

# Summary Form for Electronic Document Submittal

**Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Patterson Reservoir Remediation Project

Lead Agency: Alameda County Water District

Contact Name: Dorota Budzynska

Email: dorota.budzynska@acwd.com

Phone Number: 510-668-4420

Project Location: Fremont

*City*

Alameda

*County*

Project Description (Proposed actions, location, and/or consequences).

The Patterson Reservoir Remediation Project will restore storage capacity and maximize the operating water level while providing sufficient freeboard for the Reservoir as required by the California Department of Water Resources, Division of Safety of Dams (DSOD). The project involves constructing earthen berms on the east and west side of the existing Reservoir, tying into high ground on the north and south sides to create a ring around the Reservoir. To facilitate construction activities, existing utilities would be protected-in-place, relocated, or removed from service. Project construction is anticipated to take approximately 6 months between Spring 2027 and Fall 2027.

The Project site is located at Patterson Reservoir along Patterson Road, off Paseo Padre Parkway in the City of Fremont, between Coyote Hills Regional Park and Dumbarton Quarry Campground, north of Highway 84, California.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Mitigation measures necessary to avoid the potentially significant effects on the environment are included in the attached Initial Study, which is hereby incorporated and fully made part of this Mitigated Negative Declaration.

Some of the potential project effects include:

- Dust emissions mitigated by watering the surface, limiting speed to 15 mph
- Avoid and minimize effects to biological resources mitigated by conducting environmental awareness training
- Worker environmental awareness program training for cultural and tribal resources

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.
