?				
	D) Foundation is in good condition and shows no signs of settling or erosion?				
	E) The paint coatings, insulation systems and tank grounding systems are in good condition and in working order (if present)?				
	F) Drains and overflow lines are adequate size and free of blockages?				
8	Are tanks and vessels properly labeled with: A) Tank identification number B) Tank contents C) Hazard placards or labels (for appropriate materials) D) Out of Service or OOS labels; 1 ft high letters and 5 ft above ground surface.				
9	All flow lines and gathering lines are free of visual signs of corrosion, leaks and liquid accumulation?				

		YES	Describe Required Maintenance	Maximo Work Order	N/A
10	Oil loading areas and equipment are clean with no evidence of oil spills?				
11	All oil-filled equipment is stored within secondary containment?				
12	Field and/or road ditches are maintained and have no evidence of oil spills?				
13	Well cellars are free of fluids?				
14	Well cellar boards (where applicable) have sufficient grating to exclude people/animals?				
15	**Aboveground Valves, Fittings and Piping:**				
	Are aboveground valves, fittings, piping and pipeline supports in proper position, in good condition and showing no signs of cracks, splits, corrosion, leaks or any other evidence of damage?				
	A) Flanged, screwed or welded joints and connections				
	B) Pump packing				
	C) Pumping well stuffing box packing				
	D) Gauge glass				
	E) Piping and fittings				
	F) Bearing seals				
	G) Relief valves				
	H) Bleeder and Gauge valves				
	I) Valve glands, bodies and handles				
	J) Pressure gauges and Thermometers				
	K) Drip pans				
	L) Foundation pads for pumps and compressors				
16	Good general housekeeping?				
	A) Trash lids are closed/bins are covered when not in use?				
	B) Maintain orderly storage areas (waste, equipment laydown, etc.)?				
	C) Dirt/soil piles are covered?				
	D) Ground surface is free of oil, litter, oily rags and other debris?				
	E) Out of service oil-filled equipment and oily piping, tubing, etc. is stored over drip pans or properly				
17	Unusual or special conditions at this location?				
18	Have Maximo work orders been submitted for all items requiring maintenance on this form?

EXAMPLE

Submittal of Information to Regional Administrator for Qualified Discharge(s)

In the event of a qualified discharge or discharges, this page can be utilized to provide official notification to the Regional Administrator. If the Facility has had a discharge or discharges which meet one of the following two criteria, then this report must be submitted to the U.S. EPA Regional Administrator within 60 days. (Check as appropriate)

☐ This Facility has experienced a reportable spill as referenced in 40 CFR Part 112.1(b) of 1,000 gallons or more.

☐ This Facility has experienced two (2) reportable spills (as referenced in 40 CFR Part 112.1(b) of greater than 42 gallons each within a 12-month period.

Facility Name and Location:

Facility Contact Person (Name, address/phone number):

Facility maximum storage or handling capacity:

Facility normal daily throughput:

Describe the corrective action and countermeasures taken (include description of equipment repairs and replacements):

Describe the Facility (maps, flow diagrams and topographical maps attached as necessary):

Describe the cause of discharge (as referenced in 40 CFR Part 112.1(b)) including failure analysis of the system is:

Describe the preventative measures taken or contemplated to be taken to minimize the possibility of recurrence:

Other pertinent information:

A copy of this report is also to be sent to the appropriate state agency in charge of oil pollution control activities.

APPENDIX C
SUPPORTING DOCUMENTATION

Figure 3.1-1

Initial Response Actions

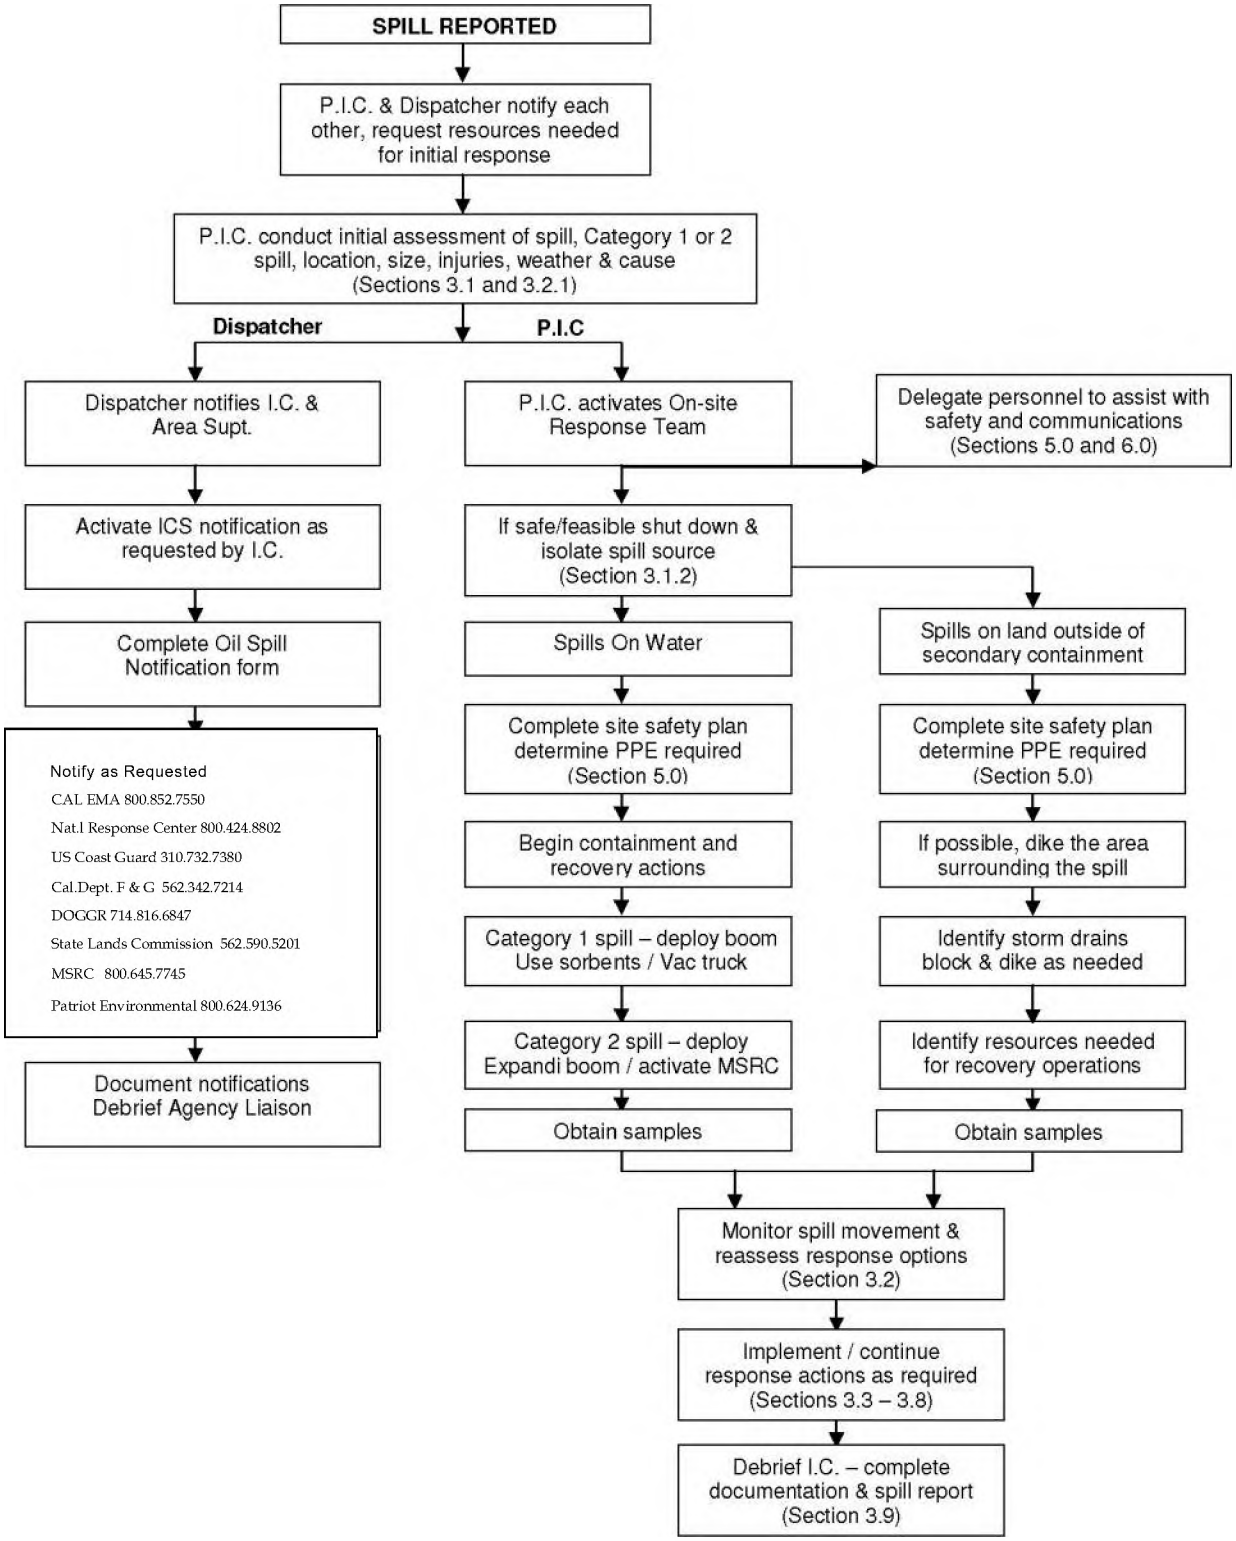

Figure 3.1-2

Initial Response Checklist

Response Action	Date/Time	Initials
Spill Observer and Fac. Ops. Supervisor (P.I.C.)		
Spill Observer reports spill to the Fac. Ops. Supervisor (P.I.C.)		
P.I.C. assumes role of Incident Commander- notifies Dispatcher of the incident		
P.I.C.- conduct initial assessment, category 1 or 2, location, size, injuries, spill source, initiate evacuation - if required		
P.I.C.- activate On-site Response Team, ensure the safety of all responders		
P.I.C.- if safe, shut down and isolate spill source		
P.I.C.- eliminate ignition sources around spill area		
Safety- don PPE, if required, and conduct safety assessment and air monitoring. **Note On Scene Weather conditions on Fig. 3.1-5**		
P.I.C.- implement initial containment actions		
P.I.C.- Identify resources needed for recovery operations (NRCES)		
P.I.C.- obtain samples of spilled material for analysis		
P.I.C.- monitor spill movement, reassess response actions and safety issues		
Dispatcher		
Ensure the FO supervisor of the area closet to the spill has been notified		
Get assistance for answering phone calls and documentation		
Notify the Incident Commander (I.C.)		
Activate I.C.S. notification as requested by the I.C.		
Complete the Oil Spill Notification form, determine longitude & latitude of spill site		
Begin agency notification as requested by the Incident Commander		
Document all agencies notified, debrief Agency Liaison of agencies notified		
Incident Command System		
Assemble at the Incident Command Post		
Attend briefing of the initial response actions		
Prepare site safety plans- including PPE, air monitoring, hazard assessment, and decontamination		
Implement supplemental containment and recovery actions		
Assess- notifications, weather, sensitive areas, spill trajectory, response resources		
Prepare Incident Action Plan		

3.1.1. Notification Procedures

Initial Notification

All oil spills or observations of oil on the ocean waters in the vicinity of the Huntington Beach Unit must be reported immediately to the CRC DISPATCHER OR THE FACILITIES OPERATION SUPERVISOR OF THE LOCATION ASSOCIATED WITH THE INCIDENT, WHICHEVER IS IN CLOSEST PROXIMITY TO THE INCIDENT. The Dispatcher or FO Supervisor receiving the initial call will immediately report the oil spill incident to the other person. Subsequent notifications to CRC response personnel, regulatory agencies, response contractors, and sensitive area managers are discussed below.

The recommended notification sequence for key notifications is provided in Figure 3.1-3. Telephone lists for making both external and internal notifications are provided in Table 3.1-1 and 3.1-2, respectively.

Notification of the CRC On-site Response Team (ORT) and Incident Command System (ICS) will typically involve the following:

1. Observer notifies the appropriate CRC Supervisor (separate CRC Supervisors are assigned to location) and/or CRC Dispatcher using a hand-held radio or direct communication

2. CRC Dispatcher monitors all radio frequencies and generally receives the notification at the same time as the CRC Supervisor but confirms the supervisor has been notified.

3. CRC Supervisor activates the local ORT using direct communication, hand-held radios, or PA system; determines if the spill is a Category One or Category Two incident; and notifies the Dispatcher of the incident categorization.

4. Dispatcher notifies the Incident Commander, makes the necessary regulatory agency notifications, and activates MSRC for Category Two incidents. Regulatory agency notifications includes required notification to the National Response Center (NRC) at the earliest practicable moment (within 1 hour) following the discovery of a release of hazardous liquid.

5. Incident Commander determines level of ICS activation and directs Dispatcher to activate the appropriate personnel via cell phones or e-mails.

A list of the CRC personnel that will staff each ICS response position and their telephone and pager numbers is provided in Table 3.1-2.

The names and phone numbers of the regulatory agencies, emergency services, response contractors, and sensitive area managers that may require notification are provided in Table 3.1-1 (see Section 3.4.4 for sensitive area locations). A decision guide is provided in Figure 3.1-4 for determining if notification of regulatory agencies is required for a given incident.

Other notification information, including a list of the other federal, state, and local agencies available to provide assistance in the event of a spill, is provided in Table 3.1-1.

The notification information form provided in Figure 3.1-5 should be used when making notifications for both aquatic and terrestrial spills. This form as well as the form provided in Figure 3.1-6, should be submitted to the CRC Safety and Environmental Department to satisfy internal written reporting requirements.

4.0 SPILL RESPONSE RESOURCES

4.1. General

This section provides comprehensive and up-to-date listings of the resources available for spill response operations at the CRC Huntington Beach Unit and a summary of the response equipment inspection procedures. CRC maintains an inventory of on-site equipment and a staff of trained personnel for responding to spills from their facilities.

The on-site resources will generally be used for the complete containment, recovery, and cleanup of most small and some moderate spills. In the event of a discharge which is beyond CRC's initial response capabilities, contract manpower and equipment resources can be obtained through Oil Spill Removal Organizations (OSROs). These OSROs can provide manpower and containment/cleanup equipment for the response operation on land, water or adjacent shorelines. Notification/implementation of these resources will typically be handled by the Qualified Individual. Table 4-1 provides a quick reference to the OSROs and details their response capability and estimated response times. Additional OSRO data, including equipment inventories is provided as Attachment 4-1.

Table 4-1

Contracted Response Resources

Los Angeles/Long Beach Captain of the Port (COTP) Zone

USCG Classified Oil Spill Removal Organization (OSRO)						
OSRO Name	Contract Number	Environment Type	Facility Classification Level			
			MM	W[1]	W[2]	W[3]
MSRC	6MPA 282	River/Canal	X	X	X	X
		Inland	X	X	X	X
		Nearshore			X	X
		Open Ocean			X	X

Additional Response Resources		
Contractor Name	Contract Number	Response/Mobilization Time
PATRIOT Environmental Services		2 hours
NRC Environmental		2 hours

4.2. CRC Equipment and Personnel

The major spill response equipment owned and maintained on-site by CRC is described below along with the available specifications and capabilities. The availability of trained response personnel is also discussed below. The majority of response equipment is stored at, or near, the docks on the four production islands, although additional equipment is stored at other locations within the Huntington Beach Unit. An inventory of the CRC on-site response equipment is provided in Table 4-2.

4.2.1. Boom and Deployment Equipment

The boom and deployment vessels that are available at the CRC Huntington Beach Unit are listed in Table 4-2.

4.2.2. Recovery Equipment

CRC does not own any skimmers or pumps dedicated specifically for spill response operations but does maintain an adequate supply of sorbents for recovery of smaller spills.

4.2.3. Temporary Storage Equipment

The temporary storage of recovered oily liquids and solids from spill response operations will be conducted as outlined in Section 3.6. The state and federal interim storage requirements will be met primarily through the use of MSRC and response contractor barges, response vessels, and portable tankage, as well as barges of opportunity.

The transfer of wastes into onshore tankage will be conducted by transferring oil from skimmers or vessels into vacuum trucks and then shuttled to the tank farm where it will be pumped into the appropriate tank.

4.2.4. Equipment Inspection

All CRC-owned response equipment and supplies are inspected on deployment. Inspections are conducted to verify that the equipment is available and in good condition and that adequate inventories of sorbents and other supplies are maintained. Equipment testing is conducted semi-annually and typically coincides with the deployment drills to minimize wear and tear on the equipment. Inspection and testing of work and crew boats is done in accordance with the manufacturer's recommendations, and because they are normally used for other purposes, the schedules are not included herein. An equipment inspection form is shown in Figure 4-1.

Table 4-1. Company Onsite Response Equipment Storage and Handling Procedures

EQUIPMENT	STORAGE	INSPECTION/ MAINTENANCE	TESTING
PLATFORM EMMY			
1 18' rigid hull inflatable boat with towing bit and 75 hp or greater outboard motor	Onsite at Platform	Monthly	Monthly
2 750' Roto Pacs of Model 4300 Expandi spill boom			Annually
7 drums oil sorbent pads (17½" x 17½" x ½")			Annually
HUNTINGTON BEACH			

Table 4-1. Company Onsite Response Equipment Storage and Handling Procedures

EQUIPMENT	STORAGE	INSPECTION/ MAINTENANCE	TESTING
1 13' rigid hull inflatable boat with 30hp outboard and trailer	Onsite at State Lease	Monthly	Annually
1500' of swamp boom and associated anchors/ground tackle			Annually
Oil snares, and response equipment			Annually

4.2.5. Personnel

The CRC spill response personnel consist of On-site Response Team (ORT) and Incident Command System (ICS) members. The ORT will generally provide the initial response to oil spills, including boom deployment and recovery operations, and consists primarily of production personnel. The ICS consists primarily of CRC management and technical personnel and will manage the response to larger incidents and/or provide support and supervision to the ORT and response contractors for both large and small incidents.

During normal work hours, ORT and ICS members can generally respond to a spill within 10 to 15 minutes of discovery. Response time during off hours is typically **less** than 1 hour as team members carry pagers and generally live within close proximity to the CRC facilities. All ORT members are at least 24-hour HAZWOPER trained (Level 4) and are qualified to deploy boom and perform general response duties.

4.2.6. Fire Fighting Equipment

The CRC Huntington Beach Unit fire fighting equipment is listed in Table 4-3 and summarized below; descriptions of equipment uses and fire fighting procedures is provided in Section 3.7.

The CRC fire fighting equipment will be supplemented by equipment and personnel from the Huntington Beach Fire Department who are under a prearranged agreement to respond to fires at the CRC facilities. .

4.2.7. Non-Cascadable Equipment

The OSPR regulations require each facility nominate certain equipment to be non-cascadable. This equipment must be mobilized within 2 hours and on-scene within 12 hours. All of the CRC-owned response equipment is considered non-cascadable.

Additional information on cascadable and non-cascadable equipment available from MSRC is provided in the MSRC OSRO Application.

4.2.8. Transportation

Transportation would be a vital component for all stages of an oil spill response. Once a response team is activated, transportation to the spill site as quickly as possible is mandatory. Personnel, response equipment, materials, and supplies would need to be transported to and from command posts, the spill site, and staging areas. Transportation services would also be needed for wildlife rescue, surveillance, and waste disposal operations.

The various transportation modes that may be required during spill response operations may include:

- Vehicles (trucks, trailers, busses, vans, ATVs).
- Fixed-wing aircraft.
- Helicopters.
- Marine vessels.

Equipment, personnel, and resources would be transported to the scene by the most expeditious means available. The mode of transportation would likely include a combination of vessels and vehicles, and possibly aircraft. Actual routes would be determined at the time of an incident and would depend upon the location of the incident, resources to be mobilized, estimated trajectory of the release, and current road, weather, and sea conditions

4.3. Marine Spill Response Corporation (MSRC)

MSRC is an independent, non-profit, national spill response company dedicated to rapid response. MSRC's capabilities include a large inventory of vessels, equipment, and trained personnel, complemented by a large contractor workforce in numerous locations in the continental U.S., Hawaii, and the Caribbean. MSRC also provides dedicated access to alternative response technologies such as in situ burn kits and aerial and vessel dispersant spraying operations. MSRC resources are available to respond to potential spills from the site that reach or have the potential to reach San Pedro Bay and/or Los Angeles Harbor. A list of their major response equipment is provided in Table 4-4.

Warehouse	20 lb c/o	2
Weld Shop	30 lb c/o, 20 lb CO_2, 20 lb c/o	1, 2, and 2, respectively

4.4. Other Available Contractors

In the unlikely event of a major incident where the aforementioned resources were inadequate to effectively handle the spill response, other local, regional, and potentially national or international resources could be mobilized. In most cases CRC will rely on their primary contractors to identify and mobilize these additional resources and, as such, it is not necessary to address all of these resources in this plan. Descriptions of selected local and regional contractors and their major spill response equipment inventories are provided below. Additional information on the equipment is available from the respective contractors.

4.4.1. Patriot Environmental Services

Patriot is a response contractor based in the Los Angeles area and is equipped to conduct both nearshore and open water recovery activities as well as shoreline cleanup operations. A list of their major response equipment and number of trained personnel is provided in Table 4-6.

4.4.2 NRC Environmental Services

NRCES is an industry supported cooperative that has been established in Southern California to provide aquatic spill containment and cleanup equipment and personnel for spills. A list of their major response equipment and trained personnel is provided in Table 4-7.

4.5. Specialized Support Services and Equipment

A variety of specialized support services and equipment is often required for a moderate to large spill response. These could include helicopters, vacuum trucks, caterers, hotels, portable toilets, and many others. Table 4-8 provides a listing of local and regional specialized services and equipment suppliers that could be called upon to provide support during a spill response effort at the CRC Huntington Beach Unit.

4.6. Government Emergency Support Services

Establishing secure operational areas during oil spill response efforts is mandatory for personnel safety, operational efficiency, and financial/legal matters. From the onset of response activities, the response team must work with local law enforcement agencies to ensure critical roadways, access points and coastal areas remain closed to curious onlookers who may not only interfere with response operations but may expose themselves to unsafe or unhealthy conditions. The release site should be evaluated to determine whether or not ground, marine, or air traffic would hamper the spill response. In the event control is required before local, state, or federal agencies arrive, it would be arranged as follows:

- To restrict ground traffic, the California Highway Patrol, sheriff, police or fire department would be called for assistance.
- The USCG would be contacted to provide assistance controlling marine vessels. To the extent possible, vessels and boats would be warned that traversing the release area may be dangerous and may jeopardize response operations.
- Patrolling and control activities would be left to the direction of Coast Guard.
- The Federal Aviation Authority, (FAA), would be contacted if it appears that air traffic control would be required.

The Port Police, Harbor Patrol and U.S. Coast Guard would ensure security by limiting the access of all vessels not involved in the response effort. The Company would assist law enforcement personnel in determining these locations and would provide additional security personnel as needed. The local agencies that could provide support services and their phone numbers are identified in Section 3.1, Table 3.1-3.

4.7. Volunteers

CRC will not normally hire and/or train volunteers for work on an oil spill response incident. Consequently, CRC will refer volunteers to appropriate state and/or local agencies or organizations that are set up to handle volunteers. In addition, CRC will refer volunteers to the California Department of Fish and Game Oiled Wildlife Care Network, which will be managing the collection and rehabilitation of oiled wildlife and typically utilizes volunteers for many of their activities.

4.8 Other Resources

In addition to cooperatives and private contractors, the U.S. Coast Guard and Navy also have considerable stockpiles of equipment available to the private sector but are generally provided only at the request of the Federal OSC and only after traditional sources have been exhausted. The U.S. Coast Guard stores material in Mobile, Alabama, and Hamilton Field, California, while the Navy maintains equipment in Stockton, California, and Norfolk, Virginia. Salvage equipment is also available through the Navy. In addition, the California Conservation Corps can also provide personnel to conduct many shoreline cleanup activities. Each of these sources of equipment and manpower are discussed below.

4.8.1. U.S. Navy Supervisor of Salvage (SUPSALV)

General

The SUPSALV equipment comprises full service spill response capability. A general breakdown of equipment includes:

- Marco Class V skimmer systems, vessel of opportunity skimmers.
- Inflatable boom.
- Lightering pumps, hoses, floating oil storage bladder systems.
- Command vans, rigging vans, communications package, ancillaries.

The SUPSALV equipment is deployed and operated by trained contractor personnel.

Callout Procedure

The Incident Commander will request the U.S. Coast Guard On-Scene Coordinator to mobilize the SUPSALV equipment and personnel.

Deployment

Most SUPSALV equipment will be shipped by truck from Stockton to the Ship Services Yard on Terminal Island in Long Beach. The Marco Class V skimmers will be deployed from this location. The CRC Transportation Coordinator will arrange for truck transport of the other Navy SUPSALV equipment to the locations identified by the CRC Coordinator.

4.8.2. U.S. Coast Guard Pacific Strike Team

The U.S. Coast Guard Pacific Strike Team has been organized, staffed, and equipped to provide rapid response capability to contain and recover marine oil spills. The Strike Team is intended to be used in the absence of local commercially available spill response resources or to complement locally available resources in large spill situations.

The Pacific Strike Team is located at Hamilton Field in Marin County, California, and has the following equipment available:

- Heavy duty offshore Open Water Oil Containment Recovery Systems (OWOCRS) - Each system contains 612 feet of 4-ft. fence-type boom with integral weir recovery devices (requires the use of vessels of opportunity)

- Nearshore skimmers including:
  - Acme 39T weir
  - Marco Class I
  - Vac-U-Max

- Offshore skimmers including:
  - Lockhead Cleansweep 4000

- ADAPTS transfer/lightering systems

The Strike Team is a military organization, with the Pacific Strike Team having approximately 28 officers and enlisted personnel. The crews are cross-trained, and most individuals are capable of deploying and operating all of the Strike Team equipment.

Callout Procedure

The Incident Commander will request mobilization through the U.S. Coast Guard On-Scene Coordinator.

Deployment
The U.S. Coast Guard Pacific Strike Team skimmers and spill response equipment stored in containers will be flown in to the Long Beach Airport by cargo aircraft and moved to the appropriate deployment site.

4.8.3. California Conservation Corps (CCC)

The CCC has been in existence since 1976 and is now a permanent State organization. It has a dual mission: the employment and development of young people and the conservation and enhancement of the State's natural resources. The CCC has established 17 residential centers statewide and a training academy in San Luis Obispo. The local residence center is at Fort MacArther in San Pedro.

Typical emergency activities include sandbagging levees, fighting fires and mud slides, helping eradicate agricultural pests, and providing earthquake cleanup assistance. The CCC indicates that 700 trained people could be provided locally within 2 hours, 1500 within 72 hours.

Callout Procedure
In an oil spill emergency, CCC assistance would be requested through the Department of Fish and Game by the Coast Guard On-Scene Coordinator.

CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS)

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID #	A1. CERS ID	A2. DATE OF PLAN PREPARATION/REVISION
1.	10446451	2/26/2019

3. BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)*: Huntington Beach Field - SoCal Holding, LLC

103. BUSINESS SITE ADDRESS: 20101 Goldenwest St.

104. BUSINESS SITE CITY		105. ZIP CODE
Huntington Beach	CA	90648

A3. TYPE OF BUSINESS (e.g., Painting Contractor)	A4. INCIDENTAL OPERATIONS (e.g., Fleet Maintenance)
Crude Oil and Gas Production	Crude Oil and Gas Production

A5. THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply)

☒ 1. HAZARDOUS MATERIALS; ☐ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

B1. INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply)

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☐ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:

1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

C1. INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply)

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☒ 3. TELEPHONE;
☐ 4. PAGERS; ☒ 5. ALARM SYSTEM; ☒ 6. PORTABLE RADIO

C2. NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY: (Check all that apply)

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☒ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

EMERGENCY RESPONSE PHONE NUMBERS:

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and preventing and mitigating associated harm to persons, property, and the environment.) D1

- ☒ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- ☒ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
- ☒ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
- ☒ 4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
- ☒ 5. BUILT-IN BERM IN WORK / STORAGE AREA;
- ☒ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- ☒ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
- ☒ 8. STOP PROCESSES AND/OR OPERATIONS;
- ☒ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- ☒ 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
- ☒ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
- ☒ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
- ☒ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
- ☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
- ☐ 15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
- ☒ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- ☒ 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
- ☒ 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
- ☐ 21. OTHER (Specify): D2

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY): E1

- ☐ 1. BELLS;
- ☒ 2. HORNS/SIRENS;
- ☒ 3. VERBAL (I.E., SHOUTING);
- ☒ 4. OTHER (Specify) Cell Phone E2

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.) E3.

Primary onshore assembly area: Flagpole near main office buildings

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

☒ EVACUATION ROUTE MAP(S) POSTED AS REQUIRED E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors

F. ARRANGEMENTS FOR EMERGENCY SERVICES

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following) F1.

- ☐ 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- ☒ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify): F2

Onshore: Patriot Environmental has been contracted to proved 24-hour emergency response cleanup services for the onshore facility. Patriot's phone number is (800) 624-9136.

Offshore: MSRC has been contracted to provide 24-hour emergency response cleanup services for the offshore facility. MSRC's phone number is (800) 645-7745.

G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g., ☒ CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

TYPE	EQUIPMENT AVAILABLE G1	LOCATION	CAPABILITY *(If applicable)*
Safety and First Aid	1. ☒ CHEMICAL PROTECTIVE SUITS, APRONS, OR VESTS	G2 Warehouse	G3 Available to employees as needed
	2. ☒ CHEMICAL PROTECTIVE GLOVES	G4 Warehouse, each person	G5 Available to employees as needed
	3. ☒ CHEMICAL PROTECTIVE BOOTS	G6 Warehouse	G7 Available to employees as needed
	4. ☒ SAFETY GLASSES / GOGGLES / SHIELDS	G8 Each person	G9 All employees wear protective eyewear
	5. ☒ HARD HATS	G10 Each person	G11 All employees wear hard hats
	6. ☐ CARTRIDGE RESPIRATORS	G12	G13
	7. ☒ SELF-CONTAINED BREATHING APPARATUS (SCBA)	G14 Tank Farm Office/Emmy	G15 Units available for specific tasks
	8. ☒ FIRST AID KITS / STATIONS	G16 Warehouse, vehicles, office	G17 All vehicles carry first aid kits
	9. ☒ PLUMBED EYEWASH FOUNTAIN / SHOWER	G18 Various field locations	G19
	10. ☒ PORTABLE EYEWASH KITS	G20 Various field locations and vehicles	G21 All vehicles carry eye wash bottles
	11. ☒ OTHER	G22 All employees wear H2S or 4-gas monitors	G23
	12. ☒ OTHER	G24 All employees wear fire resistant clothing (FRC)	G25
Fire Fighting	13. ☒ PORTABLE FIRE EXTINGUISHERS	G26 Vehicles	G27 20 and/or 30 lbs. units in vehicles
	14. ☒ FIXED FIRE SYSTEMS / SPRINKLERS / FIRE HOSES	G28 Gas Plant (DCU)	G29 Deluge system for gas plant
	15. ☐ FIRE ALARM BOXES OR STATIONS	G30	G31
	16. ☐ OTHER	G32	G33
Spill Control and Clean-Up	17. ☐ ALL-IN-ONE SPILL KIT	G34	G35
	18. ☒ ABSORBENT MATERIAL	G36 Warehouse, field vehicles	G37
	19. ☐ CONTAINER FOR USED ABSORBENT	G38	G39
	20. ☒ BERMING / DIKING EQUIPMENT	G40 Warehouse, Storage	G41 Secondary containment at all storage tanks
	21. ☒ BROOM	G42 Warehouse	G43 several
	22. ☒ SHOVEL	G44 Warehouse	G45 10+ available
	23. ☐ SHOP VAC	G46	G47
	24. ☐ EXHAUST HOOD	G48	G49
	25. ☒ EMERGENCY SUMP / HOLDING TANK	G50 Tank Farm 1 Highlands	G51
	26. ☐ CHEMICAL NEUTRALIZERS	G52	G53
	27. ☐ GAS CYLINDER LEAK REPAIR KIT	G54	G55
	28. ☐ SPILL OVERPACK DRUMS	G56	G57
	29. ☐ OTHER	G58	G59
Communi-cations and Alarm Systems	30. ☒ TELEPHONES (Includes cellular)	G60 Each person	G61 All employees have cell phones
	31. ☐ INTERCOM / PA SYSTEM	G62	G63
	32. ☒ PORTABLE RADIOS	G64 Each person	G65 All employees have cell phones and/or radios
	33. ☐ AUTOMATIC ALARM CHEMICAL MONITORING EQUIPMENT	G66	G67
Other	34. ☐ OTHER	G68	G69
	35. ☐ OTHER	G70	G71

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply) H1.	LOCATIONS (e.g., shop, outdoor shed, forensic lab)
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA	crude oil storage tanks H2.
☒ 2. PROCESS LINES / PIPING	H3.
☐ 3. LABORATORY	H4.
☐ 4. WASTE TREATMENT AREA	H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply) H6.	LOCATIONS
☒ 1. SHELVES, CABINETS AND RACKS	H7.
☒ 2. TANKS (EMERGENCY SHUTOFF)	H8.
☒ 3. PORTABLE GAS CYLINDERS	H9.
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES	shutoff valves H10.
☒ 5. SPRINKLER SYSTEMS	H11.
☒ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)	pressure vessel H12.

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);
- Decontamination procedures;
- Evacuation procedures;
- Control and containment procedures;
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply) I1.

☐ 1. FORMAL CLASSROOM; ☒ 2. VIDEOS; ☒ 3. SAFETY / TAILGATE MEETINGS;

☒ 4. STUDY GUIDES / MANUALS (Specify): CRC HSE Manual I2.

☒ 5. OTHER (Specify): All employees participate in online safety coursework (viaTrainingMine), contractors undergo orientation upon hire I3.

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

J. LIST OF ATTACHMENTS

(Check one of the following) J1.

☒ 1. NO ATTACHMENTS ARE REQUIRED; *or*

☐ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2.

K. SIGNATURE / CERTIFICATION

Certification: Based on my inquiry of those individuals responsible for obtaining the information, I certify under penalty of law that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete, and that a copy is available on site.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	Yes

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	No

Hazardous Waste

Is your facility a Hazardous Waste Generator?	Yes
Does your facility treat hazardous waste on-site?	No
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	No
Does your facility consolidate hazardous waste generated at a remote site?	No
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	No
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	No
Is your facility a Household Hazardous Waste (HHW) Collection site?	No

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	No
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	Yes
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	No

Additional Information

No additional comments provided.

HUNTINGTON BEACH FACILITY **20101 GOLDENWEST ST., HUNTINGTON BEACH, CA 92648**

CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS)

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID #	A1. CERS ID	A2. DATE OF PLAN PREPARATION/REVISION
	10446451	2/20/2018

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* 3.
Huntington Beach Field and Platform Emmy - SoCal Holding, LLC

BUSINESS SITE ADDRESS 103.
20101 Goldenwest St.

BUSINESS SITE CITY 104.		ZIP CODE 105.
Huntington Beach	CA	90648

A3. TYPE OF BUSINESS (e.g., Painting Contractor)	A4. INCIDENTAL OPERATIONS (e.g., Fleet Maintenance)
Crude Oil and Gas Production	Crude Oil and Gas Production

A5. THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply)

☒ 1. HAZARDOUS MATERIALS; ☐ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

B1. INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply)

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☐ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:

1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

C1. INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply)

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☒ 3. TELEPHONE;
☐ 4. PAGERS; ☒ 5. ALARM SYSTEM; ☒ 6. PORTABLE RADIO

C2. NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY: (Check all that apply)

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☒ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

EMERGENCY RESPONSE PHONE NUMBERS:

AMBULANCE, FIRE, POLICE AND CHP		9-1-1
CALIFORNIA EMERGENCY MANAGEMENT AGENCY (CAL/EMA)		(800) 852-7550
NATIONAL RESPONSE CENTER (NRC)		(800) 424-8802
POISON CONTROL CENTER		(800) 222-1222
LOCAL UNIFIED PROGRAM AGENCY (UPA/CUPA)		(714) 573-6250 C3.
OTHER (Specify):	C4.	C5.
NEAREST MEDICAL FACILITY / HOSPITAL NAME:	Huntington Beach Hospital C6.	(714) 842-1473 C7.

AGENCY NOTIFICATION PHONE NUMBERS:

CALIFORNIA DEPT. OF TOXIC SUBSTANCES CONTROL (DTSC)		(916) 255-3545
REGIONAL WATER QUALITY CONTROL BOARD		(951) 781-6288 C8.
U.S. ENVIRONMENTAL PROTECTION AGENCY (US EPA)		(800) 300-2193
CALIFORNIA DEPT OF FISH AND GAME (DFG)		(916) 358-2900
U.S. COAST GUARD		(202) 267-2180
CAL/OSHA		(916) 263-2800
STATE FIRE MARSHAL		(916) 445-8200
OTHER (Specify):	SCAQMD C9.	(909) 396-2000 C10.
OTHER (Specify):	DOGGR C11.	(714) 816-6847 C12.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and, preventing and mitigating associated harm to persons, property, and the environment.) D1.

- ☒ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- ☒ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
- ☒ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
- ☒ 4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
- ☒ 5. BUILT-IN BERM IN WORK / STORAGE AREA;
- ☒ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- ☒ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
- ☒ 8. STOP PROCESSES AND/OR OPERATIONS;
- ☒ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- ☒ 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
- ☒ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
- ☒ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
- ☒ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
- ☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
- ☐ 15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
- ☒ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- ☒ 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
- ☒ 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
- ☐ 21. OTHER (Specify): D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY): E1.

- ☐ 1. BELLS;
- ☒ 2. HORNS/SIRENS;
- ☒ 3. VERBAL (I.E., SHOUTING);
- ☒ 4. OTHER (Specify): Cell Phone E2.

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.) E3.

Primary onshore assembly area: Flagpole near main office buildings

Primary offshore assembly area: Satellite deck

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

☒ EVACUATION ROUTE MAP(S) POSTED AS REQUIRED E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following) F1.

- ☐ 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- ☒ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify): F2.

Onshore: Patriot Environmental has been contracted to proved 24-hour emergency response cleanup services for the onshore facility. Patriot's phone number is (800) 624-9136.

Offshore: MSRC has been contracted to provide 24-hour emergency response cleanup services for the offshore facility. MSRC's phone number is (800) 645-7745.

G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g., ☒ CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

TYPE	EQUIPMENT AVAILABLE G1.	LOCATION	CAPABILITY *(If applicable)*
Safety and First Aid	1. ☒ CHEMICAL PROTECTIVE SUITS, APRONS, OR VESTS	G2. Warehouse	G3. Available to employees as needed
	2. ☒ CHEMICAL PROTECTIVE GLOVES	G4. Warehouse, each person	G5. Available to employees as needed
	3. ☒ CHEMICAL PROTECTIVE BOOTS	G6. Warehouse	G7. Available to employees as needed
	4. ☒ SAFETY GLASSES / GOGGLES / SHIELDS	G8. Each person	G9. All employees wear protective eyewear
	5. ☒ HARD HATS	G10. Each person	G11. All employees wear hard hats
	6. ☐ CARTRIDGE RESPIRATORS	G12.	G13.
	7. ☒ SELF-CONTAINED BREATHING APPARATUS (SCBA)	G14. Tank Farm Office/Emmy	G15. Units available for specific tasks
	8. ☒ FIRST AID KITS / STATIONS	G16. Warehouse, vehicles, office	G17. All vehicles carry first aid kits
	9. ☒ PLUMBED EYEWASH FOUNTAIN / SHOWER	G18. Various field locations	G19.
	10. ☒ PORTABLE EYEWASH KITS	G20. Various field locations and vehicles	G21. All vehicles carry eye wash bottles
	11. ☒ OTHER	G22. All employees wear H2S or 4-gas monitors	G23.
	12. ☒ OTHER	G24. All employees wear fire resistant clothing (FRC)	G25.
Fire Fighting	13. ☒ PORTABLE FIRE EXTINGUISHERS	G26. Vehicles	G27. 20 and/or 30 lbs. units in vehicles
	14. ☒ FIXED FIRE SYSTEMS / SPRINKLERS / FIRE HOSES	G28. Gas Plant (DCU)	G29. Deluge system for gas plant
	15. ☐ FIRE ALARM BOXES OR STATIONS	G30.	G31.
	16. ☐ OTHER	G32.	G33.
Spill Control and Clean-Up	17. ☐ ALL-IN-ONE SPILL KIT	G34.	G35.
	18. ☒ ABSORBENT MATERIAL	G36. Warehouse, field vehicles	G37.
	19. ☐ CONTAINER FOR USED ABSORBENT	G38.	G39.
	20. ☒ BERMING / DIKING EQUIPMENT	G40. Warehouse, Storage	G41. Secondary containment at all storage tanks
	21. ☒ BROOM	G42. Warehouse	G43. several
	22. ☒ SHOVEL	G44. Warehouse	G45. 10+ available
	23. ☐ SHOP VAC	G46.	G47.
	24. ☐ EXHAUST HOOD	G48.	G49.
	25. ☒ EMERGENCY SUMP / HOLDING TANK	G50. Tank Farm 1 Highlands	G51.
	26. ☐ CHEMICAL NEUTRALIZERS	G52.	G53.
	27. ☐ GAS CYLINDER LEAK REPAIR KIT	G54.	G55.
	28. ☐ SPILL OVERPACK DRUMS	G56.	G57.
	29. ☐ OTHER	G58.	G59.
Communi-cations and Alarm Systems	30. ☒ TELEPHONES (Includes cellular)	G60. Each person	G61. All employees have cell phones
	31. ☐ INTERCOM / PA SYSTEM	G62.	G63.
	32. ☒ PORTABLE RADIOS	G64. Each person	G65. All employees have cell phones and/or radios
	33. ☐ AUTOMATIC ALARM CHEMICAL MONITORING EQUIPMENT	G66.	G67.
Other	34. ☐ OTHER	G68.	G69.
	35. ☐ OTHER	G70.	G71.

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply)	H1.	LOCATIONS (e.g., shop, outdoor shed, forensic lab)	
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA		crude oil storage tanks	H2.
☒ 2. PROCESS LINES / PIPING			H3.
☐ 3. LABORATORY			H4.
☐ 4. WASTE TREATMENT AREA			H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply)	H6.	LOCATIONS	
☒ 1. SHELVES, CABINETS AND RACKS			H7.
☒ 2. TANKS (EMERGENCY SHUTOFF)			H8.
☒ 3. PORTABLE GAS CYLINDERS			H9.
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES		shutoff valves	H10.
☒ 5. SPRINKLER SYSTEMS			H11.
☒ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)		pressure vessel	H12.

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);
- Decontamination procedures;
- Evacuation procedures;
- Control and containment procedures;
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply) I1.

☐ 1. FORMAL CLASSROOM; ☒ 2. VIDEOS; ☒ 3. SAFETY / TAILGATE MEETINGS;

☒ 4. STUDY GUIDES / MANUALS (Specify): CRC HSE Manual I2.

☒ 5. OTHER (Specify): All employees participate in online safety coursework (viaTrainingMine), contractors undergo orientation upon hire I3.

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

J. LIST OF ATTACHMENTS

(Check one of the following) J1.

☒ 1. NO ATTACHMENTS ARE REQUIRED; *or*

☐ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2

K. SIGNATURE / CERTIFICATION

Certification: Based on my inquiry of those individuals responsible for obtaining the information, I certify under penalty of law that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete, and that a copy is available on site.

Subject: Completion of Tank Removal Project

Re: Oxy USA – Helicopter Fueling System
20101 Goldenwest Street
Huntington Beach, CA 92648

Dear Ms. Lang:

This is in response to your request for a confirmation of the completion of the tank removal project. With the provision that the results for the soil samples collected on May 15, 2012 were accurate and representative of existing conditions, it is the position of this office that no significant soil contamination has occurred at the above noted facility location.

It should be pointed out that this letter does not relieve you of any responsibilities mandated under the California Health and Safety Code if additional or previously unidentified contamination is discovered at the subject site.

If you have any questions regarding this matter, please contact Geniece Higgins at (714) 433-6263.

Sincerely,

Anthony Martinez
Program Manager
Hazardous Materials Mitigation Section
Environmental Health

NOTES:

1. Clean storm water, collected only in the designated sumps, is pumped to the 10" carbon steel sch-40 collecting header.
2. To be used during cleaning and maintenance operations.
3. Total holding capacity for both evaporation ponds is 70,000 bbls, or 2,940,000 gallons.
4. Based on the 25-year rain for the area, the total one-day storm water is estimated to be at 35,000 bbls/24 hour, or 1,470,000 gallons.
5. New gravity drain line shall be a 10" sch-80 pipe, which is estimated to provide a gravity flow capacity of about 450 to 880 gpm, depending on collected water level in the ponds.
6. The drain line shall be of PVC Sch-80 piping material beyond the second valve, after the Halliburton Turbine Meter. For protection purposes, both valves and the meter shall be installed inside of individual under-ground concrete vaults.
7. Halliburton Turbine Meter with mechanical flow analyzer.
8. Top of the Berm elevation varies from 35' - 0" to 35' - 9" with the lowest point at a 3 to 4 foot wide depression for storm water overflow.

NOTES:

1. ALL DIMENSIONS ARE IN INCHES.
2. ALL CONTROLS TO BE PRE-WIRED BY ITT A-C PUMP.
3. THE FOLLOWING ITEMS ARE SUPPLIED BY ITT A-C PUMP BUT ARE NOT SHOWN: 5,8,9,13,20 & 41.
4. THE FOLLOWING ITEMS ARE SUPPLIED BY ITT A-C PUMP, SHIPPED LOOSE AND FIELD MOUNTED BY OTHERS: 8,9 & 41.
5. CUSTOMER PIPING MUST BE SUPPORTED NEAR ALL INTERFACE CONNECTIONS TO ELIMINATE STRAIN.
6. ALL FLANGES ARE 125# F.F. PER ANSI B16.1 STANDARDS UNLESS OTHERWISE SPECIFIED.
7. UNLESS SPECIFIED, DIMENSIONS ARE NOMINAL AND ARE SUBJECT TO NORMAL CONSTRUCTION TOLERANCES.
8. REFER TO WIRING DIAGRAM: (SEE ITEM 98 & 99)
9. FOUNDATION BOLTS ARE NOT SUPPLIED.
10. ALL STRUCTURAL WELDS TO BE PER ACP 2-9 CLASS 3.
11. ALL PRESSURE PIPING WELDS TO BE PER APPLICABLE ITT A-C PUMP WELD PROCESS SPECIFICATIONS (WP'S) AS INDICATED ON DWG. 52-329-750.

Dear Mr. Saremi:

SUBJECT: GAS PLANT ADJACENT TO BOLSA CHICA WETLANDS
HUNTINGTON BEACH, ORANGE COUNTY

Please find attached our 2nd quarter 1995 Groundwater Monitoring and Project Status Report for the CalResources Gas Plant at Huntington Beach, CA. The groundwater plume remains under control and confined to the site.

Plant demolition is complete. Interim remediation activities consisting of biotreatment of surficial oil-impacted soils is proceeding.

Sincerely,

Sub Sen
Staff Environmental Engineer

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Certified Sanborn® Map Report

07/08/25

Site Name:

CRC Huntington Beach
20101 Goldenwest Street
Huntington Beach, CA 92648
EDR Inquiry # 8040226.3

Client Name:

Langan
515 South Flower Street, Suite 1060
Los Angeles, CA 90071
Contact: Katherine Thomas

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Project CRC Huntington Beach

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 47A8-49A8-B72B

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Langan (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Langan were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE ---------- State Response Sites

Lists of state and tribal leaking storage tanks

INDIAN LUST ---- Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST ---- Underground Storage Tank Listing
INDIAN UST ---- Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ---- Voluntary Cleanup Priority Listing
VCP ---- Voluntary Cleanup Program Properties

Lists of state and tribal brownfield sites

BROWNFIELDS ---- Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ---- A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY ---- Recycler Database
HAULERS ---- Registered Waste Tire Haulers Listing
INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
ODI ---- Open Dump Inventory
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
HIST Cal-Sites ---- Historical Calsites Database
SCH ---- School Property Evaluation Program
CDL ---- Clandestine Drug Labs
Toxic Pits ---- Toxic Pits Cleanup Act Sites
US CDL ---- National Clandestine Laboratory Register

Local Land Records

LIENS ---- Environmental Liens Listing
LIENS 2 ---- CERCLA Lien Information
DEED ---- Deed Restriction Listing

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
LDS ---- Land Disposal Sites Listing
MCS ---- Military Cleanup Sites Listing

SPILLS 90 ..... SPILLS 90 data from FirstSearch

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status

indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 07/19/2024 has revealed that there are 5 HWTS sites within approximately 0.001 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2024 has revealed that there are 3 HAZNET sites within approximately 0.001 miles of the target property.

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 05/06/2025 has revealed that there are 5 CIWQS sites within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 04/14/2025 has revealed that there are 2 CERS sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto

sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
Registry ID: 110071786813

Environmental Interest/Information System:
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
Registry ID: 110046317570

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Site History:	The gas plant was in operation from approx. 1932 to 1995. In 1990, liquid phase petroleum hydrocarbons (LPHs) were observed to be seeping from the base of hillside within the Site. Series of subsurface investigations were performed to identify the source and charcterize the extent of LPHs. Follow-up shallow soil excavation and treatment of the soil on-site and vapor extraction of deeper soil took place for approximately 10 years. Extensive groundwater monitoring of the Site provided information to keep the vapor extraction and treatment system active. Final groundwater sampling event was conducted in August 2006 from 44 on-site and off-site monitoring wells. Soil confirmation sampling of three borings was conducte on August 9, 2006.

Description:	RP States: A leak occurred on an onshore pipeline at the Huntington Beach Facility. The release origin is unknown, but it is contained to the pipe chase. The release has been stopped with no threats to life, property, or environment. The release did not enter a storm drain or waterway. The release will be mitigated by an undetermined contractor.

(a) A business plan shall contain all of the following information: (1) The inventory of information required by this article and additional information the governing body of the unified program agency finds necessary to protect the health and safety of persons, property, or the environment. Locally required information shall be adopted by local ordinance or required by state law. This information shall be subject to trade secret protection specified in Section 25512. (2) A site map that contains north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. Updates to existing maps to meet these requirements shall be completed by January 1, 2015. (3) Emergency response plans and procedures in the event of a reportable release or threatened release of a hazardous material, i

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the
Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the
Toxic Substances Control Act (TSCA).
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE
STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR
POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES

SO CAL HOLDING, LLC (Continued) **1018326931**

AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CERS:
Name: PLATFORM EMMY
Address: 1.3 MILES OFFSHORE
City,State,Zip: HUNTINGTON BEACH, CA 92648
Site ID: 518830
CERS ID: 10784461
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-19-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct routine Hazardous Waste inspection. Consent to enter and inspect was granted by Desmond Fuzee of California Resources Corporation. Also present was Marco Escobedo, HMS III of OCHCA. Facility is an oil production platform located 1.3 miles offshore from Huntington Beach. Walked the perimeter of the facility and only observed unsaturated oily rags. According to Mr. Fuzee, hazardous waste generation is rare. Business will be removed from the hazardous waste program.

Violation Date: 09-29-2021
Citation: HSC 6.7 25291(a)(2) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(2)
Violation Description: Failure to maintain secondary containment (e.g., failure of secondary containment testing).
Violation Notes: Returned to compliance on 07/22/2022. The Waste Oil/Solvent sump and (new) Solvent product line failed during testing. Please submit plans for repair of the failed components immediately. If the scope of repair does not require plan check, please schedule retesting immediately and submit passing test results to this Agency within 30 days.
Violation Division: Orange County Environmental Health

Violation Source: CERS,

Site ID: 416832
Site Name: STATE LANDS COMMISSION
Violation Date: 09-17-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 11/18/2019. OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight and/or has a functional drain valve or other method for the removal of liquid from the spill container. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verfiy

Eval Notes: On site for routine the UST inspection, monitoring system

STATE LANDS COMMISSION (Continued) **U001577346**

certification, and spill bucket testing. Testing of monitoring equipment was performed by Jon Larson of Tait Environmental. Mr. Larson s ICC and Veeder-Root certifications were current. Also present was Dan Folk of the State Lands Commission. The facility has two split double-walled tanks (solvent/cutting oil and waste oil) monitored by a Veeder Root TLS-300C system. The waste oil tank has a flapper and the solvent/cutting oil tank has an ATG for overfill. Alarm history and set-up tape was reviewed while on site. The sumps have VR-208 sensors and the annular has a VR-420 sensor. All monitoring equipment passed testing. The following documents were available for review: - Permit to operate - Tank information - Monitoring plan - Site plot plan - Leak response plan (posted by monitoring panel) - Maintenance records - DO monthly reports - Test results (Annual Certification & SB989) - Training [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENT: On site for routine UST inspection, monitoring system certification, and spill bucket testing. Consent to inspect was given by Mike Shigley. Testing of monitoring equipment was performed by Patrick Banbury of Tait Environmental. Mr. Banbury s ICC and Veeder-Root certifications were current. This inspector did not observe all testing conducted by the technician. The facility has two split double-walled tanks (solvent/cutting oil and waste oil) monitored by a Veeder Root TLS-3300C system. The monitor is operational for audible and visual alarms. The waste oil tank has an in-tank probe and the solvent/cutting oil tank has a flapper. Alarm history and set-up tape was reviewed while on site. The sumps have VR-208 sensors and the annular has a VR-420 sensor. Monitoring certification test, including spill bucket, all passed. The following documents were available for review: - Permit to operate - Tank information - Monitoring [Truncated]

Eval Notes: On site for routine the UST inspection, monitoring system certification, and spill bucket testing. Testing of monitoring equipment was performed by Jon Larson of Tait Environmental. Mr. Larson s ICC and Veeder-Root certifications were current. Also present was Dan Folk of the State Lands Commission. The facility has two split double-walled tanks (solvent/cutting oil and waste oil) monitored by a Veeder Root TLS-300C system. The waste oil tank has a flapper and the solvent/cutting oil tank has an ATG for overfill. Alarm history and set-up tape was reviewed while on site. The sumps have VR-208 sensors and the annular has a VR-420 sensor. All monitoring equipment passed testing. The following documents were available for review: - Permit to operate - Tank information - Monitoring plan - Site plot plan - Leak response plan (posted by monitoring panel) - Maintenance records - DO monthly reports - Test results (Annual Certification & SB989) - Training [Truncated]

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different

CHEVRON USA INC HUNTINGTON BEACH PROD (Continued) **1000434350**

systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

HUNTER-THURMOND OIL (Continued) **1000401726**

Comments: PA Report was reviewed by Region 4 staff. Site is located a highly populated residential area. There is a residence covering most of the property where the wells were abandoned Since no CERCLA regulated wastes are known to have been on the site, staff recommends NFA by DTSC.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/27/2025

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/27/2025

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/27/2025

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Last EDR Contact: 06/17/2025
Next Scheduled EDR Contact: 10/06/2025
Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007
Date Made Active in Reports: 04/10/2007
Number of Days to Update: 40
