Project Details

Updated Solomon Hills Project Description Summary and Other Updates for Solstra Consultants for Use in Amending Resource/Constraints Technical Reports

June 23, 2025

PLEASE INCLUDE THE BELOW PROJECT DESCRIPTION SUMMARY INTO TECHNICAL REPORTS OTHER INFORMATION HEREIN MAY BE REFERENCED OR USED BUT NOT MODIFIED. REFERENCE PLANS/DOCUMENTS NOTED IN SECTION 7 ARE FORTHCOMING

Project Background

The Santa Barbara County Planning Commission unanimously voted to accept a General Plan Amendment and Rezone application for processing in support of the Solomon Hills Project on March 8, 2023. This application acceptance allowed the further study of the Project more closely to demonstrate how the area is suitable for development. Extensive resource and infrastructure studies have been conducted to establish a new 1,616-acre urban area with access, utilities and other public services largely outside of public viewsheds. Based on the outcome of these studies and adherence to the County's Comprehensive Plan, the Project is designed to provide a mix of much needed attainable housing in a new sustainably designed community, inclusive of new parks, open space, new habitat conservation and restoration areas.

Project Description Summary

The Solomon Hills Project proposes to create Santa Barbara County's first new community that will result in a sustainable, resilient and healthy environment for its residents. The Project establishes a holistic framework for Smart Growth with a redevelopment of private lands historically used for grazing and oil and gas production. It's proposed Specific Plan includes the design and implementation of a central village closely surrounded by several neighborhoods, office and commercial space, a TK-8 school, fire/sheriff station, parks, open space and public trails to allow walking and biking as an easy alternative to vehicle transport.

The Project's proposed Specific Plan allows for a balance of land uses primarily serving working families allowing 4,000 single and multi-family residential units, 650,000 square feet of commercial retail and office use and space, 25.5-acres of public and institutional uses and space, and 1,023 acres of recreational and open space uses. Critical infrastructure includes water supply and a water reclamation facility, interchange improvements along Hwy 101, additional secondary access along Hwy 101 and Hwy 135 and several active and passive parks and public trails. Public benefits include developer sponsored Affordable housing near commercial and transportation access points, utility and access improvements that minimize traffic impacts to neighboring properties, new public trail access into the Orcutt Hills, recreational improvements and public access to the Newlove Picnic Grounds, the preservation of open space ridgelines and valleys for habitat protection and the abandonment and remediation of all oilfield features and operations. The Project is designed to be built in four (4) buildout phases over a fourteen-year period for the orderly delivery of the Project. Phased grading, access, utility, horizontal and public improvements are scheduled ahead of and to align with the same buildout phases.

Key Facts and Statistics about the Project

1. **Project Area**. The Project Area is located adjacent to and west of Highway 101, south of Orcutt by 0.7 miles, east of Highway 135 by 2 miles and north of Los Alamos by 6 miles. It encompasses portions of 5 legal parcels owned by Solstra Inc., including APN's 101-020-041, 043, 085, 086, and 087 totaling 4,195.2

acres. The Project Area is currently zoned AG-II-100 with a Land Use Designation of Agricultural Commercial (AC).

2. **Proposed Land Use Applications**. The owner and applicant, Solstra Communities California, LLC, is requesting the approval of the following legislative acts and land use cases:
   - The certification of a Programmatic Environmental Impact Report (PEIR),
   - General Plan Amendment (GPA) establishing the 1,616-acre Solomon Hills Specific Plan land use designation and new urban area;
   - Rezone (RZN) establishing a mix of new zone districts within the Specific Plan,
   - Specific Plan (SPP) detailing the zone district development standards, Objective Design Standards and Guidelines, post entitlement and implementation procedures,
     - *Please refer to the Solomon Hills Specific Plan by RRM dated (XX, XX, XXXX)*
   - Development Agreement (DA) for a 25-year development horizon and use of new Development Impact Fees,
     - *Please refer to the Development Agreement by Andrew Fogg, dated (XX, XX, XXXX)*
   - Vesting Tentative Map (VTTM) for the creation of large lot Planning Areas that identify future residential, commercial and public/institutional areas, common areas, open space areas and access and utility easements and connections,
     - *Please refer to the VTTM by RRM dated (XX, XX, XXXX)*
   - Conveyance Tentative Map (CTTM) for the purpose of the creation of large lots for early financing,
     - *Please refer to the CTTM by RRM dated (XX, XX, XXXX)*
   - Development Plan (DVP) to allow for well abandonment or re-abandonment and soil remediation surrounding approximately 80 oil & gas related features in the Specific Plan Area,
     - *Please refer to the Phase 1, Phase 2 and IRAP by Waterstone Environmental, dated (XX, XX, XXXX) related to the existing conditions and remediation program.*
   - Conditional Use Permit (CUP) for the installation of a wet weather basin and associated improvements,
     - *Please refer to the CUP/Preliminary Grading & Drainage Plans by RRM dated (XX, XX, XXXX)*
   - Conditional Use Permit for improvements to the existing New Love picnic grounds,
     - *Please refer to the CUP/Preliminary Grading & Drainage Plans by RRM dated (XX, XX, XXXX)*
   - Road Naming (RDN) for the naming of new private roads,
   - General Plan Consistency (GOV),
   - Board of Architectural Review (BAR) review of tract grading and landscaping, and Objective Design Standards and Design Guidelines within the Specific Plan, and, a
   - Land Use Permit (LUP) for offsite water line improvements
     - *Please refer to the LUP/Preliminary Grading & Drainage Plans by Wallace Group dated (May 25, 2025)*

3. **Project Objectives**[1]. The Project's primary and underlying purpose is to create a new community with a range of housing types, and a mix of commercial, office, public, quasi-public, recreational and open space uses. The Project's general objectives are as follows:
   - To maximize the opportunity to redevelop the Specific Plan Area from historic oil and gas operations to a vibrant new community to provide Santa Barbara County with significant new housing stock at densities that utilize and support the associated school, commercial, office, and public and open space uses.
   - To create a safe, walkable and bikeable community with cutting-edge sustainability, other design features and a balance of critical uses (residential, commercial, public/institutional) to support a healthy lifestyle for residents by promoting walking, biking and other alternative transportation,

[1] The general Project Objectives are subject to further clarification based on pending resource and constraints studies and Project refinement.

water and energy savings, safe alternative transit features such as extensive separated bike lanes and walkways, and fire-hardening and other design features which reduce wildfire risks.

- To deliver 4,000 new housing units for all segments of the population, particularly to address the current affordability gap for working families while promoting a strong job/housing balance with approximately 125,000 square feet of commercial retail and 525,000 square feet of commercial office.
- To facilitate the safe abandonment, or re-abandonment of oil and gas activity in the Specific Plan Area to promote consistency with California's 'managed decline' of fossil fuel extraction through the creation of a significant new community in the County.
- To cluster development with sufficient density and scale to designate substantial areas of open space and for habitat conservation, while also allowing for the creation of significant recreational amenities such as parks and recreation centers and a robust multi-modal paved and unpaved trail system to allow for walking, hiking, and cycling throughout the community, fostering an active and healthy outdoor-oriented lifestyle for residents.

4. **Phasing**. The Project includes a Phasing Plan for improvements that follows the orderly delivery of the Project, as is described in the attached chart[2]. Buildout improvements include future Projects approved with subsequent DVP's and/or TPM's within each large lot Planning Area. The components of the Project that are to be implemented over the four (4) phases are as follows:
   - Market Rate Residential Units
   - Affordable Housing Units
   - Retail and Office Commercial
   - Public/Institutional Uses
   - Infrastructure
   - Parks and Public Trails
   - Grading, VTTM Recordation and Large Lot Horizonal Tract Improvements include:
     - Vegetation Removal and Mitigation
     - Soil Remediation and Oil Well Abandonment or Re-abandonment
     - Streets, Curbs, Gutters, Utilities, Public Trails and Storm Water Controls
   - The start and duration of buildout phases are proposed below and the first phase is proposed to start within three years of all entitlement approvals by the County and LAFCO which are anticipated by the end of 2027. The post entitlement review and approval of improvement plans and tract recordation, and the subsequent review and approval of Planning Area DVP's and TPM's for the first buildout phase is anticipated to take approximately 2-years and grading and remediation of the first phase buildout area is anticipated to take approximately 1-year.
     - Phase 1 Buildout: 2031 – 2035 (5.2 years)
     - Phase 2 Buildout: 2036 – 2038 (2.9 years)
     - Phase 3 Buildout: 2039 – 2044 (5.7 years)
     - Phase 4 Buildout: 2045 (1 year)

5. **Specific Plan Area Allowable Uses and Densities**. Pursuant to Government Code Sections 65450–65457, the Solomon Hills Specific Plan (SHSP) proposes a land use plan and zone districts with associated goals, policies, and development standards to guide future development within the proposed Specific Plan boundary. Land uses are proposed, as follows, that include residential, commercial, institutional, recreational and open space as well as infrastructure that has been designed to accommodate the land uses.
   - Single-Family Residential uses are allowed in four (4) zone districts with a maximum density of 7.7 dwelling units per acre on a total of 406 acres.

[2] See Solomon Hills (PHASING PLAN) dated June 9, 2025

- Multi-Family Residential uses are allowed in two (2) zone districts with a maximum density of 24 dwelling units per acre on a total of 48 acres.
- Retail and Commercial Office uses are allowed in four (4) zone districts totaling approximately 650,000 square feet on a total of 36 acres.
- Public/Institutional uses are allowed in one (1) zone district on a total of 26 acres.
- Parks and Open Space uses are allowed in two (2) zone districts on a total of 1023 acres.

6. **Offsite Work & Areas**. The term 'offsite' herein refers to improvements or activities related to the Project that are outside of the Specific Plan Boundary. Existing zoning and land use designations will remain on all offsite areas and all improvements or activities, along with remaining oil and gas operations will continue with sufficient buffers, and shall be governed by in part by the Orcutt Community Plan and the Land Use & Development Code. Offsite areas are intentionally not included in the new Urban boundary so that a rural buffer remains which removes the potential for development expansion. The categories of offsite work include: 1) primary and secondary access improvements, 2) utility improvements for water, electricity, gas and telecommunications, 3) habitat protection for CTS mitigation and oak habitat mitigation, or 4) recreational improvements.

   - **Primary Access Improvements.** Primary access improvements include a new Highway 101 interchange approximately 2.3 miles south of the existing Clark Avenue/Hwy 101 interchange.
     - Construction of an overpass over Hwy 101 for both north and southbound ingress/egress along with acceleration and deceleration improvements within the existing Caltrans ROW, and,
     - 1 ~10-acre proposed easement area for public Hwy Interchange and Landscape Improvements to the east of the existing Caltrans ROW.

   - **Secondary Solomon Summit Improvements**. Public Improvements to the existing Solomon Summit Interchange within the Caltrans Right of Way consisting of road and landscape improvements.
     - 0.5 miles of private access and landscape frontage improvements within a 10.1-acre existing easement area (Union Oil) that parallels the west side of Hwy 101 from the southeastern border of the VTTM boundary to the Solomon Summit interchange

   - **Secondary Bicknell Road Improvements.** Secondary access improvements include connecting the western edge of the Specific Plan boundary to Highway 135 along Bicknell, Graciosa to San Antonio Road.
     - 1.1 miles of road access and landscape improvements along Bicknell Road (private) within an existing private roadway on Lot 1 including one culvert repair.
     - 2.3 miles of private access and landscape improvements within an existing 23.4-acre existing easement area (Premiere Agricultural Properties) west from the western edge of Lot 1 along Bicknell Road (private) to Graciosa Road
     - 1.8 miles of public access and landscape improvements within Graciosa Road (public) to San Antonio Road @ Hwy 135 (precise scope *TBD County Public Works*).
     - Public improvements to the Hwy 135/San Antonio Road intersection consisting of road and landscape improvements (precise scope *TBD Caltrans*)

   - **Utility Improvements – Water (Refer to Wallace Group "Solomon Hills Development Water Supply Pipeline" Plans dated June 19, 2025)**
     - <1 mile of the proposed underground Water Line Alignment Project on Lot 2 starting at the northern edge of Lot 2 and terminating at the Specific Plan Boundary in the vicinity of Orcutt Hill Road.
     - 9.3-miles of the proposed underground Water Line Alignment Project from the Tanglewood Turnout to the northern edge of Lot 2, to also include:
       - 1 Water Pump Station improvement on APN 105-330-001 (Orcutt Fee).

- 1 Water Pump Station and Tank Improvements on APN 101-020-077 (PCEC).

- **Utility Improvements – Electrical**
  - XX miles of overhead electrical lines within an existing easement on Lot 2 commencing at the western edge of Lot 2 and ending at the Specific Plan Boundary
  - XX miles of overhead electrical lines within an existing easement on APN 101-020-080 commencing at the Divide Substation and ending at the western edge of Lot 2.

- **Utility Improvements – Natural Gas**
  - 1.5 miles of proposed underground natural gas utilities on Lot 2 commencing at the northern edge of Lot 2 and ending at the western edge of the Specific Plan Boundary
  - 2.5-miles of proposed underground natural gas line extension commencing from Rice Ranch Road/Orcutt Hills Road to the northern edge of Lot 2 generally following Orcutt Hill Road and within an existing right of way (public).

- **Utility Improvements – Telecommunications**
  - 1.5 miles of proposed underground telecommunications utilities on Lot 2 commencing at the northern edge of Lot 2 and ending at the western edge of the Specific Plan Boundary
  - 2.5-miles of proposed underground telecommunications utilities from Rice Ranch Road/Orcutt Hills Road to the northern edge of Lot 2 generally following Orcutt Hill Road and within an existing right of way (public).

- **Utility Improvements – Storm Water** (Newlove Basin and Spray Fields – 25CUP-00006) one public recycled water public facility to be dedicated to the Laguna County Sanitation District to include a basin for 39.5 acre-feet of recycled water storage during periods of wet weather of approximately 7.5 acres. Water in the basin will be used for irrigation purposes, the basin will include a geosynthetic liner. Water will be delivered to the basin via an extension of the recycled water distribution system located within the Specific Plan boundary. A recycled water pump station will be installed immediately adjacent to the basin with a triplex pumping system capable of delivering 800 gallons per minute back to the recycled water distribution system serving the Solomon Hills development and Newlove Park. A 24-acre spray field will be developed west of and adjacent to water storage basin. Water held in the basin will be sent either to the adjacent spray field or returned to the recycled water distribution system for irrigation in other recycled water use areas. The spray field will consist of a piped sprinkler system split into separate irrigation blocks (for operational flexibility) with shallow buried mainline PVC pipes delivering water to above ground irrigation laterals feeding individual sprinkler heads. Grading consists of 155,420 cubic yards of cut, 11,400 cubic yards of fill and 144,000 cubic yards of export.

- **Habitat Protection – CTS Easements**
  - One 298-acre conservation easement for CTS and Western Spadefoot Toad for compensatory mitigation on Lot 2
  - One 208-acre conservation easement for CTS and Western Spadefoot Toad for compensatory mitigation on Lot 3

- **Habitat Protection – Oak Woodland Management (Creation or Enhancement – Refer to Dudek's Tree Acreage and Area Counts Jan 2025)**
  - 35.9 acres of oak woodland creation on Lot 1
  - 51.1-acres of oak woodland creation on Lot 2
  - 39.9 acres of oak woodland creation on Lot 3
  - 137.5-acres of oak woodland enhancement on Lot 1

- **Recreational Improvements** (Newlove Picnic Grounds – 25CUP-00006) improvements to the existing Newlove Picnic Grounds for rural recreational uses including the dedication of a 31-acre public access easement, and public trail segment, multi-use fields for soccer; pickleball courts; a playground; a 2-acre recreational lawn; improved parking spaces for 110 vehicles, an unimproved parking area for overflow parking; fencing and signage; utility connections for sewer and water; vegetation and tree removal; access improvements with retaining walls to allow for two-way vehicle and bicycle traffic and a sidewalk for pedestrians; secondary emergency access improvements and landscape plantings and irrigation and the re-abandonment of one (1) existing and abandoned oil well immediately adjacent to the 31-acre easement area to CalGEM standards for access. Grading consists of 56,340 cubic yards of cut and 68,660 cubic yards of fill and 12,320 cubic yards of import, along with storm water improvements.

7. **Reference Documents**. Please refer to the following plans and documents that further describe and/or depict the Project (to be updated in July 2025)

COUNTY OF SANTA BARBARA, CALIFORNIA
VESTING TENTATIVE TRACT MAP NO. TM 14,909
PLANNING CASE NO. 24TRM-00006

VICINITY MAP N.T.S.

BENCHMARK

THE BENCHMARK FOR THIS SURVEY IS THE TOP OF A MAG NAIL AND SHINER AT THE CENTER OF A PAINTED "X", SET AT THE ENTRANCE TO LAS FLORES RANCH PARK ALONG HIGHWAY 101, IN THE NORTHERLY EDGE OF PAVEMENT. SAID POINT IS KNOWN AS NUMBER 6, WITH AN ELEVATION ESTABLISHED VIA OPUS SOLUTION (NAVD88). ELEVATION IS 940.86 FEET.

BASIS OF BEARING

THE BASIS OF BEARINGS FOR VESTING TENTATIVE TRACT MAP NO. 14,909 BEING RECORD DATA AS SHOWN ON RECORD OF SURVEY, R.S. 145/77-79.

EXISTING PARCEL INFORMATION

TOTAL	4,195.20 AC			

PROJECT DESCRIPTION

THIS PROJECT PROPOSES TO SUBDIVIDE THREE PARCELS (101-020-041 AND 043, AND 101-020-085 THROUGH 87) INTO 150 LOTS AND THREE REMAINDERS. THIS WILL RESULT IN SUBDIVIDING 1,615.6 ACRES INTO 150 LOTS. REMAINDER PARCEL 1 WILL CONTAIN 1,399.93 ACRES AND REMAINDER PARCEL 2 WILL CONTAIN 692.92 ACRES AND REMAINDER PARCEL 3 WILL CONTAIN 287.4 ACRES. THE REMAINDER PARCELS WILL RETAIN THEIR EXISTING GENERAL PLAN DESIGNATIONS AND ZONING. THE SUBDIVISION OF 1,615.6 ACRES WILL SUPPORT APPROXIMATELY 4,000 NEW HOMES, 125,000 SQUARE FEET OF SUPPORTIVE COMMERCIAL USES, AND 525,000 SQUARE FEET OF OFFICE SPACE SUBJECT TO BOARD OF SUPERVISORS APPROVAL OF ACCOMPANYING ENTITLEMENT APPLICATIONS. THE PROJECT PROPOSES PUBLIC/INSTITUTIONAL USES, INCLUDING A WATER RECLAMATION FACILITY, FIRE STATION/SHERIFF SUBSTATION, AND A SCHOOL. SEE PROPOSED LAND USE AND LOTS PER TABLE BELOW:

DESIGNATION	LOT NUMBER	TOTAL LOTS	TOTAL ACRES	PERCENT OF SUBTOTAL ACREAGE

EARTHWORK BALANCE NECESSITATES BORROWING OR STOCKPILING FOR ANY PHASE FROM ANY OTHER GIVEN PHASE.

QUANTITY ESTIMATES ON THESE PLANS ARE TO BE USED FOR PERMIT PURPOSES ONLY. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO VERIFY ACTUAL QUANTITIES FOR THE PURPOSE OF CONSTRUCTION.

THE RAW EARTHWORK QUANTITIES SHOWN HEREON REPRESENT THE ESTIMATED VOLUMETRIC DIFFERENCE BETWEEN THE PROPOSED ROUGH GRADE AND THE LIMITED TOPOGRAPHIC EXISTING GRADES. THESE ESTIMATES DO NOT MAKE CONSIDERATIONS FOR LOSSES OR BULKING DUE TO: SHRINKAGE, SOIL AMENDMENTS, STABILIZATION, CONSTRUCTION TECHNIQUE, FOOTING & TRENCHING SPOILS, PROPOSED ROAD SECTION, ETC. THESE, IN ADDITION TO ACTUAL FIELD CONDITIONS AND THE FINAL RECOMMENDATIONS OF THE SOILS ENGINEER MAY SIGNIFICANTLY EFFECT THE FINAL IMPORT/EXPORT QUANTITIES.

GRADING PHASING NOTES

1. SEE GRADING & DRAINAGE PLAN FOR STREET SECTION REFERENCES AND NAMES.
2. GRADING PHASES ARE DIFFERENT FROM DEVELOPMENT PHASES. REFER TO SHEET C-9 FOR CONSTRUCTION PHASING. PROPOSED GRADING AREAS WERE DELINEATED IN ORDER TO BALANCE EACH EARTHWORK PHASE INDIVIDUALLY.
3. SHRINKAGE FACTOR ASSUMED TO BE 20% FOR PLANNING PURPOSES.
4. CONTOURS SHOWN ON A 10' INTERVAL.

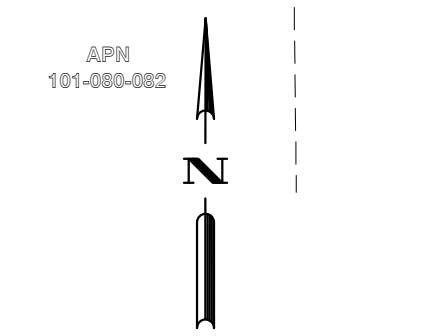
Appendix I



Active Offsite Oil & Gas Wells within One Kilometer of Project

ACTIVE WELLS

WELL MAP
3,200 ft Setback
Solomon Hills

DATE: JUNE 25, 2025

SCALE IN FEET
1 inch = 1,500 ft.

WELL LOCATIONS SHOWN HEREON PER CALGEM'S ONLINE WELL STATEWIDE TRACKING AND REPORTING SYSTEM (WELLSTAR) DATABASE AS OF JUNE 25, 2025.

LEGEND:

- C-#000 — WELL LOCATION
- EXISTING PARCEL LINE
- SPECIFIC PLAN AREA BOUNDARY LINE
- LIMITS OF DEVELOPMENT AREA
- 3,200 FEET SETBACK LINE (TO NEAREST DEVELOPMENT AREA)

Appendix K

SBCAPCD Construction Mitigation Measures

ATTACHMENT A
FUGITIVE DUST CONTROL MEASURES

Projects involving earthmoving activities are expected to manage fugitive dust emissions such that emissions do not exceed APCD's visible emissions limit (APCD Rule 302), create a public nuisance (APCD Rule 303), and are in compliance with the APCD's requirements and standards for visible dust (APCD Rule 345). The following measures should be implemented to reduce fugitive dust emissions and impacts.

- During construction, use water trucks, sprinkler systems, or dust suppressants in all areas of vehicle movement to prevent dust from leaving the site and from exceeding the APCD's limit of 20% opacity for greater than 3 minutes in any 60-minute period. When using water, this includes wetting down areas as needed but at least once in the late morning and after work is completed for the day. Increased watering frequency should be required when sustained wind speed exceeds 15 mph. Reclaimed water should be used whenever possible. However, reclaimed water should not be used in or around crops for human consumption.
- Onsite vehicle speeds shall be no greater than 15 miles per hour when traveling on unpaved surfaces.
- Install and operate a track-out prevention device where vehicles enter and exit unpaved roads onto paved streets. The track-out prevention device can include any device or combination of devices that are effective at preventing track out of dirt such as gravel pads, pipe-grid track-out control devices, rumble strips, or wheel-washing systems.
- If importation, exportation, and stockpiling of fill material is involved, soil stockpiled for more than one day shall be covered, kept moist, or treated with soil binders to prevent dust generation. Trucks transporting fill material to and from the site shall be tarped from the point of origin. The amount of excavated material or waste materials stored at the site should be minimized.
- Minimize the amount of disturbed area. After clearing, grading, earthmoving, or excavation is completed, or if previously graded areas remain inactive for more than 10 calendar days, treat the disturbed area by watering, OR using roll-compaction, OR revegetating or hydroseeding, OR by applying non-toxic soil binders until the area is paved or otherwise developed so that dust generation will not occur. All roadways, driveways, sidewalks etc. proposed to be paved should be completed as soon as possible.
- Schedule clearing, grading, earthmoving, and excavation activities during periods of low wind speed to the extent feasible. During periods of high winds (>25 mph) clearing, grading, earthmoving, and excavation operations shall be minimized to prevent fugitive dust created by onsite operations from becoming a nuisance or hazard.
- The contractor or builder shall designate a person or persons to monitor and document the dust control program requirements to ensure any fugitive dust emissions do not result in a nuisance and to enhance the implementation of the mitigation measures as necessary to prevent transport of dust offsite. Their duties shall include holiday and weekend periods when work may not be in progress.

All measures required by the Lead Agency shall be shown on grading and building plans and/or as a separate information sheet listing the conditions of approval to be recorded with the map prior to grading/building permit issuance and/or map recordation. Conditions shall be adhered to throughout all grading and construction periods. The name and telephone number of a dust control contact shall be provided to the APCD prior to grading/building permit issuance and/or map clearance. The Lead Agency shall ensure measures are on project plans and/or recorded with maps. The Lead Agency staff shall ensure compliance onsite. APCD inspectors will respond to nuisance complaints.

SANTA BARBARA COUNTY

ATTACHMENT B
CONSTRUCTION DIESEL PARTICULATE AND NO_x EMISSION REDUCTION MEASURES

Particulate emissions from diesel exhaust are classified as carcinogenic by the state of California. The following is a list of regulatory requirements and control strategies that should be implemented to the maximum extent feasible.

The following measures are required by state law:

- **Portable Engines**: All portable diesel-powered construction equipment greater than 50 brake horsepower (bhp) shall be registered with the state's portable equipment registration program (PERP)[1] OR shall obtain an APCD permit.
- **Off-Road Equipment**: Fleet owners of diesel-fueled mobile construction equipment greater than 25 hp are subject to the California Air Resource Board (CARB) In-Use Off-Road Diesel-Fueled Fleets Regulation[2]. All off-road vehicles subject to this regulation must use renewable diesel fuel, with some limited exceptions.
- **Diesel Trucks**: Fleet owners of diesel-fueled heavy-duty trucks and buses are subject to CARB's Heavy-Duty (Tractor-Trailer) Greenhouse Gas Regulation, Periodic Smoke Inspection Program (PSIP), the Statewide Truck and Bus Regulation, and the Advanced Clean Fleets Regulation to reduce emissions from trucks and buses.[3]
- **Idling:** Drivers of diesel-fueled commercial motor vehicles are subject to the Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling.[4] Idling restrictions for off-road equipment are set forth in CARB's In-Use Off-road Diesel-Fueled Fleets Regulation.

The following measures are recommended:

- At a minimum, off-road diesel equipment should be equipped with engines compliant with, or certified to meet or exceed, CARB Tier 4 emission standards. Where available, off-road construction equipment should be zero-emission. Alternative/renewable fuels such as compressed natural gas (CNG), liquefied natural gas (LNG), or propane should be utilized to the maximum extent feasible when zero-emission is not available. Electric auxiliary power units should be used. The Lead Agency should require commitments to Tier 4 and/or zero-emission equipment in applicable bid documents, purchase orders, and contracts; successful contractors should demonstrate the ability to supply the compliant construction equipment for use prior to any ground-disturbing and construction activities.
- On-road heavy-duty equipment with model year 2014 or newer engines, or powered by zero- or near zero-emission technology, should be used whenever feasible.
- All portable generators should be powered by a source other than diesel or gasoline (i.e. battery, natural gas, propane etc.)
- All construction equipment should be maintained in tune per the manufacturer's specifications.
- The number of construction equipment operating simultaneously should be minimized through efficient management practices to ensure that the smallest practical number is operating at any one time.
- Proposed truck routes should minimize impacts to residential communities and sensitive receptors.
- Construction staging areas should be located away from sensitive receptors such that exhaust and other construction emissions do not enter the fresh air intakes to buildings, air conditioners, and windows. Construction activity schedules and hours should be planned and adjusted as feasible to maximize distance from existing sensitive receptors and minimize exposure to air pollution.

Prior to grading/building permit issuance and/or map recordation, all measures required by the Lead Agency shall be shown as conditions of approval on grading/building plans, and/or on a separate sheet to be recorded with the map. Conditions shall be adhered to throughout grading and construction periods. The contractor shall retain onsite the Certificate of Compliance for CARB's In-Use Regulation for Off-Road Diesel Vehicles and have it available for inspection. The Lead Agency shall ensure measures are on project plans and/or recorded with maps and ensure compliance onsite. APCD inspectors will respond to nuisance complaints.
