RE: Phase I Environmental Site Assessment
Proposed Tortuga Bay Waterpark
Southeast corner of Hageman Road and Mohawk Street
APNs 332-011-45; 332-012-39, -40, -42, -44; 365-011-66, -74, -76, -77 and -78 (152 acres)
Bakersfield, California 93308

Dear Mr. Ross:

Krazan & Associates, Inc. (Krazan) completed a Phase I Environmental Site Assessment at the referenced site summarized in a report dated April 27, 2026. Please note that the earliest date of source review was on April 1, 2026. This report is considered viable within 180 days of that date. We appreciate the opportunity to serve your environmental due diligence needs.

During the course of this assessment, Krazan identified no evidence of controlled recognized environmental conditions (CRECs) or historical recognized environmental conditions (HRECs) in connection with the subject site as defined by ASTM E 1527-21. However, the following recognized environmental conditions (RECs), potential area of concern (PAOC), Site Development Issues, and ASTM Non-scope Issues were identified in connection with the subject site.

RECs

- Based on review of historical aerial photographs, topographic maps and the California Department of Conservation, California Geologic Energy Management Division (CalGEM) Online Well Finder GIS database, the subject site is located within the Fruitvale Oil and Gas Field and there are 15 plugged oil wells located on the subject site. The subject site was developed with a tank farm consisting of multiple ASTs, and production water ponds were noted to be present at the subject site in association with crude-oil production. Krazan's experience with oilfield tank farms indicates that there is a significant potential for hazardous materials or wastes to be present in subsurface soil as a result of the use of additives at crude-oil production tank-farm facilities over many years of operation. Petroleum hydrocarbons, volatile and semi-volatile organic compounds are typical constituents of concern. Additionally, the State of California Department of Conservation Division of Oil, Gas, and Geothermal Resources (DOGGR) oversaw remedial activities that were conducted at the subject site. During the remedial activities, petroleum hydrocarbon-impacted soil was observed near two former tanks and one well head. Based on the results from remedial activities, the RWQCB determined that additional assessments and remediation will be necessary at the subject site, and a Site Assessment Workplan was requested on October 3, 2018. According to an email from the RWQCB dated March 14, 2024, a response to the work plan has not been provided. The former tank farm, oil wells, and production water ponds represent a REC in connection with the subject site.

Based upon the findings presented above, Krazan recommends that a Phase II Limited Site Assessment (LSA) be conducted to assess the absence or presence of potential constituents of concern (PCOC) associated with the former oil field operations located on the subject site.

PAOC

- According to the historical review, the subject site was utilized for agricultural purposes from at least 1952 until the 1990s. While there is a potential that environmentally persistent pesticides/herbicides may have been applied to the crops grown on the subject site prior to the 1970s, no chemical mixing or chemical storage areas were observed during the site reconnaissance and no material evidence of the use of environmentally persistent pesticides/herbicides was obtained during the course of this assessment. Therefore, the potential for elevated concentrations of environmentally persistent pesticides/herbicides to currently exist in the near-surface soils of the subject site appears to be low.

  It has been Krazan's experience that chemical analysis of shallow soil samples for persistent pesticides/herbicides in current or former agricultural areas does not typically result in concentrations reported above regulatory screening levels; however, it has also been Krazan's recent experience that Federal, State and Local agencies and/or financial lending institutions have at times required "pesticide screening" of properties with current and/or former agricultural uses. If pesticide screening or further assessment is required by a government agency or financial lending institution, Krazan can assist with those requests.

Site Development Issues

- Review of the National Pipeline Mapping System (NPMS) Public Viewer indicated a hazardous liquid pipeline and an abandoned pipeline traverse the southern boundary of the subject site. According to the NPMS Public Viewer, no releases/accidents have been reported in association with these pipelines at or adjacent to the subject site. There is no evidence or documentation indicating these pipelines were removed or terminated. Therefore, the presence of a hazardous liquid pipeline and an abandoned pipeline traversing the southern boundary of the subject site represents a potential environmental concern to this assessment. In addition, the underground pipelines represent a Site Development Issue as there may be deed restrictions regarding construction activities or easements related to the pipelines that were not identified during this assessment.

- According to historical research, the subject site is located within the Fruitvale Oil and Gas Field and there are 15 plugged oil wells located on the subject site. If the wells are located beneath or within a close proximity of a building pad, a geotechnical engineer should be consulted regarding the building design including the footing. Additionally, proper setbacks from the wells will be required prior to the development of any structures.

  Krazan recommends that CalGEM be contacted to determine if the wells are abandoned to current standards or if additional re-abandonment or leak testing may be required for the plugged and abandoned well prior to redevelopment of the subject site. CalGEM requires that the developer/property owner consult with the CalGEM prior to any work to uncover a known abandoned well, and CalGEM requires that property owners continue to provide access to any wells located on a property. Currently, CalGEM requires that no buildings shall be constructed within 10 feet of an oil well on two adjacent sides and the third side of a well shall be no closer than 50 feet from buildings; the fourth side must remain open to allow for access of an abandonment rig in the event that the well requires abandonment or re-abandonment in the future. Additionally, if any unknown oil wells are discovered or any known or unknown wells are damaged

during work at the subject site, CalGEM must be contacted in order to evaluate the condition of the well.

ASTM Non-scope Issues

- According to the U.S. Fish & Wildlife Service (USFWS) National Wetlands Inventory available via the USFWS Internet website, portions of the subject site are classified as a Freshwater Pond Habitat (PUBFx), a Freshwater Emergent Wetland Habitat (PEM1Kx), and a Riverine Habitat (R5UBF). If further assessment of the referenced designated wetlands is desired, Krazan recommends that a qualified biologist be consulted.

If you have any questions regarding the information presented in this report, please call me at (559) 348-2200.

Respectfully submitted,

EXECUTIVE SUMMARY

Krazan & Associates, Inc. (Krazan) has conducted a Phase I Environmental Site Assessment (ESA) of the property located at the southeast corner of Hageman Road and Mohawk Street in Bakersfield, California (subject site). The subject site is an approximately 152-acre property with the assigned Kern County Assessor's Parcel Numbers (APNs) 332-011-45; 332-012-39, -40, -42, -44; 365-011-66, -74, -76, -77 and -78. Krazan's research during this Phase I ESA indicates the subject site was vacant from at least 1937 until the 1940s, was developed with numerous oil wells and tanks from at least 1952 until the 1990s, was in agricultural use from at least 1952 until the 1990s, and has been vacant since at least 2006.

During the visual observations of the subject site, no obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the areas observed. No unusual odors or stressed vegetation was observed on the subject site. No standing water was observed on the subject site. No pad-mounted electrical transformers were observed on the subject site.

Tortuga Bay Waterpark, LLC plans to develop a water park on the subject site. The site is located in a mixed commercial and residential area of Bakersfield.

The subject site location was identified on a regulatory database indicating that a release of hazardous materials has impacted the subject site.

Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in connection with the subject site as defined by ASTM E 1527-21.

1.0 INTRODUCTION

The subject site is located at the southeast corner of Hageman Road and Mohawk Street in Bakersfield, California. The subject site is an approximately 152-acre property with the assigned Kern County APNs 332-011-45; 332-012-39, -40, -42, -44; 365-011-66, -74, -76, -77 and -78. The subject site is currently vacant land with no assigned address.

Krazan conducted the Phase I ESA of the subject site in conformance with the American Society for Testing and Materials (ASTM) E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* This Phase I ESA constitutes all appropriate inquiry (AAI) designed to identify recognized environmental conditions (RECs) in connection with the previous ownership and uses of the subject site as defined by ASTM E 1527-21.

ASTM E 1527-21 Section 1.1.1 *Recognized Environmental Conditions* – In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means: 1) the presence of hazardous substances or petroleum due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products due to a likely release to the environment; or 3) the presence of hazardous substances or petroleum products under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

It is incumbent upon the user to read this Phase I ESA report in its entirety. If not otherwise defined within the text of this report, please refer to the Glossary of Terms Section following the References Section for definitions of terms and acronyms utilized within this Phase I ESA report.

Previous Environmental Assessments

No previous environmental assessments were provided to Krazan by Tortuga Bay Waterpark, LLC for review as part of this Phase I ESA.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

According to ASTM E 1527-21, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products.* As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner,* or *bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the *landowner liability protections,* or *LLPs*): that is, the practice that constitutes *all appropriate inquiries* into the previous ownership and uses of the *property* consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B).

2.2 Scope of Work

The scope of work for this Phase I ESA conforms to ASTM E 1527-21. The Phase I ESA includes the following scope of work: a) a site reconnaissance of existing on-site conditions and observations of adjacent property uses, b) a review of user-provided documents, c) a review of historical aerial photographs, a review of pertinent building permit records, cross-reference directories, historical Sanborn Fire Insurance Maps (SFIMs), and interview(s) with person(s) knowledgeable of the previous and current ownership and uses of the subject site, d) a review of local regulatory agency records, and e) a review of local, state, and federal regulatory agency lists compiled by Environmental Data Resources, Inc. (EDR).

Krazan was provided written authorization by Mr. Mike Ross with Tortuga Bay Waterpark, LLC on March 27, 2026 to conduct the Phase I ESA in response to Krazan's March 26, 2026 Proposal/Cost Estimate No. P26-155.

3.0 SUBJECT SITE SETTING

The subject site is located at the southeast corner of Hageman Road and Mohawk Street in Bakersfield, California. The subject site is an irregular-shaped property measuring approximately 152 acres in area. The site is located within a mixed commercial and residential area of Bakersfield. General property information and property use are summarized in the following table. Refer to Figures No. 1 – 5 for subject site details.

Subject Site Information Summary

3.1 Geology and Hydrogeology

The subject site is located within the San Joaquin Valley, a broad structural trough bound by the Sierra Nevada and Coast Ranges of California. The San Joaquin Valley, which comprises the southern portion of the Great Valley of California, has been filled with several thousand feet of sedimentary deposits. Sediments in the eastern valley, derived from the erosion of the Sierra Nevada, have been deposited by major to minor west-flowing drainages and their tributaries. Near-surface sediments are dominated by sands

and silty sands with lesser silts, minor clays, and gravel. The sedimentary deposits in the region form large coalescing alluvial fans with gentle slopes. According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service and the EDR report, soils at the subject site are described as Milham sandy loam and Wasco sandy loam, both moderately well and well-drained soils with moderately coarse textures. The northeaster portion of the subject site is Kimberlina fine sandy loam. Groundwater has been encountered at depths of 180 feet bgs in the vicinity of the subject site. The groundwater flow direction in the area of the subject site is generally towards the west.

4.0 SITE BACKGROUND

A review of historical Sanborn Fire Insurance Maps (SFIMs), historic USGS topographic maps, reasonably ascertainable city cross-reference directories, historical aerial photographs, local agency records and previous environmental reports, as made available to Krazan, were utilized to assess the history of the subject site.

4.1 Sanborn Fire Insurance Maps

Krazan reviews Sanborn Fire Insurance Maps (SFIMs) to evaluate prior land use of the subject site and the adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the subject site within the city limits. Krazan contracted with Environmental Data Resources, Inc. (EDR) to provide copies of available SFIMs for the subject site and the adjacent properties. EDR's search of Sanborn Insurance maps revealed no coverage for the subject site and the adjacent properties. Refer to Appendix A – *EDR – Certified Sanborn® Map Report* for details.

4.2 Aerial Photograph Interpretation

Historical aerial photographs were obtained from EDR and reviewed to assess the history of the subject site. The historical aerial photographs include the years 1937, 1942, 1952, 1956, 1968, 1973, 1984, 1994, 2006, 2009, 2012, 2016, 2020, and 2024. The aerial photograph summary is provided in the following table. Refer to Appendix A – *Aerial Photo Decade Package* for details.

Aerial Photograph Review Summary		
Year	***Site Use***	***Adjacent Properties***
1937, 1942	The subject site is vacant in the 1937 photograph. The central portion of the subject site appears cultivated in the 1942 photograph. A canal traverses the eastern and southern portions of the subject site.	Structures are pictured to the west of the subject site. A canal is pictured to the south of the subject site. A railroad track is pictured to the southeast of the subject site. The remaining adjacent properties are vacant.
1952	The northern portion of the subject site is in agricultural use. Oil wells, tanks, and production water ponds appear to be pictured in the southern portion of the subject site.	The northern-, western-, and eastern-adjacent properties are in agricultural use. The remaining adjacent properties are unchanged from the 1942 photograph.
1956, 1968, 1973	Additional oil wells are pictured on the subject site. A wastewater pond is pictured in the northeastern portion of the subject site. Transmission towers are pictured in the western and eastern portions of the subject site.	Numerous oil wells appear to be pictured on the surrounding properties within the vicinity of the subject site. The remaining adjacent properties are unchanged from the 1952 photograph.

Aerial Photograph Review Summary (continued)		
Year	***Site Use***	***Adjacent Properties***
1984, 1994	The majority of the tanks in the southwestern portion of the subject site are no longer pictured. The canal in the southern portion of the subject site has been redirected further south. The remaining portions of the subject site are relatively unchanged from the 1973 photograph.	The adjacent properties are unchanged from the 1973 photograph. Tanks are pictured in the vicinity to the southeast.
2006	The subject site is vacant. The majority of the oil wells and tanks are no longer pictured. Several tanks remain in the southwestern and southeastern portions of the subject site. The ponds in the northeastern portion appear dry.	Residential houses are pictured to the northwest and west of the subject site. The adjacent properties to the east and south are vacant.
2009, 2012, 2016	The subject site is unchanged from the 2006 photograph.	Tanks are pictured to the south of the subject site. The remaining adjacent properties are unchanged from the 2006 photograph.
2020, 2024	The tanks in the southwestern and southeastern portions of the subject site are no longer pictured. The remaining portions of the subject site are unchanged from the 2016 photograph.	Commercial structures are pictured to the north of the subject site. The remaining adjacent properties are unchanged from the 2016 photograph.

According to review of the historical aerial photographs, the subject site was vacant from at least 1937 until the 1940s, was developed with numerous oil wells and tanks from at least 1952 until the 1990s, was in agricultural use from at least 1952 until the 1990s, and was vacant from at least 2006 through 2024.

Based on the review of historical aerial photographs, a tank farm with multiple aboveground storage tanks (ASTs) and production water ponds was formerly present at the subject site in association with crude oil production of the Fruitvale Oil and Gas Field. Typically, oilfield tank farms indicate that there is a significant potential for hazardous materials or wastes to be present in subsurface soil as a result of the use of additives at crude oil production tank farm facilities over many years of operation. In addition, production water ponds or mud pits were observed in association with the tank farms. The former tank farm and production water ponds represent a REC in connection with the subject site.

4.3 City Cross-Reference Directories

Krazan contracted with EDR to provide a review of available cross-reference directories for the subject site address and adjoining properties. Directories dated between 1970 and 2024 were provided by EDR. A

summary of pertinent cross-reference directory information is presented in the following table. Refer to Appendix A – *EDR - City Directory Image* report for details.

Information obtained from the review of cross-reference directories is consistent with that obtained from other historical sources during the course of this assessment. Krazan's review of cross-reference directories indicates there are no listings for the subject site or the adjacent properties to the east or south. The adjacent properties to the north and west consisted of various commercial businesses including Kern River Transitional Care, Bakersfield Post Acute, Bakersfielddidence Opco, LLC, Palms at San Lauren, Sweet Pea Daycare, J&H Trucking, Centerpoint Systems, LLC, and individual listings. Please see *Section 6.5 – Regulatory Agency Records Review* below for further discussion of relevant properties.

4.4 USGS Topographic Quadrangle Map

Historical topographic maps were obtained from EDR and reviewed to assess the history of the subject site. The topographic maps that provide coverage for the subject site include the years 1906, 1910, 1912, 1930, 1935, 1942, 1947, 1954, 1968, 1973, 2012, 2015, 2018, and 2022. Subject site and adjacent/vicinity property usage is summarized in the following table. Refer to Appendix A – *EDR – Historical Topo Map Report* for details.

Topographic Maps Summary		
Year	***Site Usage***	***Adjacent Property Usage***
1906, 1910, 1912	The subject site is undeveloped. A canal traverses the northeastern and southwestern portions of the subject site.	The surrounding properties are undeveloped. A canal is depicted to the south of the subject site.
1930, 1935	The subject site remains undeveloped. An unimproved road traverses the northeastern and southwestern portions of the subject site.	An unimproved road is depicted to the west of the subject site. Structures are depicted to the west beyond the road. A railroad track is depicted to the southeast. The remaining adjacent properties are unchanged from the 1912 topographic map.
1942, 1947	The subject site is unchanged from the 1935 topographic map.	Structures are depicted to the north of the subject site. Additional structures are depicted to the west of the subject site. The remaining adjacent properties are unchanged from the 1935 topographic map.

Topographic Maps Summary (continued)		
Year	***Site Usage***	***Adjacent Property Usage***
1954	A reservoir is depicted in the northeastern portion of the subject site. Numerous wells and tanks are depicted in the southern and central portions of the subject site.	The Fruitvale Oil Field is depicted in the vicinity to the south of the subject site. An unimproved road is depicted to the north of the subject site. Numerous wells are depicted to the west, south, and southeast of the subject site. The remaining adjacent properties are unchanged from the 1947 topographic map.
1968, 1973	Additional wells are depicted in the northern and central portions of the subject site. Additional tanks are depicted in the southwestern portion of the subject site.	Additional wells are depicted to the north and east of the subject site. Additional structures are depicted to the west of the subject site. The remaining adjacent properties are unchanged from the 1954 topographic map.
2012, 2015, 2018, 2022	Structures and most land use descriptions are not depicted on these topographic maps. The reservoir is not depicted on the 2022 map.	Structures and most land use descriptions are not depicted on these topographic maps.

Based on Krazan's review of the historical topographic quadrangle maps, the subject site was undeveloped from at least 1906 until the 1940s and was developed with numerous wells and tanks from at least 1954 through 1973. The 2012, 2015, 2018, and 2022 topographic maps do not depict structures and most land use descriptions.

4.5 Municipal Records

City of Bakersfield - Building Division

On April 1, 2026 the City of Bakersfield - Building Division (CBBD) was contacted regarding building permit records for the subject site. According to the CBBD, no building permit records are on file with the CBBD for the subject site parcel numbers.

4.6 Previous Environmental Assessments

No previous environmental assessments were provided to Krazan by Tortuga Bay Waterpark, LLC for review as part of this Phase I ESA.

4.7 Agricultural Chemicals

According to the historical review, the subject site was utilized for agricultural purposes from at least 1952 until the 1990s. Although the potential exists that environmentally persistent pesticides/herbicides may have been applied to crops grown on the subject site prior to the 1970s; no chemical mixing or chemical storage areas were observed during the site reconnaissance and no material evidence of the use of environmentally persistent pesticides/herbicides was obtained during the course of this assessment. Additionally, Krazan's sampling and analysis of surface soils from properties with similar agricultural histories has typically yielded non-detectable results or very low concentrations for analysis of environmentally persistent pesticides. Consequently, the potential for elevated concentrations of environmentally persistent pesticides/herbicides to currently exist in the near surface soils of the subject site appears to be low.

5.0 USER-PROVIDED INFORMATION

A review of user-provided information was conducted in order to help identify pertinent information regarding potential environmental impacts associated with the subject site.

5.1 Environmental Liens/Activity and Use Limitations Report

Neither a Final Title Report nor an Environmental Lien Search were provided to, or obtained by Krazan during the course of this assessment. The absence of a Final Title Report or an Environmental Lien Search represents a data gap.

5.2 Title Report

A Preliminary Title Report (PTR) dated July 25, 2024, prepared for the subject site by Stewart Title of California, Inc., was provided to Krazan by Mike Ross with Tortuga Bay Waterpark, LLC, the Phase I ESA user. The subject site PTR was reviewed to identify potential deed restrictions, environmental liens or activity and use limitations (AULs) which may have occurred on or exist in connection with the subject site.

Krazan's review of the PTR identified a restrictive covenant by and between Equilon Enterprises, LLC and North of River Sanitary District recorded on January 26, 2000, easements associated with canals, ditches, roads, highways, telephone and telegraph lines, electric light and power lines, and sewer pipelines/lift station and appurtenances, and a Pipe Line License Agreement by and between Kern County Land and Gulf Oil Corporation of California. Krazan's review of the PTR did not identify any deed restrictions, environmental liens or AULs for the subject site. However, as quoted from the subject site PTR, "It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land." The absence of a Final Title Report represents a data gap. Refer to Appendix B – *Preliminary Title Report* for details.

5.3 Interviews

Krazan conducts interviews with the owner of the subject site, a key site manager, subject site occupant(s), and/or the previous owner/occupant(s) of the subject site. The interview(s) is/are designed to provide pertinent information regarding potential environmental impacts associated with the subject site.

Subject Site Owner

On April 13, 2026, a completed Phase I ESA Owner/User questionnaire was received from Mr. Mike Ross, the owner of the subject site and Krazan's Phase I ESA User. According to questionnaire responses, Mr. Ross has been associated with the subject site since April 2018. Mr. Ross indicated that the subject site is currently vacant land. Mr. Ross stated the subject site was previously used as a North of River Sanitation District sewer treatment facility and an oil/gas facility. Mr. Ross was unaware of any current or previous structures on the subject site or of any underground or aboveground storage tanks, chemicals or hazardous materials, and/or agricultural chemicals (pesticides/herbicides) being used, stored, discharged, applied, mixed or formulated on the subject site. Mr. Ross was unaware of any imported soil, buried materials, garbage dumps or burn pits, underground pipelines, or septic systems currently or historically at the subject site. Mr. Ross was unaware of any agricultural water wells, dry wells, monitoring wells, or of any drainage or disposal ponds located on the subject site. Mr. Ross indicated that the subject site is not connected to the municipal water and sewer systems. Mr. Ross stated that a land use restriction is listed on the preliminary title report. Mr. Ross was unaware of the presence or likely presence of contamination of the subject site, and was not aware of any environmental cleanup liens and/or engineering controls which have been filed or recorded against the subject site. Mr. Ross stated that the past uses of the subject site have included the North of River Sanitation District sewer plant and oil/gas wells. Mr. Ross stated he has no specialized knowledge of the subject site or the adjacent properties. Mr. Ross indicated that he did not have knowledge of the past or current presence of specific chemicals or hazardous materials, unauthorized spills or chemical releases or of any environmental cleanups in connection with the subject site. Mr. Ross indicated that the purchase price of the subject site does not reasonably reflect fair market value. Mr. Ross stated that the purpose of the Phase I ESA is for a proposed development. Mr. Ross did not indicate whether there are proposed changes to uses of the subject site. Refer to Appendix B – *Phase I ESA Questionnaire* for details.

Previous Subject Site Owner/Occupant Interview

A Phase I ESA interview with a previous owner and/or occupant of the subject site was not reasonably available. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of a previous owner and/or occupant constitutes a data gap.

5.4 Phase I Environmental Site Assessment User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this

information could result in a determination that *all appropriate inquiry* is not complete. The user is asked to provide information or knowledge of the following:

1. Environmental cleanup liens that are filed or recorded against the site.
2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
3. Specialized knowledge or experience of the person seeking to qualify for the LLPs.
4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.
5. Commonly known or *reasonably ascertainable* information about the *property*.
6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.
7. The reason for preparation of this Phase I ESA.

On April 13, 2026, a completed Phase I ESA Owner/User questionnaire was received from Mr. Mike Ross, which was discussed in detail above in Section 5.3. Refer to Appendix B – *Phase I ESA Questionnaire* for details.

6.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Mr. Trenton Westerson, Krazan's Environmental Assessor, on April 9, 2026. Mr. Westerson was unescorted during the site reconnaissance. The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions, including hazardous substances and petroleum products, in connection with the property (including soils, surface waters, and groundwater).

6.1 Observations

The following table summarizes the subject site features encountered during our site reconnaissance. Observed features are noted in the table below and described in detail below the table. Refer to Figure No. 3 - *Site Map* and *Photographs* for locations and details pertaining to site-specific features discussed in this section of the report.

Site Reconnaissance Summary		
Features	***Observed***	***Not Observed***
Structures (existing)		X
Evidence of Past Uses (foundations, debris)	X	
Hazardous Substances and/or Petroleum Products (including containers)		X
Aboveground Storage Tanks (ASTs)		X
Underground Storage Tanks (USTs) or evidence of USTs		X
Evidence of Underground Pipelines (non-irrigation)	X	
Strong, Pungent, or Noxious Odors		X
Pools of Liquid likely to be Hazardous Materials or Petroleum Products		X
Drums		X
Unidentified Substance Containers		X
Potential Polychlorinated Biphenyl (PCB)-Containing Equipment	X	
Subsurface Hydraulic Equipment		X
Heating/Ventilation/Air Conditioning (HVAC)		X
Stains or Corrosion on Floors, Walls or Ceilings		X
Floor Drains, Sumps, or Oil/Water Clarifiers		X
Storm Drains		X
Pits, Ponds, or Lagoons	X	
Stained Soil and/or Pavement		X
Soil/Debris Piles	X	
Stressed Vegetation		X

Site Reconnaissance Summary (continued)		
Features	***Observed***	***Not Observed***
Waste or Wastewater (including stormwater) Discharges to Surface/Surface Waters		X
Wells (Irrigation, Domestic, Dry, Injection, Abandoned, Monitoring Wells)		X
Septic Systems		X
High-voltage, tower-mounted transmission lines	X	

The subject site was observed to be vacant land. A canal was observed traversing the eastern boundary and the southern portion of the subject site. A former wastewater pond was observed in the northeastern portion of the subject site. Numerous soil piles were observed in the northeastern portion of the subject site. No hazardous materials or hazardous waste were observed within the soil piles. Abandoned water pipes were observed in the northeastern portion of the subject site. Two transmission towers were observed in the eastern and western portions of the subject site, with high-voltage, tower-mounted electrical transmission lines traversing the central portion of the subject site. A fenced-off sewer system operated by North of River Sanitary District was observed along the western boundary of the subject site. Seven pole-mounted transformers were observed along the western boundary of the subject site. There was no evidence of leakage coming from the transformers and the ground surface below the transformers displayed no evidence of discoloration. A drainage basin was observed in the southwestern portion of the subject site. Petroleum and natural gas pipeline markers were observed along the southern boundary of the subject site. The southeastern portion of the subject site was not observed due to a homeless encampment with guard dogs.

During the visual observations of the subject site, no obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the areas observed. No unusual odors or stressed vegetation was observed on the subject site. No standing water was observed on the subject site. No pad-mounted electrical transformers were observed on the subject site.

6.2 Adjacent Streets and Property Usage

The following table summarizes the current adjacent streets and adjacent property uses observed during the site reconnaissance:

Adjacent Streets and Property Usage		
Direction	***Adjacent Street***	***Adjacent Property Usage***
North	Hageman Road	Kern River Transitional Care, Ivy Park at San Lauren, Residential
East	None	Vacant, railroad tracks

Adjacent Streets and Property Usage		
Direction	***Adjacent Street***	***Adjacent Property Usage***
South	None	Vacant, Calloway Canal
West	Mohawk Street	Residential, rural residential, San Lauren Park

Based on the observed uses of the properties located immediately adjacent to the subject site, it is unlikely that significant quantities of hazardous materials currently are stored at these properties except for Kern River Transitional Care. Please see *Section 6.5 – Regulatory Agency Records Review* below for further discussion of relevant historical properties.

6.3 Polyfluoroalkyl Substances (PFAS)

PFAS, or per- and polyfluoroalkyl substances, are a group of synthetic chemicals used in various products for their water- and grease-resistant properties. They are often referred to as "forever chemicals" due to their persistence in the environment and potential health risks, including links to certain cancers and hormone disruption. Industries that historically used or disposed of products containing PFAS, such as firefighting foam (aqueous film-forming foams or AFFF), waterproof coatings, metal plating chemicals, and certain electronics manufacturing processes, are most closely associated with potential PFAS contamination. Potential firefighting sources of PFAS include airports and aviation facilities, military bases and training centers, petroleum refineries and terminals, and petrochemical production facilities.

As of July 8, 2024, the EPA's Final Rule publication became effective; pursuant to CERCLA, the EPA is designating two PFAS, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), including their salts and structural isomers, as hazardous substances. PFAS contamination now falls within the scope of ASTM E1527-21 for recognized environmental conditions (RECs).

Based on the Office of Environmental Health Hazard Assessment's Perfluorooctanioc Acid and Perfluorooctane Sulfonic Acid in Drinking Water dated March 2024, indicated potential drivers of PFAS and PFOA usage include textile finishing industry, water repellant treatment facilities, carpet manufacturing, paper and packaging manufacturing, fire-fighting foams manufacturing/ application, photographic industry, aviation industry, metal plating industry, food packaging, history of fume suppressant, and semiconductor manufacturing.

Krazan found no evidence linking the subject site to historical usage of PFAS and PFOS. Therefore, the potential of the subject site having remnants of PFAS is low and is considered to be a low environmental risk. As a better understanding of PFAS continues, the guidelines for PFAS environmental evaluations may change over time, indicating future environmental assessments may be different than the findings of this environmental assessment.

6.4 ASTM Non-Scope Considerations

According to ASTM E 1527-21, there may be environmental issues or conditions at assessed properties that are outside the scope of the Phase I ESA practice (non-scope considerations). Some substances may be present in quantities and under conditions that may lead to contamination of the subject site or of nearby properties but are not included in CERCLA's definition of hazardous substances (42 U.S.C. §9601[14]). ASTM Non-scope considerations appropriate for the subject site are discussed below.

Radon

Radon is a radioactive gas that is found in certain geologic environments and is formed by the natural breakdown of radium, which is found in the earth's crust. A radon survey was not included within the scope of this investigation; however, the State of California Department of Public Health (CDPH) maintains a statewide database of radon results in designated geographic areas. Radon detection devices are placed in homes throughout the study region to determine geographic regions with elevated radon concentrations. The U.S. EPA has set the safety standard for radon gas in homes to be 4.0 pico Curies per liter (pCi/L).

The US EPA has prepared a map to assist National, State and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. Review of the EPA Map of Radon Zones places the Property in Zone 2 (Kern County), where average predicted radon levels are between 2.0 and 4.0 pCi/L. Therefore, the available data suggests that the potential for radon to adversely impact the subject site appears to be low.

Wetlands

As defined by the U.S. EPA and the Department of Army, Corps of Engineers, wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Jurisdictional wetlands are regulated under Section 404 of the Clean Water Act (1972, 1977, and 1987, and also the 1985 and 1990 Farm Bills), and are important for protection of aquatic waterfowl and species, water purification, and flood control. According to current Corps of Engineers information, three basic criteria are currently used to define wetlands:

- Wetland hydrology - areas exhibiting surface or near-surface saturation or inundation at some point in time (greater than 12.5 percent of growing season defined on basis of frost-free days) during an average rainfall year.

- Hydrophilic vegetation - frequency of occurrence of wetland indicator plants (plant life growing in water, soil, or substrate that is periodically deficient in oxygen as a result of excessive water content).

- Hydric soil - landscape patterns identified by saturation, flooding, or ponding long enough during the growing season (generally seven days) which develop characteristic color changes in the upper part of the soil as a result of anaerobic conditions.

According to the USFWS National Wetlands Inventory available via the USFWS Internet website, the former wastewater pond in the northeastern portion of the subject site is classified as a Freshwater Pond Habitat (PUBFx), the southeastern portion of the subject site is classified as a Freshwater Emergent Wetland Habitat (PEM1Kx), and the canal in the eastern and southern portions of the subject site is classified as a Riverine Habitat (R5UBF). It is possible these areas carry water during the rainy season or during storm events. If further assessment of the referenced designated wetlands is desired, Krazan recommends that a qualified biologist be consulted. Refer to Figure No. 5 for a detailed map.

Environmental Non-Compliance Issues

No material non-compliance issues were identified in connection with the subject site in the process of preparing this report.

Activity and Use Limitations

No activity and use limitations were identified in connection with the subject site in the process of preparing this report.

6.5 Regulatory Agency Records Review

A review of Federal and State regulatory databases was conducted to help determine if hazardous materials have been handled, stored, or generated on the subject site and/or the adjacent properties and businesses. The Federal and State environmental databases consulted in the course of this assessment were compiled by Environmental Data Resources, Inc. (EDR) and identified facilities within the search distances specified in ASTM 1527-21. Krazan did not verify the locations and distances of every property listed by the EDR Radius Map Report. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. No EDR-listed unmapped (non-geocoded) sites identified were determined to be located on or adjacent to the subject site. Refer to Appendix C – *EDR Radius Map Report* for details.

Regulatory records are reviewed based on the following criteria: 1) properties with known soils and/or groundwater releases considered to represent the potential for impact to the subject site that are located within 1,760 feet of the subject site for constituents of concern impacts or 528 feet of the subject site for petroleum hydrocarbon impacts; 2) properties that are adjacent or in proximity to the subject site included within the EDR regulatory database report or noted during the site reconnaissance to possibly handle, store, or generate hazardous materials. Applicable property records are discussed below.

No Federal Superfund – National Priorities List (NPL) sites were determined to be located within a one-mile radius of the subject site according to Krazan's April 14, 2026 review of the State of California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control Envirostor database and the EDR database report.

State of California Regional Water Quality Control Board - GeoTracker

Krazan's April 14, 2026 review of the State of California Regional Water Quality Control Board (RWQCB) GeoTracker database available via the RWQCB Internet Website did not identify any cleanup sites including LUST sites, land disposal sites, or military sites at the subject site or the adjacent properties. However, a cleanup program site was identified at the subject site and is discussed below:

KCL Lease
Mohawk Street
Subject site

According to records on file with the RWQCB, the subject site is currently the focus of an investigation for a release of petroleum hydrocarbons to soil. In May 2018, the State of California Department of Conservation Division of Oil, Gas, and Geothermal Resources (DOGGR) referred the subject site to the RWQCB subsequent to DOGGR's oversight of remedial activities conducted

at the subject site. During the remedial activities, petroleum hydrocarbon-impacted soil was observed near two former tanks and one well head. Based on the results from remedial activities, the RWQCB determined that additional assessments and remediation were necessary at the subject site. No copies of any investigation or remedial activity reports were included in the GeoTracker database. On October 3, 2018, a request for Site Assessment Workplan was issued to Big West of California to propose a scope of work that adequately characterized the potential impacted areas at the site, including soil that may have been impacted by releases or spills from tanks, flow lines, and well heads.

According to an email dated March 14, 2024 issued by Mr. Paul B. Dotson with the RWQCB to Mr. Larry R. Williams, on behalf of KCL Lease, Big West of California, a response to the October 3, 2018 work plan request had not been provided as of that date. Mr. Dotson's email indicated the RWQCB's desire to move the case toward closure. On April 22, 2026, Krazan emailed Mr. Dotson to determine whether any more recent correspondence or documents, including the work plan, have been received by the RWQCB since March 2024, that may have not been uploaded to the GeoTracker website. As of the date of this report, Mr. Dotson has not responded to Krazan's email inquiry. Since a work plan has not been submitted to the RWQCB regarding the additional assessment and/or remediation of soil investigations required to close the case, the subject site's listing as an active Cleanup Program Site represents a REC to the subject site.

U.S. Environmental Protection Agency – UST Finder

The U. S. Environmental Protection Agency (USEPA) developed UST Finder, a web map application containing a comprehensive national map of USTs. UST Finder contains information about the proximity of UST facilities and UST releases to surface and groundwater public drinking water protection areas. Krazan's April 14, 2026 review of the UST Finder database found that no USTs were reported on the subject site or adjacent to the subject site.

CalEPA Regulated Site Portal

CalEPA Regulated Site Portal is a searchable database that brings together information about California's environmentally regulated sites and facilities. It has information from Cal/OSHA inspections, CalEPA's California Environmental Reporting Systems (CERS), the State Water Resources Control Board's California Integrated Water Quality System (CIWQS), the US Environmental Protection Agency's Air Emission Inventory System (EIS), the Department of Toxic Substances Control's EnviroStor, the State Water Resources Control Board's GeoTracker and SMARTS, CalRecycle's Solid Waste Information System (SWIS), and the US Environmental Protection Agency's Toxics Release Inventory (TRI).

Krazan's April 14, 2026, review of the CalEPA Regulated Site Portal identified two (2) regulated facilities at the subject site and two (2) regulated facilities adjacent to the subject site.

Fruitvale, KCL (A)
NW 1/4 NE 1/4 SEC 22 T29S MDB&M
Subject site

This former subject site operation is listed within the California Integrated Water Quality System as a crude petroleum and natural gas facility. No spills, releases, or violations were reported for this former operation.

KCL Lease
Subject site

This former subject site operation is listed as a Cleanup Program Site for an unauthorized release of hazardous substances to the environment. This former operation was discussed in detail above in Section 6.5 – State of California Regional Water Quality Control Board - GeoTracker. Since a work plan has not been submitted to the RWQCB regarding the additional assessment and/or remediation of soil investigations required to close the case, the subject site's listing as an active Cleanup Program Site represents a REC to the subject site.

California Water Service Co.
5350 Hageman Road
Adjacent to the north

This operation is listed within the US EPA Emission Inventory System (EIS). No spills, releases, or violations were reported for this operation. Based on the information provided, this operation is not considered to be an environmental concern in connection with the subject site.

Kern River Transitional Care
5151 Knudsen Drive
Adjacent to the north

This operation is listed as a chemical storage facility and hazardous waste generator. No spills, releases, or significant violations were reported for this operation. The last inspection for this facility was in January 2024, with no significant violations. Based on the information provided, this listing is not considered to be an environmental concern in connection with the subject site.

USEPA – California State Institutional Controls/Engineering Controls Registry

On April 14, 2026, Krazan reviewed the DTSC Land Use Restriction (LUR) List and the SWRCB Deed Restriction Database for the subject site and adjacent properties. These databases identify sites where institutional controls or engineering controls have been imposed to mitigate exposure to residual contamination. The subject site and the immediately adjacent properties were not identified in either the DTSC LUR List or the SWRCB Deed Restriction Database. Therefore, no institutional controls or engineering controls have been recorded that restrict land use or require long-term management of environmental conditions for the subject site or adjoining properties.

State of California Environmental Protection Agency

Krazan's April 14, 2026 review of the State of California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control (DTSC) EnviroStor database available via the DTSC's internet website indicated that no records of cleanup sites including State response sites, voluntary cleanup sites, school cleanup sites, military or school evaluation sites or corrective action sites are listed for the subject site, the adjacent properties, or properties located within a 500-foot radius of the subject site. Based on the site reconnaissance and records review, DTSC sites are not considered a concern to this assessment.

California Department of Conservation, California Geologic Energy Management Division

Krazan's April 15, 2026 review of California Department of Conservation, California Geologic Energy Management Division (CalGEM) Online Well Finder GIS database indicated that the subject site is located within the Fruitvale Oil and Gas Field and there are 15 plugged oil wells located on the subject site. Out of the 15 oil wells, 13 are oil and gas wells and two (2) are multi-purpose wells. Out of the 15 wells, 11 have received well abandonment reports from the Department of Conservation – Division of Oil and Gas, indicating that the well abandonment requirements were fulfilled. No well abandonment reports were on file for KCL-G 10 (API 0402906867), KCL 72-A (API 0402908505), or KCL 68A (API 0402908503). DOGGR requested a final lease cleanup for Tenneco West 67x (API 0402948031), requiring the removal of a storage tank and any associated equipment before issuing a well abandonment report.

CalGEM requires that the developer/property owner consult with the CalGEM prior to any work to uncover a known abandoned well, and CalGEM requires that property owners continue to provide access to any wells located on a property. Currently, CalGEM requires that no buildings shall be constructed within 10 feet of an oil well on two adjacent sides and the third side of a well shall be no closer than 50 feet from buildings; the fourth side must remain open to allow for access of an abandonment rig in the event that the well requires abandonment or re-abandonment in the future. Additionally, if any unknown oil wells are discovered or any known or unknown wells are damaged during work at the subject site, CalGEM must be contacted in order to evaluate the condition of the well. Krazan recommends that CalGEM be contacted to ensure the plugged oil wells are abandoned to current standards.

Based on review of historical aerial photographs and topographic maps, a tank farm with multiple ASTs and production water ponds were noted to be present at the subject site in association with crude-oil production. Krazan's experience with tank farms indicates that there is a significant potential for hazardous materials or hazardous waste to be present in subsurface soil at these locations as a result of crude oil production. Petroleum-hydrocarbons, volatile and semi-volatile organic compounds are typical constituents

of concern. According to the RWQCB's GeoTracker database and CalEPA Regulated Site Portal, former subject site operation is listed as a Cleanup Program Site for an unauthorized release of hazardous substances to the environment. This former operation was discussed in detail above in Section 6.5 – State of California Regional Water Quality Control Board - GeoTracker. Since a work plan has not been submitted to the RWQCB regarding the additional assessment and/or remediation of soil investigations required to close the case, the subject site's listing as an active Cleanup Program Site represents a REC to the subject site. The former usage of the subject site for crude oil production and as a tank farm represents a REC to this assessment.

State of California Governor's Office of Emergency Services – Spill Report Database

Krazan's April 15, 2026 review of the State of California Office of Emergency Services (Cal OES) Spill Reporting database, available via the Cal OES website did not identify any hazardous materials spill reports at the subject site or the adjacent properties.

National Pipeline Mapping System

National Pipeline Mapping System (NPMS) Public Viewer mapping system identifies gas transmission and hazardous liquid pipeline attributes and pipeline operator information. The NPMS Public Viewer also identifies gas transmission and hazardous liquid pipeline accidents since 2022.

Krazan's April 15, 2026 review of the NPMS Public Viewer indicated a hazardous liquid pipeline and an abandoned pipeline traverse the southern boundary of the subject site. According to the NPMS Public Viewer, no releases/accidents have been reported in association with these pipelines at or adjacent to the subject site. There is no evidence or documentation indicating these pipelines were removed or terminated. Therefore, the presence of a buried hazardous liquid pipeline and an abandoned pipeline traversing the southern boundary of the subject site represents a potential environmental concern to this assessment. In addition, the underground pipelines represent a Site Development Issue as there may be deed restrictions regarding construction activities or easements related to the pipelines that were not identified during this assessment.

City of Bakersfield Fire Department

The City of Bakersfield Fire Department (CBFD) is the lead regulatory agency or Certified Unified Program Agency (CUPA) for hazardous materials handling facilities in the City of Bakersfield. On April 15, 2026, Krazan reviewed available records via the internet at www.bakersfieldcity.us for potential records associated with USTs, hazardous materials business plans (HMBPs), or hazardous materials incident

reports for the subject site and adjacent properties. Based on Krazan's review of the available files, no records were found on file with the CBFD for the subject site.

Local Area Tribal Records

No Indian reservations, USTs on Indian land, or LUSTs on Indian land were reported on the subject site, adjacent properties, or vicinity properties in the EDR-provided database report.

Regulatory Database Review

Several agencies have published documents that list businesses or properties which have handled hazardous materials or waste or may have experienced site contamination. The lists consulted in the course of our assessment were compiled by EDR and Krazan and represent reasonably ascertainable current listings. Krazan did not verify the locations and distances of every property listed by EDR. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. No EDR-listed unmapped (non-geocoded) sites identified were determined to be located on or adjacent to the subject site.

The subject site property and adjacent properties were listed in the EDR-provided government database report and are discussed below:

KCL Lease
Mohawk Street
Subject site

This former subject site operation was a tank farm and oil well facility. EDR identified this former operation in the CERS and CPS-SLIC databases. This former operation was discussed in detail above in Section 6.5 – State of California Regional Water Quality Control Board - GeoTracker. In summary, based on the lack of remedial activities and a closure letter, this active cleanup program site represents a REC to the subject site. According to the RWQCB's GeoTracker database and CalEPA Regulated Site Portal, the former subject site operation is listed as a Cleanup Program Site for an unauthorized release of hazardous substances to the environment. Since a work plan has not been submitted to the RWQCB regarding the additional assessment and/or remediation of soil investigations required to close the case, the subject site's listing as an active Cleanup Program Site represents a REC to the subject site.

Fruitvale, KCL (A)
NW 1/4 NE 1/4 SEC 22 T29S MDB&M
Subject site

This listing is associated with a crude petroleum and natural gas facility. EDR identified the subject site on the CIWQS, CERS, and PROD WATER PONDS databases. The CERS database noted the area was in the southeastern portion of the subject site. According to the Produced Water Ponds

database within GeoTracker, Waste Discharge Requirements (WDRs) were in place between April 1977 and July 2001 by Shell Oil Products U.S. as a Produced Water Pond site. A produced water pond is a surface impoundment used to store and/or dispose of produced water used to dispose of water produced as a by-product of oil production. In July 2001, an inspection indicated an in-ground steel tank within a concrete-lined vault was closed; therefore, the WDRs were rescinded on July 26, 2001. No spills, releases, or violations are listed for the subject site on these databases; however, the former usage of the subject site for crude oil production and as a tank farm within the Fruitvale Oil and Gas Field represents a REC to this assessment.

California Water Service Co. – BK 220 (WELL 220-01 - BEFORE GAC-TCP & H2S)
5350 Hageman Road
Adjacent to the north

This operation is a California Water Service facility. EDR identified this operation in the RCRA NonGen/NLR and PFAS databases. No spills, releases, or violations are listed for this operation. Based on the lack of reported releases, this operation does not appear to pose an environmental concern in association with the subject site.

5151 Knudson Bakersfield LP dba Ivy Park at San Lau
5300 Hageman Road
Adjacent to the north

This operation is an assisted living facility. EDR identified this operation in the RCRA NonGen/NLR and ECHO databases. No spills, releases, or violations are listed for this operation. Based on the lack of reported releases, this operation does not appear to pose an environmental concern in association with the subject site.

Unnamed listing
Adjacent to the south

This listing is associated with the Fruitvale Oil and Gas Field. EDR identified this property in the WASTEWATER PITS database. No spills, releases, or violations are listed for this property. Based on the lack of reported releases, this property does not appear to pose an environmental concern in association with the subject site.

Bakersfielddidence Opco, LLC dba Kern River Transitional
5151 Knudson Drive
Adjacent to the north

This operation is an assisted living facility. EDR identified this operation in the following databases: RCRA NonGen/NLR, E MANIFEST, CERS HAZ WASTE, EMI, HWTS, HAZNET, NPDES, CIWQS, and CERS. No spills, releases, or significant violations are listed for this operation. Based on the lack of reported releases, this operation does not appear to pose an environmental concern in association with the subject site.

Hazardous Materials Migration in Soils and/or Groundwater

The remaining properties within the specified search radius of the subject site which appeared on local, state, or federally published lists of sites that use or have had releases of hazardous materials or petroleum products are of sufficient distance and/or situated hydraulically cross- or downgradient from the subject site such that impact to the subject site via groundwater migration is unlikely. In general, potentially hazardous materials released from facilities located generally hydraulically upgradient within subject site vicinity, or in a hydraulically cross-gradient direction in proximity to the site, may have a reasonable potential of migrating to the subject site via groundwater flow. This opinion is based on the assumption that non-vaporous hazardous materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow. However, the potential for migration of volatile hazardous materials may include movement within soils, groundwater flow or potentially omni-directionally if present in a vaporous state.

Hazardous Materials Migration in Vapor

Hazardous materials or petroleum product vapors which may have the potential to migrate into the subsurface of the subject site may be caused by the release of vapors from contaminated soil or groundwater either on or in the vicinity of the subject site from current or historical uses of the subject site and/or adjacent or vicinity properties. Current or past land uses such as gasoline stations (using petroleum hydrocarbons), dry cleaning establishments (using chlorinated volatile organic compounds), former manufactured gas plant sites (using volatile and semi-volatile organic compounds), and former industrial sites such as those that had vapor degreasing or other parts-cleaning operations (using chlorinated volatile organic compounds) are of particular concern. Constituent of concern vapors are capable of migrating great distances omni-directionally along subsurface conduits such as pipelines, utility lines, sewer and stormwater lines, and building foundations.

Based on Krazan's research and review of State and local regulatory agency records and the EDR regulatory database report, no listings of concern related to potential vapor migration were determined to be associated with adjacent properties or properties located within the subject site vicinity. The rationale supporting this opinion includes the following:

- Relevant sites had undergone investigation and remediation sufficient to receive regulatory agency closure.
- Sites with reported releases of minor quantities of COCs or COCs of limited volatility impacting soil only were considered of minimal concern.

- Sites with reported releases of COCs including volatile organic compounds (VOCs) were either of sufficient distance or hydraulically down- or cross-gradient from the subject site such that they do not appear to represent a significant potential for vapor migration on to the subject site.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject site, adjacent sites or vicinity properties in the EDR Report.

7.0 DISCUSSION OF FINDINGS

Summary of Conclusions		
Apparent Evidence of RECs/CRECs or PAOCs From	***Not Noted***	***Noted***
Historical Uses		X
Current Uses	X	
Adjacent or Vicinity Property Uses	X	

Historical Uses

Based on Krazan's review of historical aerial photographs, historical topographic maps, historical cross-reference directories, a site reconnaissance, and contacts with the local regulatory agencies, there is material evidence that RECs and PAOCs exist in connection with the historical uses of the subject site. Please refer to section 8.0 – *Conclusions* for further details.

Current Uses

Based on Krazan's site reconnaissance and contacts with local regulatory agencies, there is no material evidence that RECs exist in connection with the current uses of the subject site.

Adjacent or Vicinity Property Uses

Based on Krazan's field observations, review of the EDR government database report, and consultation with local regulatory agencies, there is no material evidence that RECs exist in connection with the subject site from adjacent or vicinity property uses.

7.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E 1527-21 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objectives of this practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

The following is a summary of data gaps encountered in the process of preparing this report including an observation as to the presumed significance of that data gap to the conclusions of this assessment:

- Absence of Final Title Report or Current Environmental Lien Search (Sections 5.1)

  Neither a Final Title Report nor current Environmental Lien Search were provided by the Phase I ESA user. Taken in consideration with the available information obtained in the course of preparing this report in connection with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the contents of a Final Title Report or current Environmental Lien Search are unknown.

- Absence of Interview with the Previous Property Owner/Occupant (Section 5.3)

  A Phase I ESA interview with the previous owner of the subject site was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of the previous owner of the subject site constitutes a data gap. Taken in consideration with the available information obtained in the course of preparing this report in connection with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the content of an interview with the previous property owner is unknown.

8.0 CONCLUSIONS

We have conducted a Phase I ESA of the subject site in conformance with the scope and limitations of the ASTM E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* guidance documents. Any deviations from this practice were previously described in this report. During the course of this assessment, Krazan identified no evidence of RECs, CRECs or HRECs in connection with the subject site as defined by ASTM E 1527-21.

9.0 RELIANCE

This report was prepared solely for use by Client and should not be provided to any other person or entity without Krazan & Associates' prior written consent. No party other than Client may rely on this report without Krazan & Associates' express prior written consent. Reliance rights for third parties will only be in effect once requested by Client and authorized by Krazan & Associates with authorization granted by way of a Reliance Letter. The Reliance Letter will require that the relying party(ies) agree to be bound to the terms and conditions of the agreement between Client and Krazan & Associates as if originally issued to the relying party(ies), or as so stipulated in the Reliance Letter.

10.0 LIMITATIONS

The site reconnaissance and research of the subject site has been limited in scope. This type of assessment is undertaken with the calculated risk that the presence, full nature, and extent of contamination would not be revealed by visual observation alone. Although a thorough site reconnaissance was conducted in accordance with ASTM Guidelines and employing a professional standard of care, no warranty is given, either expressed or implied, that hazardous material contamination or buried structures, which would not have been disclosed through this investigation, do not exist at the subject site. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

The findings presented in this report were based upon field observations during a single property visit, review of available data, and discussions with local regulatory and advisory agencies. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and currently available records searched. Krazan cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Additionally, in evaluating the property, Krazan has relied in good faith upon representations and information provided by individuals noted in the report with respect to present operations and existing property conditions, and the historical uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, subject site zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

This report is provided for the exclusive use of the client noted on the cover page and shall be subject to the terms and conditions in the applicable contract between the client and Krazan. Any third-party use of this report, including use by Client's lender, shall also be subject to the terms and conditions governing the work in the contract between the client and Krazan. The unauthorized use of, reliance on, or release of the information contained in this report without the express written consent of Krazan is strictly prohibited and will be without risk or liability to Krazan.

Conclusions and recommendations contained in this report are based on the evaluation of information made available during the course of this assessment. It is not warranted that such data cannot be superseded by future environmental, legal, geotechnical or technical developments. Consequently, given the possibility for unanticipated hazardous conditions to exist on a subject site which may not have been discovered, this Phase I ESA is not intended as the basis for a buyer or developer of real property to waive their rights of recovery based upon environmental unknowns. Parties that choose to waive rights of recovery prior to site development do so at their own risk.

Parties who seek to rely upon Phase I Environmental Site Assessment reports dated more than 180 days prior to the date of reliance do so at their own risk. This limitation in reliance is based on the potential for physical changes at the site, changes in circumstances, technological and professional advances, and guidance related to the continued viability of Environmental Site Assessment reports, user's responsibilities, and requirements for updating of components of the inquiry as stated in the ASTM Standard E 1527-21.

11.0 QUALIFICATIONS

This Phase I ESA was conducted under the supervision or responsible charge of Krazan's undersigned environmental assessor with oversight from the undersigned environmental professional. The work was conducted in accordance with ASTM E 1527-21 guidance, generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and Krazan's quality-control policies.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the

subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully submitted,

GLOSSARY OF TERMS

Subject Site: The real property being investigated under this Phase I ESA.

Adjacent Properties: Properties which are contiguous with the subject site, or would be contiguous except for a street, road, or other public thoroughfare.

Subject Site Vicinity: Properties located within a 500-foot radius of the subject site.

Environmental Professional: A person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The EP may be an independent contractor or an employee of the user.

User: The party seeking to use Practice E 1527 to complete an environmental site assessment of the subject site. A user may include, without limitation, a potential purchaser of the subject site, a potential tenant of the subject site, an owner of the subject site, a lender, or a property manager.

Recognized Environmental Condition (REC): In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means: 1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

Controlled Recognized Environmental Condition (CREC): A recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitations).

For example, if a leaking underground storage tank has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria, this would be considered a CREC. The "control" is represented by the restriction that the property use remains commercial. A condition considered by the environmental professional to be a CREC shall be listed in the findings section of the Phase I ESA report and as an REC in the conclusions section. A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Historical Recognized Environmental Condition (HREC): A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations, or other property use limitations).). Before calling the past release an HREC, the environmental professional must determine whether the past release is an REC at the time the Phase I ESA is conducted (for example, if there has been change in the regulatory criteria). If the EP considers the past release to be an REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as an REC.

GLOSSARY OF TERMS (continued)

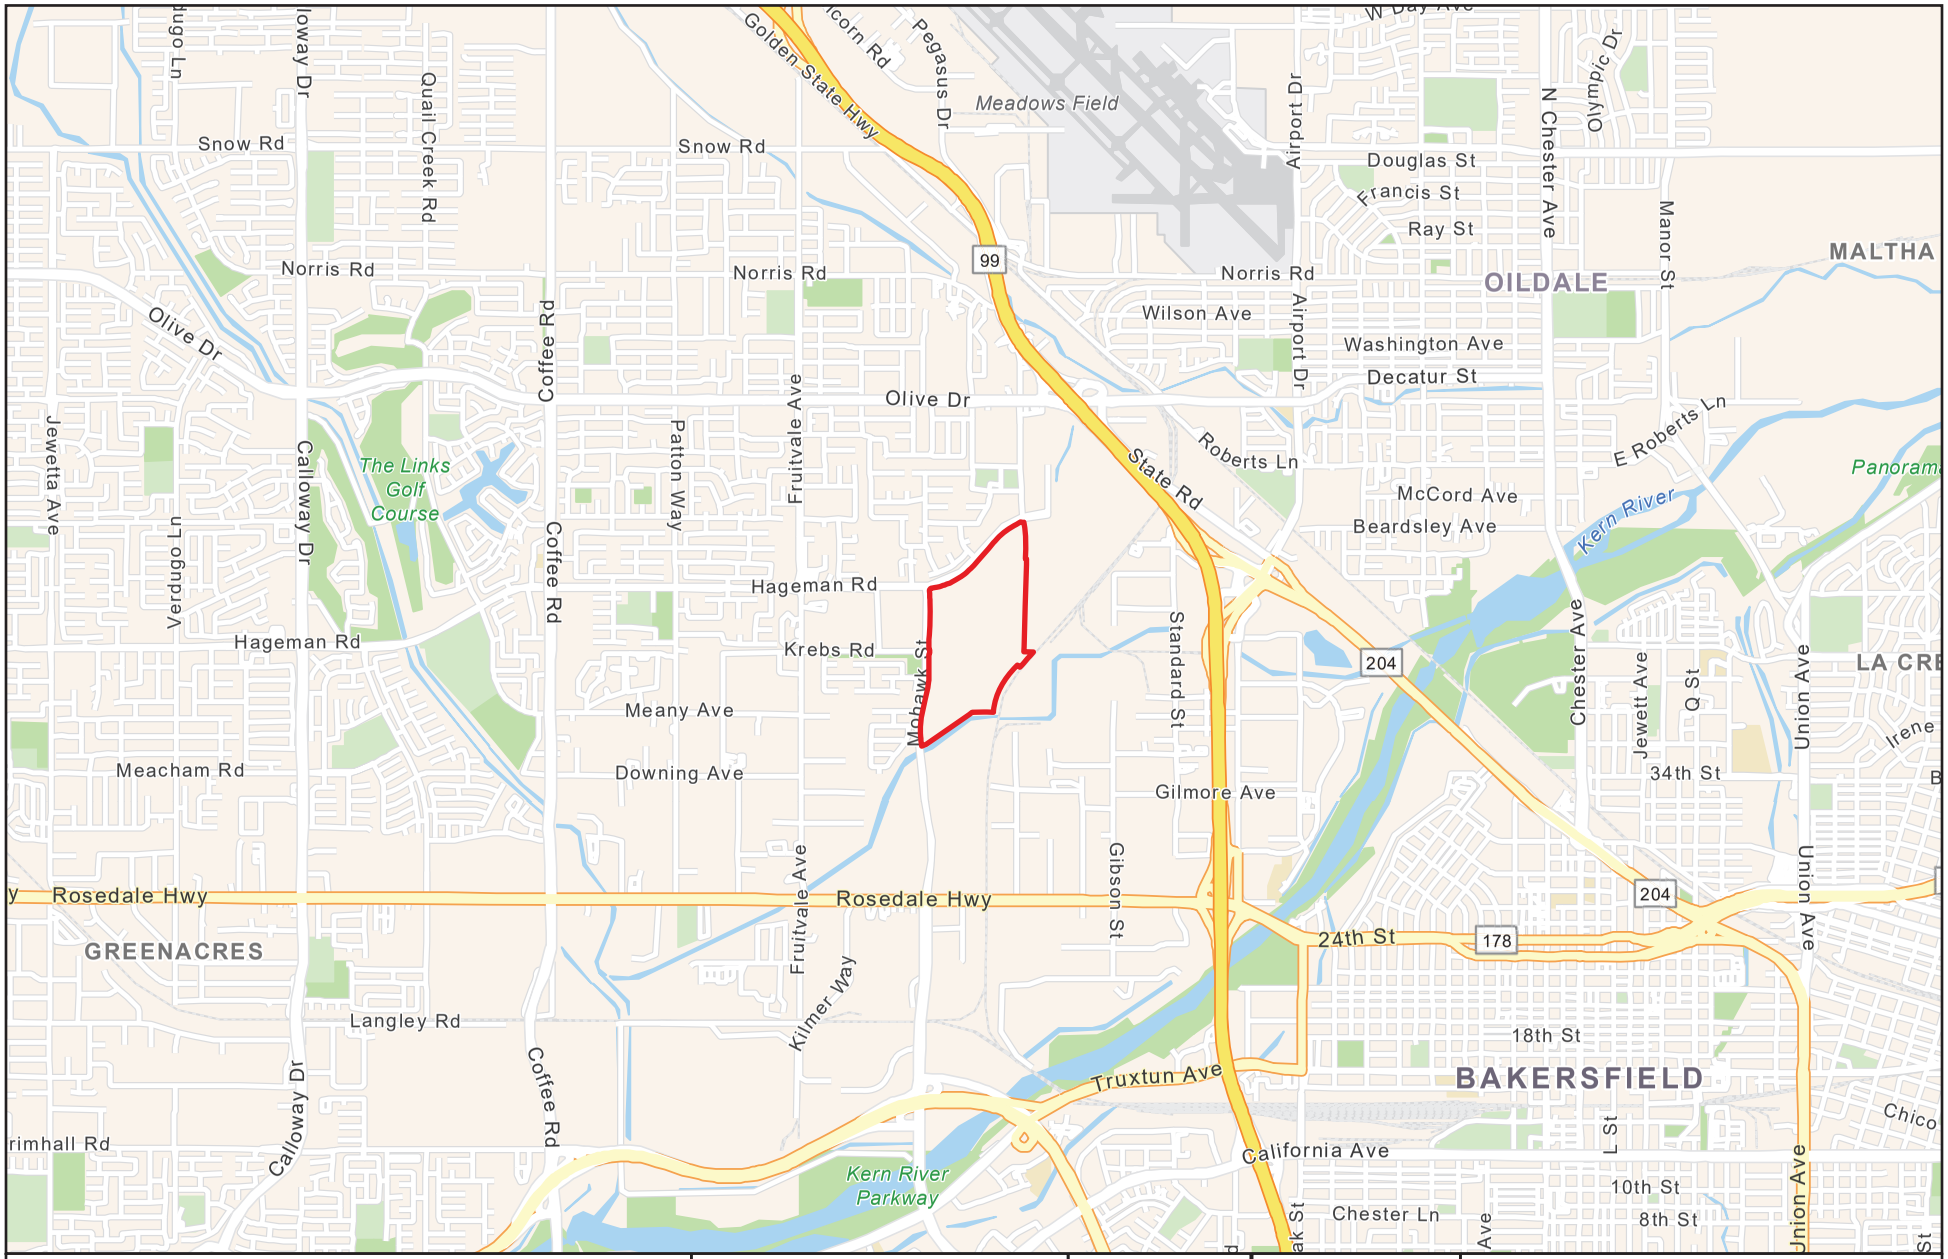

Potential Area of Concern (PAOC): A term adopted to provide an alternative designation to the REC and HREC for a range of environmental issues related to current subject site uses, historical subject site uses, or from adjacent and/or vicinity property uses. The PAOC is utilized to emphasize full disclosure and provide the User with conclusions and recommendations related to potential environmental issues in connection with the subject site based on Krazan's professional experience in cases where official documentation or other evidence may be absent in order to identify an REC or HREC, thereby aiding the User's considerations of environmental due diligence risk tolerance.

Migrate/migration: For the purposes of this practice, "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM E 2600-10 guidance; however, nothing in the E 1527-21 practice should be construed to require application of the E 2600-10 standard to achieve compliance with AAI.

De minimis condition: A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Condition determined to be *de minimis conditions* are not RECS or CRECs.

Data Gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to the site reconnaissance and interviews.

Data Failure: A failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.
LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

This report includes a search of the following sources:

PRELIMINARY REPORT

Order No.: 2281255
Your File No.:
Buyer/Borrower Name: Tortuga Bay Waterpark, LLC
Seller Name:

Property Address: APN: 332-011-45, 332-012-39, 332-012-40, 332-012-42, 332-012-44, 365-011-66, 365-011-74, 365-011-76. 365-011-77, 365-011-78 CA

In response to the above referenced application for a policy of title insurance, Stewart Title of California, Inc. hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Stewart Title Guaranty Company policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of a defect, lien or encumbrance not shown or referred to as an exception below or not excluded from coverage pursuant to the printed Schedules, Exclusions from Coverage, and Conditions of said policy forms.

With respect to any contemplated owner's policy, the printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A, attached. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA/ALTA Homeowner's Policy of Title Insurance, which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages, are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a binder or commitment should be requested.

SCHEDULE B

At the date hereof, exceptions to coverage in addition to the printed exceptions and exclusions contained in said policy or policies would be as follows:

Taxes:

A. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes, to be levied for the fiscal year 2024- 2025.

B. Prior to recording, the final amount due for taxes must be confirmed with tax collector.

C. The lien of supplemental taxes, if any, assessed pursuant to the provisions of Chapter 3.5 (commencing with Section 75) of the Revenue and Taxation Code of the State of California.

D. Taxes and/or assessments affecting the Land, if any, for community facility districts, including Mello Roos, which may exist by virtue of assessment maps or filed notices. These taxes and/or assessments are typically collected with the county taxes; however, sometimes they're removed and assessed and collected separately.

E. Taxes and assessments levied by the North of the River Municipal Water District.

Exceptions:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.

2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.

3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.

4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.

6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.

7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

8. Any interests (including rights of the public) in and to any portion of the Land lying within roads, streets, alleys or highways.

CALIFORNIA "GOOD FUNDS" LAW

California Insurance Code Section 12413.1 regulates the disbursement of escrow and sub-escrow funds by title companies. The law requires that funds be deposited in the title company escrow account and available for withdrawal prior to disbursement. Funds received by Stewart Title of California, Inc. via wire transfer may be disbursed upon receipt. Funds received via cashier's checks or teller checks drawn on a California Bank may be disbursed on the next business day after the day of deposit. If funds are received by any other means, recording and/or disbursement may be delayed, and you should contact your title or escrow officer. All escrow and sub-escrow funds received will be deposited with other escrow funds in one or more non-interest bearing escrow accounts in a financial institution selected by Stewart Title of California, Inc.. Stewart Title of California, Inc. may receive certain direct or indirect benefits from the financial institution by reason of the deposit of such funds or the maintenance of such accounts with the financial institution, and Stewart Title of California, Inc. shall have no obligation to account to the depositing party in any manner for the value of, or to pay to such party, any benefit received by Stewart Title of California, Inc.. Such benefits shall be deemed additional compensation to Stewart Title of California, Inc. for its services in connection with the escrow or sub-escrow.

If any check submitted is dishonored upon presentation for payment, you are authorized to notify all principals and/or their respective agents of such nonpayment.

Procedures to Accompany the Restrictive Covenant Modification Form

The law prohibits unlawfully restrictive covenants based upon:

"…age, race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry… Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status."

As the individual holding or acquiring an interest in the property, you may have any unlawfully restrictive covenants "removed", which means "redacted."

To have the unlawfully restrictive covenant removed, you may prepare and submit to the county recorder's office, a "Restrictive Covenant Modification" form (RCM) together with a copy of the attached document with the unlawfully restrictive covenant redacted. This request must be submitted to the county recorder's office and must include your return address so the county recorder can notify you of the action taken by the county counsel.

The process at the county recorder's office is as follows:

- The county recorder takes the RCM with the redacted document and the original document attached and submits it to the county counsel for review to determine if, from a legal standpoint, the language was an unlawfully restrictive covenant and thus the redacted version should be indexed and recorded.
- The county counsel shall inform the county recorder of his/her determination within a reasonable amount of time, not to exceed three months from the date of your request.
- If county counsel determined that the redacted language was unlawful then, once recorded, the redacted document is the only one that effects the property and this modified document has the same effective date as the original document.
- If county counsel determined that the redacted language was not unlawful then county counsel will return the RCM package to the county recorder and the county recorder will advise the requestor that same the request has been denied and the redacted document has not been recorded.
- The modification document shall be indexed in the same manner as the original document and shall contain a recording reference to the original document.

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE POLICY – 1990 (11-09-18)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.

3. Defects, liens, encumbrances, adverse claims or other matters:

   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;

   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;

   (c) resulting in no loss or damage to the insured claimant;

   (d) attaching or created subsequent to Date of Policy; or

   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.

4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.

5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.

6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART II

CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE OWNER'S POLICY (02-04-22)

EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

PART I

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

PART II

5. The failure of Your existing structures, or any portion of Your existing structures, to have been constructed before, on, or after the Date of Policy in accordance with applicable building codes. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 14 or 15.

6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transfer of the Title to You is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 30.

7. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.

8. Negligence by a person or an entity exercising a right to extract or develop oil, gas, minerals, groundwater, or any other subsurface substance.

9. Any lien on Your Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 9 does not modify or limit the coverage provided under Covered Risk 8.a. or 27.

10. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

ALTA OWNER'S POLICY (07-01-2021)

EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.
   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

NOTE: The 2021 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed as 1 through 7 below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

NOTE: The 2006 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as 1 through 7 below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

Stewart may collect personal information about you from:

1. Publicly available information from government records.
2. Information we receive directly from you or your agent(s), such as your lender or real estate broker.
3. Information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Stewart may use your personal information for the following purposes:

1. To provide products and services to you in connection with a transaction.
2. To improve our products and services.
3. To communicate with you about our affiliates', and others' products and services, jointly or independently.

Stewart may use or disclose the personal information we collect for one or more of the following purposes:

- To fulfill or meet the reason for which the information is provided.
- To provide, support, personalize, and develop our website, products, and services.
- To create, maintain, customize, and secure your account with Stewart.
- To process your requests, purchases, transactions, and payments and prevent transactional fraud.
- To prevent and/or process claims.
- To assist third party vendors/service providers who complete transactions or perform services on Stewart's behalf pursuant to valid service provider agreements.
- As necessary or appropriate to protect the rights, property or safety of Stewart, our customers, or others.
- To provide you with support and to respond to your inquiries, including to investigate and address your concerns and monitor and improve our responses.
- To help maintain the safety, security, and integrity of our website, products and services, databases and other technology-based assets, and business.
- To respond to law enforcement or regulator requests as required by applicable law, court order, or governmental regulations.
- Auditing for compliance with federal and state laws, rules, and regulations.
- Performing services including maintaining or servicing accounts, providing customer service, processing, or fulfilling orders and transactions, verifying customer information, processing payments.
- To evaluate or conduct a merger, divestiture, restructuring, reorganization, dissolution, or other sale or transfer of some or all our assets, whether as a going concern or as part of bankruptcy, liquidation, or similar proceeding, in which personal information held by us is among the assets transferred.

Stewart will not collect additional categories of personal information or use the personal information we collected for materially different, unrelated, or incompatible purposes without providing you notice.

Disclosure of Personal Information to Affiliated Companies and Nonaffiliated Third Parties

Stewart does not sell your personal information to nonaffiliated third parties. Stewart may share your information with those you have designated as your agent throughout the course of your transaction (for example, your realtor, broker, or a lender). Stewart may disclose your personal information to non-affiliated third-party service providers and vendors to render services to complete your transaction.

We share your personal information with the following categories of third parties:

- Non-affiliated service providers and vendors we contract with to render specific services (For example, search companies, mobile notaries, and companies providing credit/debit card processing, billing, shipping, repair, customer service, auditing, marketing, etc.)
- To enable Stewart to prevent criminal activity, fraud, material misrepresentation, or nondisclosure.
- Stewart's affiliated and subsidiary companies.
- Parties involved in litigation and attorneys, as required by law.
- Financial rating organizations, rating bureaus and trade associations, taxing authorities, if required in the transaction.
- Federal and State Regulators, law enforcement and other government entities to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order.

The law does not require your prior authorization or consent and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or browsing information with non-affiliated third parties, except as required or permitted by law.

Right to Limit Use of Your Personal Information

You have the right to opt-out of sharing of your personal information among our affiliates to directly market to you. To opt-out of sharing your information with affiliates for direct marketing, you may send an "opt out" request to OptOut@stewart.com, or contact us through other available methods provided under "Contact Information" in this Notice. We do not share your Personal Information with nonaffiliates for their use to directly market to you without your consent.

How Stewart Protects Your Personal Information

A. Your Consumer Rights and Choices Under CCPA and CPRA

The CCPA and CPRA provide consumers (California residents as defined in the CCPA) with specific rights regarding their personal information. This section describes your rights and explains how to exercise those rights.

i. Access to Specific Information and Data Portability Rights

You have the right to request that Stewart disclose certain information to you about our collection and use of your personal information over the past 12 months. Once we receive and confirm your verifiable consumer request, Stewart will disclose to you:

- The categories of personal information Stewart collected about you.
- The categories of sources for the personal information Stewart collected about you.
- Stewart's business or commercial purpose for collecting that personal information.
- The categories of third parties with whom Stewart shares that personal information.
- The specific pieces of personal information Stewart collected about you (also called a data portability request).
- If Stewart disclosed your personal data for a business purpose, a listing identifying the personal information categories that each category of recipient obtained.

ii. Deletion Request Rights

You have the right to request that Stewart delete any personal information we collected from you and retained, subject to certain exceptions. Once we receive and confirm your verifiable consumer request, Stewart will delete (and direct our service providers to delete) your personal information from our records, unless an exception applies.

Stewart may deny your deletion request if retaining the information is necessary for us or our service providers to:

1. Complete the transaction for which we collected the personal information, provide a good or service that you requested, take actions reasonably anticipated within the context of our ongoing business relationship with you, or otherwise perform our contract with you.
2. Detect security incidents, protect against malicious, deceptive, fraudulent, or illegal activity, or prosecute those responsible for such activities.
3. Debug products to identify and repair errors that impair existing intended functionality.
4. Exercise free speech, ensure the right of another consumer to exercise their free speech rights, or exercise another right provided for by law.
5. Comply with the California Electronic Communications Privacy Act (Cal. Penal Code § 1546 *seq.*).
6. Engage in public or peer-reviewed scientific, historical, or statistical research in the public interest that adheres to all other applicable ethics and privacy laws, when the information's deletion may likely render impossible or seriously impair the research's achievement, if you previously provided informed consent.
7. Enable solely internal uses that are reasonably aligned with consumer expectations based on your relationship with us.
8. Comply with a legal obligation.
9. Make other internal and lawful uses of that information that are compatible with the context in which you provided it.

iii. Opt-Out of Information Sharing and Selling

Stewart does not share or sell information to third parties, as the terms are defined under the CCPA and CPRA. Stewart only shares your personal information as commercially necessary and in accordance with this CCPA Notice.

iv. Correction of Inaccurate Information

You have the right to request that Stewart correct any inaccurate information maintained about.

v. Limit the Use of Sensitive Personal Information

You have the right to limit how your sensitive personal information, as defined in the CCPA and CPRA is disclosed or shared with third parties.

Exercising Your Rights Under CCPA and CPRA

If you have questions or comments about this notice, the ways in which Stewart collects and uses your information described herein, your choices and rights regarding such use, or wish to exercise your rights under California law, please submit a verifiable consumer request to us by the available means provided below:

1. Emailing us at **OptOut@stewart.com**; or

2. Visiting **https://www.stewart.com/en/quick-links/ccpa-request.html**

Only you, or someone legally authorized to act on your behalf, may make a verifiable consumer request related to your personal information. You may also make a verifiable consumer request on behalf of your minor child, if applicable.

To designate an authorized agent, please contact Stewart through one of the methods mentioned above.

You may only make a verifiable consumer request for access or data portability twice within a 12-month period. The verifiable consumer request must:

- Provide sufficient information that allows us to reasonably verify you are the person about whom we collected personal information or an authorized representative.

- Describe your request with sufficient detail that allows us to properly understand, evaluate, and respond to it.

Stewart cannot respond to your request or provide you with personal information if we cannot verify your identity or authority to make the request and confirm the personal information relates to you.

Making a verifiable consumer request does not require you to create an account with Stewart.

Response Timing and Format

We endeavor to respond to a verifiable consumer request within forty-five (45) days of its receipt. If we require more time (up to an additional 45 days), we will inform you of the reason and extension period in writing.

A written response will be delivered by mail or electronically, at your option.

Any disclosures we provide will only cover the 12-month period preceding the verifiable consumer request's receipt. The response we provide will also explain the reasons we cannot comply with a request, if applicable.

Stewart does not charge a fee to process or respond to your verifiable consumer request unless it is excessive, repetitive, or manifestly unfounded. If we determine that the request warrants a fee, we will tell you why we made that decision and provide you with a cost estimate before completing your request.

Non-Discrimination

Stewart will not discriminate against you for exercising any of your CCPA rights. Unless permitted by the CCPA, we will not:

- Deny you goods or services.
- Charge you a different prices or rates for goods or services, including through granting discounts or other benefits, or imposing penalties.
- Provide you a different level or quality of goods or services.
- Suggest that you may receive a different price or rate for goods or services or a different level or quality of goods or services.

Record Retention

Your personal information will not be kept for longer than is necessary for the business purpose for which it is collected and processed. We will retain your personal information and records based on established record retention policies pursuant to California law and in compliance with all federal and state retention obligations. Additionally, we will retain your personal information to comply with applicable laws, regulations, and legal processes (such as responding to subpoenas or court orders), and to respond to legal claims, resolve disputes, and comply with legal or regulatory recordkeeping requirements.

Changes to This CCPA Notice

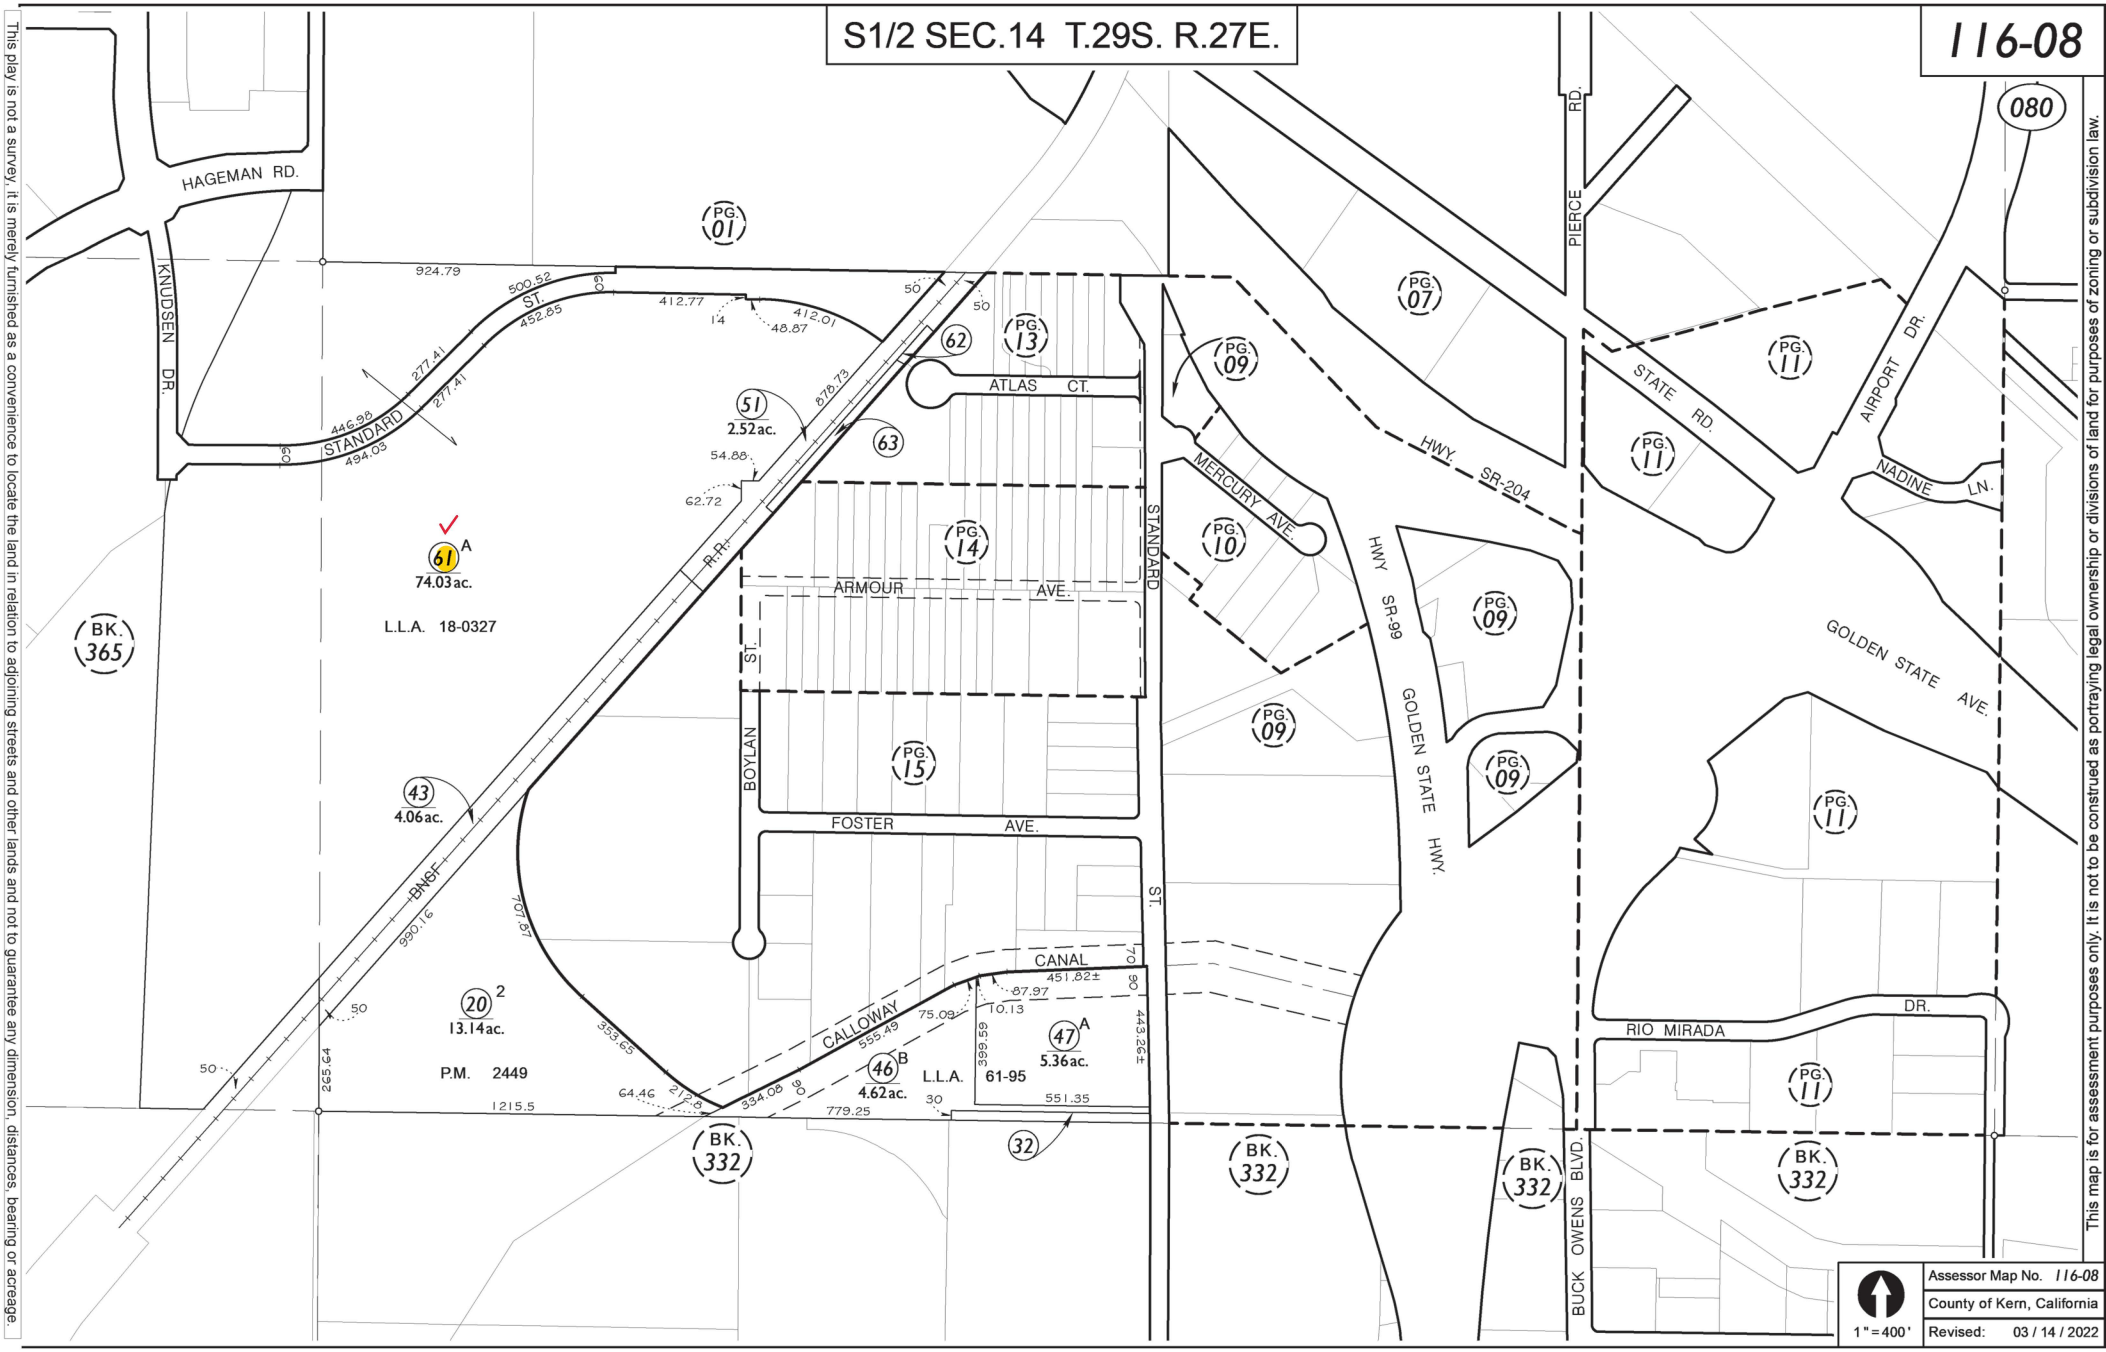

Stewart reserves the right to amend this CCPA Notice at our discretion and at any time. When we make changes to this CCPA Notice, we will post the updated Notice on Stewart's website and update the Notice's effective date.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 2 RESPONSE sites within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/20/2025 has revealed that there are

7 ENVIROSTOR sites within approximately 1 mile of the target property.

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 11 LUST sites within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that

there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Site History:	The Cady Property Site is located at 3213 Gibson Street in Bakersfield. The Site was identified for investigation in the consent decree between DTSC and Western Farm Service Inc. , based on its proximity to the Gilmore Property located at 3930 Gilmore Avenue. The Gilmore Property previously housed a drum reconditioning facility. The Site is being evaluated to determine whether the soils have been impacted from activities related to the past storage of drums and to provide recommendations to characterize the horizontal and vertical extent of the site-related chemicals of concern. The Site is currently unoccupied and was previously used for parking trucks that

SHELL OIL PRDOUCTS SAP CADY PROP (Continued) **1010314190**

transported crude oil to local refineries. The Site is subdivided into an east and west area by a fence that runs north to south. The Site also contains two oil wells; one located on the western side and one on the eastern side. A Phase 1 soils investigation was completed in January of 2006. The soils investigation showed: organic compounds including TPH-d and TPH-mo, SVOCs and OCPs above detected screening levels, one location of petroleum staining and odor present from 4 to 10 ft, lead and arsenic exceeding screening levels and 4 detected VOCs. A Phase 2 soils investigation was completed in November of 2006. Additonal Phase 2 samples were taken in February of 2007. Based on those results it was determined that the contamination was characterized and does not extend to groundwater. No further investigation was recommended and the site was closed in May of 2008.

Completed Date:	06/20/1997
Comments:	CEQA/NGDEC -- An Initial Study (IS) was completed which indicated that the proposed RAW will not have any significant impact on the surrounding environment. A draft Negative Declaration was then prepared after completion of the IS. The joint RAW and CEQA public review and comment period was completed on February 28, 1997. No comments were received and DTSC proceeded to adopt the draft CEQA document as a final document.

Comments: RA/SVE -- Construction of the soil vapor extraction (SVE) system was completed on 9/18/97. The SVE start-up was conducted on 9/25/97 and was inspected by San Joaquin Valley Unified Air Pollution Control District. The TOC emission rates on 9/29/97 ranged from 1-3ppm. The allow- able emission rate specified by the Air District is 15 ppm. The PCE contamination at the site is expected to be treated to below 5 ug/l using the SVE system.

Comments: RAW/SVE -- The RAW addressed the VOCs contamination found in soils at the Site. The RAW includes design specifications and operating procedures for the development of the SVE system for the pilot testing and full scale operations. Groundwater sampling at the three onsite wells will be monitored on semi- annual basis to determine the migration trend of the VOCs from soils and the levels of VOCs in groundwater.

Background Info:	The Site occupies approximately 2 acres in an industrial area in western Bakersfield. Currently, there is an office and warehouse building onsite. Companies leased this site during the past 50 years included; Fair Haven Wastewater Disposal, Oil Center Partnership, Schafer Oil Company, Dowell Company, Assured Transportation Company, and other heavy industries. Onsite soil and groundwater have been found to be contaminated with oil and petroleum, perchlolethene (PCE), trichloroethene (TCE), 1,1,1-dichloroethene (DCE), and chloroform.

ASSURED TRANSPORTATION INC (Continued) **S105032384**

Historical information indicates that there were 3 injection wells onsite, used for waste disposal purposes. No information or document is available to help conclude which of the companies are responsible for the contamination found onsite. However, judging by the type of services offered by each company, it is possible all of the companies have contributed to the contamination.
From 1993 to March 1994, the Kern County Environmental Health Department investigated and remediated the onsite petroleum contamination and oversaw the cleanup work conducted by one of the responsible party, Dow Chemical Company (Dow). Three monitoring wells were installed onsite. Elevated levels of PCE, TCE, DCA, and other organic compounds (VOCs) were found in all 3 wells. In January 1995, DTSC conducted a soil gas investigation to determine the sources of these VOCs. The results showed that the injection well located next to the warehouse and the concrete slab located northeast corner of the site were likely the primary sources of the VOCs.
The depth of the groundwater underneath the site is approximately 40 feet below the ground surface and has been impacted by the contamination. In the Bakersfield area, the confined and unconfined aquifers appear to be inter-connected. Municipal drinking water wells in Bakersfield are approximately 600 feet deep with screened intervals beginning at approximately 300 feet. There are 108 active drinking water wells within 4 miles of the site.
DTSC negotiated an Agreement with Dow to remediate VOC contaminated soil and groundwater at the site.

Site History:	San Joaquin Drum Company, a drum reconditioning facility, was operated from 1969 to 1984 at 3930 Gilmore Avenue in Bakersfield on .5 acres. Drum cleaning and reconditioning processes included paint stripping, washing, rinsing, reconditioning, incinerating and repainting used drums. The Site has been inactive and vacant since 1986. All structures, except a concrete slab foundation have since been removed. In 2004 and 2005 a series of remedial activities occurred. They included the removal of underground storage tanks, sumps, and associated utilities and structures, soil characterization, excavation and disposal, and post-remedial soil sampling. Three groundwater monitoring wells were installed at the time. Soil samples collected at the site indicated that the soil present at the facility contained hazardous levels of: lead, chromium, and zinc, as well as hazardous levels of pesticides such as dichloro- diphenyltrichloroethane (DDT) and its breakdown products DDE and DDD. Chlordane was also found in extremely hazardous levels. There are 15 to 20 municipal drinking water supply wells within a

SAN JOAQUIN DRUM COMPANY (Continued) **S100833356**

three mile radius of the site. The proximity of these wells to the site present the potential for a public health hazard stemming from movement of contaminants into the ground water aquifer.Chevron Environmental Management Company completed a time critical removal action at the site in 12/05. In January 2006 Western Farm Services began an investigation of the Cady property across Gibson Street immediately west of the San Joaquin Drum Facility. The Cady property was identified as an operable unit due to it's use as a drum storage and handling area for the operations at San Joaquin Drum. DTSC LEAD. ALL FILES HAVE BEEN TRANSFERRED TO DTSC.

Background Info:	San Joaquin Drum Company, a drum reconditioning facility, was operated from 1969 to 1976. Soil samples collected at the site indicated that the soil present at the facility contained hazardous levels of lead, chromium, and zinc, as well as hazardous levels of pesticides such as dichloro-diphenyltrichloroethane (DDT) and its breakdown products DDE and DDD. Chlordane was also found in extremely hazardous levels. There are 15 to 20 municipal drinking water supply wells within a three mile radius of the site. The proximity of these wells to the site present the potential for a public health hazard stemming from movement of contaminants into the ground water aquifer. Portions of the facility's fence have been found in disrepair and may have allowed unrestricted access to the site. Repairs are routinely made.

Chevron Environmental Management Company completed a time critical removal action at the site in December 2005. In January 2006 Western Farm Services began an investigation of the Cady property across Gibson Street immediately west of the San Joaquin Drum Facility. The Cady property was identified as an operable unit due to it's use as a drum storage and handling area for the operations at San Joaquin Drum. An OU was established for Chemtura Co. to complete site characterization at the main site. Chemtura filed bankruptcy in 2009. An OU was established for Dow Chemical to take over and complete the work Chemtura Started and complete a site remedy. Dow is the final responsible party for the site. A Removal Action Workplan (RAW) was approved in 2015 and awaits implementation. The RAW calls for destruction of monitoring wells, construction of an asphalt cap over impacted soil, and recording a Land Use Covenant. (updated 9/14/2023 by DTSC SMRP project manager)

the site. The proximity of these wells to the site present the potential for a public health hazard stemming from movement of contaminants into the ground water aquifer.Portions of the facility's fence were found in disrepair and may have allowed unrestricted access to the site.

Site Activity Status: The site was initially brought to the Department's attention as a result of a report of approximately 800 1,000 drums and containers located on the site after the San Joaquin Drum Company ceased operations. The Kern County Health Department subsequently issued a nuisance action against the former owners and operators. In September, 1986, Kern County hired a contractor to remove the drums and debris located at the site and to conduct preliminary sampling at the site. DHS issued a remedial actionorder on September 23, 1987. The RPs were found in noncompliance with the order on November 12, 1987. DHS conducted initial soil sampling at the site in June, 1988 and installation of ground water monitoring wells is scheduled for late 1988 or early1989.

Reponsible Party:	BACKLOG SITE CLEANUP PLANNING REPORT
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	This site is projected to be remediated by the responsible parties with reimbursement to DHS for its oversight/monitoring costs. However, if responsible party funding is not available, then another source of funds will need to be established.
Site Description:	Texaco currently operates a crude oil refinery at this site. The facility is immediately adjacent to the Tosco refinery. Wastes generated from the refinery have been buried onsite or discharged to a disposal pond. Spillage and leakage have also beenobserved during DHS inspections. Two deep injection wells are the

ALON BAKERSFIELD REFINING (Continued) **S100833497**

major method of waste liquid disposal. The site is located adjacent to the Kern River in highly permeable soils and widely fluctuating water levels.

Hazardous Waste Desc: Benzene, toluene, 1,2-DCA and arsenic have been detected in ground waters underlying the facility. The source of these contaminants has not been determined. There are also scattered areas of near-surface, heavy metal contamination.

Threat To Public Health & Env: Ground water contamination has been detected at the Texaco refinery. Due to the porous characteristics of subsurface soils, the contamination is mobile with potential impact upon ground water resources. Site investigation and abatement activities are in progress with the RWQCB providing oversight.

Site Activity Status: The RWQCB has been acting as the lead agency in requiring Texaco to conduct soil and ground water assessment studies. Extensive field work has been performed, and recently, Texaco agreed to complete the contamination assessment.

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F037
Waste Description: Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids

TEXACO REFINING & MKTG INC (Continued) **1000144861**

During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.

Waste Code: F038
Waste Description: Petroleum Refinery Secondary (Emulsified) Oil/Water/Solids Separation Sludge - Any Sludge And/Or Float Generated From The Physical And/Or Chemical Separation Of Oil/Water/Solids In Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Wastes Include, But Are Not Limited To, All Sludges And Floats Generated In Induced Air Flotation (Iaf) Units, Tanks And Impoundments, And All Sludges Generated In Daf Units. Sludges Generated In Stormwater Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And F037, K048, And K051 Wastes Are Exempted From This Listing.

Waste Code: K040
Waste Description: Wastewater Treatment Sludge From The Production Of Phorate.

Waste Code: K049
Waste Description: Slop Oil Emulsion Solids From The Petroleum Refining Industry.

Waste Code: K050
Waste Description: Heat Exchanger Bundle Cleaning Sludge From The Petroleum Refining Industry.

Waste Code: K051
Waste Description: Api Separator Sludge From The Petroleum Refining Industry.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
ALLOWS PERMITTING AUTHORITIES TO SUBMIT NEW SOURCE REVIEW (NSR) AND TITLE V PERMIT ACTIONS TO EPA FOR REVIEW.
IN ACCORDANCE WITH THE FEDERAL CLEAN AIR ACT (CAA) EPA ESTABLISHES FUEL QUALITY STANDARDS TO HELP PROTECT PUBLIC HEALTH AND THE ENVIRONMENT FROM HARMFUL GAS AND PARTICULATE MATTER EMISSIONS FROM MOTOR VEHICLES AND ENGINES. THE OFFICE OF TRANSPORTATION AND AIR QUALITY (OTAQ) HAS DEVELOPED THE REGISTRATION AND DC FUELS ONLINE APPLICATIONS IMPLEMENTED THROUGH EPA S CENTRAL DATA EXCHANGE (CDX) WHICH PROVIDES ONLINE APPLICATIONS TO ASSIST THE FUEL MANUFACTURING COMMUNITY WITH REGISTRATION AND COMPLIANCE WITH REPORTING REQUIREMENTS.
The Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting,

TEXACO REFINING & MKTG INC (Continued) **1000144861**

record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "best available" air pollution technologies that have been required to reduce the emission of air pollutions from stationary sources. RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will

TEXACO REFINING & MKTG INC (Continued) **1000144861**

likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Quarterly Update: Alon Bakersfield Property Inc originally operated under the name Getty Refining and Marketing Company (Getty) as a refining and production facility of gasoline, diesel oil and fuel oil. Getty submitted a Part A application for their hazardous waste storage area on 11/19/1980 and received Interim Status on 03/30/1981. They later submitted a Part B on 07/29/1983. In 1984, Getty merged with Texaco Inc and changed their name to Texaco Refining and Marketing Inc (TRMI). TRMI submitted a revised Part A on 02/12/1986 to reflect this change. On 06/30/1986, TRMI took over ownership of the adjacent facility, Tosco Corporation located at 6500 Refinery Ave. TRMI took over control of Tosco's permits for their 4 surface impoundments which they were in the process of closing and withdrawing their Part A and B (for more information on Tosco, please refer to Texaco Refining and Mktg/Bakersfield Ref, EPA ID# CAD000072769). TRMI later decided to withdrawal their own Part A and B applications in their letter dated 02/27/1989. After their request, formal closure of both the surface impoundments and the drum storage area commenced. A Closure Plan for the drum storage area was submitted in October 1989, the Closure Plan was approved on 06/14/1990, a Closure Certification was provided by TRMI on 10/26/1992, and the storage area was certified closed by the Department of Toxic Substances Control (DTSC) on 12/17/1992. As for the surface impoundments, a Closure plan was submitted on 03/30/1989, the Closure Plan was approved on 10/03/1989, and the impoundments were certified closed by the DTSC on 08/27/1992.

Violation Description:	Failure to establish and implement written procedures to maintain the on-going integrity of the process equipment.
Violation Notes:	Returned to compliance on 10/28/2013. Alon lacks written procedures to maintain the integrity of the anhydrous ammonia system. Alon has different data bases (Orbit, SAP, UltraPipe) with information on the ammonia system but staff had trouble accessing and obtaining important information. While discussing how PM's were generated for the ammonnia system staff stated that certain items were completed because of past failures, but there was no written plan to generate the required PM's for the system. Dennis stated that the development of a Work Flow Diagram might help staff obtain the needed information out of the data bases.

Site Address: 6451 ROSEDALE HWY
Site City: BAKERSFIELD
Site Zip: 93308
Enf Action Date: 04-17-2013
Enf Action Type: AEO - Unified Program
Enf Action Description: Administrative Enforcement Order Based on the Unified Program Statute
Enf Action Notes: Fines/Penalties Assessed: $98,500.00. SEPs Value: $23,500.00. The violations were related to flaring approximately 90,000 pounds of anhydrous ammonia to dispose of off-spec unusable waste. Violations: HSC, 6.5, Sec 25189 (e). Alon treated contaminated anhydrous ammonia contained in tank T13C01 by flaring the gas in the Area 2 low pressure flare. The accumulation of anhydrous ammonia and other hazardous waste in tank T13C01 resulted from the shutdown of the tank and associated Phosam unit. The flaring occurred from approximately August 1, 2011 through September 1, 2011, HSC, 6.5, Sec 25189.5 (a). Alon disposed of the ammonium hydroxide hazardous waste from tank T13C01 by transferring it with a vacuum truck to the waste water treatment unit for disposal. The facility does not have a permit from the department to dispose of hazardous waste at their waste water treatment unit.

Violation Notes:	Returned to compliance on 10/28/2013. Alon lacks written procedures to maintain the integrity of the anhydrous ammonia system. Alon has different data bases (Orbit, SAP, UltraPipe) with information on the ammonia system but staff had trouble accessing and obtaining important information. While discussing how PM's were generated for the ammonnia system staff stated that certain items were completed because of past failures, but there was no written plan to generate the required PM's for the system. Dennis stated that the development of a Work Flow Diagram might help staff obtain the needed information out of the data bases.

Site City: BAKERSFIELD
Site Zip: 93308
Enf Action Date: 04-17-2013
Enf Action Type: AEO - Unified Program
Enf Action Description: Administrative Enforcement Order Based on the Unified Program Statute
Enf Action Notes: Fines/Penalties Assessed: $98,500.00. SEPs Value: $23,500.00. The violations were related to flaring approximately 90,000 pounds of anhydrous ammonia to dispose of off-spec unusable waste. Violations: HSC, 6.5, Sec 25189 (e). Alon treated contaminated anhydrous ammonia contained in tank T13C01 by flaring the gas in the Area 2 low pressure flare. The accumulation of anhydrous ammonia and other hazardous waste in tank T13C01 resulted from the shutdown of the tank and associated Phosam unit. The flaring occurred from approximately August 1, 2011 through September 1, 2011, HSC, 6.5, Sec 25189.5 (a). Alon disposed of the ammonium hydroxide hazardous waste from tank T13C01 by transferring it with a vacuum truck to the waste water treatment unit for disposal. The facility does not have a permit from the department to dispose of hazardous waste at their waste water treatment unit.

Violation Notes:	Returned to compliance on 10/28/2013. Alon lacks written procedures to maintain the integrity of the anhydrous ammonia system. Alon has different data bases (Orbit, SAP, UltraPipe) with information on the ammonia system but staff had trouble accessing and obtaining important information. While discussing how PM's were generated for the ammonnia system staff stated that certain items were completed because of past failures, but there was no written plan to generate the required PM's for the system. Dennis stated that the development of a Work Flow Diagram might help staff obtain the needed information out of the data

Enf Action Type: AEO - Unified Program
Enf Action Description: Administrative Enforcement Order Based on the Unified Program Statute
Enf Action Notes: Fines/Penalties Assessed: $98,500.00. SEPs Value: $23,500.00. The violations were related to flaring approximately 90,000 pounds of anhydrous ammonia to dispose of off-spec unusable waste. Violations:

BAKERSFIELD RENEWABLE FUELS LLC (Continued) **S126354334**

HSC, 6.5, Sec 25189 (e). Alon treated contaminated anhydrous ammonia contained in tank T13C01 by flaring the gas in the Area 2 low pressure flare. The accumulation of anhydrous ammonia and other hazardous waste in tank T13C01 resulted from the shutdown of the tank and associated Phosam unit. The flaring occurred from approximately August 1, 2011 through September 1, 2011, HSC, 6.5, Sec 25189.5 (a). Alon disposed of the ammonium hydroxide hazardous waste from tank T13C01 by transferring it with a vacuum truck to the waste water treatment unit for disposal. The facility does not have a permit from the department to dispose of hazardous waste at their waste water treatment unit.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Target Property Map:	50006365 OILDALE, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

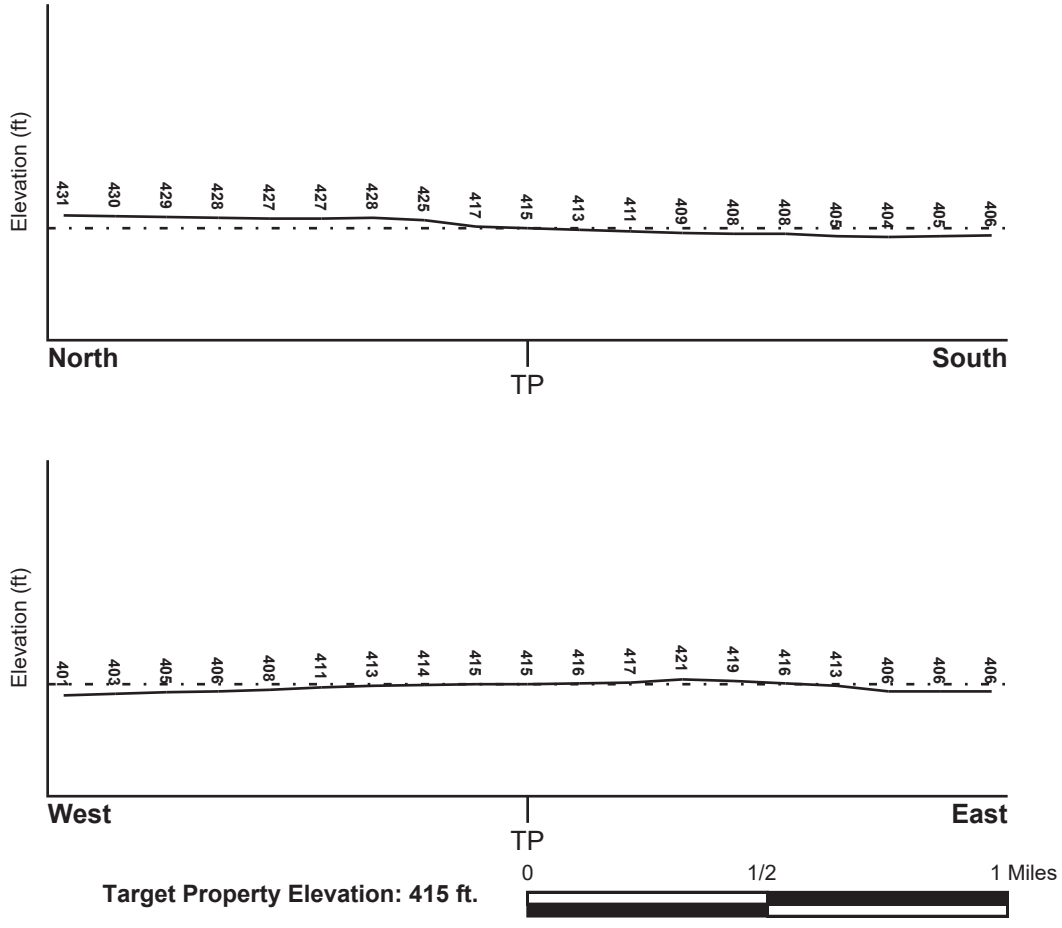

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MILHAM

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

SUMMARY
Mr. Westerson has been an environmental consultant since 2022, where he has provided his clients with guidance on how to assess and mitigate environmental risks. His experience in the environmental industry includes preparing and producing reports, conducting research, interpreting scientific data, GIS applications, and quantitative field methods. He is an environmental specialist with Krazan's Environmental Department.

RELEVANT PROJECT DESCRIPTIONS

Phase I ESA, Rosedale Orchard, Bakersfield, California
Project manager for a Phase I ESA conducted for an almond orchard in Bakersfield, California. The project involved reviewing and consulting with local, State, and Federal regulatory agencies, reviewing various historical records, and conducting a site reconnaissance of the approximately 1,600-acre almond orchard to identify potential areas of concern. Historical research of the property identified numerous areas of concern, including an oil and gas field with 20 oil wells and two former petroleum tank farms that operated on the subject site, potentially elevated concentrations of environmentally persistent pesticides due to the agricultural history of the property, and site development issues associated with oil wells, water wells, septic systems, a gas transmission pipeline, and an undocumented UST located on the subject site. Recommendations regarding the former oil field included conducting additional investigations to assess potential impacts from the former tank farm and oil wells, as well as removing any remaining pipelines associated with the former oil field operations. Additional recommendations associated with the historical farming operations included conducting geophysical surveys to detect potential subsurface anomalies indicative of underground storage tanks, and conducting pesticide screenings of shallow soil.

Phase I ESA, Proposed Multi-Family Residential Development, Rosemead, California
Project manager for a Phase I ESA conducted for a property in Rosemead, California. Historical research of the property identified former industrial and commercial uses of the subject site, including former printing facilities and gasoline service stations with underground storage tanks. Additionally, the property was determined to be located within the San Gabriel Valley Superfund Site, a National Priorities List Site in the San Gabriel Valley Groundwater Basin with known volatile organic compound contamination due to decades of poor chemical handling and disposal practices. Additional assessments were recommended to determine potential impacts from the former industrial and commercial uses of the subject site, and to determine whether volatile organic compounds migrated from the regional Superfund Site to the subject site.

Phase II ESA, Proposed Affordable Housing Development, Bakersfield, California
Environmental Specialist for a Phase II ESA conducted for a property located within a historical area of Bakersfield. The property was formerly utilized by various auto repair facilities dating back to the 1920s, including gasoline service stations and metal plating facilities. Historical automotive fueling and repair activities typically represent a high environmental risk, particularly if the facilities operated during an era when there was limited regulatory oversight. The purpose of the investigation was to assess the current concentrations of volatile organic compounds at the subject site, and to determine whether a potential vapor intrusion concern exists based on the historical uses of the subject site. The project involved advancing four (4) soil borings, installing eight (8) dual-nested soil vapor wells, collecting eight (8) soil vapor samples, and analyzing the results of the laboratory data.

AREAS OF EXPERTISE

Geotechnical Engineering Field Investigations,
Design and Project Management
Geologic / Seismic Hazard Investigations
Subsurface Exploration
Septic System Design
Soil Mechanics and Properties
Cone Penetration Testing and Data Analysis
Environmental Project Management and Oversight
Phase I Environmental Assessments
Phase II Site Assessments
Environmental Field Investigations
Soil Remediation
Drill Rig and Heavy Equipment Operator

EDUCATION AND ACCOMPLISHMENTS

Bachelor of Science, Civil Engineering, California State University, Fresno
May 2014
Professional Engineer, State of California, 2022
RCE No. 93713

PROFESSIONAL EXPERIENCE

2023 to Present

Environmental Manager, Krazan & Associates, Inc.
Responsible for daily operations of environmental assessment/remediation groups and operations throughout California.

2021 to 2023

Project Engineer, Krazan & Associates, Inc.
Review geotechnical boring logs and provide geotechnical analysis, recommendations and reports. Provide engineering oversight for special inspection services and the geotechnical laboratory operations. Provide geotechnical support for projects in the construction phase.

2014 to 2021

Field Engineer, Krazan & Associates, Inc.
Log soils, field analysis, and slope stability analysis foe geotechnical and geologic investigations on preconstruction and site-specific projects. Fieldwork includes logging soils with various drill rigs, CPT, and sonic rigs. Other fieldwork includes running percolation tests, logging test pits, soil absorption analysis, liquefaction analysis, down hole logging, and field mapping.
