

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Extended Learning Opportunities Program Center

Lead Agency: Palmdale School District

Contact Name: Al Tsai

Email: atsai@palmdalesd.org

Phone Number: 661.789.6575

Project Location: Palmdale

City

Los Angeles County

County

Project Description (Proposed actions, location, and/or consequences).

The proposed project will construct an Extended Learning Opportunities Program Center (ELOP) on 67 acres. The ELOP will operate as a school enrichment center. The project will be constructed in four phases. Most of the buildings supporting the ELOP will be constructed within Phase 1. Children from schools within the City of Palmdale will be transported by bus to the ELOP to participate in the available programs. The ELOP will run an afterschool program during the school year and an all-day program during the summer. The children will be picked up and dropped off at their schools. Parents will not be allowed to drop-off/pick-up students except in case of emergency. Trips by buses, staff, and deliveries are the standard traffic to and from the ELOP. Phase 1A consisting of an admin modular building, 5 flexible modular studios, 3 modular restrooms, modular electrical room, bus covered parking, 2 mini-pitch sports court, playground with shade structure, fire access lane, interior fencing, site access aligned with 42nd Street, temporary bus drop off, staff parking, and off-site improvements of Avenue Q. Site work will include underground utilities, landscaping, reconfigurations and expansion of flatwork and access drives. Interior fencing will be established with each phase.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

WJTs are within a portion of the site. An Incidental Take Permit will be obtained from CDFW and implemented before ground disturbance in the area of WJT presence.

Preconstruction surveys will be accomplished for burrowing owl, Crotch's bumble bee, and migratory birds. Incidental take permits will be obtained if either burrowing owl or crotch's bumble bee are found to have moved into the site. If preconstruction surveys find nesting migratory birds they will be avoided by 50 to 500 foot buffers as appropriate.

Monitoring, avoidance, and notification of Inadvertent finds of tribal cultural resources will be coordinated with Tribes that have requested.

Old debris and soil piles within the site will be appropriately cleaned up prior to construction in those areas.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No controversy has occurred or is expected.

Provide a list of the responsible or trustee agencies for the project.
