RE: Revised Phase I Environmental Site Assessment
Chowchilla Multi-family
Robertson Boulevard and Road 15
APN 026-233-008 (18.24 acres)
Chowchilla, California 93610

Dear Mr. Phelen:

Krazan & Associates, Inc. (Krazan) completed a Phase I Environmental Site Assessment (ESA) at the above-referenced site and summarized in a report dated January 9, 2026. Please note that the earliest date of source review was on July 28, 2025. This report is considered viable within 180 days of that date. We appreciate the opportunity to serve your environmental due diligence needs.

Krazan identified evidence of a recognized environmental concern (REC) in connection with the subject site as defined by ASTM E 1527-21, in addition to potential area of concern (PAOC), ASTM Non-Scope Considerations and site development issues. No evidence of a controlled recognized environmental concern (CREC) or historical recognized environmental concern (HREC) in connection with the subject site as defined by ASTM E 1527-21 was noted during this assessment.

The subject site was cultivated with agriculture from at least the 1930s through the 1970s. A structure, consistent with the rectangular building observed during the site reconnaissance, was developed in the southwestern portion of the subject site by at least the 1960s. The building was occupied by Frank's Auto Service, an auto repair shop, from at least 1973 to 2010. The agricultural portion of the subject site appears to have been fallowed since the 1970s.

REC

- The existing structure was formerly occupied by Frank's Auto Service. Frank's Auto Service is listed on the Hazardous Waste Tracking System (HWTS) database maintained by the Department of Toxic Substances Control (DTSC). The tracking system collects both manifest copies from the generator and the destination facility. Records maintained for the former occupant began in April 1999 and ended in June 2001. No other details regarding the type of waste transported off-site via the manifest was included in the database listing. The former occupant is not listed on any Federal, State or local regulatory database indicating a release of hazardous materials has impacted the subject site and hazardous waste appears to have been properly removed and transported off-site.

Minor amounts of hazardous materials were observed within the commercial building formerly utilized as an auto repair shop. Evidence of the former auto repair shop operations consisted of two inspection pits, likely used during oil changes or other types of repairs to the underside of vehicles. The pits were constructed of concrete walls. It is unknown whether the floor of pits was also constructed of concrete since floor was not visible beneath accumulated dirt. Numerous wooden planks and a step/ladder structure were observed on the concrete foundation adjacent to the inspection pits. The wooden ladder was likely used to access the pits. No evidence of staining was noted on the concrete walls and only minor evidence of oil or staining was noted on the floor of one of the pits. No drains were observed in the sidewalls or floor of the pits. No evidence of hydraulic lifts or hoists were observed within the interior or exterior of the building. Minor engine oil drips, other fluid drips and staining typical of an auto repair shop were observed on the concrete floor of the building; however, the staining was *de minimus* and is not considered a concern to this assessment. The concrete-lined pits will need to removed and backfilled prior to redevelopment of the subject site. Based on historic site usage and since the condition of the floor of the pits was not observed, the inspection pits represent a recognized environmental concern (REC) to this assessment.

Krazan recommends being present on-site during demolition and excavation activities associated with the inspection pits, to observe and assess the condition of the subsurface beneath the pits and to collect soil samples, if necessary.

PAOC

- Review of historical aerial photographs indicates that the subject site was utilized for agricultural purposes from at least 1937 through the 1970s. Although the potential exists that environmentally persistent pesticides/herbicides may have been applied to crops grown on the subject site; 1) no material evidence of the use of environmentally persistent pesticides/herbicides was obtained during the course of this assessment, and 2) the parcel has been fallowed since the 1970s. Krazan's sampling and analysis of surface soils from properties with similar agricultural histories has typically yielded non-detectable results or very low concentrations for analysis of environmentally persistent pesticides. It is anticipated that any environmentally persistent pesticides/herbicides potentially located on site will be dislocated and diluted as a result of the grading and trenching operations which will be conducted in connection with the proposed residential development of the property. Consequently, the potential for elevated concentrations of environmentally persistent pesticides/herbicides to currently exist in the near surface soils of the subject site appears to be low.

  It has been Krazan's experience that chemical analysis of shallow soil samples for persistent pesticides/herbicides in current or former agricultural areas does not typically result in concentrations reported above regulatory screening levels; however, it has also been Krazan's recent experience that Federal, State and Local agencies and/or financial lending institutions have at times required "pesticide screening" of properties with current and/or former agricultural uses. If pesticide screening or further assessment is required by a government agency or financial lending institution, Krazan can assist with those requests.

ASTM Non-Scope Consideration

- A structure has been located in the southwestern portion of the subject site since at least the 1960s. Although the majority of the commercial building was corrugated metal walls and roof, the office/reception area and restroom area constructed within the interior were finished with wallboard and painted. It is unknown if the structure contains asbestos-containing materials (ACMs) or lead-based paint (LBP). An asbestos and/or LBP survey and sampling of the structure was not included within the scope of this assessment. Based on the apparent date of construction, ACMs and LBP

may be present at the subject site. Prior to the disturbance of any of the suspect ACMs or LBP at the subject site via demolition, comprehensive asbestos and LBP surveys are recommended.

Site Development Issues

- Based on the former auto repair shop usage and restroom observed within the building, a septic system is likely located on the property. During redevelopment activities, the septic system should be properly abandoned, removed or destroyed in accordance State and local guidelines.

If you have any questions regarding the information presented in this report, please call me at (559) 348-2200.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

EXECUTIVE SUMMARY

Krazan has conducted a Phase I ESA of the proposed Chowchilla Multi-family development located along the southeastern side of Robertson Boulevard at the intersection with Road 15, in Chowchilla, California 93610 (subject site). The subject site is an irregular-shaped property identified as Madera County Assessor's Parcel Number (APN) 026-233-008 and is 18.24 acres in area. The northern property boundary represents the boundary between Madera County and the City of Chowchilla city limits. The subject site is within a mixed rural and residential area of Chowchilla.

The subject site is planned for two types of multi-family housing. The northeastern corner of the parcel will be subdivided into seventeen (17) lots that are planned for the development of 17 duplex homes (34 units total). The central and western portions of the parcel will be developed in two phases with a multi-family development that will include a total of 154 apartments.

The subject site was cultivated with agriculture from at least the 1930s through the 1970s. A structure, consistent with the rectangular building observed during the site reconnaissance, was developed in the southwestern portion of the subject site by at least the 1960s. The building was occupied by Frank's Auto Service, an auto repair shop, from at least 1973 to 2010. The agricultural portion of the subject site appears to have been fallowed since the 1970s.

Krazan identified evidence of a recognized environmental concern (REC) in connection with the subject site as defined by ASTM E 1527-21, in addition to potential area of concern (PAOC), ASTM Non-Scope Considerations and site development issues. No evidence of a controlled recognized environmental concern (CREC) or historical recognized environmental concern (HREC) in connection with the subject site as defined by ASTM E 1527-21 was noted during this assessment.

The subject site was cultivated with agriculture from at least the 1930s through the 1970s. A structure, consistent with the rectangular building observed during the site reconnaissance, was developed in the southwestern portion of the subject site by at least the 1960s. The building was occupied by Frank's Auto Service, an auto repair shop, from at least 1973 to 2010. The agricultural portion of the subject site appears to have been fallowed since the 1970s.

REC

- The existing structure was formerly occupied by Frank's Auto Service. Frank's Auto Service is listed on the Hazardous Waste Tracking System (HWTS) database maintained by the Department of Toxic Substances Control (DTSC). The tracking system collects both manifest copies from the generator and the destination facility. Records maintained for the former occupant began in April 1999 and ended in June 2001. No other details regarding the type of waste transported off-site via the manifest was included in the database listing. The former occupant is not listed on any Federal, State or local regulatory database indicating a release of hazardous materials has impacted the subject site and hazardous waste appears to have been properly removed and transported off-site.

  Minor amounts of hazardous materials were observed within the commercial building formerly utilized as an auto repair shop. Evidence of the former auto repair shop operations consisted of two inspection pits, likely used during oil changes or other types of repairs to the underside of vehicles. The pits were constructed of concrete walls. It is unknown whether the floor of pits was also constructed of concrete since floor was not visible beneath accumulated dirt. Numerous wooden planks and a step/ladder structure were observed on the concrete foundation adjacent to the inspection pits. The wooden ladder was likely used to access the pits. No evidence of staining was noted on the concrete walls and only minor evidence of oil or staining was noted on the floor of one of the pits. No drains were observed in the sidewalls or floor of the pits. No evidence of hydraulic lifts or hoists were observed within the interior or exterior of the building. Minor engine oil drips, other fluid drips and staining typical of an auto repair shop were observed on the concrete floor of the building; however, the staining was *de minimus* and is not considered a concern to this

assessment. The concrete-lined pits will need to removed and backfilled prior to redevelopment of the subject site. Based on historic site usage and since the condition of the floor of the pits was not observed, the inspection pits represent a recognized environmental concern (REC) to this assessment.

PAOC

- Review of historical aerial photographs indicates that the subject site was utilized for agricultural purposes from at least 1937 through the 1970s. Although the potential exists that environmentally persistent pesticides/herbicides may have been applied to crops grown on the subject site; 1) no material evidence of the use of environmentally persistent pesticides/herbicides was obtained during the course of this assessment, and 2) the parcel has been fallowed since the 1970s. Krazan's sampling and analysis of surface soils from properties with similar agricultural histories has typically yielded non-detectable results or very low concentrations for analysis of environmentally persistent pesticides. It is anticipated that any environmentally persistent pesticides/herbicides potentially located on site will be dislocated and diluted as a result of the grading and trenching operations which will be conducted in connection with the proposed residential development of the property. Consequently, the potential for elevated concentrations of environmentally persistent pesticides/herbicides to currently exist in the near surface soils of the subject site appears to be low.

ASTM Non-Scope Consideration

- A structure has been located in the southwestern portion of the subject site since at least the 1960s. Although the majority of the commercial building was corrugated metal walls and roof, the office/reception area and restroom area constructed within the interior were finished with wallboard and painted. It is unknown if the structure contains asbestos-containing materials (ACMs) or lead-based paint (LBP). An asbestos and/or LBP survey and sampling of the structure was not included within the scope of this assessment. Based on the apparent date of construction, ACMs and LBP may be present at the subject site. Prior to the disturbance of any of the suspect ACMs or LBP at the subject site via demolition, comprehensive asbestos and LBP surveys are recommended.

Site Development Issues

- Based on the former auto repair shop usage and restroom observed within the building, a septic system is likely located on the property. During redevelopment activities, the septic system should be properly abandoned, removed or destroyed in accordance State and local guidelines.

1.0 INTRODUCTION

The proposed Chowchilla Multi-family development is located along the southeastern side of Robertson Boulevard at the intersection with Road 15, in Chowchilla, California 93610 (subject site). The subject site is an irregular-shaped property identified as Madera County Assessor's Parcel Number (APN) 026-233-008 and is 18.24 acres in area. The northern property boundary represents the boundary between Madera County and the City of Chowchilla city limits. The subject site is within a mixed rural and residential area of Chowchilla. The subject site is planned for two types of multi-family housing. The northeastern corner of the parcel will be subdivided into seventeen (17) lots that are planned for the development of 17 duplex homes (34 units total). The central and western portions of the parcel will be developed in two phases with a multi-family development that will include a total of 154 apartments.

Krazan conducted the Phase I ESA of the subject site in conformance with the American Society for Testing and Materials (ASTM) E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* This Phase I ESA constitutes all appropriate inquiry (AAI) designed to identify recognized environmental conditions (RECs) in connection with the previous ownership and uses of the subject site as defined by ASTM E 1527-21.

ASTM E 1527-21 Section 1.1.1 *Recognized Environmental Conditions* – In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means (1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

It is incumbent upon the user to read this Phase I ESA report in its entirety. If not otherwise defined within the text of this report, please refer to the Glossary of Terms Section following the References Section for definitions of terms and acronyms utilized within this Phase I ESA report.

Previous Environmental Assessments

No previous environmental assessments were provided to Krazan by Cen Cal Builders & Developers, Inc. for review as part of this assessment.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

According to ASTM E 1527-21, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products.* As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner,* or *bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the *landowner liability protections,* or *LLPs*): that is, the practice that constitutes *all appropriate inquiries* into the previous ownership and uses of the *property* consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B).

2.2 Scope of Work

The scope of work for this Phase I ESA conforms to ASTM E 1527-21. The Phase I ESA includes the following scope of work: a) a site reconnaissance of existing on-site conditions and observations of adjacent property uses, b) a review of user-provided documents, c) a review of historical aerial photographs, a review of pertinent building permit records, cross-reference directories, historical Sanborn Fire Insurance Maps (SFIMs), and interview(s) with person(s) knowledgeable of the previous and current ownership and uses of the subject site, d) a review of local regulatory agency records, and e) a review of local, state, and federal regulatory agency lists compiled by Environmental Data Resources, Inc. (EDR).

Krazan was provided written authorization to conduct the Phase I ESA by Mr. Tommy Phelen, President, Cen Cal Builders & Developers, Inc. on May 17, 2023 in response to Krazan's Proposal No. P23-232 dated May 16, 2023.

3.0 SUBJECT SITE SETTING

The subject site is located on the southeast side of Robertson Boulevard and the northeast side of Road 15, Chowchilla, California. The subject site is an irregular-shaped parcel approximately 18.24 acres in area and currently zoned Residential, Rural, Single Family District (RRS) within the County of Madera; however, according to the City of Chowchilla Land Use Map the Project is zoned High Density Residential (HDR). The subject site is approximately 18.24 acres in area and is within a mixed rural and residential area of Chowchilla. The property is to be annexed into the City of Chowchilla's city limits. The northern boundary represents the boundary between Madera County and the Chowchilla city limits.

General property information and property use are summarized in the following table. Refer to Figures No. 1 – 3 for subject site details.

Subject Site Information Summary	
Current Owner:	BCH Inv LLC
Assessor's Parcel Number:	026-233-008
Address:	24499 Robertson Boulevard
Historical Address:	None
General Location:	Southeast side of Robertson Boulevard and the northeast side of Road 15
Acreage:	18.24 acres
Existing Use:	Single-structure, former agriculture
Number of Buildings:	One
Original Construction Date:	Circa 1960
Proposed Use:	Multi-family residential
Electricity:	Pacific Gas & Electric (PG&E)
Natural Gas:	Pacific Gas & Electric (PG&E)
Potable Water:	City of Chowchilla (upon development)
Sanitary Sewer:	City of Chowchilla (upon development)
Latitude / Longitude:	37-104784 / 120.276001
Topographic Map:	U.S. Geological Survey, 7.5-minute Chowchilla, California
Topographic Map Location:	SE ¼ of NE ¼ and NE ¼ of SE ¼ Section 36, Township 09 South, Range 15 East, Mount Diablo Baseline and Meridian
Topography:	Approximately 228 feet above mean sea level
Approximate Depth to Groundwater:	290 feet below ground surface (bgs), State of California Department of Water Resources (DWR)*
Regional Groundwater Flow Direction:	Northeast, DWR*

Notes: * State of California, Department of Water Resources, *Sustainable Groundwater Management Act (SGMA) Data Viewer, Spring 2025*

3.1 Geology and Hydrogeology

The subject site is located within the San Joaquin Valley, a broad structural trough bound by the Sierra Nevada and Coast Ranges of California. The San Joaquin Valley, which comprises the southern portion of the Great Valley of California, has been filled with several thousand feet of sedimentary deposits. Sediments in the eastern valley, derived from the erosion of the Sierra Nevada, have been deposited by major to minor west-flowing drainages and their tributaries. Near-surface sediments are dominated by sands and silty sands with lesser silts, minor clays, and gravel. The sedimentary deposits in the region form large coalescing alluvial fans with gentle slopes. According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service, soils at the subject site are described as Grangeville fine sandy loam and Tujunga loamy sand, both with 0 to 1 percent slope and with a lesser amount of Grangeville fine sandy loam with 0 to 3 percent slopes. Groundwater in the subject site vicinity was reported to be first encountered at a depth of approximately 290 feet bgs in Fall 2024. The groundwater flow direction in the area of the subject site was reported to be toward the northeast.

4.0 SITE BACKGROUND

A review of historical Sanborn Fire Insurance Maps (SFIMs), historic USGS topographic maps, reasonably ascertainable city cross-reference directories, historical aerial photographs, local agency records and previous environmental reports, as made available to Krazan, were utilized to assess the history of the subject site.

4.1 Sanborn Fire Insurance Maps

Krazan reviews Sanborn Fire Insurance Maps (SFIMs) to evaluate prior land use of the subject site and the adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the subject site within the city limits. Krazan contracted with Environmental Data Resources, Inc. (EDR) to provide copies of available SFIMs for the subject site and the adjacent properties. EDR's search of Sanborn Insurance maps revealed no coverage for the subject site and the adjacent properties. Refer to Appendix A – *EDR – Certified Sanborn® Map Report* dated July 29, 2025 for details.

4.2 USGS Topographic Quadrangle Map

Krazan reviewed the 7.5-minute, Chowchilla, California topographic quadrangle maps 1918, 1948, 1960 1976, 2012, 2015 and 2018). Refer to Appendix A – *EDR - Historical Topo Map Report* for details.

Topographic Maps Summary		
Year	***Site Usage***	***Adjacent Property Usage***
1918	The subject site is depicted as undeveloped.	A railroad spur extends along the southeastern property boundary. Adjacent properties to the northeast and southeast are depicted as undeveloped. Structures typical of single-family residences were noted to the southwest and northwest of the site. The city of Chowchilla is approximately 1 mile to the northeast.
1948	The subject site is unchanged from the 1918 map.	Surrounding properties are relatively unchanged from the 1918 map. Additional residences are depicted to the southeast and southwest.
1960, 1976	A rectangular structure is depicted in the southwest corner of the subject site as of the 1960 map. This feature appears to be the same structure observed during the site reconnaissance.	Surrounding properties are relatively unchanged from the 1948 map. The railroad spur is labeled Southern Pacific and appears to terminate at the southeastern corner of the subject site as of the 1960 map.

Topographic Maps Summary		
Year	***Site Usage***	***Adjacent Property Usage***
2012, 2015, 2018	The subject site is depicted at the southwestern extent of the city of Chowchilla. Map details include streets, highways and freeways, waterways, and surface elevation contours. Subject site features such as structures are not denoted.	Surrounding properties are depicted at the southwestern extent of the city of Chowchilla. The railroad is no longer depicted. Map details include streets, highways and freeways, waterways, and surface elevation contours. Property features such as structures are not denoted.

There were no structures depicted on the subject site between 1918 and the late-1940s. As of 1960, a rectangular structure was depicted in the southwestern corner of the subject site. This feature appears to be the same structure observed during the site reconnaissance. Review of topographic maps did not identify environmental concerns at the subject site or surrounding properties.

4.3 City Cross-Reference Directories

Krazan contracted with EDR to provide a review of available cross-reference directories for the subject site and adjacent/vicinity properties. EDR provided listings dated between 1973 and 2020. A summary of cross-reference directory information is presented in the following table. Refer to Appendix A – *EDR - City Directory Image Report* for details.

Cross-Reference Directories Summary		
Address	***Owner / Occupant***	***Years***
Subject Site		
24499 Robertson Boulevard	Frank's Auto Service	1973, 1975, 1980, 1985, 1990, 1992, 2000, 2010
	Address listed, no occupant	2014, 2017, 2020
Adjacent/Vicinity Properties		
Adjacent to the Northwest		
Adjacent to the Northeast		
No addresses	No listings	
Adjacent to the Southeast		
24349 Road 15		
Adjacent to the Southwest		
24371 Road 15	Cameron Neff – Portable Welding	1973, 1975, 1980, 1985, 1992, 2000, 2005, 2010
	RB Welding, Jeffrey M Whatley	2014

Cross-Reference Directories Summary		
Address	***Owner / Occupant***	***Years***
	RB Welding, Blair Schales	2017
	Desiree Fenner, Kacey Bass	2020
24447 Road 15	Kenneth Lambert	1975
	No listing	1980, 1985, 1990
	Gathan D Parker	2000, 2005
	Francisca Flores	2010
	Jorge I Lopez	2014
	Miguel A Gonzalez	2017
	Francisca Flores, Miguel A Gonzalez, Manuel Gonzalez	2020
24467 Robertson Boulevard	M H Hubbard	1973, 1975, 1980, 1985, 1990, 1992, 1995, 2000, 2005, 2010

Krazan's review of cross-reference directories indicates that subject site was developed with an auto service shop between the 1970s and 2010s. The properties adjoining the parcel to the southwest (along the northeastern side of Road 15) have been residential and a welding shop since the 1970s. Information obtained from review of cross-reference directories is consistent with that obtained from other historical sources during the course of this assessment. Review of city directories identified the former on-site usage as an auto service shop a potential area of concern (PAOC) to this assessment.

4.4 Aerial Photograph Interpretation

Historical aerial photographs were obtained from EDR reviewed to assess the history of the subject site. The aerial photograph summary is provided in the following table. Refer to Appendix A – *Aerial Photo Decade Package* from EDR and Google Earth dated August 2025 for details.

Aerial Photograph Review Summary		
Year	***Site Use***	***Adjacent Properties***
1937, 1942, 1946	The subject site is agriculture.	Palm tree lined Robertson Boulevard is visible along the northwestern boundary. Structures typical of a rural residence and storage sheds are depicted on the adjoining parcel to the southwest (northeast side of Road 15). Remaining adjacent properties are agriculture, with rural residential homesteads to the east, south, southwest and west.
1950	The subject site remains agriculture.	Additional residential homesteads are visible to the east. Surrounding properties are unchanged from the 1946 photo.

Aerial Photograph Review Summary		
Year	***Site Use***	***Adjacent Properties***
1957	The subject site remains agriculture.	A rural residence and storage structure are visible on the adjoining parcel to the south (northeast side of Road 15). Remaining surrounding properties are unchanged from the 1950 photo.
1966	The majority of the subject site remains agriculture; however, development is visible in the southwestern corner. Although the photo quality is poor, two structures appear to have been constructed.	A second rural residence and storage structure are visible on the adjoining parcel to the south (northeast side of Road 15). Remaining surrounding properties are unchanged from the 1966 photo.
1972, 1976	A rectangular structure is visible in the southwest corner of the subject site. The remaining area of the subject site appears to be fallow.	Surrounding property usage is relatively unchanged from the 1966 photo. Single-family residences are noted to the southwest along Robertson Boulevard.
1984, 1998	The subject site remains unchanged from the 1976 photo.	Surrounding property usage is relatively unchanged from the 1976 photo; however, a single-family development is noted to the west beyond Robertson Boulevard in the 1984 photo and adjacent to the northeast in the 1998 photo.
2006, 2010, 2014, 2018	The subject site remains unchanged from the 1998 photo.	Surrounding properties are residential and various stages of agriculture and fallow land.
2025	The subject site is unchanged from the 2018 photo.	Surrounding properties are unchanged from the 2018 photo.

The subject site was cultivated with agriculture from at least the 1930s through the 1970s. A structure, consistent with the rectangular building observed during the site reconnaissance, was developed in the southwestern portion of the subject site by at least the 1960s. The subject site appears to have been fallowed since the 1970s with the structure remaining in the southwestern corner. Information obtained from the review of aerial photographs are consistent with that obtained from other historical sources during the course of this assessment. Review of aerial photographs did not identify environmental concerns at the subject site or surrounding properties.

4.5 Municipal Records

Madera County Community and Economic Development Department

On August 9, 2023, a Records Request was submitted to the Madera County Community and Economic Development Department regarding building and/or demolition permit records, records of any storage tanks (above ground or underground), and permits for hazardous materials usage at the subject site. The Madera County Community and Economic Development Department replied on August 22, 2023 that there are no records on file for the subject site address or parcel number.

Madera County Fire Department

The Madera County Fire Department has jurisdiction for fire protection for the subject site and the immediate vicinity. On November 30, 2023, the Madera County Fire Department was contacted regarding potential records of hazardous materials storage in aboveground or underground storage tanks or hazardous materials spill incidents for the subject site. On November 30, 2023, Battalion Chief Marin indicated that there are no records on file for the subject site parcel.

4.6 Previous Environmental Assessments

No previous environmental assessments were provided to Krazan by CenCal Builders for review as part of this assessment.

4.7 Agricultural Chemicals

Based on Krazan's experience, impacts from agricultural chemicals are most often identified in association with chemical mixing and storage areas (structures). Review of historical aerial photographs indicates that the subject site was utilized for agricultural purposes from at least 1937 through the 1970s. Although the potential exists that environmentally persistent pesticides/herbicides may have been applied to crops grown on the subject site; 1) no material evidence of the use of environmentally persistent pesticides/herbicides was obtained during the course of this assessment, and 2) the parcel has been fallowed since the 1970s. Krazan's sampling and analysis of surface soils from properties with similar agricultural histories has typically yielded non-detectable results or very low concentrations for analysis of environmentally persistent pesticides. It is anticipated that any environmentally persistent pesticides/herbicides potentially located on site will be dislocated and diluted as a result of the grading and trenching operations which will be conducted in connection with the proposed residential development of the property. Consequently, the potential for elevated concentrations of environmentally persistent pesticides/herbicides to currently exist in the near surface soils of the subject site appears to be low.

5.0 USER-PROVIDED INFORMATION

A review of user-provided information was conducted in order to help identify pertinent information regarding potential environmental impacts associated with the subject site.

5.1 Environmental Liens/Activity and Use Limitations Report

An Environmental Lien/Activity and Use Limitations (EL/AUL) Report provides results from a search of available land title records for environmental cleanup liens institutional controls (ICs), environmental land use controls (LUCs), environmental activity and use limitations (AULs), or declaration of environmental use restrictions (DEULs) which may have been filed against the subject site or exist in connection with the subject site as indicated by the subject site EL/AUL Reports.

An Environmental Lien/Activity and Use Limitations (EL/AUL) Report for the subject site APN was not provided to Krazan, nor requested to be obtained by Krazan, for inclusion with this Phase I ESA. *The absence of an EL/AUL report represents a data gap.*

5.2 Title Report

A title report is reviewed to identify potential environmental deed restrictions, environmental liens, or environmental activity and use limitations (AULs) which may have occurred on or exist in connection with the subject site. Neither a Preliminary Title report nor Final Title Report for the subject site was provided to Krazan by CenCal Builders, the Phase I ESA user. *The absence of a Title Report represents a data gap.*

5.3 Interviews

Krazan conducts interviews with the owner of the subject site, a key site manager, subject site occupant(s), and/or the previous owner/occupant(s) of the subject site. The interview(s) is/are designed to provide pertinent information regarding potential environmental impacts associated with the subject site.

Subject Site Owner

A completed Phase I ESA Owner Questionnaire has not been received by Krazan from by Mr. Tommy Phelen, President, Cen Cal Builders & Developers, Inc., Krazan's client and the Phase I ESA user, as of the date of this report. Consequently, information regarding the history and historical uses of the subject site obtained from the user constitutes a data gap.

Previous Subject Site Owner Interview

A Phase I ESA interview with a previous owner of the subject site was not conducted as contact information for the previous owner was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of a previous owner and/or occupant constitutes a data gap.

5.4 Phase I Environmental Site Assessment User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiry* is not complete. The user is asked to provide information or knowledge of the following:

1. Environmental cleanup liens that are filed or recorded against the site.
2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
3. Specialized knowledge or experience of the person seeking to qualify for the LLPs.
4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.
5. Commonly known or *reasonably ascertainable* information about the *property*.
6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.
7. The reason for preparation of this Phase I ESA.

A completed Phase I ESA User Questionnaire has not been received by Krazan from by Mr. Tommy Phelen, President, Cen Cal Builders & Developers, Inc., Krazan's client and the Phase I ESA user, as of the date of this report. Consequently, information regarding the history and historical uses of the subject site obtained from the user constitutes a data gap.

6.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Ms. Laurie Blakeman, Krazan's Environmental Professional, on July 11, 2023, August 8, 2025, and on December 22, 2025. Ms. Blakeman was unescorted during the July 2023 and August 2025 site reconnaissance. Although access to the interior of the existing structure was unavailable during the two initial visits, access was provided during the December 2025 visit. The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions, including hazardous substances and petroleum products, in connection with the property (including soils, surface waters, and groundwater).

6.1 Observations

The following table summarizes the subject site features encountered during our site reconnaissance. Observed features are noted in the table below and described in detail below the table. Refer to Figure No. 3 - *Site Map* and *Photographs* for locations and details pertaining to site-specific features discussed in this section of the report.

Site Reconnaissance Summary		
Features	***Observed***	***Not Observed***
Structures (existing)	X	
Evidence of Past Uses (foundations, debris)		X
Hazardous Substances and/or Petroleum Products (including containers)		X
Aboveground Storage Tanks (ASTs)		X
Underground Storage Tanks (USTs) or evidence of USTs		X
Evidence of Underground Pipelines (non-irrigation)		X
Strong, Pungent, or Noxious Odors		X
Pools of Liquid likely to be Hazardous Materials or Petroleum Products		X
Drums	X	
Unidentified Substance Containers		X
Potential Polychlorinated Biphenyl (PCB)-Containing Equipment	X	
Subsurface Hydraulic Equipment		X
Heating/Ventilation/Air Conditioning (HVAC)		X
Stains or Corrosion on Floors, Walls or Ceilings		X
Floor Drains, Sumps, or Oil/Water Clarifiers		X
Storm Drains		X
Pits, Ponds, or Lagoons	X	
Stained Soil and/or Pavement	X	
Soil Piles		X
Stressed Vegetation		X
Waste or Wastewater (including stormwater) Discharges to Surface/Surface Waters		X

Site Reconnaissance Summary		
Features	***Observed***	***Not Observed***
Wells (Irrigation, Domestic, Dry, Injection, Abandoned, Monitoring Wells)		X
Septic Systems		X
High-voltage, tower-mounted transmission lines		X

The subject site was observed to be primarily vacant, uncultivated land. One structure was observed in the southwest corner of the subject site. A mailbox observed near the structure along Robertson Boulevard indicated the former occupant of the building was Frank's Auto Service addressed 24499 Robertson (Boulevard). The structure was built upon a concrete foundation with corrugated metal exterior walls. Access to the interior of the existing structure identified a small office or reception area adjacent to the front door, an open interior, a restroom, and a rear sliding corrugated metal door on the eastern portion wall of the building. The building was equipped with numerous skylights across the corrugated metal roof.

Minor amounts of hazardous materials were observed within the commercial building formerly utilized as an auto repair shop. With the exception of an air compressor, equipment associated with the former auto repair shop appeared to have been removed from the building. Evidence of the former auto repair shop operations consisted of two inspection pits, used during oil changes or other types of repairs to the underside of vehicles. The pits were constructed of concrete walls. It is unknown whether the floor of pits was also constructed of concrete since the floor was not visible beneath accumulated dirt. No evidence of staining was noted on the concrete walls and evidence of minor oil or staining was noted on the floor of the western pit. Numerous wooden planks and a step/ladder structure were observed on the concrete foundation adjacent to the inspection pits. The wooden ladder was likely used to access the pits. No drains were observed in the sidewalls or floor of the pits. No evidence of hydraulic lifts or hoists were observed within the interior or exterior of the building. Minor engine oil drips. other fluid drips and staining typical of an auto repair shop were observed on the concrete floor of the building; however, the staining was *de minimus* and is not considered a concern to this assessment. The concrete-lined pits will need to removed and backfilled prior to redevelopment of the subject site.

Two 55-gallon drums, each partially filled with Chevron 1000 THF tractor hydraulic oil, were stored within the building for use in the tractor when needed to disk the former agricultural portion of the property by the property owner. The drums were not stored within a secondary containment unit. Evidence of minor oil drips were observed on the cardboard material beneath the drums; however, the staining was *de minimus* and is not considered a concern to this assessment.

Since the auto repair shop vacated the building, it has been utilized by a tenant for the storage of various types of hand tools, a table saw, tile cutting saw, small quantities of hazardous materials (12-ounce to 1-gallon containers) and various personal items. The minor amounts of hazardous materials observed within the building are not considered a concern to this assessment.

An asphalt-paved area was observed to the west of the building allowing ingress/egress for vehicles from Robertson Boulevard. A concrete pad approximately 30-feet by 50-feet in area was observed adjacent to the east of the building. An approximately 3-foot square concrete pad was observed adjacent to the north of the building. Steel piping extending from a port to the building was observed and appeared to be a natural gas line. The concrete pad and piping were likely used in association with air compressor observed on the interior of the building adjacent to the pad. A tractor was observed on-site during the December 2025 site visit. No evidence of aboveground or underground storage tanks was observed.

Based on the former auto repair shop usage and restroom observed within the building, a septic system is likely located on the property. During redevelopment activities, the septic system should be property abandoned, removed or destroyed in accordance State and local guidelines.

During the visual observations of the subject site, no obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the areas observed. No unusual odors or stressed vegetation was observed on the subject site. No standing water or major depressions were observed on the subject site. One pole-mounted transformer was observed in the southwestern corner of the subject site along Road 15. No pad-mounted electrical transformers and no high-voltage, tower-mounted electrical transmission lines were observed on or adjacent to the subject site.

6.2 Adjacent Streets and Property Usage

The following table summarizes the current adjacent streets and adjacent property uses observed during the site reconnaissance.

Adjacent Streets and Property Usage		
Direction	***Adjacent Street***	***Adjacent Property Usage***
Northwest	Robertson Boulevard	Vacant, rural residential
Northeast	None	Vacant parcel and single-family residential
Southeast	None	Rural residence, agriculture
Southwest	North side of Road 15	Rural residences - 24371 Robertson Boulevard and 24447 Robertson Boulevard
	South side of Road 15	Rural residence and orchard - 24467 Robertson Boulevard

Based on the observed uses of the properties located immediately adjacent to the subject site, it is unlikely that significant quantities of hazardous materials currently are stored at these properties.

6.3 Polyfluoroalkyl Substances (PFAS)

PFAS, or per- and polyfluoroalkyl substances, are a group of synthetic chemicals used in various products for their water- and grease-resistant properties. They are often referred to as "forever chemicals" due to their persistence in the environment and potential health risks, including links to certain cancers and hormone disruption. Industries that historically used or disposed of products containing PFAS, such as firefighting foam (aqueous film-forming foams or AFFF), waterproof coatings, metal plating chemicals, and certain electronics manufacturing processes, are most closely associated with potential PFAS contamination. Potential firefighting sources of PFAS include airports and aviation facilities, military bases and training centers, petroleum refineries and terminals, and petrochemical production facilities.

As of July 8, 2024, the EPA's Final Rule publication became effective; pursuant to CERCLA, the EPA is designating two PFAS, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), including their salts and structural isomers, as hazardous substances. PFAS contamination now falls within the scope of ASTM E1527-21 for recognized environmental conditions (RECs). Should indications from historical records or site use warrant further investigation.

Based on the Office of Environmental Health Hazard Assessment's Perfluorooctanioc Acid and Perfluorooctane Sulfonic Acid in Drinking Water dated March 2024, indicated potential drivers of PFAS and PFOA usage include textile finishing industry, water repellant treatment facilities, carpet manufacturing, paper and packaging manufacturing, fire-fighting foams manufacturing/application, photographic industry, aviation industry, metal plating industry, food packaging, history of fume suppressant, and semiconductor manufacturing.

Krazan found no direct evidence of the historical usage of PFAS; therefore, neither the historical nor current on-site usage represent an environmental concern in connection with this assessment. As a better understanding of PFAS continues, the guidelines for PFAS environmental evaluations may change over time, indicating future environmental assessments may be different than the findings of this environmental assessment.

6.4 ASTM Non-Scope Considerations

According to ASTM E 1527-21, there may be environmental issues or conditions at assessed properties that are outside the scope of the Phase I ESA practice (non-scope considerations). Some substances may be present in quantities and under conditions that may lead to contamination of the subject site or of nearby properties but are not included in CERCLA's definition of hazardous substances (42 U.S.C. §9601[14]). ASTM Non-scope considerations appropriate for the subject site are discussed below.

Asbestos-Containing Materials

Asbestos is a group of naturally occurring mineral fibers that have been used commonly in a variety of building construction materials for insulation and as a fire-retardant. Because of its fiber strength and heat resistant properties, asbestos has been used for a wide range of manufactured goods, mostly in building materials, vehicle brakes, and heat-resistant fabrics, packaging, gaskets, and coatings. When asbestos-containing materials (ACMs) are damaged or disturbed by repair, remodeling, or demolition activities, microscopic asbestos fibers may become airborne and can be inhaled into the lungs, where they can cause significant health problems.

The structure located on the subject site was estimated to be constructed circa 1960. An asbestos survey and sampling of the on-site structure was not included within the scope of this assessment. Although the majority of the commercial building was corrugated metal walls and roof, the office/reception area and restroom area constructed within the interior were finished with wallboard. Based on the date of construction, ACMs may be present within the interior of the structure. Prior to the disturbance of any suspect ACMs at this facility prior to demolition, a comprehensive asbestos survey is recommended. If such materials are identified and need to be disturbed, repaired, or removed, a licensed abatement contractor should be consulted.

Lead-Based Paint

Although lead-based paint (LBP) was banned in 1978, many buildings constructed after 1978 have paint that contains lead. Lead from paint, chips, and dust can pose serious health hazards if not addressed properly.

The structure located on the subject site was estimated to be constructed circa 1960. A LBP survey and sampling of the on-site structure was not included within the scope of this assessment. Although the majority of the commercial building was corrugated metal walls and roof, the office/reception area and restroom area constructed within the interior were finished with wallboard and painted. Based on the date of construction, LBP may be present at the subject site. Prior to the disturbance of any of the suspect LBP

at this facility prior to demolition, a comprehensive LBP survey is recommended. If such materials are identified and need to be disturbed, repaired, or removed, a licensed abatement contractor should be consulted.

Radon

Radon is a radioactive gas that is found in certain geologic environments and is formed by the natural breakdown of radium, which is found in the earth's crust. A radon survey was not included within the scope of this investigation; however, the State of California Department of Public Health (CDPH) maintains a statewide database of radon results in designated geographic areas. Radon detection devices are placed in homes throughout the study region to determine geographic regions with elevated radon concentrations. The U.S. EPA has set the safety standard for radon gas in homes to be 4.0 pico Curies per liter (pCi/L).

The US EPA has prepared a map to assist National, State and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. Review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are between 2.0 – 4.0 pCi/L. Therefore, the available data suggests that the potential for radon to adversely impact the subject site appears to be low.

Wetlands

As defined by the U.S. EPA and the Department of Army, Corps of Engineers, wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Jurisdictional wetlands are regulated under Section 404 of the Clean Water Act (1972, 1977, and 1987, and also the 1985 and 1990 Farm Bills), and are important for protection of aquatic waterfowl and species, water purification, and flood control. According to current Corps of Engineers information, three basic criteria are currently used to define wetlands:

- Wetland hydrology - areas exhibiting surface or near-surface saturation or inundation at some point in time (greater than 12.5 percent of growing season defined on basis of frost-free days) during an average rainfall year.

- Hydrophilic vegetation - frequency of occurrence of wetland indicator plants (plant life growing in water, soil, or substrate that is periodically deficient in oxygen as a result of excessive water

content).

- Hydric soil - landscape patterns identified by saturation, flooding, or ponding long enough during the growing season (generally seven days) which develop characteristic color changes in the upper part of the soil as a result of anaerobic conditions.

Based on Krazan's reconnaissance of the subject site, evidence was not apparent to suggest that the site contained a wetland. Furthermore, according to the U. S. Fish & Wildlife Service (USFWS) National Wetlands Inventory available via the USFWS Internet website, the subject site does not contain a designated wetland. Therefore, at this time, regulations pertaining to wetlands do not appear to impact the subject site.

Environmental Non-Compliance Issues

No material non-compliance issues were identified in connection with the subject site in the process of preparing this report.

Activity and Use Limitations

No activity and use limitations were identified in connection with the subject site in the process of preparing this report.

6.5 Regulatory Agency Records Review

A review of Federal and State regulatory databases was conducted to help determine if hazardous materials have been handled, stored, or generated on the subject site and/or the adjacent properties and businesses. The Federal and State environmental databases consulted in the course of this assessment were compiled by Environmental Data Resources, Inc. (EDR) and identified facilities within the search distances specified in ASTM 1527-21. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. No EDR-listed unmapped (non-geocoded) sites identified were determined to be located on or adjacent to the subject site. Krazan did not verify the locations and distances of every property listed by EDR. Refer to Appendix C – *EDR Radius Map Report* for the Map Findings Summary and complete details of the complete report.

Regulatory records are reviewed based on the following criteria: 1) properties with known soils and/or groundwater releases considered to represent the potential for impact to the subject site that are located within 1,760 feet of the subject site for constituents of concern impacts or 528 feet of the subject site for petroleum hydrocarbon impacts; 2) properties that are adjacent or in proximity to the subject site included

within the EDR regulatory database report or noted during the site reconnaissance to possibly handle, store, or generate hazardous materials. Applicable property records are discussed below.

No Federal Superfund – National Priorities List (NPL) sites were determined to be located within a one-mile radius of the subject site according to Krazan's July 28, 2025 review of the State of California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control Envirostor database and the Environmental Data Resources, Inc. (EDR) regulatory agency database report.

State of California Environmental Protection Agency

Krazan's July 28, 2025 review of the State of California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control (DTSC) Envirostor database available via the DTSC's Internet Website indicated that no records of cleanup sites including voluntary cleanup sites, school cleanup sites, or military or school evaluation sites are listed for the subject site, the adjacent properties, or properties located within 528 feet of the subject site, and no State response sites are located within 1,760 feet of the subject site. Based on the site reconnaissance and records review, DTSC sites are not considered a concern to this assessment.

State of California Regional Water Quality Control Board - Geotracker

Krazan's July 28, 2025 review of the State of California Regional Water Quality Control Board (RWQCB) GeoTracker database available via the RWQCB Internet Website did not identify any cleanup sites including LUST sites, cleanup program sites, land disposal sites, or military sites at the subject site. or properties located within a 500-foot radius of the subject site.

U.S. Environmental Protection Agency – UST Finder

The U. S. Environmental Protection Agency (USEPA) developed UST Finder, a web map application containing a comprehensive national map of USTs. UST Finder contains information about the proximity of UST facilities and UST releases to surface and groundwater public drinking water protection areas. Krazan's July 28, 2025 review of the UST Finder database found that no USTs or UST releases were reported on the subject site or on the properties located adjacent to the subject site.

USEPA – California State Institutional Controls/Engineering Controls Registry

Krazan's July 28, 2025 review of the USEPA *California State Institutional Controls/Engineering Controls Registry* indicated that no recorded institutional or engineering controls were located on the subject site or on the properties located adjacent to the subject site.

California Department of Conservation, California Geologic Energy Management Division

Krazan's July 28, 2025 review of the State of California Department of Conservation, California Geologic Energy Management Division (CalGEM) GIS Online Mapping System indicated that no plugged and abandoned or producing oil wells are located on or adjacent to the subject site.

U.S. Department of Transportation – Pipeline & Hazardous Materials Safety Administration

Krazan's July 28, 2025 review of the U.S. Department of Transportation – Pipeline & Hazardous Materials Safety Administration (PHMSA) National Pipeline Mapping System database available via the U.S. Department of Transportation website indicated that no natural gas transmission pipelines, no hazardous liquid pipelines, and no hazardous liquid spill incidents are located on the subject site or on the properties located adjacent to the subject site.

State of California Office of Emergency Services – Spills Database

Krazan's July 28, 2025 review of the State of California Office of Emergency Services (Cal OES) Spill Reports database, available via the Cal OES website indicated that no hazardous materials spill reports are included in the Cal OES Spill Reports database for the subject site address of 24499 Robertson Boulevard.

Madera County Department of Public Health, Environmental Health System

The Madera County Environmental Health Division (MCEHD) is the lead regulatory agency or Certified Unified Program Agency (CUPA) for hazardous materials handling facilities in Madera County. On June 28, 2024, Krazan's submitted a request for records for any tank permits (underground or aboveground) and any hazardous materials usage permits for the subject site address or parcel number. On July 12, 2024, the MCEHD replied that there were no records related to the request .

Local Area Tribal Records

No Indian reservations, USTs on Indian land, or LUSTs on Indian land were reported on the subject site, adjacent properties, or vicinity properties in the EDR-provided database report.

Regulatory Database Review

Several agencies have published documents that list businesses or properties which have handled hazardous materials or waste or may have experienced site contamination. The lists consulted in the course of our assessment were compiled by EDR and Krazan and represent reasonably ascertainable current listings. Krazan did not verify the locations and distances of every property listed by EDR. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the

subject site. The actual location of the listed properties may differ from the EDR listing. No EDR-listed unmapped (non-geocoded) sites identified were determined to be located on or adjacent to the subject site.

- Frank's Auto Service
  24499 Robertson Boulevard
  Subject site

The former occupant of the subject site is listed on the Hazardous Waste Tracking System (HWTS) database maintained by the DTSC. The tracking system collects both manifest copies from the generator and the destination facility. Records maintained for the former occupant began in April 1999 and ended in June 2001. The owner was noted to be Frank Hijos. No other details regarding the type of waste transported off-site via the manifest was included in the database listing. The former occupant is not listed on any database indicating a release of hazardous materials has impacted the subject site. Refer to Section 6.1 *Observations* above for details pertaining to hazardous materials usage noted during the site reconnaissance in the former onsite auto repair shop. The inspections pits associated with the former onsite auto repair shop represent a REC at the subject site.

- MCI-Worldcom
  26805 Road 15, 1.5 miles north of Chowchilla
  1.68 miles north of the subject site

  The facility is listed on the Emissions Inventory Data (EMI) and CERS databases. The EMI database maintains toxics and criteria pollutant emissions data collected by the Air Resources Board (ARB) and local air pollution agencies. Based on review of the property address, Krazan verified the location of the telecom site as being located at the intersection of Road 15 and Avenue 26, approximately 1.68 miles north of the subject site. Based on the distance, this facility does not represent an environmental concern in connection with the subject site.

Hazardous Materials Migration in Soils and/or Groundwater

The remaining properties within the specified search radius of the subject site which appeared on local, state, or federally published lists of sites that use or have had releases of hazardous materials or petroleum products are of sufficient distance and/or situated hydraulically cross- or downgradient from the subject site such that impact to the subject site via groundwater migration is unlikely. In general, potentially hazardous materials released from facilities located approximately hydraulically upgradient within subject site vicinity, or in a hydraulically cross-gradient direction in proximity to the site, may have a reasonable potential of migrating to the subject site via groundwater flow. This opinion is based on the assumption that non-vaporous hazardous materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow. However, the potential for migration of volatile hazardous materials may include movement within soils, groundwater flow or potentially omni-directionally if present in a vaporous state.

Hazardous Materials Migration in Vapor

Hazardous materials or petroleum product vapors which may have the potential to migrate into the subsurface of the subject site may be caused by the release of vapors from contaminated soil or groundwater either on or in the vicinity of the subject site from current or historical uses of the subject site and/or adjacent or vicinity properties. Current or past land uses such as gasoline stations (using petroleum hydrocarbons), dry cleaning establishments (using chlorinated volatile organic compounds), former manufactured gas plant sites (using volatile and semi-volatile organic compounds), and former industrial sites such as those that had vapor degreasing or other parts-cleaning operations (using chlorinated volatile organic compounds) are of particular concern. Constituent of concern vapors are capable of migrating great distances omni-directionally along subsurface conduits such as pipelines, utility lines, sewer and stormwater lines, and building foundations.

Based on Krazan's observations and review of State and local regulatory agency records and the EDR regulatory database report, no listings of concern related to potential vapor migration were determined to be associated with the subject site, adjacent properties, or properties located within the subject site vicinity. The rationale supporting this opinion includes the following:

- Relevant sites had undergone investigation and remediation sufficient to receive regulatory agency closure.
- Sites with reported releases of minor quantities of constituents of concern (COCs), or COCs of limited volatility impacting soil only were considered of minimal concern.
- Sites with reported releases of COCs including volatile organic compounds (VOCs) were either of sufficient distance or hydraulically down- or cross-gradient from the subject site such that they do not appear to represent a significant potential for vapor migration on the subject site.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject site, adjacent sites or vicinity properties in the EDR Report.

7.0 DISCUSSION OF FINDINGS

Summary of Conclusions		
Apparent Evidence of RECs or PAOCs From	***Not Noted***	***Noted***
Historical Uses	X	
Current Uses		X
Adjacent of Vicinity Property Uses	X	

Historical Uses

Based on Krazan's review of historical aerial photographs, historical topographic maps, and historical cross-reference directories, a site reconnaissance, contacts with the local regulatory agencies, and an interview with a representative of the owner of the subject site, there is no material evidence that RECs exist in connection with the historical uses of the subject site.

Current Uses

Based on Krazan's site reconnaissance, contacts with local regulatory agencies, and an interview with a representative of the owner of the subject site, there is evidence that RECs exist in connection with the current uses of the subject site in addition to potential area of concern (PAOC), ASTM Non-Scope Considerations and site development issues. Refer to Section 8.0 – *Conclusions* for details.

Adjacent or Vicinity Property Uses

Based on Krazan's field observations, review of the EDR government database report, and consultation with local regulatory agencies, there is no material evidence that RECs exist in connection with the subject site from adjacent or vicinity property uses.

7.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E 1527-21 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objectives of this practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

The following is a summary of data gaps encountered in the process of preparing this report including an observation as to the presumed significance of that data gap to the conclusions of this assessment:

- Absence of Environmental Lien Search or Final Title Report (Sections 5.1 and 5.2)

  Neither a current Environmental Lien Search nor Final Title Report was provided by the Phase I ESA Owner/User; therefore, a data gap exists. Taken in consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the contents of a current Environmental Lien Search or Final Title Report is unknown.

- Absence of Interview with the Previous or Current Property Owner/Occupant (Section 5.3)

  A Phase I ESA interview with the previous or current owner of the subject site was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of the previous or current owner of the subject site constitutes a data gap. Taken in consideration with the available information obtained in the course of preparing this report in connection with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the content of an interview with the previous or current property owner is unknown.

8.0 CONCLUSIONS

We have conducted a Phase I ESA of the subject site in conformance with the scope and limitations of the ASTM E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* guidance documents. Any deviations from this practice were previously described in this report.

Krazan identified evidence of a recognized environmental concern (REC) in connection with the subject site as defined by ASTM E 1527-21, in addition to potential area of concern (PAOC), ASTM Non-Scope Considerations and site development issues. No evidence of a controlled recognized environmental concern (CREC) or historical recognized environmental concern (HREC) in connection with the subject site as defined by ASTM E 1527-21 was noted during this assessment.

The subject site was cultivated with agriculture from at least the 1930s through the 1970s. A structure, consistent with the rectangular building observed during the site reconnaissance, was developed in the southwestern portion of the subject site by at least the 1960s. The building was occupied by Frank's Auto Service, an auto repair shop, from at least 1973 to 2010. The agricultural portion of the subject site appears to have been fallowed since the 1970s.

REC

- The existing structure was formerly occupied by Frank's Auto Service. Frank's Auto Service is listed on the Hazardous Waste Tracking System (HWTS) database maintained by the Department of Toxic Substances Control (DTSC). The tracking system collects both manifest copies from the generator and the destination facility. Records maintained for the former occupant began in April 1999 and ended in June 2001. No other details regarding the type of waste transported off-site via the manifest was included in the database listing. The former occupant is not listed on any Federal, State or local regulatory database indicating a release of hazardous materials has impacted the subject site and hazardous waste appears to have been properly removed and transported off-site.

  Minor amounts of hazardous materials were observed within the commercial building formerly utilized as an auto repair shop. Evidence of the former auto repair shop operations consisted of two inspection pits, likely used during oil changes or other types of repairs to the underside of vehicles. The pits were constructed of concrete walls. It is unknown whether the floor of pits was also constructed of concrete since floor was not visible beneath accumulated dirt. Numerous wooden planks and a step/ladder structure were observed on the concrete foundation adjacent to the

inspection pits. The wooden ladder was likely used to access the pits. No evidence of staining was noted on the concrete walls and only minor evidence of oil or staining was noted on the floor of one of the pits. No drains were observed in the sidewalls or floor of the pits. No evidence of hydraulic lifts or hoists were observed within the interior or exterior of the building. Minor engine oil drips, other fluid drips and staining typical of an auto repair shop were observed on the concrete floor of the building; however, the staining was *de minimus* and is not considered a concern to this assessment. The concrete-lined pits will need to removed and backfilled prior to redevelopment of the subject site. Based on historic site usage and since the condition of the floor of the pits was not observed, the inspection pits represent a recognized environmental concern (REC) to this assessment.

PAOC

- Review of historical aerial photographs indicates that the subject site was utilized for agricultural purposes from at least 1937 through the 1970s. Although the potential exists that environmentally persistent pesticides/herbicides may have been applied to crops grown on the subject site; 1) no material evidence of the use of environmentally persistent pesticides/herbicides was obtained during the course of this assessment, and 2) the parcel has been fallowed since the 1970s. Krazan's sampling and analysis of surface soils from properties with similar agricultural histories has typically yielded non-detectable results or very low concentrations for analysis of environmentally persistent pesticides. It is anticipated that any environmentally persistent pesticides/herbicides potentially located on site will be dislocated and diluted as a result of the grading and trenching operations which will be conducted in connection with the proposed residential development of the property. Consequently, the potential for elevated concentrations of environmentally persistent pesticides/herbicides to currently exist in the near surface soils of the subject site appears to be low.

ASTM Non-Scope Consideration

- A structure has been located in the southwestern portion of the subject site since at least the 1960s. Although the majority of the commercial building was corrugated metal walls and roof, the office/reception area and restroom area constructed within the interior were finished with wallboard and painted. It is unknown if the structure contains asbestos-containing materials (ACMs) or lead-based paint (LBP). An asbestos and/or LBP survey and sampling of the structure was not included within the scope of this assessment. Based on the apparent date of construction, ACMs and LBP may be present at the subject site. Prior to the disturbance of any of the suspect ACMs or LBP at the subject site via demolition, comprehensive asbestos and LBP surveys are recommended.

Site Development Issues

- Based on the former auto repair shop usage and restroom observed within the building, a septic system is likely located on the property. During redevelopment activities, the septic system should be properly abandoned, removed or destroyed in accordance State and local guidelines.

9.0 RELIANCE

This report was prepared solely for use by Client and should not be provided to any other person or entity without Krazan & Associates' prior written consent. No party other than Client may rely on this report without Krazan & Associates' express prior written consent. Reliance rights for third parties will only be in effect once requested by Client and authorized by Krazan & Associates with authorization granted by way of a Reliance Letter. The Reliance Letter will require that the relying party(ies) agree to be bound to the terms and conditions of the agreement between Client and Krazan & Associates as if originally issued to the relying party(ies), or as so stipulated in the Reliance Letter.

10.0 LIMITATIONS

The site reconnaissance and research of the subject site has been limited in scope. This type of assessment is undertaken with the calculated risk that the presence, full nature, and extent of contamination would not be revealed by visual observation alone. Although a thorough site reconnaissance was conducted in accordance with ASTM Guidelines and employing a professional standard of care, no warranty is given, either expressed or implied, that hazardous material contamination or buried structures, which would not have been disclosed through this investigation, do not exist at the subject site. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

The findings presented in this report were based upon field observations during a single property visit, review of available data, and discussions with local regulatory and advisory agencies. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and currently available records searched. Krazan cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Additionally, in evaluating the property, Krazan has relied in good faith upon representations and information provided by individuals noted in the report with respect to present operations and existing property conditions, and the historical uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, subject site zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

This report is provided for the exclusive use of the client noted on the cover page and shall be subject to the terms and conditions in the applicable contract between the client and Krazan. Any third-party use of this report, including use by Client's lender, shall also be subject to the terms and conditions governing the work in the contract between the client and Krazan. The unauthorized use of, reliance on, or release of the information contained in this report without the express written consent of Krazan is strictly prohibited and will be without risk or liability to Krazan.

Conclusions and recommendations contained in this report are based on the evaluation of information made available during the course of this assessment. It is not warranted that such data cannot be superseded by future environmental, legal, geotechnical or technical developments. Consequently, given the possibility for unanticipated hazardous conditions to exist on a subject site which may not have been discovered, this Phase I ESA is not intended as the basis for a buyer or developer of real property to waive their rights of recovery based upon environmental unknowns. Parties that choose to waive rights of recovery prior to site development do so at their own risk.

Parties who seek to rely upon Phase I Environmental Site Assessment reports dated more than 180 days prior to the date of reliance do so at their own risk. This limitation in reliance is based on the potential for physical changes at the site, changes in circumstances, technological and professional advances, and guidance related to the continued viability of Environmental Site Assessment reports, user's responsibilities, and requirements for updating of components of the inquiry as stated in the ASTM Standard E 1527-21.

11.0 QUALIFICATIONS

This Phase I ESA was conducted under the supervision or responsible charge of Krazan's undersigned environmental assessor with oversight from the undersigned environmental professional. The work was conducted in accordance with ASTM E 1527-21 guidance, generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and Krazan's quality-control policies.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

Laurie K. Blakeman
Sr. Environmental Project Manager

Remington R. Alexander
Environmental Regional Manager

GLOSSARY OF TERMS

Subject Site: The real property being investigated under this Phase I ESA.

Adjacent Properties: Properties which are contiguous with the subject site, or would be contiguous except for a street, road, or other public thoroughfare.

Subject Site Vicinity: Properties located within a 500-foot radius of the subject site.

Environmental Professional: A person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The EP may be an independent contractor or an employee of the user.

User: The party seeking to use Practice E 1527 to complete an environmental site assessment of the subject site. A user may include, without limitation, a potential purchaser of the subject site, a potential tenant of the subject site, an owner of the subject site, a lender, or a property manager.

Recognized Environmental Condition (REC): In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means (1) the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

Controlled Recognized Environmental Condition (CREC): A recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitations).

For example, if a leaking underground storage tank has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria, this would be considered a CREC. The "control" is represented by the restriction that the property use remains commercial. A condition considered by the environmental professional to be a CREC shall be listed in the findings section of the Phase I ESA report and as a REC in the conclusions section. A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Historical Recognized Environmental Condition (HREC): A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations, or other property use limitations).). Before calling the past release an HREC, the environmental professional must determine whether the past release is an REC at the time the Phase I ESA is conducted (for example, if there has been change in the regulatory criteria). If the EP considers the past release to be an REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as an REC.

GLOSSARY OF TERMS (continued)

Potential Area of Concern (PAOC): A term adopted to provide an alternative designation to the REC and HREC for a range of environmental issues related to current subject site uses, historical subject site uses, or from adjacent and/or vicinity property uses. The PAOC is utilized to emphasize full disclosure and provide the User with conclusions and recommendations related to potential environmental issues in connection with the subject site based on Krazan's professional experience in cases where official documentation or other evidence may be absent in order to identify an REC or HREC, thereby aiding the User's considerations of environmental due diligence risk tolerance.

Migrate/migration: For the purposes of this practice, "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM E 2600-10 guidance; however, nothing in the E 1527-21 practice should be construed to require application of the E 2600-10 standard to achieve compliance with AAI.

De minimis condition: A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Condition determined to be *de minimis conditions* are not RECS or CRECs.

Data Gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to the site reconnaissance and interviews.

Data Failure: A failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

SITE NOTES:

1. SITE ADDRESS: 24499 ROBERTSON BOULEVARD, CHOWCHILLA, CA 93610
   APN: 026-233-008
2. ZONING: EXISTING PLANNED LAND USE – HDR (HIGH DENSITY RESIDENTIAL)
   EXISTING ZONING – RRS (RESIDENTIAL, RURAL, SINGLE FAMILY DISTRICT)
   PROPOSED ZONING– PUD (PLANNED UNIT DEVELOPMENT)
3. USE: EXISTING USE: OPEN AREA – VACANT
   PROPOSED USE: MIXED USE DEVELOPMENT
4. PARCEL SIZE: GROSS 18.32± ACRES, NET: 17.40± ACRES
5. THERE IS AN EXISTING METAL WAREHOUSE BUILDING AT THE SOUTHWEST CORNER OF THE PROPERTY THAT WILL BE DEMOLISHED PRIOR TO START OF CONSTRUCTION.
6. THERE ARE NO ABOVE GROUND USES OR STRUCTURES SUCH AS POWER LINES AND TOWERS WITHIN THE PROPOSED SUBDIVISION.
7. THERE ARE NO EXISTING UNDERGROUND FEATURES SUCH AS STORM DRAIN AND SEWER PIPELINES THAT RUNS THROUGH THE PROPOSED SUBDIVISION.
8. ALL IMPROVEMENTS SHALL BE AS REQUIRED BY THE CITY OF CHOWCHILLA, AND SHALL INCLUDE SANITARY SEWER, DOMESTIC WATER, UNDERGROUND POWER, TELEPHONE, GAS, CONCRETE CURBS, GUTTERS, SIDEWALKS, PERMANENT STREET PAVEMENT, STREET LIGHTS, ETC.
9. ALL STREETS ADJACENT TO THE BOUNDARIES OF THIS SUBDIVISION HAVE BEEN PREVIOUSLY DEDICATED FOR PUBLIC STREET PURPOSES AND ALL ARE TO REMAIN.
10. THE SUBDIVISION HAS BEEN DESIGNED TO THE EXTENT FEASIBLE TO TAKE ADVANTAGE OF NATURAL HEATING AND COOLING OPPORTUNITIES BY PROVIDING THAT 80% OF HOMES IN THIS TRACT HAVE A NORTHERN OR SOUTHERN ORIENTATION.
11. PROPOSED IMPROVEMENTS, INCLUDING SEWER, WATER, STORM SEWER, STREETLIGHTS, GUTTER, CURB, SIDEWALK, AND PERMANENT PAVEMENT SHALL BE INSTALLED PER CITY OF CHOWCHILLA STANDARD DRAWINGS.
12. THERE ARE NO EXISTING CANALS OR DITCHES LOCATED WITHIN THE PROPOSED SUBDIVISION.
13. THERE WILL BE NO GRADE DIFFERENTIALS OF SIX (6) INCHES OR MORE AFTER THE SUBDIVISION.
14. THERE ARE NO TREES WITHIN THE BOUNDARY OF SUBDIVISION.

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE STATE OF CALIFORNIA, COUNTY OF MADERA, UNINCORPORATED AREA, DESCRIBED AS FOLLOWS:

LOTS ONE HUNDRED AND ONE (101) AND ONE HUNDRED AND TWO (102) IN BLOCK SIX (6) OF DAIRYLAND FARMS SUBDIVISION NO. 1, ACCORDING TO THE MAP ENTITLED: "MAP OF DAIRYLAND FARMS SUBDIVISION NO. 1, FILED FOR RECORD IN THE OFFICE OF THE COUNTY RECORDER OF MADERA COUNTY, CALIFORNIA, ON SEPTEMBER 2, 1914 IN BOOK 4 OF MAPS, AT PAGES 15, 16, AND 17.

EXCEPTING THEREFROM CERTAIN 2.98 ACRE PARCEL OF LAND IN THE SOUTHEAST CORNER OF SAID LOT 102, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT A POINT LOCATED N. 56° 23'W. 27 FEET FROM THE MOST SOUTHERLY CORNER OF SAID LOT 102; THENCE N. 33° 37' E. 358.18 FEET; THENCE N. 56° 23' W. 350 FEET; THENCE S. 33° 37' W. 358.18 FEET; THENCE S. 56° 23' E. 350 FEET TO THE POINT OF COMMENCEMENT;

ALSO EXCEPTING THEREFROM THAT CERTAIN ONE ACRE PARCEL OF LAND MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT A POINT WHICH BEARS S. 56A° 23' E. 415.93 FEET AND N. 33° 37' E. 20 FEET FROM THE MOST WESTERLY CORNER OF SAID LOT 101; RUNNING THENCE N. 33° 37' E. 272.00 FEET; THENCE S. 56° 23' E. 160 FEET; THENCE S. 33° 37' W. 272.00 FEET; THENCE N. 56° 23' W. 160 FEET TO THE POINT OF COMMENCEMENT.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Krazan & Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Aerial Photo Decade Package

07/31/25

Site Name:

Chowchilla Mulitfamily
24499 Robertson Boulevard
Chowchilla, CA 93610
EDR Inquiry # 8062617.5

Client Name:

Krazan & Associates, Inc.
215 West Dakota
Clovis, CA 93612
Contact: Melanie L. Thomas

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	*Scale*	*Details*	*Source*
2018	1"=500'	Flight Year: 2018	USDA/NAIP

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1

RCRA-SQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ANDERSON PUMP CO	***24719 W ROBERTSON BL***	***NE 1/8 - 1/4 (0.218 mi.)***	***B7***	***34***
EPA ID:: CAD983656232				

Lists of state and tribal registered storage tanks

AST: A listing of aboveground storage tank petroleum storage tank locations.

A review of the AST list, as provided by EDR, has revealed that there are 2 AST sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ANDERSON PUMP CO	***24719 ROBERTSON BLVD***	***NE 1/8 - 1/4 (0.218 mi.)***	***B6***	***22***

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 04/14/2025 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ANDERSON PUMP CO	***24719 ROBERTSON BLVD***	***NE 1/8 - 1/4 (0.218 mi.)***	***B6***	***22***

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ANDERSON PUMP CO	***24719 W ROBERTSON BL***	***NE 1/8 - 1/4 (0.218 mi.)***	***B7***	***34***

Other Ascertainable Records

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/22/2025 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
MCI WORLDCOM	26805 RD 15, 1.5 MIL	0 - 1/8 (0.000 mi.)	A3	12
Registry ID:: 110038031732				

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ANDERSON PUMP CO	*24719 W ROBERTSON BL*	*NE 1/8 - 1/4 (0.218 mi.)*	*B7*	*34*

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 4 CUPA Listings sites within approximately 0.25 miles of the target property.

Cleanup Status: PROTECTIVE FILER				

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 04/14/2025 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 02/08/2023.
Violation Division:	Madera County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	385210
Site Name:	ANDERSON PUMP CO
Violation Date:	04-05-2022
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to provide bulk storage containers with adequate secondary containment large enough to contain the entire capacity of the largest container plus additional capacity to contain precipitation when applicable, and/or failure to position/locate mobile or portable containers to prevent a discharge.
Violation Notes:	Returned to compliance on 04/05/2022. OBSERVATION: Bulk storage containers do not have adequate secondary containment. Two 55-gallon steel drums of used oil were observed on the southeast corner of the barn with inadequate secondary containment. Secondary containment was sufficient in size, however the secondary containment had a release valve that was open at the time of inspection. CORRECTIVE ACTION: Corrected on site. Ensure secondary containment valve is closed unless releasing non-contaminated water from secondary containment. Provide secondary containment for bulk storage containers large enough to contain the entire capacity of the largest container plus additional capacity to contain precipitation.
Violation Division:	Madera County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,

Site ID:	385210
Site Name:	ANDERSON PUMP CO
Violation Date:	01-02-2016
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to properly close hazardous waste containers when not in active use.
Violation Notes:	Returned to compliance on 03/25/2016. INSPECTOR OBSERVED WASTE ANTIFREEZE CONTAINER WITHOUT CAP/LID. ENSURE HW CONTAINERS ARE CLOSED AT ALL TIMES, EXCEPT WHEN ADDING OR REMOVING WASTE.
Violation Division:	Madera County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	385210
Site Name:	ANDERSON PUMP CO
Violation Date:	01-12-2016
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

ANDERSON PUMP CO (Continued) **S113028320**

Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 03/10/2016. INSPECTOR OBSERVED IMPROPER LABELS ON THE FOLLOWING: NO HW LABEL ON SOLVENT PAINT THINNER CONTAINER, HW LABEL INCOMPLETE ON HW CONTAINER AT TUBE AND SHAFT DEPARTMENT, HW LABEL INCOMPLETE ON WASTE ANTIFREEZE (MISSING ACCUMULATION DATE). SEE VIOLATION GUIDE FOR LABEL REQUIREMENTS.
Violation Division:	Madera County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	385210
Site Name:	ANDERSON PUMP CO
Violation Date:	04-05-2022
Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 04/21/2022. OBSERVATION: The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; any handling of a previously undisclosed hazardous material; a change of business address, business ownership, or business name; or a substantial change in the handler's operations that requires modification to any portion of the business plan. Inspector observed 4,840 cubic feet of oxygen at the compressed gas storage on the southwest corner of the office. Oxygen is currently reported as 2,000 cubic feet and is more than 100% increase in inventory. CORRECTIVE ACTION: Update hazardous material business plan on CERS website to show the increase of oxygen and electronically submit the update within 30 days.

Address: 16457 AVE 24 1/2
City: CHOWCHILLA
Facility ID: San Joaquin 202027001
Facility Type: Industrial - Facility that treats and/or disposes of liquid or

CHOWCHILLA II BIOMASS POWER PL (Continued) **S103438900**

semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: Not reported
Subregion: 0
Facility Telephone: Not reported
Facility Contact: WILLIAM LAX
Agency Name: SAN JOAQUIN VALLEY ENERGY PART
Agency Address: 24772 RD 16
Agency City,St,Zip: CHOWCHILLA 93610
Agency Contact: MARK DE CASTRO
Agency Telephone: Not reported
Agency Type: Private
SIC Code: 4911
SIC Code 2: 4939
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
Primary Waste: PROCES
Waste Type2: D
Waste2: Process Waste (Waste produced as part of the industrial/manufacturing process)
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
Secondary Waste: Cooling Water: Noncontact
Secondary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS ID: 110057106590
CERS Description: US EPA Air Emission Inventory System (EIS)

Violations:
Site ID: 385156
Site Name: AMPERSAND CHOWCHILLA BIOMASS LLC
Violation Date: 05-11-2022
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.
Violation Notes: Returned to compliance on 06/10/2022. OBSERVATION: Failure to inspect aboveground containers. Inspector observed secondary containment for the 55 gallon containers of "New Oil" in the "Used Oil/New Oil Storage Area" filled with water. Conduct a waste determination on the water in the secondary and remove water from secondary containment so that secondary containment can hold 100% of the volume of the container. Ensure that inspections are conducted to check for spills or water in the secondary containment. CORRECTIVE ACTION: Provide photo of "Waste Oil/New Oil Storage Area" cleaned with the secondary containment emptied so that it can retain 100% of the contents of one of the storage containers. If oily water is determined to be hazardous, provide manifests to prove a hazardous waste pick up has been properly conducted.

Citation: 19 CCR 4.5 2760.2(e) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.2(e)
Violation Description: Failure to address the following in the Process Hazard Analysis: 1. Establish a system to address the teams findings and recommendations; 2. Assure that the recommendations are resolved and documented; 3.

CHOWCHILLA II BIOMASS POWER PL (Continued) **S103438900**

	Document what actions are to be taken; 4. Develop a written schedule of when these actions are to be completed; 5. Complete these actions on a timetable agreed upon with the AA, or within two and one-half (2.5) years of performing the PHA, or the next planned turnaround, for those items that require a turnaround; 6. Document the final resolution taken to address each recommendation and actual completion date; and 7. Communicate the actions to operating, maintenance and other employees whose work assignments are in the process and who may be affected by the recommendations or actions.
Violation Notes:	Returned to compliance on 06/29/2018. The owner/operator failed to address the team s findings and recommendation identified in the 2017 PHA as demonstrated by an incomplete 2017 recommendation follow-up sheet. Recommendations, except for one, has a due date of December 31, 2017. One recommendation has a due date of June 27, 2017. During the onsite inspection, inspector requested documentation for recommendations classified as priority 1 and was provided an invoice from the ammonia contractor with an item/description for work on ammonia systems that included valves, gauges and shutoff. CORRECTIVE ACTION: By July 6, 2018 submit documentation, including the completed PHA recommendation pages, to the CUPA demonstrating that all issues identified in the PHA have been resolved.

CHOWCHILLA II BIOMASS POWER PL (Continued) **S103438900**

Chapter 4.5, Section(s) 2760.5(d)

Violation Description: Failure to ensure the following: 1. Inspections and tests are performed on process equipment; 2. Inspection and testing procedures follow recognized and generally accepted good engineering practices; 3. The frequency of inspections and tests of process equipment is consistent with applicable manufacturers recommendations and good engineering practices, and more frequently if determined to be necessary by prior operating experience; 4. Each inspection or test that has been performed on process equipment is documented and includes the date of inspection or test, name of the person who performed the inspection or test, serial number or other identifier of the equipment inspected or tested, description of the inspection or test performed, and the results of the inspection or test.

Violation Notes: Returned to compliance on 06/26/2018. 1) The CalARP binder contained a mechanical integrity (MI) program schedule. Documentation provided for review during the inspection were the following: weekly operator and management inspection logs, October 2017 invoice from the NH3 contractor, and the ultrasonic test results. The MI schedule referenced preventive maintenance (PM) work packages but the most recent completed work orders were not available for review to determine compliance. 2) The MI schedule observed onsite had written markings that changed the frequency and/or referenced package for the emergency shutoff, NH3 isolation valve, and flow transmitter. The owner/operator was unable to determine who made the frequency changes and if they are implemented. CORRECTIVE ACTION: 1) By July 6, 2018 submit the most recent completed and signed work orders for PM packages NH3-2-5Y-0, NH3-3-5A-R, and NH3-1-5A-R. 2) By July 6, 2018 submit documentation that frequency of inspections and tests of process equipment are [Truncated]

Violations:

Site ID:	385156
Site Name:	AMPERSAND CHOWCHILLA BIOMASS LLC
Violation Date:	05-11-2022
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.

CHOWCHILLA II BIOMASS POWER PL (Continued) **S103438900**

Violation Notes:	Returned to compliance on 06/10/2022. OBSERVATION: Failure to inspect aboveground containers. Inspector observed secondary containment for the 55 gallon containers of "New Oil" in the "Used Oil/New Oil Storage Area" filled with water. Conduct a waste determination on the water in the secondary and remove water from secondary containment so that secondary containment can hold 100% of the volume of the container. Ensure that inspections are conducted to check for spills or water in the secondary containment. CORRECTIVE ACTION: Provide photo of "Waste Oil/New Oil Storage Area" cleaned with the secondary containment emptied so that it can retain 100% of the contents of one of the storage containers. If oily water is determined to be hazardous, provide manifests to prove a hazardous waste pick up has been properly conducted.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.
Violation Notes:	Returned to compliance on 06/10/2022. OBSERVATION: Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records for bulk storage containers subject to 40 CFR 112.8(c)(6). CORRECTIVE ACTION: Keep written inspection procedures, records of inspections and testing, signed by appropriate supervisor/inspector, for at least 3 years. Provide monthly inspections and annual inspection checklists provided by the SPCC Plan in Appendix III & Appendix IV for the past 3 years to Madera County Environmental Health. If checklists can not be provided; conduct an annual and monthly inspection for May 2022 and provide it to Madera County Environmental Health Division as proof.

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 06/10/2022. OBSERVATION: The business did not provide one or more of the following: initial employee training, adequate employee training, annual employee training and/or maintain records of employee training. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response equipment. Maintain records of training available for 3 years. Provide Madera County Environmental Health Division with documentation of training with names of employees, signatures, training name, and date training was provided.

Citation:	19 CCR 4.5 2760.5(d) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.5(d)
Violation Description:	Failure to ensure the following: 1. Inspections and tests are performed on process equipment; 2. Inspection and testing procedures follow recognized and generally accepted good engineering practices; 3. The frequency of inspections and tests of process equipment is consistent with applicable manufacturers recommendations and good engineering practices, and more frequently if determined to be necessary by prior operating experience; 4. Each inspection or test that has been performed on process equipment is documented and includes the date of inspection or test, name of the person who performed the inspection or test, serial number or other identifier of the equipment inspected or tested, description of the inspection or test performed, and the results of the inspection or test.
Violation Notes:	Returned to compliance on 06/26/2018. 1) The CalARP binder contained a mechanical integrity (MI) program schedule. Documentation provided for review during the inspection were the following: weekly operator and management inspection logs, October 2017 invoice from the NH3

CHOWCHILLA II BIOMASS POWER PL (Continued) **S103438900**

contractor, and the ultrasonic test results. The MI schedule referenced preventive maintenance (PM) work packages but the most recent completed work orders were not available for review to determine compliance. 2) The MI schedule observed onsite had written markings that changed the frequency and/or referenced package for the emergency shutoff, NH3 isolation valve, and flow transmitter. The owner/operator was unable to determine who made the frequency changes and if they are implemented. CORRECTIVE ACTION: 1) By July 6, 2018 submit the most recent completed and signed work orders for PM packages NH3-2-5Y-0, NH3-3-5A-R, and NH3-1-5A-R. 2) By July 6, 2018 submit documentation that frequency of inspections and tests of process equipment are [Truncated]

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/26/2025
Date Data Arrived at EDR: 07/01/2025
Date Made Active in Reports: 07/17/2025
Number of Days to Update: 16

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/04/2025
Date Data Arrived at EDR: 05/06/2025
Date Made Active in Reports: 07/21/2025

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

CHOWCHILLA MULITFAMILY
24499 ROBERTSON BOULEVARD
CHOWCHILLA, CA 93610

TARGET PROPERTY COORDINATES

Latitude (North):	37.104758 - 37° 6' 17.13''
Longitude (West):	120.275968 - 120° 16' 33.48''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	742071.7
UTM Y (Meters):	4109763.2
Elevation:	228 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50003780 CHOWCHILLA, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

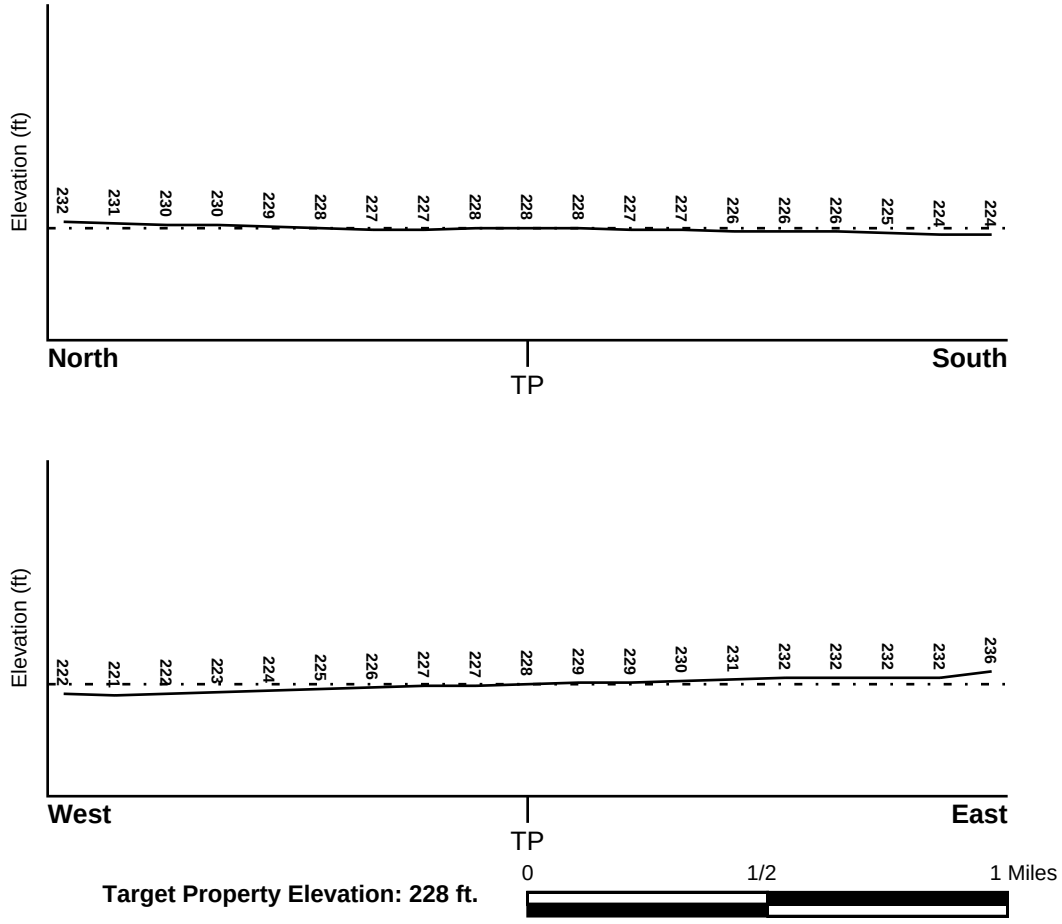

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 228 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06047C0950G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CHOWCHILLA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Grangeville

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	11 inches	20 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
3	20 inches	40 inches	stratified loamy sand to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	40 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: Tujunga

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	11 inches	24 inches	stratified sand to loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	24 inches	59 inches	stratified gravelly sand to gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

Soil Map ID: 3

Soil Component Name: Grangeville

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
2	11 inches	40 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	40 inches	59 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 4

Soil Component Name: Fresno

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.
