

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Eaton Wash Stormwater Capture Project

Lead Agency: City of Pasadena

Contact Name and Title: Dawn Petschauer, Stormwater Program Administrator

Email: dpetschauer@cityofpasadena.net Phone Number: 626.744.3929

Project Location: Pasadena, Los Angeles County
City *County*

Project Description (Proposed actions, location, and/or consequences).

The City of Pasadena proposes to construct and operate the Eaton Wash Stormwater Capture Project, which includes a stormwater capture, treatment, and infiltration facility on a vacant property east of the Eaton Wash Channel, developing passive park uses, a dog park, and a community garden within the project site, and constructing a pedestrian bridge over the channel connecting the new features east of Eaton Wash to Eaton Blanche Park. The stormwater capture and treatment facility would intercept stormwater and dry-weather flow from the Eaton Wash Channel and divert it into a subterranean concrete basin. Construction staging would likely be located off site at the City-owned Kinneloa Yard located west of South Kinneloa Avenue at the intersection of South Kinneloa Avenue and Brandon Street or at a City-owned property south of the Vina Vieja Dog Park, east of the Eaton Wash Channel near the intersection of Avocado Avenue and Alameda Street. Most of Eaton Blanche Park is expected to remain open to the public during construction. The portion of the park proposed for the pedestrian bridge landing and access connections would be closed during construction of those features.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The MND identified potentially significant impacts requiring mitigation for air quality, biological resources, cultural resources, geology and soils, noise, and tribal cultural resources. Air quality impacts would be mitigated through MM-AQ-1, fugitive dust control during construction, and MM-AQ-2, use of Tier 4 off-road equipment during construction. Biological resources impacts would be mitigated through MM-BIO-1, special-status wildlife species surveys; MM-BIO-2, monitor vegetation clearing; MM-BIO-3, compliance with Migratory Bird Treat Act and California Fish and Game Code; MM-BIO-4, tree monitoring during construction activities; and MM-BIO-5, post-construction tree monitoring. Cultural resources impacts would be mitigated through MM-CUL-2, archaeological monitoring during all initial ground-disturbing activities, and MM-CUL-2, procedures for unanticipated discovery of archaeological resources during construction activities. Geology and soils impacts would be mitigated through MM-GEO-1, retention of a qualified Paleontologist to monitor and report paleontological resources. Noise impacts would be mitigated through MM-NOI-1, implementation of temporary construction noise abatement measures. Tribal cultural resources impacts would be mitigated through MM-TCR-1, retention of a Native American Monitor prior to the commencement of ground disturbing activities; MM-TCR-2, procedures for unanticipated discovery of tribal cultural resource objects (non-funerary/non-ceremonial) during construction activities; and MM-TCR-3, procedures for unanticipated discovery of human remains and associated funerary objects or ceremonial objects during construction activities.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Not applicable.

Provide a list of the responsible or trustee agencies for the project.

Not applicable.
