Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
Source Description :	The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities. EPS The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Source Description :	RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report. TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 352 - Other organic solids, 0.20000 tons to AZR000520304
2019: 291 - Latex waste, 0.35000 tons to AZR000520304
2019: 221 - Waste oil and mixed oil, 0.00000 tons to CAT080013352
2019: 343 - Unspecified organic liquid mixture, 0.20000 tons to AZR000520304
2018: 221 - Waste oil and mixed oil, 0.00000 tons to CAT080013352
2018: 352 - Other organic solids, 0.10000 tons to AZR000520304
2018: 291 - Latex waste, 0.07500 tons to AZR000520304
2018: 343 - Unspecified organic liquid mixture, 1.12500 tons to AZR000520304
2017: 291 - Latex waste, 0.8 tons to AZR000501510
2017: 221 - Waste oil and mixed oil, 3.819 tons to CAT080013352
2017: 343 - Unspecified organic liquid mixture, 0.48 tons to AZR000501510
2017: 352 - Other organic solids, 0.1 tons to AZR000501510
2016: 352 - Other organic solids, 0.1 tons to AZR000501510
2016: 221 - Waste oil and mixed oil, 0.817 tons to CAT080013352
2016: 221 - Waste oil and mixed oil, 4.522 tons to CAD099452708
2016: 343 - Unspecified organic liquid mixture, 0.45 tons to AZR000501510
2015: 281 - Adhesives, 0.15 tons to AZR000501510
2015: 343 - Unspecified organic liquid mixture, 1.7 tons to AZR000501510
2015: 221 - Waste oil and mixed oil, 6.365 tons to CAD099452708
2015: 134 - Aqueous solution with total organic residues less than 10 percent, 0.147 tons to CAD099452708
2015: 291 - Latex waste, 0.6 tons to AZR000501510
2015: 352 - Other organic solids, 0.25 tons to AZR000501510
2014: 221 - Waste oil and mixed oil, 3.211 tons to CAD099452708

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Waste Activity Monitoring

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Report Cycle :	2021
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	ARSENIC
Primary NAICS :	325412 - Pharmaceutical Preparation Manufacturing
Source Code :	G11 - Discarding off-specification, out-of-date, and/or unused chemicals or products
Form Code :	W004 - Lab packs from any source containing acute hazardous waste
Management Method :	H040 - Incineration - thermal destruction other than use as a fuel (includes any preparation prior to burning)
Generation Tons :	0.0075
Managed Tons :	0
Shipped Tons :	0.0075
Received Tons :	0
Receiver ID :	IND093219012
Receiver State :	IN
Shipper ID :	CAD073606279
Shipper State :	CA
Waste Minimization :	X - No waste minimization efforts were implemented for this waste
Waste Code List :	P012
Waste Code Group :	P012 - ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE
Waste Generation Type :	N/R

Report Cycle :	2021
Hazardous Waste Page Number :	10
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	SILVER CHLORIDE
Primary NAICS :	325412 - Pharmaceutical Preparation Manufacturing
Source Code :	G22 - Laboratory analytical wastes (used chemicals from laboratory operations)
Form Code :	W409 - Other organic solids (specify in comments)

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

(E-GGRT, accessible through an EPA web page, is used to submit annual reports in support of the EPA rule for mandatory reporting of greenhouse gases (GHG) by large GHG emissions sources. Implementation of 40 CFR part 98 is referred to as the greenhouse gas reporting program (GHGRP). This comprehensive, nationwide emissions data will provide a better understanding of the sources of GHGs and will guide development of the policies and programs to reduce emissions. The publically available data will allow reporters to track their own emissions, compare them to similar facilities, and aid in identifying cost effective opportunities to reduce emissions in the future.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Hazardous Waste Summary

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Waste Code / Name : 132 - Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)
134 - Aqueous solution with <10% total organic residues
135 - Unspecified aqueous solution
141 - Off-specification, aged, or surplus inorganics
181 - Other inorganic solid waste
221 - Waste oil and mixed oil
311 - Pharmaceutical waste
331 - Off-specification, aged, or surplus organics
352 - Other organic solids
551 - Laboratory waste chemicals

Description :

Failure of owner or operator of a stationary source whose employees will not respond to accidental releases of regulated substances to meet the following: 1. For stationary sources with any regulated toxic substances held in a process above the threshold quantity, the stationary source is included in the community emergency response plan developed under Section 11003 of Title 42 of the United States Code (USC), is included in the city or county Hazardous Materials Area plans, and/or is included in the business plan program, pursuant to Section 25507 of the Health & Safety Code. The owner or operator must document that response actions have been coordinated with the local fire department and hazardous materials response agencies; 2. For stationary sources with only regulated flammable substances held in a process above the threshold quantity, the owner or operator must document that response actions have been coordinated with the local fire department and hazardous materials response agencies; and, 3. Appropriate mechanisms and written procedures are in place to notify emergency responders when there is a need for a response.

Notes :

Returned to compliance on 06/18/2020. OBSERVATION: The owner/operator of a facility that does not respond to accidental releases of regulated substances failed to meet the following: the owner/operator failed to document that response actions have been coordinated with the local fire department and hazardous materials response agencies. CORRECTIVE ACTION: Documentation was submitted to the CUPA demonstrating the owner/operator has met the requirements noted above. Please do this on an annual basis in order to be in compliance.

Violation Date : 2019-11-05

Citation : HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Description : Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Notes :

Returned to compliance on 01/13/2020. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. CORRECTIVE ACTION: Within 30 days, complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Date :	2019-11-05
Citation :	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Description :	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Notes :	Returned to compliance on 11/05/2019. OBSERVATION: The waste oil/water drum was observed during the inspection to have been open. This was corrected on-site during the inspection and the drum was properly closed.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
Source Description :	(E-GGRT, accessible through an EPA web page, is used to submit annual reports in support of the EPA rule for mandatory reporting of greenhouse gases (GHG) by large GHG emissions sources. Implementation of 40 CFR part 98 is referred to as the greenhouse gas reporting program (GHGRP). This comprehensive, nationwide emissions data will provide a better understanding of the sources of GHGs and will guide development of the policies and programs to reduce emissions. The publically available data will allow reporters to track their own emissions, compare them to similar facilities, and aid in identifying cost effective opportunities to reduce emissions in the future. The EGRID contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

Source Description :

The Energy Information Administration (EIA) is an independent agency within U.S. Department of Energy that develops surveys, collects energy data, and analyzes and models energy issues. The EIA-860 database supports the annual electric generator report and contains electric utility and non-utility (including independent power producers, combined heat and power producers, and other industrials) generator-specific plant data, including county and state location and ownership information.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
EPS
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
OSHA-OIS

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Site Details

Status Date : 2011-03-11
Status : Open - Remediation
Begin Date : 1991-03-15
Global ID : DOD100391700

Site History :

This site was apart of the culvert system that collected surface water runoff from most of the northwestern portion of MCAS Tustin. 1991 ? 1993, Site Inspection ? sediment soil and groundwater samples were analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. 1995 ? 1997, Remedial Investigation ? sediment and surface samples were analyzed for VOCs, SVOCs, TPH and metals. In 1996, trichloroethylene was detected in one groundwater sample at 6 micrograms/liter (µg/L). No chemicals of concern were detected in the soil samples. In 2003, a shallow groundwater investigation was

conducted to update the human health risk assessment. Analytical results indicated groundwater concentrations of trichloroethene (TCE) approaching 170 µg/L. 2005 ? 2006, basewide groundwater monitoring was completed to evaluate dissolved-phase VOCs and potential groundwater migration. Monitoring indicated a dissolved-phase plume approximately 920 feet long in a north-south direction and 250 feet wide in an east-west direction. In 2007, a microcosm study was performed to assess whether TCE could serve as a terminal acceptor and undergo reductive dechlorination through respiration by naturally occurring anaerobic bacteria. Replacement monitoring wells were installed and sampled. TCE was reported in three of the four wells at concentrations of 14 to 89 µg/L. Aquifer testing was conducted to further characterize aquifer hydraulic properties. In 2008, Feasibility Study ? was performed to address VOCs in groundwater at concentrations exceeding remediation goals and to develop and evaluated remedial alternatives. In 2009, the Proposed Plan was published to invite public comment on the proposed cleanup plan for contaminated groundwater. January 15, 2010, Final Record of Decision for Operable Unit 4B ? presents the selected remedy of groundwater and documents no further action for soil. In situ bioremediation and monitored natural attenuation were the selected remedies.

RB Case Number :	16581 -- 18
Potential Contaminants of Concern :	* Chlorinated Hydrocarbons, Trichloroethylene (TCE)
Potential Media of Affected :	Other Groundwater (uses other than drinking water), Soil
Local Agency :	DEPARTMENT OF TOXIC SUBSTANCES CONTROL
Loc Case Number :	30970002
Lead Agency :	SANTA ANA RWQCB (REGION 8)
File Location :	Regional Board

Site History :

This site was apart of the culvert system that collected surface water runoff from most of the northwestern portion of MCAS Tustin. 1991 - 1993, Site Inspection - sediment soil and groundwater samples were analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. 1995 - 1997, Remedial Investigation - sediment and surface samples were analyzed for VOCs, SVOCs, TPH and metals. In 1996, trichloroethylene was detected in one groundwater sample at 6 micrograms/liter (µg/L). No chemicals of concern were detected in the soil samples. In 2003, a shallow groundwater investigation was conducted to update the human health risk assessment. Analytical results indicated groundwater concentrations of trichloroethene (TCE) approaching 170 µg/L. 2005 - 2006, basewide groundwater monitoring was completed to evaluate dissolved-phase VOCs and potential groundwater migration. Monitoring indicated a dissolved-phase plume approximately 920 feet long in a north-south direction and 250 feet wide in an east-west direction. In 2007, a microcosm study was performed to assess whether TCE could serve as a terminal acceptor and undergo reductive dechlorination through respiration by naturally occurring anaerobic bacteria. Replacement monitoring wells were installed and sampled. TCE was reported in three of the four wells at concentrations of 14 to 89 µg/L. Aquifer testing was conducted to further characterize aquifer hydraulic properties. In 2008, Feasibility Study - was performed to address VOCs in groundwater at concentrations exceeding remediation goals and to develop and evaluated remedial alternatives. In 2009, the Proposed Plan was published to invite public comment on the proposed cleanup plan for contaminated groundwater. January 15, 2010, Final Record of Decision for Operable Unit 4B - presents the selected remedy of groundwater and documents no further action for soil. In situ bioremediation and monitored natural attenuation were the selected remedies. 2010 - Pilot study completed for in situ bioremediation February 2013 A mixture of emulsified vegetable and extracted groundwater was injected into the 1st water bearing zone (Interim-Remedial Action Completion Report, June 12, 2014) December 2019 Groundwater monitoring event. TCE concentrations ranged from 0.16 to 32 microgram/liter. 2020 Work Plan for injection of additional substrate received.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Site History :

Soil and groundwater assessments were conducted at the site to evaluate whether lead from munitions usage have impacted the site. The site is in the locations of a former duck pond area associated with nearby gun clubs. VOCs were detected during previous investigation at the site. Since VOCs contamination is localized and limited, Regional Board staff recommended the installlation of a sub-slab depressurization system prior to redevelopment in order to protect human health of any of the occupants. The Site has been redeveloped was the responsible party was issued a no further action letter on June 25, 2019.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Waste Generator Details

State Waste :

2019: 221 - Waste oil and mixed oil, 0.02500 tons to CAD008302903
2019: 331 - Off-specification, aged or surplus organics, 1.40000 tons to CAD008302903
2019: 223 - Unspecified oil-containing waste, 0.40000 tons to CAD008302903
2019: 792 - Liquids with pH <= 2 with metals, 0.10000 tons to CAD008302903
2017: 221 - Waste oil and mixed oil, 0.075 tons to CAD008302903
2017: 241 - Tank bottom waste, 0.2919 tons to CAT080013352
2017: 223 - Unspecified oil-containing waste, 0.425 tons to CAD008302903
2016: 223 - Unspecified oil-containing waste, 0.52 tons to CAD008302903
2015: 221 - Waste oil and mixed oil, 0.38 tons to CAD099452708
2013: 223 - Unspecified oil-containing waste, 6.672 tons to CAT080013352
2010: 352 - Other organic solids, 0.04 tons to UTD991301748
2010: 241 - Tank bottom waste, 0.2085 tons to CAT080013352
2008: 223 - Unspecified oil-containing waste, 0.4 tons to CAD008302903
2008: 221 - Waste oil and mixed oil, 0.38 tons to CAT080013352
2008: 331 - Off-specification, aged or surplus organics, 0.6 tons to CAD008302903
2008: 134 - Aqueous solution with total organic residues less than 10 percent, 6.006 tons to CAT080013352
2007: 151 - Asbestos containing waste, 0.0275 tons to CAD008302903
2006: 135 - Unspecified aqueous solution, 0.01 tons to AZD009015389
2002: 221 - Waste oil and mixed oil, 0.19 tons to CAT080013352
2001: 221 - Waste oil and mixed oil, 0.304 tons to CAT080013352
1998: 221 - Waste oil and mixed oil, 0.627 tons to CAD981696420

Violation Date :	2019-05-09
Citation :	HSC 6.7 25290.1(c)(3),25290.2(c)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c)(3),25290.2(c)(3)
Description :	Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003.
Notes :	Returned to compliance on 05/09/2019. OBSERVATION: Liquid was observed in the piping sump. If water could enter into the secondary containment by precipitation or infiltration, it must be removed and disposed of properly. During the inspection this was immediately removed and managed accordingly. Ensure that the sump is maintained free of liquid.

Violation Date : 2019-05-09

Citation : 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)

Description : Failure of the leak detection equipment to have an audible and visual alarm as required.

Notes :

Returned to compliance on 05/09/2019. OBSERVATION: The sump sensor L2 failed to clear after activating an audible and visual alarm when tested to ensure continuous monitoring of the tank system. All monitoring equipment shall be maintained to activate an audible and visual alarm or stop the flow of product at the dispenser when it detects a leak. The sensor was replaced and retested during the inspection.

Source Description
Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Violation Date :	2020-03-18
Citation :	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)

Description :

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Description :

"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Notes :

OBSERVATION: Owner/Operator failed to meet one or more of the following spill container requirements: install or maintain spill container which is liquid-tight, has a minimum capacity of five gallons, has a functional drain valve or other method for the removal of liquid from the spill container, and is resistant to galvanic corrosion; did not perform tightness test at installation, every 12 months thereafter, or within 30 days after a repair; did not have tested using manufacturer's guidelines, industry codes, engineering standards, or method approved by PE, or was not tested by a certified UST service technician; or failed to maintain testing records for 36 months. Observed spill bucket that did not hold 5 gallons for the unleaded gasoline tank. CORRECTIVE ACTION: Install or repair spill buckets to meet all of the listed requirements, have tightness tested using approved method, by certified UST service technician, and submit documentation to verfiy compliance. Citation : 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Description :

Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Notes :

Returned to compliance on 05/24/2022. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. CORRECTIVE ACTION: Ensure each UST has a functional overfill prevention independent of the other USTs at the facility (i.e.,installing a separate alarm unit or other appropriate OPE equipment for each tank). Replacement and/or the installation of new OPE equipment will require the facility to submit a plan check to this Agency. Plan check fees and the Facility Modification Application can be found at www.occupainfo.com

Citation : 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)

Description :

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Description :

RP states that a hose on a bypass broke due to peak pumping pressure resulting in the release of 6800 gallons of waste water onto the facility property and onto the dirt near San Diego Creek. The release is contained and cleanup is complete. Caller states 5600 gallons of the released on the property and 1200 gallons of the release impacted dirt next to the creek. No waterways have been impacted. Caller states the entire release and impacted dirt has been recovered.

Reg Measure Type :	Enrollee - NPDES
Reg Measure Title :	Enrollee - R8 & R9 NPDES 2014-0194-DWQ Irvine Ranch Water DistrictDrinking Water System Discharges

Reg Measure Description :

The Statewide Drinking Water Systems Discharge Permit provides Clean Water Act regulatory coverage for: (1) discharges resulting from essential operations and maintenance activities of drinking water systems undertaken to comply with the federal Safe Drinking Water Act, California Health and Safety Code, and State Water Board's Division of Drinking Water permitting requirements; and (2) emergency discharges. The Irvine Ranch Water Disrict (District) Water System is a community drinking water system with 103,509 connections that serves a population of approximately 380,000 in the City of Irvine, and parts of the City of Lake Forest and the community of Newport Coast, in Orange County. The sources of water for the system are local groundwater from the Orange County Basin and the Irvine and Lake Forest sub-basins, and purchased treated water from the Metropolitan Water District of Southern California and the East Orange County Water District.

Source Description
Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
EPS

Source Description : ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
The RMP database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Hazardous Waste Summary

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Waste Code / Name :
331 - Off-specification, aged, or surplus organics
461 - Degreasing sludge
551 - Laboratory waste chemicals
791 - Liquids with pH < 2
D001 - IGNITABLE WASTE
D002 - CORROSIVE WASTE
D007 - CHROMIUM
D009 - MERCURY
D011 - SILVER
D035 - METHYL ETHYL KETONE

Agency :	Irvine Ranch Water District
Collection System :	Michelson WRP CS
Overall Spill Description :	Other (specify below);Bypass hose failure caused 6800 gallons of sewage to spill from Other (specify);Bypass hose at MWRP South Sewer Bypass to Unpaved surface;Other (specify below);5600 gollans was contained within the boundaries of the Michelson Water Recycling Plant. No surface water body affected.
Spill Cause :	Other (specify below)
Spill Cause Explaination :	Bypass hose failure
Where Failure Occur :	Other (specify below)
Where Failure Occur Explaination :	End of the bypassed hose
Agency Notification Date :	2013.08.21 10.39.00

Operator Approval Date :	2013.08.21 10.32.00
Estimated End Date :	2013.08.21 12.35.00
Response Activities :	Cleaned-up (mitigated effects of spill);Contained all or portion of spill; Restored flow;Returned all or portion of spill to sanitary sewer system; Other (specify below)
Response Activities Explanation :	Mitigated and removed contaminated soil.
Response Complete Date :	2013.08.21 14.30.00
Appearance Point :	Other (specify)
Appearance Point Explanation :	Bypass hose
Reach Surface :	No
Reach Surface Drainpipe :	No
Return to SSS :	Not Applicable - Spill did not reach a separate storm drainpipe
Private Lateral Spill :	No
Final Spill Destination :	Unpaved surface;Other (specify below)
Final Spill Destination Explanation :	5600 gollans was contained within the boundaries of the Michelson Water Recycling Plant

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Site Details

Status Date :	2009-03-20
Status :	Completed - Case Closed
Begin Date :	2005-09-09
Global ID :	SL0605928683
Region :	REGION 8

Site History :

The District at Tustin Legacy retail shopping development consists of approximately 110 acres, which were once a part of the Marine Corps Air Station (MCAS) Tustin's property. The Marines ceased operations at the MCAS Tustin in July 1999. The Navy is still conducting activities to remediate groundwater contamination in several areas of the former MCAS Tustin property. Portions of The District overlie two of the Navy's Installation Restoration Program (IRP) sites, IRP-5S(a) and IRP-6. Tarmac Area In 2005, during demolition of pavement, a hydrocarbon odor was noticed in the soil and three stained areas were observed. Soil samples were collected from the three stained areas at the surface and below the surface at each location. A total of six samples were analyzed for jet fuel, total petroleum hydrocarbons (motor oil range), and metals. Motor oil and jet fuel were detected at a maximum of 150 milligrams/kilogram (mg/kg) and 1,700 mg/kg, respectively. The following chemicals were detected in two of the surface samples: tert-butybenzene, 1,2,4-trimethylbenzene, p-isopropyltoluene, naphthalene, toluene and xylene. The soil was excavated and confirmation soil samples were collected. The analytical results of the confirmation soil samples showed only low concentrations of petroleum hydrocarbons, which did not pose a significant threat to water quality. On June 27, 2006, RWQCB-8 sent a letter stating that we would not require any further remediation at the Tarmac area. Former Vault Area Oil-stained soil was observed during removal of a vault near former MCAS Tustin Building 251. Soil samples were collected in September 2005 from three locations, between depths of 3 and 6 feet below the surface. The samples were analyzed for CAM 17 metals, polychlorinated biphenyls (PCBs), total recoverable petroleum hydrocarbons (TRPH), and total petroleum hydrocarbons (TPH). Petroleum hydrocarbons were detected in three of the soil samples, and ranged from 38 to 1,200 mg/kg. The impacted soil was excavated, and confirmation soil samples were collected from the bottom and the sidewalls of the excavation. The samples were analyzed for TPH, volatile organic compounds (VOCs), and CAM 17 metals. A grab groundwater sample was

also collected from the bottom of the excavation. The groundwater sample was analyzed for TPH and VOCs. Petroleum hydrocarbons and VOCs were not detected in the soil samples or the water sample. On October 30, 2006, RWQCB -8 sent an email to the contactor stating that we would not be requiring any further excavation and sampling at the Vault Area. Box Culvert Installation A trench was excavated and a box culvert was installed along Warner Avenue, between Park Avenue and Tustin Ranch Road. This project was constructed in the area overlying a portion of the trichloroethylene (TCE) groundwater plume, emanating from former MCAS Tustin site IRP-5S(a). The excavated soils were stockpiled, and soil samples were collected. The samples were analyzed for VOCs. There were no VOCs detected in the soil samples, and our staff gave approval (via email) for onsite reuse of the excavated soil. Construction of Park Avenue, Installation of Underground Utilities, and the Costco Gas Station within and outside of Navy property Underground utilities were installed along Park Avenue, which was built through the Navy's property known as CO-2, and across the former MCAS Tustin's IRP Site 6. The groundwater beneath IRP-6 contains 1,1-dichloroethene (1,1-DCE) and TCE. In addition, a sewer line was installed north of Park Avenue within CO-2. The Costco Gas Station construction included excavation for the installation of underground storage tanks, pipelines and other utilities. At each of these project sites, the excavated soil was stockpiled, and soil samples were collected and submitted for analysis of VOCs. There were no VOCs detected in the soil samples.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Facility Address : Tustin Ranch Road, Tustin, CA 92710
County : Orange

Site Details
Status Date : 2008-01-02
Status : Open - Remediation
Begin Date : 1995-07-06
Global ID : DOD100391500

Site History :

Installation Restoration Program (IRP) Site 3 was located in the central portion of the Former MCAS Tusitn, north of Hangar Building 29 (Hangar 2). IRP-3 occupies 1.4 acres and encompasses building formerly used for chemical storage and painting operation that began in 1967. Site 3 also includes a former underground storage tank site as well as 8 Areas of Concern. Available information suggests that approximately 3,750 gallons of liquid wastes were release directly onto the ground outside storage and painting operation buildings. These waste included solvents, paint strippers, and battery acids. Washwater use to remove waste material form paint-stripping dip tank was also reported released directly onto the ground. Site 3 was identified as a potential location of hazardous substance release during the 1983-1984 Initial Assessment Study. A Site Inspection was conducted from 1990 through 1993 to confirm contaminate release at potential release locations. In 1994 through 1995 an expanded site characterization which included installation groundwater monitoring wells was completed. A Remedial Investigation was conducted from 1995 through 1997 to determine the nature and extend of contamination at IRP sites, including Site 3. Site 3 was placed into Operable Unit 1B. Based on the Remedial Investigation the most commonly and widespread contaminant detected in soil and groundwater was tricholoethene (TCE). TCE contamination was attributed to sources such as historical sauce spill and past waste disposal activities as well as inactive oil/water separators. Several other common solvents and or breakdown products of TCE were identified in site soils. TCE and three of its degradation products were identified as the primary contaminants of concern for groundwater The Final Record of Decision for Operable (OU) Unit 1B, dated October 2004 selected hot spot removal and off-site disposal for contaminated soil, extraction and treatment for contaminated groundwater, and institutional controls. From July 28 through October 13, 2005, 2,241 cubic yards of solvent-contaminated soil was excavated and transported off-site for disposal. The groundwater remediation system for OU-1A/-1B consist of groundwater extraction well, groundwater conveyance system, groundwater treatment systems, treated effluent discharge systems, and a groundwater monitoring network. Site 3 has 6 extraction wells completed in the first water bearing zone (WBZ), 2 extraction wells completed in the second WBZ, 2 extraction wells completed as "hot spot" wells, and wells completed for hydraulic control. Primary extracted groundwater treatment utilizes activated carbon absorption. The effluent discharge is to sanitary sewer system. The remedial system started operation on July 23, 2005.

Site Details

Status Date : 2010-03-10
Status : Completed - Case Closed
Begin Date : 1993-08-12
Global ID : T0605982787

Site History :

Former underground storage tank (UST) Site 29A includes the area of soil and groundwater impacted by former UST 29A, a 7000-gallon steel UST, that contained diesel fuel and other petroleum products from the time of installation in 1942 until removal on August 12, 1993. The UST removal was conducted under oversight of the Orange County Health Care Agency. The former UST Site was located approximately 15 feet west of Building 29A and north of former Johnson Street within the footprint of Installation Restoration Program Site 3, a solvent release site. Building 29A previously housed the helium purification system for airships docked in hangar Building 29 which is located on the south side of the former Johnson Street. Site Assessment Initial site assessment, conducted in 1996, consisted of a single hand-augured boring located immediately north of the former UST. Total petroleum hydrocarbons (TPH) were reported at concentrations up to 3,720 milligrams (mg) per kilogram (kg) in a sample collected at a depth of seven feet. In 2000, additional soil samples were collected from hand-augured borings in the location of the former UST. The samples were analyzed for TPH by EPA method 8015M and for volatile organic

compounds (VOCs) by EPA method 8260B. The maximum reported concentration of TPH-diesel was 30,000 mg/kg and of TPH-gasoline was 2,900 mg/kg. VOCs were not detected at or above their reporting limits. It should be noted in the samples with higher TPH concentrations the reporting limits for VOCs were also higher. Remedial Action From July to August 2004, petroleum-impacted soils were excavated from a 30 foot long by 30 foot wide by four to 18 foot deep area. The soils were separated into "overburden" and "impacted" stockpiles base on photoionization detector measurements, discoloration, and odor. One thousand and thirty-three tons of impacted soils were transported as non-hazardous waste to Thermal Remediation Solutions in Azusa for disposal or recycling. Eighteen thousand gallons of groundwater were pumped from the excavation to a temporary storage tank. This water was later transported to the former Petroleum Corrective Action Plan groundwater treatment system operating at UST Site 222 for treatment and disposal. Twenty confirmation soil samples were collected from the completed excavation. Five confirmation sample analytical results contained TPH-diesel concentrations up to a maximum of 7,200 mg/kg. This impacted soil, represented by five samples, was left in place to depths of nine feet in an isolated area adjacent to the west and south walls of Building 29A. At the time of the excavation, Building 29A was a protected historical structure. All remaining confirmation samples' analytical results were below the TPH cleanup goal and at or below the reporting limits for VOCs. In November 2006, soil samples were collected from two slant borings adjacent to the west and south walls of Building 29A. Two shallow groundwater samples were collected from two vertical borings drilled in the former excavation backfill area. All four borings were completed with a direct-push drill method. Soil samples were collected at 7, 12, and 15 feet below ground surface (bgs). Groundwater samples were collected from between 12 and 14 feet bgs. Slant boring soils were screened for VOCs by headspace analysis using a photoionization detector in addition to the collection of six discreet samples. Low estimated concentrations of TPH-diesel were detected in the 12 and 15 foot soil samples. A maximum TPH-diesel concentration of 1,300 mg/kg was detected from a seven foot sample. Groundwater analytical results indicated maximum concentrations in micrograms per liter of: vinyl chloride - 20; cis-1,2 dichloroethylene - 13; acetone - 7.2 J; trichloroethylene - 3.3; and TPH-diesel - 1.5. The diesel impact is a contaminant from the UST release site. The other volatile organic compounds are most likely contaminants from the surrounding Installation Restoration Program solvent release Site 3 in which trichloroethylene is a principle contaminant. Base on the soil analytical results from the slant borings, significant petroleum hydrocarbon contamination was not believed to extend underneath the foundation of Building 29A. In 2009, the City of Tustin completed mitigation measures to remove the historical status for Building 29A. On November 16 to 18, 2009, a total of 94.36 tons of soil impacted with TPH-diesel was excavated up to depths of 10 feet bgs adjacent to the west and south walls of Building 29A. The impacted soil was transported to TPST Soil Recyclers in Adelanto, California as non-hazardous waste. Nine confirmation soil samples were collected from the sidewalls and floor following excavation. The maximum concentration of TPH-diesel detected was 280 mg/kg. All other analyte concentrations were at or not detected above the analyte reporting limits. It should be noted that the area represented by the slant boring maximum concentration of 1,300 mg/kg TPH-diesel was removed during this excavation. Closure of UST Site 29A is recommended based on the removal of the significant mass of petroleum hydrocarbon contaminants. This site is no longer believed to be a threat to underlying groundwater quality, beneficial uses, and the environment.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Waste Activity Monitoring

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Report Cycle :	2005
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	WASTE ISOPROPYL ALCOHOL
Primary NAICS :	334412 - Bare Printed Circuit Board Manufacturing
Source Code :	G09 - Other production or service-related processes from which the waste is a direct outflow or result (specify in comments)
Form Code :	W203 - Concentrated non-halogenated (e.g., non-chlorinated) solvent
Management Method :	H020 - Solvents recovery (distillation, extraction, etc)
Generation Tons :	0.263609
Managed Tons :	0
Shipped Tons :	0.263609
Received Tons :	0
Receiver ID :	CAD008302903
Receiver State :	CA
Shipper ID :	CAD076071737
Shipper State :	CA
Waste Minimization :	N/R
Waste Code List :	D001
Waste Code Group :	D001 - IGNITABLE WASTE
Waste Generation Type :	N/R

Report Cycle :	2005
Hazardous Waste Page Number :	10
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	RQ HAZARDOUS WASTE LIQUID
Primary NAICS :	334412 - Bare Printed Circuit Board Manufacturing
Source Code :	G09 - Other production or service-related processes from which the waste is a direct outflow or result (specify in comments)
Form Code :	W219 - Other organic liquid (specify in comments)
Management Method :	H020 - Solvents recovery (distillation, extraction, etc)
Generation Tons :	0.0644272
Managed Tons :	0
Shipped Tons :	0.0644272
Received Tons :	0
Receiver ID :	AZD081705402
Receiver State :	AZ

Source Description
Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Completed Activities

Completed Date :	2001-05-07
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	* Delisting Document

Comments :

DLIST - SITE 3 (GREASE RACK): The purpose of the decision document is to present the selected action for the Site 3 - grease rack in accordance with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). It has been determined that the selected remedy of No Further Action (NFA) is protective of human health and the environment. The decision document describes the selected action based on the results of the Preliminary Assessment (PA) and other subsequent investigations conducted under the Installation Restoration Program (IRP). DTSC concurred with the decision document's NFA recommendation in a letter dated April 2, 2001. DTSC's agreement to remove this site from the IRP list does not represent certification or validation that the entire facility does not have any hazardous substance releases. Should DTSC become aware of potential hazardous substance releases, it will initiate appropriate action to correct the problem.

Envirosite ID: 233660
EPA ID: N/R

ENVIROSTOR - CA ***(cont.)***

Document Type : Preliminary Endangerment Assessment Report

Comments :

PEA - GREASE RACK: The purpose of the Preliminary Assessment (PA) was to collect information concerning potential contamination from the Grease Rack sufficient to assess the threat posed to human health and the environment and to determine the need for appropriate action. Soil sampling was performed at this location and the results did not indicate any contamination of the soil above remediation goals. Based on the findings of the PA, the department concurred with the No Further Action recommendation in the report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Site Details

Status Date : 1994-11-01
Status : Open - Verification Monitoring
Begin Date : 1983-02-09
Global ID : SLT8R2644160

Site History :

Moffett Trenches and Crash Crew Burn Pits Site, also known as Installation Restoration Program Site 1, Operable Unit 3 and Area of Concern MCD-01 and DLF-01. The site is located in the northeastern corner of former MCAS Tustin along the western bank of Peters Canyon Channel. Jamboree Road transverses from north to south, its road base covers most of the site. The landfill trenches reportedly contain approximately 5,000 cubic yards (cy) of waste material. These disposal trenches were used from the 1940s until about 1971. The burn pits were used to burn flammable liquids for fire-fighting training exercises from 1971 until 1983. The trenches are suspected of containing a mixture of municipal solid waste and industrial waste. An estimate of from 25,000 to 350,000 gallons of liquid wasted was disposed in the burn pits. Jet propellant grade 5 (JP-5), as well as oils, fuels, solvents, lacquers, primers and various chemicals were burned in the pits. In 1983, petroleum products were found to be seeping into Peters Canyon Channel. Response actions were taken to resolve this problem. Approximately 10,000 cy of contaminate soils were removed from the active Crash Crew Burn Pits with backfilling of 2,500 cy of fill material. A groundwater extraction well and recovery system was built and operated limitedly. In May 1985, a cleanup and abatement order was issued to the Navy for submission of a plan to cleanup soil and groundwater at the site. In 1986, an 805 foot long steel-reinforced concrete containment wall was constructed along Peters Canyon Channel. A plastic lined French drain was constructed parallel to the containment wall to collect groundwater flowing toward the wall. In 1987, two ï 1/2fishbone-styleï 1/2 French drains were constructed to collect contaminated groundwater from beneath the site. The original French drain was partially or entirely grouted because it was believed to provide a connection between the first and second water bearing zones at the site. In 1988, Jamboree Road was built over most of the site. From 1989 to 1992, groundwater was extracted from the French drain system periodically. Groundwater monitoring was conducted from 1989 to 1991. From 1995 to 1996, a Remedial Investigation is completed at the site. In July 1996 the Remedial Investigation/Feasibility Study report is issued. The media affected was groundwater, soil, and surface water. The soil contaminants of concern are: benzene, ethylbenzene, total xylenes, arsenic, beryllium, chromium, molybdenum, vanadium, benzo(b)fluoranthene, 1,1-dichloroethane, naphthalene, trichloroethene, toluene, silver, chrysene, fluoranthene, phenanthrene, acenaphthene, benzo(a)anthracene, 1,2-dichloroethane, 1,1-dichloroethene, 2-butanone and benzo(g,h,i)perylene. Groundwater contaminants of concern are: barium, manganese, molybdenum, zinc, JP-5, 1,1-dichloroethane, 2-methylnaphthalene, benzene, pyrene, phenol, pentachlorophenol, trichloroethene, 2-hexanone, 1,2-dichlorobenzene, 1,1-dichloroethene. In January and December of 2000, landfill gas probes were installed at the site. In December 2001, a Record of Decision/Remedial Action Plan for Operable Unit 3 is issued. The selected remedy contains the following 5 components: 1) institutional controls or land-use controls; 2) continued containment of groundwater through inspection and maintenance of the containment wall; 3) groundwater and surface water monitoring; 4) landfill gas monitoring; and 5) the integrity and accessibility of the French drain system and associate sumps will be maintained. Landfill gas monitoring wells were destroyed in July 2014. Methane gas was not detected during any of the monitoring events. July 2017 Per- and polyfluoroalkyl substances (PFAS) were detected in the groundwater. Groundwater samples were collected from 3 groundwater monitoring wells screened in the 1st water bearing zone. The concentrations of PFOA detected were 397 ng/L, 6,840ng/L, 743,000 ng/L and the concentrations of PFOS were 26.3 ng/L, 1,160 ng/L, 26,900 ng/L. 2020 - Peters Canyon Wash was regraded and lined with concrete. 6/2020 - Concentrations of PFOA, PFOS, and PFBS detected at 1,010, 41.9, and 83.6 micrograms/liter in groundwater.

Source Description

Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 331 - Off-specification, aged or surplus organics, 1.28550 tons to CAD008364432
2019: 213 - Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.), 0.10450 tons to NVD980895338
2019: 561 - Detergent waste chemicals, 4.39700 tons to AZR000515924
2019: 122 - Alkaline solution without metals pH >= 12.5, 2.56200 tons to CAD008364432
2019: 791 - Liquids with pH <= 2, 0.00250 tons to NVD980895338
2019: 213 - Hydrocarbon solvents (benzene, hexane, Stoddard, Etc.), 0.11200 tons to CAD008364432
2019: 122 - Alkaline solution without metals pH >= 12.5, 0.00550 tons to NVD980895338
2019: 122 - Alkaline solution without metals pH >= 12.5, 0.03850 tons to NVD980895338

DOT ID Number :	UN1993
DOT Information :	UN1993, Waste Flammable liquids, n.o.s. (Petroleum Distillates, Diesel Fuel), 3, PG II, ERG#128
Non Waste Description :	N/R
Quantity :	146 Pounds
Quantity Tons, Acute, Non-Acute :	0.073, 0, 0.073
Quantity Kg, Acute, Non-Acute :	0, 66.21319
Quantity Tons, Haz, Non-Haz :	0.073, 0
Quantity Kg, Haz, Non-Haz :	66.21319, 0
Management Method :	H141 - STORAGE, BULKING AND/OR TRANSFER OFF SITE
Is EPA Waste :	Y
Federal Code :	D001, D018
State Code :	CA - 213

Waste Line Number :	4
Is DOT Hazardous :	N
DOT ID Number :	N/R
DOT Information :	N/R
Non Waste Description :	Non-RCRA Hazardous Waste, Solid (RCRA Empty Containers),
Quantity :	2442 Pounds
Quantity Tons, Acute, Non-Acute :	1.221, 0, 1.221
Quantity Kg, Acute, Non-Acute :	0, 1107.4836
Quantity Tons, Haz, Non-Haz :	0, 1.221
Quantity Kg, Haz, Non-Haz :	0, 1107.4836
Management Method :	H141 - STORAGE, BULKING AND/OR TRANSFER OFF SITE
Is EPA Waste :	N
Federal Code :	N/R
State Code :	CA - 513

Hazardous Waste Summary

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Waste Code / Name :

122 - Alkaline solution without metals (pH > 12.5)
123 - Unspecified alkaline solution
131 - Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)
135 - Unspecified aqueous solution
141 - Off-specification, aged, or surplus inorganics
181 - Other inorganic solid waste
213 - Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)
214 - Unspecified solvent mixture
221 - Waste oil and mixed oil
223 - Unspecified oil-containing waste

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Description :

Accidental spill, caused the chemicals to be combined outside a controlled environment, resulting in cloud filling a 5,000 sq. ft. warehouse. Firefighters treated 10 people with minor injuries, basic sore throats, burning eyes and noses, some light headedness. Seven industrial buildings were evacuated, with an est. of 100 people evacuated. This is County Fire incident #010-56314. Basic activity is completed, with clean up expected to last for several more hours.

Preparer of Incident Report : N/R

Description of Events :

ART A SHIPLEY EMPLOYEE LOADED 2HM DRUMS UNDER THE INSTRUCTION OF TODD MOORE A CWX EMPLOYEE. HE LOADED THE 2 DR ON THE LEFT SIDE OF THE TRAILER ABOUT 2 FEET SHORT OF THE PALLET IN FRONT. AT THAT POINT TODD ASKED IF HE COULD PUSH THE TWO DRUMS UP A COUPLE OF FEET AND THEN EXITED THE TRAILER. AT THAT POINT TOOD NOTICE THAT THE DRUMS WERE LEAKING AND TODD FLIP THEM OVER TO STOP THE SPILL. SHIPLEYS HAZMAT TEAM COMPLETED THE HM CLEAN UP A COMPLETE IN HOUSE SITUATION. ONLY 1 DRUM LEAKED. NOTE* DRIVE SHOULD BE AWARE OF ANY AND ALL FLAWS IN TRAILER THE DRUMS GOT HUNG UP ON A RIVET ON THE FLOOR. SHOULD NEVER SLIDE ANY HM IN TRAILERS. ALSO THE RIVETS WERE TO SMALL TO NOTICE PER TODD MOORE HAZARDOUS WASTE MANIFEST FOR INCIDENT INVOLVING HAZARDOUS WASTER. THERE IS NOT ONE AT THE PRESENT TIME.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Description :

Per the caller they are missing the radiation source from an Honeywell Mesurex Scanner. The source is Krypton 85, 300MCI. Last seen Tuesday the 11th. They performed an inspection and the units had been decommissioned and in the process of disposing of it porperly it was disposed of improperly to a scrap metal facility. They visited the facility the next morning and found that it had already been shredded. They did not know how to report this incident until the manufacture came in today. The recycler was SA Recycling, 3200 E. Frontera Street, Anaheim, CA 92806.

Document Type :	Preliminary Endangerment Assessment Report
Comments :	PEA - EQUIV: A PEA equivalent was completed for this site and no further action is required.

Completed Date :	2002-02-06
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	Standard Voluntary Agreement
Comments :	N/R

Completed Date :	1996-09-05
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	Preliminary Assessment Report
Comments :	A Preliminary Assessment was completed under U.S. EPA grant. The Site does not qualify for further remedial assessment under CERCLA (Site Evaluation Accomplished). A PEA is recommended.

Completed Date :	1993-03-02
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	Site Screening
Comments :	N/R

Completed Date :	1992-12-21
Area Name :	PROJECT WIDE
Sub Area Name :	N/R
Document Type :	* Discovery
Comments :	Report was screened by Region 4 staff. Recommend PEARL be- cause of 5.0ppb and 7.0ppb of PCE and TCE respectively.

Source Description

Source Description :	The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI). DTSC EnviroStor is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
Source Description :	The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities. HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
Source Description :	RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :

2019: 221 - Waste oil and mixed oil, 0.00000 tons to CAT080013352
2019: 331 - Off-specification, aged or surplus organics, 0.01500 tons to CAD008252405
2019: 791 - Liquids with pH <= 2, 0.02085 tons to CAD008302903
2019: 331 - Off-specification, aged or surplus organics, 0.04950 tons to CAD008252405
2019: 551 - Laboratory waste chemicals, 0.22935 tons to NVT330010000
2019: 214 - Unspecified solvent mixture, 0.01800 tons to CAD008302903
2019: 352 - Other organic solids, 1.46281 tons to CAD008252405
2019: 343 - Unspecified organic liquid mixture, 5.42300 tons to CAT080013352
2019: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), 0.01650 tons to CAD008252405
2019: 331 - Off-specification, aged or surplus organics, 1.24900 tons to NVT330010000
2019: 352 - Other organic solids, 408.27600 tons to NVT330010000
2018: 343 - Unspecified organic liquid mixture, 5.04900 tons to CAT080013352
2018: 352 - Other organic solids, 0.23350 tons to CAD008252405
2018: 331 - Off-specification, aged or surplus organics, 0.93750 tons to NVT330010000
2018: 331 - Off-specification, aged or surplus organics, 0.11000 tons to CAD028409019
2018: 221 - Waste oil and mixed oil, 0.00000 tons to CAT080013352
2018: 331 - Off-specification, aged or surplus organics, 0.36750 tons to NVT330010000

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

FRS Environmental Interest

Site Details

Status Date :	2011-03-11
Status :	Open - Remediation
Begin Date :	1992-03-01
Global ID :	DOD100397500

Site History :

This site was apart of the culvert system that collected surface water runoff from most of the northwestern portion of MCAS Tustin. The Mingle Plumes Area Site is composed of five Areas of Concern: 1) DSS-01 ? collapsed sanitary sewer lines; 2) DSS-01 ? also a collapsed sanitary sewer lines; 3) MDA-02 ? a small area of observed staining surrounding the former station armory building; 4) MMS-05 ? Paint Stripper Disposal Area No. 2 was used as a paint shop; and 5) ST-67 ? a Former Hazardous Materials Storage Yard and the former location of Building 63/78 that were associated with the use, storage, and disposal of hazardous materials. 1995 ? 1996, Expanded Site assessment ? Soil and discrete groundwater samples were collected from the first water bearing zone and existing monitoring wells. A vadose zone fate and transport evaluation was performed. Screen human health risk analysis and risks related to the transport of chemicals of potential concern in soil to groundwater were evaluated. In 2003, a shallow groundwater investigation was conducted to update the human health risk assessment. Analytical results indicated groundwater concentrations of trichloroethene (TCE) exceeding the cleanup levels in the first and second water bearing zones. The plume is approximately 2,130 by 340 feet trending north-south. The maximum detected TCE concentration was 46 micrograms per liter. 2005 ? 2006, basewide groundwater monitoring was completed to evaluate dissolved-phase VOCs and potential groundwater migration. Monitoring indicated a dissolved-phase plume approximately 920 feet long in a north-south direction and 250 feet wide in an east-west direction. In 2008, Feasibility Study ? was performed to address volatile organic compounds in groundwater at concentrations exceeding remediation goals and to develop and evaluated remedial alternatives. In 2009, the Proposed Plan was published to invite public comment on the proposed cleanup plan for contaminated groundwater. January 15, 2010, Final Record of Decision for Operable Unit 4B ? presents the selected remedy of groundwater and documents no further action for soil. In situ bioremediation and monitored natural attenuation were the selected remedy.

RECORDS OF EMERGENCY RELEASE REPORTS (cont.)

CHMIRS - CA: California Hazardous Material Incident Reporting System's reported accidental hazardous material incidents releases or spills

Agency Version Date: 06/19/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/08/2023
Agency: California Emergency Management Agency
Agency Contact: 916-845-8275
Most Recent Contact: 09/13/2023

HIST CHMIRS - CA: California Hazardous Material Incident Reporting System's reported accidental hazardous material incidents releases or spills

Agency Version Date: 04/06/2017
Agency Update Frequency: Quarterly
Planned Next Contact: 01/09/2024
Agency: California Emergency Management Agency
Agency Contact: 916-845-8275
Most Recent Contact: 10/13/2023

INDUSTRIAL CLEANUP_ORANGE COUNTY - CA: Petroleum and non-petroleum industrial spills

Agency Version Date: 10/27/2023
Agency Update Frequency: Annually
Planned Next Contact: 01/23/2024
Agency: Orange County Health Care Agency
Agency Contact: 714-433-6000
Most Recent Contact: 10/27/2023

SML_LOS ANGELES COUNTY - CA: Listing of all Emergency Response session spills

Agency Version Date: 07/12/2017
Agency Update Frequency: Quarterly
Planned Next Contact: 12/19/2023
Agency: Los Angeles Department of Public Health
Agency Contact: 323-890-7808
Most Recent Contact: 09/22/2023

LOCAL LAND RECORDS

LIENS 2: Comprehensive Environmental Response Compensation and Liability Act sites with liens

Agency Version Date: 05/11/2017
Agency Update Frequency: No Longer Maintained
Planned Next Contact: 02/13/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 11/17/2023

DEED - CA: The Department of Toxic Substances Control's listing of property locations with Deed restrictions

Agency Version Date: 10/02/2023
Agency Update Frequency: Semi Annually
Planned Next Contact: 12/27/2023
Agency: Department of Toxic Substances Control
Agency Contact: 916-341-5791
Most Recent Contact: 10/02/2023

HIST LIENS - CA: The Department of Toxic Substances Control's listing of property locations with environmental liens that is no longer in current agency list.

Agency Version Date: 12/04/2018
Agency Update Frequency: Annually
Planned Next Contact: 01/04/2024
Agency: Department of Toxic Substances Control
Agency Contact: 916-322-2861
Most Recent Contact: 10/10/2023

LIENS - CA: The Department of Toxic Substances Control's listing of property locations with environmental liens

Agency Version Date: 11/10/2023
Agency Update Frequency: Varies
Planned Next Contact: 02/06/2024
Agency: Department of Toxic Substances Control
Agency Contact: 916-322-2861
Most Recent Contact: 11/10/2023

LOCAL LISTS OF LANDFILL / SOLID WASTE DISPOSAL SITES

HIST INDIAN ODI R8: List of Region 8 Indian land open dump inventory sites maintained within the STARS program that is no longer in current agency list.

Agency Version Date: 11/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 03/01/2024
Agency: Indian Health Service
Agency Contact: 855-246-3642
Most Recent Contact: 12/06/2023

INDIAN ODI R8: Region 8 Indian land open dump inventory sites maintained within the STARS program

Agency Version Date: 07/21/2022
Agency Update Frequency: Varies
Planned Next Contact: 02/14/2024
Agency: Indian Health Service
Agency Contact: 855-246-3642
Most Recent Contact: 11/20/2023

ODI: Open dump inventory sites

Agency Version Date: 10/03/2017
Agency Update Frequency: No Update
Planned Next Contact: 01/10/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 855-246-3642
Most Recent Contact: 10/16/2023

TRIBAL ODI: Indian land open dump inventory for all regions

Agency Version Date: 10/26/2023
Agency Update Frequency: Varies
Planned Next Contact: 01/22/2024
Agency: Indian Health Service
Agency Contact: 301-443-3593
Most Recent Contact: 10/26/2023

HAULERS - CA: Waste Tire Manifest Program Hauler Registration listing

Agency Version Date: 06/05/2023
Agency Update Frequency: Varies
Planned Next Contact: 02/20/2024
Agency: California Department of Resources Recycling and Recovery (CalRecycle)
Agency Contact: 916-341-6066
Most Recent Contact: 11/24/2023

LF_SAN DIEGO COUNTY - CA: San Diego county landfill listing

Agency Version Date: 07/07/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/28/2023
Agency: County of San Diego Department of Environmental Health
Agency Contact: 858-694-2801
Most Recent Contact: 10/03/2023

SWF_LOS ANGELES COUNTY - CA: Listing of Los Angeles County solid waste facilities

Agency Version Date: 05/05/2023
Agency Update Frequency: Varies
Planned Next Contact: 01/22/2024
Agency: LA County Department of Public Works
Agency Contact: 800-320-1771
Most Recent Contact: 10/26/2023

SWRCY - CA: Listing of facilities which perform recycled material processing activities

Agency Version Date: 04/27/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 01/16/2024
Agency: California Department of Resources Recycling and Recovery (CalRecycle)
Agency Contact: 916-341-6066
Most Recent Contact: 10/20/2023

OTHER ASCERTAINABLE RECORDS

AFS: Air Facility Systems Quarterly Extract

Agency Version Date: 07/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 12/28/2023
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 10/03/2023

OTHER ASCERTAINABLE RECORDS (cont.)

ALT FUELING: Alternative Fueling Stations by fuel type.

Agency Version Date: 08/31/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 02/21/2024
Agency: U.S. Department of Energy
Agency Contact: N/R
Most Recent Contact: 11/27/2023

ARENAS: List of Arenas and Sport Venues

Agency Version Date: 04/28/2023
Agency Update Frequency: Varies
Planned Next Contact: 01/16/2024
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 10/20/2023

ARENAS 2: List of Convention Centers and Fairgrounds

Agency Version Date: 07/24/2023
Agency Update Frequency: Varies
Planned Next Contact: 01/12/2024
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 10/18/2023

BRS: Reporting of hazardous waste generation and management from large quantity generators

Agency Version Date: 09/01/2023
Agency Update Frequency: Biennial
Planned Next Contact: 02/22/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 11/28/2023

CDC HAZDAT: The Agency for Toxic Substances and Disease Registry's Hazardous Substance Release/Health Effects Database.

Agency Version Date: 10/03/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/28/2023
Agency: Agency for Toxic Substances and Disease Registry
Agency Contact: 770-488-6399
Most Recent Contact: 10/03/2023

CHURCHES: List of places of worship

Agency Version Date: 07/28/2023
Agency Update Frequency: Varies
Planned Next Contact: 01/18/2024
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 10/24/2023

COAL ASH DOE: List of existing and planned generators with 1 megawatt or greater of combined capacity that are utilizing coal ash impoundments.

Agency Version Date: 08/21/2023
Agency Update Frequency: Varies
Planned Next Contact: 02/09/2024
Agency: Department of Energy
Agency Contact: (202) 586-8800
Most Recent Contact: 11/15/2023

COAL ASH EPA: Coal Combustion Residues Surface Impoundments List

Agency Version Date: 02/18/2021
Agency Update Frequency: Varies
Planned Next Contact: 01/03/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 10/09/2023

COAL GAS: Manufactured Gas Plant locations

Agency Version Date: 09/07/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 02/28/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 855-246-3642
Most Recent Contact: 12/04/2023

COLLEGES: List of major Universities & Colleges

Agency Version Date: 06/28/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/19/2023
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 09/22/2023

OTHER ASCERTAINABLE RECORDS (cont.)

COLLEGES 2: List of Universities & Colleges

Agency Version Date: 07/03/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/25/2023
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 09/28/2023

CONSENT (DECREES): Legal decisions regarding responsibility for Superfund locations

Agency Version Date: 10/03/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/28/2023
Agency: Environmental Protection Agency
Agency Contact: (800) 424-9346
Most Recent Contact: 10/03/2023

CORRECTIVE ACTIONS_2020: In 2009 the EPA created the 2020 Corrective Action Baseline list of contaminated or potentially contaminated sites with a cleanup goal to complete 95% by the year 2020. The names on the list indicate the facility owners who may or may not have caused the contamination.

Agency Version Date: 12/21/2018
Agency Update Frequency: No Longer Maintained
Planned Next Contact: 12/19/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 09/22/2023

DAYCARE: List of Daycare facilities

Agency Version Date: 06/27/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/18/2023
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 09/21/2023

DEBRIS EPA LF: EPA list of designated landfill facilities for the safe disposal of disaster debris.

Agency Version Date: 09/18/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 12/13/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 855-246-3642
Most Recent Contact: 09/18/2023

DEBRIS EPA SWRCY: EPA list of facilities for the safe recovery, recycling, and disposal of disaster debris.

Agency Version Date: 09/18/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 12/13/2023
Agency: U.S. Environmental Protection Agency
Agency Contact: 855-246-3642
Most Recent Contact: 09/18/2023

DOCKET CRIM PROS 2: Criminal affirmative cases filed by the United States involving CAA CWA CERCLA EPCRA FIFRA MPRSA RCRA & TSCA.

Agency Version Date: 06/06/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 02/21/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1744
Most Recent Contact: 11/27/2023

DOD: Department of Defense sites from the Protected Areas Database (PAD-US)

Agency Version Date: 10/03/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/28/2023
Agency: United States Geologic Survey (USGS)
Agency Contact: 1-888-275-8747
Most Recent Contact: 10/03/2023

DOT OPS: Incident Data Report

Agency Version Date: 04/27/2023
Agency Update Frequency: Varies
Planned Next Contact: 01/16/2024
Agency: U.S. Department of Transportation
Agency Contact: (202) 366-4996
Most Recent Contact: 10/20/2023

OTHER ASCERTAINABLE RECORDS (cont.)

ECHO: ECHO is EPA Enforcement and Compliance History Online website to search for facilities in your community to assess their compliance with environmental regulations related to CAA, CWA, RCRA, & SDWA.

Agency Version Date: 06/02/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 02/19/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 11/23/2023

ENOI: The Electronic Notice of Intent (eNOI) database contains construction sites and industrial facilities that submit permit requests to EPA for Construction General Permits (CGP) and Multi-Sector General Permits (MSGP).

Agency Version Date: 03/19/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 02/02/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 11/08/2023

EPA FUELS: List of companies and facilities registered to participate in EPA Fuel Programs under Title 40 CFR Part 80.

Agency Version Date: 10/09/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 01/03/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: (202) 564-2307
Most Recent Contact: 10/09/2023

EPA OSC: Listing of oil spills and hazardous substance release sites requiring EPA On-Site Coordinators.

Agency Version Date: 05/26/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 02/12/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: (202) 564-2307
Most Recent Contact: 11/16/2023

EPA WATCH: The EPA Watch List was used to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. EPA maintained the lists from 2011 - 2013.

Agency Version Date: 02/09/2018
Agency Update Frequency: No Longer Maintained
Planned Next Contact: 02/12/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: (202) 564-2307
Most Recent Contact: 11/16/2023

Well ID :	USGS-334102117495901
Well Type :	WATER SUPPLY, OTHER
Well Depth (Ft.) :	43.5
Top of Screen (Ft.) :	N/R
Screen Length (Ft.) :	N/R
Source :	N/R
Data Source :	NWIS
Source Name :	USGS-334102117495901
Other Names :	N/R
Latitude :	33.6838528
Longitude :	-117.8330917
Last Date in Agency List :	2022-07-29

GM Chemicals

Samp Collection Date :	2000-06-22
Chemical :	SC (Specific Conductivity) 16000 UMHOS/CM
CAS Number :	N/R
Reporting Limit :	N/R
Samp Collection Date :	2000-06-22
Chemical :	CYANAZ (Cyanazine) ND UG/L
CAS Number :	N/R
Reporting Limit :	.004
Samp Collection Date :	2000-06-22
Chemical :	TMB124 (1,2,4-Trimethylbenzene) ND UG/L
CAS Number :	N/R
Reporting Limit :	.056
Samp Collection Date :	2000-06-22
Chemical :	MIBK (Methyl Isobutyl Ketone (MIBK)) ND UG/L
CAS Number :	N/R
Reporting Limit :	.37
Samp Collection Date :	2000-06-22
Chemical :	F (Fluoride) ND MG/L
CAS Number :	N/R
Reporting Limit :	.1
Samp Collection Date :	2000-06-22
Chemical :	NAPROPAM (Napropamide) ND UG/L
CAS Number :	N/R

Map Id: 6
Direction: WSW
Distance: 0.065 mi., 343 ft.
Elevation: 40 ft.
Relative: Lower

Reporting Limit : .003

Samp Collection Date : 2000-06-22
Chemical : FC113 (1,1,2-Trichloro-1,2,2-Trifluoroethane (Freon 113)) ND MG/L
CAS Number : N/R
Reporting Limit : .00006

Samp Collection Date : 2000-06-22
Chemical : DICAMBA (Dicamba) ND UG/L
CAS Number : N/R
Reporting Limit : .096

Samp Collection Date : 2000-06-22
Chemical : TCLME (Chloroform (THM)) ND UG/L
CAS Number : N/R
Reporting Limit : .05

Samp Collection Date : 2000-06-22
Chemical : AS (Arsenic) ND UG/L
CAS Number : N/R
Reporting Limit : .9

Source Details

Source Chemicals

Samp Collection Date-Time :	1984-06-27
Chemical :	Specific conductance 4780 US/CM @25C
Analytical Method :	USGS TWRI 5-A1/1989, p 461
Reporting Limit :	N/R
Lab Note :	N/R

Samp Collection Date-Time :	1984-06-27
Chemical :	Sulfate 88.0 MG/L
Analytical Method :	N/R
Reporting Limit :	N/R
Lab Note :	N/R

Samp Collection Date-Time :	1984-06-27
Chemical :	Ammonia and ammonium 1.30 MG/L AS N
Analytical Method :	USGS TWRI 5-A1/1989, p 321
Reporting Limit :	N/R
Lab Note :	N/R

Samp Collection Date-Time :	1984-06-27
Chemical :	pH 8.9 STD UNITS
Analytical Method :	USGS TWRI 5-A1/1989, p 363
Reporting Limit :	N/R
Lab Note :	N/R

Samp Collection Date-Time :	1984-06-27
Chemical :	Chloride 520 MG/L
Analytical Method :	USGS TWRI 5-A1/1989, p 155
Reporting Limit :	N/R
Lab Note :	N/R

Samp Collection Date-Time :	1984-06-27
Chemical :	Specific conductance 4480 US/CM @25C
Analytical Method :	N/R
Reporting Limit :	N/R
Lab Note :	N/R

Samp Collection Date-Time :	1984-06-27
Chemical :	Ammonia and ammonium 1.67 MG/L NH4

GM Chemicals

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

Samp Collection Date :	1961-12-21
Chemical :	CL (Chloride) 47 MG/L
CAS Number :	N/R
Reporting Limit :	N/R

Samp Collection Date :	1961-12-21
Chemical :	SC (Specific Conductivity) 498 UMHOS/CM
CAS Number :	N/R
Reporting Limit :	N/R

Samp Collection Date :	1961-12-21
Chemical :	HCO3 (bicarbonate HCO3) 194 MG/L
CAS Number :	N/R
Reporting Limit :	N/R

Samp Collection Date :	1961-12-21
Chemical :	PH (pH) 8.4 PH UNITS
CAS Number :	N/R
Reporting Limit :	N/R

Samp Collection Date :	1960-12-08
Chemical :	MG (Magnesium) 1 MG/L
CAS Number :	N/R
Reporting Limit :	N/R

Samp Collection Date :	1960-12-08
Chemical :	SC (Specific Conductivity) 512 UMHOS/CM
CAS Number :	N/R
Reporting Limit :	N/R

Lab Note :	N/R
Samp Collection Date-Time :	1969-03-20
Chemical :	Carbonate, water, unfiltered, fixed endpoint (pH 8.3) titration, field, milligrams per liter 0 mg/l
Analytical Method :	N/R
Reporting Limit :	N/R
Lab Note :	N/R
Samp Collection Date-Time :	1969-03-20
Chemical :	Magnesium, water, filtered, milligrams per liter 8 mg/l
Analytical Method :	N/R
Reporting Limit :	N/R
Lab Note :	N/R
Samp Collection Date-Time :	1969-03-20
Chemical :	pH, water, unfiltered, field, standard units 7.7 std units
Analytical Method :	N/R
Reporting Limit :	N/R
Lab Note :	N/R
Samp Collection Date-Time :	1969-03-20
Chemical :	Chloride, water, filtered, milligrams per liter 136 mg/l
Analytical Method :	N/R
Reporting Limit :	N/R
Lab Note :	N/R
Samp Collection Date-Time :	1969-03-20
Chemical :	Specific conductance, water, unfiltered, microsiemens per centimeter at 25 degrees Celsius 917 uS/cm @25C
Analytical Method :	N/R
Reporting Limit :	N/R
Lab Note :	N/R
Samp Collection Date-Time :	1969-03-20
Chemical :	Calcium, water, filtered, milligrams per liter 40 mg/l
Analytical Method :	N/R
Reporting Limit :	N/R
Lab Note :	N/R

Violation Details

RTC Enforcement ID :	1080001
Violation ID :	9780001
Submission Year :	2023
Violation First Reported Date :	2012-09-12
Contaminant Name :	Coliform (TCR)
Rule Family :	Total Coliform Rules
Rule Group :	Microbials
Rule Name :	Total Coliform Rule
Violation Type :	Maximum Contaminant Level Violation, Monthly (TCR)
Is Health Based :	Y
Is Major Violation :	N/R
Severity Indicator Count :	N/R
Public Notification Tier :	2
Address Line 1 :	18301 Von Karman Avenue, Ste 250, IRVINE, 92612
Address Line 2 :	N/R

HIST PWS ENF
Historical Public Water Supply locations with Enforcement Violations
Environmental Protection Agency
(800) 426-4791
List of Safe Drinking Water Information Systems (SDWIS) with enforcement violations that are no longer in current agency list.

NWIS
National Water Information Systems
United States Geological Society
(703) 648-5953
Information on all water resources for the United States. This database contains all current and historical data for the nation.

PWS
Public Water Supply
Environmental Protection Agency
(800) 426-4791
Safe drinking water information Systems

PWS ENF
Public Water Supply locations with Enforcement Violations
Environmental Protection Agency
(800) 426-4791
Safe drinking water information Systems with enforcememnt violations

WELLS - GAMA - CA
California Groundwater Ambient Monitoring Assessment
State Water Resources Control Board
916-341-5791
Brings together datasets from California state agencies including: Public Health Water Resources and Pesticide Regulation as well as from the US Geological Survey Lawrence Livermore National Laboratory and the Water Boards. It shows results for untreated raw water in different types of wells for naturally-occurring and man-made chemicals.

FLOOD Q3
Flood data
Environmental Protection Agency
(202) 566-1667
Q3 Flood Data

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

WETLANDS NWI
National Wetland Inventory
U.S. Fish and Wildlife Service
(703) 358-2171
Wetland Inventory for the United States

SSURGO
Detailed Soil Data Map
Natural Resources Conservation Service: U.S. Department of Agriculture
(202) 690-4985
Detailed Soil Data Map

STATSGO & MUI
General Soil Data Map
Natural Resources Conservation Service: U.S. Department of Agriculture
(202) 690-4985
General Soil Data Map

USGS GEOLOGIC AGE
USGS Digital Data Series DDS
Natural Resources Conservation Service: U.S. Department of Agriculture
(202) 690-4985
USGS Digital Data Series DDS: Geologic Age and Rock Stratigraphic Unit

DAMS - CA
California Dam Inundation Maps
Department of Water Resources
916-845-8275
Dam inundation maps show the maximum extent of damage of a flood wave from a dam failure

OIL & GAS WELLS - CA
Oil and Gas Well Data
State of California Department of Conservation
916-327-1042
Oil and gas well locations and detail for all 6 districts

RADON
National Radon Database
U.S. Environmental Protection Agency
215-814-2469
A study of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

RADON - CA
Radon tested locations in California
California Department of Health Services
(916) 449-5674
A table of long term and short term indoor radon measurments

RADON EPA
RADON EPA
U.S. Environmental Protection Agency
215-814-2469
EPA list of Radon zones

AIRPORT FACILITIES
Airport landing facilities
Federal Aviation Administration
(866) 835-5322
Airport landing facilities

BASINS
Better Assessment Science Integrating point & Non-point Sources
U.S. Environmental Protection Agency
855-246-3642
Integrated geographical information system national watershed data and environmental assessment known as Better Assessment Science Integrating point & Non-point Sources

DIGITAL OBSTACLE
Obstacles of interest to aviation users
Federal Aviation Administration
855-379-6518
The Digital Obstacle File describes all known obstacles of interest to aviation users in the U.S. with limited coverage of the Pacific the Caribbean Canada and Mexico. The obstacles are assigned unique numerical identifiers; accuracy codes and listed in order of ascending latitude within each state or area by FAA Region.

EPICENTERS
National Geographical Data Center
National Geographical Data Center
303-497-6826
List of recent and historic earthquakes and information.

FLOOD DFIRM
National Flood Hazard Layer Database
Federal Emergency Management Agency
The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMAs Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.

Envirosite's Historical Topographic Map Report is designed to assist in evaluating a subject property resulting from past activities. Envirosite's Historical Topographic Map Report includes a search of USGS historical topographic maps, dating back to the early 1900s.

TOPOGRAPHIC MAPS FOUND:

	Map Name:	Year:	Revision Year:	Scale:
1.	Santa Ana	1896	N/R	1 : 62500
2.	Santa Ana	1901	N/R	1 : 62500
3.	Tustin	1932	N/R	1 : 31680
4.	Tustin	1935	N/R	1 : 31680
5.	Santa Ana	1942	N/R	1 : 62500
6.	Tustin	1948	N/R	1 : 24000
7.	Tustin	1950	N/R	1 : 24000
8.	Tustin	1962	1972	1 : 24000
9.	Tustin	1965	N/R	1 : 24000
10.	Tustin	1965	1981	1 : 24000
11.	Tustin	1974	N/R	1 : 24000
12.	Tustin	2012	N/R	1 : 24000
13.	Tustin	2015	N/R	1 : 24000
14.	Tustin	2018	N/R	1 : 24000
15.	Tustin	2022	N/R	1 : 24000

The USGS 7.5 minute series includes scales 1:24,000 / 1:25,000 / 1:31,680. The USGS 15 minute series includes scales 1:48,000 / 1:62,500 / 1:63,360. The USGS 30x60 minute series scale is 1:100,000.

Prepared for Envirosite Corporation By:

Property Archives

Envirosite's Standard City Directory Report is a screening tool designed to assist in historical use determination of a subject property and adjacent properties. It includes a search of Property Archives digital datasets and national book collections including the Library of Congress and/or the Allen County Public Library at five year intervals or the closest available intervals.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

SOURCE:	***YEAR:***
Property Archives	2020, 2015, 2010, 2006, 2002, 1993
Orange County Street Address Directory	1983, 1978, 1973
Orange County Central Street Address Directory	1988

Property Archives is a proprietary and comprehensive dataset of over 1.5 billion commercial, industrial and residential records, business names and uses and occupant records for every city and town in the United States, from recent years to the early 1990s. Property Archives dataset is wholly owned and operated by Property Archives, LLC

This report was prepared by Property Archives, LLC for Envirosite Corporation

Property Archives

SUBJECT PROPERTY:

15000 - 17000 Construction Circle East , Irvine, CA 92614

ADJOINING PROPERTIES:

1 - 500 Corporate Park, Irvine, CA

15000 - 18000 Murphy Ave, Irvine, CA

2970 - 3139 Warner Ave, Irvine, CA

2800 - 3500 Alton Parkway, Irvine, CA

2500 - 3000 Kelvin Ave, Irvine, CA

2600 - 3007 Main Street, Irvine, CA

1 - 100 Park Plaza, Irvine, CA

15000-17000 Construction Circle East, Irvine, CA, 92614

Historical Information Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. No FIMs or similar maps were identified for the site location and/or adjoining properties.

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2023 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.
