Brief Description of Project:
Well No. 5A Auxiliary Power and Pumps Project

Proposed Project consists of installing a new 500 kW standby diesel generator and three (3) booster pumps at the District's Well 5A site to improve domestic water supply delivery. Proposed Project features (generator, automatic transfer switch, building, pumps and electrical connections) will be constructed above ground at the well site. Construction activities include earthwork, site grading, concrete work and electrical work.

Reason(s) for Mitigated Negative Declaration finding:

The Project will result in no adverse long-term environmental impacts. Short-term construction related potential impacts will be mitigated to a less than significant level by use of construction specifications requiring defined mitigation measures.
