OUR COMMITMENT TO SUSTAINABILITY | ESA helps a variety of public and private sector clients plan and prepare for climate change and emerging regulations that limit GHG emissions. ESA is a registered assessor with the California Climate Action Registry, a Climate Leader, and founding reporter for the Climate Registry. ESA is also a corporate member of the U.S. Green Building Council and the Business Council on Climate Change (BC3). Internally, ESA has adopted a Sustainability Vision and Policy Statement and a plan to reduce waste and energy within our operations. This document was produced using recycled paper.

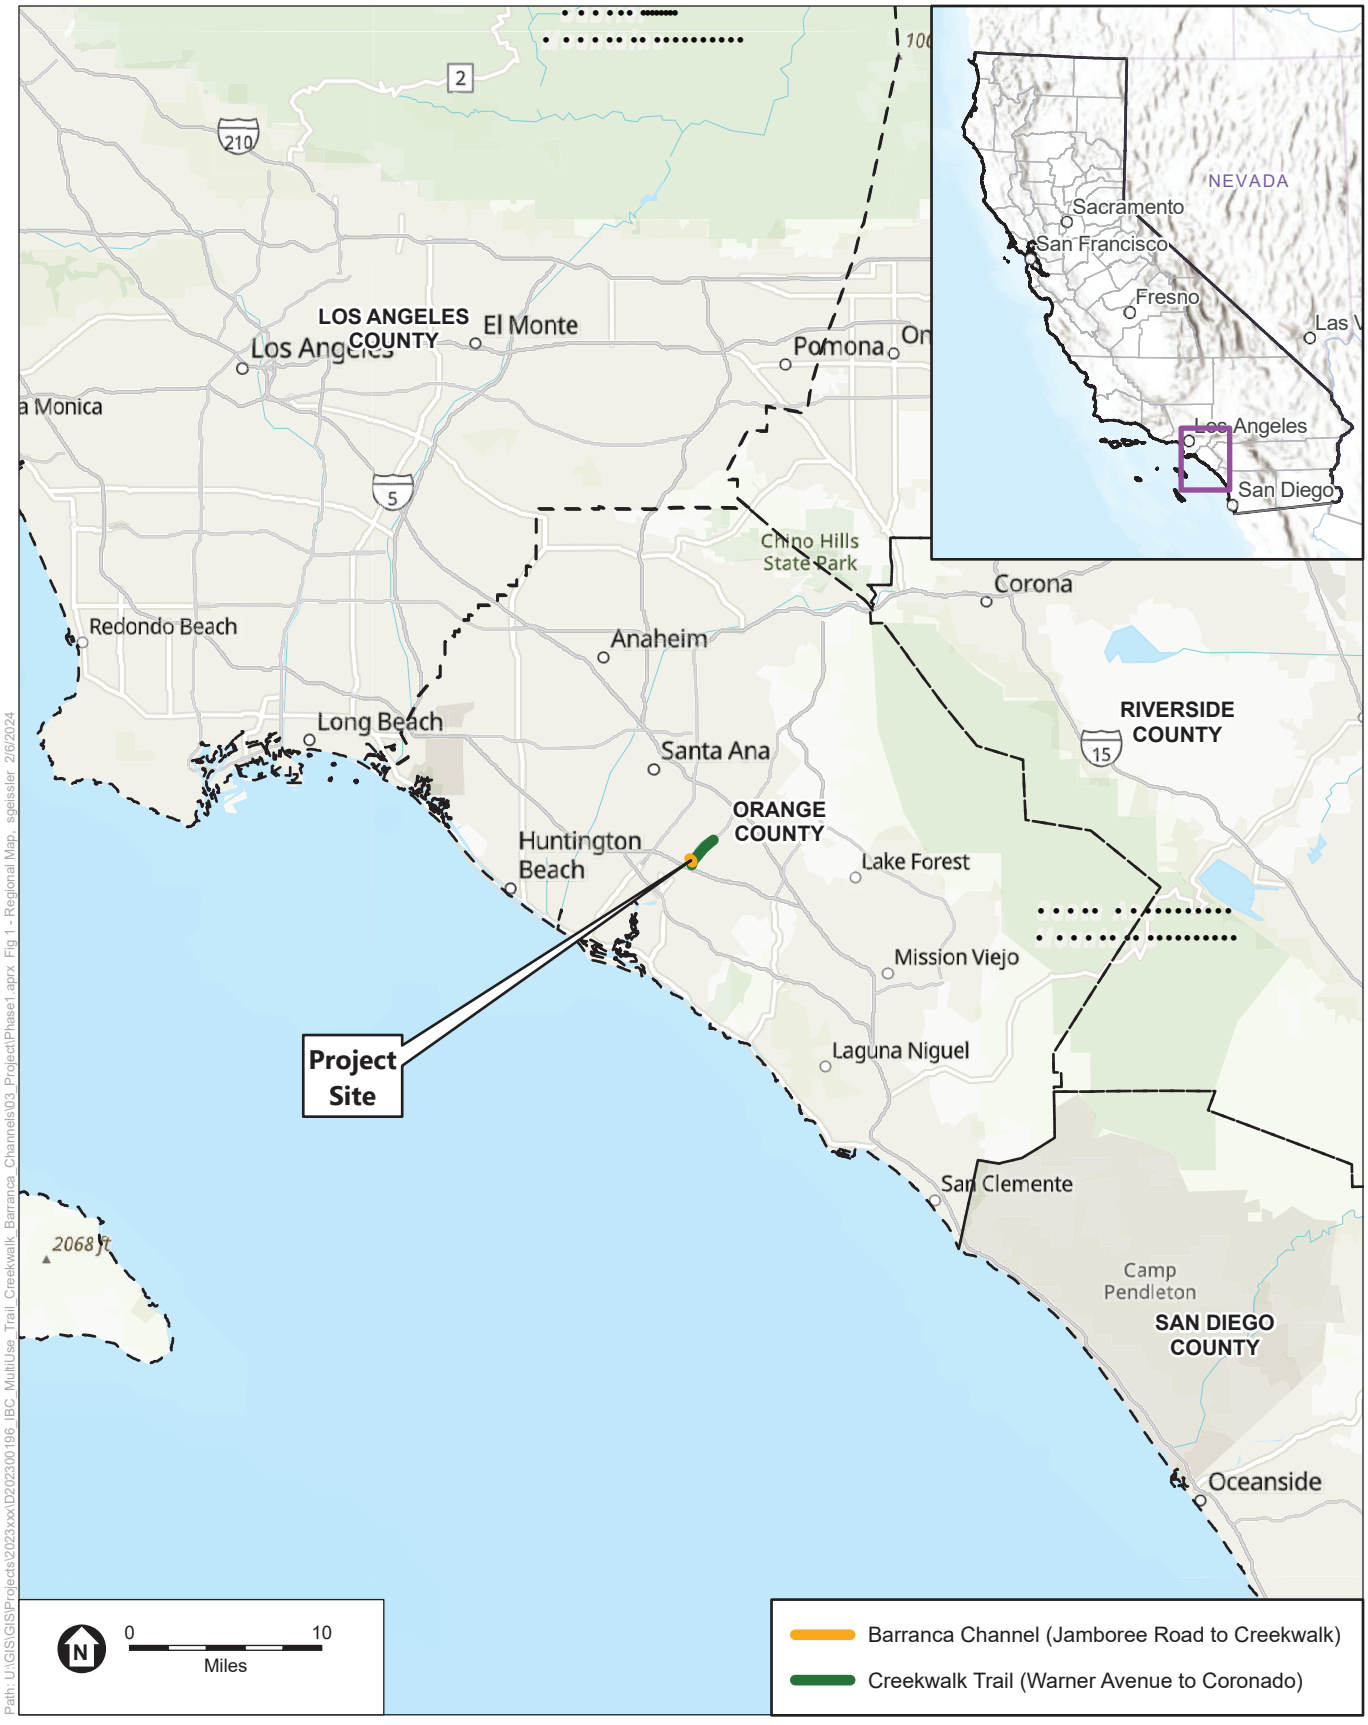
SECTION 1.0
Executive Summary

Environmental Science Associates (ESA) compiled this executive summary using excerpts from the Phase I environmental site assessment report that follows. This executive summary may not provide all the information necessary to fully characterize the site and gain an understanding of the issues, nor does it detail the Phase I assessment and its findings. ESA does not recommend relying solely on this executive summary.



This Phase I environmental site assessment was conducted on behalf of the City of Irvine for the City's IBC Multi-Use Trail - Creekwalk Trail Project along the Peters Canyon Wash and San Diego Creek Channel and in Irvine, California (subject property). This Phase I environmental site assessment was conducted concurrently with the Barranca Channel Phase I environmental site assessment, published as a separate report. This Phase I environmental site assessment was conducted in general accordance with guidance from the American Society of Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-21), and 40 Code of Federal Regulations (CFR) Section 312.1, "*Purpose, Applicability, Scope and Disclosure Obligations*." This Phase I environmental site assessment was conducted to identify Recognized Environmental Conditions (RECs), Historical Recognized Environmental Conditions (HRECs), or Controlled Recognized Environmental Conditions (CRECs) at the subject property (see Section 2.1 for definitions). The subject property is shown in **Figure 1, *Regional Location*** and **Figure 2, *Subject Property***.

A commercial government records database service searched relevant federal, State, and local regulatory agency lists for listings of the subject property assessed in this Phase I environmental site assessment, and for nearby properties within the appropriate ASTM 1527 standard search distances. In addition, regulatory agency websites were checked to provide additional information. **None of the listings are considered a REC, HREC, or CREC.**

The subject property was inspected on January 30, 2024. The Creekwalk Trail subject property is developed as a gravel paved access road alongside the San Diego Creek Channel and Peters Canyon Wash from Coronado to Warner Avenue. The surrounding area land use is mostly commercial south of the subject property, mostly industrial and commercial businesses west of the subject property, and mostly residential east of the subject property. Other than a few paved locations with small stains considered to be *de minimis* conditions, there were no observations of liquid spills, stained soil, unusual odors, stressed vegetation, or waste pits or ponds on the subject property. **No RECs were observed relative to hazardous materials, hazardous waste, or chemical use, storage, or disposal**.

An interview questionnaire was sent to the City of Irvine and Orange County, which has not yet been returned. However, given the information acquired from the records search and site reconnaissance, this data gap is not expected to affect the identification of RECs, HRECs, or CRECs.

The subject property is not considered a potential vapor intrusion source. The subject property has never been developed with land uses that stored, used, or disposed of chemicals. The government records search did not identify any chemical release sites close enough to have affected the subject property. **Therefore, per ASTM E2600-22, there are no known potential threats to the subject property posed by the potential migration of petroleum hydrocarbon or other contaminant vapors from listed sites.**

SECTION 2.0
Introduction

2.1 Purpose, Standards, and Definitions

On behalf of the City of Irvine, Environmental Science Associates (ESA) conducted a Phase I environmental site assessment for the City of Irvine's IBC Multi-Use Trail Creekwalk Trail Project along the Peters Canyon Wash and San Diego Creek Channel in Irvine, California (see Figure 1, *Regional Location*, and Figure 2, *Subject Property*).

This Phase I environmental site assessment was conducted in general accordance with the American Society of Testing Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-21) (ASTM 2021) and the U.S. Environmental Protection Agency (EPA) Final Rule regarding Standards and Practices for All Appropriate Inquiries (70 *Federal Register* [FR] 66070, May 1, 2005; 40 Code of Federal Regulations [CFR] Part 312) (AAI Rule). EPA has stated that the ASTM E1527-21 is consistent with the AAI Rule (87 FR 76578, approved February 15, 2022). Specifically, this final rule amends the AAI Rule at 40 CFR Part 312 to reference ASTM E1527-21 and make clear that persons conducting all appropriate inquiries may use the procedures included in this standard to comply with the AAI Rule.

The purpose of this Phase I environmental site assessment is to enable the parties relying on it to satisfy one or more of the requirements for the innocent landholder defense to liability under the Comprehensive Environmental Response, Compensation, and Liability Act and to evaluate the potential for Recognized Environmental Conditions (RECs) at the subject property. Three types of RECs are defined by ASTM E1527-21, as listed below. The term *Recognized Environmental Conditions (RECs)* means:

> (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

In addition, the ASTM standard defines the two categories cited below.

The term *Historical Recognized Environmental Conditions (HRECs)* means:

> A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional (EP) must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.

For a past REC to be considered an HREC, it must:

- Have already been remediated (or meet current standards without remediation);
- Not require use restrictions or engineering controls (e.g., cap, subslab depressurization system); and
- Meet current standards.

If the REC has use restrictions or engineering controls, the REC may be designated as a Controlled Recognized Environmental Condition (CREC), as defined below. Unlike HRECs, a CREC will be listed in the conclusions section of the Phase I environmental site assessment, along with other RECs. The purpose of this new category is to bring continuing obligations, such as use restrictions, maintenance requirements, and reporting requirements, to the forefront. The term *CREC* means:

> A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.

RECs, HRECs, and CRECs are not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. In addition, business environmental conditions (e.g., subsurface crude oil pipelines) are noted but not considered RECs, HRECs, or CRECs.

The ASTM Standard practice also defines a "business environmental risk" as a risk that can have a material environmental impact on the planned use of a property.

2.2 Scope of Services

The following sections describe ESA's work scope:

- Section 2.0, *Introduction*, discusses the purpose for performing Phase I environmental site assessment; the standards and definitions used for the Phase I assessment; and significant assumptions and limitations.

- Section 3.0, *Site Description*, provides general information concerning the location, description, and current and proposed uses of the subject property, along with a description of any structures and improvements at the time of ESA's assessment.

- Section 4.0, *Records Review*, includes ESA's review of various databases available from federal, State, and local regulatory agencies regarding hazardous materials use, storage, or disposal within or near the subject property considered in this assessment. Copies of relevant documents are included in the appendices of this report. Physical setting sources such as topography, soil, and groundwater conditions are described.

- Section 5.0, *Site Reconnaissance*, describes ESA's observations during reconnaissance of the subject property. The methodology used and limiting conditions are described.

- Section 6.0, *User-Provided Information*, documents information provided by the interviews conducted with the owner or property manager.

- Section 7.0, *Findings and Opinions*, presents ESA's findings and professional opinions regarding the information contained in this report. It provides ESA's conclusions regarding the presence of RECs connected with the subject property and data gaps, if any, that could affect the recognition of RECs.

- Section 8.0, *Report Authors and Qualifications*, provides the signatures and qualifications of the report authors.

- Section 9.0, *References*, is a summary of the resources used to compile this report that supplement the information provided in the appendices.

- The appendices contain certain pertinent documentation regarding the subject property. Appendix A contains the report of regulatory agency database search results. Appendix B contains the historical aerial photographs, historical topographic maps, city directories, and fire insurance maps. Note that the records search reports combined the Creekwalk Trail and Barranca Channel Projects.

2.3 Limitations and Exceptions

No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs, HRECs, and CRECs in connection with a property. Conformance of this Phase I environmental site assessment with ASTM E1527-21 reduces, but does not eliminate, uncertainty regarding the potential for RECs, HRECs, and CRECs in connection with the subject property. While ESA has made every effort to discover and interpret available historical and current information on the property assessed within the time available, some potential always remains for undiscovered contamination to be present. ESA's report is a best-efforts collection and interpretation of available information and cannot be considered wholly conclusive. This Phase I environmental site assessment and the associated work were provided in accordance with the principles and practices generally employed by the local environmental consulting profession. This is in lieu of all warranties, expressed or implied. No other warranty is expressed or implied. ASTM E1527-21 is included in this report by reference.

This Phase I environmental site assessment is based primarily on historical research, a database review, and a site reconnaissance of accessible areas. This Phase I environmental site assessment does not include "non-scope issues" as specified by ASTM E1527-21, such as surveys for the presence of the following items on or in the vicinity of the subject property: asbestos-containing materials, polychlorinated biphenyls (PCBs), radon, effects on indoor air quality, lead-based paint, lead in drinking water, industrial hygiene, health and safety, regulatory compliance, and high-voltage lines.

The conclusions presented are professional opinions based solely upon indicated data described in this report, visual site and vicinity observations, and the interpretation of the available historical information and documents reviewed, as described in this report. Unless ESA has actual knowledge to the contrary, information obtained from interviews or provided to ESA is assumed to be correct and complete. ESA does not assume any liability for information that was misrepresented to ESA by others or for items not visible, accessible, or present on the subject property during the time of the site reconnaissance. The conclusions are intended exclusively for the purpose outlined herein and the site location and project indicated. Any use or reuse of this document or the findings, conclusions, or recommendations presented herein is at the sole risk of the user.

Opinions and recommendations presented herein apply to the site conditions existing at the time of this Phase I environmental site assessment and cannot necessarily apply to site changes of which ESA is not aware and has not had the opportunity to evaluate. Changes in the conditions of the subject property may occur with time due to natural processes or the works of man on the property or adjacent properties. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond ESA's control. Opinions and judgments expressed herein are based on ESA's understanding and interpretation of current regulatory standards and should not be construed as legal opinions.

SECTION 3.0
Site Description

3.1 General Setting and Location

The Creekwalk Trail Project subject property is located on approximately 50.93 acres in Irvine, California. The subject property is currently developed as gravel paved access roads along Peters Canyon Wash and San Diego Creek Channel. The Creekwalk Trail subject property is located along San Diego Creek Channel and Peters Canyon Wash from Coronado to Warner Avenue. The surrounding area land use is mostly industrial and commercial businesses west of the subject property and mostly residential east of the subject property. Figure 1 shows the regional location; Figure 2 shows the subject property. Primary access to the subject property is through locked gates that can be accessed from Main Street, Alton Parkway, Barranca Parkway, and Warner Avenue. For the Creekwalk Trail subject property, the General Plan land use designation is Recreation (REC) and the segment is zoned as Recreation (1.5).

3.2 Current and Proposed Land Uses

The subject property consists of gravel paved access roads along Peters Canyon Wash and San Diego Creek Channel.

Land use designation and zoning will remain unchanged; the project, as proposed, would redevelop the subject property with connected multi-use trails to prioritize and improve accessibility, mobility, and safety for bicyclists, pedestrians, and other users of non-motorized travel.

SECTION 4.0
Records Review

The purpose of the records review is to obtain and examine records that could help to evaluate potential RECs, HRECs, and CRECs in connection with the subject property. This section documents the database records search and the evaluation of other records, summarizes information provided by the property owners, and describes the physical setting of the subject property.

4.1 Standard Environmental Record Sources

Federal, State, and local regulatory agencies publish databases of businesses and properties that handle hazardous materials or hazardous waste, including those properties with a known release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. ESA contracted with a commercial database service to perform the government records database search for listings within the appropriate ASTM standard minimum search distance (EnviroSite 2023). A detailed description of the types of information in each database reviewed and the agency responsible for compiling the data is included in the Government Records Report provided as Appendix A, which includes a list of acronyms for the individual databases.

ESA evaluated the listings with regard to the nature of potential chemicals of concern and the extent of known releases. In general, reported or potential releases likely to affect a property would include those located on or within a 1/8-mile (660 feet) radius of the subject property. ESA also considered additional factors such as chemical properties, regional knowledge of the site vicinity, groundwater flow direction, and available past regulatory documentation as part of the REC evaluation.

4.2 Results of Regulatory Records Search

Listed Sites

The records search identified 378 listings at the subject property or within the ASTM-specified search radius in the surrounding area. However, most of the listings are for operating facilities that have no records of spills or releases, duplicate listings for the same facility, or sites that are downgradient (i.e., southwest) of the subject property and would not be able to adversely affect the subject property. The sites identified within the ASTM-specified search radius in the surrounding area that have the potential to affect the subject property are discussed below. The site locations with the key numbers are shown on maps with the Government Records Report in Appendix A. In addition, to augment the regulatory records search, the State Water Resources Control Board (SWRCB) GeoTracker and California Department of Toxic Substances Control

(DTSC) EnviroStor websites were accessed to further review documents that describe the locations and status of sites with environmental issues.

Subject Property

Site A1. Natural Treatment System 64 – The subject property is listed under CalEPA ID 650694 for a natural water treatment system operated by the Irvine Ranch Water District. This system captures urban stormwater runoff along the Peters Canyon Channel, which is then diverted to the Orange County Sanitation District for further treatment and reuse. Based on the nature of the treatment system, the lack of a documented release or violation, and regulatory oversight, this site is not expected to represent a significant environmental concern. **This listing is not considered a REC, HREC, or CREC.**

Offsite Listings

Site C73. Mok Chong – This listing at 2801 Main Street, is located northwest of the Creekwalk Trail subject property. This site is listed as a California Hazardous Material Incident Reporting System site for a reported incident that occurred on February 6, 2017. According to the report, an incident caller reported a mystery sheen in a drainage canal from an unknown source. The report noted an unknown sheen of unknown quantity with the type listed as petroleum. The primary administrative agency was the Orange County Emergency Management Division and no information regarding containment or cleanup was available. Based on the amount of time passed since the reported incident, the regulatory oversight, and the distance from the adjoining property to the paved access road of the subject property, this site is not expected to represent a significant environmental concern. **This listing is not considered a REC, HREC, or CREC.**

Site F14, F17, F22, F23, F24, and F183. 1X United Readymix | United Premix Concrete Inc | National Ready Mixed Concrete Co – This listing at 16282 Construction Circle East is located northwest and adjacent to the Creekwalk Trail subject property. This site is listed as a historical UST (HIST UST), HIST aboveground storage tanks (ASTs), National Pollutant Discharge Elimination System (NPDES), Toxic Release Inventory (TRIS), and leaking UST (LUST) site. According to the regulatory database, this site is included on a list of historical USTs for one 12,000-gallon diesel tank installed in 1976, one 6,000-gallon unleaded fuel tank with unknown installation date, and one 7,500-gallon diesel tank with unknown installation date. This site is listed as having one 12,000-gallon diesel registered UST installed in 1997. This site is also included on a list of historical ASTs, however, no other information is available. Under Facility ID FA0024026, this site is listed as a registered UST site, which includes one 20,000-gallon diesel tank that was installed in 1987.

According to the regulatory database, this site has an active NPDES permit for storm water discharges associated with industrial activities as of April 20, 1992. Under TRI ID 92714NTNLR16282, this site is listed as a Toxic Release Inventory Facility under NAICS code 327320 as a ready-mix concrete manufacturing facility. The TRI tracks the management and inventory of certain toxic chemicals for facilities and reports how much of each chemical is released to the environment, whether it is emitted to the air or water, or placed in some type of land disposal. No water releases were reported, however, there were reported releases of lead

compounds in 2015, 2016, 2017, and 2022. The releases were reportedly either recycled or disposed of off-site. Based on the regulatory oversight, the off-site disposal of the listed waste, and the lack of an open release or violation case, this listing is not expected to represent an environmental concern.

A leaking UST was reported on June 24, 1987, during tank closure. The records indicate the leaked substances as diesel and gasoline, which affected soil. The tank was reportedly closed and removed. No other information regarding tank removal, cleanup, or remediation was reported. The site was issued case closure and No Further Action (NFA) on February 7, 1989, by the Orange County Local Oversight Program, indicating that the County concluded that this site does not pose a risk to people or the environment.

Another leaking UST was reported on December 10, 2002, during a facility inspection. The records indicate the leaked substance as diesel fuel, which affected soil. A cleanup case was opened based on the Total Petroleum Hydrocarbons (TPH) concentration at 2 feet bgs. The results of soil and groundwater sampling revealed non-detect concentrations. Although it is noted that the nearest surface water is San Diego Creek, it is also noted that surface water was not affected. The site was issued case closure on January 22, 2004, by the Orange County Health Care Agency, indicating that the agencies concluded that this site does not pose a risk to people or the environment. Based on the historical status of the USTs and ASTs, the regulatory oversight, the issued case closure and NFA, and the lack of an open release or violation, this site is not expected to represent a significant environmental concern. **This site is not considered a REC, HREC, or CREC because investigation determined this site did not affect the subject property**.

Site G58. Smogstar LLC DBA Smog Time | Autohouse Baiksan Inc | Tanaka Auto Repair – This listing at 16372 Construction Circle East is located northwest and adjacent to the Creekwalk Trail subject property. The site is listed as a UST and HIST UST site. According to the regulatory database, this site is listed as having a registered UST and included on a historical list of USTs for a 3,000-gallon tank containing unleaded oil that was installed in 1976. No other information regarding tank removal, cleanup, or remediation was reported. Based on the historical status of the UST and the lack of a documented release or violation, this site is not expected to represent a significant environmental concern. **This listing is not considered a REC, HREC, or CREC.**

Site K27, BJ176, and BJ179. Waste Management of Orange County | Waste Management of Orange County – Irvine | The Home Depot | Deweys Disposal | Deweys Rubbish Service – This listing at 16122 Construction Circle East is located to the west and adjacent to the Creekwalk Trail subject property. The site is listed as an AST, UST, HIST AST, HIST UST, and Solid Waste Facility/Landfill (SWF/LF) site. Under Facility ID FA0023997, this site is listed as a registered AST facility with several violations noted, including failure to install or maintain spill container, failure to maintain secondary containment testing, and failure to maintain the monitoring systems. The violations were reportedly corrected and the property returned to compliance. This site is also included on a list of historical ASTs; however, no other information is available. According to the regulatory database, this site is included on a list of historical USTs for one 1,000-gallon transmission oil or fluid tank installed in 1981, one 1,000-gallon hydraulic oil tank installed in 1981, one 1,000-gallon motor oil tank installed in 1981, two 12,000-gallon

diesel fuel tank installed in 1977, one 12,000-gallone unleaded fuel tank installed in 1977, one 1,500-gallon oil, grease, and solvent tank installed in 1977, and one 1,000-gallon waste oil tank installed in 1977.

Under Facility ID CA10484635, this site is listed as a registered UST facility with three open USTs, including three 12,000-gallon diesel tanks installed in 1990. No violations were reported. According to the regulatory database, this site has an active NPDES permit for storm water discharges associated with industrial activities as of November 25, 1992. This site is listed as an active solid waste transfer/processing facility. No violations were reported.

A leaking UST was reported on February 23, 1990, during tank closure. The records indicate the leaked substances as waste oil, motor oil, hydraulic oil, and lubricating oil, which affected soil. The tank was reportedly closed and removed. No other information regarding tank removal, cleanup, or remediation was reported. The site was issued case closure on May 29, 1990, by the Orange County Local Oversight Program and Santa Ana RWQCB, indicating that the agencies concluded that this site does not pose a risk to people or the environment.

Another leaking UST was reported on April 30, 1987, during tank closure. The records indicate the leaked substance as diesel fuel, which affected groundwater. The tank was reportedly closed and removed. No other information regarding tank removal, cleanup, or remediation was reported. The site was issued case closure on February 16, 1989, by the Orange County Local Oversight Program and Santa Ana RWQCB, indicating that the agencies concluded that this site does not pose a risk to people or the environment.

An additional LUST was reported in 2003 during upgrade activities for the removal and replacement of all fuel product lines and dispenser islands. Results of soil samples during the 2003 activities revealed concentrations of TPH and approximately 30 tons of soil was removed and transported offsite for disposal. In 2004, groundwater monitoring wells were installed and detected concentrations of TPH at 25 feet bgs. In 2005, additional groundwater monitoring wells were installed to delineate the extent of the plume. Groundwater sampling continued and was conducted quarterly from October 2004 to September 2010. The site was recommended for closure based on the excavation of source area soil contamination, significantly diminished TPH concentrations, and meeting the criteria for low risk groundwater cases. The site was issued case closure on June 18, 2013, by the County of Orange Health Care Agency, indicating that the County concluded that this site does not pose a risk to people or the environment.

Based on the historical status of the USTs and ASTs, the regulatory oversight, the issued case closures, and the lack of an open release or violation, this site is not expected to represent a significant environmental concern. **This site is not considered a REC, HREC, or CREC because investigation determined this site did not affect the subject property**.

Site L31 and L32. US Post Office – This listing at 17192 Murphy Avenue is located to the west and adjacent to the Creekwalk Trail subject property. The site is listed as a UST, Leaking Underground Storage Tank (LUST), and HIST UST site. According to the regulatory database, this site is listed as having a registered underground storage tank and included on a historical list of USTs for a 10,000-gallon tank containing unleaded oil that was installed in 1975. A reported

leak of the tank was discovered in August 1986 during a tank tightness test. The records indicate the leaked substance as gasoline, which affected soil. No other information regarding tank removal, cleanup, or remediation was reported. The site was issued case closure on May 14, 1990 by the Santa Ana Regional Water Quality Control Board, indicating that the County concluded that this site does not pose a risk to people or the environment. Based on the issued case closure and historical status of the UST, this site is not expected to represent a significant environmental concern. **This site is not considered a REC, HREC, or CREC because investigation determined this site did not affect the subject property**.

Site M38 and M39. Savala Equipment, Savala Equipment Co, Savala Equipment Rentals – This listing at 16402 Construction Circle East is located to the west and adjacent to the Creekwalk Trail subject property. The site is listed as a LUST, AST, UST, site. According to the regulatory database, this is listed as having a registered UST with no violations noted. This site is also listed as having registered ASTs containing diesel fuel, acetylene, antifreeze/coolant, compressed argon, and heavy gear lube/oils. Several violations were issued including failure to provide training to oil-handling personnel, failure to include inspections of tank systems and comparison records, and failure to discuss the facility transfer operations. The violations were reportedly corrected, and the property returned to compliance. This site is also listed for former leaking USTs, including one 10,000-gallon gasoline tank gasoline, one 550-gallon waste oil tank, and three 10,000-gallon diesel fuel tanks. The USTs, associated piping, and contaminated soil and removed in January 1999. Approximately 43,700 gallons of groundwater and 1.1 pounds of TPH were removed between November 2004 and January 2005. Reported levels of TPH concentrations in groundwater have demonstrated stable or decreasing trends with the exception of monitoring well-13. The direction of groundwater is to the southeast and the depth to groundwater ranged from 7 to 11 feet bgs. Based on the evaluation of residual petroleum constituents, the residual levels do not pose a significant rise to the environment or human health and is limited to the shallow soil and groundwater. The site was issued case closure under the low-threat closure policy on November 14, 2013, by the State Water Resources Control Board (SWRCB), indicating that the SWRCB concluded that this site does not pose a risk to people or the environment. The closure reported noted that the site conditions pose only a low threat to groundwater and Peters Canyon Channel as the contaminated groundwater plume is stable, groundwater concentrations were either stable or decreasing, natural attenuation appears to be established and is noted that is unlikely for TPH from well MW-13 to reach Peters Canyon Channel and highly unlikely for the residual TPH to impair the beneficial uses of the channel. **This site is not considered a REC, HREC, or CREC because investigation determined this site did not affect the subject property**.

Orphan Sites

Sites not plotted due to poor or inadequate address information are referred to as “orphan sites” or “unmappable parcels.” The records search did not identify any orphan sites of concern.

4.3 Other Records Reviewed

The regulatory agency records search also provides historical aerial photographs, historical topographic maps, fire insurance maps, and city directories, as available. The search results are discussed below.

Historical Aerial Photographs

Historical aerial photographs are available for the years 1938, 1939, 1946, 1947, 1952, 1960, 1963, 1968, 1972, 1974, 1975, 1977, 1978, 1980, 1982, 1983, 1985, 1988, 1989, 1991, 1994, 2002, 2005, 2009, 2010, 2012, 2014, 2016, 2018, 2020, and 2022, and are included in Appendix B. The red polygon indicates the subject property on the aerial photographs.

The **1938, 1939, 1946, 1947, 1952, 1960, and 1963 aerial photographs** show most of the subject property as the Peters Canyon Wash with the Barranca Channel and surrounding areas developed as agricultural land.

The **1968 aerial photograph** shows the subject property developed with the current alignment of the Peters Canyon Channel and San Diego Creek Channel, with the exception of the Barranca Channel. The City shows increased development in roads and several structures along the western side of the subject property. No other significant changes are visible.

The **1972 aerial photograph** shows the subject property developed with the current alignment of the Peters Canyon Channel, San Diego Creek Channel, and the Barranca Channel. The City shows increased development in roads and several structures along the western side of the subject property. No other significant changes are visible.

The **1974, 1975, 1977, 1978, 1980, 1982, and 1985 aerial photographs** show the subject property developed with the current alignment of the Peters Canyon Channel, San Diego Creek Channel, and the Barranca Channel. The City shows increased development in roads, including Coronado, Main Street, Alton Parkway, Barranca Parkway, and Warner Avenue. Additional present day industrial, commercial, and residential structures appear to be developed along the western side of the subject property. No other significant changes are visible.

The **1988, 1989, 1991, 1994, 2002, 2005, 2009, 2010, 2012, and 2014 aerial photographs** show the eastern side of the subject property as be developed with some of the present day commercial and residential structures. No other significant changes are visible.

The **2016, 2018, 2020, and 2022 aerial photographs** show the surrounding areas to be developed with the current structures. No other significant changes are visible.

In summary, the aerial photographs show the subject property with the present-day use as the paved access roads adjacent to the channels and former use as a wash and agricultural land. No dark stained areas are visible on the subject property in any of the aerial photographs. **The review of aerial photographs does not indicate any RECs relative to the subject property.**

Historical Topographic Maps

Historical topographic maps are available for the years 1896, 1901, 1932, 1935, 1942, 1948, 1950, 1965, 1972, 1981, 2012, 2015, 2018, and 2022, and are included in Appendix B. The subject property is identified with yellow polygons on the topographic maps.

The **1896 and 1901 topographic maps** show primarily undeveloped land with no structures, with the exception of one structure to the east.

The **1932, 1935, 1942, 1948, and 1950 topographic maps** show the subject property as Peters Canyon Wash with the Aliso Gun Club and Sprig Gun Club to the west.

The **1965 topographic map** depicts the subject property as developed with the Peters Canyon Channel with the Aliso Gun Club and Sprig Gun Club to the west. Duck ponds are also depicted to the west and as part of the Barranca segment of the subject property. Warner Avenue and Barranca Road are also depicted.

The **1972 and 1981 topographic maps** depict the subject property as developed with the Peters Canyon Channel with the Barranca channel segment. Warner Avenue and Barranca Road are also depicted. Several structures are depicted along the western side of the subject property.

The **2012 through 2022 topographic maps** use the recent topographic map format that shows minimal details and no structures.

In summary, the topographic maps show structures consistent with those discussed above in the historical aerial photograph section and do not indicate any RECs.

City Directories

City directories are available for the years 1973, 1978, 1983, 1988, 1993, 2002, 2006, 2010, 2015, and 2020 are included in Appendix B. As the subject property consists of the paved access roads along the Peters Canyon Channel, San Diego Creek Channel, and Barranca Channel, there are no associated address with the subject property.

With a few exceptions, the surrounding property listings consists of names of individuals, various commercial offices and businesses, and residential apartments and condominiums, none of which suggest signifiant chemical use. The exceptions are listed below:

17422 Murphy Avenue (West Adjoining Property)	
Year(s)	Occupant Listed
2002	NU Coast Graphics Svc, Casenotes Publishing CO Inc, Precision Offset Inc
2015	Race Technologies
2020	Race Technologies LLC

17392 Murphy Avenue (West Adjoining Property)	
Year(s)	Occupant Listed
2002	Stor America, Sure-Save Self Storage
2006	Green Lease, Hockey Pacific
2010	US Drapery Cleaners, A US Drapery & Blinds Irvine
2015	Amsystems Inc, Mammoth Equities, Penske Truck Rental, R&J Entertainment, Sure Save Self Storage, US Drapery Cleaners
2020	Life Storage, Penske Truck Rental, SSCA 17392 Murphy Ave LLC, Amsystems Inc

17352 Murphy Avenue (West Adjoining Property)	
Year(s)	Occupant Listed
1993	Evers Electronic Equip
2002	Kusha Inc
2015	Jenson Printing & Litho
2020	Jenson Printing & Litho, Kusha Inc, Suntisfy Inc

17100 Murphy Avenue (West Adjoining Property)	
Year(s)	Occupant Listed
2002	Lockheed Naval Electronics, Lockheed Martin Federal Systs
2006	Lockheed Martin Corp
2015	Lockheed Martin MS2, Corsair Electrical Connecters
2020	Corsair Electrical Connecters

17032 Murphy Avenue (West Adjoining Property)	
Year(s)	Occupant Listed
2002	Twenty Six Red, Azita Manufacturing
2015	DB Studios, DMJ Designs Inc, Bret McCarroll, Inner Workings Inc
2020	Bret McCarroll, Inner Workings Inc

16402 Construction Circle East (West Adjoining Property)	
Year(s)	Occupant Listed
2002	Savala Construction Co, Savala Equipment Co
2015	Savala Construction Co, Savala Equipment Rentals
2020	Savala Construction Co, Savala Equipment Rentals

16372 Construction Circle East (West Adjoining Property)	
Year(s)	Occupant Listed
1993	Means Bors Truck Tire Serv
2002	A-1 Svc, Alpine Auto Care, Craters & Freighters, Gary's Svc, Great Firewood Co, Internet Blue Print, Irvine Auto Tint, Irvine Brakes Express, Mechanics on the Run, Penske Truck Rental, Precision Landscape Mntnc, Smog Time, Tanaka Auto
2006	A-1 Service A 24 Hour Towing,Great Firewood Co, Independent Transport, U-Haul Co
2010	Great Firewood Co,Irvine Windshield Repair
2015	Auto Clinic, Auto House Baiksan, Corvicsons, Ecotech, Irvine Box & Hitch, Irvine Windshield Repair, Mobilemoney, Smog Time, Tanaka Auto, U-Haul Neighborhood Dealer
2020	Auto Clinic, Auto House Baiksan, Extreme Towing Recovery, Irvine Box & Hitch, Irvine Windshield Repair, New Horizons Computer Learning, Smog Time, Socal Concepts Inc, Tanaka Auto, Tire Finance Sales Ctr Inc, U-Haul Neighborhood Dealer

16282 Construction Circle East (West Adjoining Property)	
Year(s)	Occupant Listed
2002	National Ready Mixed Concrete, United Premix Concrete Inc, West LA Building Materials
2010	National Ready Mixed Concrete
2015	National Ready Mixed Concrete

2002	Arone Long Photography, Reachgood Industrial Co Inc, Termite Guy
2010	So Cal Builders Svc
2015	Buckchata Product, Dahn Corp, Maverick Woodworking, Sal Water Catering Inc, So Cal Builders Svc
2020	Dahn Corp, Demolyneux Corp, Salt Water Catering Inc, So Cal Builders Svc

16212 Construction Circle East (West Adjoining Property)	
Year(s)	Occupant Listed
1993	Galaxie Plastering
2002	A&P Towing
2010	Qwikey Lock Svc
2015	A&P Towing, Irvine Tow, Qwikey Lock Svc
2020	A&P Towing, Qwikey Lock Svc

16122 Construction Circle East (West Adjoining Property)	
Year(s)	Occupant Listed
1993	Deweys Rubbish Service Inc
2002	Waste Management Inc
2010	Laguna Beach Disposal Svc Inc
2015	Laguna Beach Disposal Svc Inc, Waste Management, Waste Management Inc
2020	CNG Fueling Station, Recycle America Alliance, Waste Management, Waste Management-Orange County

According to the review of the city directories, the adjoining properties have been occupied by various manufacturing facilities, industrial facilities, auto repair facilities, a drapery cleaner, a fueling station, and waste management facilities. Please refer to Section 4.2 for further discussion. Based on the city directory review, no other environmentally sensitive listings were identified.

In summary, none of the City directory listings indicate RECs that could affect the subject property.

Fire Insurance Maps

No Fire Insurance Maps (FIMs) or similar maps were identified for the site locations and/or adjoining properties.

In summary, the fire insurance maps do not indicate any RECs.

Environmental Lien Search

A search for environmental liens was not conducted because environmental liens would not be applied against a City property owned since the 1960s.

4.4 Physical Setting

The following sections provide information about the physical setting of the subject property. Geotechnical information is not a required element of ASTM E1527-21 Phase I environmental site assessments and is not included in this Phase I environmental site assessment.

Topography. The subject property is in the Tustin, California, 7.5 Minute Quadrangle. The subject property is in the Los Angeles coastal plain area and drains into Newport Bay. The subject property is relatively flat with elevations from 44 feet above mean sea level at the upstream end to 39 feet above mean sea level at the downstream end.

Geology, Soils, and Hydrology. The soils along the paths consist of imported gravel fill. The geology of the local area is Quaternary[1] alluvial valley and fan deposits composed of sand, silt, and clay (CGS 2024). The subject property is not crossed by a known Holocene (i.e., movement within the last 11,700 years) active fault (CGS 2024).

According to a previous subsurface investigation conducted for Waste Management (16122 Construction Circle East) northwest of the subject property, the depth to groundwater in the vicinity of the subject property is inferred to be approximately 5 to 12 feet below ground surface (bgs), with the inferred groundwater flow to be towards south to southwest.

Flood Hazard. The subject property along and adjacent to the San Diego Creek and Peters Canyon Channel is located within a FEMA-designated 100-year flood zone (Flood Zone A) (FEMA Flood Map Service Center). Flood Zone A areas have a 1 percent risk of flooding annually.

[1] Quaternary time is from 5.3 million years ago to the present.

SECTION 5.0
Site Reconnaissance

5.1 Methodology and Limiting Conditions

Justin Nguyen, from ESA, conducted the site reconnaissance on January 30, 2024, to assess present conditions. Access to the subject property was provided by the County of Orange staff. The weather at the time of the site reconnaissance was sunny and cool. The site conditions discussed below are limited to readily apparent environmental conditions observed. The subject property is shown on Figure 2, *Subject Property.*

5.2 General Site Setting

The subject property consists of gravel paved access roads along the Peters Canyon Wash and San Diego Creek Channel. The surrounding area land use is mostly industrial and commercial uses to the west and mostly residential uses to the east. The observed conditions, along with photographs, are described below.

5.3 Site Observations

The Creekwalk Trail is approximately 1.75 miles long between Coronado and Warner Avenue. The banks are generally 20 feet wide with slope or cross slope, except at undercrossings and generally armored with large stone riprap and concrete at undercrossings.

Paved Access Roads

The photographs on the next two pages show typical views of the paved access roads adjacent to the channels. No chemical containers, stained soil or concrete, spills, unusual odors, or stressed vegetation were noted, as shown in the photographs below.

San Diego Creek Channel and Peters Canyon Wash Banks

The channels were observed without pavement slope or cross slope features, except at undercrossings and generally armored with large stone riprap and concrete at undercrossings. The photographs below show typical views.

The photograph below shows a general view of the San Diego Creek Channel meeting with the Peters Canyon Wash.

Drainage Features

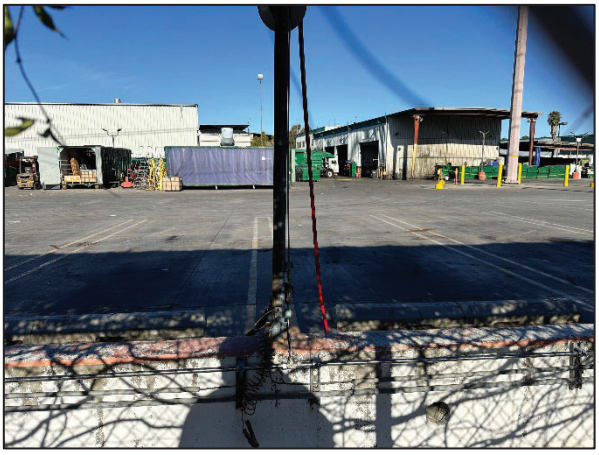
The photographs below show views of typical drainage features found along the paved access roads and channels. No chemical containers, stained soil or concrete, spills, unusual odors, or stressed vegetation were noted, as shown in the photographs below.

Public Works Utility Shed

The photo below shows a utility shed owned by the County of Orange Department of Public Works located on the paved access road along the Peters Canyon Wash near the access gate on Barranca Parkway. ESA did not have access to the shed; however, no spills, stains, or odors were noted, thus the utility shed is not expected to represent a significant environmental concern.

Electric Distribution Poles/Lines

The photos below show typical views of the electric distribution poles adjacent to the subject property and distribution lines that run across the subject property. ESA did not observe any transformers or potential PCB-containing equipment on the subject property. No spills, stains, or odors were noted; thus, the electric distribution poles and lines are not expected to represent a significant environmental concern.



Creekwalk Channel Adjoining Properties

The Creekwalk segment of the subject property is located along Peters Canyon Wash and San Diego Creek Channel from Coronado to Warner Avenue. The surrounding adjoining properties consists of mostly residential, industrial, residential, and commercial uses. The photos below show general views of the adjoining properties.

5.4 Results of Site Reconnaissance

The Creekwalk Trail subject property is developed as gravel paved access roads adjacent to the Peters Canyon Wash and San Diego Creek Channel. Other than *de minimis* staining, spills, stained pavement or soil, unusual odors, or stressed vegetation was not noted. **No RECs were observed relative to hazardous materials, hazardous waste, or chemical use, storage, or disposal**.

SECTION 6.0
User-Provided Information

An interview questionnaire was sent to the City of Irvine and Orange County, which has not yet been returned. However, given the information acquired from the records search and site reconnaissance, this data gap is not expected to affect the identification of RECs, HRECs, or CRECs.

SECTION 7.0
Vapor Encroachment Screening

The government records database report and other resources were reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor originating from the nearby sites to migrate beneath the subject property. Based on the ASTM E2600-22, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM 2022), the following minimum search distances were used to determine if contaminated soil vapors from a nearby known or suspect contaminated site have the potential to be migrating beneath the subject property:

- 1/10 mile (528 feet) for petroleum hydrocarbons (i.e., gasoline or diesel)
- 1/3 mile (1,760 feet) for other contaminants of concern

Groundwater depth and flow direction is also utilized to determine risk of vapor migration. According to a previous subsurface investigation conducted for Waste Management (16122 Construction Circle East) northwest of the subject property, the depth to groundwater in the vicinity of the subject property is inferred to be approximately 5 to 12 feet below ground surface (bgs), with the inferred groundwater flow to be towards south to southwest.

If known or suspect contaminated sites are located under the criteria listed below, then online resources are reviewed to determine the extent of the contaminated plume at those sites.

- Onsite or adjacent to the subject property,
- Within 100 feet, or
- Within the above referenced distances from the subject property and upgradient or cross gradient to the subject property,

Based on review of the government records database report and other previously discussed information, the only known or suspect petroleum hydrocarbon-impacted sites within 528 feet of the subject property would be the UST removals conducted in 1999 at the Savala Equipment Rentals adjoining property to the west. There are no other sites with potential contaminants of concern within 1,760 feet of the subject property.

As discussed in Section 4.2, *Results of Regulatory Records Search*, the UST site has been cleaned up and the case closed by the overseeing regulatory agency. Case closure means that the regulatory agency concluded that the UST site does not pose a risk to people or the environment. In addition, an investigation conducted on a monitoring well at the adjoining property revealed that the site conditions at the time of closure pose only a low threat to the Peters Canyon Wash as the contaminated groundwater plume is stable, groundwater concentrations were either stable or

decreasing, natural attenuation of residual TPH appears to be established, and it is unlikely for TPH from Well MW-13 to reach Peters Canyon Wash and highly unlikely for the residual TPH to impair the beneficial uses of the channel.

Therefore, the subject property is not considered a potential vapor intrusion source.

Therefore, per ASTM E2600-22, there are no known potential threats to the subject property posed by the potential migration of petroleum hydrocarbon or other contaminant vapors from listed sites.

SECTION 8.0
Findings and Opinions

8.1 Findings and Opinions

A commercial government records database service searched relevant federal, State, and local regulatory agency lists for listings of the Creekwalk Trail subject property assessed in this report, and for nearby properties within the appropriate ASTM 1527 standard search distances. In addition, regulatory agency websites were checked to provide additional information. The records search returned 2002 listings. **None of the listings are considered a REC, HREC, or CREC.**

The Creekwalk Trail subject property was inspected on January 30, 2024. The subject property consists of gravel paved access roads used by the County to perform any necessary maintenance along the Barranca Channel, Peters Canyon Wash, and San Diego Creek Channel. The surrounding area land use is mostly commercial south of the subject property, mostly industrial and commercial businesses west of the subject property, and mostly residential east of the subject property. Other than a few locations with small floor stains considered to be *de minimis* conditions, there were no observations of liquid spills, stained soil, unusual odors, stressed vegetation, or waste pits or ponds on the subject property, which exhibits good housekeeping. **No RECs were observed relative to hazardous materials, hazardous waste, or chemical use, storage, or disposal**.

An interview questionnaire was sent to the City of Irvine and Orange County, which has not yet been returned. However, given the information acquired from the records search and site reconnaissance, this data gap is not expected to affect the identification of **any RECs, HRECs, or CRECs.**

The subject property is not considered a potential vapor intrusion source. **Therefore, per ASTM E2600-22, there are no known potential threats to the subject property posed by the potential migration of petroleum hydrocarbon or other contaminant vapors from listed sites.**

8.2 Data Gaps

ESA attempted to obtain reasonably ascertainable information regarding the subject property and the surrounding environs. As noted above, the lack of an interview questionnaire is not considered a data gap. There were no data gaps identified that could affect the identification of RECs, HRECs, or CRECs.

SECTION 8.0
Report Authors and Qualifications

8.1 Report Authors and Signatures

This section includes qualification statements of the environmental professionals responsible for conducting the Phase I environmental site assessment and preparing this report.

Mr. Justin Nguyen of ESA conducted the data review for the subject property, conducted the site reconnaissance, and prepared the Phase I environmental site assessment report. Mr. Nguyen has prepared over 60 Phase I environmental site assessments.

The work conducted and the report written by Mr. Burns was reviewed by Mr. Michael Burns, PG, CEG, CHG, of ESA. Mr. Burns has over 30 years of experience in environmental site investigations, characterizations, and assessments, including Phase I Environmental Site Assessments.

Mr. Nguyen and Mr. Burns declare that, to the best of their professional knowledge and belief, they meet the definition of Environmental Professional as defined in 40 CFR §312.10. Mr. Nguyen and Mr. Burns have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of this subject property. With the assistance of Mr. Burns, Mr. Nguyen has developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Reg Measure ID :	408150
Reg Measure Type :	401 Certification
Reg Measure Title :	401 Cert for Irvine City

Reg Measure Description :

Purpose: The project involves various improvements to Jamboree Road between the I-405 Freeway northbound on and off-ramps and Kelvin Avenue in the City of Irvine. The proposed improvements include street widening to provide additional travel lanes (primarily at the intersection of Jamboree Road and Main Street), traffic signal modifications, center median modifications, construction of a new retaining wall, utility modifications, parkway improvements, box culvert lengthening over the flood control channel, and private property modifications. Activities: Barranca Channel is a trapezoidal channel with rip-rap lined sides both upstream and downstream of Jamboree Road, transitioning to a double 12 foot wide by 9.5 foot high reinforced concrete box (RCB) under Jamboree Road. This project proposes to extend the downstream portion of the double RCB by 15 feet and transition to the trap channel with concrete wing walls and a concrete invert apron and cut-off wall, similar to the existing downstream structure.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Violation Date : 2022-03-11

Citation : HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Description :

"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Notes :

OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verfiy compliance. Maintain all testing records for 36 months.

Citation : HSC 6.7 25291(a)(2) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(2)

Description : Failure to maintain secondary containment (e.g., failure of secondary containment testing).

Notes :

Returned to compliance on 08/23/2021. This agency received the secondary containment test results dated 3/23/21. The results indicate the following components failed: T1 supply line secondary T2 supply line secondary T3 supply line secondary L11 satellite line secondary L12 satellite line secondary L15 satellite line secondary L16 satellite line secondary New oil supply line secondary New oil #1 satellite line secondary New oil #2 satellite line secondary New oil #5 satellite line secondary New oil #6 satellite line secondary UDC #1/2 UDC #5/6 Satellite UDC 1 Satellite UDC 2 Satellite UDC 5 Repair and retest all failed components by 6/23/21. Contact this agency to schedule a date to witness retesting. Submit plans to this agency for repairs that require a permit. Submit retest results to this agency.

Program : UST
Source : CERS

Violation Date : 2020-03-16

Citation : 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Description : Failure to maintain secondarily contained piping to allow liquid to flow into the sump in the event of a leak (i.e., failure to remove test boot).

Notes :

Returned to compliance on 03/16/2020. Observed that test boots were attached at both the turbine sump and the UDCs for all three diesel tanks. The test boots at the turbine sump did not have a relieve valve to allow the piping secondary to drain into the turbine sump in the event of a leak. No leak was observed. CORRECTIVE ACTION: All three test boots were removed by the certified technician to allow the piping secondary to drain into the turbine sump in the event of a leak. The violation was abated/corrected on-site.

Violation Date : 2020-03-16

Citation : 23 CCR 16 2636(f)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(4)

Description : Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC).

Notes :

Returned to compliance on 03/27/2020. The turbine on the north diesel tank could not be turned on. As the turbine could not be turned on it could not be verified that piping leak alarms or failure/disconnect trigger automatic pump shutdown. CORRECTIVE ACTION: Repair the north diesel tank system so that it can be verified that piping leak alarms and failure/disconnect trigger automatic pump shutdown immediately. Alternatively, conduct a line integrity test on the north diesel tank pressurized double walled piping and update monitoring plan. Provide proof of compliance to this Agency on the CERS website, https://cers.calepa.ca.gov/, by email, or mail within 30 days.

Description :

"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Notes :

Returned to compliance on 03/27/2020. The north and south diesel tank spill containers were observed to not be liquid-tight. CORRECTIVE ACTION: Install like-for-like or repair spill buckets. After repair or replacement, have certified technician perform a tightness test. Submit the Spill Container Test Report Form to this Agency on the CERS website, https://cers.calepa.ca.gov/, by email, or mail within 30 days.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violations

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Violation Date :	2017-04-13
Citation :	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Description :	Failure to provide the following training to all oil-handling personnel: 1. Operation and maintenance of equipment to prevent discharges. 2. Discharge procedure protocols. 3. Applicable pollution control laws, rules, and regulations. 4. General facility operations. 5. Contents of the SPCC Plan.
Notes :	Returned to compliance on 06/19/2018. Facility had not provided APSA training to their "oil Handler" employees within the last year. Annual refresher training is required. Complete the required training. Submit a copy of the facility's employee APSA training sign in log to this Agency within 30 days.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : OSHA-OIS

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description
Source Description : OSHA-OIS

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2010: 134 - Aqueous solution with total organic residues less than 10 percent, 0.4 tons to CAD008302903
2010: 221 - Waste oil and mixed oil, 0.12 tons to CAD008302903
2010: 551 - Laboratory waste chemicals, 0.3375 tons to CAD008302903
2010: 331 - Off-specification, aged or surplus organics, 0.935 tons to CAD008302903
2010: 221 - Waste oil and mixed oil, 2.6 tons to CAD008302903
2010: 352 - Other organic solids, 0.475 tons to CAD008302903
2010: 711 - Liquids with cyanides >= 1,000 Mg./L, 0.2 tons to CAD008302903

Map Id: R60
Direction: WSW
Distance: 0.059 mi., 311 ft.
Elevation: 42 ft.
Relative: Lower

Hazardous Waste Summary

Waste Code / Name : D001 - IGNITABLE WASTE
D002 - CORROSIVE WASTE

Waste Code / Name :

F001 - THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code / Name :

F002 - THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Details

Waste Line Number :	1
Is DOT Hazardous :	N
DOT ID Number :	N/R
DOT Information :	N/R
Non Waste Description :	NON RCRA HAZARDOUS WASTE LIQUID (OILY WATER)
Quantity :	528 Gallons
Quantity Tons, Acute, Non-Acute :	2.201835, 0, 2.201835
Quantity Kg, Acute, Non-Acute :	0, 1997.1304
Quantity Tons, Haz, Non-Haz :	0, 2.201835
Quantity Kg, Haz, Non-Haz :	0, 1997.1304
Management Method :	H141 - STORAGE, BULKING AND/OR TRANSFER OFF SITE
Is EPA Waste :	N
Federal Code :	N/R
State Code :	CA - 222

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

FRS ***(cont.)***

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violations

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Violation Date :	2019-05-29
Citation :	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Description :	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Notes :	OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities within 30 days.

Violation Date : 2016-10-31

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : Failure to adequately discuss in the SPCC Plan all applicable bulk storage containers, or no discussion regarding all applicable bulk storage containers included.

Notes :

Returned to compliance on 01/24/2017. The facility's SPCC"s Table G-2 Oil Storage Containers and Capacities was incomplete. This table is to identify the facility's qualifying APSA storage. Inspection observed one truck (1 diesel tank compartment, 2 oil tank compartments), 5 used oil 55 gallon drums, and 2 oil product 55 gallon drums stored on site. Also, Table G-4 Containers with potential for an oil discharge was incomplete. One of the truck's oil tank and the 55 gallon oil product drums were not identified and evaluated. Complete the plan's table G-2 and G-4. Once completed, submit a copy of the plan's tables to this Agency within 30 days.

Violation Date : 2016-10-31

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description : Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.

Notes : Returned to compliance on 12/12/2016. The facility did not have records for their SPCC inspections. Implement the required inspections. Submit a copy of your facility's inspection log for the first month to this Agency for our review within 30 days.

Citation : 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Description : Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Notes :

Returned to compliance on 01/24/2017. The drums storing used oil and used oily absorbents were not marked with the required information. The drums storing used oil filters were not marked with the containers' start accumulation dates. A 5 gallon container storing a hazardous mixed fuel water waste was unmarked. Containers storing hazardous waste must be marked with the required identifying information. Once corrected, submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Citation : HSC 6.67 25270.6(a)(1), 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(1), 25270.6(a)(2)

Description : Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.

Notes :

Returned to compliance on 12/12/2016. The facility's 6-30-16 facility's information submission was reviewed on CERS and not accepted. Please access CERS and make the requested revisions. The facility's business activities form must be checked YES for above ground petroleum storage. Also, the facility must complete the requested information for APSA. >>On CERS, you can meet APSA state reporting requirements by uploading a tank facility statement or by submitting a hazardous materials business plan. To upload a tank facility statement, refer to directions provided in CERS. To meet the requirement by submitting a business plan, follow the directions provided in CERS.

Source Description

Source Description : The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violation Date : 2023-05-11

Citation : 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)

Description :

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Notes : Returned to compliance on 05/11/2023. The following Designated Operator (DO) inspection reports were not signed by the UST Owner/Operator: - 4/1/2023 - 10/1/2022 - 9/1/2022 - 7/1/2022 - 6/1/2022

Violation Date : 2022-05-03

Citation : 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Description : Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Notes : Returned to compliance on 05/03/2022. OBSERVATION: The VR-208 sensor in the diesel piping sump was located on the opposite side of the product piping, and therefore unable to detect a leak at the earliest possible opportunity. CORRECTIVE ACTION: The sensor was placed in the proper location during the inspection. Violation corrected on site. No further action required.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violations

Violation Date : 2019-04-16

Citation : 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Description : Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Notes : Returned to compliance on 04/16/2019. The waste brake dust drum was missing a label, during the inspection the label was immediately filled out and placed on the waste container. CORRECTED ON-SITE.

Division : Orange County Environmental Health
Program : HW
Source : CERS

Violation Date : 2019-04-16

Citation : 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Description : Failure to label stationary hazardous waste tanks as "hazardous waste" and mark with an accumulation start date.

Notes : Returned to compliance on 04/16/2019. The accumulation dates on the waste antifreeze tank was outdated and this was filled out during the inspection. CORRECTED ON-SITE.

Source Description
Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
The UORS is managed by the California Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Hazardous Waste Summary
Waste Code / Name : 551 - Laboratory waste chemicals
D001 - IGNITABLE WASTE
D002 - CORROSIVE WASTE

Waste Code / Name :

F003 - THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violations

Violation Date :	2018-04-24
Citation :	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Description :	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Notes :

For the hazardous materials inventory: For the inventory: 1 - Update hazardous materials inventory for the diesel aboveground storage tank (ASTs), the fire code hazard class should be Combustible Liquid III. 2 - Please UNCHECK "YES" under the "chemical location confidential EPCRA" and check "NO". 3 - Please remove the quantity for the "Annual Waste Amount" this is a pure chemical not a waste. Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS) by 5/24/18.

Division :	Orange County Environmental Health
Program :	HMRRP

Waste Activity Monitoring

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Report Cycle :	2003
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	SPENT FLAMMABLE SOLVENTS; EXTRACTION PROCESS OF EVNIRONMENTAL SAMPLES; HEXANE, ACETONE, METHANOL, AND ETHYL ETHER.
Primary NAICS :	54138 - Testing Laboratories
Source Code :	G22 - Laboratory analytical wastes (used chemicals from laboratory operations)
Form Code :	N/R
Management Method :	H061 - Fuel blending prior to energy recovery at another site (waste generated either on-site or received from off-site)
Generation Tons :	1.805
Managed Tons :	0
Shipped Tons :	1.805
Received Tons :	0
Receiver ID :	CAD008302903
Receiver State :	CA
Shipper ID :	CAR000066738
Shipper State :	CA
Waste Minimization :	N/R
Waste Code List :	D001, D006, D007, D008, F003, F005
Waste Code Group :	F1_5 - F001-F005 combinations
Waste Generation Type :	N/R

Report Cycle :	2003
Hazardous Waste Page Number :	10
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	POTASSIUM CYANIDE WASTE LABPACK FROM THE ANALYSIS OF ENVIRONMENTAL SAMPLES.
Primary NAICS :	54138 - Testing Laboratories
Source Code :	G22 - Laboratory analytical wastes (used chemicals from laboratory operations)
Form Code :	N/R

Map Id: P126
Direction: W
Distance: 0.105 mi., 555 ft.
Elevation: 41 ft.
Relative: Lower

Source Description
Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2004: 792 - Liquids with pH <= 2 with metals, 2.04 tons to CAD008302903
2004: 352 - Other organic solids, 2.2 tons to CAD008302903
2004: 181 - Other inorganic solid waste, 0.12 tons to CAD008302903
2004: 551 - Laboratory waste chemicals, 0.2455 tons to CAD008302903
2004: 331 - Off-specification, aged or surplus organics, 0.45 tons to CAD008302903
2004: 214 - Unspecified solvent mixture, 0.62 tons to CAD008302903
2004: 343 - Unspecified organic liquid mixture, 12.642 tons to CAD008302903
2004: 792 - Liquids with pH <= 2 with metals, 0.84 tons to CAD008302903
2004: 181 - Other inorganic solid waste, 0.2 tons to AZ0000337360
2004: 214 - Unspecified solvent mixture, 0.32 tons to CAD008302903
2004: 331 - Off-specification, aged or surplus organics, 0.005 tons to CAD008302903
2004: 331 - Off-specification, aged or surplus organics, 0.65 tons to CAD008302903
2004: 211 - Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc), 0.32 tons to CAD008302903
2004: 211 - Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc), 0.24 tons to CAD008302903
2004: 551 - Laboratory waste chemicals, 0.32 tons to CAD008302903
2003: 214 - Unspecified solvent mixture, 1.56 tons to CAD008302903
2003: 792 - Liquids with pH <= 2 with metals, 0.72 tons to CAD008302903
2003: 211 - Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc), 0.12 tons to CAD008302903
2003: 551 - Laboratory waste chemicals, 0.3225 tons to CAD008302903
2003: 352 - Other organic solids, 1.4 tons to CAD008302903
2003: 135 - Unspecified aqueous solution, 0.12 tons to CAD008302903
2003: 792 - Liquids with pH <= 2 with metals, 1.05 tons to CAD097030993
2003: 214 - Unspecified solvent mixture, 0.12 tons to CAD008302903
2003: 551 - Laboratory waste chemicals, 0.12 tons to CAD008302903
2003: 792 - Liquids with pH <= 2 with metals, 4.24 tons to CAD008302903
2003: 331 - Off-specification, aged or surplus organics, 0.455 tons to CAD008302903
2003: 211 - Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc), 0.72 tons to CAD008302903
2003: 181 - Other inorganic solid waste, 0.08 tons to CAD008302903
2002: 211 - Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc), 0.4902 tons to CAD008302903
2002: 341 - Organic liquids (nonsolvents) with halogens, 0.12 tons to CAD008302903

Waste Generator Details

State Waste :

2003: 223 - Unspecified oil-containing waste, 0.68805 tons to CAD044003556
1999: 223 - Unspecified oil-containing waste, 0.7506 tons to CAT080012602
1999: 181 - Other inorganic solid waste, 0.2275 tons to CAT080033681
1999: 551 - Laboratory waste chemicals, 0.815 tons to CAD044429835
1999: 123 - Unspecified alkaline solution, 0.3544 tons to CAD044429835
1999: 211 - Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc), 0.4586 tons to CAD020161642
1999: 792 - Liquids with pH <= 2 with metals, 1.6053 tons to CAT080033681
1999: 181 - Other inorganic solid waste, 0.875 tons to CAD044429835
1999: 343 - Unspecified organic liquid mixture, 0.187 tons to CAD044429835
1999: N/R - Blank or unknown, 0 tons to CAT080033681
1999: 214 - Unspecified solvent mixture, 0.108 tons to CAD044429835
1999: 725 - Liquids with mercury >= 20 Mg./L, 0.0075 tons to CAD044429835
1999: 792 - Liquids with pH <= 2 with metals, 2.2642 tons to CAD044429835
1999: 181 - Other inorganic solid waste, 1.3101 tons to CAD000088252
1998: 791 - Liquids with pH <= 2, 0.8548 tons to CAT080033681
1998: 121 - Alkaline solution (pH >= 12.5) with metals, 0.0375 tons to CAD044429835
1998: 792 - Liquids with pH <= 2 with metals, 1.7931 tons to CAT080033681
1998: 725 - Liquids with mercury >= 20 Mg./L, 0.0075 tons to CAD044429835
1998: 122 - Alkaline solution without metals pH >= 12.5, 0.2085 tons to CAT080033681
1998: 181 - Other inorganic solid waste, 48.7338 tons to CAD000088252

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2006: 214 - Unspecified solvent mixture, 0.3564 tons to CAD008364432
2006: 331 - Off-specification, aged or surplus organics, 0.33 tons to CAD008364432
2006: 141 - Off-specification, aged or surplus inorganics, 0.015 tons to WAD991281767
2006: 551 - Laboratory waste chemicals, 0.1 tons to CAD008364432
2006: 331 - Off-specification, aged or surplus organics, 0.0125 tons to WAD991281767
2006: 221 - Waste oil and mixed oil, 0.2052 tons to CAD008364432
2006: 214 - Unspecified solvent mixture, 1.7136 tons to CAD008364432
2006: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.1782 tons to CAD008364432
2006: 181 - Other inorganic solid waste, 0.05 tons to WAD991281767
2005: 214 - Unspecified solvent mixture, 0.3888 tons to CAD008364432
2005: 352 - Other organic solids, 0.05 tons to CAD008364432
2004: 214 - Unspecified solvent mixture, 0.9756 tons to CAD008364432
2004: 214 - Unspecified solvent mixture, 0.2664 tons to CAD008364432
2004: 352 - Other organic solids, 0.615 tons to CAD008364432
2004: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.3597 tons to CAD008364432
2004: 221 - Waste oil and mixed oil, 0.2052 tons to CAD008364432
2004: 134 - Aqueous solution with total organic residues less than 10 percent, 0.084 tons to CAT000613893
2003: 221 - Waste oil and mixed oil, 0.2052 tons to CAD008364432
2003: 214 - Unspecified solvent mixture, 0.1944 tons to CAD008364432
2003: 352 - Other organic solids, 0.29 tons to CAD008364432
2003: 214 - Unspecified solvent mixture, 0.7272 tons to CAD008364432

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violation Date :	2020-01-03
Citation :	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Description :	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Notes :	Returned to compliance on 01/03/2020. The two waste oil containers were observed to have faded labels. Corrective action: New hazardous waste labels were provided to the containers, the violation was corrected onsite.

Violation Date : 2020-01-03

Citation : HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Description : Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Notes : Returned to compliance on 02/06/2020. Annual employee training records for the hazardous materials business emergency plan program were not available during the inspection. Corrective action: Provide documentation of the employee training records to this Agency within 30 days.

Violation Date : 2020-01-03

Citation : HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)

Description : Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.

Notes : Returned to compliance on 02/06/2020. The facility failed to perform a 5 year review of the SPCC plan. Corrective action: Perform the 5 year review of the SPCC plan. After review of the plan re certify the plan. If technical amendments are required document them in the log and implement them. Send documentation of the 5 year review long to this Agency within 60 days.

EPA ID: N/R

AST - CA ***(cont.)***

Description :

Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Notes : Returned to compliance on 01/28/2020. The waste oil was observed to be accumulating on site for greater than 180 days. Corrective action: Contact a registered hazardous waste hauler and have the waste oil removed. Within 60 days provide documentation, the hazardous waste manifest, of the waste removal to this Agency.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violation Date :	2018-10-11
Citation :	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Description :	Failure to maintain a complete copy of the SPCC Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended.
Notes :	Returned to compliance on 10/12/2018. Failure to maintain SPCC plan onsite (applies if facility is manned at least four (4) hours per day). SPCC plan is not maintained onsite. CORRECTIVE ACTION: Maintain SPCC plan onsite (If facility staffed 4 hrs/day)

Citation : HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)

Description : Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.

Notes : Returned to compliance on 10/12/2018. The plan was not available on-site for confirmation. Failure to perform and/or document the five-year review of the SPCC plan. During the last inspection the plan was noted as dated 4/29/13 and would have been due for updates by 4/29/18. CORRECTIVE ACTION: Complete and document the 5 year review and submit verification of proper completion.

AST - CA ***(cont.)***

Description :

Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.

Notes :

Returned to compliance on 05/17/2016. Please conduct periodic inspections of the aboveground petroleum storage tanks as described in the SPCC plan. Submit a completed inspection log or other documentation that the inspections are being conducted to this Agency within 30 days. Per Mr. Moran, he conducts a full facility safety walk at the beginning of each day, including the diesel and oil storage areas. However, there were no checklists or log sheets showing that the tanks, drums and secondary containment areas have been inspected.

Source Description

Source Description :	The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Source Description :	RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report. TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description
Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Violations

Violation Date : 2015-12-23

Citation : HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Description :

Failure to comply with all of the following requirements: 1. Failure to conduct inspections and tests in accordance with written procedures that you or a certifying engineer have developed for the facility. 2. Failure to sign written procedures and/or a record of inspections and/or customary business records by the appropriate supervisor or inspector. 3. Failure to keep written procedures and/or a record of inspections and/or customary business records with the plan. AND 4. Failure to maintain written procedures and/or a record of inspections and/or customary business records for three years.

Notes : Returned to compliance on 05/24/2017. Please conduct periodic inspections of the aboveground petroleum storage tanks as described in the SPCC plan. Submit a completed inspection log or other documentation that the inspections are being conducted to this Agency within 30 days.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
