Avenue H & 20th St West
Lancaster, CA
Phase I Environmental Site Assessment

Dear Mr. Horne:

Arrow Engineering Services, Inc. (AESI) is pleased to submit this report which presents the results and findings of our Phase I Environmental Site Assessment prepared for the above-referenced site in Los Angeles County. The investigation was prepared in general accordance with ASTM-E 1527-13/21. Please refer to the attached report for our findings and conclusions.

If you have any questions regarding this report, please contact our office at (661) 940-0043.

Sincerely,

Arrow Engineering Services, Inc.

Brian D. Glidden, P.E., L.S.

Registered Civil Engineer No. 48287
Licensed Surveyor No. 7727

BDG/SG

PROFESSIONAL CERTIFICATION

This report has been prepared by:

Brian D. Glidden, P.E., L.S.
Principal Engineer

Registered Civil Engineer No. 48287, Expiration June 30, 2024
Registered Land Surveyor No. 7727, Expiration December 31, 2023

STATEMENT OF LIMITATIONS

Information provided in this report is intended exclusively for the evaluation of soil contamination levels as they pertain to designated areas at the subject site. The professional advice and procedures documented herein have been performed in accordance with generally accepted practices by other geologists, hydrologists, hydro-geologists and engineers practicing in this field.

The findings, opinions, and conclusions in this report are considered valid as of the present date. However, changes in the conditions of the property can occur with the passage of time, whether due to natural processes or the works of man on this or adjacent properties. In addition, changes in applicable or appropriate standards may occur. Accordingly, portions of this report may be invalidated wholly or partially by changes outside our control.

Third Party Use: Additionally, any use of this report by any third party is expressly prohibited without a written, specific authorization from the client and Arrow Engineering. A written, specific authorization will require a waiver and release agreement.

Shelf Life: This report is presumed to be valid for a period of 180 days from its completion or until the Client obtains specific information that may materially alter a finding, conclusion or opinion in this report or the Client is notified by AESI that it has obtained specific information that materially alter a finding, conclusion or opinion in this report.

This report is issued with the understanding that the client, the property owner or its representative is responsible for ensuring that the information, conclusions and recommendations contained herein are brought to the attention of the appropriate regulatory agencies, as required.

APPENDIX B EDR REPORT

APPENDIX C HISTORICAL RESEARCH DOCUMENTATION

1.0 PURPOSE AND SCOPE

The purpose of the study is to evaluate the potential presence of hazardous substances or petroleum products (otherwise known as Recognized Environmental Conditions) as defined in ASTM E 1527-13 in connection with the property. The extent of research detailing the scope of work was as follows:

- A site reconnaissance, including an assessment of the surrounding parcels, to determine if there is any visual or odorous evidence of hazardous material or toxic contamination on the site and in the vicinity

- Review available aerial photographs of the subject area to determine historical land use

- Contact appropriate government agencies to ascertain the existence of documents indicating the presence of hazardous waste generators at or near the subject sites

- Research of government documents concerning available pertinent environmental information for each of the subject sites

- Review of title documents to determine present and prior ownership

- Preparation of this report including findings and conclusions

"Hazardous materials" is used in its broadest sense and shall mean any regulated chemicals, substances, or waste that may adversely impact human health and safety or the environment and, if discharged to the soil or groundwater from on-site sources or indirectly by migration from neighboring sources, can potentially impact the quality of soil and groundwater of the subject site.

The Scope of Services did not include sampling of soil, groundwater, or dinking water for contaminants. Nor did it include the sampling for radon or asbestos containing materials.

This company's findings and professional opinions are based on the available public records and additional information acquired as noted in the scope of work. AESI makes no other claims or warranties, either expressed or implied, concerning the accuracy or completeness of the data made available to us for this study. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide Client with information relating to the Property.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The subject property is located at SWC Avenue H & 20th St West in Lancaster, CA, County of Los Angeles, State of California, described as follows: 11.38 acre parcel identified as APN 3114-012-069 and 3.81 acre parcel identified as APN 3114-012-068.

The properties are shown on the Los Angeles County Assessor's Map as:

	APNs	Acreage
	3114-012-069	11.38 ac±
	3114-012-068	3.81 ac ±
TOTAL		15.19 ac±

The site location is shown on Figure 1, Vicinity Map. (See Appendix A.)

According to the Los Angeles County Tax Assessor's office, the property is currently owned by the Horne Family Partnership Darolyn & Dana Ross Schlessinger Trustees of Lancaster, California. They have owned the property since 2004.

2.2 Site and Vicinity General Characteristics

Present zoning for the site is R-7000 – Single Family Residential on 7,000 Square Foot Lots. The site is vacant undeveloped property. The general surrounding areas of the property are used for industrial purposes or are vacant.

Environmental Setting

Topography: The subject site is vacant. In a natural state the site drains predominantly in a northerly direction at less than 1%. The average elevation at the site is about 2312 above mean sea level. This site resides within FEMA Flood Zone X, an area of minimal flood hazard outside the 500 year flood and protected from 100-year flooding.

Groundwater: Groundwater well information is identified in the EDR Report (Appendix B) which shows the status of each well within the study area. This well data indicates the depth to water table is approximately 385 feet.

Soils: The Property is located in the Western Mojave Desert of Southern California within the Antelope Valley. The Antelope Valley is a topographically closed, triangular-shaped valley that is bounded on the southwest by the San Andres Fault and the San Gabriel Mountains, on the northwest by the Garlock fault and the Tehachapi Mountains, and by lower hills, ridges and buttes in the north and east. The U.S. Department of Agriculture's Soil Conservation characterizes the soil in the vicinity of the site as urban land with loamy sand with 0 to 2% slope. There are no outcrops, streambeds or other notable physiographic features in the area.

Air: The prevailing wind is from the west and southwest. Average wind speed is highest at 8 miles per hour, in May.

Surface water: Surface water runoff on the site sheet flow predominantly in the northerly direction. Site conditions were dry upon the site visit.

3.0 USER PROVIDED INFORMATION

3.1 Title Records

A preliminary title report dated August 29, 2023 was provided by the client.

3.2 Environmental Liens or Activity and Use Limitations (AULs)

AESI requested information from the client and Site Manager regarding knowledge of environmental liens, activity and use limitations (AULs) for the property. The site contact was not aware of any environmental liens associated with the property. In addition, the site contact had no knowledge of any use or activity limitations. EDR was retained to provide an Environmental Lien Search Report (See Appendix C). No environmental liens or AULs associated with the property were found by EDR.

3.3 Specialized Knowledge

The client has no knowledge of environmental activity or concern associated with the property.

3.4 Commonly Known or Reasonably Ascertainable Information

The subject property is currently vacant and in its native state. The site has no permanent structures as verified by the review of historical records.

3.5 Valuation Reduction for Environmental Issues

No recognized environmental concerns were identified for the subject site for consideration in valuing the property. The site contact was not aware of any valuation reductions associated with the property. A valuation reduction study of the property was considered outside the scope of the Phase I Environmental Site Assessment and was not performed.

3.6 Owner, Property Manager and Occupant Information

The following information regarding the Owner, Property Manager and Occupants was provided by the User and Key Site Manager.

Property Owner:	Horne Family Partnership
Property Manager:	David Horne
Occupants:	None

Prior to the current ownership, the Bernard and Rose Granz Trust owned the property.

3.7 Reason for Performing Phase I ESA

The Phase I ESA was prepared by Arrow Engineering at the request of Client. This Phase I ESA was requested for the following reasons:

1. AESI understands that the findings of this study will be used to satisfy a submittal item for a Tentative Tract Map application in the City of Lancaster.

2. To identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-13) in connection with the Property.

3. To permit the *User* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E-1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

4.0 RECORDS REVIEW

The purpose of the records review was to obtain and review records that will help identify recognized environmental concerns in connection with the property.

Some records reviewed pertain not only to the property, but also to properties within an additional approximate minimum search distance in order to help assess the likelihood of problems from migrating hazardous substances or petroleum products. Unless stated otherwise, the approximate minimum search distances used below were as specified in the ASTM Standard 1527-13.

4.1 Standard Environmental Records

We researched and found a previous Phase I Environmental Assessment report we submitted for this area in November 2017. It was previously submitted for APN 3114-012-060, which is now divided into two parcels, 3114-012-068 & 3114-012-069. We found similar results from our previous Phase I report, there was no REC's found in both reports.

Information from standard Federal and state environmental record sources was provided through EDR. Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. This integrated database also contains postal service data in order to enhance address matching. Records from one government source are compared to records from another to clarify any address ambiguities. The demographic and geographic information available provides assistance in identifying and managing risk. The accuracy of the geocoded locations is approximately +/- 300 feet. EDR researched each database for sites located within the minimum ASTM (American Society for Testing and Materials) search radius as identified in Table 1. A copy of EDR's report is included in Appendix B.

Government Databases and Corresponding Search Distances

Acronym	Database	Minimum Search Distance (miles)
CERCLA	Federal Superfund Sites	0.5
NPL	National Priority List	1.0
RCRA-TSDF	Resource Conservation and Recovery Act (Treatment, Storage and Disposal)	1.0
RCRA-LQG	Resource Conservation and Recovery Act (Large Quantity Generators)	*
RCRA-SQG	Resource Conservation and Recovery Act (Small Quantity Generators)	*
ERNS	Emergency Response Notification System	**
HWS	Identified and Prospective Hazardous Waste Sites	1.0
OGW	The California Oil and Gas Well Data Report	0.5
LUST	Leaking Underground Storage Tanks	0.5
UST	State-Registered Underground Storage Tanks	*
SWF/LF	Solid Waste Information System	1.0

* subject property and adjoining property

** subject property only

A review of the regulatory information from this database search for possible recognized environmental conditions (RECs) within the ASTM approximate minimum search distance is provided in the Federal and State sections below.

Federal Environmental Records

Record Source	Within Property	Adjoining Properties	Within Search Distance(mi)
NPL	0	0	0
Proposed NPL	0	0	0
CERCLA	0	0	0
CERCLA-NFRAP	0	0	0
CORRACTS	0	0	0
RCRA-TSDF	0	0	0
RCRA-LQG	0	0	0
RCRA-SQG	0	5	0.25
ERNS	0	0	0

State Environmental Records

Record Source	Within Property	Adjoining Properties	Within Search Distance(mi)
HWP	0	0	0
HIST Cal – Sites	0	0	0
CHMIRS	0	0	0
Cortese	0	2	0.5
Notify 65	0	0	0
Toxic Pits	0	0	0
SWF/LF	0	0	0
WMUDS/SWAT	0	0	0
LUST	0	2	0.5
CA Bond Exp. Plan	0	0	0
UST	0	1	0.25
VCP	0	0	0
INDIAN UST	0	0	0
CA FID UST	0	0	0
HIST UST	0	0	0
SWRCY	0	0	0
AST	0	1	0.25
SWEEPS UST	0	0	0
ENVIROSTOR	0	0	0

The EDR report indicates no sites of possible concern are listed within the search radius. There are (8) sites listed in the database; (2) LUST, (1) UST, (2) RCRA-SQG, (2) Cortese, and (1) AST

EDR Report listed the following sites:

- LUST listings of higher elevation
  DEWEY PEST CONTROL, JOHNSON FORD

- AST listings of higher elevation
  HERTZ EQUIPMENT RENTAL

- UST listing of higher elevation
  JOHNSON FORD

- Cortese of higher elevation
  DEWEY PEST CONTROL, JOHNSON FORD

- RCRA-SQG
  HERTZ EQUIPMENT RENTAL, JOHNSON FORD

4.2 Historical Use Information on the Property/Adjoining Properties

The objective of consulting historical sources is to develop a history of the previous uses of the property in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property.

Aerial Photograph Review

AESI has reviewed aerial photographs taken in 1928, 1940, 1948, 1953, 1968, 1970, 1974, 1981, 1989, 1994, 2002, 2005, 2009, 2012, 2016 and 2020. (See Appendix C)

Year (Scale)	Property Use and Comments
1928 Photograph Scale 1" = 500')	The site appears to be in a native natural state.
1940 Photograph Scale 1" = 500')	The site remains relatively unchanged from the 1928 photograph.
1948 Photograph Scale 1" = 500')	The site remains relatively unchanged from the 1940 photograph.
1953 Photograph (Scale 1" = 500')	The site remains relatively unchanged from the 1948 photograph. Surrounding roads appear.
1968 Photograph (Scale 1" = 500')	The site remains relatively unchanged from the 1953 photograph. Surrounding homesteads, roads and Amargosa Drainage Channel appear.
1970 Photograph (Scale 1" = 500')	The site remains relatively unchanged from the 1968 photograph. More surrounding roads appear.
1974 Photograph (Scale 1" = 500')	The site remains relatively unchanged from the 1970 photograph.
1981 Photograph (Scale 1" = 500')	The site remains relatively unchanged from the 1974 photograph. Surrounding roads appear to be paved.
1989 Photograph (Scale 1" = 500')	The site remains relatively unchanged from the 1981 photograph. Surrounding homesteads and roads appear.
1994 Photograph (Scale 1" = 500')	The site remains relatively unchanged from the 1989 photograph. Surrounding homesteads appear.
2002 Photograph (Scale 1" = 500')	The site remains relatively unchanged from the 1994 photograph. More surrounding homesteads appear.
2005 Photograph (Scale 1" = 500'	The site remains relatively unchanged from the 2002 photograph. More surrounding homesteads appear in the Southern area.
2009 Photograph (Scale 1" = 500'	The site shows perhaps minor grading for a parking lot area.

2012 Photograph (Scale 1" = 500'	The site remains relatively unchanged from the 2009 photograph.
2016 Photograph (Scale 1" = 500'	The site remains relatively unchanged from the 2012 photograph.
2020 Photograph (Scale 1" = 500'	The site remains relatively unchanged from the 2016 photograph.

Historic Map Review

No Sanborn Fire Insurance Map coverage is available for this area. (See Appendix C).

Historic U.S.G.S. topographic maps for the Site and surrounding area for 1915, 1917, 1930, 1933, 1948, 1958, 1974, 2012, 2015 and 2018 were reviewed by AESI and are summarized below (See Appendix C for copies of the maps).

Year (Scale)	Property Use and Comments
1915 Quad: Elizabeth Lake (Scale 1: 96000)	The site is located in an undeveloped area. The elevation of the property is approximately 2317 ft. above sea level.
1917 Quad: Elizabeth Lake (Scale 1: 125000)	No significant changes were noted for the subject site from the 1915 Elizabeth Lake map.
1930 Quad: Lancaster, Oban (Scale 1: 24000)	No significant changes were noted for the subject site from the 1917 Elizabeth Lake map.
1933 Quad: Lancaster, Oban (Scale 1: 24000)	No significant changes were noted for the subject site from the 1930 Lancaster map.
1948 Quad: Oban (Scale: 1: 24000)	No significant changes were noted for the subject site from the 1933 Lancaster map.
1958 Quad: Lancaster West (Scale: 1: 24000)	No significant changes were noted for the subject site from the 1948 Oban map.
1974 Quad: Lancaster West (Scale: 1: 24000)	No significant changes were noted for the subject site from the 1958 Lancaster map.
2012 Quad: Lancaster West (Scale: 1: 24000)	No significant changes were noted for the subject site from the 1974 Lancaster map.
2015 Quad: Lancaster West (Scale: 1: 24000)	No significant changes were noted for the subject site from the 2012 Lancaster map.
2018 Quad: Lancaster West (Scale: 1: 24000)	No significant changes were noted for the subject site from the 2015 Lancaster map.

4.3 Additional Record Sources

The following records were reviewed from other agencies:

The EDR-City Directory Abstract for the Site and surrounding area was reviewed by AESI (See Appendix C). No occupants of environmental concern were listed.

Zoning/Land Use Records

According to the City of Lancaster, the present zoning for the subject site is R-7000 – Single Family Residential on 7,000 SF Lots.

Building Department Records

EDR Building Permit Report for the City of Lancaster Building & Safety Department regarding building permits issued for the site. A review of building permits issued is as follows:

Issue Date	Issued to	Purpose
No permits		

5.0 SITE RECONNAISSANCE

The purpose of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the property.

5.1 Methodology and Limiting Conditions

The subject property was inspected by Mr. Brian Glidden on August 1, 2023. The weather during the inspection was clear and sunny.

All areas of the subject property were accessible at the time of the inspection. There were no visual or physical obstructions of the subject property.

During our site reconnaissance, AESI observed general site conditions, site access and surrounding properties to evaluate the potential presence of recognized environmental conditions and obvious signs of environmental impact. The results of the site reconnaissance are presented below. Photographs taken during the site visit are captioned and presented in Appendix A.

5.2 Observations

Current Use of the Property

At the time of preparation of this report, the site consists of 100% vacant land.

Past Use(s) of the Property

There are no known recognized environmental concerns (RECs) associated with the past property use.

Current Uses of Adjacent Property

North:	Ave H and Drainage pond
East:	Vacant and Residential
South:	Residential
West:	Drainage channel, Fwy 14

Past Uses of Adjacent Property

North:	Vacant undeveloped land
East:	Vacant undeveloped land
South:	Vacant undeveloped land
West:	Vacant undeveloped land

Structures, Roads, Other Improvements on the Site

There are no structures on the subject property:

The site is bounded on the west by the Amargosa Drainage Channel and freeway, on the North by Ave H and a Drainage Pond, on the east by undeveloped land and residential and on the south by residential.

Utilities: This property is vacant. There is public sewer available in 20th Street West. The public sewer is owned and maintained by LA County Sanitation District #14. Water main improvements are available in 20th Street West. The water mains are owned and maintained by LA County Waterworks District. There is natural gas distribution lines (Southern California Gas) available in 20th Street West. Electric power from Southern California Edison is present along 20th Street West. Telephone service is available from Verizon or Frontier Communication along 20th Street West. The local Cable provider is Spectrum along 20th Street West.

Odors: No strong, pungent, or noxious odors were observed.

Storage Tanks: No above-ground storage tanks were observed on the property. No record of any underground tanks or storage was found.

Air Emissions, Wastewater Discharge: There are no unusual air emissions currently issuing from the subject property.

Hazardous Substances and Petroleum Products Containers: AESI did not observe any areas where hazardous materials are being stored or dumped on this site.

Transformers/PCB equipment: Arrow Engineering did not observe any old transformers. No electrical or hydraulic equipment known or likely to contain PCBs were observed on the property.

Vapor Encroachment Condition:

Interior Observations: N/A

Heating/Cooling: N/A

Elevator: N/A

Stains or Corrosion: N/A

Drains and Sumps: No drains or sumps were observed within the interior of the subject property.

Lead-based paint: Testing for lead-based paint was not a task item under this scope of work. In 1978, the U.S. Consumer Product Safety Commission lowered the legal maximum lead content in most kinds of paint to 0.06% (a trace amount). Identification and/or testing for lead based paint is not included in the scope of this report.

Asbestos: Testing for suspect asbestos containing materials was not a task item under this scope of work. In 1978, the National Emission Standards for Hazardous Air Pollutant Standards (NESHAPS) under EPA guidance outlawed the installation of all friable asbestos (able to be crumbled by hand pressure). Buildings constructed or significantly modified

prior to 1990, may contain asbestos if built from materials that have been stockpiled. If a contractor had stockpiles of non-friable asbestos, they were within their legal rights to install it in buildings until their supplies were exhausted.

Exterior Observations

Pits, Ponds, or Lagoons: There are no ponds, or lagoons observed on the property. Site conditions were dry upon the site visit.

Stained Soil or Pavement: No areas of stained soil or pavement were observed on the property

Stressed Vegetation: No areas of stressed vegetation were observed on the property.

Solid Waste: No areas, mounds, or depressions were present that might suggest any solid waste disposal on the property.

Waste Water: There was no waste water or other liquids being discharged into a drain, ditch, underground injection system, or stream on or adjacent to the property.

Site Drainage: Site drainage is directed northeasterly to the eastern shoulder on 20th Street where it continues to drain northerly to a concrete open channel that directs the water across the neighboring property to the north.

Wells: No wells were observed on the property.

Septic Systems: No septic systems or cesspools were observed on the property. The site is served by a public sewer main.

Vent Pipes: No vent pipes were observed on the property.

6.0 INTERVIEWS

The purpose of the interview is to obtain information indicating recognized environmental conditions and historical information pertinent to the site. Copies of the interview documentation can be found in Appendix C.

Interviews with Past and Present Owners, Occupants & Neighbors

Date	Name	Status	Organization
8/17/23	David Horne	Owner	First Capital Corporation

We provided an interview form to David Horne who is the current property owner. They are not aware of any adverse environmental conditions.

Interviews with State and/or Local Government Officials

Los Angeles County and Lancaster Building & Safety Department were contacted to see if any permits or plans had been issued for development of this area. Please see Appendix C for listing of permits for the site.

6.1 Data Gap Analysis

The ASTM E 1527-13 standard requires a listing of “data gaps” encountered during the investigative process that may affect the validity of the conclusions drawn by the environmental professional. Data gaps identified are as follows:

No significant data gaps

7.0 FINDINGS

The results of this assessment have revealed no obvious signs of environmental impact associated with the property.

The results of this assessment have revealed no historical recognized environmental conditions associated with the property.

The results of this assessment have revealed no de minimis conditions associated with the property.

AESI reconnaissance of the adjoining properties did not reveal any obvious signs of environmental impact.

8.0 OPINION

It is our professional opinion that the subject site does not appear to have been environmentally impacted at the present time.

There are no data gaps that significantly affected our ability to identify recognized environmental conditions associated with the property.

9.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the property. Any exceptions to, or deletions from this practice are described in Section of this report. The assessment has revealed no evidence of recognized environmental conditions in connection with the property.

The above conclusion is based on the findings in this report. Identification of asbestos building materials is not included in the scope of a Phase I ESA.

According to the EDR research, there are 2 LUST sites listed. For open petroleum sites, research conducted in the State of California by Lawrence Livermore National Laboratory (LLNL) in 1996 indicates that attenuation and degradation of the product in groundwater play major roles in reducing the hydrocarbon contamination to non-detectable levels within several hundred feet of the contaminant source. Moreover, this research indicates that in over 90% of the hydrocarbon contamination cases, groundwater contaminant plumes do not extend more than 250-feet from the source. Solvent/toxic contamination plumes may extend farther from the source.

We have addressed the environmental impacts for each of the sites below.

1. JOHNSON FORD (45640 23RD ST W) – This site is located at a higher elevation than subject property and approximately 1/8 – 1/4 mile to the southwest. EDR report indicates a diesel leak. Discovery and remediation occurred between 2009 and 2011. The LUST case was closed in 2011. This site drains away from the subject property. Johnson Ford has currently created no apparent environmental impact(s) to the subject property at this time

2. DEWEY PEST CONTROL (45440 23RD ST N) – This site is located at a higher elevation than subject property and approximately 1/4 – 1/2 mile to the southwest. EDR report indicates a Benzene leak. Discovery and remediation occurred between 1994 and 2012. The LUST case was closed in 2012. The LUST case was closed in 2012. This site drains away from the subject property. Dewey Pest Control has currently created no apparent environmental impact(s) to the subject property at this time.

There is one HIST CORTESE site listed.

DEWEY PEST CONTROL (45440 23RD ST N) – This site is located at a higher elevation than subject property and approximately 1/4 – 1/2 mile to the southwest. This site drains away from the subject property. Dewey Pest Control has currently created no apparent environmental impact(s) to the subject property at this time.

10.0 DEVIATIONS

No deviations and deletions from ASTM Standard 1527-13 were made for this Phase I environmental site investigation. No documentation was provided by the client regarding title records.

11.0 ADDITIONAL SERVICES

No additional services beyond the scope of the ASTM Standard 1527-13 were conducted as part of this assessment.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List

US INST CONTROLS..... Institutional Controls Sites List

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 04/17/2023 has revealed that there are 4 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that

there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	10-20-2022
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 11/02/2022. OBSERVATION: The business failed to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan. This facility failed to document and maintain training records for a minimum of three years. CORRECTIVE ACTION: Establish and electronically submit an employee training program containing provisions to ensure initial and annual training for all employees in safety procedures in the event of a release or threatened release of a hazardous material and document and maintain training records for a minimum of three years.

- Citation: Un-Specified
- Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General Local Ordinance
- Violation Notes: Returned to compliance on 06/20/2018. OBSERVATION: Observed 1 cylinder of Argon along East side of paint booth that was not properly secured to a fixed object. CORRECTIVE ACTION: Properly secure compressed gas cylinders to a fixed object with one or more restraints to prevent falling caused by contact, vibration or seismic activity in accordance with LA County Fire Code Section 5303.5.3.
- Violation Division: Los Angeles County Fire Department
- Violation Program: HW
- Violation Source: CERS,

VILLAGE AUTO BODY (Continued) **S123521447**

Site ID:	438343
Site Name:	VILLAGE AUTO BODY
Violation Date:	05-07-2018
Citation:	40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description:	Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes:	Returned to compliance on 06/20/2018. OBSERVATION: The facility does not have any spill response material/equipment available on-site. CORRECTIVE ACTION: Submit photos/documentation to this division demonstrating the facility has been equip with adequate spill response material/equipment.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS,

Site ID:	438343
Site Name:	VILLAGE AUTO BODY
Violation Date:	05-07-2018
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 06/20/2018. OBSERVATION: 1 x 30-gallon drum of waste paint with acetone, 1 x 5-gallon can of waste paint with acetone and 1 x 30-gallon drum of waste paint booth filters located along North side of paint booth were all observed without a hazardous waste label or accumulation start date and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of all hazardous waste on-site and submit a copy of the manifest/receipt to this division.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS,

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/22/2023
Date Data Arrived at EDR: 07/06/2023
Date Made Active in Reports: 07/24/2023
Number of Days to Update: 18

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/22/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022
Date Data Arrived at EDR: 11/16/2022
Date Made Active in Reports: 02/06/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
Private Schools

Elevation:	2318 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12021695 LANCASTER WEST, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

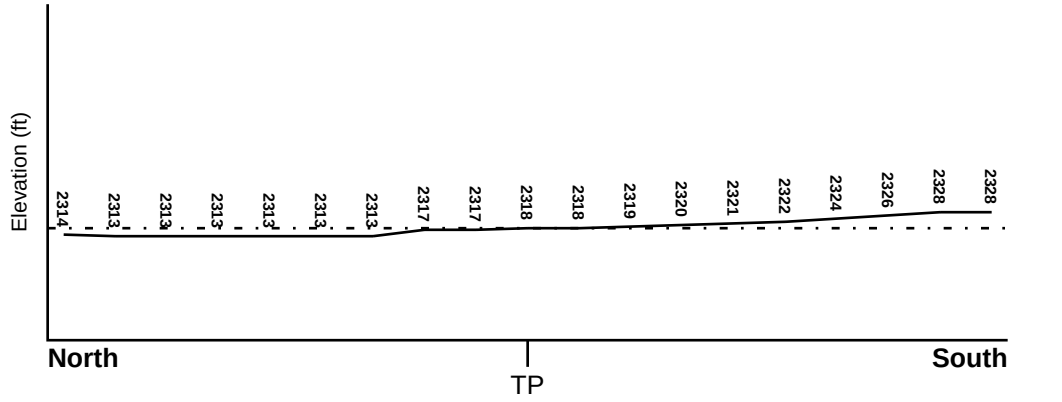

TOPOGRAPHIC INFORMATION

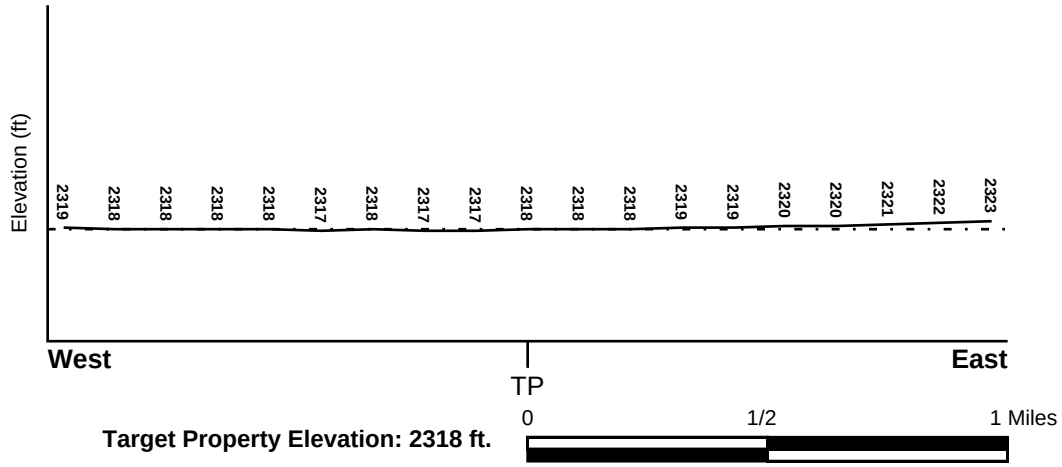

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 2318 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C0410F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LANCASTER WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Pond

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 4 Min: 1.4	Max: 9.6 Min: 8.5
2	3 inches	24 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 4 Min: 1.4	Max: 9.6 Min: 8.5
3	24 inches	72 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 4 Min: 1.4	Max: 9.6 Min: 8.5

Soil Map ID: 2

Soil Component Name: Pond

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0 Min: 0	Max: 9.6 Min: 8.5
2	3 inches	24 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0 Min: 0	Max: 9.6 Min: 8.5
3	24 inches	72 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0 Min: 0	Max: 9.6 Min: 8.5

Soil Map ID: 3

Soil Component Name: Pond

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 4 Min: 1.4	Max: 9.6 Min: 8.5
2	3 inches	24 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 4 Min: 1.4	Max: 9.6 Min: 8.5

Soil Map ID: 4

Soil Component Name: Miscellaneous water

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Contact: Brian Glidden

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.
