

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: San Dieguito Lagoon Levee, Habitat Enhancement, and Trail Project

Lead Agency: City of Del Mar

Contact Name and Title: Amanda Lee, Principal Planner

Email: LeveeTrailCIP@delmar.ca.us Phone Number: 858.704.3645

Project Location: Del Mar San Diego
City *County*

Project Description (Proposed actions, location, and/or consequences).

The Project consists of three reaches of the shoreline: North Riverbank, Southeast Riverbank, and Southwest Riverbank. The Project would involve incorporation of living levee design concepts to improve resilience to sea level rise (SLR), provide flood protection, meet FEMA's No Rise certification standard for the floodplain, improve local water quality, improve public access, and enhance biodiversity. Additionally, the Project includes removal of an existing Public Works Facility structure out from the FEMA floodway, and flood protection walls. A new Public Works Facility structure (i.e., prefabricated, mobile structure) would be located on the southwestern side of the existing Public Works Facility property, beyond the limits of the floodway, in compliance with FEMA's floodplain standards.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The MND identifies potentially significant impacts related to biological resources, cultural resources, noise, and tribal cultural resources.

Impacts to biological resources would be reduced to less than significant with implementation of MM-BIO-1 (On-Site Habitat Restoration), MM-BIO-2 (Focused Botanical Surveys), MM-BIO-3 (Pre-Construction Special-Status Wildlife Survey), MM-BIO-4 (Crotch's Bumble Bee Pre-Construction Survey), MM-BIO-5 (Avoidance of Osprey Take), MM-BIO-6 (Noise Reduction) and MM-BIO-7 (Regulatory Permitting).

Impacts to cultural resources and tribal cultural resources would be reduced to less than significant with implementation of MM-CUL-1, requiring implementation of an archaeological and cultural resources mitigation program.

Impacts related to noise would be reduced to less than significant with implementation of MM-NOI-1 (Construction Noise Management) and MM-NOI-2 (Vibratory Pile Driver Vibration Monitoring and Reduction).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Not applicable

Provide a list of the responsible or trustee agencies for the project.

San Dieguito JPA, 22nd District Agricultural Association, USACE, CDFW, RWQCB, and CCC
