Present Land Use/Zoning/General Plan Designation:

Agriculture land use; undeveloped

Project Description: *(please use a separate page if necessary)*

The City of Paso Robles (City) owns and operates a municipal landfill at an 80-acre site located at 9000 California State Route 46 East (SR 46E), approximately nine miles east of U.S. Highway 101 (US 101). The Paso Robles Landfill is a relatively small operation, receiving an average of approximately 200 tons of waste per day. The City owns 133 acres of unincorporated vacant land immediately south of the active landfill, fronting SR 46E, as shown in Figure 1 and Figure 2 (annexation area). The City purchased this land in 2005 to create a buffer between the active landfill and any future development in the vicinity. This land and all of the adjacent parcels currently have a County of San Luis Obispo (County) land use designation of Agriculture, with a Renewable Energy combining designation (overlay).
 The City now proposes to annex the 133 acres of vacant land and build an organics processing facility (OPF) on an approximate 20-acre site within the annexed area (OPF project site). Based on the potential environmental impacts associated with annexation of the annexation area and construction and operation of the OPF, preparation of an IS/MND is considered to be the appropriate level of review for this project pursuant to Section 15162 of the State California Environmental Quality Act (CEQA) Guidelines. This IS/MND evaluates the potential environmental impacts associated with the proposed annexation of the 133-acre area, construction and operation of an OPF, and the addition of landfill improvements, hereafter referred to as the proposed project.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
