County Clerk
County of: NA

Project Title: Expansion of Pop-Up Gear Testing in the Brown Box Crab and King Crab Fisheries and Addition of Target Species Scarlet King Crab and Spiny King Crab (Kim Sawicki/Sustainable Seas Technology, Commission Tracking #2023-01)

Project Location: Waters off the coast of California between the California/Oregon border (42° N. latitude) and U.S./Mexico border (32° 32' N. latitude).

Project Location - City: NA

Project Location - County: Multiple

Description of Nature, Purpose and Beneficiaries of Project:

An approved experimental fishing permit (commission tracking #2023-01) tests pop-up fishing systems in an experimental fishery targeting brown box crab (*Lopholithodes foraminatus*) and California king crab (*Paralithodes californiensis*). The EFP is used to collect information on the effects and efficacy of using pop-up fishing systems and to collect biological and fishery data to help fill critical information gaps for the three species. Any changes to the approved EFP are subject to review by the California Department of Fish and Wildlife and approval by the California Fish and Game Commission.

At the request of the permit holder, the project revises the permit terms and conditions to allow expanded testing within the experimental fisheries, add additional target species (scarlet king crab, *Lithodes couesi* and spiny king crab, *Paralithodes rathbuni*), and allow additional concurrent commercial fishing with non-experimental fishing permit gears.

Name of Public Agency Approving Project: California Fish and Game Commission

Name of Person or Agency Carrying Out Project: California Department of Fish and Wildlife

Exempt Status (check one):

- Ministerial (Sec. 21080(b)(1); 15268);
- Declared Emergency (Sec. 21080(b)(3); 15269(a));
- Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
- Categorical Exemption: Class 6, California Code of Regulations, Title 14, Section 15306
- Statutory Exemptions. State code number:

Reasons why Project is exempt: See attachment.

Lead Agency: California Fish and Game Commission

Contact Person: Melissa Miller-Henson

Telephone: (916) 653-4899

If filed by applicant:

1. Attach certified document of exemption finding.
2. Has a notice of exemption been filed by the public agency approving the project? Yes No

Signature:  Date: February 19, 2026 Title: Executive Director

Signed by Lead Agency

Signed by Applicant.

Regarding Expansion of Pop-Up Gear Testing in the
Brown Box Crab and King Crab Fisheries and
Addition of Target Species Scarlet King Crab and Spiny King Crab
(Kim Sawicki/Sustainable Seas Technology, Commission Tracking #2023-01)**

The California Fish and Game Commission (Commission) has taken final action under the California Fish and Game Code and the Administrative Procedure Act with respect to the experimental fishing permit (EFP) major amendment for the above-referenced project on February 11, 2026. In taking its final action for the purposes of the California Environmental Quality Act (CEQA; Public Resources Code, Section 21000 et seq.), the Commission authorized the California Department of Fish and Wildlife (Department) to amend a Tier 4 EFP for the project in accordance with Section 91, Title 14, California Code of Regulations (CCR), relying on the Class 6 categorical exemption for “Information Collection” contained in the CEQA Guidelines (Section 15306, Title 14, CCR).

Categorical Exemption for Information Collection

Section 15306, Title 14, CCR provides a categorical exemption for information collection projects that consist of basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource (Class 6 exemption). The section goes on to note that these information collection projects may be strictly for information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted, or funded.

The purpose of the project is to allow fishers and scientific partners to obtain limited, short-term exemptions from state fishing laws and regulations to engage in experimental commercial or recreational marine fishing activities that are otherwise prohibited, to inform fisheries management. Specifically, the amended EFP will allow expanded testing within the experimental fisheries, including by expanding the geographic scope statewide; add an additional target species (scarlet king crab, *Lithodes couesi*); and allow additional concurrent commercial fishing with non-EFP gears.

EFPs may be approved for one or a combination of the following purposes: research, education, limited testing, data collection, compensation fishing, conservation engineering, and exploratory fishing. All activities conducted under the EFP must comply with the terms and conditions placed on the permit for research purposes and the conservation and management of marine resources and the environment. As such, the project is the proper subject of CEQA’s Class 6 categorical exemption.

All activities authorized under the EFP Program are specifically prohibited from adversely impacting any established fisheries, marine living resources, or other natural resources under the provisions of California Fish and Game Code, Section 1022. An EFP shall be revoked if the continued use would have an adverse impact on any resource or allocation of a resource, or other adverse impact to established fisheries or other marine living resources (Fish and Game Code, Section 1022, subdivision (a)(2)). Therefore, the exceptions set forth in Section 15300.2, Title 14, CCR that would preclude the use of the categorical exemption do not apply and no further review is required.
