Project Title: Emergency Permit for Management of Hazardous Waste, 20Bloc LLC, Thousand Oaks, California

Project Location: 2495 Teller Road, Thousand Oaks, California 93065

County: Ventura

Project Applicant: Bjorn Lund, Facility Engineer

Approval Action Under Consideration by DTSC: Emergency Permit

Statutory Authority: California Health and Safety Code, Chapter 6.5

Project Description: The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under California Code of Regulations (CCR), Title 22, Division 4.5, Chapter 20, Sec. 66270.61, has issued an Emergency Permit to 20Bloc LLC, (EPA ID# CAD059221036) to treat hazardous waste through a controlled reaction with chemical solutions. Specifically, seven (7) 1-liter containers of Diethyl Ether; one (1) 4-liter container, five (5) 1-liter containers, and two (2) 500-milliliter containers of Tetrahydrofuran; and one (1) 1-liter container of 1,4 Dioxane must be stabilized prior to transport to an authorized hazardous waste treatment, storage, and disposal facility.

These chemicals are currently being stored at 20Bloc LLC located at 2495 Teller Road, Thousand Oaks, California 93065. DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued for Clean Harbors Environmental Services (Clean Harbors) to chemically stabilize the hazardous waste prior to storage and eventual transportation off-site.

State of California – California Environmental Protection Agency
Department of Toxic Substances Control

Background: The containers have peroxide formation present on either the inside, outside, or the bottom of the chemicals' containers, as well as the thread container caps. The presence of peroxide formation may be unstable at relatively low concentrations, resulting in fire and/or explosion if improperly handled. Due to the presence of peroxide formation, DTSC considers these chemicals to be an imminent and substantial endangerment to human health and the environment. Chemical stabilization is recommended prior to transport to a permitted treatment, storage, and disposal facility.

Project Activities: The treatment of these hazardous wastes involves the addition of a solution to the containers in a controlled manner to reduce the reactive or ignitable characteristics of the chemicals. Treatment will take place within a designated exclusion zone. Only technicians from Clean Harbors will be allowed in the exclusion zone. Movement, preparation, and treatment of the containers will be in accordance with established standards.

Within 10 business days of the expiration of this permit, 20Bloc LLC will submit a final report, signed in accordance with Title 22, CCR Sec. 66270.11(d). The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment and all generated waste has been properly managed. The Emergency Permit is effective beginning March 16, 2026 and shall expire on May 15, 2026.

Name of Public Agency Approving Project: Department of Toxic Substances Control

Name of Person or Agency Carrying Out Project: Clean Harbors Environmental Services

Exempt Status: Emergency Project Public Resources Code (PRC), Sec. 21080(b)(4); 14 CCR, Sec.15269(b)(c)

Reasons Why Project is Exempt: This action is necessary to prevent an emergency. Chemical stabilization of these chemicals is necessary prior to transportation to an authorized hazardous waste treatment, storage, and disposal facility to prevent accidental fire and/or explosion during transport.
