

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: North River Road and Sleeping Indian Road Drainage Improvements Project

Lead Agency: City of Oceanside

Contact Name: Edwin Medina

Email: emedina@oceansideca.org

Phone Number: 760-435-5086

Project Location: Oceanside, San Diego County

City

County

Project Description (Proposed actions, location, and/or consequences).

The project entails replacing four existing stormwater drainage culverts located north of the San Luis Rey River within the City of Oceanside, including three crossings beneath North River Road and one crossing beneath Sleeping Indian Road. The existing culverts are undersized and prone to sediment and debris accumulation, which restricts stormwater flow and contributes to localized flooding. The proposed improvements include installation of larger reinforced concrete box culverts and one high-density polyethylene storm drain, along with associated headwalls and riprap energy dissipaters at culvert outlets. Work will involve demolition of existing culvert structures, trenching, excavation, and temporary lane closures along North River Road and Sleeping Indian Road. Following installation, affected roadway segments will be repaved and restored to pre-project conditions.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect

The MND identified potentially significant impacts requiring mitigation for biological resources, cultural resources, and tribal cultural resources. Biological resources impacts would be mitigated through MM-BIO-1, minimization of construction-related indirect impacts; MM-BIO-2, biological monitoring; and MM-BIO-3, nesting bird surveys. Cultural resources impacts would be mitigated through MM-CUL-1, a pre-excavation agreement with interested tribal representatives; MM-CUL-2, retention of a qualified archaeologist and Luiseño Native American monitor; and MM-CUL-3 through MM-CUL-9, which include monitoring protocols, inadvertent discovery procedures, and treatment/disposition requirements. Tribal cultural resources impacts would be mitigated through implementation of the same cultural resource measures (MM-CUL-1 through MM-CUL-9) to ensure protection of tribal cultural resources during ground-disturbing activities.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Not Applicable.

Provide a list of the responsible or trustee agencies for the project.

Responsible agencies include San Diego Regional Water Quality Control Board and California Department of Fish and Wildlife for issuance of permits for impacts on waters under state jurisdiction.
