**Project Description:** (please use a separate page if necessary)

The multi-benefit Marsh Creek Reservoir Restoration and Total Mercury Reduction Project would improve the flood capacity of the Marsh Creek Reservoir, improve water quality, enhance the ecosystem, and increase the value of public recreation in the area. The project would excavate excess accumulated sediment and debris from the wet pool of the Reservoir, dry the removed material, dispose of the material onsite, create a high flow diversion, restore habitat, clean and maintain the existing primary outfall/operate the gate, and install cattle exclusion fencing.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
