APPENDIX 1.0-1

Initial Study and its Appendices (i.e., Original 2021/22 Historic Report, VMT Memo, AQ/GHG Report, Noise Report, and Phase I ESA)

INITIAL STUDY CHECKLIST

Star Mazda Vehicle Dealership Expansion
1401 South Brand Boulevard

1.	**Project Title:** Star Mazda Vehicle Dealership Expansion
2.	**Lead Agency Name and Address:** City of Glendale Community Development Department – Planning Division 633 East Broadway, Room 103 Glendale, CA 91206
3.	**Contact Person and Phone Number:** Vista Ezzati, Principal Planner Tel: (818) 937-8180 Fax: (818) 240-0392
4.	**Project Location:** 1401 South Brand Boulevard, Glendale, Los Angeles County
5.	**Project Sponsor's Name and Address:** Bryan MacDermott c/o Wagner Architecture Group 2124 South El Camino Real, Suite 220 Oceanside, CA 92054
6.	**General Plan Designation:** Community Services Commercial
7.	**Zoning:** CA – Commercial Auto Zone
8.	**Description of the Project:**

The Project includes construction of a new 2-story, 11,840-square-foot building for an existing vehicle dealership (Star Mazda) located on a 54,853-square-foot project site in the CA (Commercial Auto) Zone. The Project includes the demolition of an 8,600-square-foot showroom and service reception building (originally built in 1958) located along the northerly portion of the site and an attached 900-square-foot office and parts building (year built unknown) located towards the center of the site. As part of the Project, the existing surface parking lot will be reconfigured and will provide a total of 66 parking spaces: 18 standard parking spaces will be provided for customers, 18 tandem parking spaces will be provided for vehicle service, and 30 tandem parking spaces will be provided for vehicle display. In accordance with Assembly Bill 2097 (AB 2097), the Applicant has also requested relief from the parking requirements for the proposed Project because of its proximity to a major transit stop (less than 0.5 mile from the Glendale Transportation Center), and its location in a High-Quality Transit Corridor.

The Project Site is rectangular-shaped and has frontage on three streets: South Brand Boulevard to the east, West Los Feliz Road to the north, and West Laurel Street to the south. There is also an existing 20-foot-wide alley located to the west of the Project Site that will be maintained. The Project Site was first developed in 1948 as a vehicle dealership with various building additions made over time, and all buildings are currently attached to one another.

Development of the Project requires approval by the Design Review Board for the design.

9. Surrounding Land Uses and Setting:

North: Vehicle Rental Agency and a Retail Store – CA Commercial Auto Zone

South: Vacant Commercial Building – CA Commercial Auto Zone

East: Vehicle Dealership – CA Commercial Auto Zone

	West: Vehicle Inventory Parking Lot (Star Mazda) & Glendale Memorial Hospital – C3 Commercial Service Zone, Height District III
10.	**Other public agencies whose approval is required (e.g., permits, financing approval or participation agreement).** None.

11. Environmental Factors Potentially Affected:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact," as indicated by the checklist on the following pages.

☐ Aesthetics	☐ Agriculture and Forest Resources	☐ Air Quality
☐ Biological Resources	☒ Cultural Resources	☐ Energy
☐ Geology / Soils	☐ Greenhouse Gas Emissions	☒ Hazards / Hazardous Materials
☐ Hydrology / Water Quality	☐ Land Use / Planning	☐ Mineral Resources
☐ Noise	☐ Population / Housing	☐ Public Services
☐ Recreation	☐ Transportation	☐ Tribal Cultural Resources
☐ Utilities / Service Systems	☐ Wildfire	☐ Mandatory Findings of Significance

LEAD AGENCY DETERMINATION:

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☒ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Prepared by: _____ Date: February 19, 2026

Signature of Director of Community Development or his or her designee authorizing the release of environmental document for public review and comment.

A. AESTHETICS

Except as provided in Public Resources Code Section 21099, would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Have a substantial adverse effect on a scenic vista?				X
2. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				X
3. In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?			X	
4. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			X	

1) Have a substantial adverse effect on a scenic vista?

No Impact. No scenic vistas, as identified in the Open Space and Conservation Element (January 1993), exist within, or within view of, the Project Site. Therefore, no impacts to scenic vistas would result from project implementation. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

No Impact. No state scenic highway is located adjacent to or within view of the Project Site. No impacts to scenic resources within a State scenic highway would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

Less than Significant Impact. The subject site is an existing vehicle dealership located in an urbanized area along the Brand Boulevard of Cars, with the immediate area surrounding the Project Site developed with one and two-story buildings, primarily other vehicle dealerships and other commercial uses. Glendale Memorial Hospital campus is also located directly to the west of the Project Site and features several buildings and parking areas ranging in height from one to eight stories. The proposed expansions and improvements to the existing vehicle dealership will be reviewed by the Design Review Board regarding site planning, mass and scale, architectural materials, and landscaping to ensure the Project's design is compatible with the surrounding built environment. The design of the Project features well-articulated facades and high-quality materials to accentuate the design concept. Impacts to visual character are anticipated to be less than significant, given the project review processes and compliance with the Zoning Code standards that address mass and scale. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

4) Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?

Less than Significant Impact. Day and nighttime lighting for the Project would increase as a result of the proposed Project, but would not be significantly greater than the existing on-site conditions. Any external lighting of the property is required to be directed towards the subject property and shielded to prevent lighting from spilling over onto neighboring properties. With these requirements in place, and because the surrounding area is already developed with commercial buildings, no significant impacts associated with lighting are anticipated. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

B. AGRICULTURE AND FOREST RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997, as updated), prepared by the California Department of Conservation, as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board.

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X
2. Conflict with existing zoning for agricultural use, or a Williamson Act contract?				X
3. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined in Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?				X
4. Result in the loss of forest land or conversion of forest land to non-forest use?				X
5. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				X

1) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

No Impact. There is no prime farmland, unique farmland, or farmland of statewide importance within or adjacent to the project site, and no agricultural activities take place on the Project Site. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Conflict with existing zoning for agricultural use, or a Williamson Act contract?

No Impact. No portion of the Project Site is proposed to include agricultural zoning designations or uses, nor do any such uses exist within the City under the current General Plan and zoning. There are no Williamson Act contracts in effect for the Project Site or the surrounding vicinity. No conflicts with existing zoning for agricultural use or Williamson Act contracts would result. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined in Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?

No Impact. There is no existing zoning of forest land or timberland in the City. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

4) Result in the loss of forest land or conversion of forest land to non-forest use?

No Impact. There is no forestland within the City of Glendale. No forest land would be converted to non-forest use under the proposed Project. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

5) Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of farmland to non-agricultural use or conversion of forest land to non-forest use?

No Impact. There is no farmland or forest land in the vicinity of or on the Project Site. No farmland would be converted to non-agricultural use, and no forest land would be converted to non-forest use under the proposed Project. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

C. AIR QUALITY

Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied on to make the following determinations.

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Conflict with or obstruct implementation of the applicable air quality plan?				X
2. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?			X	
3. Expose sensitive receptors to substantial pollutant concentrations?			X	
4. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?			X	

1) Conflict with or obstruct implementation of the applicable air quality plan?

No Impact. The Project Site is located within the City of Glendale, which is part of the South Coast Air Basin (Basin) and is under the jurisdiction of the South Coast Air Quality Management District (SCAQMD). The SCAQMD is the agency responsible for preparing the Air Quality Management Plan (AQMP) for the Basin. Since 1979, a number of AQMPs have been prepared. The most recent comprehensive plan fully approved by the U.S. Environmental Protection Agency (U.S. EPA) is the 2022 Air Quality Management Plan (AQMP), which includes a variety of strategies and control measures.

The AQMP was prepared to accommodate growth, to reduce the high levels of pollutants within the areas under the jurisdiction of SCAQMD, to return clean air to the region, and to minimize the impact on the economy. Projects that are considered to be consistent with the AQMP would not interfere with attainment because this growth is included in the projections used in the formulation of the AQMP. Therefore, projects, uses, and activities that are consistent with the applicable assumption used in the development of the AQMP would not jeopardize attainment of the air quality levels identified in the AQMP, even if they exceed the SCAQMD's recommended daily emissions thresholds.

Projects that are consistent with the projections of employment and population forecasts identified in the Growth Management Chapter of the Regional Comprehensive Plan and Guide (RCPG) are considered consistent with the AQMP growth projections, since the Growth Management Chapter forms the basis of the land use and transportation control portions of the AQMP.

Population growth associated with the proposed Project is included in the Southern California Association of Governments (SCAG) projects for growth in the City of Glendale. The proposed Project is an expansion of an existing vehicle dealership that includes demolition of existing buildings used for sales and vehicle display, and construction of a new larger building with the same uses, as a result the project does not result in population and housing growth that would cause growth in Glendale to exceed the SCAG forecast. Consequently, implementation of the proposed Project would be consistent with AQMP attainment forecasts. Therefore, no impact would occur with relation to a conflict with, or obstruction of, the implementation of the SCAQMD AQMP. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Less than Significant Impact. An Air Quality and GHG Impact Analysis was prepared for the project by Giroux & Associates, dated January 8, 2022 (see **Appendix C** to this Initial Study). The California Emissions Estimator Model (CalEEMod Version 2020.4.0) was used to estimate air quality impacts during the construction and operation stages of the project. Results from the model indicate that the proposed Project would not exceed thresholds for construction, area, or operational impacts. A summary of the results and the Giroux & Associates report is attached. No significant impacts are anticipated. Based on the model run, construction of the project would not exceed the SCAQMD thresholds of significance for construction.

Area sources emissions are generated during the consumption of natural gas for space and water heating devices, by natural gas fireplaces, and during the operation of gasoline-powered landscape maintenance equipment and the use of consumer products (e.g., hair spray, deodorants, lighter fluid,

air fresheners, automotive products, and household cleaners). Mobile source emissions would be generated by a motor vehicle traveling to and from the Project Site.

Area and mobile source emissions were estimated using the California Emissions Estimator Module (CalEEMod Version 2020.4.0). The Project's land uses were entered into the model to estimate area source emissions. It was assumed that all buildings would combust natural gas, which is a conservative estimate since no residential uses are proposed as part of the Project. Based on the California Emissions Estimator Module (CalEEMod Version 2020.4.0) model run, the Project would not exceed the SCAQMD thresholds of significance for construction or operations. This requirement would further reduce emissions projected in the model run that assumes the use of natural gas. Compliance with these reach codes and the associated improvements would not be required for the existing buildings that are proposed to remain, and they can continue operating as-is. Therefore, no significant impacts are anticipated. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) Expose sensitive receptors to substantial pollutant concentrations?

Less than Significant Impact. As indicated in the model run performed for the Project, no construction or operational impacts are anticipated. Therefore, the Project would not expose sensitive receptors to a substantial pollutant concentration and, therefore, impacts are considered less than significant. This issue will not be further analyzed in the EIR.

4) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Less than Significant Impact. The type of facilities that are typically associated with objectionable odors include wastewater treatment plants, compost facilities, landfills, solid waste transfer stations, fiberglass manufacturing facilities, paint/coating operations (e.g., auto body shops), dairy farms, petroleum refineries, asphalt batch plants, chemical manufacturing, and food manufacturing facilities. The Project includes expansion of the existing vehicle dealership's retail and office areas only, and no demolition or expansion is proposed for the existing vehicle service areas. Construction activity associated with the Project will be for one year and may temporarily generate detectable odors from equipment exhaust. However, any detectable odors or equipment exhaust would be associated with initial construction and would be considered transitory and/or short-term. Therefore, less-than-significant construction-related odor impacts are anticipated to occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

D. BIOLOGICAL RESOURCES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?			X	

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
2. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?				X
3. Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				X
4. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				X
5. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				X
6. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				X

1) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

Less than Significant Impact. The Project Site is located in an area that has been heavily urbanized for decades, and natural vegetation does not exist on-site. The site is surrounded by densely developed urban properties and is unsuitable for use as a wildlife habitat due to its location. No wildlife species other than those that can tolerate human activity and/or are typically found in urban environments are known to exist on or near the Project Site. These human-tolerant species are neither sensitive, threatened, nor endangered. Implementation of the Project would not result in any impact to species identified as endangered, threatened, sensitive, or being of special concern by the California Department of Fish and Wildlife or the United States Fish and Wildlife Service. In addition, the Project Site does not provide a suitable habitat for endangered or rare species, given the pattern, type, and level of development in the area. No impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

No Impact. The Project Site is located in an area that has been heavily urbanized for many years. No riparian habitat and/or other sensitive natural communities are present within the vicinity, and no such areas are present on or adjacent to the Project Site. No impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

No Impact. The Project Site is neither in proximity to, nor does it contain, wetland habitat or a blue-line stream. No federally protected wetlands are present within the vicinity, and no such areas are present on or adjacent to the Project Site. No impact would occur. This issue will not be further analyzed in the EIR.

***Mitigation Measures*:** No mitigation measures are required.

4) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

No Impact. The Project Site is located in an area that has been heavily urbanized for many years. The area has been substantially modified by human activity, as evidenced by other developments of similar type and uses, and human activity associated with these types of development. Implementation of the project will not interfere with the movement of native resident or migratory fish or wildlife species, or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites. No impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

5) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

No Impact. The Glendale Municipal Code, Section 12.44, specifically protects six different native or "indigenous" species of trees that include the Coast Live Oak, Valley Oak, Mesa Oak, Scrub Oak, California Sycamore, and California Bay. There are no protected trees located on or within twenty feet of the Project Site, and implementation of the Project would not conflict with any local policies or ordinances protecting biological resources. As a result, no impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No Mitigation measures are required.

6) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. No adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved habitat conservation plan has been adopted to include the Project Site. Therefore, the Project would not conflict with any such plans. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

E. CULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?	X			

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
2. Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?			X	
3. Disturb any human remains, including those interred outside of formal cemeteries?			X	

1) Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?

Potentially Significant Impact. City records indicate that the Project Site has been a vehicle dealership since 1948. There have been various building additions done over time, with all buildings currently attached to one another, and that includes: a one-story, 17,315 square-foot vehicle service building that was originally constructed in 1955 and expanded in 1968, a one-story, approximately 12,000 square-foot vehicle showroom and service reception building that was originally constructed in 1958, and a one-story, 900 square-foot office and parts building with an unknown construction date. The Project scope of work includes demolition of the 900-square-foot office building and demolition of 8,600 square feet of the 1958 vehicle showroom and service reception building.

A Historic Resource Evaluation, dated March 12, 2021, and updated on May 26, 2022, was prepared for this project by Kaplan Chen Kaplan (see **Appendix A** to this Initial Study). The evaluation determined that there are no historic resources on the property, and it would not be eligible for designation at the Local, State, or Federal level.

The existing vehicle showroom and service reception building, which was built in 1958, was evaluated in the City of Glendale's 2017 South Glendale Historic Resources Survey and assigned a California Historical Resource (CHR) Status Code of 5S3, indicating that it appears eligible for listing in the Glendale Register of Historic Resources. The survey finds the property to be eligible for listing in the Glendale Register because it is a rare example of a remnant auto dealership from the 1950s, and it is a good example of Mid-century Modern commercial architecture in South Glendale. The character-defining features of the original design include the single-story height, expressed steel post-and-beam construction with brick masonry, L-shaped plan with simple massing and asymmetrical composition, flat roof, glass curtain walls, and a flat canopy suspended from a steel frame. The survey also identifies that the property retains the integrity of location, design, setting, materials, workmanship, feeling, and association. The City's preservation planner supports this finding.

Because there is divergent expert opinion regarding the showroom building's possible historic status, the proposed demolition could cause a substantial adverse change in the significance of a historical resource as defined in *State CEQA Guidelines* Section 15064.5. Therefore, the Project may have a potentially significant impact, and this issue requires further analysis in the EIR.

2) Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?

Less than Significant Impact. Prehistoric and historic archaeological sites are not known to exist within the project area. The City's Open Space and Conservation Element indicates that no significant archaeological sites have been identified in this area of Glendale. Nonetheless, construction activities associated with project implementation would have the potential to unearth undocumented resources. In the event that archaeological resources are unearthed during project subsurface activities, all earth-disturbing work within a 100-meter radius must be temporarily

suspended or redirected until an archaeologist has evaluated the nature and significance of the find. After the find has been appropriately mitigated, work in the area may resume. With implementation of this standard requirement, no significant impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) Disturb any human remains, including those interred outside of formal cemeteries?

Less than Significant Impact. The Project Site and surrounding area are characterized by features typical of commercial and residential land uses that have existed for several decades. No known burial sites exist within the vicinity of the Project Site or the surrounding area. However, impacts would be potentially significant if human remains were to be encountered during excavation and grading activities. State Health and Safety Code Section 7050.5 requires that no further disturbance shall occur until the County coroner has made the necessary findings as to origin and disposition, pursuant to Public Resources Code Section 5097.98. If the remains are determined to be of Native American descent, the coroner has 24 hours to notify the Native American Heritage Commission (NAHC). The NAHC will then contact the most likely descendant of the deceased Native American, who will then serve as a consultant on how to proceed with the remains (i.e., avoid removal or rebury). With the implementation of this standard requirement, no significant impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

F. ENERGY

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?			X	
2. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			X	

1) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Less than Significant Impact. Construction of the proposed Project would require consumption of nonrenewable energy resources, primarily in the form of fossil fuels (including fuel oil, natural gas, and gasoline) for automobiles and construction equipment, and other resources, including, but not limited to, lumber, sand, gravel, asphalt, metals, and water. Construction would include energy used by construction equipment and other activities at the Project Site (e.g., building demolition, excavation, paving), in addition to the energy used to manufacture the equipment, materials, and supplies, and transport them to the Project Site. Energy for maintenance activities would include that for day-to-day upkeep of equipment and systems, as well as energy embedded in any replacement equipment, materials, and supplies. It is expected that nonrenewable energy resources would be used efficiently during construction and maintenance activities, given the financial implications of inefficient use of such resources. Therefore, the amount and rate of consumption of such resources during construction and maintenance activities would not result in the unnecessary, inefficient, or wasteful use of energy resources.

Operation of the proposed Project would involve consumption of electricity and natural gas; however, these resources are already consumed on the Project Site because it is already developed with an existing vehicle dealership, and an incremental increase in the consumption of these resources associated with project operation would not represent unnecessary, inefficient, or wasteful use of resources. The Project would be designed to comply with Title 24 Building, Energy and Green Buildings Standards (California Building Code, Title 24, Parts 4, 6, and 11). This will include compliance with the newly adopted reach codes pertaining to the complete electrification of new construction buildings and solar panel installation. Sustainable design strategies for the building would include the use of high-performance glazing and a light-colored, single-ply, and thermoplastic roof membrane over a well-insulated roof assembly to reduce heat gain during the summer. Other sustainable features would include energy-efficient light fixtures, lighting controls, and water-conserving plumbing fixtures. In order to comply with recent building code amendments, the Project would be required to install rooftop solar panels. Given the foregoing, the Project's consumption of energy resources would be less than significant, as it would not represent unnecessary, inefficient, or wasteful use of energy resources. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Less than Significant Impact. As described above, the energy efficiency of the Project would, at a minimum, comply with the California Energy Code and the California Building Code which requires new construction projects, such as this, to be fully electric. While not specifically applicable to the Project, Senate Bill 350 sets ambitious 2030 targets for energy efficiency and renewable electricity, increasing California's renewable electricity procurement goal from 22 percent by 2020 to 50 percent by 2030. As described in **Section F-1** above, the Project would be subject to the City's recently adopted reach codes, which exceed the state's minimum requirements for energy use in construction and design, including a requirement for solar panel installation for all new construction. As such, the Project would not conflict with or obstruct a state or local plan for renewable energy or efficiency. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

G. GEOLOGY AND SOILS

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.			X	
ii) Strong seismic ground shaking?			X	
iii) Seismic-related ground failure, including liquefaction?				X
iv) Landslides?				X
2. Result in substantial soil erosion or the loss of topsoil?			X	

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
3. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on-or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			X	
4. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994, as updated), creating substantial direct or indirect risks to life or property?			X	
5. Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				X
6. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?			X	

1) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

Less than Significant Impact. According to the City's Safety Element (August 2003), the subject site is not located within an Alquist-Priolo Earthquake Fault Zone. Based on the available geologic data, active or potentially active faults with the potential for surface fault rupture are not known to be located directly beneath or projecting toward the Project Site. Therefore, impacts from the rupture of a seismic fault are considered to be less than significant. This issue will not be further analyzed in the EIR.

***Mitigation Measures*:** No mitigation measures are required.

ii) Strong seismic ground shaking?

Less than Significant Impact. The Project Site could be subject to strong ground shaking in the event of an earthquake originating along one of the faults listed as active or potentially active in the Southern California area. This hazard exists throughout Southern California and could pose a risk to public safety and property by exposing people, property, or infrastructure to potentially adverse effects, including strong seismic ground shaking. Compliance with applicable building codes would minimize structural damage to buildings and ensure safety in the event of a moderate or major earthquake. Therefore, impacts related to strong seismic ground shaking would be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

iii) Seismic-related ground failure, including liquefaction?

No Impact. The Project Site is not located within an area prone to liquefaction as indicated in the City's Safety Element (August 2003). Therefore, no impacts associated with liquefaction would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

iv) Landslides?

No Impact. The subject property is not located in a landslide hazard area, as indicated in the City's Safety Element (August 2003). Therefore, no impacts associated with landslides would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Result in substantial soil erosion or the loss of topsoil?

Less than Significant Impact. Construction activity associated with the proposed Project development will not result in wind and water-driven erosion of soils due to grading, since the site would expose small amounts of soil during construction activities. Further, as part of the proposed Project, the applicant would be required to adhere to conditions under the Glendale Municipal Code Section 13.42.060 to prepare and administer a plan that effectively provides for a minimum stormwater quality protection throughout project construction. The plan would incorporate Best Management Practices (BMPs) to ensure that potential water quality impacts from water-driven erosion during construction would be reduced to less than significant. In addition, the applicant would be required to adhere to South Coast Air Quality Management District (SCAQMD) Rule 403— Fugitive Dust, which would further reduce the impact related to soil erosion to less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in an on-site or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

Less than Significant Impact. Subsidence is the process of lowering the elevation of an area of the earth's surface that can be caused by tectonic forces deep within the earth or by consolidation and densification of sediments, sometimes due to the withdrawal of fluids such as groundwater. The Project Site is not located in an area of significant subsidence activity and would not include fluid withdrawal or removal. In addition, as indicated in Response G-1 (iii), above, the soil under the Project Site is not prone to liquefaction. Therefore, impacts related to unstable soils are anticipated to be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

4) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994, as updated), creating direct or indirect substantial risks to life or property?

Less than Significant Impact. In order to minimize damage due to geologic hazards, design and construction of the Project will be required to comply with applicable building codes which would minimize structural damage to buildings and ensure safety in the event of a moderate or major earthquake. Therefore, impacts related to expansive soil would be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

5) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

No Impact. Septic tanks will not be used in the proposed Project. The Project would be required to connect to and use the existing sewage conveyance system as it currently exists. Therefore, no impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

6) Directly or indirectly destroy a unique paleontological resource or site or unique geological feature?

Less than Significant Impact. Plant and animal fossils are typically found within sedimentary rock deposits. Most of the City of Glendale consists of igneous and metamorphic rock, and the local area is not known to contain paleontological resources. The Project Site has already been subject to disruption and development. Any superficial paleontological resources that may have existed at one time on the Project Site will have likely been previously unearthed by past development activities. Nonetheless, paleontological resources may possibly exist at deep levels and could be unearthed with implementation of the Project. In the event that paleontological resources are unearthed during Project-related subsurface activities, all earth-disturbing work within a 100-meter radius must be temporarily suspended or redirected until a paleontologist has evaluated the nature and significance of the find. After the find has been appropriately mitigated, work in the area may resume. With implementation of this standard requirement, less-than-significant impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

H. GREENHOUSE GAS EMISSIONS

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			X	
2. Conflict with any applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?				X

1) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Less than Significant Impact. *State CEQA Guidelines* (Section 15064.7) provide that, when available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make determinations of significance for greenhouse gas emissions. Neither the City of Glendale nor the South Coast Air Quality Management District (SCAQMD) has adopted specific thresholds of significance for impacts related to greenhouse gas emissions or global climate change. The SCAQMD did establish a working group that came up with recommended thresholds, which are utilized in this analysis.

The SCAQMD has released Interim CEQA GHG Significance Threshold for Stationary Sources, Rules and Plans (December 2008), which includes a GHG emissions threshold of 10,000 metric tons (MT) of CO_2 equivalents (CO_2e) per year to determine the significance of industrial project GHG impacts. This is consistent with the threshold used by the Bay Area Air Quality Management District and the Santa Barbara County Air Pollution Control District. A threshold of 3,000 MT CO_2e/year is also suggested for residential projects. SCAQMD recommends that GHG emissions from construction be amortized over 30 years and added to operational GHG emissions in order to determine the overall project impact.

Please note that "CO_2 equivalents" (CO_2e) is the quantity of CO_2 that would cause the same level of climate change as a given type and quantity of a GHG emission. This variation of effect between gases is also known as global warming potential (GWP). For example, one unit of methane emissions has the same GWP as 21 units of carbon dioxide. Therefore, one (1) metric ton of methane is equivalent to 21 metric tons of CO_2e. Emissions of multiple types of GHGs are represented collectively in units of CO_2e.

Construction Phase Impacts:

GHG emissions from construction occur as a result of fuel combustion in heavy-duty off-road equipment. Construction activities would be temporary in nature. As described above, GHG emissions from construction are supposed to be amortized over a 30-year period and added to operational emissions to determine significance. An Air Quality and GHG Impact Analysis was prepared for the Project by Giroux & Associates, dated January 8, 2022, and calculated GHG emissions using CalEEMod Version 2020.4.0 (see **Appendix C** to this Initial Study). CalEEMod predicts that the Project will generate 253 MT of CO_2e construction emissions total. Per SCAQMD methodologies, this total is divided by 30 and added to the operational GHG emissions presented in the operation phase section below.

Operation Related Impacts:

Once construction activities are complete, the only direct source of GHG emissions associated with the Project will be from vehicles traveling to and from the site. Indirect emissions are included with direct emissions for the GHG impacts. Total operation phase GHG emissions generated by project direct and indirect sources are 59 MT CO_2e/year. Adding the operational GHG emissions to the construction GHG emissions, amortized over a 30-year period, the total project GHG emissions are 10.4 MT CO_2e/year. This is well below the significance threshold of 3,000 MT CO_2e/year selected for the Project. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

1) Conflict with any applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

No Impact. For the reasons discussed above, the Project would not conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases. No impact would occur.

Mitigation Measures: No mitigation measures are required.

I. HAZARDS AND HAZARDOUS MATERIALS

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			X	
2. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	X			

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
3. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			X	
4. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X
5. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?				X
6. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			X	
7. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?				X

1) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Less than Significant Impact. The proposed Project involves the demolition of an existing 8,600-square-foot showroom and 900-square-feet of a portion of the existing vehicle service building, and the construction of a new 2-story, 11,840-square-foot building for retail and office use for the existing vehicle dealership. Such uses do not generally involve the routine use, transport, or disposal of significant amounts of hazardous materials. No new hazardous materials will be generated at the site. All businesses within the City of Glendale, as mandated by the California Health and Safety Code Chapter 6.95, are required to file a Hazardous Material Business Plan (HMBP) with the Glendale Fire Department. The HMBP covers the use and storage of all regulated hazardous chemicals and materials to be used and/or stored onsite. As a result, impacts would be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Potentially Significant Impact. Development of the Project Site will require the demolition of an existing building that was originally built in 1958. Structures constructed, repaired, or remodeled between 1930 and 1981 have the potential of containing asbestos-containing building materials. Additionally, buildings constructed prior to 1978 may contain lead-based paints. Testing and removal of lead-based paints is subject to regulations established by the Environmental Protection Agency (EPA). Due to the possibility that these structures may contain lead paint or asbestos, the Project would be required to be tested in accordance with applicable rules and regulations and remediated accordingly prior to demolition. The Project would be required to comply with all applicable rules established by the SCAQMD, including Rules 403 and 402, during the construction phase that would prevent dust from migrating beyond the Project Site. Compliance with the applicable rules and regulations will ensure that significant impacts are reduced to a less-than-significant level.

A Phase I Environmental Assessment, dated May 15, 2019, was prepared for the property by Waterstone Environmental, Inc. (see **Appendix E** to this Initial Study) that identified potential on- and off-site subject property issues, also known as Recognized Environmental Conditions (RECs), and made recommendations related to the Project and the associated RECs.

- Historically, various underground storage tanks (USTs) have been present on the site. From 1958 to 1968, there was one 280-gallon waste oil UST, and from 1968 to 1986 there was one 550-gallon waste oil UST that also contained waste parts cleaner solution. Permit records indicate that these USTs have been removed, but no reports of sampling during the removal of these USTs have been identified. Based on how long these USTs were on-site and the noted disposal of waste parts cleaner in the 550-gallon UST, there is a potential for a historical release to the subsurface.
- Two 3-stage clarifiers are present in the service area in the western portion of the site which are permitted for the disposal of potential wastes, including solvents. Clarifiers have the potential to leak into the subsurface.
- Based on the historical presence of USTs, two 3-stage clarifiers that are still in use, and historical use of perchloroethylene (PCE) between 1996 and 2001 on the site, it is possible that a Vapor Encroachment Condition (VEC) may exist. The location of PCE usage was likely conducted only in the western portion of the site in the service area, which is not the area for the planned development. Due to the proximity of the service area activities to the offices, there is the possibility that a VEC exists in the area of the proposed building renovations.
- Two existing in-ground hoists and multiple historical in-ground hoists are known to have been present in the service area in the western portion of the site. Hoists have the potential to leak into the subsurface, and hydraulic oils have the potential to contain polychlorinated biphenyls (PCBs).

The recommendation in the assessment is that a soil vapor survey be conducted prior to the construction of the new auto showroom and offices in the northeast corner of the subject property. If elevated soil vapor concentrations are present beneath the proposed construction area, a vapor barrier may be needed for mitigation of vapor intrusion for the new buildings. Therefore, the Project may have a potentially significant impact, and this issue requires further analysis in the EIR.

3) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Less than Significant Impact. There is one existing school within one-quarter (0.25) mile from the Project Site, Cerritos Elementary School (0.2 miles to the southeast). The Project would comply with all hazardous materials remediation protocols during the demolition and construction phases. The Project would not emit any new hazardous emissions or handle hazardous materials since this is an expansion of the office and retail sales area at an existing vehicle dealership. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

4) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

No Impact. The Project Site is not included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

5) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

No Impact. The Project Site is not located within an airport land use plan or within two miles of a public airport or public use airport. No impact would occur. This issue will not be further analyzed in the EIR.

***Mitigation Measures*:** No mitigation measures are required.

No Impact. No private airstrips are located in the City of Glendale or in the vicinity of the Project Site. No impact would occur. This issue will not be further analyzed in the EIR.

***Mitigation Measures*:** No mitigation measures are required.

7) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Less than Significant Impact. The Project Site is located on the east side of South Brand Boulevard between West Los Feliz Road and West Laurel Street. Neither West Los Feliz Road nor West Laurel Street is identified as a City Disaster Response or County Evacuation Route in the City of Glendale General Plan Safety Element (August 2003). However, South Brand Boulevard is designated as a City Disaster Response Route in the Safety Element. The Project does not involve any changes to South Brand Boulevard, nor would the Project result in the alteration of an adopted emergency response plan or evacuation plan. During construction, the applicant would be required to obtain any necessary permits from the City of Glendale Public Works Department for all work occurring within the public right-of-way. Implementation of these requirements would be incorporated as a typical condition of approval. Consequently, project impacts would be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

8) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

No Impact. The Project Site and surrounding area are characterized by features typical of the urban landscape. The Project Site is not within a fire hazard area as identified in the City of Glendale General Plan Safety Element. No impact would occur. This issue will not be further analyzed in the EIR. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

J. HYDROLOGY AND WATER QUALITY

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface of groundwater quality?			X	

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
2. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?			X	
3. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of stream or river or through the addition of impervious surfaces, in a manner which would:				
i) result in substantial erosion or siltation on- or off-site;			X	
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;			X	
iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or			X	
iv) impede or redirect flood flows?			X	
4. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?				X
5. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?			X	

1) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface of groundwater quality?

Less than Significant Impact. Under Section 402 of the Clean Water Act, the U.S. Environmental Protection Agency (EPA) has established regulations under the National Pollution Discharge Elimination System (NPDES) program to control direct storm water discharges. In the City of Glendale, the Los Angeles Regional Water Quality Control Board (RWCQB) administers the NPDES permitting program and is responsible for developing NPDES permitting requirements. The NPDES program regulates industrial pollutant discharges that include construction activities. Implementation of the Project will be required to comply with all of the NPDES requirements, including the submittal and certification of plans and details showing both construction and post-construction Best Management Practices (BMPs) that are integrated into the design of the proposed Project. The submittal of a Standard Urban Stormwater Mitigation Plan (SUSMP), as approved by the City Engineer, will also be required to be integrated into the design of the proposed Project. Therefore, implementation of the proposed Project is not expected to violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface of groundwater quality since the proposed Project will be required to comply with applicable permitting requirements. No significant impacts are anticipated. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less than Significant Impact. The proposed Project does not involve additions to or withdrawals of groundwater. The amount of hardscape proposed on the Project Site is similar to the current on-site conditions. Development of the Project would not result in a substantial increase in runoff in the surrounding neighborhood since the area is already densely developed. The proposed Project would

not significantly interfere with the recharge of local groundwater or deplete the groundwater supplies. No significant impacts would occur as a result of the proposed Project. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of stream or river or through the addition of impervious surfaces, in a manner which would:

i) result in substantial erosion or siltation on- or off-site;

Less than Significant Impact. The Project Site is situated on a relatively flat lot currently developed with buildings used by the Star Mazda vehicle dealership for sales, office, and vehicle servicing. The portion of the site where the new building will be developed is currently a surface parking lot that fronts South Brand Boulevard and West Laurel Street. The majority of water that falls on the site is directed to the adjacent streets: West Los Feliz Road, West Laurel Street, and South Brand Boulevard. The existing situation will not change after implementation of the Project. The Project will not alter the course of a stream or river, since no stream or river is located on the site, nor would the Project result in a substantial increase in runoff, since the Project Site is already developed and the surrounding neighborhood is densely developed. Impacts to drainage patterns would be less than significant.

Furthermore, as part of the proposed Project, the applicant would be required to adhere to conditions under the NPDES Permit set forth by the Regional Water Quality Control Boards (RWQCB), and to prepare and submit a stormwater pollution prevention plan (SWPPP) to be administered throughout the proposed Project construction. The SWPPP would incorporate BMPs to ensure that potential water quality impacts from water-driven erosion during construction would be reduced to a less-than-significant level. Development of the proposed Project would not require any substantial changes to the existing drainage pattern of the site or the area, nor would it significantly affect the capacity of the existing storm drain system. The SWPPP would incorporate BMPs by requiring controls of pollutant discharges that utilize BAT and BCT to reduce pollutants. In addition, in accordance with Chapter 13.42, Stormwater and Urban Runoff Pollution Prevention Control and Standard Urban Stormwater Mitigation Plan of the Glendale Municipal Code, a SUSMP containing design features and BMPs to reduce post-construction pollutants in stormwater discharges would be required as part of the Project. Consequently, impacts are considered to be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;

Less than Significant Impact. The proposed Project would not alter the course of a stream or river. Flood hazards due to heavy precipitation can result in inundation of developed areas due to overflow of nearby stream courses or from inadequate local storm drain facilities, if not sized to accommodate large storm events. The city has developed a flood control system that provides protection for its residents. The amount of surface runoff will not change as a result of the Project. In addition, no Federal Emergency Management Agency (FEMA) designated flood zones are located within the Project Site, as indicated in the City of Glendale General Plan Safety Element (August 2003). Therefore, flooding impacts would be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or

Less than Significant Impact. Please refer to Response J-3 above. The amount of on-site impervious surfaces would not increase significantly as a result of the Project since the site is already fully developed and mostly paved. Impacts from runoff as a result of the proposed Project are anticipated to be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

iv) impede or redirect flood flows?

Less than Significant Impact. Please refer to Response J-3 above. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

4) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

No Impact. Seiches are typically caused when strong winds and rapid changes in atmospheric pressure push water from one end of a body of water to the other, causing the water to oscillate back and forth for hours or even days. The Project Site is not located downslope of any large body of water that would produce a seiche. Tsunamis are large ocean waves generated by sudden water displacement caused by a submarine earthquake, landslide, or volcanic eruption. A review of the County of Los Angeles Flood and Inundation Hazards Map indicates that the site is not within the mapped tsunami inundation boundaries. No impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

5) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less than Significant Impact. The Project Site is not located within a mapped groundwater basin. The Project would be required to comply with the Phase 1 municipal separate storm sewer systems (MS4) permit, requiring runoff to be treated using Low-Impact Development (LID) treatment controls, such as bio-treatment facilities and other hydro-modification features, to improve stormwater quality, and NPDES, requiring the development of and implementation of a SWPPP, which describes BMPs to control erosion and water quality. Therefore, the proposed Project would have a less than significant impact as it would not conflict with a water quality control plan or a sustainable groundwater management plan. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

K. LAND USE AND PLANNING

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Physically divide an established community?				X
2. Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?				X

1) Physically divide an established community?

No Impact. The Project Site is currently developed with buildings used by the Star Mazda vehicle dealership for sales, office, and vehicle servicing. The proposed Project is the construction of a new two-story building to be used for retail sales and office area, and will be located on a portion of the site that currently features a surface parking lot. The Project Site is adjacent to commercial development, a hospital, and other vehicle dealerships. The proposed Project is consistent with the development pattern in the area and the permitted zoning. No established community would be divided as a result of the proposed Project. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

No Impact. The zoning designation for the Project Site is CA (Commercial Auto), and the General Plan designation is Community Services Commercial. The project complies with the land use element of the general plan and the Zoning Code and will not conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the Project. California Assembly Bill (AB) 2097 went into effect on January 1, 2023, and adds section 65863.2 to the California Government Code and prohibits local agencies from imposing or enforcing minimum parking requirements for nonresidential uses, such as the proposed expansion of the existing vehicle dealership. Under AB 2097, the Project is eligible for relief from minimum parking requirements in the zoning code. The Project will require approval from the Design Review Board (DRB) to ensure less than significant impacts to the visual character or quality of the site and its surroundings. As a result, there are no conflicts with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

L. MINERAL RESOURCES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X
2. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				X

1) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

No Impact. The Project Site is located in an area that has been completely urbanized for many years and is not within an area that has been identified as containing valuable mineral resources, as indicated in the City's Open Space and Conservation Element (January 1992). Therefore, development within the Project Site would not result in the loss of availability of a known mineral resource. No impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

No Impact. As indicated in Response L-1 above, there are no known mineral resources within the Project Site. No impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

M. NOISE

Would the project result in:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			X	
2. Generation of excessive groundborne vibration or groundborne noise levels?			X	
3. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				X

1) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Less than Significant Impact.

Construction Impacts

The proposed Project includes construction of a new 2-story, 11,840-square-foot building for an existing vehicle dealership and demolition of a 900-square-foot office building and 8,600-square-feet of a vehicle showroom building originally built in 1958. Construction of the Project would require the use of heavy equipment during demolition, grading/site preparation, installation of utilities, building fabrication, and finishing. Construction activities would also involve the use of smaller power tools, generators, and other sources of noise. During each stage of construction, several types of equipment could potentially be operating concurrently, and noise levels would vary based on the amount of equipment in operation and the location of the activity. The Federal Highway Administration's (FHWA) Roadway Construction Noise Model (RCNM) has compiled data regarding

the noise-generating characteristics of specific types of construction equipment and typical construction activities.

With the use of the RCNM, as detailed in **Appendix D** to this report, the construction noise levels forecasted for the sensitive receptors are presented in **Table 1**, **Estimated Exterior Construction Noise at Sensitive Receptors**. Noise levels would diminish notably with distance from the construction site at a rate of 6 dB(A) per doubling of distance (noise from stationary or point sources is reduced by about 6 dB(A) for every doubling of distance at acoustically hard locations). For example, a noise level of 86 dB(A) Leq measured at 50 feet from the noise source to the receptor would decline to 80 dB(A) Leq at 100 feet from the source to the receptor and fall by another 6 dB(A) Leq to 74 dB(A) Leq at 200 feet from the source to the receptor. These noise attenuation rates assume a flat and unobstructed distance between the noise generator and the receptor. Furthermore, it should be noted that increases in noise levels at sensitive receptors during construction would be intermittent and temporary and would not generate continuously high noise levels. In addition, the construction noise experienced at sensitive receptors during the initial periods of construction (i.e., site preparation/grading/foundations) typically would be reduced in the later construction periods (i.e., interior building construction).

Table 1
Estimated Exterior Construction Noise at Sensitive Receptors

Sensitive Land Uses	Distance to Project Site (feet)	Estimated Construction Noise Levels [dB(A) Leq]	Exceed FTA 90 dB(A) 1-Hour Leq Criteria?
1. Dignity Health Memorial Hospital	34	75.9	No
2. Royal Villa Nursing Home	144	70.4	No
3. Residences & Armenian Ecclesiastical Church to the northwest	391	63.0	No

*While the Project would include construction activities up to the adjacent property lines, consistent with FTA methodology, these calculations are based on distances from the center of the site to the receptors. See **Appendix D** to this report.*

Construction associated with the Project will be required to comply with the City of Glendale Noise Ordinance (GMC Chapter 8.36), which prohibits construction activities between the hours of 7:00 P.M. on one date and 7:00 A.M. of the next day or from 7:00 P.M. on Saturday to 7:00 A.M. on Monday or from 7:00 P.M. preceding a holiday. As the Project would comply with the daytime construction hours established in the GMC, this analysis also uses the FTA's general construction noise criteria of 90 dB(A) Leq (1-hour) to provide additional context for the Project's potential to generate daytime construction noise impacts. While construction activity would increase noise levels in the vicinity of the Project Site (see **Table 1**), the Project's construction activities would generally not exceed the FTA's general construction noise criteria of 90 dB(A) Leq (1-hour) at any sensitive receptors. Furthermore, Project construction would not occur during restricted periods, and thus, the Project would be consistent with the criteria set forth in the GMC. As such, construction noise impacts would be less than significant. This issue will not be further analyzed in the EIR.

Operational Noise

A Noise Impact Analysis was prepared for the project by Giroux & Associates, dated January 8. 2022 (see **Appendix D** to this Initial Study).The new building is proposed to be enclosed, which will significantly reduce the operational noise associated with the existing dealership and the intent is for

the new building to be used for vehicle display, sales offices, and a service reception porte-cochere area located internally between the new building and the existing service workshop. The existing noise environment in the vicinity of the Project Site is dominated by traffic noise from nearby major roadways (South Brand Boulevard to the east, South Central Avenue to the west, and West Lost Feliz Road to the north). Activities associated with the dealership expansion will be similar to the existing operation, including vehicles being displayed and taken for test drives, vehicle sales, and vehicle service reception. No other changes are proposed to the site, and all other buildings and uses are to remain. These activities will take place during the dealership's normal operating hours, and the continued long-term operation of the Project would have a minimal effect on the noise environment in proximity to the Project Site above the existing conditions. The Project will generate a net increase of 5 A.M. peak hour trips, 6 P.M. peak hour trips, and 65 daily trips. However, this increase is diluted by the existing traffic on Brand Boulevard and Laurel Street, and any vehicular noise attributed to 65 additional daily trips would not be perceptible. By way of reference, it takes a doubling of traffic to create even a +3 dBA increase.

As shown in the City's Noise Element, the existing Star Mazda dealership site is located in an area identified as being in two noise contours. The majority of the site is located in the 70 DB and over noise contour, and the southwesterly portion of the site is located in the 65-70dB noise contour. The surrounding land uses include commercial uses along Brand Boulevard and the surrounding streets, as well as Glendale Memorial Hospital, which is located nearby, approximately 350 feet to the west of the site. There are no residential uses in the immediate vicinity of the Project Site. The Project is not anticipated to generate noise above the existing conditions or in excess of the limits contained in the Noise Element because the Project will be constructed to reduce interior noise to acceptable levels as required by the building code. As such, operational noise impacts would be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant Impact.

The FTA provides groundborne vibration impact criteria with respect to building damage during construction activities. PPV, expressed in inches per second, is used to measure building vibration damage. Construction vibration damage criteria are assessed based on structural categories (e.g., reinforced-concrete, steel, or timber). FTA guidelines consider 0.2 inch/sec PPV to be the significant impact level for non-engineered timber and masonry buildings. Structures or buildings constructed of reinforced concrete, steel, or timber have a vibration damage criterion of 0.5 inch/sec PPV pursuant to FTA guidelines. Although the nearby structures appear to be constructed of reinforced concrete, steel, or timber, this analysis conservatively applies the 0.2 inch/sec PPV threshold typically applied to non-engineered timber and masonry buildings. The vibration levels at nearby structures are shown below in **Table 2**, below.

Table 2
Vibration Levels at Off-Site Structures from Project Construction

Off-Site Structures[a]	Distance to Project Site (ft.)	Vibration Threshold (PPV)	Estimated PPV (in/sec)
1. Dignity Health Memorial Hospital	34	0.2 in/sec	0.056
2. Royal Villa Nursing Home	144	0.2 in/sec	0.006
3. Residences & Armenian Ecclesiastical Church to the northwest	391	0.2 in/sec	0.001

*These calculations are based on distance from the site boundary to the structures. See **Appendix D** to this report.*

The nearest off-site structure to the Project Site is the Dignity Health Memorial Hospital. The maximum vibration velocities predicted to occur at the nearest off-site structure would be 0.056 in/sec PPV. As shown in **Table 2**, Project construction vibration levels would not have the potential to exceed the standard 0.2 in/sec threshold established by the FTA. This impact would be less than significant, and this issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

No Impact. The Project Site is neither located within an airport land use plan nor is it located within two miles of a public airport or public use airport. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

N. POPULATION AND HOUSING

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			X	
2. Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?				X

1) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Less than Significant Impact. The proposed Project does not include any residential uses and would not result in new population growth in the city. Any indirect growth occurring as a result of employees relocating to the area would be inconsequential such that impacts would be less than significant, since the construction jobs resulting from the Project would be temporary, lasting approximately 12 months. Since the Project Site is located within an urban area and is currently served by existing circulation and utility infrastructure, no major extension of infrastructure is required

as part of the proposed Project. Additionally, no expansion to the existing service area of a public service provider is required. Therefore, development of the Project Site would not induce population growth, and impacts would be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

No Impact. No residential dwelling units currently exist on the Project Site. Therefore, no housing or residential populations would be displaced by development of the Project, and the construction of replacement housing elsewhere would not be necessary. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

O. PUBLIC SERVICES

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?			X	
b) Police protection?			X	
c) Schools?			X	
d) Parks?				X
e) Other public facilities?				X

1) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

a) Fire protection?

Less than Significant Impact. The City of Glendale Fire Department (GFD) provides fire and paramedic services to the Project Site. The nearest fire station is Station No. 22, located at 1201 South Glendale Avenue (0.4 miles north) and can adequately service the site without the need for new or the physical alteration of existing government facilities. The proposed Project will be required to comply with the Uniform Fire Code and to submit plans to the Glendale Fire Department at the time building plans are submitted for approval. Impacts to fire protection facilities and services are anticipated to be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

b) Police protection?

Less than Significant Impact. The Glendale Police Department (GPD) provides police services to the Project Site. The nearest police facility is located at 131 North Isabel Street, which is 1.7 miles

north of the subject property and can adequately service the site without the need for new or physical alteration of any existing governmental facilities. The site is located in an urban, developed area of the city. Impacts on police protection facilities and services are anticipated to be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

c) Schools?

Less than Significant Impact. Section 65995 of the Government Code provides that school districts can collect a fee on a per-square-foot basis to assist in the construction of or additions to schools. Pursuant to Section 65995, the Project applicant is required to pay school impact fees to the Glendale Unified School District prior to the issuance of building permits. Payment of these fees under the provisions of Government Code Section 65995.5 reduces impacts to less than significant levels. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

d) Parks?

No Impact. The proposed Project would not involve the development or displacement of a park. The Project Site is located in the Commercial Auto Zone, where an automobile dealership is a permitted use, and the Project Site is not planned for use as a park. In accordance with the requirements of the City of Glendale Municipal Code (Ordinance No. 5820), as a vehicle sales dealership, the applicant is exempt from paying the Development Impact Fee, as the City has already determined that such uses and facilities do not create any impacts on parks. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

e) Other public facilities?

No Impact. The proposed Project is not anticipated to increase the demand for library services. In accordance with the requirements of the City of Glendale Municipal Code (Ordinance No. 5820), the Project applicant is exempt from paying the Development Impact Fee to the City since the use is a vehicle sales dealership and the City has already determined that such uses and facilities do not create any impacts on libraries. No impact would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

P. RECREATION

	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?			X	
2. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?			X	

1) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Less than Significant Impact. The proposed Project is consistent with the Land Use Element, which designates the Project Site for commercial uses. The proposed Project does not include the development of new housing, which would result in a new residential population. The potential demand for new parks, or increased maintenance and additional improvements at existing parks, would be minimal due to the nature of the proposed Project. The incremental increase of commercial space will not substantially increase the use of the City's community parkland, such that any noticeable impact on the community parks will occur, especially given that the use is already existing. Therefore, the proposed Project is not anticipated to result in significant impacts associated with the demand of existing park facilities. In accordance with the requirements of the City of Glendale Municipal Code (Ordinance No. 5820), the applicant is exempt from paying the Development Impact Fee to the City since the proposed use of the Project Site is an auto dealer and the City has previously determined that such uses and facilities do not create any impacts on parks. No significant impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

Less than Significant Impact. As discussed above in Response P-1, the proposed Project is not anticipated to create a significant demand on park facilities that would require the construction or expansion at existing public recreational facilities. In addition, the Project does not include or require the construction or expansion of recreational facilities. Therefore, no significant impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

Q. TRANSPORTATION

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Conflict with program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?			X	
2. Conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?			X	
3. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?				X
4. Result in inadequate emergency access?			X	

1) Conflict with program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

Less than Significant Impact. The City of Glendale General Plan Circulation Element sets forth goals and objectives to provide direction for continuing development throughout the city. This element seeks to preserve and enhance quality of life in the city to allow for commerce to thrive, protect the character of residential neighborhoods, and minimize adverse environmental impacts. The Project Site is rectangular shaped with frontage on South Brand Boulevard, West Los Feliz

Road, and West Laurel Street. The Circulation Element identifies both South Brand Boulevard and West Los Feliz Road as being major arterials, and West Laurel Street is identified as a local street. Major arterial roadways provide motorists with continuous, efficient routes by utilizing traffic signals, parking limitations and prohibitions, and access to maximize traffic flow and distribute traffic to freeways, other arterials and streets, activity and business centers, and other major traffic generators. Local streets are designed to provide low-volume traffic from residences to arterial streets, such as South Brand Boulevard and West Los Feliz Road. The majority of the traffic visiting the Project Site will continue to utilize South Brand Boulevard to gain access onto the site. No new driveway entrances are proposed, but along West Laurel Street, an existing driveway apron will be relocated. The relocation of the existing driveway apron could result in an increase in traffic as a result of the proposed Project, but it is not anticipated to be significantly greater than the existing on-site conditions.

Per Map 6-2 of the City's Bicycle Transportation Plan (2012), South Brand Boulevard and West Laurel Street are not identified or proposed bikeways. West Los Feliz Road is identified as a proposed class III (sharrow) bike route. The City is currently in the process of updating the Bicycle Transportation Plan; the classification of South Brand Boulevard and West Laurel Street remains unchanged, and along this portion of West Los Feliz Road, the classification is proposed to go from a sharrow bike route to a protected bike lane that physically separates traffic and parking lanes from the bike lane. The proposed Project will not conflict with this proposed bike route because there are no changes proposed along West Los Feliz Road. Therefore, less than significant impacts would occur. This issue will not be further analyzed in the EIR.

2) Conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?

Less than Significant Impact. On September 27, 2013, Senate Bill (SB) 743 was signed into law, which created a process to change the way transportation impacts are analyzed under CEQA. SB 743 required the Governor's Office of Planning and Research (OPR) to amend the CEQA Guidelines to provide an alternative to level of service (LOS). OPR updated the CEQA Guidelines and now vehicle miles traveled (VMT) is used to measure transportation impacts under CEQA. In October 2020, the City of Glendale adopted the Transportation Impact Analysis Guidelines (Glendale TIA Guidelines). Glendale TIA Guidelines were used to analyze the Project's impact on the City's transportation system by estimating incremental changes in VMT as well as assessing impacts to pedestrians, bicyclists, transit, hazards, emergency access, and other impacts. The Glendale TIA Guidelines provide several project screening approaches to identify when a project should be expected to cause a less-than-significant impact related to VMT, such as retail projects, public service buildings, small projects (generating fewer than 145 daily vehicle trips), and local schools. A VMT and Trip Generation Evaluation prepared by Stantec, dated February 24, 2023, was provided by the applicant (see **Appendix B** to this Initial Study). The Glendale TIA Guidelines state that retail projects that are 50,000 square feet or less will have a less than significant impact and screen out from a detailed VMT Analysis. Development of the site includes a new 11,840 square foot, two-story building for the existing vehicle dealership, demolition of 9,500 square feet (existing showroom building and portion of vehicle service area), and preservation of 20,730 square feet (existing vehicle service building). When the development is completed, the total square footage will be 32,570, and as such, the Project screens out from a detailed VMT analysis. The Trip Generation Evaluation (by Stantec, dated February 24, 2023, see **Appendix B** to this Initial Study) also evaluated the trip generation for the Project based on trip rates from the Institute of Transportation Engineers (ITE) Trip Generation Manual (11th Edition) and concluded that the Project would generate 65 daily vehicle trips, where the Glendale TIA Guidelines screen out projects that generate fewer than 145 daily trips.

For these reasons, less than significant impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

No Impact. The project would not result in any changes to the existing roadway network. No significant impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

4) Result in inadequate emergency access?

Less than Significant Impact. No changes to the existing roadway network are proposed as a result of the Project. Direct access to the property will be taken from South Brand Boulevard, which is designed as a major arterial in the City's Circulation Element, and West Laurel Street which is designed as a local street. Additionally, a traffic control plan will be required for the construction phase of the Project. The plan will be reviewed and approved by the City's Engineering Division to ensure that emergency access is not impacted during construction. As a result, less-than-significant impacts to emergency access are anticipated. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

R. TRIBAL CULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i) Listed or eligible for listing in the California Register of Historical Resources, or in the local register of historical resources as defined in Public Resources Code Section 5020.1(k), or			X	
ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.			X	

1) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in te1rms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and this is:

i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k), or

Less than Significant Impact. Written notice was given to the Fernandeno Tataviam of Mission Indians, the Gabrielino-Tongva Trip, and Soboba Band of Luiseno Indians, as required by AB 52 and codified in Public Resources Code Section 21080.3.1 et seq. Consultation was not requested by any of the tribes within the 30 days of notice. In addition, no known tribal resources are located on the Project Site. In the event that resources are unearthed during project subsurface activities, all earth-disturbing work must be temporarily suspended or redirected until the Native American Heritage Commission (NAHC) has evaluated the nature and significance of the find. After the find has been appropriately mitigated, work in the area may resume. With implementation of this standard requirement, no significant impacts are anticipated. This issue will not be further analyzed in the EIR.

***Mitigation Measures*:** No mitigation measures are required.

ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Less than Significant Impact

As mentioned previously, no known burial sites exist within the vicinity of the Project Site and the surrounding area. Therefore, the potential for impact on known human remains or a resource determined to be significant by a California Native American tribe is low. No resources have been identified on the Project Site pursuant to the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. Written notice was given to the Fernandeno Tataviam of Mission Indians, the Gabrielino-Tongva Tribe, and the Soboba Band of Luiseno Indians, as required by AB 52 and codified in Public Resources Code Section 21080.3.1 et seq. Consultation was not requested by any of the tribes within the 30-days of notice. As such, impacts would be less than significant. This issue will not be further analyzed in the EIR.

***Mitigation Measures*:** No mitigation measures are required.

S. UTILITIES AND SERVICE SYSTEMS

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?				X

Would the project:	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
2. Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			X	
3. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				X
4. Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?			X	
5. Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?				X

1) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

No Impact. Under Section 401 of the Clean Water Act (CWA), the Regional Water Quality Control Boards (RWQCB) issue NPDES permits to regulate waste discharged to "waters of the nation," which includes reservoirs, lakes, and their tributary waters. Waste discharges include discharges of stormwater and construction-related discharges. A construction project resulting in the disturbance of more than one acre requires a NPDES permit. Construction projects are also required to prepare a SWPPP. In addition, the proposed Project would be required to submit an SUSMP to mitigate urban stormwater runoff. Prior to the issuance of building permits, the applicant will be required to satisfy the requirements related to the payment of fees and/or the provisions of adequate wastewater facilities. The Project would comply with the RWQCB-established waste discharge prohibitions and water quality objectives, which will have to be incorporated into the Project as a design feature. Therefore, no impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Less than Significant Impact. Construction activities associated with the proposed Project would require the use of water for dust control and cleanup purposes. The use of water during construction would be short term in nature. Given that the Project is to expand an existing vehicle dealership, water use for the operation of the site is not anticipated to be significant. Therefore, construction activities are not considered to result in a significant impact on the existing water system or available water supplies.

The Project must comply with the provisions of Glendale's Mandatory Water Conservation Ordinance, as well as the 2022 California Green Building Code Standards (CALGreen) of the Glendale Green Building Code, and the water conserving fixture and fitting requirements per the current California Plumbing Code All new buildings must utilize higher efficiency plumbing fixtures (low-flush toilets, low-flow showerheads and faucets) and automatic irrigation system controllers based on water or soil moisture, and demonstrate an indoor net reduction in the consumption of potable water.

Normal Weather Conditions

The City of Glendale has identified an adequate supply of water to meet future City demands under normal conditions. Future water demand in the City is based on projected development contained in the General Plan.

Dry Weather Conditions

Water supplies from the San Fernando and Verdugo Basins and recycled water would potentially be affected in drought conditions. If there is a shortage in water supply from the Metropolitan Water District of Southern California (MWD), the City of Glendale's distribution system could be affected. However, MWD's completion of the Diamond Valley Reservoir near Hemet added to the reliability of MWD to meet demands. MWD is also proposing contracts with its member agencies to supply water, including supply during drought conditions. These contracts would define the MWD's obligation to provide "firm" water supply to the City.

It is anticipated that during any 3-year drought, the City would have sufficient water supply to meet demand. According to the 2015 Urban Water Management Plan, the City would use less MWD water supplies in the future compared to its current use because of implemented water conservation efforts (such as City Best Management Practices, Water-Efficient Landscape Programs, and Water-Efficient Indoor Programs). With the City's reduction of dependency on imported water from MWD, GWP has a higher level of reliability in meeting water demands during drought conditions. Even with the implementation of the proposed Project, the GWP would continue to have adequate supply to meet citywide demand under drought conditions.

As indicated above, the City would continue to have an adequate supply to meet citywide demand under normal and drought conditions with the proposed Project. As a result, long-term impacts to water supply during operation of the proposed Project under both normal and drought conditions would be less than significant. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

No Impact. Sewage from the Project Site goes to the Hyperion Treatment Plant (HTP), which the City of Glendale has access to through the Amalgamated Wastewater Agreement between the City of Glendale and the City of Los Angeles. The HTP has a dry-weather design capacity of 450 million gallons per day (gpd) and is currently operating below that capacity, at 362 million gpd. As a result, adequate capacity exists to treat the proposed Project-generated effluent. Therefore, the proposed Project would not require the expansion or construction of sewage treatment facilities. No impact would result with regard to impacts on the available sewage treatment capacity. impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

4) Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Less Than Significant Impact.

The City of Glendale is closely monitoring SB 1383 compliance dates and, as a result, will be making significant changes to its solid waste program in order to comply with this regulation. The net result of these changes, and compliance with SB 1383, is expected to increase the life of the landfill due to

a significant amount of previously disposed organics being diverted to organics process facilities. The City of Glendale's Zero Waste Action Plan (2011) contains zero waste policies to increase its diversion rate from landfills and incinerators from 61 percent in 2009 to 70 percent by 2015 of current disposal tonnage of the 262,058 tons per year, and if feasible, 90 percent by 2025. The year 2025 was selected as a target year because this is approximately when the landfill as Scholl Canyon is scheduled to close. By diverting more materials, the life of the existing landfill could be extended significantly, particularly if the communities that share Scholl Canyon implement similar Zero Waste resource management initiatives. Waste reduction strategies within this plan require new buildings to comply with the 2022 CALGreen Code, as well as promote Green Building Policy that provides incentives for construction materials that are more durable, have a longer lifespan, require no additional finishing on-site, have less frequent maintenance and repair cycles, and give credits for products made from recycled content. Given the foregoing, the Project will not generate solid waste in excess of local standards or impair the attainment of solid waste reduction goals. As a result, less than significant impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

5) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

No Impact. The Project will comply with all federal, state, and local statutes and regulations related to solid waste. All construction debris will be disposed of according to applicable federal, state, and local statutes, including Glendale Municipal Code Chapter 8.58. No impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

T. WILDFIRE

If located in or near state responsibility area or lands classified as very high fire hazard severity zones, *would the project:*	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Substantially impair an adopted emergency response plan or emergency evacuation plan?				X
2. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from wildfire or the uncontrolled spread of a wildfire?				X
3. Require the installation or maintenance of associated infrastructure (such as roads, fuel, breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?				X
4. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?				X

1) Substantially impair an adopted emergency response plan or emergency evacuation plan?

No Impact. The California Department of Forestry and Fire Protection (CAL FIRE) maps areas of significant fire hazards based on fuels, terrain, weather, and other relevant factors, pursuant to Public Resources Code §§ 4201-4204 and Government Code §§ 51175-51189. These areas are referred to as Fire Hazard Severity Zones (FHSZs) and are identified for areas where the state has financial responsibility for wildland fire protection (i.e., state responsibility areas or SRAs), and areas

where local governments have financial responsibility for wildland fire protection (i.e., local responsibility areas, or LRAs).

There are three FHSZs mapped for SRAs (moderate, high, and very high), while only lands zoned as very high are identified in LRAs (CAL FIRE 2007). The Project Site is not located within a LRA and is not located near an SRA or a very high FHSZ. As a result, no impact would occur related to wildfire hazards, including emergency response/evacuation, pollutants and uncontrolled wildfire spread, associated infrastructure, or post-fire effects. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

2) ***Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from wildfire or the uncontrolled spread of a wildfire?***

No Impact. As indicated in Response T-1 above, the Project Site is not located within a LRA and is not located near an SRA or a very high FHSZ. No impacts would occur related to wildfire hazards due to slope, prevailing winds, and other factors, which would exacerbate wildfire risks and thereby expose Project occupants to pollutant concentrations from wildfire or the uncontrolled spread of a wildfire. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

3) ***Require the installation or maintenance of associated infrastructure (such as roads, fuel, breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?***

No Impact. As indicated in Response T-1 above, the Project Site is not located within a LRA and is not located near an SRA or a very high FHSZ. No impacts would occur related to the installation or maintenance of associated infrastructure that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

4) ***Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?***

No Impact. As indicated in Response T-1 above, the Project Site is not located within a LRA and is not located near an SRA or a very high FHSZ. No impacts would occur. This issue will not be further analyzed in the EIR.

Mitigation Measures: No mitigation measures are required.

U. MANDATORY FINDINGS OF SIGNIFICANCE

	Potentially Significant Impact	Less than Significant Impact with Mitigation Incorporated	Less than Significant Impact	No Impact
1. Does the project have the potential to substantial degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	X			
2. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)?	X			
3. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	X			

1) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Potentially Significant Impact. The Project may have a potentially significant impact regarding historic resources and hazardous materials and these issues will be further analyzed in the EIR.

2) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)

Potentially Significant Impact. The Project may have a potentially significant cumulative impact and this issue will be further analyzed in the EIR.

3) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

Potentially Significant Impact. The Project may have a potentially significant impact and this issue will be further analyzed in the EIR.

EXECUTIVE SUMMARY

Kaplan Chen Kaplan conducted an historic resource assessment of an automobile dealership located at 1401 S. Brand Boulevard in Glendale, California. The car dealership consists includes seven consolidated parcels located on S. Brand Boulevard between Los Feliz Road and Laurel Street in the South Glendale Commnity Plan Area.

The area was initially developed with dwellings but in the mid-20th Century redeveloped with commercial uses including a concentration of automobile dealerships. In the late 1940s the property was a used car dealership -- a large parking lot with a small temporary sales building. In the mid-1950s, a service building was constructed at the rear of the parcel and in 1958 the property was further developed bringing together the scattered operations of a dealership together.

A Showroom Building was constructed at the corner of S. Brand Boulevard and Los Feliz Road in 1958. The building was a restrained Mid-Century Modern International Style building. The Showroom Building was originally a rectangular building with glazed floor to ceiling windows along three elevations. The use of glass for walls for the showroom was well-established by 1958 when the building was constructed. The Showroom Building has been significantly altered; on the north and south elevations half of the orignal showroom area has had its glazed elevations removed or obscured. This building did not influence the use of glass for vehicle showrooms nor is there any evidence that this Showroom Buidling inspired the design of other showrooms in Glendale.

Over the decades other service buildings and office spaces were added to the facility and buildings merged together with numerous small additions filling in spaces. The service buildings on the property are located at the rear of the parcel with a large surface parking area along S. Brand Boulevard. These are utilitarian buildings with limited fenestration and no architectural details. In front of the buildings is a large parking area that faces S. Brand Boulevard. The parked cars are on display for all passers-by to view – and be enticed to purchase. This has been a standard organizational model for car dealerships throughout the second half of the 20th Century.

The Showroom Building was designed by the architectural firm of Mason and Muntz, architects and engineers with offices located in Vernon. While the firm had a thriving professional practice there is no evidence that they are considered to be master architects. The Showroom Buiding was not featured in any architectural publications or any industry-specific publications.

There is no evidence that supports the whole parcel and its buildings and organization to be eligible for designation as an historic resource. While the restrained Mid-Century Modern Showroom Building retains aspects of its original design, at its west end of the north and south elevations, large sections, almost half, of the original glazed walls have been obscured and the building is not an excellent example of an architectural style.

There are no historic resources on the property at 1401 S. Brand Bouelvard that would be considered eligible for the National Registrer of Historic Places, for the California Register of Historical Resources or for the Glendale Register of Historic Resources.

METHODOLOGY

A comprehensive methodology for research and evaluation the development history of the subject property and surrounds properties determine potential historic eligibility included the following:

- Field review of subject properties in February 2021
- Field review of adjacent area in February 2021
- Photography of subject properties
- Building Permit Research
- Assessor data research
- Research online databases and sources
- Research Los Angeles Public Library and Glendale Public Library online resources
- City Directory research including Review of digitized City Directories, Glendale Historical Society
- Review of aerial and topographic maps
- Research online photographic databases
- Research historic newspaper databases
- Review of Glendale Historic Preservation website
- Review of South Glendale Community Plan Area Historic Resources Survey, South Glendale Community Plan Area Historic Context and the South Glendale Community Plan Environmental Impact Report
- Analysis of research materials/data
- Evaluation of properties in accordance with federal, state and local eligibility criteria

All of the field data and research data were analyzed and evaluated by an architectural historian who meets the Secretary of the Interior's Professional Qualification Standards for Historic Preservation and by an architect who meets the Professional Qualification Standards for Historic Architect.

REGULATORY FRAMEWORK

National Register of Historic Places

The National Historic Preservation Act (NHPA) of 1966 established the National Register of Historic Places (National Register) as an authoritative guide "used by Federal, State, and local governments, private groups and citizens to identify the Nation's cultural resources and indicate what properties should be afforded protection from destruction or impairment."[1] Buildings, districts, sites and structures may be eligible for listing in the National Register if they possess significance at the national, state or local level in American history, culture, architecture or archeology, and in general, are over 50 years old. Significance is evaluated using established criteria:

[1] 36 Code of Federal Regulations, Section 60.

A. Are associated with events that have made a significant contribution to the broad patterns of our history; or

B. Are associated with the lives of persons significant in our past; or

C. Embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or

D. Yield, or may be likely to yield, information important in prehistory or history.

Significance of Association. National Register Bulletin 32, Guidelines for Evaluating and Documenting Properties Associated with Significant Persons, provides guidance on evaluating potential historic association with people who have "made contributions or played a role that can be justified as significant." For association with leaders or prominent families it is necessary "to explain their significant accomplishments" and they "must be compared to those of others who were active, successful, prosperous, or influential in the same field." Most properties nominated for associations with significant persons also are nominated for other reasons and a majority of properties nominated under the association criterion are also significant in the area of architecture or for the area in which the individual(s) achieved recognition.

National Register Bulletin 32 adds that the fact that we value certain professions, or the contributions of certain groups historically does not mean that every property associated with or used by a member of that group is significant. Associations with one or more individuals in a particular profession, economic or social class, or ethnic group will not automatically qualify a property. The contribution must be distinctive: it is not enough to show that an individual has acquired wealth, run a successful business, or held public office, unless any of these accomplishments, or their number or combination, is a significant achievement in the community in comparison with the activities and accomplishments of others.

Integrity. Properties may be eligible for inclusion on the National Register as individual resources and/or as contributors to an historic district. *National Register Bulletin 15: How to Apply National Register Criteria for Evaluation* states that in addition to meeting at least one of the four criteria, a resource should be evaluated to assess its integrity. For individual resources to qualify for inclusion they must represent an important aspect of an area's history and possess integrity. An historic district must retain integrity as a whole, "the majority of the components that make up the district's historic character must possess integrity even if they are individually undistinguished."

The seven aspects of integrity are location, design, feeling, association, setting, workmanship and materials. To "retain historic integrity a property will always possess several, and usually most, of the aspects." For a resource to be evaluated as significant for its design, a "property important for illustrating a particular architectural style or construction technique must retain most of the physical features that constitute that style or technique."

Historic Context. A resource must also be significant within an historic context. *National Register Bulletin 15* states that an historic context explains "those patterns, themes, or trends in history by which a specific…property or site is understood and its meaning…is made clear." To be determined eligible for listing on the National Register a property must possess significance within a historic context and possess integrity.

Historic District. According to *National Register Bulletin 15,* an historic district derives its importance from being a unified entity whose identity as a district "results from the interrelationship of its resources, which can convey a visual sense of the overall historic environment." An historic district is "a definable geographic area that can be distinguished from surrounding properties by changes such as density, scale, type, age, style of sites, buildings, structures, and objects, or by documented differences in patterns of historic development or associations...the boundaries must be based upon a shared relationship among the properties constituting the district."[2]

California Register of Historical Resources

The California Register, based on the National Register, is the "authoritative guide to be used by state and local agencies, private groups, and citizens to identify the state's historical resources and indicate which properties are to be protected." A building, site, structure, object, or historic district may be eligible for inclusion on the California Register if it meets one or more of the following criteria:

1. It is associated with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the United States

2. It is associated with the lives of persons important to local, California, or national History

3. It embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of a master, or possesses high artistic values

4. It has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California, or the nation.

California Office of Historic Preservation Technical Assistance Series #6, California Register and National Register: A Comparison states that in addition to meeting one of the criteria of significance, a resource must "retain enough of their historic character or appearance to be recognizable as historical resources and to convey the reasons for their significance" and "integrity is evaluated with regard to the retention of location, design, setting, materials, workmanship, feeling, and association." Historical resources that "have been rehabilitated or restored may be evaluated for listing."

Series 6 Guidance also states, "Alterations over time to a resource or historic changes in its use may themselves have historical, cultural, or architectural significance." Historical

[2] National Register Bulletin 15, How to Apply the National Register Criteria for Evaluation, pp. 5-6, https://www.nps.gov/nr/publications/bulletins/pdfs/nrb15.pdf

resources that do not retain sufficient integrity to qualify for the National Register may still be eligible for listing in the California Register: "a resource that has lost its historic character or appearance may still have sufficient integrity for the California Register if it maintains the potential to yield significant scientific or historical information or specific data."[3]

The Glendale Register of Historic Resources

The City of Glendale's Register of Historic Resources was established in 1996 as the official list of designated historic resources in the City. A Historic Resource is defined as "any site, building, structure, area or place, man-made or natural, which is historically or archeologically significant in the cultural, architectural, archaeological, engineering, scientific, economic, agricultural, educational, social, political or military heritage of the city of Glendale, the state of California, or the United States."

According to Section 15.20.050 of the Glendale Municipal Code, "upon recommendation of the Historic Preservation Commission, City Council shall consider and make findings for additions to the Glendale Register of Historic Resources. The designation of any proposed resource in the city as a historic resource shall be granted only if City Council first finds that the proposed historic resource meets one (1) or more of the following criteria:

1. The proposed historic resource is identified with important events in national, state, or city history, or exemplifies significant contributions to the broad cultural, political, economic, social, or historic heritage of the nation, state, or city.

2. The proposed historic resource is associated with a person, persons, or groups who significantly contributed to the history of the nation, state, region, or city.

3. The proposed historic resource embodies the distinctive and exemplary characteristics of an architectural style, architectural type, period, or method of construction; or represents a notable work of a master designer, builder or architect whose genius influenced his or her profession; or possesses high artistic values.

4. The proposed historic resource has yielded, or has the potential to yield, information important to archeological pre-history or history of the nation, state, region, or city.

The Glendale Register and Historic Preservation Ordinance do not have any additional eligibility requirements and are silent with respect to age and integrity of potential resources.

Chapter 30.25 of the Glendale Municipal Code allows for designation of historic district overlay zones which enables creation of historic districts that would be subject to special design review process in order to protect historic architecture and features.

[3]California Office of Historic Preservation Technical Assistance Series #6: California Register and National Register: A Comparison, p. 3.

A historic district is "a geographically definable area that possesses a concentration, linkage or continuity, constituting more than sixty percent of the total, of historic or scenic properties, or a thematically related grouping of properties. Resources must contribute to each other and be unified aesthetically by plan or historical physical development. A geographic area may be designed as a historic district if the district meets at least one of the following criteria:

A. Exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history;

B. Is identified with persons or events significant in local, state, or national history;

C. Embodies distinctive characteristics of style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship.

D. Represents the work of notable builders, designers, or architects;

E. Has a unique location or is a view or vista representing an established and familiar visual feature of a neighborhood community or of the city;

F. Embodies a collection of elements of architectural design, details, materials or craftsmanship that represent a significant structural or architectural achievement of innovation;

G. Reflects significant geographical patterns, including those associated with different eras of settlement and program, transportation modes, or distinctive examples of park or community planning;

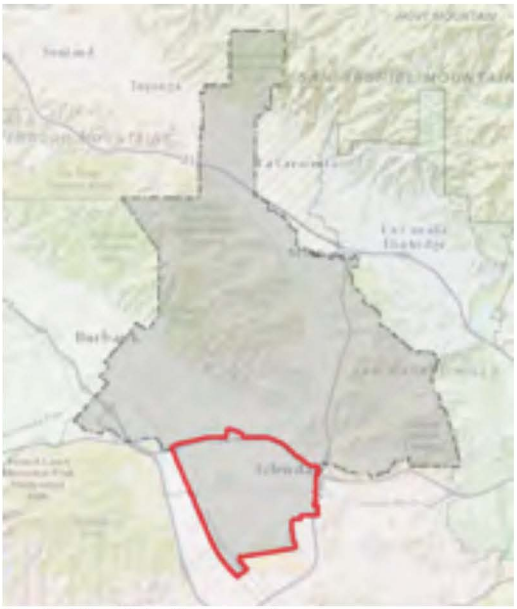

H. Conveys a sense of historic and architectural cohesiveness through its design, setting, materials, workmanship or association; or

I. Has been designed a historic district in the National Register of Historic Places or the California Register of Historical Resources.

PROPERTY LOCATION AND SETTING

The subject property is an automobile dealership located at 1401 S. Brand Boulevard with the Assessor Parcel Number 5640-024-014.

The automobile dealership is located on the southwest corner of the intersection of S. Brand Boulevard and Los Feliz Road in the South Glendale Community Plan Area. Within the South Glendale Community Plan Area, the automobile dealership lies in the center of the south triangular area that began as the town of Tropico in the late 19th Century. and latter annexed to the City of Glendale.

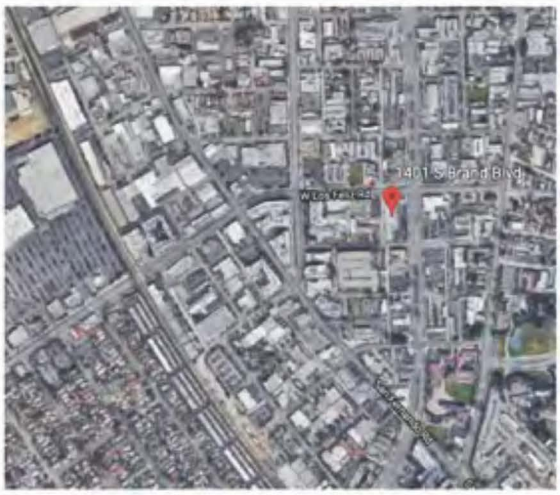

South Glendale Community Plan Area within City of Glendale.

South Glendale Community Plan Area (Source: South Glendale Community Plan EIR)

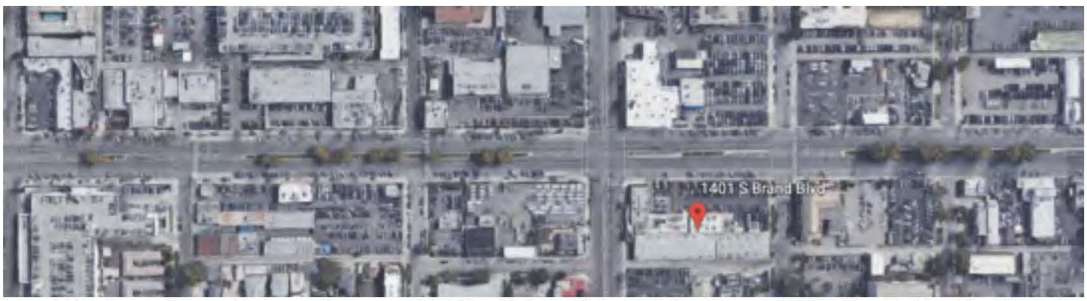

Boundaries of original town of Tropico within South Glendale Community Plan Area (Source,SGCP EIR)

Current aerial view of area of original town of Tropico (Source;: Google Earth, c2020)

The large block on which the automobile dealership is located is bounded by major arterial streets on the north and east, Los Feliz Road on the north and Brand Boulevard on the east. Brand Boulevard is a major north-south commercial street that runs from the southern border of Glendale (as an extension of Glendale Boulevard) northward through Glendale's downtown to its terminus north of the 134 Freeway at Kenneth Road.

Brand Boulevard from Palmer Avenue t200 South block) to Eulalia Street (1500 South block) (Google Earth, c2020)

The large block is bounded by Central Avenue, another north-south arterial street on the west end of the block and on the south by Laurel Street, originally a residential street.. Laurel Street functions as a vehicular entrance to the facilities of the Glendale Memorial Hospital and Health Center which occupies about three-quarters of the large block. The automobile dealership property is located on the east end of the block, separated from the health center by an alley.

HISTORIC CONTEXTS

Context: Commercial Development in Glendale and the Automobile Sales Industry

The *Historic Preservation Element of the General Plan* provides historic context for the commercial development of Glendale. It states "at the beginning of the twentieth century commerce in Glendale developed primarily in response to the daily needs of the growing residential community. There were, however, a few businesses including health care, banking, and aviation that provided employment opportunities and attracted patrons from outside the city."[4] The initial center of Glendale's business district was at the intersection of Glendale Avenue and Third Street (Wilson). However, with the beginning of commuter train service on the Pacific Electric rail line connecting Glendale to downtown Los Angeles, Brand Boulevard became the principal business street in the city. Most of the early commercial structures were wood frame buildings, which were later replaced with two-story commercial structures.

In the early 20th century, commercial development took the form of simple styling known as the "taxpayer block". As described by architectural historian Chester Liebs in *Main Street to Miracle Mile*, the taxpayer building block "consisted of a single row of shop fronts, although some were capped by an additional story or two of lofts or offices." These structures were generally considered "as interim improvements designed to produce enough revenue to pay the taxes and hold the property for the future. Hence these buildings were often referred to as 'taxpayers.'"[5]

As residential development boomed in the 1920s, the commercial development needed to support the growing town continued throughout the1920s with Glendale's downtown center shifting to the intersection of Brand Boulevard and Broadway. The city's first substantial commercial structure, a four-story business block (office building), was constructed in 1922 at Brand Boulevard and Wilson Avenue. The *Historic Preservation Element* highlights the development of Glendale as a banking center, noting the growth of the industry (eight banks by the mid-1920s) with substantial structures constructed in

[4] *City of Glendale Historic Preservation Element of the General Plan*, p. 19.
[5] Liebs, C., *Main Street to Miracle Mile,* p. 12.

the downtown area. Other important industries including health care and aviation were important to Glendale's commercial development.

A significant sector of commercial growth in Glendale was from automobile dealerships. Construction of automobile dealerships started in downtown Glendale. Initially dealers were clustered on Brand Boulevard north of Colorado Street but moved south along the boulevard. The first dealership on Brand Boulevard was a Ford Dealership opened by Jesse E. Smith in 1915. By 1920 dealers had established the Glendale Motor Car Dealers Association and by 1925 there were 18 dealers in the group.[6]

Brand Boulevard became the avenue for automobile dealerships in Glendale. Brand Boulevard ran from Tropico (the southernmost area of Glendale) northward through Glendale. The Pacific Electric Railway was established in the early 20th Century and connected downtown Los Angeles and Glendale traveling along Brand Boulevard in Glendale. In the teens and 1920s many people were purchasing their first automobile and used the interurban railroad to reach automobile dealerships and the stretch of Brand Boulevard south of downtown Glendale emerged as a corridor of automobile dealerships.

City Directory listings provide a snapshot of the location of automobile dealerships in Glendale. In 1925 there were 24 automobile dealers listed in the City Directory and 13 were located on Brand Boulevard. During the Great Depression the number of dealers declined to 17 with 11 of them located on Brand Boulevard. At the end of World War II, in 1945, the number of automobile dealerships had grown to 39 with 23 of them located on Brand Boulevard. The first listing for car sales at 1401 S. Brand Boulevard, appeared in the 1945 City Directory as the Prager Car Company.

By 1949 the number of automobile dealers included 39 new car dealers with 20 located on Brand Boulevard and 54 used car dealers with 31 of them located on Brand Boulevard. New car dealerships on Brand Boulevard included Cadillac, Chevrolet, Chrysler, DeSoto, Nash, Oldsmobile, Packard, Plymouth, Pontiac and Studebaker.

The pace of overall construction slowed in the1930s due to the Great Depression but after World War II a period of major economic growth and new prosperity marked the mid-20th century in Glendale. The decades 1950s to 1970s saw expansion of Glendale's downtown and redevelopment resulting in many older buildings being demolished and replaced by new structures or to make way for surface parking lots.

Throughout the 20th century, Glendale's downtown and commercial corridors such as Brand Boulevard evolved from initial development that included residences and evolved and expanded to commercial use through several waves of redevelopment.

Context: History of Automobiles: Evolution of Dealerships Marketing and Design

The 20th Century was the century of the automobile with over 3000 different nameplates sold in the U.S. Competition for the market began in the early decades of the century and included vehicles powered by batteries as well as those propelled by the combustion engine.

---

[6] Yamada, Katherine, "Verdugo Views: Brand Boulevard of Cars has Roared since the 1920's." Glendale News-Press, Sept. 28, 2012.

.

Between 1914 and 1917 the output of automobiles jumped from 500,000 to 1.9 million and included manufacturers such Willys-Overland, Buick, Chevrolet and Dodge. Creation of General Motors Acceptance Corporation in 1919 allowed a greater number of people to finance automobiles on credit. And Henry Ford's Model T automobile introduced an affordable car to the general public. In Los Angeles County automobile registrations were less than 20,000 in 1910 but exploded to 100,000 by 1920.[7] By the time of the first World War purpose-built automobile dealerships began to appear.

In the 1920s General Motors began to make changes to its models each year and other manufacturers followed. Ford Motor Company introduced a new model (Model A) which was available in a range of colors. The business model evolved to that of "planned obsolescence" which resulted in improved vehicles and every changing design. As a result, a used car market began to emerge in the 1920s. By the end of the 1920s car registrations in Los Angeles County had grown to 800,000.

Even throughout the Great Depression of the 1930s car ownership remained strong with car registrations dropping only 10 percent and with used car sales rising. However, the Great Depression took a toll on smaller manufacturers and many were forced out of business. In the 1940s resources needed for World War II resulted in cessation of civilian car production and by the end of the War there was a pent-up demand for automobiles: in 1949 6.2 million cars were produced in the U.S..

Although the Korean War conflict of the early 1950s slowed production of civilian cars, it quickly picked up at that War's end in the mid-1950s. After the wars, in the late 1950s, cars were defined by "fins, glitter and three-toned paint" but this exuberance was tempered by a recession at the end of the decade. However, by the early 1960s, 80 percent of all U.S. families owned a car. The 1960s saw the introduction of "muscle cars" such as the Mustang and GTO and Japanese imports entered the U.S. market. In the 1970s new and tighter environmental and safety regulations were required and during this period the price of a car doubled.

The first U.S. dealership was established in Wyoming in 1913. In his book on *The American Car Dealership*, historian Robert Genat observed that the first car dealerships were done through livery stables, traditional carriage dealers, bicycle sales and repair shops and blacksmith shops. As dealerships were initially located in the downtown/central business districts of cities, many dealerships began in converted storefronts with a traditional relationship to the street. Dealers established their own association, National Auto Dealers Association, in 1917 and it grew to over 30,000 members by 1934.

As early as the 1910s the term "Auto row" appeared in newspapers to describe clusters of automobile showrooms and by the 1920s purpose-built automobile dealerships were being constructed. At that time while there was no cost to obtain a franchise, in order to sell new automobiles a franchisee had to have a facility from which to sell and service its automobiles. Requirements for dealerships included signage, space for an inventory of parts and space to keep at least one new model on site at all times as a demonstration model. Throughout the 1920s automobile showrooms were built in central business

[7] Survey LA, Citywide Historic Context, Commercial Development and the Automobile, p. 5.

districts which were accessible by public transit – an important factor as most buyers did not yet own cars and arrived by streetcar. Showroom buildings retained the traditional urban relationship to the street and their designs adopted "the historicist styles that characterized the elite architecture of the city" and "generally the only feature on the street front that identified the building as an auto-service facility was the use of factory sash for the large windows."[8]

The typical automobile dealership showroom in a suburban/small city "continued the traditional pattern of being set hard against the street …(and) the common façade composition consisted of an elaborate center entrance and symmetrically flanking show windows." Buildings used historicist styles common in central business districts as well as popular architectural styles of the period, such as the Spanish Colonial Revival style. The sparer Streamline Moderne style with its abstract lines, curves and circles became the popular choice for dealerships in the 1930s.[9]

By the 1930s as more potential customers already owned cars, dealerships required space for parking and showrooms moved out of the central business districts and along major arterial corridors. The organization of the showroom was a "front complete with large expanses of glass, service bays to the rearm, and adequate parking alongside for used cars and customer circulation. The showroom itself , with its expanses of glass maintained its position directly on the street, without a setback.. with an integral sign featuring the name and emblem of the brand it sold."[10]

The strong demand for cars in the late 1940s resulted in new purpose-built dealerships being constructed. At that time manufacturers provided dealers with planning guides for design of new showroom facilities. These designs supported car sales, ancillary merchandise/parts and services. New cars were showcased through well-organized storefronts that were considered one of the best means of advertising new cars and services.

Optimum siting for a dealership was along major streets such as arterial corridors, with corner locations desirable. Car manufacturers' design manuals of the 1940s "carefully considered issues of location and design." These manuals noted that dealerships should "be placed along arterials on large plots of land…[so] potential customers could have full view of the showroom while waiting for red lights." This had been "a common practice since the 1930s." [11]

The car dealerhip of the mid-20th Century was to be "a procession of visual delights to greet customers: first the new cars, seen through a glare-free expanse of glass, and then the service wing, providing potential customers with the assurance of care in the future. The final element should be the used car lot, arranged with the best models in front."[12]

The main purpose of the car showroom building's design was to increase selling efficiency by optimizing viewing into the showroom and supporting the brand(s) with

[11] Survey LA, Citywide Historic Context, Commercial Development and the Automobile, p. 37.
[12] Survey LA, Citywide Historic Context, Commercial Development and the Automobile, p. 37.

signage. The designs used "simple devices to catch the eye of the customer: size, contrast, pattern, movement, color and brightness….the dealership's store front width [was] effectively increased by angling showroom windows, recessing doors or using setbacks."[13]

Beginning in the late 1940s and early 1950s auto showrooms were typically "subdued Mid-Century Modern designs, with flat roofs and plain surfaces." The "most common architectural approach was to treat the showroom as a minimalist Mid-Century Modern container." The architecture was constrained as it was secondary to the merchandise and thereby kept subdued.[14]

Dealerships "opened the interior to the street. Every attempt was made to make the glass that separated the inside from the outside as inconspicuous as possible" to create a "visual front" which was often achieved with "large panes of glass supported by small division bars" and the way "to reduce glare was to splay the top of the glass outward" because "windows tilted away from the sky create unnatural reflections that can distract attention away from the car in the showroom." Additionally, "the bulkhead at the base of windows must be low enough so as not to block the view of the lower half of the car." And the "goal of any showroom is to have the fewest number of barriers blocking the potential customer's view of the car."[15]

An important feature of the mid-century dealership was detached signs that "became a free-standing and increasingly dominant, element." The detached sign was "enormous by earlier standards" and served "as a giant billboard for the corporate logo."[16]
The importance of the auto showroom declined in the later 20th Century. While the showroom "remained the lace to purchase and service a car .. increasingly as a structure showrooms retreated from the road, behind parking lots, and became less visible. Instead, motorists were greeted by row upon row of new cars parked outside…the showroom and the service bay took on a utilitarian form and only the dealer sign, free-standing and standardized for the brand, attracted attention."[17]

Historian Chester Liebs describes the evolution of the car dealership showroom:

> " While the format for dealership buildings has remained basically unchanged, exteriors have been dressed ove the years in a predictable succession of architectural garments. At war's end, new showroom designs still displayed the rounded corners and oval windows of the Streamline Moderne. By the late 1940s, utilitarian Modern with plain surfaces, flat roofs, visual fronts, and ribbon windows had come into vogue. A decade later, soaring roofs, canted fronts, and other utterances of the Exaggerated Modern held sway, only to be supplanted, beginning in the mid-1960s, by the shingled mansards of the Environmental Look."[18]

[18] Liebs, C., *Main Street to Miracle Mile,* p. 90.

Historian Robert Genat observes "the U.S. car dealership has evolved from sheds and small stores to moderate-sized purpose-built facilities to multi-thousand square foot mega-dealers in vast auto malls. Along the way, dealers learned how to merchandise the cars and their business."[19] The sale of automobiles continues to evolve with sales of cars (including used cars) migrating to online ordering and direct delivery to the buyer. While some dealerships will maintain some showroom space to display models, inventory will no longer need to be kept on site. In addition, the area required for service operations will likely shrink with the transition from the combustion engine to zero-emission vehicles requiring a different type and level of service.

AREA AND PROPERTY DEVELOPMENT HISTORY

The subject property at 1401 S. Brand Boulevard is located in the Tropico Boulevard Tract which was recorded in 1903 by the Title Guarantee and Trust Company with L.C.Brand as Secretary and E.W. Sargent as Vice-President. The northern boundary of the tract was Tropico Street, today known as Los Feliz Road.

The north-south running Brand Boulevard bisected the triangular shaped Tropico Boulevard Tract and contained an electric railway right of way. The subject property, the automobile dealership at 1401 S. Brand Boulevard is located on seven parcels in Block 7 of the Tract – at the northernmost area of the Tract on the west side of Brand Boulevard.

Tropico was established as a township in 1887 and was once part of the Rancho San Rafael. The Tropico Improvement Association was established in 1900 to promote development of the town and secure an interurban rail line connecting downtown Los Angeles to the town. Tropico became an independent city in 1911 but just seven years later, in 1918, it was annexed to the City of Glendale.

[20] Larger image of Tract in Map Attachments

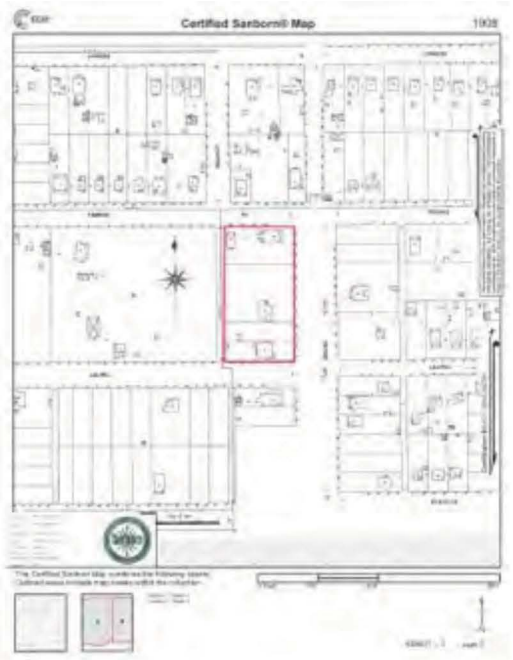

Block 7 of Tropico Boulevard Tract

Current aerial view of Block 7 of Tropico Boulevard Tract(Google Earth, c2020)

Sanborn Maps show the development of the area around the subject property. The subject property consists of seven parcels on Block 7 as shown in the Tropico Boulevard Tract Map. By the publication of the earliest Sanborn Map in 1908, several of the parcels had been consolidated. The 1908 Sanborn Map shows the area of the Tropico Boulevard Tract and its Block 7, developed with one-story single-family dwellings; the area north of Tropico Boulevard was also developed with single family dwellings. The 1919 Sanborn Map shows the integration of Tropico with Glendale post-annexation with Brand Boulevard widened north of the former Tropico Boulevard (known as Los Feliz Road by 1919); the area was still sparsely developed with single-family dwellings. The 1925 Sanborn Map shows the beginnings of change with both institutional use and non-residential use along Los Feliz Road.

1908 Sanborn Map[21]

1919 Sanborn Map

[21] Larger versions of Sanborn Maps in Attachments

1925 Sanborn Map

1950 Sanborn Map

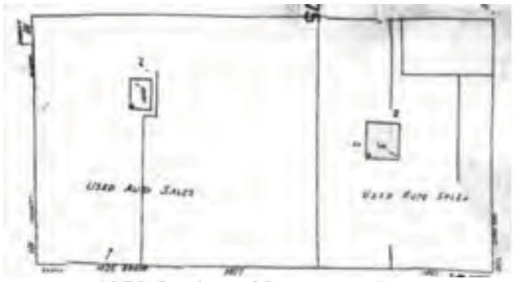

1970 Sanborn Map

The 1950 Sanborn Map reflects the evolution of Brand Boulevard into a commercial corridor with a concentration of automobile sales businesses. The blocks to the north and south of the subject property contained used car sales lots. On the block between Los Feliz Road and Laurel Street both sides of Brand Boulevard were primarily open space used for automobile sales. And the parcels on Block 7, the subject property, had been consolidated to form two large parcels.

.

In 1950 the subject property contained two used car sales businesses. The operation on the north end had a building at the northwest corner of that parcel and a small square store in its center. The business on the lots to the south had only a small rectangular structure in the middle of the parcel.

By 1958 there were 23 new car dealers and half of them were located on Brand Boulevard. New car dealerships included Cadillac, Chevrolet, Chrysler, Edsel, Imperial, Lincoln-Mercury, Oldsmobile, Plymouth, Pontiac, and Rambler. Also, in 1958 there were 46 used car dealers with more 63 percent of them (29) located on Brand Boulevard, including California Motors which was located at 1401 S. Brand Boulevard. The number of new car dealers remained stable throughout the 1960s with 25 new car dealers listed in 1971 with 18 of them, almost 75 percent, located on Brand Boulevard including Los Feliz Ford at 1401 S. Brand Boulevard..

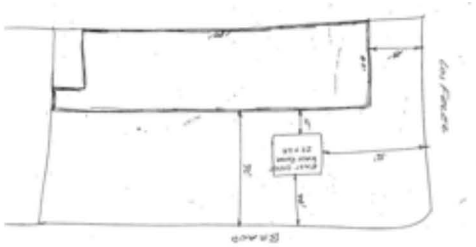

1950 Sanborn Map excerpt

1964 aerial image enlargement

The first building permits for the property known as 1401 S. Brand Boulevard date from 1948 for Lot 6, the southernmost portion of today's property. The owner and business was Honest John Inc., which sold used cars. The permits were for a garden wall along the south side of the property, for signs, and retractable awnings. A 1950 permit was to add a toilet room to an existing office building for owner R&H Motors, Inc.

In 1955 a building permit was taken out by property owner Tommie Vaughn Motors to construct an "auto storage and service building." The owner was listed as the contractor and the architect was a civil engineer, Thomas Jewell. The one-story building was located on the alley with exterior brick walls.

1955 Sketch showing auto storage and service building

By 1958 the two large parcels had been consolidated into a single parcel with Los Feliz Road on the north and Laurel Street on its south. That year the owner of the property at 1401 S. Brand Boulevard, California Motors, applied for a building permit (56483) to

construct a "sales and service of automobiles" building. The architects were Mason and Muntz and the contractor was Peter Kiewit and Son. The building was to be a "maximum of two stories" and 20 feet at its highest point. The exterior walls were to be of brick, stud & plaster, glass, interior walls of stud & plaster and floors of concrete and terrazzo. And the cost of the building was listed as $100,000.

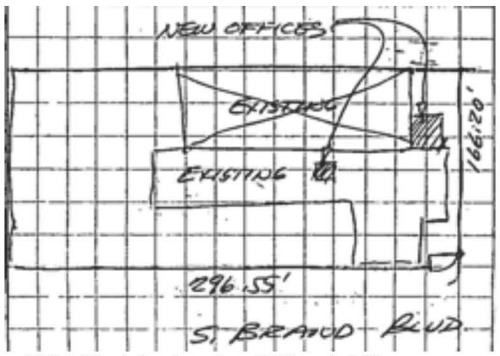

A three paragraph article in the *Los Angeles Times* announced the opening of California Motors, which was a Ford dealership that combined all of the dealer's "previously scattered major facilities at one location" that provided space for both new and used car sales. The showroom was described as a "jewel Box" building "because of its display room encased in 3,000 square feet of 12-foot-high glass." The property also contained "administration offices, service and parts departments [which] occupy 26,000 square feet of covered area in a block-long space on Glendale's automobile row."[22] The showroom was a new building; existing buildings on the property comprised most of the 26,000 square feet referenced in the article.

The firm of Mason and Muntz was a successor to the firm of Caldwell, Mason and Muntz of Southgate which had been established in 1946. Ernest O. Caldwell and E. Keith Mason were engineers while Donald D. Muntz was an architect. Muntz attended both the University of Southern California and the University of California extension program. He worked as a draftsman for architect T.J. Russell between 1948 and 1950. He joined the firm of Caldwell and Mason in 1950 and became a partner in 1952. In 1956 the firm moved offices to Vernon and shortly after that Caldwell left the firm. It continued on into the mid-1960s as Mason and Muntz and Associates.

The practice provided engineering and architectural services for industrial and commercial clients. Projects included plants and retail stores for Firestone Tire and Rubber Co., research laboratories and offices, industrial plants as well as office buildings and shops, and maintenance and operational area buildings for the Los Angeles City Board of Education.[23] The first half of the 1960s saw relatively minor changes to the property with the relocation of an office in 1960 (owner was the contractor), addition of new stairs, change of conference room and painting in1961 (contractor E.T. Howard Co.).

In 1964 new office space, one-story with brick exterior, was added to the Los Feliz Road elevation. (owner was the contractor). In 1967 there was damage to the automobile service building located along the alley at the west end of the property and repairs were made to the building. Also, in 1967 a permit was issued to "add two walls to form 10' X 10' service area" (John P. Edwards, architect, and the owner as contractor).

[23] "Firm's New Offices Located in Vernon," *Los Angeles Times*, October 7, 1956.

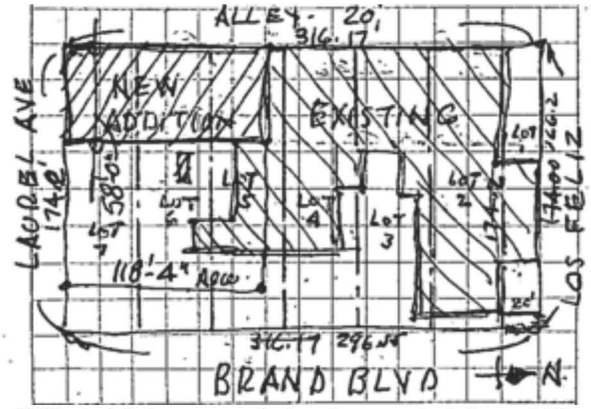

1964 Sketch showing Office Addition

1967 Sketch showing Fire Damage Repair

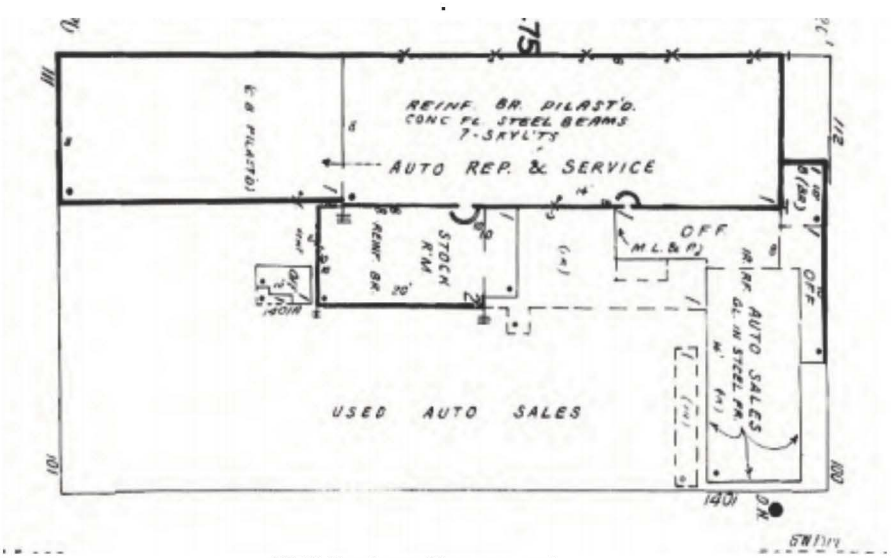

In 1968 another service building was added to the property. Its use was for a Body Shop, a "one-story concrete block addition to existing masonry building." The architect was Mal Gianni and the contractor was Kalish Construction. With the construction of this building, the service buildings ran along the west property line at the alley from Los Feliz Road to Laurel Street. In 1971 a permit was issued to cut new openings in the long service and storage building. Lloyd Dysland was the structural engineer for the project and the contractor was Academy Construction, Inc. The building permit files for the property between the 1950s and current day include many electrical and plumbing, lather/plastering and re-roofing permits.

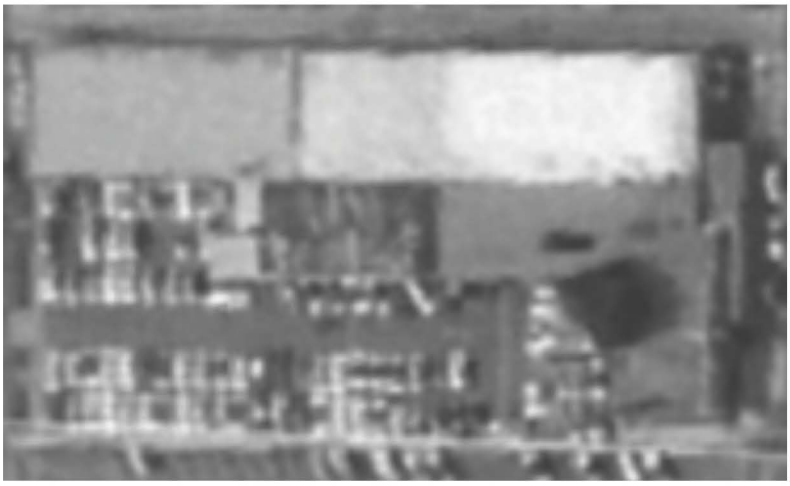

1968 sketch from permit showing new building addition

In addition, there are many permits for signs on the property to reflect changes in ownership and automobile sales franchises. There are no signs remaining on the property from the period when the 1958 showroom was opened.

In the late 1940s the property was known as Honest John's cars; in 1950 it was R&H Motors and from 1952 until c1956 it was Tommie Vaughn Motors. From c1957 to 1967 the property was known as California Motors. In 1968 it was Phil Hall Oldsmobile. In 1970 it became Los Feliz Ford. The 1970 Sanborn Map shows the Showroom was a long rectangular building. In the 1990s the dealership operated under the "Star" name first as Star Chrysler Jeep , Star Ford, Star Lincoln-Mercury and today as Star Mazda.

1970 Sanborn Map excerpt

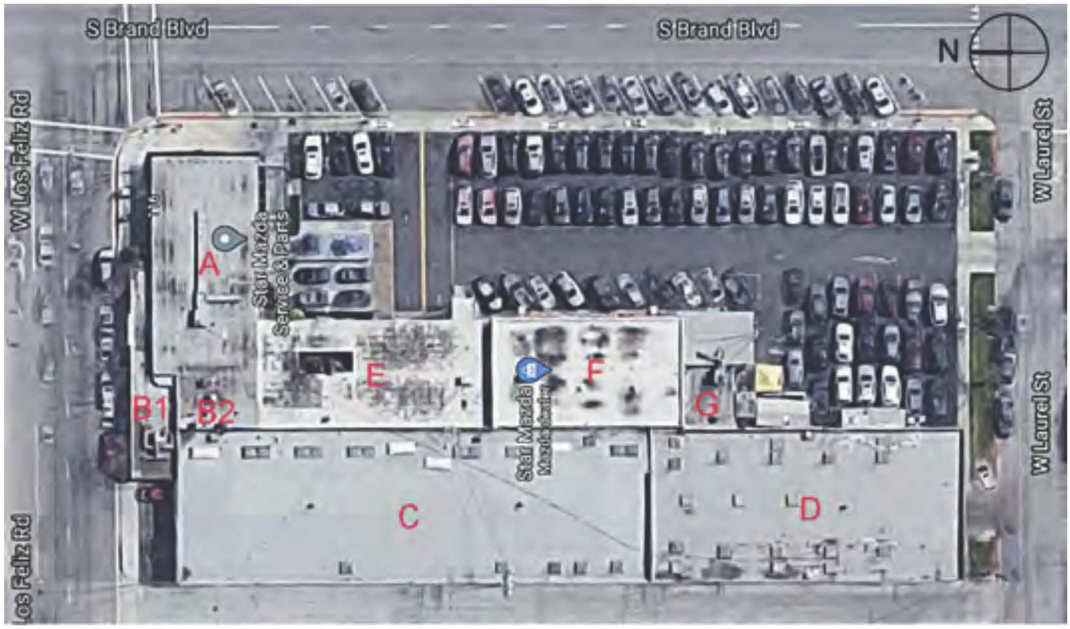

1970 aerial image enlargement

PROPERTY DESCRIPTION

The subject property consists of seven parcels that were consolidated into one consolidated parcel. There are multiple buildings on the parcel. About 40 percent of the property is surface parking area used for display and storage of automobiles. For the purpose of this report the buildings on the property have been designated as Buildings A through G:

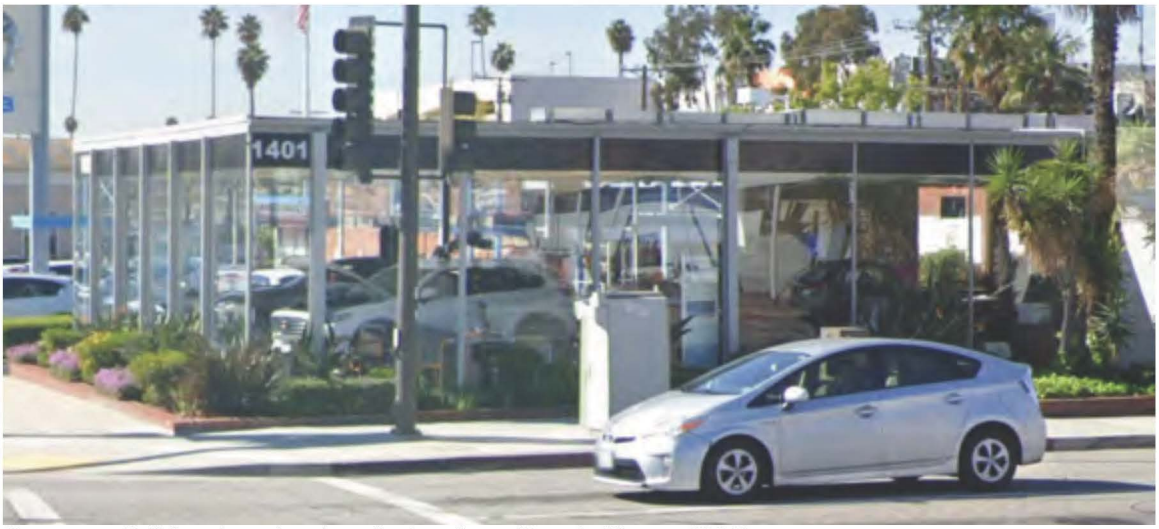

Building A: Showroom
Building B1: Offices (exterior along Los Feliz Road)
Building B2: Offices (internal/enclosed by other buildings)
Building C: Service Building
Building D: Service Building
Building E: Office and Service Building
Building F: Parts Building
Building G: Used Car Sales

.

Key to buildings on property at 1401 S. Brand Boulevard

Building A is the new car Showroom. Building A is a Mid-Century Modern style building with International Style influences. Display sections of the showroom are clad in glass on three sides: the south side facing the large parking area; the elevation facing Brand Boulevard; and a portion of the elevation facing Los Feliz Road. According to the building permit the value of the Showroom building was $100,000. A short, three-paragraph newspaper article from 1958 describes the showroom building as "termed a 'jewel box' building because of its display room was encased" by 12-foot-high exterior glass panels. The article noted that the cost for the redevelopment of the whole facility which brought together previously scattered operations of the dealership was $500,000.[24]

Showroom Building A east and north elevations (Google Maps, c2020)

[24] "agency Opens New Facilities," *Los Angeles Times,* July 27, 1958.

Showroom Building A north elevation [25]

Showroom Building A east and portion of north elevation

Showroom Building A is one-story and rectangular in plan. Its exterior cladding is glass plates. The building has a flat roof. The full expanse of the east elevation of the Showrrom is clad with glass. The bays have floor to ceiling clear glass panels except for the upper transom area where the glazing is a dark grey. This darkened transom area creates a band along the top of the windows. At the corners of the east elevation, the vertical member is almost flush with the glazing. Along the east elevation the six glazed bays are separated by thin vertical slats that run from just below the cornice band to the base of the building. These vertical members are spaced equally across the east elevation. Their thin edge faces outward. As the elevation is fully glazed, there is no bulkhead typical of storefronts. However, there is a short brick planter area that runs along the full width of the east elevation and it obscures the lower display area.

Aerial view of Building A

The north and south elevations have an expanse of glass but the west half of both elevations, originally glazed wall sections of the Showroom, have had the original glazed walls obscured or removed. Along the north elevation, a brick office/wall addition is attached to six of the westernmost original twelve glazed window bays. Only the very upper portion of the glazing and the dark glass of the transom area of the six western panels remain as visible evidence of the original expanse of the glazed walls of the Showroom. The roofline of the original Showroom remains visible along the 12 glazed window bays.

[25] Larger images of photographs in Attachment A

Six of the original glazed bays are fully visible on the north elevation of the Showroom; six of the original Glazed bays (to the west) have been obscured by the addition of an office/wall structure. A portion of glazing and the darkened transom area are visible above the office/wall addition.

The north elevation of the Showroom Building A consists of an area of glazed panels that meets a brick exterior wall mid-way along Los Feliz Road between Brand Boulevard and the alley at the west boundary of the parcel. There are five panels that are the same width but the glass panel at the corner is narrower. The vertical dividers also vary. There are four dividers that are similar to those along the front, Brand Boulevard elevation but there are two "I" beam vertical dividers which have a different profile. It is unknown if these were added later. There is a low brick planter that runs the length of the glazed portion of the north elevation.

Showroom Building A, north elevation

Showroom Building A north elevation along showing planter area and projecting area of Office Building B1 and the top of the original glass panels hidden by the 1964 B1 office/wall addition.

Added I-beam that does not match other dividers

Showroom Building A planter detail on east elevation

Showroom Building A, with its three sides clad in glass, is the area where automobile models are displayed. Beyond the glass clad walls, to the west, are offices of the dealership. Along the north elevation on Los Feliz Road is the exterior of Office Building B1. This is a one-story building that projects out in front of a portion of Showroom Building A. The Office Building B1 north elevation has a brick clad exterior that is visible along Los Feliz Road. Internal to the site is another office area, Office Building B2, which has no visible exterior elevations.

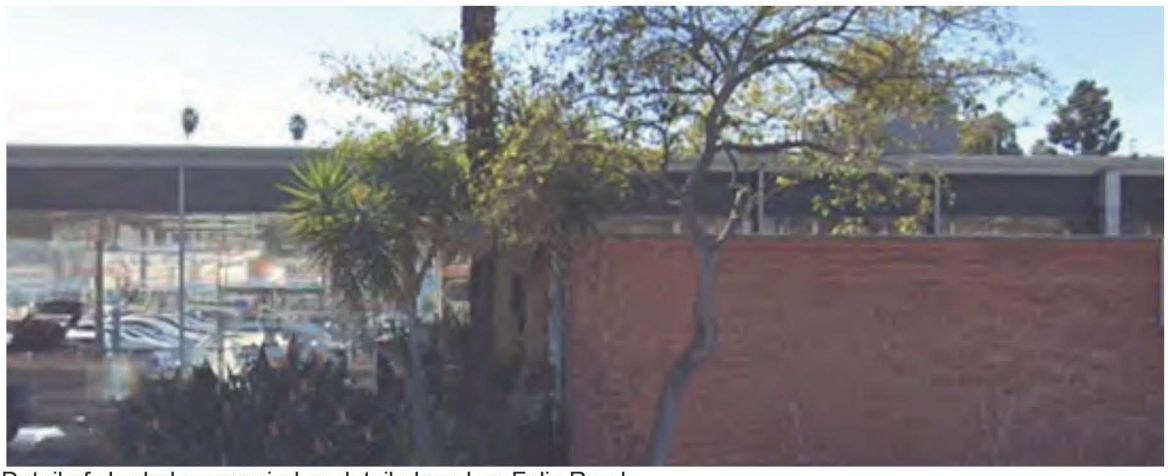

What would be the west elevation of Showroom Building A merges with other buildings. It has an interior connection to Office Building B2 which was added n 1964 to the west and Service Building E to the south. The Los Angeles County Assessor identifies four buildings on the site with the building dating from 1956 having 22,900 square. Today the Showroom Building A is partially engulfed and connected to other buildings, including Office Buildings B1 and B2 and also connected to Service Building C. These spaces have been merged internally and contain offices and support back of the house operations.

East elevation and north elevation, along Los Feliz Road (Google Maps, c2020)

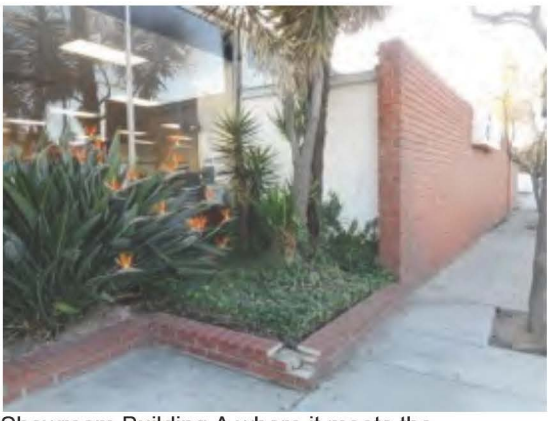

Showroom Building A with glass exterior and Office Building B1 with brick exterior; upper shaded glass band Is visible above and behind the brick building projection (Google Maps, c2020)

Detail of shaded upper window detail along Los Feliz Road

Building B1 is a brick clad office extension along Los Feliz Road built in 1964. From the aerial view of the buildings, it can be seen that the eastern portion of that building was constructed in front of the original showroom building. From the street the original glass panels with darkened transom area and matching roofline is visible above the eastern portion of B1's brick elevation. This brick wall/extension obscures a large portion of the original showroom building.

Office Building B1 is slightly lower than the Showroom A Building. It is clad in brick laid in a stretcher bond pattern. The small section of wall that faces east is stucco clad and slightly lower than the long brick sidewall. A square planter with a low brink wall is located at the juncture of Showroom Building A and Office Building B1.

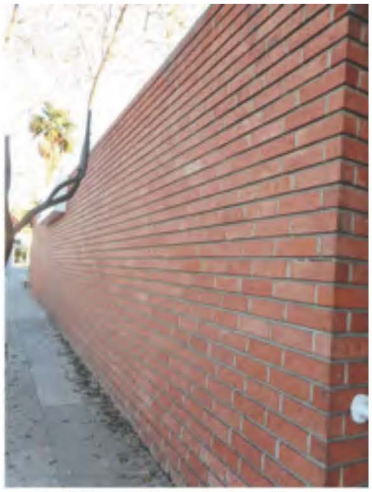

Showroom Building A where it meets the Projecting wall of Office Building B1

Stretcher brick bond (aka running bond) on Office Building B1

Building B1, east elevation of middle section

Building B1 east elevation

Office Building B1 extends to the west beyond what appears to be the west end of Showroom Building A. The fenestration along this elevation is limited to a recessed entry with steps leading to a metal and glass door and a short band of horizontal oriented windows at the far west end of the elevation.

Building B1 entry steps/door on north elevation

Building B1, west section of north elevation

Building B1, west end, north & west elevations
Showing upper window band

Building B1 west elevation and vehicle entry into Service Building C next to that building's vehicle entrance

At the far west end of the north elevation of Office Building B1 that building connects to Service Building C.

Showroom Building A, south and east elevations

.

The south elevation of Showroom Building A has a similar elevation to that on the north with the first module narrower than the other modules. The vertical dividers are similar to those along the north elevation except that there is an additional horizontal bar that runs from the first "I" beam to the last "I" beam. The first glazed bay is narrower than the others and has one of the vertical "I" beams.

Along this south elevation visibility into the showroom through the glass wall is obscured by a pergola structure. There are three "I" beams that are aligned with the inverted L-shape that create the pergola which has a suspended flat canopy. There is no information as to whether this pergola was constructed with the building or if it was added later.
Another anomaly along the south elevation is the stucco wall panel that separates two sections of glazed wall. The east portion of that elevation has the same ceiling to floor glass panels with darkened transom area glazing. After six glazed bays (a metal and glass door assembly is located in one of these bays), there is a section of stucco clad wall, which is approximately the same dimension as two of the glass bays. To the west of that stucco section is another glazed bay with the same darkened glass transom. It appears that, like the north elevation, the south elevation of the original showroom had additional glazed walls that were later altered or obscured.

The alterations on the north and south sides of Showroom Builidng A, shortened two of the three glazed sides of the original showroom and significantly altered the size of the showroom – limiting it to almost half of its original size and display area and obscuring views into the Showroom.

The walkway under the canopy on the south elevation is level with the public sidewalk on the east but rises as it moves westward. A series of ramps and steps create a variety of ways to reach the walkway from the interior of the parcel. This includes a raised patio seating area as well as a ramp that runs parallel with Service building E. At the juncture of Showroom Building A and Service Building E, on the inside side of the ramp is a small room that extends out from the plane of Showroom Building A; this room is part of the office area that is internal to the conglomeration of Buildings A1, B1, Be and E.

Showroom Building A interior, north & east elevations

Building A, interior, east and south elevations

Showroom Building A interior, looking west

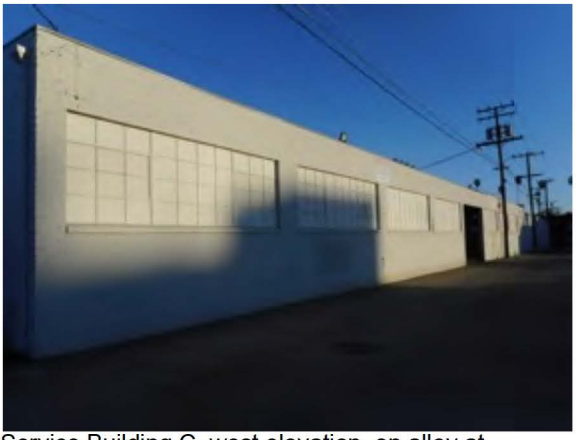

Showroom Building A m interior, looking south

The east portion of the interior of Showroom Building A, has floor to ceiling plate glass windows surrounding the interior display area. The west end of interior of Showroom Building A has typical office wall finishes and a dropped ceiling and doors that lead to back office areas.

Service Building C is a utilitarian building located at the far west of the consolidated parcel on Los Feliz Road where the alley meets that street. Service Building C is one-story, rectangular in plan with industrial windows that have been painted and a vehicle garage entrance on its north elevation facing Los Feliz Road and another on the west elevation facing the alley. The building's exterior is concrete, and the building has a flat roof. Service Building D is located to the south of Service Building C. It ais similar to Service Building C as it also is one-story and is the same width. It has a flat roof and minimal fenestration with a vehicle entrance and two small windows on its south elevation.

Building B1 west elevation & north and west elevations of Service Building C on Los Feliz Road

Service Building C, west elevation, on alley at Los Feliz Road

South corner of property at Laurel Street and Brand Boulevard

Service Building D, south and east elevations of at Laurel Street

At least 40 percent of the consolidated parcels is paved surface parking area; All of thee of the frontage along Brand Boulevard is used for display of cars. At the north end of the lot cars are displayed in the small interior Showroom Building A. All the rest of the frontage along Brand Boulevard was used as the outdoor display area of the inventory of new and used cards for sale. Service Buildings E, F, and D are set back on the parcel as a backdrop to the display of parked automobiles.

Thus, the street facing elevations of these buildings are simple both as the background for the display of cards and because the function of the buildings has been storage of parts and service work areas. The east elevation of Building E is devoid of fenestration and painted white.

Service Building D, south and east elevations facing Laurel Street

Service Building D, east elevation facing surface parking spaces

Building G, south and east elevations

Building F, east elevation and surface parking

Building F, east elevation

Building F and Service Building E, east elevations

Service Building F is a one-story building, rectangular in plan with a flat roof. This building is a tall one-story building, rectangular in plan and with a flat roof. The exterior is clad with brick and there is fenestration on its east, street-facing elevation. The south elevation has a small, almost square+++++++ one-story sales office. Its rear (west) elevation abuts Service Buildings C and D. On its north side it is connected to Service Building E.

Service Building E is closest to Showroom Building A. This is the area where most of the transactions take place – both auto and parts sales as well as the purchase of automobiles. The south end of Service Building E has a small retail office with counter, enclosed in glass. It is adjacent to the vehicle service area which has a wide garage opening that accommodates two vehicle lanes. This building is one-story with a flat roof. The area of the building to the north of the service entrance is clad in stucco and there is a ramp parallel to the building leading from the service garage entry up to the slightly raised platform of Showroom Building A. In the area on the south side of the Showroom Building A and Service Building E there are customer amenities such as chairs and umbrellas on an outdoor raised platform and walkway with canopy that provides shade as well as protection from rain.

REVIEW OF PREVIOUS SURVEYS

A historic resources survey was conducted for the *South Glendale Community Plan Draft Environmental Impact Report* as Appendix G in 2018. That survey identified the property at 1401 S. Brand Boulevard as an eligible historic resource with a California Historic Resource Status Code of 5S3, "appears to be individually eligible for local listing or designation through survey evaluation."

The Preliminary Survey Findings Map identified the consolidated seven parcels as a potential historic resource. The preliminary reason was that the property was an "auto-related commercial development; Mid-Century Modern Architecture." The historic context was identified as "Commercial Development: Post-World War II Commercial Development; Architecture & Design: Post-World War II Modernism: Mid-century Modern."[26]

[26] City of Glendale, *South Glendale Community Plan Final Environmental Impact Report*. 2018, Appendix G: South Glendale Historic Resource Survey, Appendix B, p. 9.

2018 Preliminary Survey Findings Map

HISTORIC CONTEXTS ELIGBILITY

Historic context statements analyze the historical development of a community and are based on guidelines promulgated by the National Park Service and specified in National Register Bulletin 16A: Historic context is information about historic trends and properties grouped by an important theme in pre-history or history of a community, state, or the nation during a particular period of time. Because historic contexts are organized by theme, place, and time, they link historic properties to important historic trends. In this way, they provide a framework for determining the significance of a property.[27]

Historic contexts provide information about historic trends and properties grouped by an important theme in pre-history or history of a community, state, or the nation during a particular period of time. Because historic contexts are organized by theme, place, and time, they link historic properties to important historic trends. In this way, they provide a framework for determining the significance of a property.

The City of Los Angeles' SurveyLA has prepared historic contexts for a variety of areas including for Commercial Development related to Automobiles. The general development patterns and property types covered by SurveyLA are representative of the development of the region and are applicable to cities such as Glendale. The following context will be used to evaluate Car Showrooms.

[27] *National Register Bulletin 16A: How to Complete the National Register Registration Form*, p. 4.

Historic Context: Commercial Development and the Automobile

Property Type: Car Showroom, 1920-1970

Summary Statement of Significance:

> The showroom is a building type that evolved as a facility for exhibiting, selling, and often servicing automobiles. A car showroom evaluated under this sub-theme is significant in the area of Commerce; most examples are also significant in the area of Architecture. They illustrate the evolution of the car showroom as a significant commercial building type related to the automobile and Los Angeles' flourishing car culture. They show how a building type's design and site layout are shaped by accommodation to the needs of automobile as well as the stylistic and economic trends of the day. Extant, intact examples are now rare.

Period of Significance: 1920-1970

Period of Significance Justification:

> The 1920s is the date of the earliest extant car showroom in Los Angeles. By this time automobile ownership was great enough to generate specific building types designed around its needs. By the late 1960s the auto showroom underwent a change. They were placed further back on their lots and surrounded by parking lots; the cars themselves became the dominate feature from the street.

Geographic Location: Along arterial roads and highways

Area(s) of Significance: Commerce; Architecture

Associated Property Type: Commercial/Auto-Related – Car Showroom

Property Sub-type Description: Facility for exhibiting, selling, and often servicing automobiles

Property Sub-type Significance:

> Extant examples illustrate the evolution of the showroom as a significant building type related to the automobile. They show how a building type's design is shaped by accommodation to the needs of a particular mode of transportation, as well as the stylistic and economic trends of the day.

Eligibility Standards:

- Originally constructed to sell, and often provide servicing for, the automobile
- Demonstrates convenient automobile access from the street
- Is an excellent example of the property type
- Contains design and site layout features that reflect the needs of selling and servicing the automobile
- Was constructed during the period of significance

Character-Defining/Associative Features:

- Retains most of the essential character defining features of the type
- Of a style or mixture of styles typical of the period of construction such as Spanish Colonial Revival, Streamline Moderne, and Mid-Century Modern styles
- Typically also significant within a theme under the Architecture and Engineering context.
- Of the design and layouts typical of adapting to the needs of selling and servicing the automobile during the period of significance (e.g., showroom close to the street with large expanses of glass, service bays accessible to the customers' cars, prominent signage)
- Typically reflects corporate design associated with particular car companies and architects/designers Integrity Considerations:
- Should retain integrity of Design, Location, Feeling, Association, and Materials
- Should retain as much design integrity as possible, including overall massing, significant features (e.g., showroom with display windows), and identifying details such as trim and signage
- Some original materials may have been altered, removed, or replaced
- Should retain as much of original relationship to the street and to adjacent buildings as possible, so as to establish the importance of accommodating the structure to the spatial needs of the automobile (e.g., service door directly adjacent to street in 1920s structures, front showroom and rear service bays in 1930s-1960s structures)
- If use has changed, adaptation to new use should allow for the maintenance of as much of the original design and site layout as possible
- Site layout should retain original relationship to the street and adjacent structures

RESOURCE EVALUATION

Evaluation of 1401 S. Brand Boulevard

The property at 1401 S. Brand Boulevard is evaluated for eligibility for inclusion on the National Register of Historic Places under the four National Register criteria for significance.

Glendale Register of Historic Places

The property at 1401 S. Brand Boulevard is evaluated for eligibility for inclusion on the Gleendale Register of Historic Places under the four criteria for significance.

Criterion 1. To be eligible for inclusion on the Glendale Register of Historic Resources under the proposed historic resource must be identified with important events in national, state, or city history, or exemplifies significant contributions to the broad cultural, political, economic, social, or historic heritage of the nation, state, or city.

The Tropico Boulevard Tract was recorded and subdivided in 1903 in the town known as Tropico (which was later annexed to Glendale). In the first half of the 20th Century the

subject block along Brand Boulevard and area was developed with single-family residences. The block and area transitioned to commercial uses. New car dealerships began operations in Glendale in the teen years in the 20th Century and by the 1930s South Brand Boulevard had begun to develop as Glendale's "auto row" as a concentration of new and used car dealerships located their operation along that arterial corridor which was served by interurban rail. By the mid-20th Century, over half of the new car dealerships in Glendale were concentrated along South Brand Boulevard with others on nearby streets.

In the early 1950s the subject property, contained two auto dealerships, both with temporary structures. By the mid-1950s the parcels had been consolidated and permanent buildings were constructed on the property beginning with utilitarian service buildings. In 1958 a 3,000 square-foot display showroom was added to the site at the corner of the parcel at the intersection of South Brand Boulevard and Los Feliz Road. Over the second half of the 20th Century more construction took place on the site and the various components of the facility merged together to optimize interior spaces (parts and service support, new and used car sales retail and back-of-house spaces).

As the car dealership property at 1401 S. Brand Boulevard did not begin to be developed until the 1950s, there is no association with the early history of Tropico or of South Glendale. The property is not associated with the development of the automobile sales/dealership history or showrooms in Glendale as that commercial sector was well established before 1955. The basic concepts of automobile marketing including display of models in showrooms as well as large areas of surface parking to display models and inventory had been well established by the mid-1950s.

The subject dealership did not spur the concentration of automobile dealerships along South Brand Boulevard as that was well established before construction of the subject property and likely a reason why the car dealership chose that location.

In 1958 there were 23 new car dealerships located in the City of Glendale with half located along Brand Boulevard. The number of car dealers remained stable throughout the 1960s with 25 new car dealers in 1971 and 75 percent of them located on Brand Boulevard. The car dealership at 1401 S. Brand Boulevard, constructed in 1958 did not influence the existing 22 dealerships in 1958 nor did it influence the handful of additional dealerships built over the next fifteen years.

The use of a minimalistic architectural style that featured large expanses of glass was a well established approach to merchandising cars in the mid-20th Century. The design of the subject car showroom was not innovative nor did it influence the design of other automobile showrooms.

The car dealership site at 1401 S. Brand Boulevard was not master-planned. The first building on the property was a large service building at the rear of the property, along the alley. A few years later the display showroom was constructed. Buildings continued to be constructed on the property to address functional requirements and changing technologies. The evolution of the property with buildings added and merged together was not an innovative or unusual pattern for commercial operations.

There is no evidence of any historic events having occurred at the car dealership at 1401 S. Brand Boulevard.

There is no evidence that the property at 1401 S. Brand Boulevard is significant for its influence or association with broad patterns of history. The subject car dealership was not the venue or host to any historic events. The property at 1401 S. Brand Boulevard does not meet the criterion to be considered historically significant. Thus, property at 1401 S. Brand Boulevard does not meet Criterion 1 and is not eligible for the Glendale Register of Historic Resources.

Criterion 2.

To be eligible for inclusion on the Glendale Register of Historic Resources under Criterion 2 the proposed historic resource must be associated with a person, persons, or groups who significantly contributed to the history of the nation, state, region, or city.

There is no evidence that the property at 1401 S. Brand Boulevard is associated with any person who has significantly contributed to history. The architect and engineers associated with the Showroom on the property maintained a prosperous professional practice but there is no evidence that they were any more successful or accomplished than their contemporaries. The dealership has had numerous owners over the decades; there is no evidence that any owner or anyone associated with the dealerships achieved historic significance related to any aspect of automobile sales, marketing or facility planning. There is no evidence that the property was associated with any person who made a significant contribution to the history of the nation, state, region, or city.

Thus, the property at 1401 S. Brand Boulevard does not meet Criterion 2 and is not eligible for the Glendale Register of Historic Resources.

Criterion 3

A property is eligible under Glendale Register Criterion 3 if it embodies the distinctive and exemplary characteristics of an architectural style, architectural type, period, or method of construction; or represents a notable work of a master designer, builder or architect whose genius influenced his or her profession; or possesses high artistic values.

The automobile dealership property at 1401 S. Brand Boulevard consists of elements including a Showroom Building, sales office areas and buildings, service areas and large expanses of surface parking for display and inventory of automobiles. The first element constructed was a service building for a used car dealership in the mid-1950s. The property was redeveloped into a new car dealership around 1956 and a display Showroom Building was constructed.

Over the years as the dealership operations grew buildings were needed to support sales and service functions required by the technology of each era. These buildings were constructed as needed and modifications such as connecting buildings and filling in spaces took place in an ad hoc manner. There was no master plan for the facility nor any architectural guidelines regarding building design or site layout. Most of the buildings

were located at the rear of the site, along the alley as the area along Brand Boulevard was for display of the product for sale – the automobiles. A few models were displayed in the Showroom which also included sales desks. Most of the cars were displayed outside facing S. Brand Boulevard for all passers-by to see. As the focus was the new cars (and at times some used cars were sold) the support buildings were the backdrop and had little or no fenestration and no architectural details. This type of layout has been typical of car dealerships and has remained in use (although with the growth of online car sales, online display of vehicles and online financial transactions, the need the type of physical space for car dealerships continues to evolve).

While the layout of the facility has antecedents, this typical layout is no more historic than is any other commercial operation that has used the same basic support elements for decades (i.e., products displayed in window, inventory kept in a back room, display modules within the shop, checkout desk or counter).

The only building on the car dealership property at 1401 S. Brand Boulevard with an architectural style is the Mid-Century Modern, Internaltional style Showroom Building. The vehicle Showroom building was designed to be the platform on which to display new automobile models, following the long tradition of vehicle display in showrooms.

The Showroom Building A, as seen in the aerial image, was a rectangular building. Three of the sides had ceiling to floor glazing as evidenced by the roof profile along Los Feliz Road and extant bays on the south elevation. The western half of the original Showroom Buiding's north and south sides and original glazed elevations were altered with the obscuring and removal of major sections of the original glazing which reduced the display showroom area by half. A brick wall was constructed along Los Feliz Road in front of the original glazed windows that is also part of an office addition further to the west. The original roof line and the upper portion of the glazed window bays are visible above the added brick section. If a brick wall was needed in the original design it would have been built rather than constructing glazed walls and placing a brick wall in front of them. The building section known as B1 was not original to the Showroom Building. The north side of the original Showroom Buidling has been significantly altered. There is no rationale or evidence that a basic brick wall that obscures original building features acquires historic significance by functioning as an office space or by its mere presence.

Along the south elevation of Showroom Buidling A, two of the original glazed bays have been clad in stucco as evidenced by the dimension of the stucco area and the existence of a glazed bay to the west of the stucco section. The aerial view shows the outline of the original building as a rectangle with both the north and south sides of the same length. The south elevation of the Showroom Building has been significantly altered.

Only the shorter east elevation of the Showroom Building, facing Brand Boulevard, is of its original dimensions.

The post and beam pergola canopy attached to the south side elevation of the building has inverted L-shaped supports but it is not known if the pergola was part of the original design. However, as the pergola structure only runs along a portion of what was the length of the original Showroom and as it obscures views into the Showroom from the south, it does not appear to be part of the original design of the Showroom Building.

The original west half of the showroom merged with later additions to create an area where several structures meet and functions as back of the house officers and support operations. Attached along Los Feliz Road to the west of the original Showroom Building are brick office extensions, B1 and B2 and interior to the lot, it merges with Service Building C.

An important feature of the mid-century dealership was detached signs that were free-standing, a dominant element that served as a giant billboard and included the automobile brand's corporate logo. Over the decades the signs have changed to represent the automobile brand that was sold – and those logos communicated the current design and technology of each period. None of the original signage from the 1950s or any other earlier era remains on the property.

The preliminary findings of the 2018 historic resources survey outlines the whole property on the map. However, the only building on the property which retains some historic design/styling is the Showroom Building and only a portion of the original configuration and design of that buiding remains. All the other buildings – office and service buildings – are unremarkable buildings that lack architectural details. The organization of the site is not part of any master plan and follows the typical organization of automobile dealerships in the late 20th Century. There is no historic significance to the organization of the buildings and functions on the property. There is no original signage on the property.

Although the Showroom Building retains aspects of the Mid-Century Modern design influenced by the International Style, the buiding is not an excellent or exceptional example of the style. The use of the International Style for commercial buildings of all types was common in the mid-20th Century. The building has undergone significant alterations. Almost half of its original vehicle showroom area, defined by exterior glazed walls, has been altered with brick wall added on the north side and bays covered with stucco or removed on the south side.

While the Showroom Building was referred to as a "jewel box" in a single, short (three-paragraph) contemporaneous newspaper article there are no references to the design of the building in any other publications.[28] [29] Other Glendale car showrooms from that period were featured in publications such as the Modern Motors (formerly 1225 S. Brand Boulevard, featured in *Architectural Digest)* and another designed by a master architect, John Lautner (R&H Motors on Colorado Street). The subject building was not featured in any professional architectural publications or in industry-specifiic publications.

[28] "Agency Opens New Facilities," *Los Angeles Times,* July 27, 1958.
[29] Sources checked include Avery Index of Architectural Periodicals, Pacific Coast Architecture Database, Los Angeles Public Library California Index, Los Angeles Times, and internet searches.

Modern Motors, c1960)

R&H Motors, John Lautner

The subject Showroom Building was designed by the architectural and engineering firm of Mason and Muntz. While the firm had an active and prosperous practice there is no evidence that they were master architects and designers. There are no references to them in sources such as the Avery Index to Architectural Periodicals, Pacific Coast Architects Database, architectural history guides and books on the architecture of Southern California, no research monographs or academic articles about the firm or their body of work, and no online references to the firm. There is no evidence that Mason and Muntz are master architects or designers.

The automobile dealership at 1401 S. Brand Boulevard does not meet Criterion 3 and is not eligible for the Glendale Register of Historic Resources.

Criterion 4.

A property is eligible under Glendalee Register Criterion 4 if it has yielded, or has the potential to yield, information important to archeological pre-history or history of the nation, state, region, or city.

The buildings on the property were built in the 20th Century during historic times and are not archeological pre-historic resources. The construction techniques and methods and materials are not related to archeological pre-historic resources. The building's style, construction techniques and methods and materials does not have the potential to yield any additional information beyond what is covered under Criteria 1 through 3.

The buildings on the property will not yield information important to the prehistory or history of the area, state or nation. The property does not meet Criterion 4 and is not eligible for the Glendale Registeer of Historic Resources.

National Register of Historic Resources

Because the National Register criteria are similar to the Glendale Register criteria, the property at 1401 S. Brand Boulevard, evaluated above, is ineligible for listing to the

National Register for the same reasons explained under the Glendale Register evaluation.

California Register of Historical Resources

Because the California Register criteria are similar to the Glendale Register criteria, the property at 1401 S. Brand Boulevard, evaluated above, is ineligible for listing to the California Register for the same reasons explained under the Glendale Register evaluation.

Analysis of Integrity

Integrity is the ability of a property to convey its significance. There are seven aspects to be evaluated to determine the historic integrity of a property and the six that relate to the physical aspects of the property are analyzed below ("Association" was analyzed under Criterion B). To be eligible for designation as an historic resource, a property must retain historic integrity.

Location: Location is the place where the historic property was constructed or the place where the historic event occurred. *The relationship between the property and its location is often important to understanding why the property was created or why something happened. The actual location of a historic property, complemented by its setting, is particularly important in recapturing the sense of historic events and persons.*

The buildings at the automobile dealership at 1401 S. Brand Boulevard are in the original location where they were constructed. However, over the decades the buildings have been added onto and merged together. The Showroom Building A was constructed as a 3,000 square foot display showroom. Sections of the original showroom have been merged with subsequent additions. While in its original location, its original footprint is not discernable.

Design*: *Design is the combination of elements that create the form, plan, space, structure, and style of a property. *It results from conscious decisions made during the original conception and planning of a property. Design includes such elements as organization of space, proportion, scale, technology, ornamentation, and materials. A property's design reflects historic functions and technologies as well as aesthetics. It includes such considerations as the structural system; massing; arrangement of spaces; pattern of fenestration; textures and colors of surface materials; type, amount, and style of ornamental detailing; and arrangement and type of plantings in a designed landscape.*

The automobile dealership at 1401 S. Brand Boulevard consists of a series of buildings constructed in the 1950s and 1960s. All of the buildings are utilitarian structures that support the functions of the dealership such as sales of automobiles and parts and servicing automobiles. except for the Showroom Building A section located at the corner of S. Brand Boulevard and Los Feliz Road. All of the buildings a(except the front part of the Showroom) are of modest materials (concrete block, brick, stucco clad) with little fenestration and no architectural details or design and thus of no architectural style.

Only one building possesses architectural styling and design elements -- Showroom Building A. The original showroom building's plan is rectangular in plan. Three sides of that building were constructed with an exterior of plate glass panels. The two long sides of the rectangle, the north and south elevations have had half of their original glass panel exterior removed or obscured by later construction. This resulted in around half of the original Showroom Building's display area – which allowed for viewing into the showroom – to lost its display function as the clear walls were covered by other materials.

Over the years the Showroom Building A merged into other buildings on the property. For example, along the north elevation there is a brick office addition (that obscures the original elevation). On the south elevation of Showroom Building A, the area of the elevation to the west of the entry door is a stucco clad wall and beyond that it merges with Service Building C.

The original configuration of the Showroom Building A has been significantly altered with half of the plate glass panels/bays having been removed or obscured by later construction. As a result, Showroom Building A no longer retains intergrity of design.

The elements of the automobile dealership were built over time and evolved and merged together. There was no master plan or coordinated architectural design of the buildings.

Setting: Setting is the physical environment of a historic property. *Whereas location refers to the specific place where a property was built or an event occurred, setting refers to the character of the place in which the property played its historical role. It involves how, not just where, the property is situated and its relationship to surrounding features and open space. Setting often reflects the basic physical conditions under which a property was built and the functions it was intended to serve. In addition, the way in which a property is positioned in its environment can reflect the designer's concept of nature and aesthetic preferences. The physical features that constitute the setting of a historic property can be either natural or manmade, including such elements as: topographic features (a gorge or the crest of a hill); vegetation; simple manmade features (paths or fences); and relationships between buildings and other features or open space.*

The setting of the subject property is along a major arterial corridor so that its product, automobiles, could be viewed by those passing by whether in cars, on transit, walking or biking. Such a location was preferred by automobile sales operations. Automobile dealership began concentrating along S. Brand Boulevard in Glendale in the 1920s. The general placement of elements on the site of an automobile dealership was also well established by the mid-w0th Century with a showroom as well as prominently parked cars to display the inventory. As the selling of cars was tied to new products and new technologies, most of the buildings on the lots were simple and in terms of design functioned as backdrops for the display of their modern and up to date cars. Automobile dealerships kept signage and accouterments up to date. to communicate that they were in possession of state-of-the-art automotive technology. Thus, the settings of automobile dealerships strove to appear modern even if there were a period building on site. That is the case with the setting at 1401 S. Brand Boulevard -- its setting is not evocative of any historic period.

Materials: Materials are the physical elements that were combined or deposited during a particular period of time and in a particular pattern or configuration to form a historic property. *The choice and combination of materials reveal the preferences of those who created the property and indicate the availability of particular types of materials and technologies. A property must retain the key exterior materials dating from the period of its historic significance. If the property has been rehabilitated, the historic materials and significant features must have been preserved.*

The materials employed on the majority of the buildings on the automobile dealership at 1401 S. Brand Boulevard are simple materials typically employed in the construction of utilitarian buildings of the mid- to late-20th Century and are not evocative of any historic period. The Showroom Building A is the only building exhibiting any architectural design and styling. The materials used on the exterior sheathing of that building was 12-foot high glass panels and they remain on a portion of the showroom building. Due to alterations around half of the Showroom's long north and south elevations have been obscured or removed and the building has merged with elements of other buildings and clad in ordinary materials such as bricks laid in the simple stretcher bond pattern.

Workmanship: Workmanship is the physical evidence of the crafts of a particular culture or people during any given period in history or prehistory. *It is the evidence of artisans' labor and skill in constructing or altering a building, structure, object, or site. Workmanship can apply to the property as a whole or to its individual components. Workmanship is important because it can furnish evidence of the technology of a craft, illustrate the aesthetic principles of a historic or prehistoric period, and reveal individual, local, regional, or national applications of both technological practices and aesthetic principles. Examples of workmanship in historic buildings include tooling, carving, painting, graining, turning, and joinery.*

There is no evidence of quality workmanship on the subject property. The majority of the buildings on the site are utilitarian structures and constructed with a basic level of workmanship. The only building with an architectural style, the Showroom Building A ,employed 12-foot high glass panels as its exterior however the detailing of its construction is unremarkable. Details such as the areas where elements join do not display finesse.

Feeling: Feeling is a property's expression of the aesthetic or historic sense of a particular period of time. *It results from the presence of physical features that, taken together, convey the property's historic character. For example, a rural historic district retaining original design, materials, workmanship, and setting will relate the feeling of agricultural life in the 19th century.*

The property retains its feeling as an automobile dealership but the arrangement of elements on the property do not convey any historic feeling that it is an historic dealership design. The types of buildings, a showroom, sales offices, back of house operations, service and parts departments, large surface parking area for display of car models/inventory are all well-established elements of an automobile dealership and do not impart any feeling of an earlier era. The Mid-Century Modern showroom is a simple restrained box design with glass sheathing that allows contemporary car models to be seen. Only the east elevation has a full glass façade. Around half of the north and south elevations have had their original glass exteriors obscured or removed – thus half of the

oficinal display, viewable from the street, has been obscured. Also, Showroom A has merged with other buildings. The feeling of the Showroom Building A has been lost due to the removal of over half of theoriginal viewable display area.

Historic District Eligibility

According to *National Register Bulletin 15, How to Apply the National Register Criteria for Evaluation*" a district derives its importance from being a unified entity, even though it is often composed of a variety of resources. The identity of a district results from the interrelationship of its resources, which can convey a visual sense of the overall historic environment or be an arrangement of historically or functionally related properties." In addition, "a district must be significant, as well as being an identifiable entity. It must be important for historical architectural…values." Also "the majority of the components that add to the district's historic character, even if they are individually undistinguished, must possess integrity." And "the number of noncontributing properties a district can contain yet still convey its sense of time and place and historical development depends on how these properties affect the district's integrity."[30]

There is no cohesive pattern of development or concentration of potentially eligible historic resources along the section of Brand Boulevard where the subject property is located. Nearby parcels are developed with commercial uses with a variety of building types built over many decades. The *South Glendale Historic Resources Survey* of 2014 prepared for the Draft Environmental Review of the South Glendale Community Plan, did not identify any eligible historic district that includes the subject property at 1401 S. Brand Boulevard. There is no eligible historic district that includes the property at 1401 S. Brand Boulevard.

CONCLUSION

Based on the facts presented above, the property at 1401 S. Brand Boulevard is not eligible for the National Register of Historic Places, the California Register of Historical Resources, or to the Glendale Register of Historic Resources as an individual resource nor is it a contributing building to any historic district as the property:

- is not associated with any historic events or patterns of history;
- is not associated with the early history of Glendale or of automotive sales in Glendale;
- is not associated with any historic persons;
- is not an excellent example of Mid-Century Modern architectural style;
- is not the work of a master architect or builder;
- was not a master planned facility;
- does not possess high quality workmanship or materials;

1950 Sanborn Map excerpt

1964 aerial image enlargement

The first building permits for the property known as 1401 S. Brand Boulevard date from 1948 for Lot 6, the southernmost portion of today's property. The owner and business was Honest John Inc., which sold used cars. The permits were for a garden wall along the south side of the property, for signs, and retractable awnings. A 1950 permit was to add a toilet room to an existing office building for owner R&H Motors, Inc.

In 1955 a building permit was taken out by property owner Tommie Vaughn Motors to construct an "auto storage and service building." The owner was listed as the contractor and the architect was a civil engineer, Thomas Jewell. The one-story building was located on the alley with exterior brick walls.

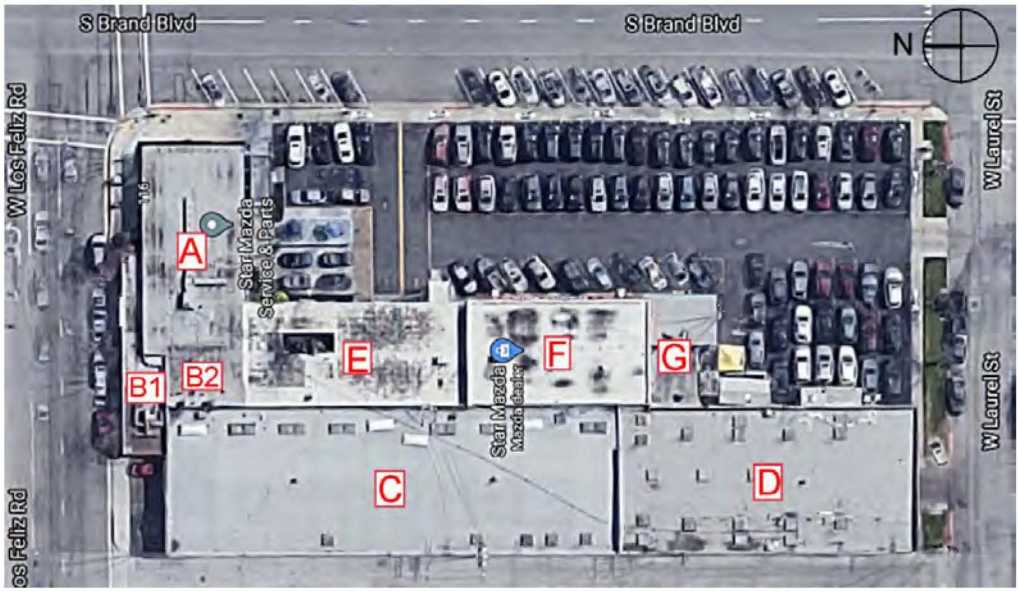

1955 Sketch showing auto storage and service building

By 1958 the two large parcels had been consolidated into a single parcel with Los Feliz Road on the north and Laurel Street on its south. That year the owner of the property at 1401 S. Brand Boulevard, California Motors, applied for a building permit (56483) to construct a "sales and service of automobiles" building. The architects were Mason and Muntz and the contractor was Peter Kiewit and Son. The building was to be a "maximum of two stories" and 20 feet at its highest point. The exterior walls were to be of brick, stud & plaster, glass, interior walls of stud & plaster and floors of concrete and terrazzo. And the cost of the building was listed as $100,000.

A three paragraph article in the *Los Angeles Times* announced the opening of California Motors, which was a Ford dealership that combined all of the dealer's "previously scattered major facilities at one location" that provided space for both new and used car sales. The showroom was described as a "jewel Box" building "because of its display room encased in 3,000 square feet of 12-foot-high glass." The property also contained "administration offices, service and parts departments [which] occupy 26,000 square feet of covered area in a block-long space on Glendale's automobile row."[18] The showroom was a new building;

Santa Monica, CA 90405

Subject: Historic Records Search Results for 1401 South Brand Boulevard, Glendale, Los Angeles County, CA

Dear Mr. Kaplan:

At your request, W. H. Bonner Associates has conducted a historic records search for your project located at 1401 South Brand Boulevard, Glendale, California 91204. The records search was conducted on December 24, 2020, at the South Central Coastal Information Center (SCCIC), California State University, Fullerton.

To identify any historic properties, the rolls of the National Register of Historic Places (NRHP), California Historical Landmarks (CHL), and California Points of Historical Interest (CPHI) were examined. The California State Historic Resources Inventory (HRI), Historic Preservation Overlay Zones (HPOZ) was also reviewed to determine local resources previously evaluated for their historic significance. Built dates were determined from the website of the Los Angeles County Tax Assessor.

Record Search Results

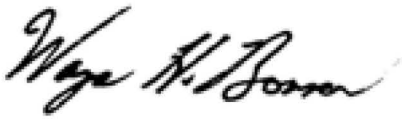

1401 S. Brand Boulevard, Glendale, CA 91204 APN 5640-024-014
Commercial property
First improvement built year 1956/effective built year 1956
Directory of Properties in the Historic Property Data File – Not Listed
National Register of Historic Places (NRHP) – Not listed
California Points of Historic Interest (CPHI) – Not listed
California Historic Landmarks (CHL) – Not listed

Please Note: Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the CHRIS Inventory, and you should contact the

California Native American Heritage Commission for information on local/regional tribal contacts.

We appreciate this opportunity to assist you on your project. If we can be of any further assistance, or if you have any questions concerning this letter, please do not hesitate to contact our office at (310) 675-2745 or via e-mail, whbonner@aol.com.

Sincerely,

Wayne H. Bonner, M.A.
RPA Certified Archaeologist #10085

APPENDIX B

VMT and Trip Generation Evaluation

Stantec

Memo

To:	Phil Martin Phil Martin & Associates 2987 NW Fairway Heights Drive Bend OR 97703	From:	Cathy Lawrence Irvine
Project/File:	2042632200	Date:	February 24, 2023

Reference: Glendale Star Mazda Expansion – VMT and Trip Generation Evaluation

This memorandum summarizes the potential transportation effects of the proposed expansion of the existing Star Mazda dealership located at 1401 South Brand Boulevard in the City of Glendale. The evaluation considers potential environmental transportation impacts, as well as possible transportation effects on the local roadway network.

VEHICLE MILES TRAVELED

Senate Bill 743 (SB 743) has identified Vehicle Miles Traveled (VMT) as the metric for identifying California Environmental Quality Act (CEQA) transportation impacts. An evaluation was performed to determine if the proposed Project is SB 743-compliant. To comply with the requirements of SB 743, the City of Glendale has defined the conditions for conducting CEQA VMT analysis.[1]

For retail projects such as the proposed Project, a significant impact would occur if the project would result in a net increase in existing total citywide VMT. The City's guidelines contain criteria for screening land use projects from further VMT analysis. Retail projects that are 50,000 square feet or less can be presumed to have a less-than-significant transportation impact and would not require a detailed VMT analysis.

The proposed Project consists of a new 32,570 square foot building. The Project square footage is less than 50,000 square feet; therefore, the Project can be presumed to have a less-than-significant transportation impact. No further VMT analysis is required.

TRIP GENERATION

The Project consists of replacing the existing 30,230-square foot building with a new 32,570 square foot building, for a net increase of 2,340 square feet of building space. The trip generation for the proposed Project was determined from trip rates contained in the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition*. **Table 1** (attached) summarizes the daily and peak hour trip rates and

[1] City of Glendale, CA. October 2020. *Transportation Impact Analysis Guidelines.* Section 2.1.

resulting trip generation for the existing building, the proposed building, and the net change in trips. As this table shows, the proposed Project would result in a net increase of 5 AM peak hour trips, 6 PM peak hour trips, and 65 daily trips.

CONCLUSIONS

The proposed Star Mazda expansion would not require a detailed VMT analysis based on the City's screening criteria for retail projects of 50,000 square feet or less. Furthermore, the Project would generate a minimal amount of new peak hour or daily traffic which would have a nominal effect on the surrounding roadway network.

Sincerely,

Stantec Consulting Services Inc.

Bend, OR 97703

Date:

January 8, 2022

Project No.: P21-044 AQ

PROJECT DESCRIPTION

Star Mazda is located on a 1.26-acre site at 1401 South Brand Boulevard in Glendale. The existing structures comprise 30,230 sf. The Project consists of replacing the existing 30,230-square foot building with a new 32,570 square foot building, for a net increase of 2,340 square feet of building space. There will also be 100 added parking spaces.

ATMOSPHERIC SETTING

The climate of the Glendale area, as with all Southern California, is governed largely by the strength and location of the semi-permanent high-pressure center over the Pacific Ocean and the moderating effects of the nearby vast oceanic heat reservoir. Local climatic conditions are characterized by very warm summers, mild winters, infrequent rainfall, moderate daytime on-shore breezes, and comfortable humidities. Unfortunately, the same climatic conditions that create such a desirable living climate combine to severely restrict the ability of the local atmosphere to disperse the large volumes of air pollution generated by the population and industry attracted in part by the climate.

Glendale is situated in an area where the pollutants generated in coastal portions of the Los Angeles basin undergo photochemical reactions and then move inland across the project site during the daily sea breeze cycle. The resulting smog at times gives the western San Gabriel Valley some of the worst air quality in all of California. The worst air quality, however, has gradually been moving eastward. The area of heaviest ozone air pollution has gradually moved eastward from Glendale in the 1960's to Glendora and even Upland/Ontario in the 1990's. Elevated smog levels nevertheless persist in the area during the warmer months of the year. Despite dramatic improvement in air quality in the local area throughout the last several decades, the project site is expected to continue to experience some unhealthful air quality until beyond 2021.

Temperatures in the project vicinity average 62 degrees Fahrenheit annually with summer afternoons in the low 90's and winter mornings in the low 40's. Temperatures much above 100 or below 30 degrees occur infrequently only under unusual weather conditions and even then these limits are not far exceeded.

In contrast to the slow annual variation of temperature, precipitation is highly variable seasonally. Rainfall in the eastern portions of Los Angeles County averages 17 inches annually and falls almost exclusively from late October to early April. Summers are very dry with frequent periods of 4-5 months of no rain at all. Because much of the rainfall comes from the fringes of mid-latitude storms, a shift in the storm track of a few hundred miles can mean the difference between a very wet year and a year with drought conditions.

AIR QUALITY SETTING

AMBIENT AIR QUALITY STANDARDS (AAQS)

In order to gauge the significance of the air quality impacts of the proposed Project, those impacts, together with existing background air quality levels, must be compared to the applicable ambient air quality standards. These standards are the levels of air quality considered safe, with an adequate margin of safety, to protect the public health and welfare. They are designed to protect those people most susceptible to further respiratory distress such as asthmatics, the elderly, very young children, people already weakened by other disease or illness, and persons engaged in strenuous work or exercise, called "sensitive receptors." Healthy adults can tolerate occasional exposure to air pollutant concentrations considerably above these minimum standards before adverse effects are observed. Recent research has shown, however, that chronic exposure to ozone (the primary ingredient in photochemical smog) may lead to adverse respiratory health even at concentrations close to the ambient standard.

National AAQS were established in 1971 for six pollution species with states retaining the option to add other pollutants, require more stringent compliance, or to include different exposure periods. The initial attainment deadline of 1977 was extended several times in air quality problem areas like Southern California. In 2003, the Environmental Protection Agency (EPA) adopted a rule, which extended and established a new attainment deadline for ozone for the year 2021. Because the State of California had established AAQS several years before the federal action and because of unique air quality problems introduced by the restrictive dispersion meteorology, there is considerable difference between state and national clean air standards. Those standards currently in effect in California are shown in Table 1. Sources and health effects of various pollutants are shown in Table 2.

The Federal Clean Air Act Amendments (CAAA) of 1990 required that the U.S. Environmental Protection Agency (EPA) review all national AAQS in light of currently known health effects. EPA was charged with modifying existing standards or promulgating new ones where appropriate. EPA subsequently developed standards for chronic ozone exposure (8+ hours per day) and for very small diameter particulate matter (called "PM-2.5"). New national AAQS were adopted in 1997 for these pollutants.

Planning and enforcement of the federal standards for PM-2.5 and for ozone (8-hour) were challenged by trucking and manufacturing organizations. In a unanimous decision, the U.S. Supreme Court ruled that EPA did not require specific congressional authorization to adopt national clean air standards. The Court also ruled that health-based standards did not require preparation of a cost-benefit analysis. The Court did find, however, that there was some inconsistency between existing and "new" standards in their required attainment schedules. Such attainment-planning schedule inconsistencies centered mainly on the 8-hour ozone standard. EPA subsequently agreed to downgrade the attainment designation for a large number of communities to “non-attainment” for the 8-hour ozone standard.

Table 1

Ambient Air Quality Standards						
Pollutant	**Averaging Time**	**California Standards** [1]		**National Standards** [2]		
		Concentration [3]	**Method** [4]	**Primary** [3,5]	**Secondary** [3,6]	**Method** [7]
Ozone (O_3)[8]	1 Hour	0.09 ppm (180 µg/m^3)	Ultraviolet Photometry	—	Same as Primary Standard	Ultraviolet Photometry
	8 Hour	0.070 ppm (137 µg/m^3)		0.070 ppm (137 µg/m^3)

California Air Resources Board (5/4/16)

Table 1 (continued)

1. California standards for ozone, carbon monoxide (except 8-hour Lake Tahoe), sulfur dioxide (1 and 24 hour), nitrogen dioxide, and particulate matter (PM10, PM2.5, and visibility reducing particles), are values that are not to be exceeded. All others are not to be equaled or exceeded. California ambient air quality standards are listed in the Table of Standards in Section 70200 of Title 17 of the California Code of Regulations.

2. National standards (other than ozone, particulate matter, and those based on annual arithmetic mean) are not to be exceeded more than once a year. The ozone standard is attained when the fourth highest 8-hour concentration measured at each site in a year, averaged over three years, is equal to or less than the standard. For PM10, the 24 hour standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 $\mu g/m^3$ is equal to or less than one. For PM2.5, the 24 hour standard is attained when 98 percent of the daily concentrations, averaged over three years, are equal to or less than the standard. Contact the U.S. EPA for further clarification and current national policies.

3. Concentration expressed first in units in which it was promulgated. Equivalent units given in parentheses are based upon a reference temperature of 25°C and a reference pressure of 760 torr. Most measurements of air quality are to be corrected to a reference temperature of 25°C and a reference pressure of 760 torr; ppm in this table refers to ppm by volume, or micromoles of pollutant per mole of gas.

4. Any equivalent measurement method which can be shown to the satisfaction of the ARB to give equivalent results at or near the level of the air quality standard may be used.

5. National Primary Standards: The levels of air quality necessary, with an adequate margin of safety to protect the public health.

6. National Secondary Standards: The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.

7. Reference method as described by the U.S. EPA. An "equivalent method" of measurement may be used but must have a "consistent relationship to the reference method" and must be approved by the U.S. EPA.

8. On October 1, 2015, the national 8-hour ozone primary and secondary standards were lowered from 0.075 to 0.070 ppm.

9. On December 14, 2012, the national annual PM2.5 primary standard was lowered from 15 $\mu g/m^3$ to 12.0 $\mu g/m^3$. The existing national 24-hour PM2.5 standards (primary and secondary) were retained at 35 $\mu g/m^3$, as was the annual secondary standard of 15 $\mu g/m^3$. The existing 24-hour PM10 standards (primary and secondary) of 150 $\mu g/m^3$ also were retained. The form of the annual primary and secondary standards is the annual mean, averaged over 3 years.

10. To attain the 1-hour national standard, the 3-year average of the annual 98th percentile of the 1-hour daily maximum concentrations at each site must not exceed 100 ppb. Note that the national 1-hour standard is in units of parts per billion (ppb). California standards are in units of parts per million (ppm). To directly compare the national 1-hour standard to the California standards the units can be converted from ppb to ppm. In this case, the national standard of 100 ppb is identical to 0.100 ppm.

11. On June 2, 2010, a new 1-hour SO_2 standard was established and the existing 24-hour and annual primary standards were revoked. To attain the 1-hour national standard, the 3-year average of the annual 99th percentile of the 1-hour daily maximum concentrations at each site must not exceed 75 ppb. The 1971 SO_2 national standards (24-hour and annual) remain in effect until one year after an area is designated for the 2010 standard, except that in areas designated nonattainment for the 1971 standards, the 1971 standards remain in effect until implementation plans to attain or maintain the 2010 standards are approved.

    Note that the 1-hour national standard is in units of parts per billion (ppb). California standards are in units of parts per million (ppm). To directly compare the 1-hour national standard to the California standard the units can be converted to ppm. In this case, the national standard of 75 ppb is identical to 0.075 ppm.

12. The ARB has identified lead and vinyl chloride as 'toxic air contaminants' with no threshold level of exposure for adverse health effects determined. These actions allow for the implementation of control measures at levels below the ambient concentrations specified for these pollutants.

13. The national standard for lead was revised on October 15, 2008 to a rolling 3-month average. The 1978 lead standard (1.5 $\mu g/m^3$ as a quarterly average) remains in effect until one year after an area is designated for the 2008 standard, except that in areas designated nonattainment for the 1978 standard, the 1978 standard remains in effect until implementation plans to attain or maintain the 2008 standard are approved.

14. In 1989, the ARB converted both the general statewide 10-mile visibility standard and the Lake Tahoe 30-mile visibility standard to instrumental equivalents, which are "extinction of 0.23 per kilometer" and "extinction of 0.07 per kilometer" for the statewide and Lake Tahoe Air Basin standards, respectively.

For more information please call ARB-PIO at (916) 322-2990 **California Air Resources Board (5/4/16)**

Table 2
Health Effects of Major Criteria Pollutants

Pollutants	Sources	Primary Effects
Carbon Monoxide (CO)	• Incomplete combustion of fuels and other carbon-containing substances, such as motor exhaust. • Natural events, such as decomposition of organic matter.	• Reduced tolerance for exercise. • Impairment of mental function. • Impairment of fetal development. • Death at high levels of exposure. • Aggravation of some heart diseases (angina).
Nitrogen Dioxide (NO_2)	• Motor vehicle exhaust. • High temperature stationary combustion. • Atmospheric reactions.	• Aggravation of respiratory illness. • Reduced visibility. • Reduced plant growth. • Formation of acid rain.
Ozone (O_3)	• Atmospheric reaction of organic gases with nitrogen oxides in sunlight.	• Aggravation of respiratory and cardiovascular diseases. • Irritation of eyes. • Impairment of cardiopulmonary function. • Plant leaf injury.
Lead (Pb)	• Contaminated soil.	• Impairment of blood function and nerve construction. • Behavioral and hearing problems in children.
Respirable Particulate Matter (PM-10)	• Stationary combustion of solid fuels. • Construction activities. • Industrial processes. • Atmospheric chemical reactions.	• Reduced lung function. • Aggravation of the effects of gaseous pollutants. • Aggravation of respiratory and cardio respiratory diseases. • Increased cough and chest discomfort. • Soiling. • Reduced visibility.
Fine Particulate Matter (PM-2.5)	• Fuel combustion in motor vehicles, equipment, and industrial sources. • Residential and agricultural burning. • Industrial processes. • Also, formed from photochemical reactions of other pollutants, including NOx, sulfur oxides, and organics.	• Increases respiratory disease. • Lung damage. • Cancer and premature death. • Reduces visibility and results in surface soiling.
Sulfur Dioxide (SO_2)	• Combustion of sulfur-containing fossil fuels. • Smelting of sulfur-bearing metal ores. • Industrial processes.	• Aggravation of respiratory diseases (asthma, emphysema). • Reduced lung function. • Irritation of eyes. • Reduced visibility. • Plant injury. • Deterioration of metals, textiles, leather, finishes, coatings, etc.

Source: California Air Resources Board, 2002.

Evaluation of the most current data on the health effects of inhalation of fine particulate matter prompted the California Air Resources Board (ARB) to recommend adoption of the statewide PM-2.5 standard that is more stringent than the federal standard. This standard was adopted in 2002. The State PM-2.5 standard is more of a goal in that it does not have specific attainment planning requirements like a federal clean air standard, but only requires continued progress towards attainment.

Similarly, the ARB extensively evaluated health effects of ozone exposure. A new state standard for an 8-hour ozone exposure was adopted in 2005, which aligned with the exposure period for the federal 8-hour standard. The California 8-hour ozone standard of 0.07 ppm is more stringent than the federal 8-hour standard of 0.075 ppm. The state standard, however, does not have a specific attainment deadline. California air quality jurisdictions are required to make steady progress towards attaining state standards, but there are no hard deadlines or any consequences of non-attainment. During the same re-evaluation process, the ARB adopted an annual state standard for nitrogen dioxide ($NO_{2)}$ that is more stringent than the corresponding federal standard, and strengthened the state one-hour NO_2 standard.

As part of EPA's 2002 consent decree on clean air standards, a further review of airborne particulate matter (PM) and human health was initiated. A substantial modification of federal clean air standards for PM was promulgated in 2006. Standards for PM-2.5 were strengthened, a new class of PM in the 2.5 to 10 micron size was created, some PM-10 standards were revoked, and a distinction between rural and urban air quality was adopted. In December, 2012, the federal annual standard for PM-2.5 was reduced from 15 $\mu g/m^3$ to 12 $\mu g/m^3$ which matches the California AAQS. The severity of the basin's non-attainment status for PM-2.5 may be increased by this action and thus require accelerated planning for future PM-2.5 attainment.

In response to continuing evidence that ozone exposure at levels just meeting federal clean air standards is demonstrably unhealthful, EPA had proposed a further strengthening of the 8-hour standard. A new 8-hour ozone standard was adopted in 2015 after extensive analysis and public input. The adopted national 8-hour ozone standard is 0.07 ppm which matches the current California standard. It will require three years of ambient data collection, then 2 years of non-attainment findings and planning protocol adoption, then several years of plan development and approval. Final air quality plans for the new standard are likely to be adopted around 2022. Ultimate attainment of the new standard in ozone problem areas such as Southern California might be after 2025.

In 2010 a new federal one-hour primary standard for nitrogen dioxide (NO_2) was adopted. This standard is more stringent than the existing state standard. Based upon air quality monitoring data in the South Coast Air Basin, the California Air Resources Board has requested the EPA to designate the basin as being in attainment for this standard. The federal standard for sulfur dioxide (SO_2) was also recently revised. However, with minimal combustion of coal and mandatory use of low sulfur fuels in California, SO_2 is typically not a problem pollutant.

BASELINE AIR QUALITY

Long-term air quality monitoring is carried out by the South Coast Air Quality Management District (SCAQMD) at various monitoring stations. There are no nearby stations that monitor the full spectrum of pollutants. Ozone, carbon monoxide, PM-2.5 and nitrogen oxides are monitored at the Pasadena facility, while 10-micron diameter particulate matter (PM-10) is measured at the downtown Los Angeles station. Table 3 summarizes the last four years of monitoring data from a composite of these data resources. The following conclusions can be drawn from this data:

a. Photochemical smog (ozone) levels occasionally exceed standards. The 1-hour state ozone standard has been exceeded on approximately five percent of all days in the last four years. The 8-hour federal standard has been exceeded on six percent of all days and the 8-hour state standard has been exceeded on slightly less than nine percent of all days during the same four year period. While ozone levels are still high, they are much lower than 10 to 20 years ago. Attainment of all clean air standards in the Project vicinity is not likely to occur soon, but the severity and frequency of violations is expected to continue to slowly decline during the current decade

b. Measurements of carbon monoxide have shown very low baseline levels in comparison to the most stringent one- and eight-hour standards.

c. Respirable dust (PM-10) levels exceed the state standard on approximately 15 percent of measurement days in the last four years, but the less stringent federal PM-10 standard has not been violated once for the same period. Year to year fluctuations of overall maximum 24-hour PM-10 levels seem to follow no discernable trend.

d. A substantial fraction of PM-10 is comprised of ultra-small diameter particulates capable of being inhaled into deep lung tissue (PM-2.5). There have been no violations of the maximum 24-hour concentration of all measurement days in the last four years. PM-2.5 can be an occasional air quality concern in the Project area.

Although complete attainment of every clean air standard is not yet imminent, extrapolation of the steady improvement trend suggests that such attainment could occur within the reasonably near future.

Table 3
Air Quality Monitoring Summary (2017-2020)
(Number of Days Standards Were Exceeded, and
Maximum Levels During Such Violations)

Pollutant/Standard	2017	2018	2019	2020
1-Hour > 0.09 ppm (S)	18	8	4	41
8-Hour > 0.07 ppm (S)	36	19	12	60
8- Hour > 0.075 ppm (F)	25	8	8	44
Max. 1-Hour Conc. (ppm)	0.139	0.112	0.120	0.163

Pollutant/Standard	2017	2018	2019	2020
Max. 8-Hour Conc. (ppm)	0.100	0.090	0.098	0.115
Carbon Monoxide				
1-Hour > 20. ppm (S)	0	0	0	0
1-Hour > 9. ppm (S, F)	0	0	0	0
Max 8-Hour Conc. (ppm)	1.7	1.4	1.2	2.2
Nitrogen Dioxide				
1-Hour > 0.18 ppm (S)	0	0	0	0
Max. 1-Hour Conc. (ppm)	0.072	0.068	0.059	0.061
Respirable Particulates (PM-10)				
24-Hour > 50 $\mu g/m^3$ (S)	41/340	31/363	3/9	24/337
24-Hour > 150 $\mu g/m^3$ (F)	0/340	0/363	0/9	0/337
Max. 24-Hr. Conc. ($\mu g/m^3$)	96.	91.	62.	77.
Fine Particulates (PM-2.5)				
24-Hour > 35 $\mu g/m^3$ (F)	0/121	0/121	0/118	0/117
Max. 24-Hr. Conc. ($\mu g/m^3$)	22.8	32.5	30.9	34.9

AIR QUALITY PLANNING

The Federal Clean Air Act (1977 Amendments) required that designated agencies in any area of the nation not meeting national clean air standards must prepare a plan demonstrating the steps that would bring the area into compliance with all national standards. The SCAB could not meet the deadlines for ozone, nitrogen dioxide, carbon monoxide, or PM-10. In the SCAB, the agencies designated by the governor to develop regional air quality plans are the SCAQMD and the Southern California Association of Governments (SCAG). The two agencies first adopted an Air Quality Management Plan (AQMP) in 1979 and revised it several times as earlier attainment forecasts were shown to be overly optimistic.

The 1990 Federal Clean Air Act Amendment (CAAA) required that all states with air-sheds with "serious" or worse ozone problems submit a revision to the State Implementation Plan (SIP). Amendments to the SIP have been proposed, revised and approved over the past decade. The most current regional attainment emissions forecast for ozone precursors (ROG and NOx) and for carbon monoxide (CO) and for particulate matter are shown in Table 4. Substantial reductions in emissions of ROG, NOx and CO are forecast to continue throughout the next several decades. Unless new particulate control programs are implemented, PM-10 and PM-2.5 are forecast to slightly increase.

The Air Quality Management District (AQMD) adopted an updated clean air "blueprint" in August 2003. The 2003 Air Quality Management Plan (AQMP) was approved by the EPA in 2004. The AQMP outlined the air pollution measures needed to meet federal health-based standards for ozone by 2010 and for particulates (PM-10) by 2006. The 2003 AQMP was based upon the federal one-hour ozone standard which was revoked late in 2005 and replaced by an 8-hour federal standard. Because of the revocation of the hourly standard, a new air quality planning cycle was initiated.

With re-designation of the air basin as non-attainment for the 8-hour ozone standard, a new attainment plan was developed. This plan shifted most of the one-hour ozone standard attainment strategies to the 8-hour standard. As previously noted, the attainment date was to "slip" from 2010 to 2021. The updated attainment plan also includes strategies for ultimately meeting the federal PM-2.5 standard.

Because Projected attainment by 2021 required control technologies that did not exist yet, the SCAQMD requested a voluntary "bump-up" from a "severe non-attainment" area to an "extreme non-attainment" designation for ozone. The extreme designation was to allow a longer time period for these technologies to develop. If attainment cannot be demonstrated within the specified deadline without relying on "black-box" measures, EPA would have been required to impose sanctions on the region had the bump-up request not been approved. In April 2010, the EPA approved the change in the non-attainment designation from "severe-17" to "extreme." This reclassification set a later attainment deadline (2024), but also required the air basin to adopt even more stringent emissions controls.

Table 4

[b]With current emissions reduction programs and adopted growth forecasts.
Source: California Air Resources Board, 2013 Almanac of Air Quality

In other air quality attainment plan reviews, EPA had disapproved part of the SCAB PM-2.5 attainment plan included in the AQMP. EPA stated that the current attainment plan relied on PM-2.5 control regulations that had not yet been approved or implemented. It was expected that a number of rules that were pending approval would remove the identified deficiencies. If these issues were not resolved within the next several years, federal funding sanctions for transportation Projects could result. The 2012 AQMP included in the current California State Implementation Plan (SIP) was expected to remedy identified PM-2.5 planning deficiencies.

The federal Clean Air Act requires that non-attainment air basins have EPA approved attainment plans in place. This requirement includes the federal one-hour ozone standard even though that standard was revoked almost ten years ago. There was no approved attainment plan for the one-hour federal standard at the time of revocation. Through a legal quirk, the SCAQMD is now required to develop an AQMP for the long since revoked one-hour federal ozone standard. Because the current SIP for the basin contain a number of control measures for the 8-hour ozone standard that are equally effective for one-hour levels, the 2012 AQMP was believed to satisfy hourly attainment planning requirements.

AQMPs are required to be updated every three years. The 2012 AQMP was adopted in early 2013. An updated AQMP was required for completion in 2016. The 2016 AQMP was adopted by the SCAQMD Board in March, 2017, and has been submitted the California Air Resources Board for forwarding to the EPA. The 2016 AQMP acknowledges that motor vehicle emissions have been effectively controlled and that reductions in NOx, the continuing ozone problem pollutant, may need to come from major stationary sources (power plants, refineries, landfill flares, etc.) . The current attainment deadlines for all federal non-attainment pollutants are now as follows:

8-hour ozone (70 ppb)	2032
Annual PM-2.5 (12 $\mu g/m^3$)	2025
8-hour ozone (75 ppb)	2024 (old standard)
1-hour ozone (120 ppb)	2023 (rescinded standard)
24-hour PM-2.5 (35 $\mu g/m^3$)	2019

The key challenge is that NOx emission levels, as a critical ozone precursor pollutant, are forecast to continue to exceed the levels that would allow the above deadlines to be met. Unless additional stringent NOx control measures are adopted and implemented, ozone attainment goals may not be met.

The proposed Project does not directly relate to the AQMP in that there are no specific air quality programs or regulations governing commercial use Projects. Conformity with adopted plans, forecasts and programs relative to population, housing, employment and land use is the primary yardstick by which impact significance of planned growth is determined. The SCAQMD, however, while acknowledging that the AQMP is a growth-accommodating document, does not favor designating regional impacts as less-than-significant just because the proposed development is consistent with regional growth Projections. Air quality impact significance for the proposed Project has therefore been analyzed on a Project-specific basis.

AIR QUALITY IMPACT

STANDARDS OF SIGNIFICANCE

Air quality impacts are considered "significant" if they cause clean air standards to be violated where they are currently met, or if they "substantially" contribute to an existing violation of standards. Any substantial emissions of air contaminants for which there is no safe exposure, or nuisance emissions such as dust or odors, would also be considered a significant impact.

Appendix G of the California CEQA Guidelines offers the following four tests of air quality impact significance. A Project would have a potentially significant impact if it:

a) Conflicts with or obstructs implementation of the applicable air quality plan.

b) Results in a cumulatively considerable net increase of any criteria pollutants for which the Project region is non-attainment under an applicable federal or state ambient air quality standard.

c) Exposes sensitive receptors to substantial pollutant concentrations.

d) Creates objectionable odors affecting a substantial number of people.

Primary Pollutants

Air quality impacts generally occur on two scales of motion. Near an individual source of emissions or a collection of sources such as a crowded intersection or parking lot, levels of those pollutants that are emitted in their already unhealthful form will be highest. Carbon monoxide (CO) is an example of such a pollutant. Primary pollutant impacts can generally be evaluated directly in comparison to appropriate clean air standards. Violations of these standards where they are currently met, or a measurable worsening of an existing or future violation, would be considered a significant impact. Many particulates, especially fugitive dust emissions, are also primary pollutants. Because of the non-attainment status of the South Coast Air Basin (SCAB)

for PM-10, an aggressive dust control program is required to control fugitive dust during Project construction.

Secondary Pollutants

Many pollutants, however, require time to transform from a more benign form to a more unhealthful contaminant. Their impact occurs regionally far from the source. Their incremental regional impact is minute on an individual basis and cannot be quantified except through complex photochemical computer models. Analysis of significance of such emissions is based upon a specified amount of emissions (pounds, tons, etc.) even though there is no way to translate those emissions directly into a corresponding ambient air quality impact.

Because of the chemical complexity of primary versus secondary pollutants, the SCAQMD has designated significant emissions levels as surrogates for evaluating regional air quality impact significance independent of chemical transformation processes. Projects with daily emissions that exceed any of the following emission thresholds are recommended by the SCAQMD to be considered significant under CEQA guidelines.

Table 5
Daily Emissions Thresholds

Pollutant	Construction	Operations
ROG	75	55
NOx	100	55
CO	550	550
PM-10	150	150
PM-2.5	55	55

Construction Activity Impacts

CalEEMod was developed by the SCAQMD to provide a model by which to calculate both construction emissions and operational emissions from a variety of land use Projects. It calculates both the daily maximum and annual average emissions for criteria pollutants as well as total or annual greenhouse gas (GHG) emissions.

The Project proposes demolition of 9,500 sf and new construction of 11,840 sf. The net increase over the existing building size is 2,340 sf. There will also be 100 added parking spaces. Construction was modeled in CalEEMod2020.4.0 using the construction equipment and schedule for a Project of this size as shown in Table 6.

Table 6
Construction Activity Equipment Fleet

Phase Name and Duration	Equipment
Demolition (20 days)	1 Concrete Saw
	1 Dozer
	3 Loader/Backhoes
Grading (4 days)	1 Grader
	1 Dozer
	2 Loader/Backhoes
Construction (200 days)	1 Crane
	1 Generator Set
	1 Loader/Backhoe
	3 Welders
	1 Forklift
Paving (10 days)	1 Paver
	1 Mixer
	1 Paving Equipment
	1 Loader/Backhoe
	1 Roller

Utilizing the indicated equipment fleet and durations shown in Table 6 the following worst-case daily construction emissions are calculated by CalEEMod and are listed in Table 7.

Table 7
Construction Activity Emissions
Maximum Daily Emissions (pounds/day)

Maximal Construction Emissions	ROG	NOx	CO	SO_2	PM-10	PM-2.5
2022	12.3	17.0	14.6	0.0	7.9	4.1
2323	12.3	1.3	2.0	0.0	0.1	0.1
SCAQMD Thresholds	75	100	550	150	150	55

Peak daily construction activity emissions are estimated be below SCAQMD CEQA thresholds without the need for added mitigation.

Construction equipment exhaust contains carcinogenic compounds within the diesel exhaust particulates. The toxicity of diesel exhaust is evaluated relative to a 24-hour per day, 365 days per year, 70-year lifetime exposure. The SCAQMD does not generally require the analysis of construction-related diesel emissions relative to health risk due to the short period for which the majority of diesel exhaust would occur. Health risk analyses are typically assessed over a 9-, 30-, or 70-year timeframe and not over a relatively brief construction period due to the lack of health risk associated with such a brief exposure.

LOCALIZED SIGNIFICANCE THRESHOLDS

The SCAQMD has developed analysis parameters to evaluate ambient air quality on a local level in addition to the more regional emissions-based thresholds of significance. These analysis elements are called Localized Significance Thresholds (LSTs). LSTs were developed in response to Governing Board's Environmental Justice Enhancement Initiative 1-4 and the LST methodology was provisionally adopted in October 2003 and formally approved by SCAQMD's Mobile Source Committee in February 2005.

Use of an LST analysis for a Project is optional. For the proposed Project, the primary source of possible LST impact would be during construction. LSTs are applicable for a sensitive receptor where it is possible that an individual could remain for 24 hours such as a residence, hospital or convalescent facility.

LSTs are only applicable to the following criteria pollutants: oxides of nitrogen (NOx), carbon monoxide (CO), and particulate matter (PM-10 and PM-2.5). LSTs represent the maximum emissions from a Project that are not expected to cause or contribute to an exceedance of the most stringent applicable federal or state ambient air quality standard and are developed based on the ambient concentrations of that pollutant for each source receptor area and distance to the nearest sensitive receptor.

LST screening tables are available for 25, 50, 100, 200- and 500-meter source-receptor distances. For this Project, the nearest potentially significant use is at least 300 feet from construction such that a 100-meter distance was modeled.

The SCAQMD has issued guidance on applying CalEEMod to LSTs. LST pollutant screening level concentration data is currently published for 1, 2- and 5-acre sites for varying distances. For this Project, the most stringent thresholds for a 1-acre site were applied.

The following thresholds and emissions in Table 8 are therefore determined (pounds per day):

Table 8
LST and Project Emissions (pounds/day)

1.0 acre/100 meters East San Fernando Valley	**CO**	**NOx**	**PM-10**	**PM-2.5**
LST Threshold	1,158	94	26	8
Max On-Site Emissions				
2022	14	17	8	4
2023	2	1	<1	<1

CalEEMod Output in Appendix
*Emissions for LST are limited to those generated on site and do not include regional emissions for on-road truck haul of demolition

LSTs were compared to the maximum daily construction activities. As seen in Table 8, LST impacts are less-than-significant.

Operational Impacts

The Project will add an additional 2,340 sf and will generate an increase of 65 trips per day using trip generation numbers provided in the Project VMT analysis. Operational emissions were calculated using CalEEMod2020.4.0 for an assumed completion year of 2023. The operational impacts are shown in Table 9. As shown, operational emissions will not exceed applicable SCAQMD operational emissions CEQA thresholds of significance.

Table 9

CONSTRUCTION EMISSIONS MINIMIZATION

Construction activities are not anticipated to cause dust emissions to exceed SCAQMD CEQA thresholds. Nevertheless, emissions minimization through enhanced dust control measures is recommended for use because of the non-attainment status of the air basin. Recommended measures include:

Fugitive Dust Control

- Apply soil stabilizers or moisten inactive areas.
- Water exposed surfaces as needed to avoid visible dust leaving the construction site (typically 2-3 times/day).
- Cover all stock piles with tarps at the end of each day or as needed.
- Provide water spray during loading and unloading of earthen materials.
- Minimize in-out traffic from construction zone
- Cover all trucks hauling dirt, sand, or loose material and require all trucks to maintain at least two feet of freeboard
- Sweep streets daily if visible soil material is carried out from the construction site

Similarly, ozone precursor emissions (ROG and NOx) are calculated to be below SCAQMD CEQA thresholds. However, because of the regional non-attainment for photochemical smog, the

use of reasonably available control measures for diesel exhaust is recommended. Combustion emissions control options include:

Exhaust Emissions Control

- Utilize well-tuned off-road construction equipment.
- Establish a preference for contractors using Tier 3 or better rated heavy equipment.
- Enforce 5-minute idling limits for both on-road trucks and off-road equipment.

GREENHOUSE GAS EMISSIONS

"Greenhouse gases" (so called because of their role in trapping heat near the surface of the earth) emitted by human activity are implicated in global climate change, commonly referred to as "global warming." These greenhouse gases contribute to an increase in the temperature of the earth's atmosphere by transparency to short wavelength visible sunlight, but near opacity to outgoing terrestrial long wavelength heat radiation in some parts of the infrared spectrum. The principal greenhouse gases (GHGs) are carbon dioxide, methane, nitrous oxide, ozone, and water vapor. For purposes of planning and regulation, Section 15364.5 of the California Code of Regulations defines GHGs to include carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons and sulfur hexafluoride. Fossil fuel consumption in the transportation sector (on-road motor vehicles, off-highway mobile sources, and aircraft) is the single largest source of GHG emissions, accounting for approximately half of GHG emissions globally. Industrial and commercial sources are the second largest contributors of GHG emissions with about one-fourth of total emissions.

California has passed several bills and the Governor has signed at least three executive orders regarding greenhouse gases. GHG statues and executive orders (EO) include AB 32, SB 1368, EO S-03-05, EO S-20-06 and EO S-01-07.

AB 32 is one of the most significant pieces of environmental legislation that California has adopted. Among other things, it is designed to maintain California's reputation as a "national and international leader on energy conservation and environmental stewardship." It will have wide-ranging effects on California businesses and lifestyles as well as far reaching effects on other states and countries. A unique aspect of AB 32, beyond its broad and wide-ranging mandatory provisions and dramatic GHG reductions are the short time frames within which it must be implemented. Major components of the AB 32 include:

- Require the monitoring and reporting of GHG emissions beginning with sources or categories of sources that contribute the most to statewide emissions.
- Requires immediate "early action" control programs on the most readily controlled GHG sources.
- Mandates that by 2020, California's GHG emissions be reduced to 1990 levels.

- Forces an overall reduction of GHG gases in California by 25-40%, from business as usual, to be achieved by 2020.
- Must complement efforts to achieve and maintain federal and state ambient air quality standards and to reduce toxic air contaminants.

Statewide, the framework for developing the implementing regulations for AB 32 is under way. Maximum GHG reductions are expected to derive from increased vehicle fuel efficiency, from greater use of renewable energy and from increased structural energy efficiency. Additionally, through the California Climate Action Registry (CCAR now called the Climate Action Reserve), general and industry-specific protocols for assessing and reporting GHG emissions have been developed. GHG sources are categorized into direct sources (i.e. company owned) and indirect sources (i.e. not company owned). Direct sources include combustion emissions from on-and off-road mobile sources, and fugitive emissions. Indirect sources include off-site electricity generation and non-company owned mobile sources.

Thresholds of Significance

In response to the requirements of SB97, the State Resources Agency developed guidelines for the treatment of GHG emissions under CEQA. These new guidelines became state laws as part of Title 14 of the California Code of Regulations in March, 2010. The CEQA Appendix G guidelines were modified to include GHG as a required analysis element. A Project would have a potentially significant impact if it:

- Generates GHG emissions, directly or indirectly, that may have a significant impact on the environment, or,

- Conflicts with an applicable plan, policy or regulation adopted to reduce GHG emissions.

Section 15064.4 of the Code specifies how significance of GHG emissions is to be evaluated. The process is broken down into quantification of Project-related GHG emissions, making a determination of significance, and specification of any appropriate mitigation if impacts are found to be potentially significant. At each of these steps, the new GHG guidelines afford the lead agency with substantial flexibility.

Emissions identification may be quantitative, qualitative or based on performance standards. CEQA guidelines allow the lead agency to "select the model or methodology it considers most appropriate." The most common practice for transportation/combustion GHG emissions quantification is to use a computer model such as CalEEMod, as was used in the ensuing analysis.

The significance of those emissions then must be evaluated; the selection of a threshold of significance must take into consideration what level of GHG emissions would be cumulatively considerable. The guidelines are clear that they do not support a zero net emissions threshold. If the lead agency does not have sufficient expertise in evaluating GHG impacts, it may rely on thresholds adopted by an agency with greater expertise.

On December 5, 2008 the SCAQMD Governing Board adopted an Interim quantitative GHG Significance Threshold for industrial Projects where the SCAQMD is the lead agency (e.g., stationary source permit Projects, rules, plans, etc.) of 10,000 Metric Tons (MT) CO_2 equivalent/year. In September 2010, the SCAQMD CEQA Significance Thresholds GHG Working Group released revisions which recommended a threshold of 3,000 MT CO_2e for all land use Projects. This 3,000 MT/year recommendation has been used as a guideline for this analysis. In the absence of an adopted numerical threshold of significance, Project related GHG emissions in excess of the guideline level are presumed to trigger a requirement for enhanced GHG reduction at the Project level.

Project Related GHG Emissions Generation

Construction Activity GHG Emissions

CalEEMod assumes the Project to require less than two years for construction. During Project construction, the CalEEMod2020.4.0 computer model predicts that the construction activities will generate the annual CO_2e emissions identified in Table 10.

Table 10
Construction Emissions (Metric Tons CO_2e)

	CO_2e
Year 2022	252.0
Year 2023	1.0
Total	253.0
Amortized	**8.4**

CalEEMod Output provided in appendix

SCAQMD GHG emissions policy from construction activities is to amortize emissions over a 30-year lifetime. The amortized level is also provided. GHG impacts from construction are considered individually less-than-significant.

Project Operational GHG Emissions

The input assumptions for operational GHG emissions calculations, and the GHG conversion from consumption to annual regional CO_2e emissions are summarized in the CalEEMod2020.4.0 output files found in the appendix of this report.

The total operational and annualized construction emissions for the proposed Project are identified in Table 11. The Project GHG emissions are considered less-than-significant.

Table 11

Energy Utilization	13.2
Mobile Source	30.7
Solid Waste Generation	4.5
Water Consumption	2.2
Construction	8.4
Total	**59.0**
Guideline Threshold	3,000

CONSISTENCY WITH GHG PLANS, PROGRAMS AND POLICIES

In March 2012, the City of Glendale completed its Greener Glendale Plan. The primary component of the plan which relates to the Project is:

- ED 4 - B Promote green buildings (LEED, Green Point Rated, etc.) in the city

The Project replaces much older, much less energy efficient structures with a newer construction conforming with green building requirements. Even though the size of the new structure is slightly larger associated GHG emissions are very low.

Glendale Water and Power provides the Green Building Program, which supports green building training opportunities for GWP customers, area contractors, and city employees. It also provides incentives for various green building efforts such as green building certification, rating, and technical assistance.

There is no easy way to model GHG emissions for the year the existing showroom was built to provide a comparison to the new showroom to be built in 2022. However, it can be assumed that even with the increased square footage the GHG footprint would be lower. In addition, the Project GHG emissions are much less than the thresholds. Therefore, the Project would not conflict with any applicable plan, policy, or regulation to reduce GHG emissions.

January 8, 2022

Project No.: P21-044 N

PROJECT DESCRIPTION

NOISE SETTING

Sound is mechanical energy transmitted by pressure waves in a compressible medium such as air. Noise is generally considered to be unwanted sound. Sound is characterized by various parameters that describe the rate of oscillation of sound waves, the distance between successive troughs or crests, the speed of propagation, and the pressure level or energy content of a given sound. In particular, the sound pressure level has become the most common descriptor used to characterize the loudness of an ambient sound level.

The decibel (dBA) scale is used to quantify sound pressure levels. Although decibels are most commonly associated with sound, "dB" is a generic descriptor that is equal to ten times the logarithmic ratio of any physical parameter versus some reference quantity. For sound, the reference level is the faintest sound detectable by a young person with good auditory acuity.

Since the human ear is not equally sensitive to all sound frequencies within the entire auditory spectrum, human response is factored into sound descriptions by weighting sounds within the range of maximum human sensitivity more heavily in a process called “A-weighting,” written as dB(A). Any further reference in this discussion to decibels written as "dBA" should be understood to be A-weighted.

Time variations in noise exposure are typically expressed in terms of a steady-state energy level equal to the energy content of the time varying period (called LEQ), or alternately, as a statistical description of the sound pressure level that is exceeded over some fraction of a given observation period. Finally, because community receptors are more sensitive to unwanted noise intrusion during the evening and at night, state law requires that, for planning purposes, an artificial dB increment be added to quiet time noise levels in a 24-hour noise descriptor called the Ldn (day-night) or the Community Noise Equivalent Level (CNEL). The CNEL metric has gradually replaced the Ldn factor, but the two descriptors are essentially identical.

For “stationary” noise sources, or noise sources emanating from private property, such as a parking structure, the City does have legal authority to establish noise performance standards designed to not adversely impact adjoining uses. These standards are typically articulated in the jurisdictional Municipal Code. These standards recognize the varying noise sensitivity of both transmitting and receiving land uses. The property line noise performance standards are normally structured according to land use and time-of-day.

NOISE STANDARDS

For noise generated on one property affecting an adjacent use, the City of Glendale limits the amount of noise crossing the boundary between the two uses. Only commercial uses abut the Project site. The closest sensitive use to the east, the Victor Royal Adult Living Center is approximately 350 feet from the nearest project perimeter, and is located on Laurel Avenue Between Brand and Glendale. The Glendale

Memorial Hospital and Health Center is west of the site with more than a 300-foot separation distance to the existing showroom which is to be demolished.

The central business district and commercial areas in Glendale have a presumed ambient noise level which applies to all properties within the designated zone. Commercial uses should not exceed a noise level of 65 dBA at any time at the boundary with another use. Star Mazda is not contiguous with a residential district. There are no noise sensitive uses adjacent to Star Mazda.

Where the actual ambient is equal to or more than the presumed ambient, the actual ambient shall control and any noise may not exceed the actual ambient by more than five dbA; however, in no event may the actual ambient exceed the presumed noise standards by five dbA.

CONSTRUCTION NOISE

Construction noise is exempt from noise standards but subject to conditions iterated under section 8.36.080 of the Municipal Code. The Code states that construction is only permitted between the hours of 7 a.m. to 7 p.m. Monday through Saturday with no construction permitted on Sundays and Federal holidays. However, the General Plan Noise Element proposes a change to restrict the hours of construction on Saturday to 9 a.m. to 5 p.m. with other days remaining unchanged.

BASELINE NOISE LEVELS

Short term on-site noise measurements were made to document baseline levels in the Project area. Noise measurements were conducted on Wednesday, January 5, 2022, at approximately 1:15-1:45 p.m., at the two locations shown in Figure 2.

Table 1
Measured Noise Levels (dBA)

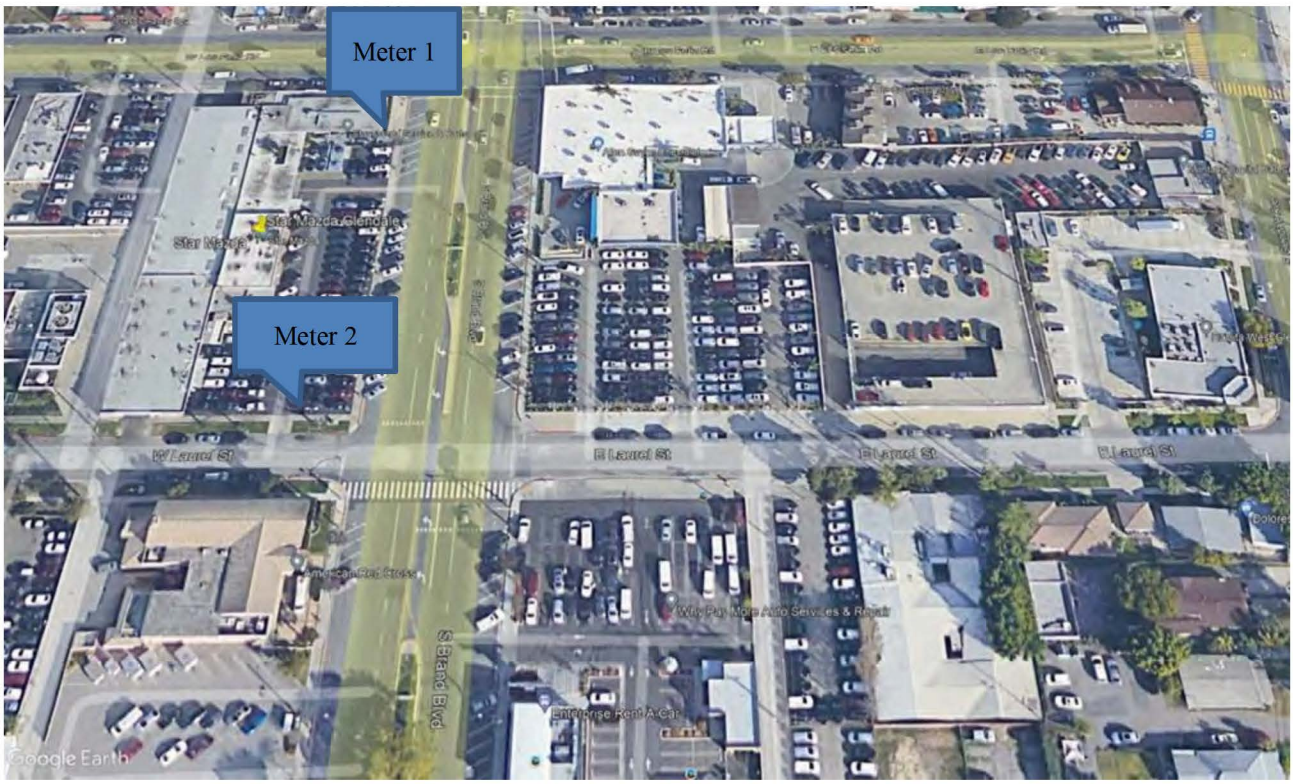

Site No.	Location	Leq	Lmax	Lmin
1	Existing Showroom	63	81	49
2	Proposed Showroom	59	80	48

The only unique noise source at the existing showroom was a loudspeaker used to page sales personnel out on the lot typically asking them to come to the office. The maximum noise level from the pager was less than maxima from ambient sources, primarily attributed to traffic on Brand Boulevard. There is a hospital to the west with frequent sirens, but not near the dealership. The maximum observed noise at the existing showroom locale was a very loud motorcycle with a bad muffler, the loudest noise at the southern site boundary where the new showroom is proposed was a fire engine siren northbound Brand Boulevard.

The hospital to the west, the Glendale Memorial Hospital and Health Center, is more than 300 feet from the existing showroom and there are numerous intervening structures. The new showroom location will have a greater separation distance.

The Victor Royal Adult Living Center is on Laurel Avenue east of the site across Brand Boulevard and is more than 350 feet from the closest perimeter of the relocated showroom. Traffic from Brand Avenue dominates the noise environment and was observed to mute the existing showrooms loudspeaker at 50 feet. The new showroom is more than 350 feet away and loudspeaker noise would not be audible. The Allen Gwynn Chevrolet facility is directly across the street from the living center. In addition, any loudspeakers for the new location would be directed towards the center of the Star Mazda facility and not towards any sensitive use.

Figure 1
Noise Meter Locations

NOISE IMPACTS

IMPACT SIGNIFICANCE CRITERIA

Noise impacts are considered significant if they result in:

a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the Project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.

b. Generation of excessive groundborne vibration or groundborne noise levels.

c. For a Project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project expose people residing or working in the Project area to excessive noise levels.

Several characteristic noise sources are typically identified with land use intensification such as that proposed for the development of the proposed Project. Construction activities, especially heavy equipment, will create short-term noise increases near the site. Such impacts would be important for possible noise-sensitive receptors. Additionally, the Project analysis examines operational noise on adjacent receptors. There are no airports within proximity to the Project.

The term "substantial increase" is not defined by any responsible agency. The limits of perceptibility by ambient grade instrumentation (sound meters) or by humans in a laboratory environment is around 1.5 dB. Under ambient conditions, people generally do not perceive that noise has clearly changed until there is a 3 dB difference. A threshold of 3 dB is commonly used to define "substantial increase." An increase of +3 dBA CNEL in traffic noise would be consistent a significant impact.

CONSTRUCTION NOISE IMPACTS

The Glendale Memorial Hospital will be the closest sensitive use to the demolition of the existing showroom while the Victor Royal Adult Living Center will be the closest sensitive use to the new showroom.

The noise ordinance exempts construction activities from compliance with the noise ordinance limits as long as activity occurs within permitted hours. The City of Glendale currently limits construction activities to between the hours of 7 a.m. to 7 p.m. Monday through Saturday with no construction permitted on Sundays and Federal holidays. As stated earlier an effort is underway to restrict hours of construction on Saturday to 9 a.m. to 5 p.m. with other days remaining unchanged.

The City of Glendale does not include a significance threshold to assess construction noise impacts. Therefore, a noise threshold utilizing the OSHA agency limits of noise exposure was used for analysis of construction significance**.** The OSHA standard limits noise exposure of workers to 90 dBA or less over eight continuous hours, or 105 dBA or less over one continuous hour. For the purpose of

analyzing potential noise significance the OSHA established noise thresholds were adopted for use. For this analysis, a noise impact is considered potentially significant if Project construction activities extended beyond ordinance time limits for construction or construction-related noise levels exceed the OSHA standards unless technically infeasible to do so.

The exact construction schedule for the proposed development is not known at this time. Construction activities proposed for similar projects typically include demolition and clearing, grading and improvements, construction of the building shells, interior finishing, and landscaping. Construction equipment such as bulldozers, backhoes, loaders, and assorted other hand tools and professional grade equipment would likely be used.

In 2006, the Federal Highway Administration (FHWA) published the Roadway Construction Noise Model that includes a national database of construction equipment reference noise emissions levels. The database provides an acoustical usage factor to estimate the fraction of time each piece of construction equipment is operating at full power during a construction phase. The usage factor is a key input variable that is used to calculate the average Leq noise levels.

Table 2 shows a probable construction fleet and provides the associated noise levels at a reference distance of 50 feet. The table identifies highest (Lmax) noise levels associated with each type of equipment, then adjusts this noise level for the extent of equipment usage (usage factor), which is represented as Leq. The table is organized by construction activity and equipment associated with each activity

Quantitatively, the primary noise prediction equation is expressed as follows for the hourly average noise level (Leq) at distance D between the source and receiver (dBA):

Leq = Lmax @ 50' – 20 log (D/50') + 10log (U.F%/100) – I.L.(bar)

Where:

Lmax @ 50' is the published reference noise level at 50 feet
U.F.% is the usage factor for full power operation per hour
I.L.(bar) is the insertion loss for intervening barriers

Table 2
Construction Equipment Noise Levels at 50-ft Reference Distance

Phase Name	Equipment	Usage Factor[1]	Measured Noise @ 50 feet (dB)	Cumulative Noise Level @ 50 feet (dB))

Source: FHWA's Roadway Construction Noise Model, 2006

1. Estimates the fraction of time each piece of equipment is operating at full power during a construction operation

Typical hourly average construction generated noise levels are about 68 dBA to 78 dBA Leq measured at a distance of 50 feet from the source. Construction generated noise levels drop off or increase at a rate of about 6 dBA per doubling of distance between the source and receptor. Shielding by buildings or terrain often results in lower construction noise levels at distant receptors. The potential for construction-related noise to adversely affect nearby receptors would depend on the location and proximity of construction activities to these receptors.

Table 3 adjusts the expected maximal construction noise level from a reference distance of 50 feet to the actual distance separation unique to the two selected receptors. The hospital will be 300 feet from demolition of the existing showroom but almost 400 feet from construction of the new showroom. The adult living center would be 350 feet from construction of the new showroom, but 450 feet from demolition of the existing showroom.

Only the interior noise levels would be of concern for both adjacent uses. Because the hospital is built more robustly than the adult living facility there was an assumed -30 dBA exterior to interior attenuation factor. Since the adult living facility is an older structure only a -25 dBA exterior to interior noise attenuation factor was assumed.

Table 3
Construction Noise Exposure at Adjoining Receptors
(dBA Leq)

		Exterior Noise Level		Interior Noise Level	
Phase Name	**Equipment**	**Hospital**	**Adult Living Facility**	**Hospital**	**Adult Living Facility**
Demolition	Dozer	62	59	32	34
	Loader/Backhoe	58	55	28	30
Grading	Grader	63	64	33	39

	Dozer	60	61	30	36
	Loader/Backhoe	56	57	26	32
Building Construction	Forklift	50	51	20	26
	Loader/Backhoe	56	57	26	32
	Crane	55	56	25	31
	Welder	53	54	23	29
Paving	Paver	56	57	26	32
	Paving Equip	54	55	24	30
	Roller	58	59	28	34
	Loader/Backhoe	56	57	26	32

Shielding by buildings or terrain would result in lower construction noise levels at the above distant receptors. As shown in Table 3, construction noise levels will not exceed 90 dBA, the OSHA threshold adopted for use for this project. In addition, the interior noise levels which are of greater concern would be quite low. Therefore, the following measures are recommended to ensure noise compliance during construction activities:

- Construction is only permitted between the hours of 7 a.m. to 7 p.m. Monday through Saturday with no construction permitted on Sundays and Federal holidays
- Construction vehicles and equipment (fixed or mobile) shall be equipped with properly operating and maintained mufflers.
- Material stockpiles and/or vehicle staging areas shall be located as far as practical from dwelling units.

With inclusion of these measures, construction noise impacts from the Project would be reduced to a less than significant level.

CONSTRUCTION ACTIVITY VIBRATION

Construction activities generate ground-borne vibration when heavy equipment travels over unpaved surfaces or when it is engaged in soil movement. The effects of ground-borne vibration include discernible movement of building floors, rattling of windows, shaking of items on shelves or hanging on walls, and rumbling sounds. Vibration related problems generally occur due to resonances in the structural components of a building because structures amplify groundborne vibration. Within the "soft" sedimentary surfaces of much of Southern California, ground vibration is quickly damped out. Groundborne vibration is almost never annoying to people who are outdoors (FTA 2006).

Groundborne vibrations from construction activities rarely reach levels that can damage structures. Because vibration is typically not an issue, very few jurisdictions have adopted vibration significance thresholds. Vibration thresholds have been adopted for major public works construction Projects, but these relate mostly to structural protection (cracking foundations or stucco) rather than to human annoyance.

A vibration descriptor commonly used to determine structural damage is the peak particle velocity (ppv) which is defined as the maximum instantaneous positive or negative peak of the vibration signal, usually measured in in/sec. The range of such vibration is as follows in Table 4:

Table 4
Human Response To Transient Vibration

Average Human Response	ppv (in/sec)
Severe	2.00
Strongly perceptible	0.90
Distinctly perceptible	0.24
Barely perceptible	0.03

Source: Caltrans Transportation and Construction Vibration Guidance Manual, 2013.

Over the years, numerous vibration criteria and standards have been suggested by researchers, organizations, and governmental agencies. As shown in Table 5**,** according to Caltrans and the FTA, the threshold for structural vibration damage for modern structures is 0.5 in/sec for intermittent sources, which include impact pile drivers, pogo-stick compactors, crack-and-seat equipment, vibratory pile drivers, and vibratory compaction equipment. Older, typically historical residential structures have a 0.3 in/sec threshold. Below this level there is virtually no risk of building damage.

Table 5
FTA and Caltrans Guideline Vibration Damage Potential Threshold Criteria

Building Type	**PPV (in/sec)**
FTA Criteria	
Reinforced concrete, steel or timber (no plaster)	0.5
Engineered concrete and masonry (no plaster)	0.3
Non-engineered timber and masonry buildings	0.2
Buildings extremely susceptible to vibration damage	0.12
Caltrans Criteria	
Modern industrial/commercial buildings	0.5
New residential structures	0.5
Older residential structures	0.3
Historic old buildings	0.25
Fragile Buildings	0.1
Extremely fragile ruins, ancient monuments	0.08

The predicted vibration levels generated by construction equipment anticipated for use are shown below in Table 6.

Table 6
Estimated Vibration Levels During Project Construction

Equipment	PPV at 10 ft (in/sec)	PPV at 15 ft (in/sec)	PPV at 25 ft (in/sec)	PPV at 40 ft (in/sec)	PPV at 50 ft (in/sec)
Large	0.352	0.191	0.089	0.044	0.031
Loaded trucks	0.300	0.163	0.076	0.037	0.027
Jackhammer	0.138	0.075	0.035	0.017	0.012
Small Bulldozer	0.012	0.006	0.003	0.001	<0.001

Source: FHWA Transit Noise and Vibration Impact Assessment

The calculation to determine PPV at a given distance is:

PPVdistance = PPVref*(25/D)^1.5

Where:

PPVdistance = the peak particle velocity in inches/second of the equipment adjusted for distance,

PPVref = the reference vibration level in inches/second at 25 feet, and

D = the distance from the equipment to the receiver.

As shown, even at 10 feet, vibration levels from a large bulldozer are reduced to a level at which structural damage would not occur. There will not be a large bulldozer within 10-feet of any off-site structure. Most other construction equipment has a much lower vibration signature.

SITE OPERATIONAL NOISE

The only noise associated with the project is the additional vehicular trips attributed to the new showroom and noise from the loudspeakers.

The new showroom will be on the SE corner of the lot. Any speakers will be directed interior to the site, i.e. to the NW and away from the senior living center. In addition, the structure itself will assist in blocking noise at the senior living center which is 350 away. Loudspeaker noise will not be audible at the senior living center. Traffic from Brand Boulevard would dilute any project nuisance.

The Project will generate a net increase of 5 AM peak hour trips, 6 PM peak hour trips, and 65 daily trips. This increase is diluted by the existing traffic on Brand Boulevard and Laurel Street and any vehicular noise attributed to 65 additional daily trips would not be perceptible. By way of reference, it takes a doubling of traffic to create even a +3 dBA increase.

CONCLUSION

Construction noise will be less than significant with the inclusion of the following measures:

- Construction is only permitted between the hours of 7 a.m. to 7 p.m. Monday through Saturday with no construction permitted on Sundays and Federal holidays
- Construction vehicles and equipment (fixed or mobile) shall be equipped with properly operating and maintained mufflers.
- Material stockpiles and/or vehicle staging areas shall be located as far as practical from dwelling units.

Construction vibration levels will be less-than-significant.

Project operational noise attributed to the loudspeaker/PA system will not be audible at any offsite potentially sensitive use.

Project operational noise attributed to the additional project generated 65 vehicular trips will not be audible when overlayed with existing traffic on Brand Boulevard.

Section 1.0
Introduction

1.1 Purpose

Waterstone Environmental, Inc. ("Waterstone") has been retained by Rim Rock Investments, LLC (Rim Rock) to prepare a Phase I Environmental Assessment ("Phase I EA") for the property located at 1401 S. Brand Boulevard in Glendale, California (see Figure 1). The Subject Property is occupied by five attached buildings on an approximately 1.25 acre auto dealership with an auto service/repair area.

The sole purpose of this environmental assessment is to identify Recognized Environmental Conditions ("RECs") for the Subject Property. This assessment was conducted utilizing generally accepted Phase I industry standards in accordance with the American Society of Testing and Materials ("ASTM") Standard E 1527-13 – Phase I Environmental Site Assessment Process and All Appropriate Inquiry ("AAI").

For the purpose of this report, and as defined by the ASTM, a REC is *"the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not RECs."*

An Historical Recognized Environmental Condition (HREC) is defined as *"a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)."*

A Controlled Recognized Environmental Condition (CREC) is defined *as "a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)."*

To the extent that work performed as part of an ASTM and AAI compliant Phase I revealed conditions that may indicate an indoor air issue, Waterstone also evaluated the Subject Property for potential vapor encroachment issues. The ASTM E2600 Standard, while not required for a Phase I, provides a definition of a Vapor Encroachment Condition (VEC) which is "*…is the presence or likely presence of contaminant of concern vapors in the sub-surface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater either on or near the TP."*

The work was conducted pursuant to authorization to proceed with the project by Mr. Bart

Hutchinson of Rim Rock.

1.2 Scope of Work

The following scope of work was performed to accomplish the Phase I objectives:

- **Visual Inspection** - A visual evaluation of the Subject Property was conducted in readily accessible areas to identify RECs. Additionally, visual observations of adjoining properties were made from the vantage point of the Subject Property as well as from public right-of-ways to determine the potential impact of these sites on the Subject Property.
- **Subject Property Interview** - Interviews were requested of individuals knowledgeable and familiar with the Subject Property.
- **Records Review** - Available environmental reports, agency records, building department permits, Sanborn Maps and historical aerial photographs of the Subject Property and surrounding areas were reviewed.
- **Agency Document Review** - Appropriate regulatory agencies were contacted for information regarding hazardous materials use, storage, and/or releases at the Subject Property.
- **Published Database Review** - Published governmental agency databases were reviewed to identify properties within ASTM-specified radii of the Subject Property with a reported environmental concern or incident. Waterstone subcontracts the government agency database search to Environmental Data Resources, Inc. ("EDR").
- **Additional Regulatory Review -** Appropriate regulatory agencies were contacted and available records for properties that may negatively impact the Subject Property were reviewed.
- **Report Preparation** - A summary report was prepared of the environmental assessment findings and conclusions.
- **Environmental Professional** – All Subject Property inquiry was conducted by an environmental professional or under the supervision of an environmental professional.
- **Required Purchaser Activities** – It is the responsibility of the purchaser to assess the purchase price compared to fair market value, conduct a search for environmental cleanup liens, inquire about commonly known or ascertainable information that may affect the environmental conditions of the Subject Property, and provide any specialized knowledge or experience as the landowner or grantee.

1.3 Limitations and Exceptions

If topics are not explicitly discussed within this document, the reader should not assume those topics have been investigated. For example, physical testing was not performed, unless specifically detailed in this document. The work performed in conjunction with this study and data developed are intended as a description of available information on the dates and at the locations described. This report does not warrant against future operations or conditions, nor does it warrant against:

- Operations which are not in evidence from visual observations or search of published agency records, or facts that were concealed, withheld, or not fully disclosed at the time the inspection was conducted.
- Conditions that could only be determined by physical sampling or intrusive testing.
- Conditions on locations other than the User-provided Subject Property address and/or legal parcel description.

This Phase I EA report is not intended to address, assess, or otherwise determine whether soil or groundwater contamination, waste emplacement, existing or threatened mold/fungus growth, asbestos-containing building materials, and/or lead-based paint actually exists at the Subject Property. Such determination would require comprehensive subsurface exploration and/or other sampling activities, which were beyond the scope of service for this assessment. Additionally, this report does not serve as a comprehensive wetlands, mining, oil, pipeline, and/or gas well survey.

This report summarizes an environmental investigation conducted for the Subject Property. Although conditions at neighboring properties may impact the Subject Property and, to the extent they were identified, were included in the Subject Property evaluation, this report does not serve as an assessment of sites other than the Subject Property.

1.4 Reliance

The Phase I EA was performed in accordance with a request by Bart Hutchinson on behalf of Rim Rock. The work was performed in accordance with the terms and conditions of the existing contract for the environmental evaluation of the Subject Property for the exclusive use of Rim Rock. This party intends to rely upon this report as an assessment of the existing physical environmental condition of the Subject Property based on the study performed for this Phase I EA for the purpose of renovating a portion of the property with a new auto showroom and offices in the northeastern portion of the Subject Property. An authorized party (or parties) may use and rely on this report provided that each party agrees to be bound by the same contractual terms and conditions imposed by aforementioned contract of engagement. Waterstone recommends that any authorized party or other third party intending to rely upon the report independently determine whether the scope of services meets their expectations for an acquisition transaction.

Waterstone's professional services were performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable due-diligence professionals practicing in the Phase I EA due-diligence consulting field in this or similar localities at this time. No other warranty, expressed or implied, is made as to the professional opinions described in this report. Waterstone is not responsible or liable for any claims that are associated with the interpretation of the available information. Additionally, Waterstone is not responsible for any claims from third parties not associated with the User, unless this report is assigned in its entirety to a party acceptable to Waterstone.

Note: Waterstone exercised the usual and customary professional care in its efforts to assess property environmental law/code/regulation compliance. However, it is beyond the scope of a Phase I EA to provide definitive and thorough opinions regarding environmental compliance. Due to the existence

of literally thousands of laws, codes, and regulations pertaining to the environment, Waterstone does not represent that any observations in this Phase I EA are a complete and definitive opinion regarding regulatory compliance.

Waterstone has based its assessment on prior Subject Property histories, interviews, a review of available records, and observations of activities during a physical site inspection. Some or all of this information has been reported to Waterstone from several sources. Waterstone has relied on this reported information and data without further verification or validation of its accuracy.

1.5 Environmental Professional Statement

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Subject Property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. (See Appendix A for Environmental Professional Resumes.)

1.6 Proprietary Notice

This document is privileged and confidential information and should not be duplicated or copied without the express permission of Waterstone Environmental, Inc. Any unauthorized reuse of Waterstone reports or data will be at the unauthorized user's sole risk and liability.

Section 2.0
User Provided Information

Waterstone has performed this Phase I EA at the request of Bart Hutchinson of Rim Rock. As such, Rim Rock is considered the "User" of the report, as defined under ASTM Standard Practice E 1527-13. In order to satisfy the requirements of AAI and to qualify for one of the Landowner Liability Protections ("LLPs") offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must provide certain information regarding the history of the property, its use, and its fair market value.

As part of this Phase I ESA, Waterstone requested certain information from the User (see Appendix B - User Questionnaire). The information requested and associated responses are outlined in the remainder of this section of the report.

2.1 Reason for Performing the Phase I ESA

Waterstone understands that this assessment was performed for the User prior to renovating a portion of the Subject Property with a new auto showroom and offices in the northeastern portion of the Subject Property. As such, this Phase I EA was conducted in accordance with AAI to qualify for the innocent landowner, contiguous property owner, and bona fide prospective purchaser defense to CERCLA liability and performed as an appropriate risk management and due diligence standard for real estate transactions in accordance with general industry standards which include ASTM Standard E 1527-13.

2.2 Title Records, Liens, and Property Use Limitations

Waterstone was not provided with title records by the User; however, an environmental lien search was completed (See Appendix C). Based on the information in Appendix C, Waterstone learned of no property use limitations.

With reference to Activity Use Limitations (AUL) that are in place on the Subject Property or that have been filed or recorded in a registry (40 CFR 312.26), the User has no knowledge of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded in a registry under federal, tribal, state or local law.

2.3 Specialized Knowledge, Commonly Known & Degree of Obviousness

With reference to specialized knowledge or experience of the person seeking to qualify for LLPs (40 CFR 312.28), Waterstone interviewed the User who stated he had no specialized knowledge or experience related to the Subject Property or nearby properties other than the information Waterstone has provided in this Phase I EA report, which Waterstone previously discussed with the User.

With reference to commonly known or reasonably ascertainable information about the Subject Property (40 CFR 312.30), the User was not aware of (other than the information Waterstone has provided in this Phase I EA report, which Waterstone previously discussed with the User) commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases, such as the historical past uses of the Subject Property, including:

1. Specific chemicals that are present or once were present at the Subject Property;
2. Spills or other chemical releases that have taken place at the Subject Property; and
3. Environmental cleanups that have taken place at the Subject Property.

With reference to the degree of obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31), the User, based on knowledge and experience related to the Subject Property, was not aware of any obvious indicators that point to the presence or likely presence of contamination at the Subject Property other than the information in public records which Waterstone has provided in this Phase I report which Waterstone previously discussed with the User.

Waterstone requested from the User any other specialized knowledge regarding the environmental conditions associated with the Subject Property. The User did not have any specialized knowledge of RECs or other conditions of environmental concern at the Subject Property other than the information in public records which Waterstone has provided in this Phase I report which Waterstone previously discussed with the User.

2.4 Value Reduction for Environmental Issues

Waterstone interviewed the User regarding the relationship of the prospective purchase price to the fair market value of the Subject Property if it were not contaminated (40 CFR 312.29). The User indicated that, to his knowledge, the prospective purchase price for the Subject Property reasonably reflects its fair market value at the time the purchase contract was signed and has not been reduced due to contamination known or believed to be present.

Section 3.0
General Subject Property Characteristics

3.1 Subject Property General Description

The Subject Property is located at 1401 S. Brand Blvd. in the City of Glendale, California. The Subject Property is occupied by five attached buildings on an approximately 1.25-acre auto dealership with an auto service/repair area.

The Subject Property is occupied by an auto showroom and sales offices in the northern portion of the site, auto repair and service along west side of the site, a stock room and office in the center of the site, and auto parking in the central and eastern portions of the site. The Subject Property is currently leased to Star Mazda as an auto dealership and service center.

Major Subject Property characteristics are summarized as follows:

Subject Property Characteristics Summary Table

Property Characteristics	Observations
Total Subject Property Lot Size	Approximately 1.25 acres
Total Number of Buildings	Five attached buildings
Street Address	1401 S. Brand Boulevard.
County	Los Angeles County
Assessor's Parcel Number (APN)	5640-024-014
Distance to Major Landmark	The Subject Property is located 1 mile east of Interstate 5 and 2 miles south of Highway 134.
Current Use	Auto dealership
Current Owner	Craig P. Williamson

The Subject Property history and inspection observations are further discussed in Sections 5.0 and 6.0, respectively.

3.2 Adjacent Properties

The Subject Property is located within a commercial and residential area of Glendale, Los Angeles County, California (See Figure 1). At the time of the Subject Property inspection, the properties adjacent to the Subject Property were observed as follows (see Figure 2):

North: W. Los Feliz Rd. is located immediately north of the Subject Property. Commercial businesses, including U-Haul, are farther north of the Subject Property. A Subaru auto dealership is located northeast of the Subject property.

East: S. Brand Blvd. is immediately east of the Subject Property. A Chevrolet auto

dealership is farther east of the Subject Property.

South: W. Laurel St. is immediately south of the Subject Property. Commercial businesses, including an American Red Cross and a car dealership are farther south of the Subject Property. An Enterprise Rent-A-Car is located southeast of the Subject Property.

West: An alleyway, parking for the Subject Property, and Glendale Memorial Hospital are located immediately west of the Subject Property. S. Central Ave and an apartment complex are farther west of the Subject Property.

Section 4.0
Environmental Setting

The following summarizes the general environmental setting of the Subject Property.

4.1 Regional Setting

The Subject Property is situated near latitude 34.1281 (north) and longitude 118.2554 (west) at an approximate elevation of 455 feet above mean sea level. The topography of the Subject Property and vicinity is generally flat, but slopes gently to the southwest, as shown in the Burbank/Pasadena/Los Angeles/Hollywood, California USGS Topographic Maps. A topographic high point is located approximately 1,500 feet east of the Subject Property where the Forest Lawn Cemetery is located. A topographic map is provided in the Physical Source Settings Summary section of the EDR Radius Map report. The Subject Property is not located within a 500-year flood zone.

4.2 General Geologic Conditions

The Subject Property is located in Los Angeles County, within the central portion of the Peninsular Ranges geomorphic physiographic province of California. According to the California Department of Conservation, this area is described as follows:

> The Peninsular Ranges is a series of ranges separated by northwest trending valleys, sub-parallel to faults branching from the San Andreas Fault. The trend of topography is similar to the Coast Ranges, but the geology is more like the Sierra Nevada, with granitic rock intruding the older metamorphic rocks. The Peninsular Ranges extend into lower California and are bound on the east by the Colorado Desert. The Los Angeles Basin and the island groups (Santa Catalina, Santa Barbara, and the distinctly terraced San Clemente and San Nicolas islands), together with the surrounding continental shelf (cut by deep submarine fault troughs), are included in this province.

No fault zones are identified within one mile of the Subject Property in the EDR Report Physical Settings Source Summary.

4.3 Groundwater Conditions

The Subject Property is located in Los Angeles County, within the San Fernando Valley Groundwater Basin (4-012). According to the California Department of Water Resources, this area is classified as:

> The San Fernando Valley Groundwater Basin includes the water-bearing sediments beneath the San Fernando Valley, Tujunga Valley, Browns Canyon, and the alluvial areas surrounding the Verdugo Mountains near La Crescenta and Eagle Rock. The basin is bounded on the north and northeast by the San Gabriel Mountains, on the east by the San Rafael Hills, on the south by the Santa Monica Mountains and Chalk Hills, and on the west by the Simi Hills. The valley is drains by the Los Angeles River and its tributaries.

The groundwater in this basin is mainly unconfined with some confinement within the Saugus Formation in the western part of the basin and in the Sylmar and Eagle Rock areas. Holocene age alluvium consists primarily of coarse-grained unsorted gravel and sand deposited by coalescing alluvial fans emanating from the surrounding highlands. The amount of clay in the Holocene deposits increases from about 20 percent in the east to about 70 percent in the west. The maximum thickness of Holocene alluvium ranges from about 100 feet in the north to 400 feet in the east to about 800 feet on the west and a maximum of about 900 feet near Burbank. Pleistocene age alluvium consists dominantly of highly permeable, unconsolidated coarse-grained alluvial fan deposits interspersed with lower permeability paleosols. The Saugus Formation is composed of continental and shallow marine (Sunshine Ranch Member) deposits of conglomerates, sands, silts, and clays, with permeability less than that of the Pleistocene alluvium. The Saugus Formation is 2,000 to 3,000 feet thick in the eastern and western parts of the basin and reaches a maximum thickness of 6,400 feet in the central part of the basin. Groundwater flow in this basin is disturbed by the presence of multiple faults.

Groundwater quality in the San Fernando Valley Groundwater Basin is impaired due to the presence of volatile organic compounds such as trichloroethylene (TCE), perchloroethylene (PCE), petroleum compounds, chloroform, nitrate, sulfate, and heavy metals identified from environmental investigations. TCE, PCE and nitrate contamination occurs in the eastern part of the basin and elevated sulfate concentration occurs in the western part of the basin.

Based on information from groundwater investigation activities conducted at the Mobil gas station at 1324 S. Central Ave., located approximately 550 feet northwest of the Subject Property, the depth to groundwater is approximately 55 to 59 feet below ground surface (bgs). Flow direction is primarily towards the southwest, but has historically been variable to the northwest, southwest, and southeast.

Section 5.0
Government Database Review

5.1 Government Databases Searched

An investigation of the government environmental databases related to the Subject Property and the nearby area was conducted to identify potential RECs that may be recorded in government database systems or files. Properties that have or may have the potential for existing or future Subject Property contamination, environmental liabilities, or the potential for contamination migration to surrounding areas are listed in this report. The information pertaining to the sites on the regulatory databases was obtained from the *EDR Radius Map Report with GeoCheck* (See Appendix D) provided by EDR. The databases searched are detailed in the EDR Radius Map report. The results of the Subject Property and Surrounding Property listings are summarized in Sections 5.2 and 5.3, respectively.

5.2 Subject Property Summary

The Subject Property address was listed in the RCRA-SQG (small quantity generator), FINDS, ECHO, HAZNET, Historic UST, Sweeps UST, AST, Los Angeles County HMS (industrial waste and underground storage tank sites), and WIP (Well Investigation Program) databases in the EDR Report.

- **Star Chrysler Jeep, Star Mazda, Los Feliz Ford DBA Star Chrysler/Jeep, and Star Lincoln Mercury Sales Inc DBA Star Mazda** are listed in several databases in the Radius Report, including:
    - RCRA-SQG database which listed no violations.
    - FINDS database which listed the facility in the RCRA Information System, Hazardous Waste Tracking System, and Enviroview under the hazardous waste program, Spill Prevention, Control, and Countermeasure (SPCC) program, and as a Risk Management Plan (RMP) reporter.
    - ECHO database indicating no violations.
    - HAZNET database for the disposal of organic solids, oil/water separation sludge, aqueous solution with organic residues, oxygenated solvents, unspecified organic liquid mixture, liquids with halogenated organic compounds >1,000 mg/L, oil-containing waste, waste oil and mixed oil, organic liquids with metals, and unspecified solvent mixture between 1993 and 2017.
    - Historic UST database which list one waste oil UST for an auto dealership. The Sweeps UST database lists the site as active.
    - AST database lists the Subject Property but does not provide any additional information.
    - Los Angeles County HMS lists the facility status as “removed.”
    - WIP database lists the Subject Property as a historical site with no other

information provided. Historical WIP listings for surrounding properties are associated with sites which have received a No Further Action from the EPA regarding the San Fernando Valley Superfund sites.

Additional information regarding the Subject Property was requested from local agencies. The results of file reviews are summarized in Section 6.2 of this report.

5.3 Surrounding Properties Summary

Thirty-seven (37) federal, forty-six (46) state, one hundred and sixty-two (162) local or other, eighteen (18) historical, and three (3) orphan listings are provided in the EDR Report's summary of government databases for the radius search listings. Surrounding properties are reviewed in the attached Table 1. Those facilities located within one-eighth mile of the Subject Property are summarized below:

Facility Name	Address	Direction-Distance	EDR ID	Database	Comments
Less Than 1/8 Mile - presumed up-gradient					
Henry S Garage	119 W Los Feliz Rd	NNW - 80 ft	A6	EDR Hist Auto	Automobile repair listed in 1930, 1969, 1970

	1601 S Brand Blvd	S - 454 ft	C31	RCRA-SQG	No RCRA violations reported
				WIP	Historical site
Gateway Apartments	114 W Eulalia St	S - 464 ft	D32	WIP	Historical site
Southern Ca Radiology Med Grp	1500 S Central Ave Ste 116	WSW - 503 ft	E33	RCRA-SQG	No RCRA violations reported
Allen Gwynn Chevrolet's Annex	1600 S Brand Blvd	SSE - 523 ft	G35	WIP	Historical site
Rich Motors Inc	1615 S Brand Blvd	S - 579 ft	D45	EDR Hist Auto	Automobile repair listed 1972-2014
Brand Auto Center			D46	RCRA-SQG	No RCRA violations reported
				WIP	Historical site
				SWEEPS UST	One 500-gallon waste oil UST
Hollingsworth W C	1400 S Central Av	W - 623 ft	H47	EDR Hist Auto	Service station listed 1940
Glendale Memorial Hosp.			H48	WIP	Historical site
Ceaint Foods Dealers Bancquet Laboratories	1416-18 S Central Ave	W - 623 ft	E52	EDR Hist Cleaner	Hat cleaners listed in 1951
Ark	1612 S Brand Blvd	SSE - 633 ft	G53	WIP	Historical site

Additionally, two National Priority List (NPL) Superfund listings are identified cross-gradient in the proximity of the Subject Property. Area 4 of the San Fernando Valley Superfund

groundwater plume, identified as the Pollock Wellfield, is located approximately 985 feet west-southwest of the Subject Property, and Area 2 of the San Fernando Valley Superfund groundwater plume, identified as the Crystal Springs Wellfield, is located approximately 1,058 feet west of the Subject Property. These Superfund listings are included on the final NPL for chlorinated solvent and chromium impacted groundwater due to historical aerospace manufacturing and metal plating. This has been a Certified/Operation and Maintenance site since 1999 under the oversight of the EPA. A PCE plume map from the *Third Five-Year Review Report for San Fernando Valley (Area 2) Superfund Site* report, dated September 21, 2018 (See Appendix E) shows multiple groundwater monitoring wells between the Subject Property and the Superfund groundwater plume with no PCE detections above regulatory levels. Based on the distance from the Superfund site and the categorization of the Subject Property as a historical WIP site with no documentation of further investigation requirements from the EPA, this Superfund site is not expected to present an environmental issue for the Subject Property.

Due to poor or inadequate address information, three (3) sites were not detailed in the EDR Radius Map site listings. Based on the address information provided and additional information determined by on-line sources, none of the orphan sites are located within the specified radius of the Subject Property.

The Subject Property is located in an area that is currently densely developed with car dealerships, gas stations, and other businesses which typically use underground storage tanks. Based on distance, groundwater flow direction, and/or the nature of the listing, further investigation was determined to be warranted to determine the likelihood of each property to negatively affect the Subject Property at (i) car dealerships or properties with former USTs, including 1308, 1313, 1320, and 1400 S. Brand Blvd., and (ii) former gas station at 1325 S. Brand Blvd. Associated agency research is discussed in Section 6.2 below.

Section 6.0
Historical Document Review

To determine whether RECs exist for the Subject Property based on historical activities and/or operations at the Subject Property and/or a neighboring property, Waterstone conducted a review of historical documents, available local agency or departmental records, and available previous investigation reports. The following sections summarize the findings of these document reviews.

6.1 Proprietary Document Review

Waterstone subcontracted the historical document search to EDR. The information searched and documents available are summarized as the following:

- A search of the EDR Historic Map Collection was conducted for the Subject Property. The EDR Historic Map Collection is the largest and most extensive private collection of prior-use maps in the United States, with coverage ranging from 1867 through 1994. Sanborn Fire Insurance Maps from 1908, 1919, 1925, 1950, and 1970 were available for review. The Historical Maps Report is provided as Appendix F.
- Historical aerial photographs of the Subject Property and surrounding area were obtained from EDR. Photographs from 1923, 1928, 1938, 1948, 1952, 1964, 1970, 1977, 1983, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 were provided to and reviewed by Waterstone (See Appendix G). A review of the aerial photographs is provided in the table below.
- Historical Topographic Maps of the Subject Property and surrounding area were obtained from EDR. Maps from 1894, 1896, 1898, 1900, 1902, 1920, 1921, 1928, 1953, 1966, 1972, 1981, 1988, 1994, and 2012 were provided to and reviewed by Waterstone (See Appendix H). A review of the Topographic Maps is provided in the table below.
- City Directories have been published for many cities and towns across the United States since the 18th century. For each address within an area, City Directories list the name of each resident or, if a business operates from that address, the name and type of business. While the geographic coverage of City Directories is comprehensive for most major cities, many rural areas and small towns may not be included, and many towns and cities have discontinued the practice of issuing City Directories (See Appendix I). City Directory coverage was available for the area and is reviewed in the table below.

Historical Sources Summary Table

Date	Observations	Source
1894/ 1896/ 1898/ 1900/ 1902	**Subject Property:** A small structure is depicted at the Subject Property. **Surrounding Properties:** A road is present north and south of the Subject Property. Small structures, likely residences, are present sporadically surrounding the Subject Property. Railroad lines are east and west of the Subject Property. Tropico and the Los Angeles River is depicted west of the Subject Property, with a topographic high beyond the river. A topographic high point is depicted east of the Subject Property. Glendale is north of the Subject Property.	Topographic Map
1908	**Subject Property:** The Subject Property is depicted with four residential dwellings. Historical addresses shown for the Subject Property include 24-27 Tropico Ave., 31-42 S. Brand Blvd., and 55-57 Laurel Ave. **Surrounding Properties:** Tropico Ave. is depicted immediately north of the Subject Property. Residential dwellings are depicted farther north of the Subject Property. Brand Blvd. is depicted immediately east of the Subject Property. Residential dwellings are depicted farther east of the Subject Property. Laurel Ave. is depicted immediately south of the Subject Property. Residential dwellings are depicted farther south of the Subject Property. An alleyway is depicted immediately west of the Subject Property. A large property with a residential dwelling and potentially stables are depicted farther west of the Subject Property.	Sanborn Map
1919	**Subject Property:** The Subject Property is similar to the previous Sanborn Map, but now a library and fire station are additionally depicted in the northeast corner of the Subject Property. Historical addresses shown for the Subject Property include 100-112 W. Los Feliz Rd., 119, 123, 1417, and 1423 S. Brand Blvd., and 101, 121, and 125 Laurel Ave. **Surrounding Properties:** Surrounding properties are similar to the previous Sanborn Map, but Tropico Ave. is now identified as W. Los Feliz Rd. and S. Brand Blvd. had been widened north of the Subject Property.	Sanborn Map
1920-1929	**Subject Property:** The Glendale Public Library is listed at 1401 S. Brand Blvd. Residences are listed on W. Laurel St. **Surrounding Properties:** Surrounding property address listings are primarily residential.	City Directories
1920/ 1921/ 1928	**Subject Property:** The Subject Property appears to be developed with a larger structure in the northeast corner of the property and several smaller structures on the remainder of the property. **Surrounding Properties:** E. Brand Blvd. is immediately east, Los Feliz Boulevard is immediately north, and Laurel Ave. is immediately south of the Subject Property. Dense development of streets with commercial and residential structures surround the Subject Property. The topographic high point east of the Subject Property is identified as Forest Lawn Cemetery.	Topographic Map
1925	**Subject Property:** The Subject Property is similar to the previous Sanborn Map. **Surrounding Properties:** Surrounding properties are similar to the previous Sanborn Map, but with more commercial development replacing residential development. A gas station is north of the Subject Property across the street at 1327 S. Brand Blvd./101 W. Los Feliz Rd. A garage, stores, and residential dwellings are now depicted west of the Subject Property.	Sanborn Map
1923/ 1928	**Subject Property:** The Subject Property appears to be developed with a larger building for the library and fire station in the northeast corner of the property and smaller residential buildings and trees on the remainder of the property. **Surrounding Properties:** Surrounding properties appear to be densely developed with primarily residential properties. W. Los Feliz Rd. is visible immediately north, S. Brand Blvd. is visible immediately east. Laurel Ave. is immediately south, and a property with dwellings and open land is immediately west of the Subject Property. By 1928, a commercial shopping center and residential properties are now visible immediately west of the Subject Property with a gas station and small hospital farther west. A gas station is present north of the Subject Property across Los Feliz Rd. The Forest Lawn Cemetery is visible farther east of the Subject Property.	Aerial Photograph

Historical Sources Summary Table

Date	Observations	Source
1930-1939	**Subject Property:** The Glendale Public Library is listed at 1401 S. Brand Blvd. Suppes RLR (likely residential) is listed at 1417 S. Brand Blvd. A residence is listed at 110 W. Los Feliz Rd. and the Fire Department is listed at 106 W. Los Feliz Rd. Residences are listed on W. Laurel St. **Surrounding Properties:** Surrounding property address listings are primarily residential or commercial. A hospital is listed immediately west of the Subject Property at 211 W. Laurel St. A gas station is listed at 230 W. Los Feliz Rd., located approximately 600 feet west of the Subject Property.	City Directories
1938	**Subject Property:** The Subject Property appears generally similar to the previous aerial photograph. **Surrounding Properties:** Surrounding properties appear generally similar to the previous aerial photograph. The gas station north of the Subject Property across Los Feliz Rd. appears to have expanded.	Aerial Photograph
1940-1949	**Subject Property:** The Public Library is listed at 1401 S. Brand Blvd. in 1940. John Cuthers (likely residential) is listed at 1417 S. Brand Blvd. A residence is listed at 110 W. Los Feliz Rd. and the Fire Department is listed at 106 W. Los Feliz Rd. Residences are listed on W. Laurel St. **Surrounding Properties:** Surrounding property listings are similar to the previous decade. By 1945, the Public Library is listed at 104 W. Laurel St. A service station is listed at 1325 S. Brand Blvd., north of the Subject Property across the street. A service station is listed at 225 W. Los Feliz Rd., west of the Subject Property.	City Directories
1948	**Subject Property:** The Subject Property has been redeveloped with two small buildings and a parking lot for a used car dealership. **Surrounding Properties:** Surrounding properties appear generally similar to the previous aerial photograph. The relocated library and fire station are visible south of the Subject Property across Laurel Ave.	Aerial Photograph
1950-1959	**Subject Property:** R&H Motors and TV (Tommie Vaughn) Motors Used Cars are listed at 1401 S. Brand Blvd. Moore Emmet/White Kirk/Brawley Olen/Hannum Buster Used Cars are listed at 1425 S. Brand Blvd. **Surrounding Properties:** Surrounding property listings are similar to the previous decade, but with significantly more commercial businesses, including multiple car dealerships and auto repair businesses. By 1951, the fire station is listed at 1505 S. Brand Blvd.	City Directories
1950	**Subject Property:** The Subject Property has been redeveloped as a used auto sales business with two small office buildings depicted. **Surrounding Properties:** Surrounding properties are similar to the previous Sanborn Map, but with additional commercial development replacing residential development. The gas station north of the Subject Property in now addressed as 1325 S. Brand Blvd. Auto sales and auto parking businesses are depicted north and east of the Subject Property along S. Brand Blvd. The Glendale Public Library and Fire Station have been relocated south of the Subject Property across the street at 1501/1505 S. Brand Blvd. The garage west of the Subject Property has been converted to furniture storage, and a small hospital has been constructed farther west of the Subject Property.	Sanborn Map
1953	**Subject Property:** The Subject Property is coded as developed but individual structures are no longer depicted on the topographic map. **Surrounding Properties:** The surrounding area looks similar to the previous topographic maps. A hospital is now depicted immediately west of the Subject Property and a fire station is south of the Subject Property across Laurel Avenue.	Topographic Map
1952	**Subject Property:** The Subject Property is similar to the previous aerial photograph. **Surrounding Properties:** Surrounding properties appear generally similar to the previous aerial photograph. Many of the residential properties formerly along S. Brand Blvd. and west of the Subject Property have been replaced with commercial properties.	Aerial Photograph

Historical Sources Summary Table

Date	Observations	Source
1960-1969	**Subject Property:** California Motors Ford/Auto Dealers is listed at 1401 S. Brand Blvd. California Motors Storage listed at 1425 S. Brand Blvd. **Surrounding Properties:** Surrounding property listings are similar to the previous decade.	City Directories
1964	**Subject Property:** Large buildings are now visible in the north and western portion of the Subject Property. The remainder of the property is used for parking cars. **Surrounding Properties:** Surrounding properties are similar to the previous aerial photograph. Immediately west of the Subject Property, the hospital has expanded and former residential and commercial properties have been replaced with parking or new buildings.	Aerial Photograph
1966	**Subject Property:** The Subject Property appears similar to the previous topographic map. **Surrounding Properties:** The area surrounding the Subject Property is similar to the previous topographic map.	Topographic Map
1970-1979	**Subject Property:** Phil Hall Leasing Corp/Oldsmobile & Jaguar/Los Feliz Ford Inc. are listed at 1401 S. Brand Blvd. **Surrounding Properties:** Surrounding property listings are similar to the previous decade. Johns Texaco is listed at 1465 S. Glendale Ave., located approximately 600 feet east of the Subject Property.	City Directories
1970	**Subject Property:** The Subject Property appears similar to its current configuration as an auto sales business with a sales office in the northern portion of the Subject Property and auto repair and service area along west side of the Subject Property. A stock room and office are centrally located on the Subject Property. **Surrounding Properties:** Surrounding properties are similar to the previous Sanborn Map. Auto sales and services businesses are depicted north, east, and south of the Subject Property along S. Brand Blvd. The hospital west of the Subject Property has expanded significantly and the gas station is no longer present.	Sanborn Map
1972	**Subject Property:** The Subject Property appears similar to the previous topographic map. **Surrounding Properties:** The area surrounding the Subject Property is similar to the previous topographic map.	Topographic Map
1970/ 1977	**Subject Property:** The Subject Property appears in its current configuration with the construction of additional buildings along the southwest and central portion of the Subject Property, with parking on the remainder of the property. **Surrounding Properties:** Surrounding properties are similar to the previous aerial photograph. By 1977, the gas station north of the Subject Property is no longer present.	Aerial Photograph
1980-1989	**Subject Property:** The Subject Property address is not listed in the city directory. **Surrounding Properties:** Surrounding property listings are similar to the previous decade. U-Haul is listed at 1313 S. Brand Blvd., located approximately 200 feet north of the Subject Property and a former auto repair and sales business. The fire department and public library is no longer listed south of the Subject Property.	City Directories
1981/ 1988/ 1994	**Subject Property:** The Subject Property appears similar to the previous topographic map. **Surrounding Properties:** Surrounding properties are depicted similarly to the previous topographic map.	Topographic Map
1983/ 1989	**Subject Property:** The Subject Property appears generally similar to the previous aerial photograph. **Surrounding Properties:** Surrounding properties appear generally similar to the previous aerial photograph. By 1989, the hospital immediately west has expanded to include areas formerly used for parking.	Aerial Photograph
1990-1999	**Subject Property:** Chrysler Plymouth Star Chrysler Jeep/Glendale Jeep/Jack Ellis/New & Used Car Sales Service & Parts and Sav-on Drugs Arcadia (likely erroneous listing) are listed at 1401 S. Brand Blvd. **Surrounding Properties:** Surrounding property listings are similar to the previous decade.	City Directories

Historical Sources Summary Table

Date	Observations	Source
1994	**Subject Property:** The Subject Property appears generally similar to the previous aerial photograph. **Surrounding Properties:** Surrounding properties appear generally similar to the previous aerial photograph.	Aerial Photograph
2000-2009	**Subject Property:** Chrysler Plymouth/Glendale Jeep/Star Chrysler and Shirley Boone are listed at 1401 S. Brand Blvd. **Surrounding Properties:** Surrounding property listings are similar to the previous decade.	City Directories
2002/ 2005/ 2009	**Subject Property:** The Subject Property appears generally similar to the previous aerial photograph. **Surrounding Properties:** Surrounding properties appear generally similar to the previous aerial photograph.	Aerial Photograph
2010-Present	**Subject Property:** Chrysler Plymouth/Star Lincoln Mercury/Star Mazda/Los Feliz Ford Inc and Greg Bussjaeger Foundation are listed at 1401 S. Brand Blvd. **Surrounding Properties:** Surrounding property listings are similar to the previous decade.	City Directories
2012	**Subject Property:** The Subject Property appears generally similar to the previous topographic map. **Surrounding Properties:** Surrounding properties are depicted similarly to the previous topographic map.	Topographic Map
2012/ 2016	**Subject Property:** The Subject Property appears generally similar to the previous aerial photograph. **Surrounding Properties:** Surrounding properties appear generally similar to the previous aerial photograph.	Aerial Photograph

6.2 Local Agency Records Review

Based on the listings provided in the EDR report review of government databases, Waterstone submitted requests for file review at local agencies (See Appendix J). The agencies contacted and the results of file reviews are discussed in the following sections.

6.2.1 Local Agencies

Based on the listings provided in the EDR report review of government databases, Waterstone submitted requests for information for the Subject Property at local agencies. According to files made available at state and local agencies, available records used to prepare this Phase I EA are listed below:

Local Agency Records Review

Agency	Subject Property Records	Surrounding Property Records
City of Glendale Building Department	Building permit records for the Subject Property address 1401 S. Brand Blvd. include: -Various permits for alterations and additions to existing buildings, new roof, signs, and tenant alterations between 1948 and 2018 to various owners/tenants including Honest John, R&H Motors, T.V. Motors, Palmer Lincoln Mercury, California Motors, Los Feliz Ford, Phil Hall Olds, Star Chrysler Jeep. -Certificate of Occupancy issued in 1955 for Auto Storage and Service Building, in 1968 and 1970 for Car Dealership, and in 1994 for Star Chrysler-Jeep. -Permit for construction of new buildings in 1955 and 1958, new office space in 1964, and new building identified as a body shop in 1968. -Permit for asbestos roof issued in 1963. -Notice referencing structural damage from a fire and permit for repairs in 1967. -Permit for new sewer connection with industrial waste interceptor in 1968. -Violation cited for the Subject Property in 1987 for waste water observed spilling over sidewalk into gutter. -Permit for installation of 32-ft x 1-ft drain in 1988. Permits for historical addresses 1417, 1423, and 1425 S. Brand Blvd. include a bird aviary present in 1921, demolition of residences in 1927 and 1947, and construction of foundations and a one room office in 1948 to Olen Brawley and Kirk White. Permits for historical addresses on W. Los Feliz Rd. and W. Laurel St. include a fire station at 109 W. Los Feliz Rd. in 1922 and a grease trap at 110 W. Los Feliz Rd. in 1936.	No records requested.
City of Glendale Industrial Waste	Industrial waste permit records from 1970 for the Subject Property address 1401 S. Brand Blvd. include: -Permit W-943 for disposal of automobile parts cleaning and garage floor washing waste to the sewer in the alley following processing through a 3-stage clarifier. Types of wastes listed on the application for permit include solvent, soap and oils, water, dirt. -Permit W-943 for disposal of wet sanding, paint spray booth and garage floor washing to the sewer in Laurel St. following processing through a 3-stage clarifier. Types of wastes listed on the application for permit include solvent, paint residue, water, dirt, soap.	No records requested.

Local Agency Records Review

Agency	Subject Property Records	Surrounding Property Records
City of Glendale Fire Department	The Glendale Fire Department provided records for: -1955/1956 permits for installation, storage, and use of 2,000 gallons of gasoline and 280 gallons of waste oil in underground tanks. -1958 permits for removal of one 2,000-gallon UST and one 280-gallon UST in March, and for installation of one 280-gallon waste oil UST in June. -1964 permit for spot spray painting -1968 permit for removal of 200-gallon storage tank -1968 permits for installation of a 550-gallon waste oil UST and storage and use of drums of lacquer thinner and assorted paints. - 1970 permit for storage and use of 550-gallon waste oil UST. -1976 permit for installation of a spray paint booth. 1977-1985 permits reference spraying and dipping flammable finishes. -1980 permit application references 550-gallon waste oil and parts cleaner disposal UST – less than 60 gallons of parts and tool cleaning solvents. -1985/1986 permit for removal of one 550-gallon waste oil UST, which had been located in the northwest portion of the Subject Property. One page of permit references UST as 240-gallons. -Inspections conducted at the Subject Property between 1968 and 2018. Multiple violations or Notices to Comply issued to tenant for administrative issues, lack of tank certification, inspection logs, and training records, proper equipment maintenance, inadequate secondary containment, and housekeeping issues. -Waste Oil Storage Tank Certification in 2016 for 480-gallon above ground tank stored outside in secondary containment, transferred from the shop via a pump. -Recent hazardous materials inventory lists motor oil, used oil, antifreeze, waste antifreeze, compressed acetylene and oxygen.	No records requested.

Local Agency Records Review

Agency	Subject Property Records	Surrounding Property Records
Los Angeles Regional Water Quality Control Board (RWQCB), Los Angeles, California	The RWQCB indicated that it has records for the Subject Property address; however, those records could not be located at the agency and have been determined to be missing. Based on the categorization of the files and the similar site usage, these documents are expected to be similar to the documents identified for the neighboring properties which had all received No Further Action letters in regards to the San Fernando Valley Superfund.	Records for offsite properties at 1308, 1313, 1320, and 1400 S. Brand Blvd. indicated that these properties, which consist of similar businesses, including car dealerships, were all inspected in 1995 as part of the Well Investigation Program (WIP) and received Notification of No Further Action letters from the RWQCB and EPA indicating they are no longer part of the Superfund process related to San Fernando Valley Superfund Sites based on historical or current operations.
South Coast Air Quality Management District (AQMD) Facility Information Detail (FIND)	No records were available for the Subject Property on the FIND database. A records request identified only an inactive permit for CFC-12 recovery/recycling from 1993.	No records requested.
California Department of Toxic Substances Control (DTSC), Cypress and Chatsworth Offices	The DTSC has no records for the Subject Property address. Star Mazda is listed at the Subject Property address on the CalEPA Regulated Site Portal website. The website lists nine evaluations conducted between 2013 and 2018 for the Hazardous Materials Release Response Plans (HMRRP), Aboveground Petroleum Storage Act (ASPSA), and Hazardous Waste (HW) Generator programs. Seven violations are noted, two of which are open, for violations including failure to prepare and implement a Spill Prevention Control and Countermeasure (SPCC) plan, failure to perform daily inspections, failure to have technical amendments certified by a professional engineer, and general administration/documentation issues. Chemicals used include new and waste ethylene glycol, and new and used paraffinic petroleum distillates. Los Feliz Ford DBA Star Chrysler/Jeep is identified at the Subject Property address in the DTSC Hazardous Waste Tracking System (HWTS) with records of disposal of various organic compounds from 1993 through 2015, including tetrachloroethylene (PCE) between 1996 and 2001. Star Lincoln Mercury Sales Inc DBA Star Mazda is identified at the Subject Property address in the HWTS with records of disposal of organic solids between 2016 and 2018.	No records were provided for offsite properties at 1308, 1313, 1320, 1322, 1325, 1390, 1400, 1500, or 1505 S. Brand Blvd. or at 119 or 120 W. Los Feliz Rd.

If additional information becomes available which affects the findings and conclusions of this report, Waterstone will submit an addendum report.

6.3 Review of Previous Environmental Documents

No previous environmental documents were provided for the Subject Property.

6.4 Potential for Vapor Encroachment

As a part of the Phase I EA investigation, Waterstone reviewed all reasonably ascertainable information for the Subject Property and nearby properties to determine if potential vapor-phase migration concerns may be present which could impact the Subject Property. The information reviewed includes regulatory databases, files for nearby sites, and historical documentation.

The Subject Property has a documented history of installation and removal of various USTs between the 1950s and the 1980s which contained both waste oil and gasoline. The former USTs are all known or suspected to have been located in the western portion of the Subject Property in the vicinity of the auto service area. No reports of sampling conducted during removal of any of the former USTs were identified. Additionally, two 3-stage clarifiers are present on the Subject Property and are both permitted for the disposal of potential wastes including solvent. Additionally, disposal of PCE from the facility is documented between 1996 and 2001. Historical usage of PCE was not known by onsite personnel; however, it is most likely that it may have been used for parts cleaning in the service area. The Subject Property is also located in an area that has been surrounded by auto dealership and repair businesses since the 1950s which have also had a history of USTs usage on their properties.

Based on the former presence of USTs containing waste oil and waste parts cleaner, two 3-stage clarifiers, and historical disposal of PCE at the Subject Property, it is possible that a Vapor Encroachment Condition (VEC) could exist at the Subject Property. The likely location of these historical features and chemical usage was likely conducted only in the western portion of the Subject Property, and not in the area of planned renovations of the auto showroom and offices located in the northeastern portion of the Subject Property.

6.5 Summary of Subject Property and Vicinity History/Land Use

Waterstone reviewed available historical documents, local agency records, and previous environmental assessments to determine the history of the Subject Property. The history of the Subject Property and vicinity is summarized as the following:

- The Subject Property is located within a commercial and residential area of Glendale, Los Angeles County, California. The Subject Property was initially developed with residential properties prior to the 1890s. From the 1910s through the 1940s, the Glendale Public Library and Fire Station were located in the northeast portion of the Subject Property.
- By 1948 the Subject Property was redeveloped as a car dealership. Between 1955 and 1968 the buildings currently present on the Subject Property were constructed, with an auto sales business and sales office in the northern portion of the Subject Property, auto repair and

service along west side of the Subject Property, and a stock room and office centrally located on the Subject Property. The Subject Property is currently leased to Star Mazda as an auto dealership and service center.

- Various USTs have historically been present on the Subject Property, including one 2,000-gallon gasoline UST and one 280-gallon waste oil UST from 1955-1958, one 280-gallon waste oil UST from 1958-1968, and one 550-gallon waste oil UST from 1968-1986. A 1980 permit application references a 550-gallon waste oil and parts cleaner disposal. No reports of sampling during removal of any of the former USTs were identified.
- Two 3-stage clarifiers are present on the Subject Property and were both permitted in 1970 for the disposal of automobile parts cleaning, wet sanding, paint spray booth, and garage floor washing, with potential wastes including solvent, soap and oils, undercoating, and paint residue. A spray paint booth was permitted at the Subject Property in 1976 and references spraying and dipping and use of tool cleaning solvents.
- Hazardous wastes disposed of by tenants of the Subject Property include various organic compounds (including organic solids, oil/water separation sludge, aqueous solution with organic residues, oxygenated solvents, unspecified organic liquid mixture, liquids with halogenated organic compounds >1,000 mg/L, oil-containing waste, waste oil and mixed oil, organic liquids with metals, unspecified solvent mixture, and PCE) from 1993 through 2017. Current hazardous materials used and stored at the Subject Property include new and used motor oil, new and used antifreeze, and compressed acetylene and oxygen gas.
- Documentation of inspections conducted at the Subject Property by the Fire Department were available from 1968 through 2018 and note multiple violations or Notices to Comply for various matters including administrative issues, lack of tank certifications, inspection logs, and training records, proper equipment maintenance, inadequate secondary containment, and housekeeping issues.

The history of surrounding properties is summarized as the following:

- The surrounding area was primarily developed with residential properties by the 1890s. By the 1950s, many of the formerly residential properties along S. Brand Blvd. and west of the Subject Property started to be replaced with commercial properties, including many car dealerships and auto repair businesses which historically had USTs.
- Two Superfund sites, identified as Areas 2 and 4 of the San Fernando Valley Superfund, are located approximately 1,000 feet west of the Subject Property. These Superfund listings are included on the final NPL for chlorinated solvent and chromium impacted groundwater due to historical aerospace manufacturing and metal plating. This has been a Certified/Operation and Maintenance site since 1999 under the oversight of the EPA. A PCE plume map from the *Third Five-Year Review Report for San Fernando Valley (Area 2) Superfund Site* report, dated September 21, 2018 (see Appendix E) shows multiple groundwater monitoring wells between the Subject Property and the Superfund groundwater plume with no PCE detections above regulatory levels.

  Records from the RWQCB indicate that multiple neighboring properties with similar site

usage to the Subject Property were inspected in 1995 as part of the Well Investigation Program (WIP) and received Notification of No Further Action letters from the RWQCB and EPA indicating they are no longer part of the Superfund process related to San Fernando Valley Superfund Sites based on historical or current operations. The Subject Property is listed as a historical WIP site similar to these neighboring properties, indicating that it was also inspected by the EPA. The RWQCB identified that is has records for the Subject Property address; however, those records could not be located at the agency and have been determined to be missing. Based on the categorization of the files, these documents are expected to be similar to the documents identified for the neighboring properties with similar property usage which had all received No Further Action letters in regards to the San Fernando Valley Superfund.

Based on the distance from the Superfund site and the categorization of the Subject Property as a historical WIP site with no documentation of further investigation requirements from the EPA, this Superfund site is not expected to present an environmental issue for the Subject Property.

Section 7.0
Subject Property Inspection Observations

7.1 Personnel Interviews

During the site inspection, Waterstone interviewed the business owner of the Subject Property, Mr. Steve Bussjaeger. Mr. Bussjaeger's answers are included throughout Section 7.0 of this report.

7.2 Subject Property Inspection Observations

On April 16, 2019, Waterstone performed an inspection of the Subject Property and vicinity. Subject Property photographs are included as Appendix K. During the inspection the following was observed at the Subject Property:

Subject Property Feature Summary Table

Feature / Characteristic	Y/N	Comments
Underground Storage Tanks (USTs)	Y	None observed. A concrete patch was visible in the northwestern corner of the Subject Property where a former UST was removed, which correlates with permits indicating that a 550-gallon waste oil UST was removed from this area in 1986. According to Mr. Bussjaeger, this tank may have historically contained gasoline. No indication of the other former gasoline or waste oil tanks permitted at the Subject Property were identified, and Mr. Bussjaeger had no knowledge of other historical tanks. According to permit documents, at least two of the former USTs were located in the west-central portion of the Subject Property where a building is now present, so no indication of the former location was visible.
Aboveground Storage Tanks (ASTs)	Y	Multiple ASTs storing new and used motor oil, coolant, and automatic transmission fluid were observed throughout the service area along the western side of the Subject Property, including along the western wall, in southeast corner, and outside the southeast wall of the service area building.
Hazardous Chemicals (including petroleum and pesticides)	Y	Two self-contained, drum-mounted CleanTech parts washers which use an aqueous degreaser were observed in the northwest and central areas of the service building. During the site inspection, many various sized containers of oils, lubricants, detergents were observed throughout the service area building both inside cabinets and on various surfaces. Poor housekeeping and management of chemicals was noted throughout the service area. Batteries are stored in the parts storage area adjacent to the service area, with used batteries stored in secondary containment.
Other or Unidentified Drums and Containers	Y	Miscellaneous unlabeled drums ranging from 5 to 55-gallons were observed throughout the service area for the temporary storage of waste oil and other fluids associated with auto repair services.
Septic Tanks	N	None observed.
Drainage Systems	Y	A containment trench drain was observed at the south end of the service area adjacent to the clarifier.
Sumps	N	None observed.
Clarifiers	Y	Two 3-stage clarifiers were observed in the service area along the

Subject Property Feature Summary Table

Feature / Characteristic	Y/N	Comments
		western side of the Subject Property. One clarifier is located at the south end of the building; this clarifier is currently used for collecting runoff from car washing activities and may have historically collected runoff associated with paint booth operations. A second clarifier is centrally located in the service area in an area where oil changes are conducted but has not actively been used for several years.
Hoists or Lifts	Y	Two in-ground hoists are present in the northern portion of the service area. Concrete patches were observed throughout the service area where previously in-ground hoists had previously been removed and replaced with aboveground hoists. At least 12 locations appear to be the likely location of former hoists, but the exact number was unclear due to the presence of cars and equipment present throughout the area and other concrete patches of unknown origin. Mr. Bussjaeger was not aware of the exact number of hoists that had been replaced. Newer aboveground hoists were installed throughout the service area.
Dumping or Filling Activities	N	None observed.
Vapor Intrusion	N	None observed.
Floor Drains	N	None observed.
Materials Spills	N	None observed.
Monitor/Supply/ Disposal Wells	N	None observed.
Odors	N	None observed.
Air Emissions	N	None observed.
Unusually Stained Pavement or Flooring	N	Staining was observed on the floor around car repair and oil storage areas throughout the service area, but the concrete appeared to be in relatively good condition.
Pits, Ponds, Lagoons	N	None observed.
Pools Of Liquid	N	None observed.
Roads And Trails With No Apparent Purpose	N	None observed.
Stained Or Disturbed Soil	N	None observed.
Stressed Vegetation	N	None observed.
High Voltage Power Lines/ Magnetic Fields	N	None observed.
Waste Water Generation	Y	Wastewater from the Subject Property enters a 3-stage clarifier prior to disposal to sewer.
Solid Waste Storage	Y	Trash bins for municipal waste were observed adjacent to the service area.
Electrical Transformers	Y	Pole-mounted transformers were observed in the alleyway on the west side of the Subject Property.
Evidence of Historical Features	Y	A concrete patch was visible in the northwestern corner of the Subject Property where a former UST was historically removed. The location of the other former USTs associated with the Subject Property were not identified. Concrete patches were observed throughout the service building.

Subject Property Feature Summary Table

Feature / Characteristic	Y/N	Comments
Evidence of Historical Processes or Material Usage/Storage	Y	A self-contained EMC parts washer which is no longer in use was observed in the southeast portion of the service area building. The business owner was not aware of the degreasing solvent historically used in this unit. No evidence of the former spray booth was observed in the service area building, but it is suspected to have been located in the southern portion of the service area building based on the clarifier permit reference to paint residue as a potential waste in this portion of the building.

7.2.1 Historical Materials of Concern

Polychlorinated Biphenyls (PCBs)

Polychlorinated Biphenyls (PCBs) were used as coolants and insulators in electrical transformers beginning in 1929. Exposure to PCBs has since been found to cause liver ailments, skin lesions, tumors, and growth and reproductive problems. Use of PCBs was regulated in 1977. No records or evidence were identified indicating the presence of PCBs on the Subject Property. Pole-mounted transformers were observed in the alleyway on the west side of the Subject Property during the site inspection. The transformers appeared to be in good condition and did not have any signage indicating the presence of PCBs.

Suspect Asbestos-Containing Materials

While the use of asbestos in the manufacture of most building materials has not been fully prohibited by federal law, the use of asbestos, for the most part, has voluntarily been discontinued since the late 1970s. Some non-friable materials, such as roofing material and floor coverings (floor tile and mastic) may have been manufactured with asbestos materials and may have been used into the early 1980s.

The Subject Property buildings were constructed in the 1950s and 1960s; therefore, it is likely that asbestos-containing building materials are present. Additionally, a permit for the addition of an asbestos roof was issued for the Subject Property in 1963.

Lead-based Paint

Lead was a major ingredient in paint pigment prior to and through the 1940s. While other pigments were used in the 1950s, the use of lead in paint continued until the mid-1970s. In 1978, the Consumer Products Safety Commission banned paint and other surface coating materials, which are lead-containing.

The Subject Property buildings were constructed in the 1950s and 1960s; therefore, it is likely that lead-based paint was used during construction and/or maintenance.

Lead in Drinking Water

The USEPA sets drinking water standards and has determined that lead is a health concern at certain exposure levels. Materials that contain lead have frequently been used in the construction of water supply distribution systems, and plumbing systems in private home and other buildings. The most commonly found materials include service lines, pipes, brass and bronze fixtures, and solders and fluxes. Lead in these materials can contaminate drinking water as a result of the corrosion that takes place when water comes into contact with those materials.

EPA's national primary drinking water regulations requires all public water systems to optimize corrosion control to minimize lead contamination results from the corrosion of plumbing materials. EPA has established an action level of 15 parts per billion (ppb) for lead in drinking water. Any water system that continues to exceed the action level after installation of corrosion control and/or source water treatment must eventually replace all lead service lines contributing in excess of 15 ppb of lead to drinking water. Any water system that exceeds the action level must also undertake a public education program to inform users of ways they can reduce their exposure to potentially high levels of lead in drinking water.

According to Glendale Water and Power, the water provided to their customers meets the Federal and state primary and secondary drinking water standards.

7.2.2 Utilities

According to the User, the following utilities service the area:

- Water – Glendale Water and Power
- Gas – Southern California Gas
- Electric – Glendale Water and Power
- Sewer – Glendale Water and Power

7.2.3 Oil and Gas Wells and Pipelines

Wells can act as potential conduits for the migration of contamination, unless they have been properly abandoned (i.e., filled and plugged) in such a manner as to prevent the transport of hazardous material into the groundwater aquifers. No wells were observed during the site inspection. No current or abandoned oil wells were identified on the Division of Oil, Gas, and Geothermal Resources (DOGGR) Well Finder website. According to the EDR Report, no oil/gas wells are located within one mile of the Subject Property.

7.2.4 Public Water Wells

No public water wells were observed on the Subject Property during the Subject Property inspection. According to the EDR Report, one federal USGS well and two state database wells are located within one mile of the Subject Property.

7.2.5 Sensitive Environmental Receptors

Primary concerns associated with sensitive receptors and wetlands are:

- Federal and state environmental regulations often limit an owner's ability to modify the Property when sensitive receptors or wetlands are potentially impacted; and
- The potential of a release or discharge from a facility impacting a sensitive receptor or wetland.

Sensitive environmental receptors, such as wetlands, historical landmarks, or endangered species were not identified at or within the Subject Property or in the EDR Report.

7.2.6 Radon

Radon is a gas that can seep into structures constructed in areas with soils containing uranium. Radon travels through soil and enters the structure through cracks and holes in basement walls or floor drains, or other openings. Based on the location of the Subject Property and according to information provided by the USEPA, radon levels in Los Angeles County, California are below the USEPA action level of 4.0 picocuries per liter (Zone 2).

7.2.7 Mold

Mold and/or fungi growth generally occurs on cellulose-based material, such as wood or drywall paper, that has been inundated with excess moisture. The presence of mold and/or fungi growth is normally an indication of a plumbing, roofing, other leak, and/or water source that results in the abnormal presence of moisture. It is possible that significant fungal spore growth inside walls, insulation, attic spaces, or other areas can exist and not be visible on the finished surfaces of a building's interior spaces. Waterstone did not perform: (i) a mold/fungi inspection, (ii) any building material surface mold sampling, or (iii) air sampling for mold spores at the Subject Property as such sampling is beyond the scope of this Phase I.

7.2.8 Engineering Controls

No engineering controls were observed on the Subject Property.

7.3 Neighboring Property Inspection Observations

Visual observations of adjoining properties were made from the vantage point of the Subject Property as well as from public rights-of-way to determine the potential impact of these sites on the Subject Property. The following table summarizes neighboring property observations and neighboring properties listed in the EDR Radius Report:

Neighboring Property Summary Table

Property Characteristics	Observations
Surrounding Property General Description	The Subject Property is located in a mixed commercial and residential area of Glendale, California.

Neighboring Property Summary Table

Property Characteristics	Observations
Neighboring Properties Listed in EDR Radius Report	No adjacent properties were listed in the EDR Radius Report. Nearby properties listed in the EDR Radius report are summarized in Section 5.3.
Groundwater Monitoring Wells	No evidence of groundwater monitoring wells was observed in the vicinity of the Subject Property but Waterstone did not enter adjacent properties to perform a thorough inspection.
Underground Features	No evidence of underground features was observed in the vicinity of the Subject Property but Waterstone did not enter adjacent properties to perform a thorough inspection
Evidence of Subsurface Investigation	No evidence of subsurface investigations was observed in the vicinity of the Subject Property but Waterstone did not enter adjacent properties to perform a thorough inspection.

Section 8.0
Summary and Conclusions

8.1 Summary

The Subject Property is located at 1401 S. Brand Blvd. in the City of Glendale, California. The Subject Property is occupied by five attached buildings on an approximately 1.25-acre auto dealership with an auto service/repair area and is currently leased to Star Mazda.

Based on available historical documents, local agency records, and previous environmental assessments, the history of the Subject Property is summarized as follows:

- The Subject Property is located within a commercial and residential area of Glendale, Los Angeles County, California. The Subject Property was initially developed with residential properties prior to the 1890s. From the 1910s through the 1940s, the Glendale Public Library and Fire Station were located in the northeast portion of the Subject Property.
- By 1948 the Subject Property was redeveloped as a car dealership. Between 1955 and 1968 the buildings currently present on the Subject Property were constructed, with an auto sales business and sales office in the northern portion of the Subject Property, auto repair and service along west side of the Subject Property, and a stock room and office centrally located on the Subject Property.
- Various USTs have historically been present on the Subject Property, including one 2,000-gallon gasoline UST and one 280-gallon waste oil UST from 1956-1958, one 280-gallon waste oil UST from 1958-1968, and one 550-gallon waste oil UST from 1968-1986. A 1980 permit application references a 550-gallon waste oil and waste parts cleaner disposal. A concrete patch was visible in the northwestern corner of the Subject Property where a former UST was removed, which correlates with permits indicating that a 550-gallon waste oil UST was removed from this area in 1986. According to the business owner, this tank may have historically contained gasoline. No reports of sampling during removal of any of the former USTs were identified.
- Two 3-stage clarifiers are present on the Subject Property and were both permitted in 1970 for the disposal of automobile parts cleaning, wet sanding, paint spray booth, and garage floor washing, with potential wastes including solvent, soap and oils, undercoating, and paint residue, and were last inspected in 1994. The clarifier located at the south end of the building is currently used for collecting runoff from car washing activities and may have historically collected runoff associated with paint booth operations. The tenant has the clarifier contents emptied for disposal by an outside company. A second clarifier is centrally located in the service area in an area where oil changes are conducted but has not actively been used for several years.
- A spray paint booth was permitted at the Subject Property in 1976 and references spraying and dipping and use of tool cleaning solvents. The spray booth is no longer present but was likely located in the southern portion of the service building.

- Multiple ASTs storing new and used motor oil, coolant, and automatic transmission fluid were observed throughout the service area along the western side of the Subject Property, including along the western wall, in southeast corner, and outside the southeast wall of the service area building. Miscellaneous unlabeled drums of various sizes were observed throughout the service area for the temporary storage of waste oil and other fluids associated with auto repair services.
- Two self-contained, drum-mounted CleanTech parts washers which use an aqueous degreaser were observed in the northwest and central areas of the service building. A self-contained EMC parts washer which is no longer in use was observed in the southeast portion of the service area building. The business owner was not aware of the degreasing solvent historically used in this unit.
- Two in-ground hoists are present in the northern portion of the service area. Concrete patches were observed throughout the service area where in-ground hoists had previously been removed and replaced with aboveground hoists. At least 12 locations appear to be the likely location of former hoists, but the exact number was unclear due to the presence of vehicles and equipment present throughout the area and other concrete patches of unknown origin.
- Hazardous wastes disposed of by tenants of the Subject Property between 1993 and 2017 include various organic compounds (including organic solids, oil/water separation sludge, aqueous solution with organic residues, oxygenated solvents, unspecified organic liquid mixture, liquids with halogenated organic compounds >1,000 mg/L, oil-containing waste, waste oil and mixed oil, organic liquids with metals, unspecified solvent mixture, and PCE. Current hazardous materials used and stored at the Subject Property include new and used motor oil, new and used antifreeze, and compressed acetylene and oxygen gas. During the site inspection, many various sized containers of oils, lubricants, detergents were observed throughout the service area building both inside cabinets and on various surfaces. Poor housekeeping and management of chemicals was noted throughout the service area.
- Documentation of inspections conducted at the Subject Property by the Fire Department were available from 1968 through 2018 and note multiple violations or Notices to Comply for various matters including administrative issues, lack of tank certifications, inspection logs, and training records, proper equipment maintenance, inadequate secondary containment, and housekeeping issues.
- The Subject Property buildings were constructed in the 1950s and 1960s; therefore, it is likely that asbestos-containing building materials and lead-based paint could be present. Additionally, a permit for the addition of an asbestos roof was issued for the Subject Property in 1963.
- The Subject Property address was listed in the RCRA-SQG (small quantity generator), FINDS, ECHO, HAZNET, Historic UST, Sweeps UST, AST, Los Angeles County HMS (industrial waste and underground storage tank sites), and WIP (Well Investigation Program) databases in the EDR Report.

The Subject Property is located within a commercial and residential area of Glendale, Los Angeles County, California (See Figure 1). At the time of the Subject Property inspection, the properties adjacent to the Subject Property were observed as follows (see Figure 2):

North: W. Los Feliz Rd. is located immediately north of the Subject Property. Commercial businesses, including U-Haul, are farther north of the Subject Property. A Subaru auto dealership is located northeast of the Subject property. A gasoline station was formerly located north of the Subject Property across W. Los Feliz Rd.

East: S. Brand Blvd. is immediately east of the Subject Property. A Chevrolet auto dealership is farther east of the Subject Property.

South: W. Laurel St. is immediately south of the Subject Property. Commercial businesses, including an American Red Cross and a car dealership are farther south of the Subject Property. An Enterprise Rent-A-Car is located southeast of the Subject Property.

West: An alleyway, parking for the Subject Property, and Glendale Memorial Hospital are located immediately west of the Subject Property. S. Central Ave and an apartment complex are farther west of the Subject Property.

The history of surrounding properties is summarized as the following:

- The surrounding area was primarily developed with residential properties by the 1890s. By the 1950s, many of the formerly residential properties along S. Brand Blvd. and west of the Subject Property started to be replaced with commercial properties, including many car dealerships, gas stations, and auto repair businesses which historically had USTs.
- Two Superfund sites, identified as Areas 2 and 4 of the San Fernando Valley Superfund, are located approximately 1,000 feet west of the Subject Property. These Superfund listings are included on the final NPL for chlorinated solvent and chromium impacted groundwater due to historical aerospace manufacturing and metal plating. This has been a Certified/Operation and Maintenance site since 1999 under the oversight of the EPA. A PCE plume map from the *Third Five-Year Review Report for San Fernando Valley (Area 2) Superfund Site* report, dated September 21, 2018 (see Appendix E) shows multiple groundwater monitoring wells between the Subject Property and the Superfund groundwater plume with no PCE detections above regulatory levels.

  Records from the RWQCB indicate that multiple neighboring properties with similar site usage to the Subject Property were inspected in 1995 as part of the Well Investigation Program (WIP) and received Notification of No Further Action letters from the RWQCB and EPA indicating they are no longer part of the Superfund process related to San Fernando Valley Superfund Sites based on historical or current operations. The Subject Property is listed as a historical WIP site similar to these neighboring properties, indicating that it was also inspected by the EPA. The RWQCB identified that it has records for the Subject Property address; however, those records could not be located at the agency and have been determined to be missing. Based on the categorization of the files, these documents are expected to be similar to the documents identified for the neighboring properties with similar property usage which had all received No Further

Action letters in regards to the San Fernando Valley Superfund.

Based on the distance from the Superfund site and the categorization of the Subject Property as a historical WIP site with no documentation of further investigation requirements from the EPA, this Superfund site is not expected to present an environmental issue for the Subject Property.

8.2 Findings and Conclusions

Waterstone has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527-13 of the Subject Property. Potential on- and off-Subject Property issues identified during this investigation are summarized as the following:

8.2.1 Potential Subject Property Issues

Recognized Environmental Conditions (RECs) **were** identified for the Subject Property include the following:

- Various USTs have historically been present on the Subject Property, including one 280-gallon waste oil UST from 1958-1968 and one 550-gallon waste oil UST from 1968-1986 which also contained waste parts cleaner solution. Permits indicate that the USTs have been removed, but no reports of sampling during removal of the former USTs was identified. Due to the length of time these USTs were present at the Subject Property and noted disposal of waste parts cleaner in the 550-gallon UST, there is potential for a historical release to the subsurface. Additionally, one 2,000-gallon gasoline UST and one 280-gallon waste oil UST were present from 1956-1958; however, these are not considered RECs due to their short tenure on the property.
- Two 3-stage clarifiers are present in the service area in the western portion of the Subject Property which are permitted for the disposal of potential wastes including solvents. Clarifiers have the potential to leak into the subsurface.
- Based on the historical presence of USTs, two 3-stage clarifiers which are still in use, and historical use of PCE at the Subject Property (between 1996 and 2001), it is possible that a Vapor Encroachment Condition (VEC) may exist at the Subject Property. The location of PCE usage was likely conducted only in the western portion of the Subject Property in the service area, and not in the area of planned renovations of the auto showroom and offices located in the northeastern portion of the Subject Property. However, due to the proximity of the service area activities adjacent to the offices, there is the possibility that a VEC exists in the area of the proposed building renovations.
- Two existing in-ground hoists and multiple historical in-ground hoists are known to have been present in the service area in the western portion of the Subject Property. Hoists have the potential to leak into the subsurface and hydraulic oils have the potential to contain polychlorinated biphenyls (PCBs).

In addition, the following are not specifically called out as RECs but should be noted:

- A historical spray booth associated with former autobody work is known to have been present in the service area in the western portion of the Subject Property.
- Based on the construction date of the Subject Property buildings, it is likely that asbestos-containing building materials and lead-based paint could be present. Additionally, a permit for the addition of an asbestos roof was issued for the Subject Property in 1963.

8.2.2 Potential Off-Site Property Issues

Recognized Environmental Conditions (RECs) **were not** identified in connection with off-Subject Property properties. However, the following should be noted:

- The Subject Property is located approximately 1,000 feet east of the San Fernando Valley Superfund site. Based on the distance from the Superfund site and the categorization of the Subject Property as a historical WIP site with no documentation of further investigation requirements from the EPA, this Superfund site is not expected to present an environmental issue for the Subject Property.

8.3 Recommendations

Based on the foregoing, it is recommended that a soil vapor survey be conducted prior to the construction of the new auto showroom and offices in the northeast corner of the Subject Property. If elevated soil vapor concentrations are present beneath the proposed construction area, a vapor barrier may be needed for mitigation of vapor intrusion for the new buildings.

Additionally, due to the age of the building, a survey for asbestos-containing building materials and lead based paint should be conducted prior to redevelopment of the Subject Property showroom.

While there is no requirement at this time to address the potential for releases from historic features or features remaining in use which were identified in the service area of the Subject Property, including multiple historic USTs, two 3-stage clarifiers, two existing in-ground hoists and multiple historical in-ground hoists; soil and/or soil vapor sampling is recommended if and when there is a change in the use of the property.

Environmental Professional Resume

Nancy A. Beresky, P.G., C.E.M.

Managing Principal Hydrogeologist

Waterstone Environmental, Inc.

Ms. Nancy Beresky is licensed in the State of California as a Professional Geologist and in the State of Nevada as a Certified Environmental Manager and has been actively engaged in the practice of geology and hydrogeology for 39 years. In the past 29 years as a hydrogeologist in the environmental field, Ms. Beresky's expert services have been sought by her clients based on her innovative use of science to address environmental issues leading to regulatory agency closure. Ms. Beresky has performed many of her environmental investigations and closures for real estate transactions or litigated matters with accelerated timelines demanded by escrow, re-development schedules, and/or court-mandated deadlines.

Since 1978, as fossil fuels geologist and environmental hydrogeologist, Ms. Beresky has performed data evaluation and summary, and has prepared recommendations for necessary work including the calculation of associated costs and timelines. Using her special and long-term expertise in the comprehensive evaluation of geologic and chemical data, Ms. Beresky's specialty area is to provide multiple lines of strong, scientifically-supported rationale to cost-effectively address or remediate environmental issues, procure agency closure for her clients, and reduce future liability to the property owner, tenant, or buyer.

Ms. Beresky is responsible for reviewing site data, designing site assessment and remediation plans, preparing work scopes, calculating associated costs, and managing this work with budgets ranging from the low thousands to multi-millions of dollars. These projects include the site assessment, remediation and site closure of properties with soil, soil vapor, and groundwater impacted by chemical compounds associated with a variety of brownfields sites including oil fields, industrial manufacturing sites, landfills, and commercial properties including those with underground storage tanks, dry cleaning operations, and a variety of other uses where chemicals are a current or past part of onsite operations.

Ms. Beresky is an experienced expert witness with both deposition and jury trial testimony experience. She has been retained by numerous law firms to provide technical support for mediations, settlement conferences, and/or trials on sites with existing environmental impact where disputes exist regarding responsibility, cost, or other legal concerns. She is experienced in preparation of declarations and expert reports and has worked with other experts to prepare them for mediation and/or trial testimony.

Ms. Beresky has experience in closing sites that are overseen through local, state, or federal agencies and programs and has successfully performed investigation, remediation and site closure work in compliance with National Contingency Plan and Polanco Act requirements for cost recovery.

Education

- B.S., Geology, University of Illinois, Urbana, IL, 1977
- Graduate Coursework in Geology, University of Illinois, Urbana, IL, 1978-1980

Specialized Training and Certifications

- Professional Geologist, State of California #7965
- Certified Environmental Manager, State of Nevada #1908
- American Institute of Professional Geologists, Certified Professional Geologist #6653
- OSHA 40-HR and 8-hr HAZWOPER Training, 1990 and annual refresher

Technical and Professional Capabilities

- Phase II and Facility Investigation
- Soil and Groundwater Remediation
- Vapor Intrusion Mitigation
- Expert Witness Testimony
- Litigation Support
- Risk-Based Agency Closures
- Brownfield Cleanup and Closure
- Calculation of Remediation Costs
- Regulatory Agency Closure Negotiation
- RCRA Closure Plans
- Phase I Environmental Assessments
- Property Evaluations for Due Diligence
- Accelerated Phase II Site Investigation
- Underground Storage Tank and Clarifier Removals
- Site Decommissioning
- Free Product Recovery
- Remedial Action, Corrective Action, and Removal Action Workplans
- Groundwater Monitoring Reports

Key Projects and Experience

Litigation Support and Expert Witness

- Ms. Beresky was retained as the litigation support hydrogeologist for a lawsuit brought by the USA against an aerospace company that caused a 2-mile long plume of TCE that contaminated residential drinking water and threatens a major US waterway. Ms. Beresky was responsible for the evaluation of groundwater flow direction at different historical times within complex subsurface geological conditions, as well as evaluating plume movement and geometry at different times during the 28-year timeframe since TCE plume discovery.

- Ms. Beresky was retained by counsel to evaluate a newly acquired property. Ms. Beresky prepared an Environmental Summary Report providing an analysis of all available historical data, the results of a site inspection, and the data from prior environmental assessments in a summary that evaluated potential source areas and the environmental investigation performed in each potential source area. This evaluation led to the identification of numerous source areas including vapor degreasers that used PCE from 1950 to the 1980's. Providing counsel with the requisite information in a report, the prior owner was compelled to take responsibility for contamination left in place more than 20 years ago and is currently cleaning up the site.

- At the request of counsel, Ms. Beresky was retained to evaluate a dry cleaner facility within a Superfund Area and communicate with EPA regarding recent EPA sampling results indicating PCE impact in the area and in indoor air. Ms. Beresky designed a plan for mitigation that included a change in the heating and air conditioning system that allowed for continued tenant use of the space until remediation is performed. Ms. Beresky's plan was implemented with the concurrence of EPA.

- Ms. Beresky was retained as the expert witness in a case where a new owner plaintiff brought suit against the former owner (defendant) for delaying remediation of their purchased site for over 10 years. Ms. Beresky was tasked with summarizing all data, critiquing the remediation performed to date, and providing an expert report that indicated the responsible party was unnecessarily extending the process. Ms. Beresky testified on the new owner's behalf during a hearing.

- Ms. Beresky provided expert witness deposition and jury trial testimony for a confidential property owner/developer. Ms. Beresky's responsibilities included managing a team of Waterstone professionals in the assessment and definition of soil and groundwater contamination at a 600-acre commercial/light industrial park by releases of jet fuel, leaded gasoline, unleaded gasoline, and various refinery intermediates. Possible sources included two pipeline corridors running through the property and an adjacent oil refinery. The study of the property revealed six groundwater plumes which were commingled in various locations on the property with various chemicals. Ms. Beresky was responsible for reviewing existing site characterization data produced by a variety of consultants for various industrial park tenants, integrating all site characterization data into a single database, developing and implementing an expedited sampling program which allowed for determination of the extent of contamination and an allocation to the responsible parties. In addition, Ms. Beresky was responsible for preparing and defending in court a model of the hydrogeology of the area and the potential transport pathways that contamination followed to create groundwater plumes. Based on the testimony of an expert team that included Ms. Beresky's testimony, the defendant, in a two-month jury trial, was found to be responsible for contamination on the plaintiff's site.

- Ms. Beresky was retained to provide expert witness services for a private property owner in a lawsuit involving damages from the past use of underground storage tanks on the property. Ms. Beresky was responsible for the characterization of the site, the evaluation of potential impact from the tanks during the previous 10-year timeframe, and the interpretation of data and calculation of potential damages.

- Ms. Beresky was retained as an expert and testified in a jury trial regarding the potential yield of an aquifer desired to be used for agricultural irrigation that was heavily impacted by historical neighboring industrial use. Ms. Beresky explained hydrogeological principles to the jury and testified that the aquifer had sufficient yield to provide irrigation for crops.

Remediation and Site Closure under the California Regional Water Quality Control Board

- Ms. Beresky prepared a Site Conceptual Model for the RWQCB and EPA demonstrating that PCE issues on the west side of a planned residential development originated from offsite as previously concluded by a groundwater study from 10 years prior. EPA and RWQCB concurred with the conclusions and wrote a groundwater closure letter indicating that the property developer had no further responsibilities for chlorinated solvents on the property that were determined to originate from an offsite Superfund site over a mile upgradient.

- Ms. Beresky successfully worked with the RWQCB to remediate a property contaminated with diesel fuel and performed expedited cleanup of free phase product to the extent that it allowed the property to be sold to a developer. She provided plans to RWQCB to remediate the remaining thin layer of diesel during excavation of site required by the underground parking structure installation. The plan was approved and the site is now redeveloped.

- Ms. Beresky designed a sampling plan to characterize lateral and vertical extent of chemically-affected soil, vapor, and groundwater for a former paint factory. Ms. Beresky's sampling plan defined subsurface impact from over 60 aboveground and 12 underground tanks and hundreds of linear feet of underground product piping. Prior to site characterization, she conducted a meeting with the executive officer of the Los Angeles Region of the Regional Water Quality Control Board to set-up a six month deadline for receipt of a closure letter. All work performed onsite was completed with verbal approval of the RWQCB during several interim meetings. Responsible for the complete

site characterization, remediation, risk assessment, and negotiation for final steps to closure within six months. This met a deadline mandated by the client for listing the property for sale.

- Designed Phase II sampling to evaluate potential environmental issues identified during the Phase I assessment of a 144- property portfolio. Sixteen of the 144 sites were required to be evaluated through subsurface soil and/or groundwater sampling. Designed a sampling plan for all sites which were former paint stores with underground storage tanks. Field work indicated impact at seven of the sites. Performed requisite sampling and negotiated closure with North Coast and Los Angeles Regional Water Quality Control Board (RWQCB), Arizona Department of Environmental Quality, and several city and county Fire Departments for closure of all sites on an accelerated schedule to facilitate the group liquidation of the 144 property portfolio.

Remediation and Site Closure under Local Certified Unified Program Agencies (CUPAs)

- Project Manager for a client who purchased a strip mall with an active dry cleaner. Performed soil sampling and vapor sampling indicating that the tenant should be removed to prevent health issues. Performed extensive Phase II sampling to evaluate a large soil vapor plume and also performed soil remediation to reduce contaminant mass. Worked with counsel to prepare documents indicating costs associated with environmental damages in a suit brought against the former dry cleaner by the new owner. Design vapor extraction system to install beneath building during redevelopment into a large cafeteria/lounge area supporting a nearby school.

- Project Manager and Principal-In-Charge of the feasibility study, site characterization, risk assessment, remedial action planning, and remediation of a 54-acre oil field property for a southern California city and other parties including the oil production company and the home builder. Responsible for estimating remediation costs and schedule, designing, costing, and performing soil, soil vapor, and groundwater assessment activities and preparation of a Remedial Action Plan. Ms. Beresky then supervised and participated in field work over 70 days in the field to remediate by excavation over 60 areas of impacted soil by crude oil and lead from the use of shredded automotive battery casings as concrete base (a common practice in the 1960's and 70's), Some of the excavations were as large as 140 feet by 140 feet and 30 feet in depth. Over 76,000 tons (2500 trucks) of hydrocarbon-impacted soil was removed from the site. Using laboratory analysis results for over 2000 confirmation samples, Ms. Beresky prepared the databases for and oversaw the preparation of 12 risk assessments that covered the entire 54 acres to evaluate confirmation sample results and confirm that remaining soil left onsite meets risk parameters for residential redevelopment. Prior to project implementation, the RWQCB confirmed that the CUPA could provide regulatory oversight on this project and closure was received following the issuance of a closure report less than 2 years following completion of Phase II activities. The property is currently being developed with homes and town homes with some homeowners residing in completed residences that have been on the site for several years.

- As Project Manager for a Southern California-based oil production company, designed a Phase II investigation, supervised risk assessment activities, prepared a remedial action plan and implemented that plan to remove 1100 cubic yards of soil from a site where oil production activities had been performed since the 1920's. First sampling through final closure report was performed in less than 3 months to meet a client-mandated deadline for marketing the property. Risk assessment was used to demonstrate that residual chemicals remaining onsite after remediation did not present an issue for residential re-development of the property.

Remediation and Site Closure under California Department of Toxic Substances Control

- Project Manager and Principal-In-Charge of the feasibility study, site characterization, risk assessment, remedial action planning, and remediation of two small town lots that had been used by a drum recycler in the 1970's. Chemicals involved included chlorinated solvents, metals, hydrocarbons, and others. All work was performed in compliance with the National Contingency Plan for the purposes of cost recovery under the Polanco Act. Ms. Beresky was responsible for preparation of a schedule to be used in a negotiated "Environmental Oversight Agreement' with the State of California EPA Department of Toxic Substances Control. Responsible for estimating remediation costs and schedule, designing and costing Phase II, remediation, and risk assessment activities, remedial action planning, agency negotiation, and performing cleanup and risk assessment of confirmation samples for approximately 80 chemicals impacting soil to a depth of about 30 feet. Eleven different waste streams were identified during remediation planning some of which constituted RCRA hazardous waste. Ms. Beresky designed an excavation and site staging plan that allowed for separation of all the waste streams which ranged from non-hazardous to several categories of RCRA hazardous waste requiring various treatments. The remediation was completed in 4 months in the field and approximately 28,000 tons of impacted soil was removed. The DTSC issued closure for the site following backfill activities.

- As Project Manager, prepared and implemented a Removal Action at a storm water collection pond located at a tire-to-energy generation plant where a tire fire destroyed several million automobile and heavy equipment tires. The storm water pond became the primary collection point for thousands of tons of sludge originating from the burned/melted tires and fire fighting chemicals. The project involved the review of the environmental damage the fire had caused and the identification of the major source of potential contamination to groundwater. This project was overseen by the Department of Toxic Substances Control (lead agency), State of California Attorney General, the Regional Water Quality Control Board, and the Integrated Waste Management Board. Ms. Beresky was responsible for preparing a Characterization Plan and Removal Action Workplan that was compliant with the National Contingency Plan and interfacing with all oversight agencies to remove 7,000 tons of sludge material from the collection pond. A large number of confirmation sample analysis results were coordinated to ensure compliance with very low cleanup levels. Ms. Beresky supervised all aspects of the project including characterization sampling, the removal action, confirmation sampling, data interpretation, compliance, and validation and preparation of the final report which was approved by the oversight agencies.

- As Project Manager, characterized lateral and vertical extent of chemically-affected soil that was caused by previous site use of the former owner. Negotiated with the California EPA, Department of Toxic Substances Control (DTSC) to enter its Voluntary Cleanup Program. Upon completion of site characterization activities and risk assessment, a closure letter was procured from the DTSC as one of the first sites closed under its Voluntary Cleanup Program in 12 days using the mayor's office from that city to intervene with DTSC to accelerate its timeline.

- As Project Manager, supervised and oversaw site investigation for a facility which mixed and formulated electroplating solutions. Identified 18 areas of the site impacted with heavy metals and solvents. Oversaw fast-track remediation of soil, which consisted of excavation, transportation, and disposal of several thousand cubic yards. Project responsibilities included negotiating with regulatory agencies for property transaction and facility closure, and overseeing general building decontamination activities, including concrete shot blasting and vacuuming of metal-contaminated dust throughout the facility. Entered the facility into the DTSC Voluntary Cleanup Program. Prepared one report for the site consisting of results of Phase I assessment, Phase II sampling,

remediation, risk assessment, and closure/decontamination activities. A closure letter was received in 2 months, meeting the client's deadline for return of the property to the owners following its tenancy of the site.

Phase I Environmental Assessment and Due Diligence Services

- Performed and supervised hundreds of Phase I Environmental Assessments to assess environmental issues prior to a client's purchase of a property. Knowledgeable about all aspects of ASTM and AAI-compliant Phase I reports. Have supported prospective purchasers by preparing cost estimates for closure of existing environmental issues to use in price negotiations.

- For a major independent oil company, have performed due diligence to assess environmental issues for oil producing property portfolios with values in the $1,000,000,000+ category. Due to strict confidentiality requirements, these assessments were performed entirely via internet research to understand potential environmental liabilities and issues that could be large enough to trigger pre-negotiated deductibles for environmental restoration costs.

- As Project Manager for a banking institution, provided Phase II sampling and site closure (or timelines for site closure) for properties in a 30-day escrow timeline situation. Performed Phase II investigations including soil vapor survey, geophysical survey, soil and groundwater sampling, and risk assessment on several properties leading to the issuance of closure letters for the sites. The work performed in the 30-day timeline allowed escrow to be closed on schedule.

- As Project Manager for a Southern California-based oil company, prepared a Phase I Environmental Assessment and designed and implemented Phase II sampling on a 33 acre parcel where gas plant operations, oil production, and crude oil storage have been performed since 1902. The purpose of this work was to prepare the property for sale to a home builder for residential development. Completed Phase II activities for 14 areas of concern on the property and received a letter that Phase II activities were complete from the Orange County Health Care Agency. Prepared a remedial action plan subsequently approved by the agency. Prepared remediation cost calculations for the purposes of procuring environmental cost cap insurance.

- For a major oil company client's purchase of existing facilities, designed and implemented a Phase II investigation for the purpose of preparing a rough order-of-magnitude remediation cost estimate for 14 separate oil field facilities (including 4 offshore islands with 400+ oil wells each). Ms. Beresky managed the Phase II investigation, performed calculation of remediation costs, and prepared the final report within a 4-week timeframe to meet the client's required escrow deadline.

- For a major land developer, designed Phase II sampling to close potential environmental issues at a former oil production site in Goleta. The site included 42 mud pits/sumps, 23 oil wells, 84 aboveground tanks, subsurface pipelines, and a processing plant used to refine crude oil. Sampling and agency interaction was designed to prepare the former oil field site for the building of residential homes on portions of the site. Former oil field features for the site, currently in use as a golf course, were identified from aerial photographs dating back to 1929 and other data supplied by the former operator.

- Have negotiated the issuance of "comfort" letters for sites which appear to be impacted by neighboring properties by the Los Angeles, Santa Ana, and San Diego Regional Water Quality Control Boards. The "comfort" letters indicate that the agency is aware of a potential problem in the area, is aware of the potential source of the problem and acknowledges that a new site owner would

not be held responsible for the problem. Have negotiated language for these letters which is pre-approved by the buyer and seller. These letters have been used with great success to complete stalled negotiations for sale of a property with potential impact from a neighboring site.

RCRA Requirements and Waste Management

- Ms. Beresky provides consulting to a potentially responsible party in a Superfund case and has guided the family-owned business for several years. Ms. Beresky performed the work to close a RCRA Fixed-Treatment Unit so the family's defunct business could rent out its building. Ms. Beresky continues to advise the family regarding the Superfund process and is working with counsel to guide the family through the steps and responsibilities of PRPs in Superfund cases. Ms. Beresky provided instrumental communications with the DTSC so that the family could move forward with its environmental responsibilities at a rate that was consistent with their financial resources.

- Have prepared closure plans for treatment, storage, disposal (TSD) facilities compliant with the requirements of 40 C.F.R.§264 —Standards For Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities, Subpart G—Closure And Post-Closure. Have used existing data and designed sampling plans to identify Solid Waste Management Units (SWMUs) and Areas of Concern (AOCs).

- Project Manager and Principal-in-Charge for the remedial investigation, site characterization, risk assessment and remedial action planning of a 5-acre former gun range for a local municipality. The facility had operated at the site for 30 years. Soils were found to be impacted with RCRA hazardous levels of lead up to a depth of 12 feet. Telephone poles coated with coal-tar were used as a backstop and are also targeted for remediation. Ms. Beresky was responsible for review and critique of prior site characterization and remediation estimates prepared by others, estimating volume and remediation costs for excavation and disposal of lead-impacted soils, preparation of a remedial action plan and agency negotiation. Site remediation and final risk assessment are pending. Following cleanup, the property is slated for redevelopment as parks and open space.

Agency Negotiation

- Routinely work with local and state agencies to negotiate cleanup levels, scope of work, and closure requirements. Have good working relationships with personnel at most Southern California CUPA and Health Agencies as well as Fire Departments and Regional Water Quality Control Board and Department of Toxic Substances Control office.

- Ms. Beresky negotiated with the RWQCB when it became involved in a project it had last opined on 12 years earlier. RWQCB involvement at the late date was potentially disruptive to the ongoing 54-acre redevelopment project of over 500 residential units. Although the RWQCB had opined 12 years earlier that groundwater was not an issue for this site, its re-involvement stemmed from the spread of a groundwater plume from a Superfund site over 2 miles to the north. Ms. Beresky was able to propose a small scope of work and research on the Superfund site that allowed groundwater issues to be successfully closed and the re-development to continue uninterrupted by this issue.

- As Project Manager for a property held in trust in Orange County, provided environmental consulting oversight for the closure of environmental issues on a property leased by a tenant that had impacted the site with petroleum hydrocarbon chemicals. Met with the Santa Ana Region of the Regional Water Quality Control Board to discuss issues which led to the RWQCB issuing an order that the tenant perform additional sampling. After evaluation of the additional sampling indicating that

groundwater impact was caused by an upgradient neighbor, negotiated with the RWQCB to issue a "comfort" letter for groundwater issues. This letter was then used by the client to provide a full-value property for potential sale to a new owner.

Heather Fields

Senior Environmental Scientist

Waterstone Environmental, Inc.

Ms. Fields is a Senior Environmental Scientist at Waterstone Environmental, and has been involved in the environmental industry since joining Waterstone in 2007. Her primary responsibilities include managing and performing environmental site assessments, including Phase I and Phase II investigations, as well as management of remediation projects. Her work has been conducted for numerous commercial and industrial properties, local school districts, and the private sector. The majority of her assignments have been preparing and implementing workplans for soil, soil vapor and groundwater sampling and remediation, and completing Phase II Environmental Assessment and Groundwater Monitoring reports.

Ms. Fields is experienced in pre-field planning of numerous types of investigation activities, including preparing sampling and remediation workplans, project proposals and budgets, preparation and coordination for fieldwork activities, working with laboratories performing analytical testing, and coordination with drilling and construction subcontractors. Ms. Fields has experience involving soil sampling, groundwater monitoring well installation and sampling, soil vapor well installation and sampling, and supervision of an assortment of crews in relation to hand augering, grading oversight, hollow stem drill rigs, direct push drill rigs, and Cone Penetrometer (CPT) units. In addition to implementing the scope of work, Ms. Fields is experienced in data management and evaluation, preparation of geologic soil borings, report preparation, interpretation of regulatory framework, and litigation support.

Education

- B.S. Earth Sciences, Minor in Environmental Studies, Cal Poly, San Luis Obispo, CA, 2006, graduated *summa cum laude*.
- Environmental Management Certificate, University of California-Irvine, Irvine, CA, 2009.

Specialized Training and Certifications

- OSHA 40-HR HAZWOPER Training, 2007-Current
- First Aid Training, 2007-Current
- 40-HR AHERA Supervisor Training, 2008-Current

Capabilities

- Environmental Site Assessments (Phase I/Phase II)
- Groundwater Well Installation and Sampling
- Soil Vapor Well Installation and Sampling
- Field Operations and Management
- Supervision of Direct Push, Hollow Stem Auger and Cone Penetrometer (CPT) Rigs
- Soil Remediation Oversight and Sampling
- Groundwater Remediation and O&M

- High-Vacuum Dual Phase Extraction (HVDPE) System Oversight
- Hazardous Waste Management and Disposal Profiling
- Phase I, Phase II, Remedial Action Workplan and Remedial Action Completion Report Preparation
- Regulatory Research and Guidance
- Computer Aided Drafting and Modeling Programs
- Data Management and Processing
- Litigation Support

Key Projects and Experience

Fieldwork Capabilities and Supervision

- Ms. Fields has supervised and participated in a variety of field work activities, including multiple Phase II Environmental Site Assessments for soil contamination on commercial and undeveloped parcels throughout Southern California. Phase II work has included soil sampling for volatile organic compounds, metals, total petroleum hydrocarbons, pesticides, and polychlorinated biphenyls, among other chemicals. During each soil sampling activity, she was responsible for ensuring proper collection and handling of samples, monitoring health and safety for herself and subcontractors, classifying and logging soil samples, and making decisions for additional sampling at each field location. Several aspects of field work have included utility clearance, management of hollow stem auger and direct push drilling contractors, and sample collection specific to the chemicals of concern.
- Ms. Fields has performed oversight activities in association with groundwater remediation and groundwater sampling for both discrete and quarterly groundwater monitoring. Ms. Fields has supervised single and multi-nested groundwater well installation and well development activities. Ms. Fields has overseen and collected groundwater samples for quarterly groundwater monitoring reporting at a variety of locations throughout Southern California, including using low-flow sampling techniques. Her duties have included operation of ozone injection, pump and treat, and dual phase extraction remediation systems for which she collected samples, measured groundwater conditions, performed system maintenance, and collaborated with subcontractors and the project manager to optimize the remediation system.
- Ms. Fields is experienced in performing soil vapor surveys in accordance with the *Interim Guidance for Active Soil Gas Investigation* (February 25, 1997) and the DTSC/LARWQCB *Advisory for Active Soil Gas Investigations* (April 2012) for soil vapor well installations and sampling. She has completed numerous soil vapor surveys under these guidelines for both volatile organic compounds and methane, and has assisted clients in comprehending and executing the installation and sampling of soil vapor wells.
- Prior to soil and/or groundwater sampling, Ms. Fields has prepared subcontracts, marked borings, arranged for subsurface utility clearance, and coordinated with laboratories for analysis of soil and/or groundwater samples.
- Ms. Fields has managed large scale soil remediation projects, which included the oversight of multiple crews conducting excavation using excavators and large diameter

auger equipment, and which included shoring installation and daily slurry backfilling. Ms. Fields has additionally overseen large scale soil grading projects for the purpose of identifying and remediating environmental concerns that were previously unidentified.

- Ms. Fields has successfully exhibited the ability to supervise multiple subcontractors and project team members, uphold a good repertoire with the local communities, and confidently interact with lead agencies while performing project tasks to completion in a timely manner. Her professional relationship and open line of communication with the facility owners and operators has helped increase the trust and confidence the client has in Waterstone Environmental.

Environmental Site Assessments

- Ms. Fields has conducted Phase I site assessments both within California and in other states for a variety of clients, including banks, land development companies, and the Los Angeles Unified School District. Each of these projects required arranging site visits with representatives of the property, visual assessment of the property, research of the potential environmental concerns at the property and adjacent properties at local agencies, conducting file reviews, performing interviews with site contacts, review of aerial photographs and historical maps, and completing a report that summarized the potential for environmental impact to the property.

Litigation Support

- Ms. Fields has worked on several expert witness testimony presentations for litigation cases nationwide. She was responsible for preparation of exhibits for trial and expert reports, database management and analysis, document management and review, expert report preparation, and overseeing the production of presentation materials for expert witness testimony. She has been involved in litigation projects based in California and Federal courts for properties including oil refineries, nuclear facilities, and large parcels slated for development.
- Ms. Fields has been involved in the implementation of innovative modeling techniques used for determining cost allocation over time for historic releases in an oil field to be used in assessing future site remediation efforts during specific insurance policy periods.

Health and Safety

- Ms. Fields has prepared numerous Health and Safety Plans for various Phase II sampling and remediation projects. Ms. Fields has been the Health and Safety Officer on numerous job sites throughout the region.
- Ms. Fields has been involved with carrying out the monitoring and notification responsibilities associated with the Air Quality Management District (AQMD) Rule 1166 for air monitoring of Volatile Organic Compounds at multiple large excavation sites in the South Coast AQMD area. She has been responsible for preparing all necessary field documentation for agency representatives. She has written and submitted status reports and the necessary permit amendments as project situations change.

User Questionnaire

Waterstone Environmental, Inc.

Phase I Environmental Site Assessment (ESA)

ASTM E 1527-13 User Questionnaire

Phase I ESA Site Address 1401 S. Brand Blvd., Glendale CA

Signature of Representative: Bart N. Hutchinson

Name of Representative: Bart N. Hutchinson (Please print) **Company:** Rim Rock Investments, LLC (Please print)

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2002 (the *"Brownfields Amendments"*), the *user* must provide the following information (if available) to the *environmental professional.* Failure to provide this information could result in a determination that *"all appropriate inquiry"* is not complete.

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

NO

(2.) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any AULs, such as *engineering controls,* land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

NO

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NO

Waterstone Environmental, Inc.

Phase I Environmental Site Assessment (ESA)

ASTM E 1527-13 User Questionnaire

Phase I ESA Site Address 1401 S. Brand Blvd., Glendale CA

(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

N/A

(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30). Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

(a.) Do you know the past uses of the *property*?

Yes

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

NO

(c.) Do you know of spills or other chemical releases that have taken place at the *property*?

NO

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

NO

(6.) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

NO

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 02/06/2019 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

SAN FERNANDO VALLEY Cerclis ID:: 902252 EPA Id: CAD980894901	***CRYSTAL SPRINGS WELL***	***W 1/8 - 1/4 (0.200 mi.)***	***0***	***26***

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response,

Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 02/06/2019 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 02/06/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 27 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is

1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information

that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 12 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not

limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 16 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
GLENDALE LACEY CARPE	1390 S BRAND BLVD	NE 0 - 1/8 (0.032 mi.)	B9	65

FINDS:

Registry ID: 110002709212

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at proposal October 15, 1984): San Fernando Valley Area 4) is an area of contaminated ground water in the Pollock Well Field area in the City of Los Angeles, Los Angeles County, California. The area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 5,860acres, contains perchloroethylene PCE), according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State s recommended drinking water guideline for PCE 4 parts per billion)is exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended with water from clean sources to ensure that the public receives water with concentrations below the State sguideline.
Status June 10, 1986): EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley Basin and a feasibility study targeted at Area 1,the most contaminated area. The RI is scheduled to begin in early 1986.

SAN FERNANDO VALLEY (AREA 4) (Continued) **1000710135**

Alternate City,St,Zip: LOS ANGELES, CA 90086
Background Info: The San Fernando Valley Ground Water Basin (SFVGWB) is located within the Upper Los Angeles River Area and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFVGWB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.
The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:
Area #1 - North Hollywood NPL Site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divide into the North Hollywood Operable Unit (OU) and the Burbank OU
Area #2 - Crystal Springs NPL Site covers 3975 acres southeast of the North Hollywood NPL Site and is located in the cities of Glendale and Los Angeles.
Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the San Fernando Valley and is located in and adjacent to La Crescenta in the Verdugo Mountains.
Area #4 - the Pollock NPL Site covers 1635 acres in the southeastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale.
Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.
The contaminants of concern are volatile organic compounds (VOCs), trichloroethylene (TCE) and tetrachloroethylene (PCE) which have been and/or are being used in many San Fernando Valley industries, such as aeronautical, automotive, dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination at numerous wells have been so severe with TCE and PCE that these wells have essentialput out of commission.
Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of VOCs released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards.
Federal, state, and local agencies have been conducting investigation and cleanup of contaminated groundwater in the SFVGWB since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing & implementing cleanup remedies, and identifying responsible parties.
EPA provided oversight of the basinwide Remedial investigation (RI) of groundwater contamination conducted by the Los

SAN FERNANDO VALLEY (AREA 4) (Continued) **1000710135**

Angeles Department of Water and Power (LADWP). The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, and the nature and extent of groundwater contamination within the eastern and Verdugo basins; study fate and transport of compounds in the environment; identify ARARs; and evaluate the potential risk to human health and the environment. The Remedial Investigations of the SFVGWB were divided into two phases:
Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contaminant information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4). Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.
Phase II activities consist of a basinwide remedial investigation conducted by LADWP.
Remedial Actions (RAs):
North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.
A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is loca located at 11845 Vose Street in the N. Hollywood section of Los Angeles.
A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Negotiations are continuing with PRPs for the design and construction of this RA.
Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU was separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remedy. The PRPs formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extractio and treatment.
Verdugo and Pollock (Areas #3 and #4) -- Currently no RAs have been identified for Area #3 or for Area #4.
In October 2003, US EPA proposed No Remedial Action for Verdugo Basin (Area #3).
EPA and the RWQCB are identifying potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders have been implemented at numerous specific potential source sites within the Basin by RWQCB and the Department.

CAS #: 67-66-3
Pathway: GROUND WATER PATHWAY
Scoring: 4

NPL Status: Currently on the Final NPL
Substance ID: U210
Substance: TETRACHLOROETHENE
CAS #: 127-18-4
Pathway: GROUND WATER PATHWAY
Scoring: 2

NPL Status: Currently on the Final NPL
Substance ID: U228
Substance: TRICHLOROETHYLENE (TCE)
CAS #: 79-01-6
Pathway: GROUND WATER PATHWAY
Scoring: 2

Summary Details:

Conditions at proposal October 15, 1984): San Fernando Valley Area 2) is an area of contaminated ground water located in the vicinity of the Crystal Springs Well Field in the Cities of Los Angeles and Glendale, Los Angeles County, California. This area is part of the San Fernando Valley Basin, a natural underground reservoir that represents an important source of drinking water for at least 3 million people in the Los Angeles metropolitan area. The contaminated ground water, which underlies an area of approximately 6,680 acres, contains trichloroethylene TCE) and perchloroethylene PCE), according to tests conducted by the California Department of Health Services, as well as numerous local government agencies. The State s recommended drinking water guidelines for TCE and PCE 5 and 4 parts per billion respectively) are exceeded in a number of public wells in this area. To alleviate this contamination, wells are either taken out of service or blended withwater from clean sources to ensure that the public receives water with TCE/PCE concentrations below the State s guidelines. Status June 10, 1986):
EPA and the Los Angeles Department of Water and Power are entering into a cooperative agreement for a remedial investigation of the San Fernando Valley

SAN FERNANDO VALLEY (AREA 2) (Continued) **1000710134**

Basin and a feasibility study targeted at Area 1, the most contaminated area.
The RI is scheduled to begin in early 1986.

Background Info: essentially been put out of commission.
Exposure of receptors to contaminants can possibly occur through ingestion of contaminated drinking water, inhalation of vapors released from the contaminated water as in taking showers, and dermal exposure as in washing or bathing. However, with the strict regulatory control over water quality by the State's Department of Health, Office of Drinking Water (ODW), the RWQCB, and other agencies, residents are assured that the water they consume is safe and that no one is drinking water which contains concentrations of contaminants above regulatory standards.
Federal, state, and local agencies have been conducting investigations and cleanup of contaminated groundwater in the SFVGWB since contamination was discovered in 1979. These activities involve measuring the extent of contamination, developing and implementing cleanup remedies, and identifying responsible parties. EPA provided oversight of the basinwide Remedial Investigation (RI) of groundwater contamination conducted by the Los Angeles Department of Water and Power (LADWP) The RI objectives were to collect lithological and water quality data and information regarding basin operations for the eastern SF and Verdugo basins; develop a regional characterization of geology, hydrology, hydrogeology and the nature and extent of groundwater contamination within the eastern & Verdugo basins; study fate and transport of compounds in the environment; identify Applicable or Relevant and Appropriate Requirements (ARAR's); and evaluate the potential risk to human health and the environment.
The Remedial Investigation of the SFVGWB was divided into two phases:
Phase I activities have included vertical profile borings and installation of monitoring wells to obtain preliminary contamination information. Monitoring wells have been installed as follows: 34 in North Hollywood (Area #1); 29 in Crystal Springs (Area #2); 7 in Verdugo (Area #3); and 17 in Pollock (Area #4).
Information obtained from Phase I investigation activities identified the need for several operable units. Operable Unit is a federal term which is similar to the State's definition of a removal action.
Phase II activities consist of basinwide remedial investigation conducted by the LADWP.
Remedial Actions (RAs):
North Hollywood (Area #1) -- Two RAs were identified for Area #1, the North Hollywood OU and the Burbank OU.
A Record of Decision (ROD) for the North Hollywood RA was signed in September 1987, selecting groundwater extraction and treatment (air stripping) of 2,000 gallons per minute (gpm) of

SAN FERNANDO VALLEY (AREA 2) (Continued) **1000710134**

contaminated water as an interim remedy. This RA was constructed with funding from EPA and the State and has been treating contaminated groundwater since March 1989. This facility is located at 11845 Vose Street in the N. Hollywood section of Los Angeles.
A ROD for the Burbank OU was signed in June 1989, again selecting groundwater extraction and treatment of about 12,000 gpm of contaminated water. Phase I of the Burbank OU began operations in January 1996 treating groundwater at a rate of 6,000 gpm. Phase II began operations in May 1998 adding an additional 3,000 gpm to the Burbank OU's treatment capacity.
Crystal Springs (Area #2) -- LADWP has completed a focused RI/FS for this proposed RA. The Glendale OU was separated into a North OU and a South OU based on the amount of contamination and the facilities contributing to the GW contamination. A ROD for each OU was signed on June 18, 1993 designating groundwater extraction and treatment as the interim remedy. The PRPs formed a group and combined the RA efforts for each OU into one document. The selected alternative is GW extraction and treatment. The Glendale OU began operations in September 2000.
Verdugo and Pollock (Areas #3 and #4) --
Currently no RAs have been identified for Area #3 or for Area #4. In October 2003, US EPA propsed No Remedial Action Verdugo Basin (Area #3).
Another contaminant of concern, hexavalent chromium, has been identified in the San Fernando Valey Groundwater Basin. EPA and the RWQCB are currently identifyig potential sources of contamination and pursuing PRPs that may be responsible for contaminating groundwater. As these PRPs are identified, individual site investigations and mitigation activities will be pursued. Enforceable agreements and orders will be implemented at numerous specific potential source sites within the Basin by RWQCB and DTSC.
The San Fernando Valley Ground Water Basin (SFVGWB) is located within the Upper Los Angeles River Area and consists of the eastern portion of the San Fernando Valley and the entire Verdugo Basin. The SFVGWB encompasses approximately 112,000 acres of alluvial valley fill deposits and provides enough water to serve approximately 600,000 residents. The Basin is bounded on the north and the northwest by the Santa Susana Mountains, on the northeast by the San Gabriel Mountains, on the west by the Simi Hills and on the south by the Santa Monica Mountains.
The San Fernando Valley Study area includes four National Priorities List (NPL) sites. They are:
Area #1 - North Hollywood NPL site covers 9336 acres in the eastern part of the San Fernando Valley. The site has been divided into the North Hollywood Operable Unit (OU) and the Burbank OU.
Area #2 - Crystal Springs NPL Site covers 3975 acres south-east of the North Hollywood NPL site and is located in the cities of Glendale and Los Angeles.
Area #3 - Verdugo NPL Site covers 2673 acres in the eastern part of the San Fernando Valley and is located in and adjacent to La Crescenta in the Verdugo Mountains.
Area #4 - Pollock NPL Site covers 1653 acres in the

SAN FERNANDO VALLEY (AREA 2) (Continued) **1000710134**

southeastern part of the San Fernando Valley and is located in and adjacent to the cities of Los Angeles and Glendale. Groundwater contamination in the SFVGWB is linked to prewar, postwar, and current industrialization in the San Fernando Valley.
The primary contaminants of concern are volatile organic compounds (VOCs), trichloroethylene (TCE), and tetracholoethylene (PCE), which have been and/or are being used in many San Fernando Valley industries, such aeronautical, automotive, dry cleaning, and metal plating. These solvents have found their way to the groundwater basin as a result of both past and improper use, storage, and disposal practices. The SFVGWB Superfund sites, added to the NPL in 1986, are areas where groundwater from wells have been found to contain VOCs above the state and federal drinking water standards. Groundwater contamination at numerous wells have been so severe with TCE and PCE that these wells have

FINDS:

Registry ID: 110009267970

Environmental Interest/Information System
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

SUPERFUND NPL

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

FINDS:

Registry ID: 110002809284

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

FINDS:

Registry ID: 110002834363

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Status: No violations found

FINDS:

Registry ID: 110002747573

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

. Waste code: D001

W COAST MOTORCYCLES DBA HARLEY DAVIDSON (Continued) **1000310226**

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D026
. Waste name: CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075
. Waste name: NICOTINE, & SALTS

Historical Generators:
Date form received by agency: 03/01/2014
Site name: COSTCO WHOLESALE #130
Classification: Large Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009

FINDS:

Registry ID: 110002665376

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info:	cognized, thus soil-washing was no longer a viable alternative. Consequently, the RAP was modified, selecting offsite disposal with capping as a preferred alternative. A Negative Declaration was prepared in compliance with the California Environmental Quality Act (CEQA) requirements and the modified RAP was approved in January of 1990. The Department entered into a enforceable agreement with Franciscan Promenade to implement the modified RAP. In addition, the Department entered into a separate agreement with Franciscan Promenade to conduct a removal action for the asbestos contamination which was found to be widespread. During these removal activities, 6,022 truck loads of materials weighing approximately 132,000 tons were removed from the site. All Class I wastes (heavy metal, contaminated soils and debris, materials containing asbestos, materials containing PCB, hydrocarbon contaminated soils, etc.), were disposed of at Kettleman Hills Hazardous Waste Disposal Facility located in the San Joaquin Valley. Buildings located on the site were demolished under the joint supervision of the City of Los Angeles Department of Building and Safety and the DHS. Fifteen (15) of the forty (40) buildings were demolished as hazardous and were disposed of at Kettleman Hills. These activities were completed in accordance with the remediation workplans. The waste buried in the northwest portion of the property was capped. The cap was constructed over approximately ten acres of the site. In accordance with the RAP the cap consisted of five feet of clean soil, synthetic liner, and an asphalt surface. In addition, a barrier wall containing synthetic liner was constructed along the perimeter of the capped area. Remediation of the

FRANCISCAN CERAMICS, INC. (Continued) **S100833285**

site was completed during Septmeber 1990. On October 9, 1990, the Department certified that the modified RAP for the Franciscan Ceramics site had been completed. However, a requirement of the modified RAP was that a deed restriction be recorded on the property, limiting future land use. Since the berm deed restriction has not been recorded and the groundwater monitoring was suspended, the Department has delisted the site.
The modified Operation and Maintenance Program specified in the RAP requires that the cap are to be maintained by regular inspection and that a groundwater monitoring program be implemented. The groundwater will be sampled and analyzed on a quarterly basis. Groundwater sampling commenced in November 1990 and ceased after the first round. DTSC modified the O&M plan in OCT 1994. Groundwater monitoring is still on-going.
After reviewing the Five Year Review Report, DTSC modified groundwater monitoring program to biennial.
The Franciscan site is a former ceramics manufacturing facility, situated on 45 acres in Atwater Village. It was in operation for approximately 70 years, during which time ceramic waste and sludges were disposed of onsite. Elevated levels of zinc, cadmium, and lead were identified in the soils, both in the surface and in the subsurface. Soils contaminated with weathered diesel fuel were also found on the eastern boundary of the site. Asbestos was also discovered, as a result of various salvaging and demolition activities, inside the building structures and along the immediate perimeter of the site.
Because the shallow aquifer is not used for drinking purposes, there is limited impact to the public. The possible receptors for airborne contaminants include residents who live near the site.
In March 1987, Schurgin Development Companies (prospective buyer of the Franciscan Ceramics property), signed a Consent Order with the Department agreeing to consent a RI/FS and prepare a RAP for the Franciscan site. The RI/FS was completed in October of 1987, and the RAP, selecting soil-washing technology to recover the lead from the contaminated waste fill at the site, was approved in March 1988.
In October of 1988, Franciscan Promenade purchased the Franciscan site and conducted an additional site investigation to characterize the chemical and physical properties of the contaminated material. Having a better understanding of the areal extent, depth, and nature of the lead contaminated waste fill, it was determined that soil-washing was not technically or economically feasible. The waste was much more extensive than previously re-

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	Franciscan Ceramics and predecessor companies are responsible for the contamination. Shurgin Development Company (potential site developer) has entered into an enforceable agreement with DHS for oversight and monitoring of cleanup efforts. DHS has budgeted $70,000 for direct costs related to the project. The responsible parties will pay all costs associated with cleanup.
Site Description:	This site was a ceramic manufacturing facility for at least 70 years. One hundred thousand cubic yards of ceramic waste and sludges were disposed of onsite to a depth of 20 feet.
Hazardous Waste Desc:	There are elevated levels of zinc, cadmium and lead in soils at the site.
Threat To Public Health & Env:	The surrounding area is largely commercial and residential. Surface soil contamination could potentially migrate offsite in the form of airborne particulates. Under certain conditions, metals may migrate vertically, potentially contaminating ground water.

FRANCISCAN CERAMICS, INC. (Continued) **S100833285**

Site Activity Status: Shurgin Development Company (a potential site developer and non-responsible party) has completed site characterization and a RAP has been adopted by DHS. One of the PRPs has filed a Writ of Mandate in the L.A. Superior Court, challenging the recommended remediation. The RAP implementation may be delayed due to the above.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info:	This property was purchased by Ralph's Grocery Company for for construction of an automated warehouse. During the clearing, excavating and grading of the property, materials and substances of a probable regulated nature were discovered. These include an abandoned plating shop, 2 abandoned underground tanks, abandoned assayer's pits and a pool of asphaltic tar.

WILSHIRE PROPERTIES (Continued) **S102008357**

The site was certified on November 12, 1985 and DTSC was consulted throughout thw soil excavation of the underground tanks and assayer's pit.

Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

FINDS:

Registry ID: 110000781985

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Large Quantity Generator

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: F006

RB Case Number:	113.5243
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Arsenic, Chromium, Mercury (elemental), Nickel, Other Metal
Site History:	The RWQCB issued a CAO to Excello Plating on June 20, 2003. The CAO was revised and re-issued, on June 2, 2005. The facility's owners have been named a Responsible Party under CERCLA for releasing VOCs, hexavalent chromium, nickel, cadmium, zinc and lead. The purpose of issuing this CAO was to ensure that Excello Plating completes the on-site and off-site assessment to delineate the lateral and vertical extent of heavy metal contaminants (specifically chromium) and, as necessary, undertake remediation of the affected soil and groundwater, on-site and off-site. Additionally, the USEPA has issued a General Notice Letter and a 104E Letter and the facility is considered a Principle Responsible Party for the Glendale Chromium Operable Unit. On September 23, 2004 the Los Angeles City Attorney charged Excello with a violation of the federal Clean Water Act for failure to comply in a timely manner with the CAO This criminal citation has corresponding financial penalties including fines of $50,000 per day. In 2006 there was an out-of-court settlement that included a plan for more monitoring wells for plume delineation. The facility has completed onsite soil.and. groundwater assessment and has submitted a Remedial Action Plan (RAP) for the remediation of heavy metals including hexavalent chromium and for Volatile Organic Compounds (VOCs) including trichloroethylene (TCE) and perchloroethylene (PCE).. As part of the RAP, the facility plans to applying for a General Waste'Discharger Requirement (WDR) permit for the remediation of the . hexavalent chromium. In April of 2008 the facility completed the drilling of three (3) additional groundwater monitoring wells with two (2) of the wells being installed downgradient and offsite. These offsite wells were installed to help delinate the contaminant plumes that may have migrated offsite. Groundwater monitoring continues on a semi-annual basis.

FINDS:

Registry ID: 110002139178

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and

EXCELLO PLATING CO (Continued) **1000205197**

it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

EXCELLO PLATING CO (Continued) **1000205197**

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/11/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

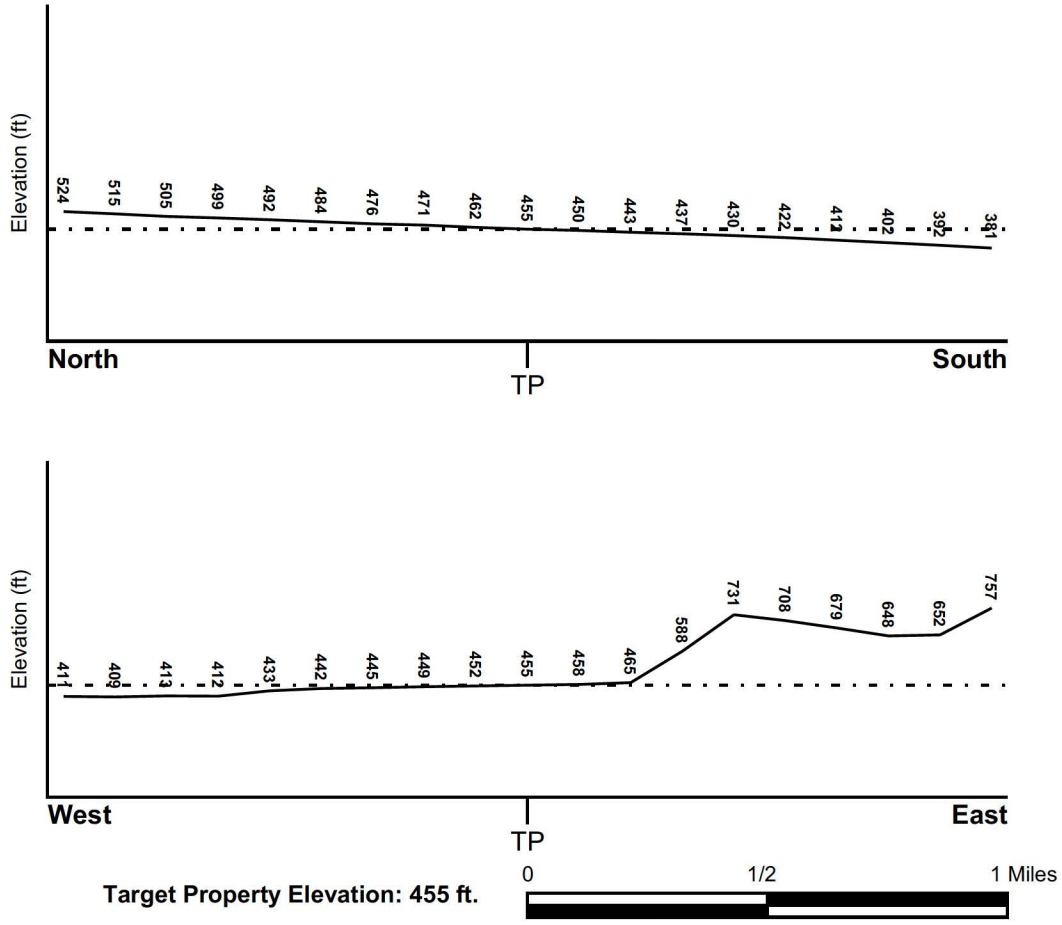

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1345F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1375F	FEMA FIRM Flood data

06037C1626F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BURBANK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NW
Site Name:	GARRETT NEAL
Site EPA ID Number:	CAD980886667
Groundwater Flow Direction:	N OR S. A PUMPING DEPRESSION EXISTS APPROXIMATELY 2 MILES TO THE NORTH OF THE SITE.
Measured Depth to Water:	approximately 15 feet.
Hydraulic Connection:	A recent alluvium underlies the site. Clay and silt lenses that act as confining layers exist in the site area.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

EDR Site Report™

6 Armstrong Road, 4th floor
Shelton, CT 06484
Toll Free: 800.352.0050
www.edrnet.com

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary . . . . . Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports . . . . . Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases and Update Information. . . . . Page 26

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY AREA	FACILITY 1 **LOS FELIZ FORD DBA STAR CHRYSLER/JEEP** 1401 S BRAND BLVD GLENDALE, CA 91204 - 2809 EDR ID #S113006472
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility is a FUSRAP Site	NO
Facility is a UXO Site	NO
Facility is a FUELS Site	NO
Facility is an DockHWC/ECHO Site	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility is a Record of Decision Site (ROD)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (SEMS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in other database records (OTHER)	**YES - p4**
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
Facility is named in a CERCLA-related Consent Decree	NO
TOTAL (YES)	1

SECTION 3: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

CA HAZNET: Facility and Manifest Data
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2017
Database Release Frequency: Annually

Date of Last EDR Contact: 01/07/2019
Date of Next Scheduled Update: 04/22/2019

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Waterstone Environmental Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

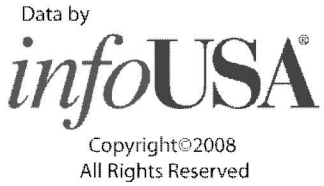

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

PERMIT NO. W-943

December 21, 19 70

INDUSTRIAL WASTE PERMIT

Revocable permission is hereby granted to

Los Feliz Ford, Incorporated (Name of Firm or Individual) 1401 South Brand Boulevard, Glendale 91204 (Address)

to discharge the following indicated class or classes of industrial waste liquids

estimated to be 100 gallons per 8-hour day from:

Automobile Parts Cleaning and Garage
Floor Washing

from the premises located at 1401 South Brand Boulevard, Glendale 91204

into the 8-inch sewer in the alley westerly of that address

subject to the conditions marked (x) on the reverse side of this sheet and to the further condition that the permittee agrees to take such additional steps in the future as may then be required by the City Engineer or his authorized representative to prevent any damage, danger, or nuisance from the introduction of these waste liquids into the receiving system.

RECOMMENDED:

~~City Engineer~~
Supt. of Building

APPROVED:

Director of Public Works

This permit becomes effective upon receipt of the fee of $15.00 and validation by Cashier in space provided below:

Fee Receipt No. 60849

By

Additional permits must be obtained from the Building Section for the performance of the work on the property.

PERMIT CONDITIONS

which must be fulfilled by permittee

PROCESS WASTE

(X) Discharge such waste liquids in the manner required by the Plumbing Code of the Building Section.

(X) Pass all such waste liquids through a 3-compartment clarifier (neutralizing tank) having internal dimensions not less than 9 feet long, 3 feet wide, and 3 feet deep below invert of outlet pipe.

(X) Neutralize such waste liquids to a pH value of between 5.5 (for acidity) and 9.0 (for alkalinity) before discharge.

(X) Clarify such waste liquids to not exceed 600 parts per million of grease or oil and 1000 parts per million of suspended solids before discharge.

(X) Permit no storm water to enter the sewer.

(X) Discharge no waste liquids into the sewer at a temperature in excess of 100 degrees Fahrenheit.

(X) Discharge no paints, gums, lacquers, solvents, hydrocarbons, or other flammable substances, but dispose of them legally otherwise;

(X) Discharge no cyanides, phenols, or other toxic substances.

(X) Discharge no rags, bones, feathers, glass, metal, wood, or other large solid particles.

( ) Pass the waste liquids through a Standard Manhole ..... (Standard Plan No. .....) to be constructed in the discharge line from the clarifier at the applicant's expense and accessibly located on applicant's property or in the public street.

(X) **Adopt and use a program of regular and frequent maintenance and skimming of the clarifier so as to prevent discharge of grease, oil and/or industrial waste in excess of the legal limits into the sewer.**

NOTE:

Items checked above are restrictions which are particularly applicable to this permit. The lack of a mark in front of any of the unchecked conditions does not in any way authorize permittee to violate the terms of any unchecked condition, or the general provisions of the Municipal Code governing industrial wastes.

Should you require any additional information regarding this permit, please call the Engineering Section, 633 East Broadway, 244-4651.

which must be fulfilled by permittee

☒ PROCESS WASTE

(X) Discharge such waste liquids in the manner required by the Plumbing Code of the Building Section.

(X) Pass all such waste liquids through a ..3.. compartment clarifier (neutralizing tank) having internal dimensions not less than ..9.. feet long, ..3.. feet wide, and ..3 feet.. deep below invert of outlet pipe.

(X) Neutralize such waste liquids to a pH value of between 5.5 (for acidity) and 9.0 (for alkalinity) before discharge.

(X) Clarify such waste liquids to not exceed 600 parts per million of grease or oil and 1000 parts per million of suspended solids before discharge.

(X) Permit no storm water to enter the sewer.

(X) Discharge no waste liquids into the sewer at a temperature in excess of ..100.. degrees Fahrenheit.

(X) Discharge no paints, gums, lacquers, solvents, hydrocarbons, or other flammable substances, but dispose of them legally otherwise;

(X) Discharge no cyanides, phenols, or other toxic substances.

(X) Discharge no rags, bones, feathers, glass, metal, wood, or other large solid particles.

( ) Pass the waste liquids through a Standard Manhole ..... (Standard Plan No. .....) to be constructed in the discharge line from the clarifier at the applicant's expense and accessibly located on applicant's property or in the public street.

(X) Adopt and use a program of regular and frequent maintenance and skimming of the clarifier so as to prevent discharge of grease, oil and/or industrial waste in excess of the legal limits into the sewer.

NOTE:

Items checked above are restrictions which are particularly applicable to this permit. The lack of a mark in front of any of the unchecked conditions does not in any way authorize permittee to violate the terms of any unchecked condition, or the general provisions of the Municipal Code governing industrial wastes.

Should you require any additional information regarding this permit, please call the Engineering Section, 633 East Broadway, 244-4651.

Re: ANNUAL FIRE INSPECTION

On: MARCH 3, 1995 an inspection was made of the above referenced property.

Your attention is called to the following item(s) which must be corrected in order to meet the minimum requirements for fire and life safety:

OK (1) HAVE YOUR FIRE DOORS CERTIFIED BY A LICENSED CONTRACTOR.

OK (2) REPAIR THE HINGE ON THE SEPERATION DOOR IN THE CENTER OF THE SERVICE AREA, SO THAT IT IS SELF CLOSING.

OK (3) PROVIDE A COVER PLATE FOR THE JUNCTION BOX UNDER THE PARTS COUNTER.

OK (4) PROVIDE FIRE EXTINGUISHERS WHERE THERE ARE SIGNS INDICATING "EXTINGUISHER".

OK (5) YOUR FIRE EXTINGUISHERS ARE DUE TO BE SERVICED IN APRIL. A FEW OF YOUR EXTINGUISHERS HAVE BEEN DISCHARGED AND SHOULD BE SERVICED IMMEDIATELY.

OK (6) REMOVE THE TAPE FROM THE CIRCUIT PANEL IN THE SERVICE AREA SO THAT THE BREAKERS WILL FUNCTION PROPERLY.

OK (7) THE EXTENSION CORDS IN THE FOLLOWING LOCATIONS NEED TO BE REPLACED WITH A POWER STRIP EQUIPPED WITH A CIRCUIT BREAKER.
a) TV IN THE SHOWROOM b) SERVICE AREA VENDING MACHINES c) USED CAR OFFICE.

You are hereby notified to correct the condition(s) listed above. A reinspection will be made on or about APRIL 3, 1995.
Failure to comply with this notice may result in a legal action being filed against you by the City Attorney.

Hazardous Materials Disclosure Certification or New Submission

Dear Business Owner / Operator

Chapter 6.95 of the California Health and Safety Code requires your Hazardous Materials Business Emergency Plan (HMBEP) to be updated and resubmitted **every three (3) years**.
Please find your most recent Hazardous Materials Business Emergency Plan that you have in your possession somewhere within your records. This Plan should include Facility & Chemical Inventory information. Check the last submission date, review the business plan information carefully, and confirm the accuracy of all your reported hazardous materials quantities with the actual quantities.

CHECK THE APPROPRIATE BOX AND FOLLOW THE INSTRUCTIONS

WITHIN THE LAST 3 YEARS OUR BUSINESS **HAS FILED** THE ATTACHED HAZARDOUS MATERIALS APPLICATION AND INVENTORY FORM PURSUANT TO SECTION 2729.2 AND 2729.3 REQUIREMENTS

AND

NO CHANGES HAVE BEEN MADE SINCE THEN (all items must be correct):

1. The information contained in the hazardous materials inventory that was submitted to the CUPA within the last 3 years is complete, accurate, up-to-date, and there was no change in the quantity of hazardous materials.
2. No new hazardous materials subject to disclosure requirements have been added to the inventory.

Complete the bottom section, sign, and return this page to above letterhead address within 2 weeks.

WITHIN THE LAST 3 YEARS OUR BUSINESS **HAS NOT FILED** THE ATTACHED HAZARDOUS MATERIALS APPLICATION AND INVENTORY FORM PURSUANT TO SECTION 2729.2 AND 2729.3 REQUIREMENTS:

1. ***Please complete the attached "Hazardous Materials Application Package"***
2. ***If your business has more than three (3) chemicals, please make duplicate copies of page 5 for those additional chemicals.***
3. ***Return this page along with the completed application package to above letterhead address within 3 weeks.***

I certify under penalty of law, that I am the business owner or officially designated representative of the business, have reviewed the current hazardous materials inventory on file with the Glendale Fire Department and certify the submitted information is true, accurate and complete.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page (OES Form 2730).

Does your facility . . .	If Yes, please complete these pages of the UPCF . . .	
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10CFR Parts 30, 40 or 70?	◉ YES ○ NO 4.	● HAZARDOUS MATERIAL INVENTORY - CHEMICAL DESCRIPTION (OES 2731)
B. UNDERGROUND STORAGE TANKS (USTs) 1. Own or operate underground storage tank?	○ YES ◉ NO 5.	● UST FACILITY (Formerly SWRCB Form A) ● UST TANK (one page per tank) (Formerly Form B)
2. Intend to upgrade existing or install new USTs?	○ YES ◉ NO 6.	● UST FACILITY ● UST TANK (one per tank) ● UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one per page per tank) (Formerly Form C)
3. Need to report closing a UST?	○ YES ◉ NO 7.	● UST TANK (closure portion--one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTS) Own or operate ASTs above these thresholds: --any tank capacity is greater than 660 gallons, or --the total capacity for the facility is greater than 1,320 gallons?	◉ YES ○ NO 8.	NO FORM REQUIRED TO CUPAS
D. HAZARDOUS WASTE 1. Generate hazardous waste?	◉ YES ○ NO 9.	● EPA ID NUMBER --provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC §25143.2)?	○ YES ◉ NO 10.	● RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat a hazardous waste on site?	○ YES ◉ NO 11.	● ONSITE HAZARDOUS WASTE TREATMENT - FACILITY (Formerly DTSC Form 1772) ● ONSITE HAZARDOUS WASTE TREATMENT - UNIT (one page per unit) (Formerly DTSC Form 1772A,B,C,D, and L)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	○ YES ◉ NO 12.	● CERTIFICATION OF FINANCIAL ASSURANCE (Formerly DTSC Form 1232)
5. Consolidate hazardous waste generated at a remote site?	○ YES ◉ NO 13.	● REMOTE WASTE/CONSOLIDATION SITE ANNUAL NOTIFICATION (Formerly DTSC Form 1196)
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	○ YES ◉ NO 14.	● HAZARDOUS WASTE TANK CLOSURE CERTIFICATION (Formerly DTSC Form 1249)
E. LOCAL REQUIREMENTS Have Regulated Substances (RS) including Extremely Hazardous Substances (EHS) stored on site at greater than the threshold planning quantities established by the California Accidental Release Program (Cal ARP?	○ YES ◉ NO	In addition to Hazardou Materials requirements, complete: ● Regulated Substance Registration ● Risk Management Plan (when required)
2. OTHER REQUIREMENTS		
a. Have hazardous materials stored on site at or above a threshold amount estabilised by a CUPA'S or PA's local ordinance?	○ YES ◉ NO	● Consult attached Uniform Fire Code permit amounts

CONSOLIDATED CONTINGENCY PLAN

COVER PAGE

I. FACILITY IDENTIFICATION		
BUSINESS NAME (Same as FACILITY NAME or DBA-Doing Business As) **STAR PRE OWNED SUPERCENTER**		FACILITY ID #
ADDRESS 150 **1401 Brand Blvd.**	CITY 151 **Glendale**	ZIP CODE 153 **91204**

The Consolidated Contingency Plan provides businesses a format to comply with the emergency planning requirements of the following three written hazardous materials emergency response plans required in California:

- k Hazardous Materials Business Plan (HSC Chapter 6.95 Section 25504 (b) and 19 CCR Sections 2729-2732,
- k Hazardous Waste Generator Contingency Plan (22 CCR Section 66264.52), and ,
- k Underground Storage Tank Emergency Response Plan and Monitoring Program (23 CCR Sections 2632 and 2641.

This format is designed to reduce duplication in the preparation and use of emergency response plans at the same facility, and to improve the coordination between facility response personnel and local, state and federal emergency responders during and emergency. Use the chart below to determine which sections of the Consolidated Contingency Plan need to be completed for your facility. If you are unsure as to which programs your facility is subject to, refer to the Business Activities Page.

PROGRAMS	SECTIONS TO BE COMPLETED
Hazardous Materials Business Plan	Cover Page, Section I, and Site Map(s)
Hazardous Waste Generator	Cover Page, Section I, and Site Map(s)
Underground Storage Tank	Cover Page, Sections I and II, and Site Map(s)
HMBP, HWG, UST	Cover Page, Sections I and II, and Site Map(s)

A copy of the plan shall be submitted to your local CUPA and at least one copy of the plan shall be maintained at the facility for use in the event of an emergency rand for inspection by the local agency. Describe below where a copy of your Contingency Plan, including the hazardous material inventories and Site Map (s), is located at your business:

PLAN CERTIFICATION	
I certify under penalty of law that I have personally examined and I am familiar with the information provided by this plan and to the best of my knowledge the information is accurate, complete and true.	
OWNER/OPERATOR NAME Gus Mier	OWNER/OPERATOR TITLE Service Manager
OWNER/OPERATOR SIGNATURE	DATE 11-18-04

We appreciate the effort of local businesses completing these plans and will assist in every possible way. If you have any questions, please contact the City of Santa Monica Environmental Programs.

City of Glendale - Unified Program (CUPA) Agency

III. EMERGENCY RESPONSE PLANS AND PROCEDURES

A. Notifications

Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Administering Agency and the Office of Emergency Services. If you have a release or threatened release of hazardous material, immediately call:
FIRE/PARAMEDICS/POLICE/SHERIFF
PHONE: 911

After the local emergency response personnel are notified, you shall then notify this Administering Agency and the Office of Emergency Services.

Local Unified Program Agency:	(323) 890-4000
State Office of Emergency Services	(800) 852-7550 or (916) 262-1621
National Response Center:	(800) 424-8802

Information to be provided during Notification:

- k Your Name and the Telephone Number from where you are calling.
- k Exact address of the release or threatened release.
- k Date, time, cause and type of incident (e.g. fire, air release, spill, etc.)
- k Material and quantity of the release, to the extent known.
- k Current condition of the facility.
- k Extent of injuries, if any.
- k Possible hazards to public health and/or the environment outside of the facility.

B. Emergency Medical Facility

List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous materials.

HOSPITAL/CLINIC	PHONE NO:
Glendale Memorial Occupational Health Center	**(818) 246-4800**
ADDRESS	
207 West Los Feliz Blvd.	
CITY	ZIP CODE:
Glendale	**91204**

C. Private Emergency Response

DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM?
If yes, describe what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of hazardous materials.

CLEANUP/DISPOSAL CONTRACTOR
List the contractor that twill provide cleanup in the event of a release.

NAME OF CONTRACTOR	PHONE NO:
Asbury Environmental Services	**(310) 886-3400**
ADDRESS	
CITY: **Compton, CA**	ZIP CODE:

D. Arrangements with Emergency Responders

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

E. Evacuation Plan

1. The following alarm signal(s) will be used to begin evacuation of the facility (check all which apply):

☒ Verbal ☒ Telephone (incl. cell ☐ Alarm System ☐ Intercom
☐ Pagers ☐ Portable Radio ☒ Public Address System ☐ Other

2. Evacuation map is prominently displayed throughout the facility.

3. Individual(s) responsible for coordinating evacuation including spreading the alarm and confirming the business has been evacuated:

Gus Prieto

F. Earthquake Vulnerability

Identify areas of the facility where releases could occur or would require immediate inspection or isolation because of the vulnerability of earthquake related ground motion.

☒ Hazardous Waste/Hazardous Material Storage Areas ☐ Waste Treatment ☐ Process Lines
☐ Bench/Lab ☐ Production Floor ☐ Other

Identify mechanical systems where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☐ Utilities ☐ Process Piping ☒ Pressure Vessels ☒ Cabinets ☒ Shelves ☐ Other
☐ Racks ☐ Sprinkler Systems ☒ Shutoff Valves ☒ Gas Cylinders ☒ Tanks

G. Emergency Procedures

Briefly describe your business' standard operating procedures in the event of a release or threatened release of hazardous materials

1. PREVENTION (prevent the hazard) - Describe the kinds of hazards associated with the hazardous materials present at your facility. What actions would your business take to prevent these hazards from occurring? You may include a discussion of safety and storage procedures.

Hazardous materials are limited to flammable and combustible liquids, corrosives, and flammable and nonflammable gases. Prevention begins with training our employees to be aware of the hazards presented by each of the hazardous materials stored and used in our facility. All materials are safely stored at several locations in our facility. Absorbents and fire extinguishers are readily available if ever needed, and daily cleanup is routine.

2. MITIGATION (reduce the hazard) - Describe what is done to lessen the harm or the damage to a person(s), property, or the environment, and prevent what has occurred from getting worse or spreading. What is your immediate response to a leak, spill, fire, explosion, or airborne release at your business?

Spill absorbent material is supplied in all areas where bulk storage of hazardous materials and waste are situated. Also, bulk storage of hazardous materials and wastes are in containers which have integral secondary containment or are located in berms or have some other means of minimizing the risk of environmental damage and physical harm. Should a release occur, steps will be taken to contain the material at the source using spill blankets and absorbent. If any storm or sewer drain inlets are threatened by the release, absorbent berms will be constructed around them or a berm will be constructed to divert the flow away from the drain.

3. ABATEMENT (remove the hazard)-- Describe what you would do to stop and remove the hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your facility?

Upon confirming a release of a hazardous material has occurred, the dealership's Emergency Coordinator (EC) will begin spill response procedures. If the release is significant and beyond the control ability of dealership personnel, the EC will contact the Fire Department. Only those employees who have been trained on spill response procedures will be allowed to participate in spill containment activities. Absorbent material will be used to contain the spill and protect sewer and storm drain inlets, gutters, etc. For larger spills, the dealership's hazardous waste hauler will be contacted to help with the cleanup effort. Contaminated absorbent will be disposed of as hazardous waste.

CONSOLIDATED CONTINGENCY PLAN
SECTION I: BUSINESS PLAN AND CONTINGENCY PLAN

IV. Emergency Equipment

22CCR, Section 66265.52(e) [as referenced by Section 676262.34(a)(3)] requires that emergency at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Location*	4. Description**

Annual Unified Program Certification

Dear Business Owner:

Chapter 6.95 of the California Health and Safety Code requires your Hazardous Materials Business Emergency Plan (HMBEP) to be reviewed and updated annually.

Please find your most recent Hazardous Materials Business Emergency Plan that you have in your possession somewhere within your records. This Plan should include Facility & Chemical Inventory information. Review the information carefully and confirm the accuracy of all your hazardous materials with the actual quantities. If there are no changes, mark the first box below that indicates no changes have been made and **return this page to above address** on the letterhead. This will serve as your official certification statement and update in accordance with Title 19, Section 2729 requirements.

Return this page and the updated forms to the address on the letterhead above.

CHECK THE APPROPRIATE BOX AND SIGN THE FORM BELOW

☐ **CHOICE ONE**: OUR BUSINESS HAS PREVIOUSLY FILED THE HAZARDOUS MATERIALS INVENTORY FORM PURSUANT TO SECTION 2729.2 AND 2729.3 REQUIREMENTS AND NO CHANGES HAVE BEEN MADE SINCE THEN:

SIGN & RETURN: By signing below, you are certifying that the information contained in the hazardous materials inventory most recently submitted to the Glendale CUPA is complete, accurate, and there has been no change in the quantity of hazardous material as reported in the most recently submitted Inventory.

☒ **CHOICE TWO:** OUR BUSINESS WOULD LIKE TO REPORT SOME CHANGES THAT WERE MADE:

☒ **Report Emergency Contact Change** - If recently your facility changed the two main contacts and their phone, you can make the appropriate corrections by printing their names and phone numbers below and return to us to above address.

Emergency Contact #1 & Phone #: GUS PRIETO (818) 355-5652 (818) 502-1480
Emergency Contact #2 & Phone #: MIKE REED (626) 716-7131 (818) 502-1480

☐ **Report Chemical Inventory Change** - Check this box if within the last 12 months new types of chemicals, hazardous liquids, solids, compressed gases, or hazardous waste have been added or deleted from your business operation. Go to Glendale Fire Department, Fire Prevention Section website http://fire.ci.glendale.ca.us/forms_applications.asp and find the forms necessary to update your status.

I certify under penalty of law, that I am the business owner or designated representative of the business, have reviewed the current hazardous materials inventory on file with the Glendale CUPA and certify the submitted information is accurate and complete.

Annual Unified Program Certification

Dear Business Owner:

Chapter 6.95 of the California Health and Safety Code requires your Hazardous Materials Business Emergency Plan (HMBEP) to be reviewed and updated annually.

Please find your most recent Hazardous Materials Business Emergency Plan that you have in your possession somewhere within your records. This Plan should include Facility & Chemical Inventory information. Review the information carefully and confirm the accuracy of all your hazardous materials with the actual quantities. If there are no changes, mark the first box below that indicates no changes have been made and **return this page to above address** on the letterhead. This will serve as your official certification statement and update in accordance with Title 19, Section 2729 requirements.

If you have made changes to your HMBEP, please check the "CHANGES HAVE BEEN MADE" box below **and return this page to above address** on the letterhead. The Fire Department will send you all of the appropriate forms necessary to update your status.

CHECK THE APPROPRIATE BOX AND SIGN THE FORM BELOW

☒ OUR BUSINESS HAS PREVIOUSLY FILED THE HAZARDOUS MATERIALS INVENTORY FORM PURSUANT TO SECTION 2729.2 AND 2729.3 REQUIREMENTS AND NO CHANGES HAVE BEEN MADE (all items must be correct):

1. The information contained in the hazardous materials inventory most recently submitted to the CUPA is complete, accurate, and up-to-date.
2. There has been no change in the quantity of hazardous material as reported in the most recently submitted Inventory.
3. No hazardous materials subject to inventory requirements and not listed on our most recently submitted inventory form are being handled.

☐ CHANGES HAVE BEEN MADE:

☒ **Emergency Contacts** - If within the last 12 months your facility changed the two main contacts and their phone, you can make the appropriate corrections by printing their names and phone numbers below and return to us to above address.

Emergency Contact #1 & Phone #: GUS PRIETO (818)355-5652-(24HR)(818)502-1480

Emergency Contact #2 & Phone #: MICHAEL REED (626) 286-5092 (818) 502-1480

☐ **Chemical Inventory** - Review your facility Chemical Inventory. Check this box if additional types of chemicals, hazardous liquids, solids, compressed gases, or hazardous waste have been added or deleted from your business operation. If chemicals have been added or deleted, The Fire Department **will e-mail** you all of the forms necessary to update your record.

I certify under penalty of law, that I am the business owner or officially designated representative of the business, have reviewed the current hazardous materials inventory on file with the Glendale Fire Department and certify the submitted information is true, accurate and complete.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility...	If Yes, please complete these pages of the UPCF....	
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 5 gallons for liquids, 50 pounds for solids, or 50 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4	• HAZARDOUS MATERIALS INVENTORY CHEMICAL DESCRIPTION • CONSOLIDATED CONTINGENCY PLAN (Section I and Site Map(s)) • TRAINING PLAN
B. UNDERGROUND STORAGE TANKS (USTs)		
1. Own or operate underground storage tanks?	☐ YES ☒ NO 5	• UST FACILITY • UST TANK (one page per tank)
2. Intend to upgrade existing or install new USTs?	☐ YES ☒ NO 6	• UST FACILITY • UST TANK (one per tank)
3. Need to report closing a UST?	☐ YES ☒ NO 7	• UST INSTALLATION - CERTIFICATE - OF COMPLIANCE (one page per tank) • UST TANK (closure portion –one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: ---any tank capacity is greater than 660 gallons, or ---the total capacity for the facility is greater than 1,320 gallons?	☒ YES ☐ NO 8	NO FORM REQUIRED TO CUPAs
D. HAZARDOUS WASTE		
1. Generate hazardous waste?	☒ YES ☐ NO 9	• EPA ID NUMBER – provide at the top of this page. • As a generator, answer YES to Item E2b and complete Waste Generator Form.
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES ☒ NO 10	• RECYCLABLE MATERIALS REPORT
3. Treat hazardous waste on site?	☐ YES ☒ NO 11	• ONSITE HAZARDOUS WASTE TREATMENT – FACILITY • ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12	• CERTIFICATION OF FINANCIAL ASSURANCE
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13	• REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14	• HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
E. LOCAL REQUIREMENTS 15		
1. REGULATED SUBSTANCES		
Have Regulated Substances (RS) including Extremely Hazardous Substances (EHS) stored on site at greater than the threshold planning quantities established by the California Accidental Release Program (Cal ARP) ?	☐ YES ☒ NO 15a	In addition to Hazardous Materials requirements, complete: • Regulated Substance Registration • Risk Management Plan (when required)
2. OTHER REQUIREMENTS		
a. Have hazardous materials stored on site at or above Uniform Fire Code permit amounts?	☐ YES ☒ NO 15b	• Consult attached Uniform Fire Code permit amounts

The Consolidated Contingency Plan provides businesses a format to comply with the emergency planning requirements of the following three written hazardous materials emergency response plans required in California:

- Hazardous Materials Business Plan (HSC Chapter 6.95 Section 25504 (b) and 19 CCR Sections 2729-2732),
- Hazardous Waste Generator Contingency Plan (22 CCR Section 66264.52), and,
- Underground Storage Tank Emergency Response Plan and Monitoring Program (23 CCR Sections 2632 and 2641).

This format is designed to reduce duplication in the preparation and use of emergency response plans at the same facility, and to improve the coordination between facility response personnel and local, state and federal emergency responders during an emergency. Use the chart below to determine which sections of the Consolidated Contingency Plan need to be completed for your facility. If you are unsure as to which programs your facility is subject to, refer to the Business Activities Page.

PROGRAMS	SECTION(S) TO BE COMPLETED
Hazardous Materials Business Plan (HMBP)	Cover Page, Section I, and Site Map(s)
Hazardous Waste Generator (HWG)	Cover Page, Section I, and Site Map(s)
Underground Storage Tank (UST)	Cover Page, Sections I and II, and Site Map(s)
HMBP, HWG, UST	Cover Page, Sections I and II, and Site Map(s)

A copy of the plan shall be submitted to your local CUPA and at least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency. Describe below where a copy of your Contingency Plan, including the hazardous material inventories and Site Map(s), is located at your business:

PLAN CERTIFICATION	
I certify under penalty of law that I have personally examined and I am familiar with the information provided by this plan and to the best of my knowledge the information is accurate, complete, and true.	
Printed Name of Owner/ Operator GUS PANOS	Title of Owner/Operator GENERAL MANAGER
Signature of Owner/ Operator X	Date 2-22-12

We appreciate the effort of local businesses in completing these plans and will assist in every possible way. If you have any questions, please contact the City of Santa Monica Environmental Programs.

III. EMERGENCY RESPONSE PLANS AND PROCEDURES

A. Notifications

Your business is required by State Law to provide an immediate verbal report of any release or threatened release of a hazardous material to local fire emergency response personnel, this Unified Program Agency (CUPA or PA), and the Office of Emergency Services. If you have a release or threatened release of hazardous materials, immediately call:

FIRE/PARAMEDICS/POLICE/SHERIFF
PHONE: 911

AFTER the local emergency response personnel are notified, you shall then notify the Santa Monica Unified Program Agency (CUPA) and the Office of Emergency Services.

City of Glendale CUPA:	**(818) 548-4030**
State Office of Emergency Service:	(800) 852-7550 or (916) 262-1621
National Response Center:	(800) 424-8802

Information to be provided during Notification:

- Your Name and the Telephone Number from where you are calling.
- Exact address of the release or threatened release.
- Date, time, cause, and type of incident (e.g. fire, air release, spill etc.)
- Material and quantity of the release, to the extent known.
- Current condition of the facility.
- Extent of injuries, if any.
- Possible hazards to public health and/ or the environment outside of the facility.

B. Emergency Medical Facility

List the local emergency medical facility that will be used by your business in the event of an accident or injury caused by a release or threatened release of hazardous material

HOSPITAL/CLINIC:	PHONE NO:
Glendale Memorial	(818) 502-1900
ADDRESS: 1420 S. Central	
CITY: Glendale	ZIP CODE: 91204

City of Glendale– Unified Program (CUPA) Agency
780 Flower Street, Glendale, CA 91201
CONSOLIDATED CONTINGENCY PLAN
SECTION I: BUSINESS PLAN and CONTINGENCY PLAN

C. Private Emergency Response

DOES YOUR BUSINESS HAVE A PRIVATE ON-SITE EMERGENCY RESPONSE TEAM? ☐ Yes ☒ No

If yes, provide an attachment that describes what policies and procedures your business will follow to notify your on-site emergency response team in the event of a release or threatened release of hazardous materials.

CLEANUP/DISPOSAL CONTRACTOR

List the contractor that will provide cleanup services in the event of a release.

NAME OF CONTRACTOR: Safety Kleen/Asbury	PHONE NO: (626) 575-4685
ADDRESS: 2918 Worthen Avenue	
CITY: Los Angeles	ZIP CODE: 90039

D. Arrangements With Emergency Responders

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements on the lines below:

E. Evacuation Plan

1. The following alarm signal(s) will be used to begin evacuation of the facility *(check all which apply)*:

☑ Verbal ☑ Telephone *(including cellular)* ☐ Alarm System ☑ Public Address System ☐ Intercom

☐ Pagers ☐ Portable Radio Other *(specify):*

2. Evacuation map is prominently displayed throughout the facility. ☒ Yes ☐ No

3. Individual(s) responsible for coordinating evacuation including spreading the alarm and confirming the business has been evacuated:

Service Manager

F. Earthquake Vulnerability

Identify areas of the facility where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☑ Hazardous Waste/ Hazardous Materials Storage Areas ☐ Production Floor ☐ Process Lines

☐ Bench/ Lab ☐ Waste Treatment Other:

Identify mechanical systems where releases could occur or would require immediate inspection or isolation because of the vulnerability to earthquake related ground motion.

☑ Utilities ☑ Sprinkler Systems ☑ Cabinets ☑ Shelves

☐ Racks ☑ Pressure Vessels ☑ Gas Cylinders ☑ Tanks

☐ Process Piping ☑ Shutoff Valves Other:

City of Glendale – Unified Program (CUPA) Agency
780 Flower Street, Glendale, CA 91201
CONSOLIDATED CONTINGENCY PLAN
SECTION I: BUSINESS PLAN and CONTINGENCY PLAN

G. Emergency Procedures

Briefly describe your business standard operating procedures in the event of a release or threatened release of hazardous materials:

1. **PREVENTION** (prevent the hazard) - Describe the kinds of hazards associated with the hazardous materials present at your facility. What actions would your business take to prevent these hazards from occurring? You may include a discussion of safety and storage procedures.

The prevention program includes employee training on safe handling and use of chemicals, using dedicated storage areas and approved containment methods. Periodic inspections are conducted as a means of identifying potential hazards which could result in a release or threatened release of hazmat.

2. **MITIGATION** (reduce the hazard) - Describe what is done to lessen the harm or the damage to person(s), property, or the environment, and prevent what has occurred from getting worse or spreading. What is your immediate response to a leak, spill, fire, explosion, or airborne release at your business?

Dealership procedures are outlined as follows:

Spill: 1 Report spill as required by regulations

2 Shut off sources of ignition

3 Contain the spill using absorbent material

4. Clean up spill/ dispose of contaminated absorbent

Fire: Report to Glendale Fire dept, then evacuate the facility.

3. **ABATEMENT** (remove the hazard) - Describe what you would do to stop and remove the hazard. How do you handle the complete process of stopping a release, cleaning up, and disposing of released materials at your facility?

Small spills will be cleaned up using spill absorbent. Contaminated absorbent is stored onsite in approved, properly labeled 55 gallon drums and ultimately disposed of by the facility's contracted, licensed hazardous waste hauler. Larger spills are contained by diking around the spill, or around any storm or sanitary sewer drains.

In addition, if the spill is due to the overhead oil distribution system, management will ensure the respective pump is shut off and secured.

City of Glendale – Unified Program (CUPA) Agency
780 Flower Street, Glendale, CA 91201
CONSOLIDATED CONTINGENCY PLAN
SECTION I: BUSINESS PLAN and CONTINGENCY PLAN

IV. Emergency Equipment

22 CCR, Section 66265.52(e) [as referenced by Section 66262.34(a)(3)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Location *	4. Description**
Personal Protective, Equipment, Safety Equipment, and First Aid Equipment	~Cartridge Respirators		
	~Chemical Monitoring Equipment *(describe)*

780 Flower Street, Glendale, CA 91201
CONSOLIDATED CONTINGENCY PLAN
SECTION I: BUSINESS PLAN and CONTINGENCY PLAN

V. EMPLOYEE TRAINING

All facilities which handle hazardous materials must have a written employee training plan. An outline of a typical plan has been provided below for you to complete and submit. The items listed below are required per Health and Safety Code Section 25504 (c) and Title 19 Section 2732.

Facility personnel are trained as follows:

▶	1. Familiarity with all plans and procedures specified in the Contingency Plan.
▶	2. Methods for Safe Handling of Hazardous Materials.
▶	3. Safety procedures in the event of a release or threatened release of a hazardous material.
▶	4. Use of Emergency Response equipment and supplies under the control of the business.
▶	5. Procedures for Coordination with local Emergency Response Organizations.

Training shall be provided:

- ▶ Initially for all new employees.
- ▶ Annually, including refresher courses, for all employees.

Note: These training programs may take into consideration the position of each employee.

Additional training should include:

- ▶ 1. Internal alarm/notification procedures.
- ▶ 2. Evacuation/re-entry procedures and assembly point locations.
- ▶ 3. Material Safety Data Sheet (MSDS) training including specific hazard(s) of each chemical to which employees may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption).*

VI. HAZARDOUS WASTE GENERATOR TRAINING

If your business is a hazardous waste generator, you are required to provide training in hazardous waste management for all workers who handle hazardous waste at your site (22 CCR §66265.16). You are also required to document training. The items below are required.

EMPLOYEE TRAINING
1. Facility personnel will successfully complete training within six months after the date of their employment or assignment to a facility or to a new position at a facility.
2. Employees will not handle hazardous wastes without supervision until trained.
TRAINING DOCUMENTATION
1. The owner or operator must maintain the following documents and records at the facility:
2. Job title for each position at the facility that is related to hazardous waste management, and the names of the employee(s) filling the position(s).
3. Description for each position listed above (must include required skill, education, or other qualifications as well as duties of employees assigned to the position.
4. Description of *type* and *amount* of both introductory and continuing training given to each employee.
5. Records that document that the requirements for training or job experience have been met.
6. Current employees' training records (to be retained until closure of the facility).
7. Former employees' training records (to be retained at least three years after termination of employment).

CERTIFIED UNIFIED PROGRAM AGENCY
NOTICE TO COMPLY

Business Name STAR MAZDA. **Date** 9.23.13

Address 1401 S. Brand Blvd.

City GLENDALE **Zip Code** 91204

Phone Number (818) 291-5160 **Inspection Contact** ERICK BONILLA.

Your attention is called to the following violation(s), which must be corrected in order to meet the minimum requirements for fire and life safety:

1) PAPER WORK RELATED TO WASTE disposal.
2) TANK INSPECTION LOG. FOR BOTH WASTE OIL AND NEW OIL.
3) FIRE DOOR CERTIFICATIONS.
4) TANK CERTIFICATIONS FOR ALL ABOVE GROUND TANKS.

CORRECTIONS. KEEP THE AREA AROUND THE WASTE CONTAINERS CLEAN.
THE CONTAINTOPS OR WASTE COOLANT NEEDS be kept clean.
KEEP area in front of the electric pumps clear for 3 feet.
KEEP WASTE OIL FILTER CONTAINER CLOSED.

EMAILED 12.17.13

You are hereby notified to correct the condition(s) listed above. A reinspection will be made on or about E. Bonilla 9.23.13
Failure to comply with this Notice may result in legal action filed against you by the City Attorney.

Inspector A. Yaghoubian Consent for the inspection was given by: E. Bonilla

I have received a copy of this notice 9.23.13
(Signature of Owner or Owner's Agent)

RETURN TO COMPLIANCE STATEMENT

Within 5 working days of correcting the violation(s), the person cited or an authorized representative shall sign the Notice to Comply certifying the violation(s) have been corrected, and return the Notice to the Glendale Fire Department.

Authorized Signature _____

LM05			X	Emergency equipment is tested and maintained in working order *(66265.33)*	

Comments, Observations, Violation Documentation

1) IF HAVENT DONE SO Complete CERS INSTRUCTIONS Provided
2) Disignate an area For Accumulation OF universal waste / IT NEEDS to be handled as Hazardous waste
3) Obtain a 5 year Perfessional engineer Certified for aboveground hazwaste Storage tank.
4) Provide Copy oh training Record
5) Provide INSPECTION Log For tank
6) General housekeeping around waste containers.

FIRE Prevention
Provide Copy oh Fire door Certification.

This report may identify conditions observed this dat date that are alleged to be violations of one or more sections at the California Health and safety code (HSC) or the California Code of Regulations (CCR). Title 22 relating to the management and /or treatment of hazardous waste. If any corrections are need to the initial notification, the facility will submit a revised notification within 30 days to the Glendale Fire Department. Maintain a copy of current HMBP on site (CCR 2729.1)			
A. BUSINESS INFORMATION (CCR 2729.1 – 2729.5)			
	1. Correct inaccurate information and/or supply missing information in Business Owner/Operator Identification Page.		
	2. Sign certification statement		
B. CHEMICAL INVENTORY (CCR 2729.1 – 2729.5)			
	1. Revise Inventory Statement to reflect actual inventory on site. Undisclosed chemicals over the reporting threshold 100% or more increase in quantity		
	2. Correct inaccurate information and/or supply missing information regarding the hazardous materials listed		
C. SITE MAPS (CCR 2729.2 and Appendix A)			
	1. Indicate location of chemicals on storage plan/map.		IN CERS
	2. Supply missing items on plan/map.		
	3. Revise plan/map to reasonably reflect actual layout.		
D. EMERGENCY RESPONSE PLAN (CCR 2731)			
	1. Establish a written Emergency Response Plan		IN CERS
	2. Maintain Emergency Response Plan on-site.		
	3. Revise Plan to include all required elements		
	4. Correct inaccurate/out of date information		
E. EMPLOYEE TRAINING (CCR 2732)			
	1. Establish a written Employee Training Plan.		IN CERS
	2 Maintain Employee Training Plan on-site		
	3. Revise Plan to include all required elements		
	4. Correct inaccurate/out of date information		
	5. Maintain training records of employees.

HAZARDOUS WASTE TANK SYSTEM WRITTEN ASSESSMENT TEMPORARY EXEMPTION APPLICATION

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 22 California Code of Regulations (CCR), Section 66265.192(j)

California hazardous waste regulations require that a hazardous waste tank system operated by large quantity generator or onsite hazardous waste treatment facility have a written assessment certified by professional engineer (PE) prior to being placed in service. The owner/operator of an aboveground tank system that is either RCRA-exempt or holds non-RCRA hazardous waste may apply to the local Certified Unified Program Agency (CUPA) for an extension of up to 36 months to the deadline for submittal of the written assessment. This form must be used to apply for such an extension. You should first review the Unidocs document titled "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." That document and CUPA/local HazMat agency jurisdiction and contact information are available at **www.unidocs.org**. Complete a separate form for each tank system. If the local CUPA and Fire Marshal authority are not the same agency, you must first obtain sign-off from the Fire Marshal or his/her authorized representative in Section 7, below, then forward the application to the CUPA.

1. Facility Name (Tank Site): STAR MAZDA EPA ID No.: CAD981445158
   Address: 1401 S Brand Blvd City: GLENDALE Zip: 91204
2. What is the tank volume in gallons? _____
3. What type of waste does this tank hold? ☒ Used oil; ☐ Used Antifreeze; ☐ Other *(Specify)*: _____
4. Does this tank system have secondary containment capable of containing 100% of the contents of the tank and ancillary piping volume? ☒ Yes; ☐ No.
5. Is this tank system exposed to precipitation? ☐ Yes; ☒ No. If "Yes," does the secondary containment system have sufficient capacity, in addition to that required above, to contain infiltration from a 25-year, 24-hour rainfall event? ☒ Yes; ☐ No.
6. Is the tank system secondary containment provided with a leak detection system designed and operated so that it will detect either the failure of the primary and secondary containment structure or any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours? ☒ Yes; ☐ No.
7. **FIRE MARSHAL APPROVAL: Our agency has approved the design and installation of this tank system.**

Fire Marshal or Representative's Name (Print)	Fire Marshal or Representative's Signature	Date

APPLICANT CERTIFICATION: I have read the Unidocs "Hazardous Waste Tank System Requirements for Large Quantity Generators and Onsite Treatment Facilities." I certify that the tank system for which this exemption is being requested is an aboveground tank (i.e., 90% or more of the total system volume is above-grade) and the tank system is either RCRA-exempt or the waste it holds is a non-RCRA hazardous waste. I have attached a drawing of the layout of the tank facility (e.g., Hazardous Materials Business Plan Site Plan/Storage Map) with the location of this tank and any associated piping runs (other than vent lines and vertical fill tubes) clearly identified. I declare that the above information is correct to the best of my knowledge. I agree to comply with all applicable state laws and regulations relating to the operation and management of this tank system. I represent the: ☒ Tank Owner; ☒ Tank Operator

WASTE OIL STORAGE TANK CERTIFICATION

STAR MAZDA

1401 S. Brand Blvd.
Glendale, CA 91204

August26, 2016

STAR MAZDA

1401 South Brand Blvd.
Glendale, CA 91204

WASTE OIL TANK CERTIFICATION

Date of Inspection: August 16, 2016

Purpose of Inspection: Certification of one tank and secondary containment as per the requirements of 22CCR Sec. 66265.192

Findings:

1. The facility is a service shop attached to Mazda car dealer. The waste oil collection tank is located inside a concrete block secondary containment outside the shop and under an owning.
2. Waste oil is transferred from the shop to the tank via an air diaphragm pump installed on top of the tank and connected to the shop by 1" diameter flex hose.
3. The discharge line from the pump to the tank is also 1" diameter flex hose.
4. The tank is a double wall rectangular horizontal steel tank. There are access openings to the tank and to the outside.
5. The tank is equipped with level switch, vent and pressure relief valve. The level switch is wired to the air pump to prevent over fill.
6. No treatment for the collected waste oil is done on site. Licensed Hazardous Waste Transportation Company is called as needed with vacuum truck to transfer the waste to licensed recycling facilities using waste manifest.
7. The tank off load is done with a vacuum truck through existing 6" diameter port.
8. The tank- at the time of inspection – was found in good condition. The same was the pump and connections.

TABLE (1)

TANKS SCHEDULE

Loc.	Description and contents	Capacity Gallons	Outside Dimensions	Tank Material Wall Thick.
1	Waste Oil Storage Tank Double walled	480	3'-1" X 8'-11" X X 3''-1" High	Carbon Steel 1/8"

Table (2)

Tanks Assessment

Applicable Articles of CCR22 Section 66265.192	Assessment	Remarks
66265.192 (a)		
(1) Design standard(s), if available, according to which the tank(s) and ancillary equipment were constructed	The tank is several years old. No design standards were available. But in general the tank as it appears were built according to the common industry standards for steel tanks fabrication.	Design requirements are structure strength and compatibility. The tank material is compatible with the waste oil.
(2) Hazardous characteristics of waste to be handled	The waste oil is not corrosive or reactive. It have a pH close to neutral.	Tank's material is compatible with the solution handled.
(3)(B) Corrosion protection measures	No need to take any corrosion resistance measure.	
(4) Underground components	Not Applicable	The tank is installed on reinforced concrete slab.
(5) Design considerations to assure that: A. Tanks foundation will maintain the load of full tanks	The tank has four C-channel legs running across the width of the tank and setting directly on the concrete slab. Calculated maximum concentrated load on the slab is 168 psi.	Concrete slab compression strength is 2,000 psi (as minimum) which is way higher than the maximum load from the waste oil tank legs.
B. Tanks system to be anchored to prevent floatation or dislodgment. Anchoring/ hold downs to resist Seismic horizontal forces	The tank is not anchored to the concrete slab. Dislodgment is not an issue with this tank because it is double wall and any leak will be contained in the outside shell.	
C. Tanks system to withstand frost heave	Not applicable	

66265.192(b) (1-6) Inspection for weld cracks, corrosion, punctures, cracks, corrosion or other damage	The undersigned ran a detailed visual inspection on the tank. No visible corrosion, punctures, cracks or weld cracks were noticed.	The rusted spots appear to be superficial and no penetration of rust was found.
66265.192(c) Tanks in contact with ground soil	Not applicable.	Tank is above ground on concrete slab.
66265.192 (d) All Tanks and ancillary equipment to be tested for tightness prior to being in use.	At the time of inspection the tank was under normal operation conditions. The only ancillary equipment is the air diaphragm pump to transfer the waste oil from the shop to the tank and it is installed on tank top. Inlet and outlet pump connections are both flexible hoses	We cannot see a need for pressurized testing at this time. The tank is operating under atmospheric pressure. There is a vent and uncapped discharge 6"Ø opening.
66265.192 (e) Ancillary equipment shall be supported and protected against physical damage and excessive vibrations, expansion and contraction.	The air diaphragm pump is installed over a steel bracket attached to the tank top. Inlet and outlet of the pump are flexible hoses which act as vibration insulation. No considerable vibrations will be transferred to the tank structure.	Tank is operating at ambient temperature. No considerable expansion/ contraction are expected to affect the integrity of the tank
66265.192 (f) Corrosion Protection	No corrosion protection is needed. See 3(B)	
66265.192 (h) (1-2) On ground tank systems authorized under PBR or CA shall have an assessment based on 66265.192 (k) is in file at the facility.	This assessment will be kept on files at the site all the time and is accessible to any inspector.	The certification is valid for 5 years starting from the day of inspection unless in case of tanks addition/ replacement or changes in the system.
66265.192 (k-1) A drawing of the tanks configuration as well as description of the material of construction and gross capacity	See the attached drawing.	

66265.192 (k)(2)(C) and (k)(2)(D) Description of all tanks , piping and internal parts	See Table (1) of this report and the attached drawing.	
66265.192 (K)(2)(E) Sketches and drawings of all hazardous waste tanks	See the attached drawing and Table (1)	
66265.192 (K)(3) Age of the tanks	Estimated 9-10 Years	
66265.192 (k) (4) Description and evaluation of any leak detection equipment	No leak detection equipment are existing. However, there is an inspection port to check for leak from the interior shell to the outside shell. Weekly inspection is recommended for any existence of fluid in the cavity between the two shells. Simple method is using flash light and dip stick. Any leak found shall be reported and repair action shall be taken.	Any leak from the outside shell through the exterior walls can be easily noticed by the employees. Corrective action shall be taken immediately.
66265.192 (k) (5) Description and evaluation of any corrosion protection equipment, devices or material	Considering the physical properties of the waste oil, there is no need for any further corrosion protection	
66265.192 (K) (6) Description and evaluation of any spill prevention or overfill prevention equipment.	The waste oil is transferred to the tank through air diaphragm pump controlled by a level switch to prevent overfill.	We consider the existence of the level switch adequate as an overfill prevention equipment.
66265.192(k)(7) Description and evaluation of the secondary containment	For description of the secondary containment, please see the attached drawing. Secondary containment evaluation is on page 6	
66265.192(k)(8) Hazardous Characteristics of the waste(s) that have been or will be handled	The tank subject of this report is used and will be used in the future for waste oil storage only.	Waste oil has pH very close to neutral

66265.192 (k) (9) Independent qualified professional engineer to inspect the system for the following: (A) Weld cracks or breaks (B) Scrapes of protective coating (C) Corrosion (D) Any structural damage or inadequacy construction or installation, cracks, punctures or damaged fittings	At the time of inspection no weld cracks, corrosion or structural damage were noticed. Also no damages were noticed due to Tank handling or installation	We suggest that the outside of the tank to be cleaned and repaint with rust resistance metal paint.
66265.192 (k) (10) All new tanks and ancillary equipment shall be tested for tightness prior to being in use. Results of test(s) shall be documented in this assessment.	Not Applicable.	
66265.192 (K)(11) Estimated remaining life of the tank.	10-12 Years	Note that at any time the scheduled inspection reveals noticeable deterioration or damage in any of these tanks; it shall be repaired or replaced. In case of leak, the subject tank shall be pulled out of operation immediately

Secondary Containment Assessment

The tank is double wall. No further secondary containment is needed.

The existing concrete block wall, 28" high can be considered as a redundancy.

Conclusion:
The secondary containment capacity and material are adequate.

CERTIFICATION OF WASTE OIL STORAGE TANK
For
STAR MAZDA.
1401 S. Brand Blvd.
Glendale, CA 91204

The Waste Oil Storage Tank and its outer shell secondary containment identified and assessed in this report and the attached drawing, were inspected in accordance with the provisions of California Code of Regulations Title 22 CCR Section 66265.192. The date of inspections is August 16, 2016
Based on this inspection, the tank and its secondary containment shell at the time of inspection appears to be in compliance with the applicable requirements of Title 22 CCR Sections 66265.192.
The concrete block secondary containment –considered in this case as a redundant- was found in good shape. No cracks or structural damage were noted.

This assessment is certified by an independent, qualified Professional Engineer registered in the State of California, in accordance with section 66270.11(d)

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations

BUILDING SECTION

Application to Alter ☑ **Repair** ☐ **Demolish** ☐ **or Move** ☐

PLANS AND SPECIFICATIONS AND OTHER DATA MUST ALSO BE FILED

Application is hereby made to the Superintendent of Buildings of the City of Glendale for the approval of this detailed statement of specifications herewith submitted for the alteration, repair, demolition or moving of the building herein described. All provisions of the building ordinances and state laws shall be complied with in the alteration of said building, whether herein specified or not. It is also understood that the granting of a permit on this application does not grant any right or privilege for the alteration, repair or demolition of the building herein described, on any public street or alley or on any land or portion thereof, the title or right of possession to which is in litigation by, or is disputed by the City, County or State; or as giving or granting any right or privilege to use the said structure or building for any purpose which is or may hereafter be prohibited by ordinance of the City of Glendale. A DOUBLE FEE WILL BE CHARGED IF JOB IS STARTED BEFORE PERMIT IS ISSUED. PLUMBING, ELECTRICAL AND PLASTERING PERMITS ARE NOT COVERED BY THIS APPLICATION.

Robert U. Hutchinson Lt. Al.
1401 D. Brand Blvd.
Glendale, California

Re: 1401 D. Brand Blvd.

Dear Mr. Hutchinson:

The Building Section has made an inspection of the structure at the referenced address because of a recent fire. It has been determined by the inspection that the commercial garage building is unsafe and a hazard to safety and public welfare and dangerous to human life.

The structure is a nuisance within the terms of Section 203 (a) of the Glendale Building Code and is hereby required to be repaired under permits issued by the Building Section. In accordance with Section 203 (b) of the Glendale Building Code you are requested to take corrective action within 60 days of receipt of this notice.

If you wish to discuss our requirements further, we will be glad to review our findings with you or a qualified civil or structural engineer of your choice. However, we must request that the meeting be held within 30 days.

Further particulars regarding the facts as outlined above may be obtained at this office. Please do not hesitate to call for any assistance or clarification that we may be able to provide.

Very truly yours,

RE: 1401 S. Brand C #11465

Dear Citizens:

As a result of a referral, an inspection of the commercial garage at 1401 S. Brand was made by a representative of the Building Section on 11-25-87. The inspection revealed that certain conditions exist which are in violation of the Glendale Building Code as adopted by Ordinance 4380 as evidenced by waste water spilling over sidewalk into gutter. Correction requires that you:

Secure the services of a licensed contractor, obtain a permit and have all work made to comply with the requirements of the Glendale Building Code.

Install a trench drain or a burm to direct water into existing drain.

In accordance with the provisions of Chapter 3 of Volume I of the Glendale Building Code you are hereby required to obtain the necessary permits and commence corrective action within 30 days of receipt of this notice. If you have any questions regarding this letter please do not hesitate to call Patrick Doherty at 956-3938 for any clarifications you may require.

Very truly yours,

Alexander C. Pyper

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and that my license is in full force and effect.

License Class _____ License No._____Contractor's Signature_____Date_____

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division

of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

At the time of final inspection, the inspector shall verify the installation of smoke detectors in all sleeping rooms and hallways leading thereto. Battery operated smoke detectors are acceptable in existing construction.

*** No rooftop equipment will be allowed unless the applicant obtains a separate variance or administrative exception from the Planning Division. Issuance of this permit shall not be construed as an approval to install equipment on the roof without a variance or administrative exception.
*** Issuance of trade permits, without complete architectural plans, shall not constitute a waiver of any provisions of the building or zoning codes of the City of Glendale. It is soley the responsibilty of the applicant to verify that proposed installations are in compliance with the regulations of all applicable codes or else obtain written approval for any deviation from the regulations.

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

1401 S BRAND BLVD,

LICENSED CONTRACTORS DECLARATION

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Prof. code , and t[illegible]e is in full force and effect.

License Class _____ License No._____Contractor's Signature_____Date_____

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division

of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.) I have or plan to contract with the following person (company) to provide the proposed construction:

The person signing for this permit acknowledges that there are NO Oak, Bay or Sycamore Trees with trunks larger than an eight inch (8") diameter within a twenty foot (20 ft.) influence of the proposed construction.

1401 S BRAND BLVD,

*** No rooftop equipment will be allowed unless the applicant obtains a separate variance or administrative exception from the Planning Division. Issuance of this permit shall not be construed as an approval to install equipment on the roof without a variance or administrative exception.

*** Issuance of trade permits, without complete architectural plans, shall not constitute a waiver of any provisions of the building or zoning codes of the City of Glendale. It is soley the responsibilty of the applicant to verify that proposed installations are in compliance with the regulations of all applicable codes or else obtain written approval for any deviation from the regulations.

*** Upon completion of the work authorized by this permit, the permittee shall notify the Building Inspection office of such completion by requesting the Final inspection. Such request can be made by calling (818)548-4836. The permittee is hereby advised that they may be entitled to reimbursement of the permit fees if the city fails to conduct an inspection of the permitted work within 60 days of the request for final inspection.

***No construction is permitted before 7 a.m., nor after 7 p.m., Monday through Saturday. No construction is permitted on Sundays or on holidays. (Mun. Code Sec. 8.36.080).

The City of Glendale restricts issuance of the building permit to the property owner or licensed general contractor only. Signatures of this individual must be verified by personal identification. Any person signing the permit application as agent for the owner or contractor shall have an original letter of authorization at the time of permit issuance.

Applications Shall expire 180 days after the date of submittal unless excepted by sec. 107.4 of the Glendale Building Code, and thereafter, any documents submitted to the department shall be returned to the applicant or destroyed by the building official. Upon written request from the applicant, the building official may extend the period of permit application.

LICENSED CONTRACTORS DECLARATION

07

I hereby affirm, under penalty of perjury, that I am licenced under the provisions of Chapter 9 (starting with Section 7000) of Division 3 o fthe Bus. & Pro[illegible] that my license is in full force and effect.

License Class C-39 License No. 541069 Contractor's Signature Patrick M. Kounch Date 10-17-07

OWNER - BUILDER DECLARATION

As the property owner and builder of the proposed project ('owner-builder') you are the responsible party of record on this permit. Building permits are not required to be signed by property owners unless they are personally performing their own work. If your work is being performed by someone other than yourself, you may protect yourself from possible liability if that person applies for the proper permit in his or her name. Contractors are required by law to be licensed and bonded by the State of California and to have a business license from the City of Glendale. They are also required by law to put their license number on all permits for which they apply. If you plan to do your own work, with the exception of various trades that you plan to subcontract, you should be aware that if you employ or otherwise engage any persons other than your immediate family, and the work (including materials and other costs) is $200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then you may be an employer. If you are an employer, you must register with the state and federal government as an employer and you are subject to several obligations including state and federal income tax withholding, federal social security taxes, workers compensation insurance, disability insurance costs, and unemployment compensation contributions. There may be financial risks for you if you do not carry out these obligations, and these risks are especially serious with respect to workers' compensation insurance. For more specific information about your obligations under federal law, contact the Internal Revenue Service (and, if you wish, the U.S. Small Business Administration). For more specific information about your obligations under state law, contact the Department of Benefit Payments and the Division of Industrial Accidents. If the structure is intended for sale, property owners who are not licensed contractors are allowed to perform their work personally or through their own employees, without a licensed contractor or subcontractor, only under limited conditions. A frequent practice of unlicensed persons professing to be contractors is to secure an 'owner-builder' building permit, erroneously implying that the property owner is providing his or her own labor and material personally. Information about licensed contractors may be obtained by contacting the Contractors' State License Board in your community or at 1020 N Street, Sacramento, California 95814. Note: The current mailing address of the Contractors State License Board is P.O. Box 26000, Sacramento, California 95826.

Section 7031.5 of the Bus. & Prof. Code requires the permit applicant to sign a statement above or claim exemption from the Contractor's license Law and state the basis for such exemption. Violations of this section subjects the applicant to a civil penalty of not more than five hundred dollars ($500). I hereby affirm that I have read the paragraph above and willfully accept the responsibility of an owner-builder. I further affirm, under penalty of perjury, that I am exempt from the Contractor's License Law for the following reason:

_____ INITIAL I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

_____ INITIAL I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractors License Law.). I have or plan to contract with the following person (company) to provide the proposed construction:

Name_____ Address_____ Phone_____ Contractors Lic. No._____

_____ INITIAL I, as owner of the property, plan to provide portions of the work but I have or plan to contract with the following person(s) /(company(ies)) to provide the work indicated.

Name_____ Address_____ Phone_____ Type of work_____

Name_____ Address_____ Phone_____ Type of work_____

GLENDALE, CA 91204
File Number: 113.0783

Dear Sir/Madam:

As you are already aware, the California Regional Water Quality Control Board, Los Angeles Region ("Regional Board") staff conducted an assessment of your company or property ("company") to determine the extent of solvent usage and assess past and current chemical handling practices. Your company is one of approximately 1,400 companies which have received a Regional Board "Site Inspection-No Further Action" letter. This letter was issued based on a determination that your company used few or no chemicals, had no observed chemical handling problems or indications of waste discharge, and did not have historical site use concerns.

The purpose of this letter is to inform you that, based on the information provided to U.S. EPA by the Regional Board to date, you will not be asked by the U.S. EPA or the Regional Board to participate in the regional groundwater cleanup projects currently planned for the San Fernando Valley. **Your company is no longer part of the U.S. EPA Superfund process and the Regional Board and the U.S. EPA plan no further action involving your company.**

You may be contacted by those potentially responsible parties ("PRPs") that have been asked to participate in the groundwater cleanup efforts. In the event you are contacted by PRPs, please feel free to contact the appropriate Regional Board or U.S. EPA staff to see if we can assist you.

The phone numbers of Regional Board and U.S. EPA staff are provided on the enclosed contact list.

Yours,

Felicia Marcus

WELL INVESTIGATION PROGRAM - INITIAL CLARIFIER INSPECTION ALLEN GWYNN CHEVROLET, 1400 S. BRAND BLVD., GLENDALE (FILE NO. 113.0787)

We are in receipt of your consultant's, Martin Environmental Services, letter (dated December 19, 1995), which contains the analytical test results of sludge samples obtained from a clarifier at the subject site. We have reviewed the analytical results, and find that no further action is required at this time. However, you are required to notify this board of any changes in your operation at this facility including the use and handling of chemicals or processing and disposal of waste.

If you have any questions, please contact Dr. Kwang Lee at (213) 266-7563.

Re: Allen Gwynn Chevrolet
1400 S. Brand Blvd.
Glendale, Ca. 91204

Dear Kwang,

Pursuant to your request, we are pleased to present the following chain of events and submittals on behalf of Allen Gwynn Chevrolet.

Date: 12-7-95

Service: Sample stages one and two of clarifier. Submit samples to Aton Laboratories for EPA, 8010 analysis (see chain of custody, Item A). All sampling protocol was utilized i.e. new, poly coated glass jars, clean calawasa, no head room in sample, sampled from bottom, samples iced, and submitted with sample blank. Witnessing sampling were Tim Gaylord (Allen Gwynn Chevrolet), George Ulfers (Aton Labs), Kwang Lee (Water Quality Control Board) and Neil Frumkin (Martin Environmental Services).

Date: 12-12-95

Service: Review 8010 analytical results (see results, Item B) with Kwang Lee. It is determined that VOC's were not present in the samples analyzed from the clarifier.

The (3) stage clarifier is then pumped and cleaned. Once emptied of all liquids and solids, each chamber of the clarifier was inspected and examined for cracks by Kwang Lee, Tim Gaylord and Neil Frumkin. No signs of deterioration or leakage were found. Liquids pumped, were transported to DeMenno/Kerdoon on uniform hazardous waste manifest, number 95868895 (see Item C) for recycling.

P.O. Box 1128, Canyon Country, CA 91351 (800) 624-9136 • (805) 287-3737 • FAX (805) 287-3998
Waste Management, Transportation & Remedial Services

Conclusion

Based on all of the above facts, it is, in our opinion, that VOC contamination could not be found at this property due to the analytical results, the excellent condition of the interior walls and bottoms of the clarifier and the regular maintenance schedule followed by Allen Gwynn Chevrolet.

Kwang, please feel free to contact me if you have any questions or comments regarding this information.

I am available at any time for any additional assistance you may require.

Sincerely,

Neil Frumkin
Sales & Marketing Manager

WELL INVESTIGATION PROGRAM - INITIAL SOIL GAS SURVEY WORKPLAN ALLEN GWYNN CHEVROLET, 1400 S. BRAND BLVD., GLENDALE (FILE NO. 113.0787)

We have received your correspondence, dated July 15, 1995, concerning submittal of the initial soil gas survey workplan that was requested in our letter of June 16, 1995. After reviewing your letter and the information in the correspondence, we have reconsidered the soil gas survey workplan requirement, and have determined that the submittal of the workplan would not be required at this time. However, you are required to do visual inspection on the industrial waste clarifier, and sampling and analysis of clarifier sludge for volatile organic compounds (VOCs) to determine the possibility of VOCs contamination to the underlying soils. This evaluation can be completed with your next routine pump out date, but no later than **December 22, 1995**.

Please notify us at least one week prior to the date you plan to do the field work, so we may schedule our staff to be present.

If you have any questions, please contact Dr. Kwang Lee at (213) 266-7563.

CALIFORNIA REGIONAL WATER
QUALITY CONTROL BOARD
LOS ANGELES REGION

7/15/95

Dear Mr. Kwey:

In your letter of June 16, 1995 you noted that one of your inspectors "observed the following condition that may have resulted in soils and possible groundwater contamination:

- In the body shop area, there is a paint booth. The washwater used in the paint booth was running out on the ground. Nearby the paint booth, there is an industrial wastewater clarifier. It is our experience that industrial waste clarifier has shown to be a point source of contamination to soil and/or groundwater."

The letter goes on to state that, based upon the above, this dealership is required to conduct an "initial subsurface investigation".

I am writing to respond to the comments of your inspector and to question any requirement for this dealership to perform a subsurface investigation.

First, with regard to supposed washwater exiting our paint booth we do periodically wet down this booth and some of this wetdown water may exit the booth. Since we do not store any hazardous chemicals inside the spray booth I see no reason to believe that any of this wetdown water would reasonably be the cause of soil and/or groundwater contamination.

Second, while it is true that we operate a clarifier, it is essentially identical to units found at nearly all automobile service facilities. Our clarifier receives runoff from our auto wash operation and later discharges effluent to the municipal sanitary sewer system. WE HAVE PREVIOUSLY ANALYZED THE MATERIALS WHICH ACCUMULATE IN THIS CLARIFIER AND HAVE FOUND THEM TO BE NON-HAZARDOUS. For your convenience, a copy of these test results is attached.

Considering the purpose for which this clarifier has been installed we think it unreasonable to conclude that costly soil vapor testing is warranted.

In summary, Allen Gwynn Chevrolet has long been quite sensitive to environmental issues and has taken positive steps to properly manage our hazardous materials. The operations referred to in your letter are routine and we believe it is unreasonable to conclude that they pose some special risk to soil or groundwater. Consequently, in the absence of any specific indication of trouble, we see no reason why we should be forced to incur costs that others in an identical position need not incur.

I appreciate your attention to this matter and look forward to discussing it with you at your convenience.

Sincerely,

James Bacon

James Bacon,
President Allen Gwynn Chevrolet

Glendale, CA 91204

WELL INVESTIGATION PROGRAM - SITE INSPECTION
ALLEN GWYNN CHEVROLET, 1400 S. BRAND BLVD., GLENDALE (FILE NO. 113.0787)

On June 9, 1995, your facility was inspected by a member of this Regional Board's staff. The inspection focused mainly on past and present methods used for handling chemicals and wastes at your facility.

During the site visit, the inspector observed the following condition that may have resulted in soils and possible ground water contamination:

o. In the body shop area, there was a paint booth. The wash water used in the paint booth was running out on the ground. Nearby the paint booth, there was an industrial waste clarifier. It is our experience that industrial waste clarifier has shown to be a point source of contamination to soil and/or ground water.

The major concern of this Agency's Well Investigation Program is to determine possible sources contributing to pollution in nearby drinking water wells. The program is comprehensive, since even small discharges may have significant additive effects on the quality of ground water in the area.

Based on the observation, we have decided that the initial subsurface investigation is needed to determine whether environmental releases associated with past operations at this facility has occurred. Therefore, you are required to develop a work plan for conducting an initial subsurface investigation at the above-mentioned areas, **using a soil gas survey**.

Enclosed are the "WORK PLAN REQUIREMENTS FOR ACTIVE SOIL GAS INVESTIGATION" and "PARTIAL LIST OF SOIL GAS CONSULTANTS". Your work plan must comply with the requirements. Please note that retaining a consultant from this list does not assure acceptance of that consultant's work. The Regional Board reserves the authority to review any consultant's work to assure compliance with all applicable statutes, regulations, guidelines, and orders.

Three copies of your workplan are due to this Board no later than **August 4, 1995.**

If you have any questions, please contact Dr. Kwang Lee at (213) 266-7563.

V. COMMENTS (Make sure questionnaires are complete, attach another page if necessary for your comments)

ON JUNE 9, 1995, THE SITE WAS INSPECTED. THE SITE WAS A CHEVROLET CAR DEALER HAVING CAR REPAIR SERVICE. AT THE SITE, THERE WERE OFFICE, CAR REPAIR AREA AND BODY SHOP HAVING A PAINT BOOTH. WASTED FILTER DRUMS, ABOVE-GROUND MOTOR OIL AND WASTE OIL TANKS WERE LOCATED IN THE REPAIR AREA. AT THE BODY SHOP, THERE WERE A CHEMICAL CABINET HAVING PAINT THINNER, TWO WASTE DRUMS (E.G., XYLENE), CLARIFIER AND PAINT BOOTH. BUT, DURING THE INSPECTION, STAFF OBSERVED THAT WASHED WATER USED INSIDE THE PAINT BOOTH WAS RUNNING OUT FROM THE PAINT BOOTH. STAFF CLASSIFIED AS P2.

Require: 1) INITIAL SOIL GAS SURVEY WORK PLAN.

Appendix K

Subject Property Photographs

Appendix K
Subject Property Photographs

The Subject Property is located at 1401 S. Brand Blvd. in the City of Glendale, California. The Subject Property is occupied by an approximately 1.25-acre auto dealership with an auto service/repair area.

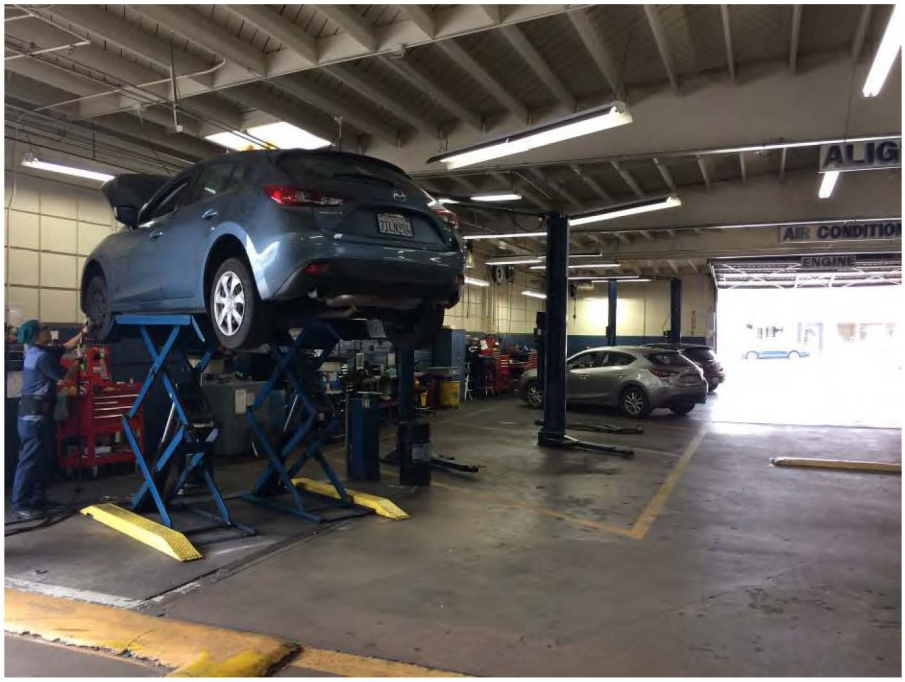

The central and eastern portions of the Subject Property are used for new car parking by the auto dealership.

The business owner intends to replace the existing showroom and offices in the northeastern portion of the Subject Property with a new auto showroom and offices.

The western portions of the Subject Property are used for auto repair and service.

AST for automatic transmission fluid observed along the western side of the service building.

ASTs for motor oil and automatic transmission fluid observed along the western side of the service building.

ASTs for motor oil and automatic transmission fluid observed in the southeast corner of the service building.

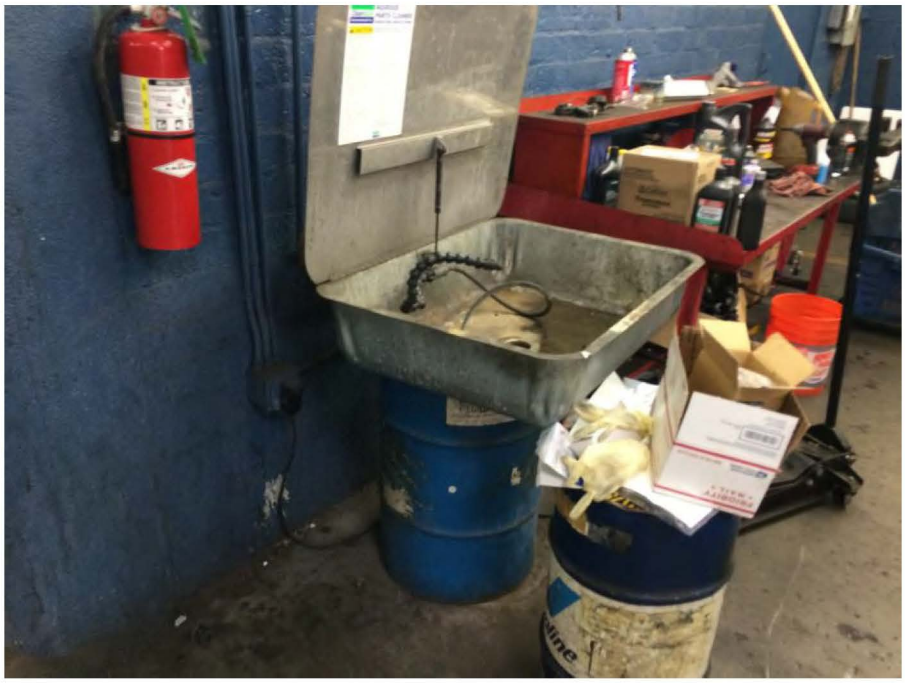

AST for waste motor oil observed outside the southeast corner of the service building.

Drums of used oil filters and used coolant over secondary containment observed in the southeast corner of the service building. Staining observed on concrete floor.

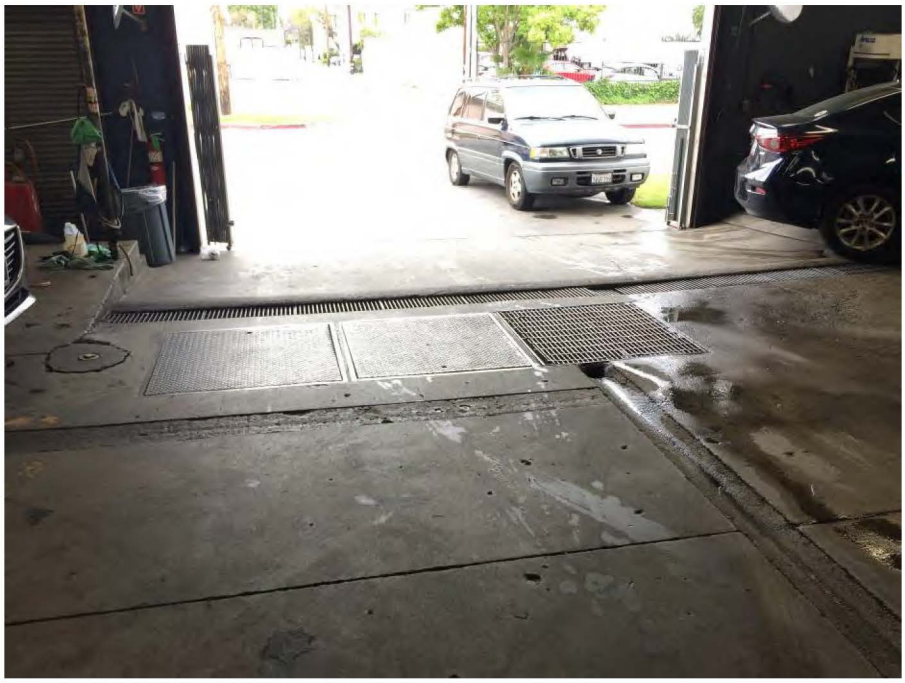

A self-contained EMC parts washer which is no longer in use was observed in the southeast portion of the service area building. The business owner was not aware of the degreasing solvent historically used in this unit.

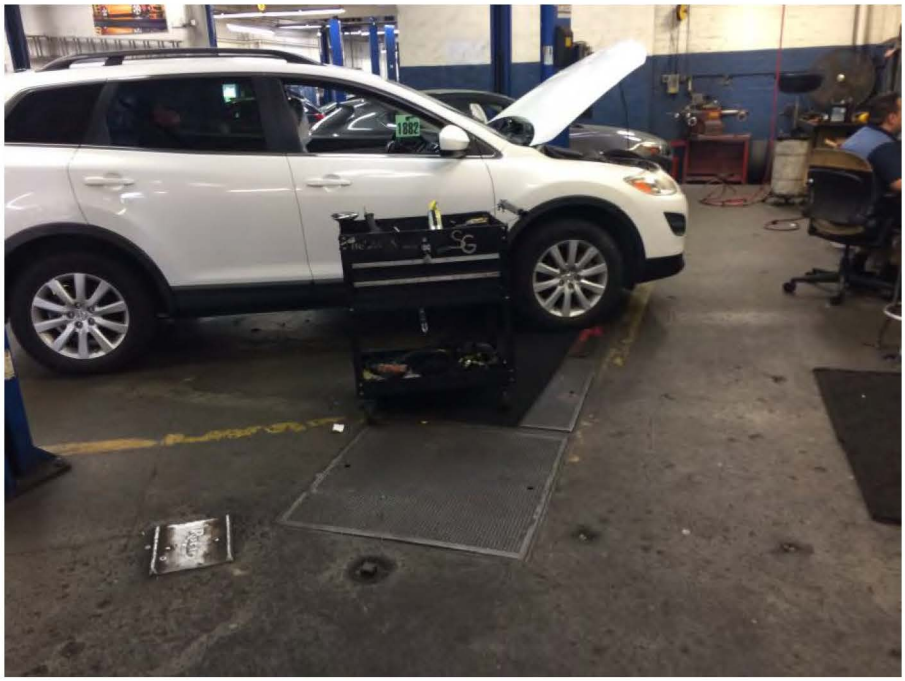

Two self-contained, drum-mounted CleanTech parts washers which use an aqueous degreaser were observed in the northwest and central areas of the service building.

Batteries are stored in the parts storage area adjacent to the service area, with used batteries stored in secondary containment.

One 3-compartment clarifier is located at the south end of the building; this clarifier is currently used for collecting runoff from car washing activities and may have historically collected runoff associated with paint booth operations. A containment trench drain is present adjacent to the clarifier.

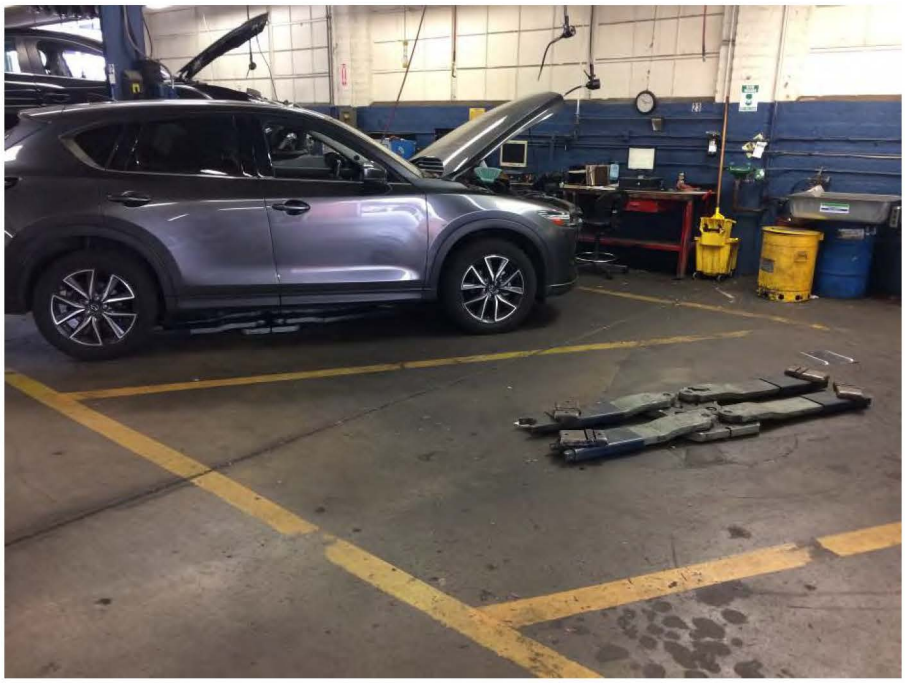

A second clarifier is centrally located in the service area in an area where oil changes are conducted but has not actively been used for several years.

Concrete patches were observed throughout the service area where previously in-ground hoists had previously been removed and replaced with aboveground hoists. Additional concrete patches of unclear origin were observed throughout the service building.

Two remaining in-ground hoists are present in the northern portion of the service area.

A concrete patch was visible in the northwestern corner of the Subject Property where a former UST was removed in 1986.

Pole-mounted transformers were observed in the alleyway on the west side of the Subject Property.

W. Los Feliz Rd. is located immediately north of the Subject Property. Commercial businesses, including U-Haul, are farther north of the Subject Property. A Subaru auto dealership is located northeast of the Subject property.

S. Brand Blvd. is immediately east of the Subject Property. A Chevrolet auto dealership is farther east of the Subject Property.

W. Laurel St. is immediately south of the Subject Property. Commercial businesses, including an American Red Cross and a car dealership are farther south of the Subject Property. An Enterprise Rent-A-Car is located southeast of the Subject Property.

An alleyway, parking for the Subject Property, and Glendale Memorial Hospital are located immediately west of the Subject Property. S. Central Ave and an apartment complex are farther west of the Subject Property.
