Riverside

*County*

Project Description (Proposed actions, location, and/or consequences).

The Menifee Union School District (MUSD) is proposing the construction of a new elementary school on approximately 20 acres at the intersection of McCall Boulevard and Valley Boulevard, located in the City of Menifee. The proposed project involves the construction of a new TK-5 elementary school with an estimated student capacity of 800 students, including up to 34 classrooms, administration offices, library, kitchen, multipurpose room, playfields/playgrounds, and a 200-stall parking lot with a student pickup/drop off areas. The school site will be accessed from Valley Boulevard which will be extended from McCall Boulevard along the northern boundary of the school site.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant effects to tribal cultural resources were identified and monitoring during excavation activities as mitigation was imposed. Mitigation is expected to reduce the effects to less than significant for tribal cultural resources.

Potentially significant effects to biological resources were identified on the burrowing owl protected species and a burrowing owl survey 30-days prior to ground disturbance was imposed as mitigation. Mitigation is expected to reduce the effects to less than significant for biological resources.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy have been raised.

Provide a list of the responsible or trustee agencies for the project.

California Department of the State Architect is a responsible agency for this project.
