

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

2401-2421 North Glassell Street
Orange, California 92865

Report Date: July 23, 2021
Partner Project No. 21-328710.1

Prepared for:

Rexford Industrial Realty Inc.
11620 Wilshire Boulevard, 10th Floor
Los Angeles, California 90025

July 23, 2021

Ms. Amanda Piedmont
Rexford Industrial Realty Inc.
11620 Wilshire Boulevard, 10th Floor
Los Angeles, California 90025

Subject: Phase I Environmental Site Assessment
2401-2421 North Glassell Street
Orange, California 92865
Partner Project No. 21-328710.1

Dear Ms. Piedmont:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) of the above-mentioned property (the "subject property" or the "Site"). This assessment was performed in conformance with the scope and limitations of ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, and with All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 765-7243.

Sincerely,

Jenny Redlin, REPA
Relationship Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and the requirements in the Master Services Agreement between Partner and Rexford Industrial Realty, L.P. (the "MSA") for the property located at 2401-2421 North Glassell Street in Orange, Orange County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Rexford Industrial Realty, L.P. with an assessment concerning the environmental condition of the subject property. The services set forth herein are governed by the MSA.

Property Description

The subject property is located on the east side of North Glassell Street and the south side of East Fletcher Avenue within a mixed residential, commercial, and industrial area of Orange County. Please refer to the table below for a further description of the subject property:

Subject Property Data

Addresses:	2401-2421 North Glassell Street, Orange, California
Property Use:	Commercial/Office
Land Acreage (Ac):	12.82 Acres
Number of Buildings:	Four
Number of Floors:	Two
Gross Building Area (SF):	191,127 SF (Total): Building 2401A = 66,613 SF; 2401B = 45,950 SF; 2411 = 39,282 SF and building 2421 = 39,282 SF
Date of Construction:	1987
Assessor's Parcel Number (APN):	374-381-01 and 374-381-02
Type of Construction:	Concrete Pad, Concrete Tilt-Up, Flat Roofed
Current Tenants:	Volt Information Sciences, Inc., vacant offices, and SA Recycling
Site Assessment Performed By:	Chloe Adelman of Partner
Site Assessment Conducted On:	July 12, 2021

The subject property is currently occupied by Volt Corporate Park, with main tenants; Volt Information Sciences, Inc. and SA Recycling (under a sublease), for commercial office/vacant office and management use. Onsite operations consist administrative activities and routine property maintenance. In addition to the current structures, the subject property is also improved with three diesel-fired emergency generators located on the northern exterior of 2401A Building, asphalt-paved parking areas, associated landscaping, and drainage features.

According to available historical sources, the subject property was formerly undeveloped land as early as 1896; was developed with agricultural land between 1938 and circa 1966; was vacant/graded land between 1972 and circa 1985; and was developed with the current structures in 1987. Tenants on the subject property included Volt (1991-Present), Fidelity National Credit Services (1991-1999), Digital Graphics Advantage (1992-1997), Visionit (2014), and SA Recycling (2012-Present). No potential environmental concerns were identified in association with the current or former use of the subject property.

The immediately-surrounding properties consist of residences to the north across East Fletcher Avenue; Glassell Business Center commercial/light industrial buildings and MeriCal to the south; residences to the east across a railroad and North Orange Olive Road; and Fletcher Park multi-tenant commercial buildings to the west across North Glassell Street.

According to previous subsurface investigations conducted on a nearby property 0.16 mile southwest of the subject property and topographic map interpretation, groundwater in the vicinity of the subject property is expected to be encountered approximately 132 to 205 feet below ground surface (bgs) and flow towards the west.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner identified no RECs associated with the subject property.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner identified no CRECs associated with the subject property.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner identified no HRECs associated with the subject property.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner identified no environmental issues associated with the subject property.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2401-2421 North Glassell Street in Orange, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation regarding the environmental condition of the subject property.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2401-2421 North Glassell Street in Orange, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property, including those that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report may be used by Client to, among other things: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiries* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in

order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

All reports, both verbal and written, are for the sole use and benefit of Rexford Industrial Realty, L.P. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. In the event of any

conflict between the terms and conditions of this report and the terms and conditions of the MSA, the MSA shall control.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment and is not considered significant.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of the AAI User Questionnaire from the Report User. This information was not provided at the time of the assessment. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment and is not considered significant.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment and is not considered significant.
- Partner submitted Freedom of Information Act (FOIA) requests to Orange County Health Care Agency (OCHCA) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment and is not considered significant.
- Partner observed approximately 75% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (SA Recycling corporate offices), this limited method of survey is not expected to alter the overall findings of this assessment and is not considered significant.
- Partner's view of the ground during the site assessment was obstructed due to parked cars and locked gates. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment and is not considered significant.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 2401-2421 North Glassell Street in Orange, California is located on the east side of North Glassell Street and the south side of East Fletcher Avenue. According to Chicago Title Advantage, the subject property is legally described as "Lot: 10 Tract No: 784 Abbreviated Description: LOT: 10 TR#:784 A TR TOWN OF ST JAMES BLK TOWN OF ST JAMES LOT 10", and ownership is currently vested in Glassell Acquisitions Partners LLC.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by Volt Corporate Park, with main tenants; Volt Information Sciences, Inc. and SA Recycling (under a sublease circa 2013), for commercial office/vacant office and management use. Onsite operations consist administrative activities and routine property maintenance. The subject property consists of four two-story buildings location on the central portion of the subject property. In addition to the current structures, the subject property is also improved with three diesel-fired emergency generators located on the northern exterior of 2401A Building, asphalt-paved parking areas, associated landscaping, and drainage features.

The subject property is designated for industrial development by the City of Orange.

The subject property is identified as a California Facility and Manifest Data (HAZNET), Hazardous Waste Tracking System (HWTS), and a California Processors (Proc) site in the regulatory database report, which is further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial/retail/industrial/residential area of Orange County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

- North:** East Fletcher Avenue beyond which are residences (110 West Greenway Ave; 2464 & 2467 North Hartman Street; 2458 & 2459 North Hearthside Street; 2456 North Beechwood Street; 318-420 East Redwood Avenue)
- South:** Glassell Business Center commercial/light industrial buildings (2345 North Glassell Street; 125-227 East Bristol Lane) and MeriCal (231 & 233 East Bristol Lane)
- East:** Railroad and North Orange Olive Road beyond which are residences (2435 North Orange Olive Road; 2382-2395 North Flanders Street; 509 Glendora Avenue)
- West:** North Glassell Street beyond which is Fletcher Park multi-tenant commercial buildings (2366, 2402-2414, 2440 North Glassell Street)

The adjacent properties to the west, south, and southwest are identified as an Environmental Database Report Historic Cleaner (EDR Hist Cleaner), Resource Conservation and Recovery Act – Small Quantity Generator (RCRA-SQG), HAZNET, HWTS, Facility Index System (FINDS), Enforcement & Compliance History information (ECHO), California Leaking Underground Storage Tank (CA LUST), CalEPA Regulated Site

Portal Data (CERS), Resource Conservation and Recovery Act Non Generator / No Longer Regulated (RCRA NonGen/NLR), Emissions Inventory Data (EMI), California Historic UST (CA Hist UST), and California Historic Cortese sites in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) Orange, California Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is situated approximately 200 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the west. Improvements with the exceptions of roadways are not depicted on the 2012 map.

A copy of the 2012 topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

The nearest surface water in the vicinity of the subject property is the Santa Ana River located approximately 0.75 miles west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the City of Orange Water Division serves the subject property vicinity. The sources of public water for the City of Orange are surface water from water from Northern California via the State Water Project, the Colorado River, local groundwater basins, local water sheds, reclamation and water reuse projects, and ocean desalinization.

According to previous subsurface investigations conducted on a nearby property 0.16 mile southwest of the subject property (2525 North Orange Olive Road and Orange County LOP Case #04UT019) and topographic map interpretation, groundwater in the vicinity of the subject property is expected to be encountered approximately 132 to 205 feet below ground surface (bgs) and flow towards the west.

2.4.3 Geology/Soils

The subject property lies within the Orange County Coastal Plain area of the Los Angeles Basin. The plain consists of predominantly alluvial basin-fill material deposited by meandering tributaries of the Santa Ana River system. Surficial geology in the subject property vicinity consists of recent alluvium of gravel, sand, silty sand, and clayey silt with an average thickness of 200 feet. This recent alluvium is underlain by the upper Pleistocene Lakewood Formation, which averages 500 feet in thickness and consists of alternating stratigraphic zones of coarse-grained sand and clayey silt. The estimated depth to bedrock is more than 200 feet.

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Sorrento loam (79%), Myford sandy loam (17%), and San Emigdio fine sandy loam (4%). The Sorrento series, Myford series and San Emigdio series consists of very deep, well drained soils that formed in dominantly sedimentary alluvium. Slopes range from 0 to 2 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06059C0153J, dated December 3, 2009, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains. Additionally, the subject property is located in an area with reduced flood risk due to levee.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
1896-1935	Topographic Maps	Undeveloped
1938-1966	Aerial Photographs	Agricultural Land
1972-1985	Aerial Photographs, Building Records, Topographic Maps	Vacant Land
1987-Present	Aerial Photographs, Building Records, City Directories, On-Site Observations	Commercial

Tenants on the subject property included Volt (1991-Present), Fidelity National Credit Services (1991-1999), Digital Graphics Advantage (1992-1997), Visionit (2014), and SA Recycling (2012-Present).

The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural related chemicals such as pesticides, herbicides, and fertilizers, may have been used and stored onsite. The subject property is either paved over or covered by building structures that minimize direct contact to any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were likely mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. These additional variables serve to further reduce the potential for exposure to residual agricultural chemicals (if any). Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is unlikely to represent an environmental concern and recommends no further investigation regarding this issue.

No other potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on July 14, 2021. The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date:	1938, 1946, 1952	Scale:	1"=500'
Subject Property:	Appears to be developed with agricultural land		
North:	Appears to be developed with agricultural land across East Fletcher Avenue		
South:	Appears to be developed with agricultural land		
East:	Appears to be developed with agricultural land across North Orange Olive Road		
West:	Appears to be developed with agricultural land across Glassell Street		

<i>Date:</i>	<i>1963, 1966</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	No significant changes visible		
North:	Appears to be developed for existing residential purposes across East Fletcher Avenue		
South:	Appears to be developed with agricultural land across a railroad track		
East:	Appears to be developed for existing residential purposes across a railroad track and North Orange Olive Road		
West:	No significant changes visible		

<i>Date:</i>	<i>1977</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	Appears to be developed with vacant land		
North:	No significant changes visible		
South:	Appears to be developed with vacant land across a railroad track		
East:	No significant changes visible		
West:	Appears to be developed with vacant land and developed for commercial purposes, three structures are characteristic of a gasoline service station, across Glassell Street		

<i>Date:</i>	<i>1985</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	No significant changes visible		
North:	No significant changes visible		
South:	No significant changes visible		
East:	No significant changes visible		
West:	Appears to be developed for commercial purposes, three structures are characteristic of a gasoline service station, across Glassell Street		

<i>Date:</i>	<i>1989, 1990</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	Appears to be developed with four large structures in the center of the property, with two large parking areas to the east and west of the primary structures and an additional parking area along the north side of the property		
North:	No significant changes visible		
South:	Appears to be developed for existing commercial purposes across a railroad track		
East:	No significant changes visible		
West:	No significant changes visible		

<i>Date:</i>	<i>2005, 2009, 2012, 2016</i>	<i>Scale:</i>	<i>1"=500'</i>
Subject Property:	No significant changes visible		
North:	No significant changes visible		
South:	No significant changes visible		
East:	No significant changes visible		
West:	Appears to be developed for existing commercial purposes across Glassell Street		

For more information regarding the former use of the west adjacent site as a gasoline service station, refer to Section 4.2.3.

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from EDR on July 14, 2021. Sanborn map coverage was not available for the subject property.

A Copy of the reviewed Sanborn Maps "No Coverage" letter is included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on July 15, 2021 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 2401-2421 North Glassell Street (Subject Property)

Year(s)	Occupant Listed
1991	MainTech A Division of Volt Delta Resource, Volt Delta Resources Inc., Manclnelli Diane L, Volt Information Science, Volt Technical Accounting, Volt Western Region Accounting (2401 North Glassell Street), Pacific Volt Information Systems (2411 North Glassell Street), Fidelity National Credit Services (2421 North Glassell Street)
1994	Volt Delta Resources Inc. (2401 North Glassell Street), Pacific Volt Information Systems (2411 North Glassell Street), Volt Technical Services, Volt Western Region accounting, Fidelity National Credit Services (2421 North Glassell Street)
1995	MainTech A Division of Volt Delta Resource, Volt Delta Resources Inc., Manclnelli Diane L, Shaw and Shaw Inc., Volt Energy Systems, Volt Information Science, Volt Service Telecon, Volt Technical Accounting, Volt Western Region Accounting (2401 North Glassell Street), Pacific Volt Information Systems (2411 North Glassell Street), Fidelity National Credit Services (2421 North Glassell Street)
1999	MainTech A Division of Volt Delta Resource, Volt Delta Resources Inc., Volt Information Science, Volt Service Group HPPSO, Volt Technical Accounting, Volt Western Region Accounting (2401 North Glassell Street), Fidelity National Credit SE, Shaw and Shaw Incorporated (2421 North Glassell Street)
2004	Maintech Corp, Sunset Café Inc., Volt Technical Accounting Center Inc. (2401 North Glassell Street), Volt Accounting, Shaw and Shaw Inc. (2421 North Glassell Street)
2009	Volt Technical Service, Volt Management Corp, Volt Information Systems (2411 North Glassell Street), Volt Services Group, Shaw and Shaw Inc. (2421 North Glassell Street)
2014	MainTech A Division of Volt Delta, SA Recycling, Visionit, Volt Delta Resources Inc., Volt Energy Systems, Volt Technical Accounting Center, Volt Western Region Accounting (2401 North Glassell Street)

Based on the city directory review, no environmentally sensitive listings were identified for the subject property addresses. There is no evidence indicating any historical manufacturing activities or the storage and use of any significant quantities of hazardous materials.

Various residential tenants have been identified on the north and east adjacent properties from at least 1966 to present. For information regarding commercial tenants on the adjacent properties refer below.

City Directory Search for Adjacent Properties

Year(s)	Occupant Listed
1965	Bob Black president (2345 Glassell Street)
1966	Bob Black Oldsmobile (2345 Glassell Street)
1970	Bob Black Oldsmobile (2345 Glassell Street)

According to the city directory review, the adjacent properties have been occupied by various industrial and gasoline service station operations to the south and west, for more information refer to Section 4.2.3.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR on July 14, 2021. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1896, 1898	
Subject Property:	Depicted as undeveloped land
North:	Depicted as undeveloped land and developed with a small structure across a roadway
South:	Depicted as undeveloped land
East:	Depicted as undeveloped land across a railroad track and roadway
West:	Depicted as undeveloped land across a roadway
Date: 1901, 1902	
Subject Property:	Depicted as undeveloped land and bisected by a roadway
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	Depicted as undeveloped land and developed with a small structure across a roadway
Date: 1932, 1935	
Subject Property:	No significant changes depicted
North:	Depicted as developed with an orchard across a roadway
South:	Depicted as developed with an orchard
East:	Depicted as developed with an orchard across a roadway and railroad tracks
West:	Depicted as developed with an orchard across a roadway
Date: 1942, 1949, 1950	
Subject Property:	Depicted as developed with an orchard
North:	Depicted as vacant and undeveloped land across a roadway
South:	No significant changes depicted
East:	No significant changes depicted
West:	Depicted as vacant and undeveloped land across a roadway
Date: 1964	
Subject Property:	No significant changes depicted
North:	Depicted in an area of dense development across Fletcher Avenue
South:	Depicted as vacant land across a railroad track
East:	Depicted in an area of dense development across a railroad tracks and Orange Olive Road
West:	No significant changes depicted

Date: 1972

Subject Property: Depicted as vacant land
North: No significant changes depicted
South: Depicted as vacant land across a railroad track
East: No significant changes depicted
West: Depicted as developed with three structures across Glassell Street

Date: 1981

Subject Property: No significant changes depicted
North: No significant changes depicted
South: No significant changes depicted
East: No significant changes depicted
West: Depicted as developed with seven structures across Glassell Street

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data

Name of Agency:	Orange County Health Care Agency (OCHCA)
Point of Contact:	http://www.ochealthinfo.com/
Agency Address:	1241 East Dyer Road, Suite 120, Santa Ana, California 92705
Agency Phone Number:	(714) 433-6015
Date of Contact:	July 14, 2021
Method of Communication:	Online
Summary of Communication:	As of the date of this report, Partner has not received a response from the OCHCA for inclusion in this report.

4.1.2 Fire Department

Regulatory Agency Data

Name of Agency:	Orange Fire Department (OFD)
Point of Contact:	https://www.cityoforange.org/150/Fire
Agency Address:	176 South Grand Street, Orange, California 92866
Agency Phone Number:	(714) 288-2500
Date of Contact:	July 14, 2021
Method of Communication:	Email/Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the OFD. According to the OFD, all records regarding environmentally sensitive materials have been forwarded to the OCHCA.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency:	South Coast Air Quality Management District (SCAQMD)
Point of Contact:	http://www.aqmd.gov/
Agency Address:	1500 West Carson Street, #115, Long Beach, California 90810
Agency Phone Number:	(909) 396-2000
Date of Contact:	July 14, 2021
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property was identified in the SCAQMD database as discussed below:

Volt Information Sciences, Inc., located at 2401 North Glassell Street, was listed in the SCAQMD database as an operator for emergency generators on site from 2005 to 2011. A Notice of Violation (NOV) was issued to Volt Information Sciences Inc, for operating an "ICE (50-500 HP) EM Elec Gen-Diesel" without a permit. This violation was deemed compliant on April 24, 2005, when the permit to operate was granted by the SCAQMD. This permit is currently listed as active.

Regulatory Agency Data

On the SCAQMD database, there are no NOV's on file with the listed address, however, three Notices to Comply (NTC) were listed.

- June 14, 2007, violation issued, now in compliance
- May 21, 2013, submit Rule 1472 compliance plan application, now in compliance
- October 13, 2017, notice issued as a warning to not exceed engine maintenance and testing limits, compliance not required
- November 5, 2019 the facility was in violation for not registering a boiler, the NTC is in compliance as of November 12, 2019

SA Recycling, located at 2411 North Glassell Street, was listed in the SCAQMD database as operating a baghouse in 2016.

These listings for the subject property are not expected to represent any environmental concerns based on the lack of releases, relatively small quantities of hazardous materials associated with these listings, and the compliance issued by the regulatory agency.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	https://geotracker.waterboards.ca.gov/
Agency Address:	320 West Fourth Street, Suite 200, Los Angeles, California 90013
Agency Phone Number:	(213) 576-6600
Date of Contact:	July 14, 2021
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.5 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	https://www.ca.gov/
Agency Address:	1001 I Street, P.O. Box 806, Sacramento, California 95812
Agency Phone Number:	(800) 728-6942
Date of Contact:	July 14, 2021
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified in the DTSC database as discussed below: <ul style="list-style-type: none">- Southern California Edison (SCE), located at 2401 North Glassell Street, is listed as a hazardous generator in 2011. According to the DTSC hazardous waste manifests, Southern

Regulatory Agency Data

California Edison generated 2.46 ton of Waste oil and Mixed Oil in 2011. As SCE has not occupied the subject property as a tenant, this listing is expected to be involved with the pad-mounted transformers located on the subject property. Based on the singular listing, lack of reported NOVs, and lack of reported releases associated with this listing, the SCE listing in the DTSC database is unlikely to represent an environmental concern. Partner recommends no further investigation regarding this issue.

- Volt, located at 2401 North Glassell Street, is listed as a hazardous waste generator in 2008. According to the DTSC hazardous waste manifests, Volt generated 0.0720 ton of an Unspecified Solvent Mixture in 2008. This listing, which was listed as inactive as of June 10, 2009, and operating under ID: CAC002637521, has no NOVs, or releases associated with it. Based on the lack of NOVs, lack of reported releases, relatively small quantity of hazardous materials associated with this listing, and the inactivation of hazardous waste generation, this listing is unlikely to represent an environmental concern. Partner recommends no further investigation regarding this issue.
- Pacific Volt information Systems, located at 2411 North Glassell Street, is listed as a hazardous waste generator in 1991. This listing, which was listed as inactive as of January 1, 1900 and operating under ID: CAL913504706, has no NOVs manifests, or releases associated with it. Partner recommends no further investigation regarding this issue.
- According to records reviewed, the subject property, identified as Digital Graphics Advantage at 2411 North Glassell Street, was entered in the HWTS database on May 15, 1992 and listed as an inactive facility on June 30, 1998. The facility was documented for the manifest of between 0.1896 and 0.47620 ton of photochemicals/photoprocessing waste between 1993 and 1997. Based on the lack of NOVs, lack of reported releases, relatively small quantity of hazardous materials associated with this listing, and the inactivation of hazardous waste generation, this listing is unlikely to represent an environmental concern. Partner recommends no further investigation regarding this issue.

4.1.6 Building Department

Regulatory Agency Data

Regulatory Agency Data

Name of Agency: Orange Building Department (OBD)
Point of Contact: http://www.ocpublicworks.com/ds/building/plan/building_permit_info
Agency Address: 300 East Chapman Avenue, Orange, California
Agency Phone Number: (714) 744-7200
Date of Contact: July 14, 2021
Method of Communication: Online/Email
Summary of Communication: Records were available for review, as further discussed in the following table:

Building Records Reviewed for 2401-2421 North Glassell Street (Subject Property)

Year(s)	Owner/Applicant	Description
1987	Volt Information Sciences Inc.	Application for Building Permit submitted by Volt Information Sciences Inc. for a new construction Certificate of Occupancy issued to Volt Information Sciences for "129,605 square foot two-story concrete tilt-up buildings designed to be used as offices, Phase II and III" addressed at 2401-2421 North Glassell Street Certificate of Occupancy issued to Volt Directory Data for "A 68,298 sq. ft. two-story concrete tilt-up building designed to be used as offices. Phase I." addressed at 2411 North Glassell Street

4.1.7 Planning Department

Regulatory Agency Data

Name of Agency: Orange County Planning Department (OCPD)
Point of Contact: <http://www.ocpublicworks.com/ds/planning>
Agency Address: 300 E. Chapman Avenue, Orange, California 92866
Agency Phone Number: (714) 744-2225
Date of Contact: July 14, 2021
Method of Communication: Online
Summary of Communication: According to records reviewed, the subject property is zoned "M-2" for industrial development by the City of Orange.

4.1.8 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency: California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact: <https://www.conservation.ca.gov/>
Agency Address: 801 K Street, MS 24-01, Sacramento, California 95814
Agency Phone Number: (916) 322-1080
Date of Contact: July 14, 2021
Method of Communication: Online
Summary of Communication: According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.9 Assessor's Office

Regulatory Agency Data

Name of Agency:	Orange County Assessor (OCA)
Point of Contact:	https://www.ocgov.com/gov/assessor
Agency Address:	Civic Center Plaza, Building 11, 625 North Ross Street, Santa Ana, California 92701
Agency Phone Number:	(714) 834-2727
Date of Contact:	July 14, 2021
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Numbers (APNs) 374-381-01 and 374-381-02, and is currently owned by Glassell Acquisitions Partners, LLC. The current buildings were constructed in 1987 and total approximately 191,127 square feet on a 12.82-acre lot

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	Y	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	NA	NA
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	Y	N

Other Listings	Varies	Y	Y	N

4.2.2 Subject Property Listings

The subject property is identified as a California Facility and Manifest Data (HAZNET), Hazardous Waste Tracking System (HWTS), and a California Processors (Proc) site in the regulatory database report, as discussed below:

- The subject property, identified as Southern California Edison, at 2401 North Glassell Street, reported a listing for a California HAZNET and HWTS site. Southern California Edison, is listed as a producer of 2.46 tons of waste oil and mixed oil in 2011. This listing, operating under Environmental ID: S112991789, produced the waste and mixed oil which was disposed of via "storage, bulking, and/or transfer off-site-No Treatment/Recovery (H010-H129) or (H131-H135)". According to historical and regulatory research, Southern California Edison has not been a tenant of the subject property, therefore the listing is expected to be related to transformer repair and/or replacement operations on or adjacent to the subject property. Inclusion on the HAZNET database generally indicates compliance with applicable regulations pertaining to hazardous waste generation. Based on the presumed reason for the listing, lack of documented violations, and regulatory oversight, the documented disposal of hazardous waste is unlikely to represent an environmental concern. Partner recommends no further investigation regarding this issue.
- The subject property, identified as Digital Graphics Advantage at 2411 North Glassell Street, reported a listing for a CA HAZNET and HWTS site. Digital Graphics Advantage is listed as a producer of the between 0.0258-ton to 9.249-ton of photochemical and photo-processing wastes between 1992 and 1997. Based on the lack of NOV's on file, lack of releases associated with these listings, typically small quantities of hazardous wastes associated with this listing, and regulatory oversight, the documented disposal of hazardous waste is unlikely to represent an environmental concern. Partner recommends no further investigation regarding this issue.
- The subject property, identified as Volt at 2401 North Glassell Street, reported a listing for a California HAZNET and HWTS site. Volt, is listed as a producer of 0.072-ton of "Unspecified solvent mixture", in 2008. Operating under Environmental ID: S112974778, this hazardous waste material was disposed of via fuel blending prior to energy recovery at another site. Based on the lack of documented violations, and regulatory oversight, the documented disposal of hazardous

waste is unlikely to represent an environmental concern. Partner recommends no further investigation regarding this issue.

- The subject property, identified as SA Recycling, at 2411 North Glassell Street, reported a listing for a California Processor (Proc) site. SA Recycling, began operations on March 23, 2012, and operated under Regulation ID: 153938. This listing has no NOV's or releases associated with it. Based on the lack of documented violations, and regulatory oversight, the lack of hazardous waste documented with this listing, this listing is unlikely to represent an environmental concern. Partner recommends no further investigation regarding this issue.

4.2.3 Adjacent Property Listings

The adjacent properties to the west, south, and southwest are identified as an Environmental Database Report Historic Cleaner (EDR Hist Cleaner), Resource Conservation and Recovery Act – Small Quantity Generator (RCRA-SQG), HAZNET, HWTS, Facility Index System (FINDS), Enforcement & Compliance History information (ECHO), California Leaking Underground Storage Tank (CA LUST), CalEPA Regulated Site Portal Data (CERS), Resource Conservation and Recovery Act Non Generator / No Longer Regulated (RCRA NonGen/NLR), Emissions Inventory Data (EMI), California Historic UST (CA Hist UST), and a California Historic Cortese sites in the regulatory database report, as discussed below:

- The property to the west, identified as Sno-White Cleaners at 2424 North Glassell Street, is listed as an EDR HIST Cleaners site. This facility was located beyond North Glassell Street at a location expected to be hydrologically downgradient. Sno-White Cleaners is identified as a "garment pressing and cleaners agent" from 1985 to 1988, and as a "laundry and drycleaner agent" in 1989. No listings associated with the generation, disposal, or release of hazardous substances were identified for this tenant in the regulatory database report. Based on the lack of reported releases or hazardous waste generation, expected direction of groundwater flow, and depth to groundwater, this listing is unlikely to represent an environmental concern.
- The property to the west, identified as The Silver Hanger at 2426 North Glassell Street, is listed as an EDR HIST Cleaners site. This facility was located beyond North Glassell Street at a location expected to be hydrologically downgradient. The Silver Hanger is identified as a "garment pressing and cleaners agent" from 1974 to 1983. No listings associated with the generation, disposal, or release of hazardous substances were identified for this tenant in the regulatory database report. Based on the lack of reported releases or hazardous waste generation, expected direction of groundwater flow, and depth to groundwater, this listing is unlikely to represent an environmental concern.
- The property to the west, identified as EMS Analytical Labs Inc. at 2404 North Glassell Street, Suite B, is listed as an RCRA-SQG, FINDS, ECHO, HWTS, and HAZNET site. This facility was located beyond North Glassell Street at a location expected to be hydrologically downgradient. EMS Analytical Labs reported a SQG on May 8, 2002, which generated more than 100 and less than 1,000 kg of hazardous waste during any calendar month and accumulates less than 6,000 kg of hazardous waste at any time. The hazardous waste products generated by this operation include arsenic, cadmium, lead, spent cyanide plating bath solutions from electroplating operations, and spent stripping and cleaning bath solutions from electroplating operations where cyanides are

used in the process. This generator and hazardous waste generation operation has no Notices of Violation (NOVs) on file. Additionally, the site operates a FINDS and ECHO permit under Registry ID: 110012546012, which is not cross listed with any NOV or Notices of Correction (NOCs) website according to the EDR database. The site is also listed as a HAZNET site for the generation of hazardous materials including the following: aqueous solution ($2 < \text{pH}$, 12.5) contained reactive anions, disposed of via Metals Recovery Including Restoring, Smelting, Chemicals, Etc., Liquids with cyanides $\geq 1,000\text{Mg/L}$, disposed of via Metals Recovery Including Restoring, Smelting, Chemicals, Etc., unreported waste, disposed of via Metals Recovery Including Restoring, Smelting, Chemicals, unreported waste, disposed of via Metals Recovery Including Restoring, Smelting, Chemicals, Etc., unreported waste, disposed of via Metals Recovery Including Restoring, Smelting, Chemicals, Etc. FROM 2005 TO 2008. Based on the lack of documented violations and corrections, regulatory oversight, and documented disposal of hazardous waste, this listing is unlikely to represent an environmental concern.

- The property to the west, identified as Desert Petroleum Inc, Desert Petroleum SS #0090, and GasCo Service Station #090 at 2440 North Glassell Street is listed as a CA LUST, CA HIST UST, HWTS, CA HAZNET, and a CA HIST CORETESE site. This facility was located beyond North Glassell Street at a location expected to be hydrologically downgradient. This site reported a release of gasoline on March 4, 1991. This release reportedly impacted soil as the only medium affected by the spill. The release was identified through regulatory tank closure and the abatement method used to assist with achieving regulatory closure was vapor extraction. The cleanup of this site was overseen by The City of Orange and was granted regulatory closure on April 5, 1995.

The three Underground Storage Tanks associated with the LUST and Historic UST listing, according to the EDR database are as follows:

- o One 10,000-gallon tank, filled with regular fuel, with a stock inventor leak detection system, and a tank thickness of $\frac{1}{4}$ inch.
- o One 10,000-gallon tank, filled with unleaded product, with a stock inventor leak detection system and a tank thickness of $\frac{1}{4}$ inch.
- o One 10,000-gallon tank, filled with unleaded product, with a stock inventor leak detection system, and a tank thickness of $\frac{1}{4}$ inch.

Additionally, this is listed as a HAZNET site, associated with Desert Petroleum Inc. which last operated in circa 1994. The hazardous materials associated with this listing include, other organic solids, which are disposed of via a recycler, measuring as much as 5.090 tons to 0.299 ton of waste from 1993 until 1994. This HAZNET listing has no NOVs, NOCs, or releases associated with it. Based on the regulatory closure of the site, medium affected, removal of the previous fueling operations, expected direction of groundwater flow, and relatively small quantity of hazardous materials associated with the other listings, this site is unlikely to represent an environmental concern.

- The property to the west, identified as FCSI Waste Removal Serv at 2366 North Glassell Street Suite G, is located adjacent to the west of the subject property. This facility was located beyond

North Glassell Street at a location expected to be hydrologically downgradient. FCSI Waste Removal Serv is listed as a RCRA-NonGen/NLR site. The facility is listed as a non-generator as of July 21, 1989. Specific hazardous waste substances were not identified in the database report. No violations were identified in the RCRA listing. In addition, the facility is not cross listed on the RCRA Administrative Action Tracking System (RAATS) or the RCRA Corrective Action (CORRACTS) Databases for administrative or corrective actions. Based on lack of release or violation, non-generator status, and expected direction of groundwater flow, this site is unlikely to represent an environmental concern.

- The property to the southwest, identified as Davis Public Image Inc. at 2340 North Glassell Street, is listed as a RCRA-SQG, FINDS, ECHO, HWTS, and CA HAZNET site in the EDR database. This facility was located beyond North Glassell Street at a location expected to be hydrologically downgradient. On February 15, 1999, the site listed a small quantity generator permit which produced benzene, 1,4-dichlorobenzene, tetrachloroethylene, and trichloroethylene hazardous wastes. There are no reported NOVs or NOCs on file with the regulatory database. The site also lists FINDS and ECHO permits operating under Registry IF: 110002926567, which has no NOVs or NOCs associated with it. Additionally, the site reported a HAZNET listing which produced the following hazardous wastes: liquids with halogenated organic compounds $\geq 1,000$ Mg/L from 2000 to 2004. The quantities ranged from 0.3-ton to 1.36-tons. Based on the lack of releases or violations, non-generator status, and expected direction of groundwater flow, this site is unlikely to represent an environmental concern.
- The property to the south, identified as Blusky Restoration Contractors LLC at 2345 North Glassell Street, is listed on the RCRA NonGen/NLR database. This facility was located beyond railroad tracks at a location expected to be hydrologically cross-gradient. On July 5, 2015 was listed as a non-generator handler of various wastes, with no violations found. Based on the lack of evidence of a release or violations, non-generator status, this site is unlikely to represent an environmental concern.
- The property to the south, identified as Technical Arts Inc. at 2472 North Glassell Street, is listed on the RCRA NonGen/NLR, FINDS, and ECHO database. This facility was located beyond railroad tracks at a location expected to be hydrologically cross-gradient. On November 5, 1997 was listed as a non-generator handler of various wastes and a small quantity generator in 1995, with no violations found. Based on the lack of evidence of a release or violations, non-generator status, this site is unlikely to represent an environmental concern.
- The property to the south, identified as Bessant Racing Inc./Dilco Industrial Inc. at 205 East Bristol Lane, is listed on the CERS, CERS HazWaste, RCRA NonGen/NLR, HAZNET, and HWTS databases. This facility was located beyond railroad tracks at a location expected to be hydrologically cross-gradient. The site has disposed of unspecified organic liquid mixtures and waste oil and mixed oil in 1999. The site has been inspected by OCHCA in 2016 and 2019 and OCFD in 2018, with no violations found. The site was identified as a non-generator handler of hazardous wastes on July 7, 1995. Based on the lack of evidence of a release or violations, non-generator status, and

operation during a time of stringent regulatory oversight, this site is unlikely to represent an environmental concern.

- The property to the south, identified as Decostone Design at 227 East Bristol Lane, is listed on the RCRA NonGen/NLR database. This facility was located beyond railroad tracks at a location expected to be hydrologically cross-gradient. The site was identified as a non-generator handler of hazardous wastes on June 2, 2014, with no violations found. Based on the lack of evidence of a release or violations, non-generator status, and operation during a time of stringent regulatory oversight, this site is unlikely to represent an environmental concern
- The property to the south, identified as Vita-Pak/Merical, Inc. at 233 East Bristol Lane, is listed on the RCRA NonGen/NLR, CERS, CERS Haz Waste, HAZNET, EMI, and HWTS database. This facility was located beyond railroad tracks at a location expected to be hydrologically cross-gradient. The site was identified as a non-generator handler of hazardous wastes on January 21, 1999, with no violations found. The site has reported air emissions data to SCAQMD from 2014 to 2017. According to the CERS listings, the site has been inspected by OCFD with no violations found. According to the HAZNET listings, the site has disposed of other inorganic solid wastes, off-specification, aged or surplus organics, off-specification, aged or surplus inorganics, unspecified oil-containing waste, empty container less than 30 gallons, unspecified aqueous solutions, aqueous solution with total organic residues less than 10 percent from 2004 to 2019. Based on the lack of evidence of a release or violations, non-generator status, and operation during a time of stringent regulatory oversight, this site is unlikely to represent an environmental concern.

Based on the findings, vapor migration appears unlikely to represent an environmental concern to the subject property, and Partner recommends no further investigation regarding this issue.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report. Based on various mitigating factors including relative distance from the subject property, inferred direction of groundwater flow, media affected, and/or regulatory status, the remaining listed sites within the specified search radius of the subject property which appeared on local, State, or Federally published lists of sites that have had releases of hazardous substances, are unlikely to represent an environmental concern. Based on the findings, vapor migration from the surrounding properties is unlikely to represent an environmental concern and Partner recommends no further investigation regarding this issue.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Rexford Industrial Realty Inc. (User of this report).

User Responsibilities				
Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
AAI User Questionnaire			X	
Title Records, Environmental Liens, and AULs			X	
Specialized Knowledge			X	
Actual Knowledge			X	
Valuation Reduction for Environmental Issues			X	
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports	X		X	
Other				X

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property, identified as Glassell Acquisitions Partners LLC, was not available to be interviewed at the time of the assessment. Based on its review of information from other sources,

however, Partner believes the lack of this information is unlikely to affect the conclusions or recommendations of this report. The lack of this information does not represent a significant data gap.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

Mr. Ryan Leslie of Rexford Industrial Realty, Inc., report user, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.3 Interview with Key Site Manager

Mr. Chris Baily, key site manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment. Its review of the EDR report, however, identified no environmental liens or AUL in connection with the subject property.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Phase I Environmental Site Assessment Report Volt Corporate Park, Partner Engineering and Science, Inc. (February 16, 2016)

Partner Engineering and Science, Inc. (Partner) prepared this report on behalf of Hines. The assessment was performed in accordance with ASTM Standard E1527-13. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, a review of federal, state and local regulatory databases. Pertinent information contained in this report is summarized below:

- At the time of the 2016 assessment, the subject property was occupied by Volt Information Science and SA Recycling. Onsite operations consisted of general office use.
- According to historical information, the site was agricultural land in at least 1932 and developed with the existing office park in 1987.
- No current or former USTs were identified on the subject property.
- No environmental concerns were identified on the adjacent or surrounding properties.
- Three 500 to 1,486-gallon ASTs of diesel fuel were identified on the north side of the building and associated with the emergency power generators. The ASTs were installed between 1999 and 2011. The ASTs were in good condition, located in secondary containment, and no violations were identified with the local fire department. Based on the foregoing, these ASTs were not expected to represent a significant environmental concern.

Partner identified no RECs and recommended no further investigation.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Chloe Adelman

Site Assessment Conducted On: July 12, 2021

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 2401-2421 North Glassell Street (Subject Property)

Name	Title/Role	Contact Number	Site Walk* Yes/No
Mr. Chris Bailly	Key Site Manager	(714) 227-2848	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the northern side of the subject property. An independent solid waste disposal contractor, CR&R Disposal, removes solid waste from the subject property. According to property personnel, only nonhazardous trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance. According to information with the site contact, former cooking grease from the cafeteria was disposed of in aboveground grease containers by a grease recycling contractor, which does not represent an environmental concern.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Orange services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Southern California Edison and Southern California Gas.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies appears unlikely to represent an environmental concern.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former USTs was observed during the site reconnaissance.

Partner observed three diesel-fired emergency generators located on the northern exterior of 2401A Building of the subject property. Two of the ASTs were approximately 600-gallons in capacity and one of the generators was approximately 1,400-gallons in capacity. The generators are each equipped with an AST ("belly tanks") for the storage of diesel fuel. No staining, leaks or spills were noted in the vicinity of the generator, and no releases or violations have been reported to the AQMD or applicable regulatory agencies. Based on the lack of reported releases or violations and observed good condition, the diesel belly tanks and back-up generators are unlikely to represent a significant environmental concern.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into

which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Four pad-mounted transformers were observed on the subject property. No leaking or staining was observed in the vicinity of the transformers. Southern California Edison maintains ownership and operational responsibility for the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

One trash compactor was observed inside the northern side of one of the buildings. No staining or spills of hydraulic fluid associated with the trash compactor were observed.

Additionally, five potential PCB-containing hydraulic elevators were observed/reported on the subject property during Partner’s reconnaissance. Access to the elevator equipment rooms could not be provided during site assessment. According to the site contact the elevator equipment is in good condition and routinely maintained by Kone Elevator Company. Based on the routine maintenance, the hydraulic elevators are not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, balers, etc.) was observed on the subject property during Partner’s reconnaissance.

Partner recommends no further investigation regarding PCBs in connection with the subject property.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in 1987. As such, an asbestos evaluation was not required by the Client's scope of services; however, please refer to the table below for observed materials that would be considered suspect ACMs in the event of a thorough survey:

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall	Throughout building interiors	No	Good
Vinyl Floor Tiles	Some building breakrooms/some bathrooms	No	Good
Vinyl Floor Sheeting	Some building breakrooms/some bathrooms	No	Good
Floor Tile Mastic	Throughout Building Interior	No	Good
Ceiling Tiles	Throughout Building Interior	Yes	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title

X, intact LBP on most walls and ceilings is not considered a “hazard,” although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property buildings, it is unlikely that LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 3. Based upon the radon zone classification, radon is unlikely to represent an environmental concern and Partner recommends no further investigation regarding this issue.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the City of Orange Water Division serves the subject property vicinity. The sources of public water for the City of Orange are surface water from water from Northern California via the State Water Project, the Colorado River, local groundwater basins, local water sheds, reclamation and water reuse projects, and ocean desalinization. According to the City of Orange and the 2020 Consumer Confidence Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

Partner identified no indications of water damage or mold growth in connection with the subject property.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner identified no RECs associated with the subject property.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner identified no CRECs associated with the subject property.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner identified no HRECs associated with the subject property.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner identified no environmental issues associated with the subject property.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2401-2421 North Glassell Street in Orange, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation regarding the environmental condition of the subject property.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2401-2421 North Glassell Street in Orange, Orange County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # C07D-44F7-9022

PO # 21-328710.1

Project 21-328710.1

UNMAAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: C07D-44F7-9022

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☒ Library of Congress
- ☒ University Publications of America
- ☒ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Classification No. 207287

Date: _____

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, California Business and Professions Code): Any City, which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is a licensed contractor pursuant to the provisions of the Contractor's License Law (Ch. 9 - Commencing with Sec. 7000) of Div. 3 of the B.P.C. or that he is exempt therefrom with Sec. 7031.5 by any applicant for a permit subject to the provisions of Sec. 7031.5 by or not more than five hundred dollars (\$500.00):

☐ I, as sole owner of the property, or my employees, will, as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B.P.C.). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the structure or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B.P.C.). The Contractor's License Law does not apply to an owner of property for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.

☐ I am exempt under Sec. _____ B.P.C. for this reason: _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Worker's Compensation Insurance or a certified copy thereof (Sec. 3800, Lab. C.).

PERMIT TO OPERATE

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for the annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner
or Operator:

VOLT INFORMATION SCIENCES INC
2401 N GLASSELL ST
ORANGE, CA 92865

ID 85829

Equipment Location: 2401 N GLASSELL ST, ORANGE, CA 92865

Equipment Description :

INTERNAL COMBUSTION ENGINE, CUMMINS, 6 CYLINDERS, TURBOCHARGED/AFTERCOOLED,
MODEL NO. QSK23-G7 NR2, 1220 BHP, DIESEL FUELED, DRIVING AN EMERGENCY ELECTRICAL
GENERATOR.

Conditions :

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
3. A NON-RESETTABLE TOTALIZING TIMER SHALL BE INSTALLED AND MAINTAINED TO INDICATE THE ENGINE ELAPSED OPERATING TIME.
4. THIS ENGINE SHALL NOT OPERATE MORE THAN 200 HOURS IN ANY ONE YEAR, WHICH INCLUDES NO MORE THAN 50 HOURS IN ANY ONE YEAR FOR MAINTENANCE AND TESTING PURPOSES AND NO MORE THAN 4.2 HOURS IN ANY ONE MONTH FOR MAINTENANCE AND TESTING PURPOSES.
5. AN ENGINE OPERATING LOG OF ENGINE OPERATIONS SHALL BE KEPT AND MAINTAINED DOCUMENTING THE TOTAL TIME THE ENGINE IS OPERATED EACH MONTH AND THE SPECIFIC REASON FOR OPERATION AS:
 - A. EMERGENCY USE
 - B. MAINTENANCE AND TESTING
 - C. OTHER (BE SPECIFIC)IN ADDITION, FOR EACH TIME THE ENGINE IS MANUALLY STARTED, THE LOG SHALL INCLUDE THE DATE OF ENGINE OPERATION, THE SPECIFIC REASON FOR OPERATION, AND THE TOTALIZING HOUR METER READING (IN HOURS AND TENTHS OF HOURS) AT THE BEGINNING AND THE END OF THE OPERATION.
6. ON OR BEFORE JANUARY 15TH OF EACH YEAR, THE OPERATOR SHALL RECORD IN THE ENGINE OPERATING LOG:

FILE COPY

South Coast Air Quality Management District
Certified Copy

PERMIT TO OPERATE

- A. THE TOTAL HOURS OF ENGINE OPERATION FOR THE PREVIOUS CALENDAR YEAR, AND
 - B. THE TOTAL HOURS OF ENGINE OPERATION FOR MAINTENANCE AND TESTING FOR THE PREVIOUS CALENDAR YEAR.
7. ENGINE OPERATION LOG(S) SHALL BE RETAINED ON SITE FOR A MINIMUM OF FIVE CALENDAR YEARS AND SHALL BE MADE AVAILABLE TO THE EXECUTIVE OFFICER OR REPRESENTATIVE UPON REQUEST.
8. THE OPERATOR SHALL NOT PURCHASE ANY DIESEL FUEL UNLESS THE FUEL IS LOW SULFUR DIESEL FOR WHICH THE SULFUR CONTENT DOES NOT EXCEED 15 PPM BY WEIGHT. EFFECTIVE JANUARY 1, 2006, THE OPERATOR SHALL ONLY USE DIESEL FUEL WITH A SULFUR CONTENT THAT DOES NOT EXCEED 15 PPM BY WEIGHT, UNLESS THE OPERATOR DEMONSTRATES IN WRITING TO THE EXECUTIVE OFFICER THAT SPECIFIC ADDITIONAL TIME IS NECESSARY.
9. OPERATION BEYOND THE 50 HOURS PER YEAR ALLOTTED FOR ENGINE MAINTENANCE AND TESTING SHALL BE ALLOWED ONLY IN THE EVENT OF A LOSS OF GRID POWER OR UP TO 30 MINUTES PRIOR TO A ROTATING OUTAGE, PROVIDED THAT: (A) THE UTILITY DISTRIBUTION COMPANY HAS ORDERED ROTATING OUTAGES IN THE CONTROL AREA WHERE THE ENGINE IS LOCATED OR HAS INDICATED THAT IT EXPECTS TO ISSUE SUCH AN ORDER AT A CERTAIN TIME; AND (B) THE ENGINE IS LOCATED IN A UTILITY SERVICE BLOCK THAT IS SUBJECT TO THE ROTATING OUTAGE. ENGINE OPERATION SHALL BE TERMINATED IMMEDIATELY AFTER THE UTILITY DISTRIBUTION COMPANY ADVISES THAT A ROTATING OUTAGE IS NO LONGER IMMINENT OR IN EFFECT.
10. THIS ENGINE SHALL NOT BE USED AS PART OF AN INTERRUPTIBLE SERVICE CONTRACT IN WHICH A FACILITY RECEIVES A PAYMENT OR REDUCED RATES IN RETURN FOR REDUCING ELECTRICAL LOAD ON THE GRID WHEN REQUESTED TO DO SO BY THE UTILITY OR THE GRID OPERATOR.
11. THIS ENGINE SHALL BE A US EPA CERTIFIED, NON-ROAD COMPRESSION-IGNITION ENGINE, AS EVIDENCED BY THE MANUFACTURER'S ENGINE TAG.

Subject: Phase I Environmental Site Assessment
Volt Corporate Park
2401-2421 North Glassell Street
Orange, California 92865
Partner Project No. 16-155978.1

Dear Mr. Huffman:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in general conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 765-7242.

Sincerely,

Arcie Propster
Principal

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Hines for the property located at 2401-2421 North Glassell Street in the City of Orange, Orange County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Hines with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the southeast corner of North Glassell Street and East Fletcher Avenue within a mixed commercial and residential area of Orange County. Please refer to the table below for further description of the subject property:

Subject Property Data

Address(es):	2401-2421 North Glassell Street, Orange, California
Property Use:	Commercial Office
Land Acreage (Ac):	11.8 Ac
Number of Buildings:	Four
Number of Floors:	Two
Gross Building Area (SF):	191,129 SF (Total): Building 2401A = 66,613 SF; 2401B = 45,950 SF; 2411 = 39,282 SF and building 2421 = 39,282 SF
Net Rentable Area (SF):	191,129 SF (Total)
Date of Construction:	1987
Assessor's Parcel Number (APN):	374-381-01 and 374-381-02
Type of Construction:	Concrete Tilt-Up
Current Tenants:	Volt Information Science and SA Recycling (sub lessee)
Site Assessment Performed By:	Yvonne Rodriguez of Partner
Site Assessment Conducted On:	February 8, 2016

The subject property is currently developed with an office park that is occupied by Volt Information Science (with a subtenant – SA Recycling) and is designed for office use. Onsite operations consist of general office use for both tenants. In addition to the current structures, the subject property is also improved with asphalt-paved parking areas and associated landscaping.

According to available historical sources, the subject property was formerly agricultural land as early as 1932, and remained agricultural land until the existing office park was constructed in 1987. The subject property improvements have remained relatively unchanged since 1987. Tenants on the subject property have included Volt Information Science (1987-present), SA Recycling (2010-present) and various office tenants. No tenants of environmental concern were noted.

The immediately surrounding properties consist of single-family homes to the north across East Fletcher Avenue; five light industrial buildings to the south across a railroad spur; single-family homes to the east across North Orange Olive Road; three commercial buildings to the west across North Glassell Street; and single-family homes to the northwest across the intersection of North Glassell Street and East Fletcher Avenue.

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the west. According to groundwater monitoring data available from the Regional Water Quality Control Board's (RWQCB's) GeoTracker website, for a nearby site (Shell Service Station at 1200 State College Boulevard, Case T0605978616), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 72-104 feet below ground surface (bgs)

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner did not identify any environmental issues during the course of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2401-2421 North Glassell Street in the City of Orange, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2401-2421 North Glassell Street in the City of Orange, Orange County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies.

As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Hines engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Hines. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted the Terms and Conditions for which this report was completed. A copy of Partner's standard Terms and Conditions can be found at <http://www.partneresi.com/terms-and-conditions.php>.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner was not able to document the historical use of the subject property prior to 1932. The following sources were reviewed during the course of this assessment and found to be limited: aerial photographs were not available prior to 1938; city directories were not available prior to 1991; topographic maps prior to 1932 were not reasonably ascertainable from local agencies; and other historical sources such as fire insurance maps did not provide coverage of the subject property. This data failure is not considered critical and does not change the conclusions of this report, as the 1932 aerial photograph revealed the subject property to be undeveloped/agricultural. In addition, the adjacent and surrounding areas are also shown mostly as farmland with several farmhouses in the area.

- Partner submitted Freedom of Information Act (FOIA) requests to Orange County Health Agency for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property. As of this writing, this agency have not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner observed approximately 50% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (office), this limited method of survey is not expected to alter the overall findings of this assessment.
- Partner's view of the ground during the site assessment was obstructed due to or excessive storage in the warehouse space of building 2401. Based on the nature of occupancy, this limitation is not expected to alter the overall findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property is located on the southeast corner of North Glassell Street and East Fletcher Avenue within a mixed commercial and residential area of Orange County. According to the Orange County Assessor, the subject property is legally described with assessor parcel numbers (APNs) 374-381-01 and 374-381-02, and ownership is currently vested in Volt Orange CA Real Estate Group since 2005.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by an office park that is occupied by Volt Information Science (with a subtenant – SA Recycling) and is designed for office use. Onsite operations consist of general office use for both tenants. In addition to the current structures, the subject property is also improved with asphalt paved parking lots and associated landscaping.

The subject property is designated for commercial development by the City of Orange.

The subject property was identified as a CA Proc and CA HAZNET site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and residential area of Orange County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North:	Single-family residences (2427, 2464, 2467 Hartman, 2459 North Hearthside Street, 2456 North Beechwood Street, 318-420 East Redwood Avenue)
Northwest:	Single-family residence (110 West Greenway Avenue)
South:	Light industrial buildings (2345 North Glassell Street, 125-227, 231 East Bristol Lane)
Southwest:	2340 North Glassell Street)
East:	Single-family residences (508-509 East Glendora, 2382, 2394, 2395 North Flanders Street, 2435 North Orange Olive Road)
West:	Commercial property (2366-2490 North Glassell Street)

The adjacent properties to the west across North Glassell Street are identified as Historic UST, LUST (with status of closed), Historic Cortese, and RCRA-SQG sites in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Orange, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 205 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the west. Improvements with the exceptions of roadways are not depicted on the 2012 map.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the west. The nearest surface water in the vicinity of the subject property is the Santa Ana River located approximately 0.75 miles west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Orange Water Department (OWD) serves the subject property vicinity. According to a representative of the OWD, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Orange are surface water from the Colorado River and deep groundwater.

According to a previous subsurface investigation conducted on a nearby property (Shell Service Station at 1200 State College Boulevard, Case T0605978616), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 72-104 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property lies within the Orange County Coastal Plain area of the Los Angeles Basin. The plain consists of predominantly alluvial basin-fill material deposited by meandering tributaries of the Santa Ana River system (Morton, et al., 1979). Surficial geology in the subject property vicinity consists of recent alluvium of gravel, sand, silty sand, and clayey silt with an average thickness of 200 feet (Poland, et al., 1956; California DWR, 1967). This recent alluvium is underlain by the upper Pleistocene Lakewood Formation, which averages 500 feet in thickness and consists of alternating stratigraphic zones of coarse-grained sand and clayey silt. The estimated depth to bedrock is more than 200 feet.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06059C 0153J, dated December 3, 2009, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information

Period/Date	Source	Description/Use
1932-1986	Aerial Photographs, Historic Topographic Maps	Agricultural Land
1987-Present	Aerial Photographs, Building Records, City Directories, Interviews, Previous Report	Commercial Office Campus

Tenants on the subject property have included Volt Information Science (1987-present), SA Recycling (2010-present) and various office tenants. No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources, Inc. (EDR) on December 14, 2015. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date:	1938, 1947, 1952	Scale:	1"=500'
Subject Property:	Appears to be agricultural land consisting of orchards		
North:	Appears to be agricultural land consisting of orchards across East Fletcher Avenue		
Northwest:	Appears to be agricultural land consisting of orchards across East Fletcher Avenue and North Glassell Street		
South:	Appears to be agricultural land consisting of orchards		
Southwest:	Appears to be agricultural land consisting of orchards across North Glassell		
East:	Appears to be agricultural land consisting of orchards across a railroad track and North Orange Olive Road		
West:	Appears to be agricultural land consisting of orchards across a road North Glassell Street		

Date:	1968	Scale:	1"=500'
Subject Property:	Appears to be fallow agricultural land		
North:	Appears to be developed with existing single-family homes across East Fletcher Avenue		
Northwest:	Appears to be developed with existing single-family homes across intersection of North Glassell Street and East Fletcher Avenue		
South:	Appears to be fallow agricultural land		
Southwest:	Appears to be fallow agricultural land across North Glassell Street		
East:	Appears to be developed with existing single-family homes across a rail road track and North Orange Olive Road		
West:	Appears to developed with a service station and fallow agricultural land across North Glassell Street		

Date: 1977		Scale: 1"=500'
Subject Property:	Appears to be agricultural land consisting of field crops	
North:	No significant changes visible	
Northwest:	No significant changes available	
South:	Appears to be agricultural land consisting of field crops and rail road track	
Southwest:	Appears to be developed with existing commercial office and retail building across North Glassell Street	
East:	No significant changes visible	
West:	Appears to be developed with an service station and a commercial building across North Glassell Street	

Date: 1990		Scale: 1"=500'
Subject Property:	Appears to be developed with existing office park and paved parking areas	
North:	No significant changes visible	
Northwest:	No significant changes visible	
South:	Appears to be developed with existing light industrial buildings across a railroad spur	
Southwest:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 1994, 2002, 2005		Scale: 1"=500'
Subject Property:	No significant changes visible	
North:	No significant changes visible	
Northwest:	No significant changes visible	
South:	No significant changes visible	
Southwest:	No significant changes visible	
East:	No significant changes visible	
West:	Appears to be developed with existing commercial buildings across North Glassell Street	

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner requested Sanborn Fire insurance maps from EDR on December 28, 2015. Sanborn map coverage was not available for the subject property.

A copy of the Sanborn Fire insurance map no coverage documentation is included in Appendix B.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR on December 14, 2015 for past names and businesses that were listed for the subject property and adjacent properties.

The findings are presented in the following table:

City Directory Search for 2401-2421 North Glassell Street (Subject Property)	
Year(s)	Occupant Listed
1965, 1970, 1975, 1976, 1980, 1983, 1986	No listing (2401-2421 North Glassell Street)

According to the city directory review, the adjacent properties have been occupied by multiple light industrial and residential tenants. A service station was located to the west across North Glassell Street from 1980 to 1986. This facility is listed as a closed LUST site in Section 4.2.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from USGS on February 3, 2016. The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1932,
1935

Subject Property: Depicted as undeveloped
North: Depicted as undeveloped
Northwest: Depicted as undeveloped
South: Depicted as undeveloped
Southwest: Depicted as undeveloped
East: Depicted as undeveloped
West: Depicted as undeveloped

Date: 1949,
1950

Subject Property: Depicted as agricultural land
North: Depicted as agricultural land
Northwest: Depicted as agricultural land across North Glassell Street
South: Depicted as agricultural land
Southwest: Depicted as agricultural land across North Glassell Street
East: Depicted as agricultural land across North Orange Olive Road
West: Depicted as agricultural land across North Glassell Street

Date: 1964

Subject Property: Depicted as agricultural land
North: Depicted within a shaded area representing urban development across North Orange Olive Road
Northwest: Depicted within a shaded area representing urban development across North Glassell Street
South: Depicted within unshaded area
Southwest: Depicted as agricultural land across North Glassell Street
East: Depicted within a shaded area representing urban development across North Orange Olive Road
West: Depicted as agricultural land across North Glassell Street

Date: 1972,
1984

Subject Property: Depicted within unshaded area
North: No significant changes depicted
Northwest: No significant changes depicted
South: Depicted within a shaded area representing urban development
Southwest: Depicted within a shaded area representing urban development

Date: 1972,
1984

East: No significant changes depicted

West: Depicted within a shaded area representing urban development across North Glassell Street. Commercial buildings are depicted by 1984.

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

4.1.2 Health Department

Regulatory Agency Data

Name of Agency:	Orange County Health Care Agency (OCHCA)
Agency Address:	1241 East Dyer Road, Santa Ana
Agency Phone Number:	(714) 433-6000
Date of Contact:	February 3, 2016
Method of Communication:	Faxed Request
Summary of Communication:	As of the date of this report, Partner has not received a response from the OCHCA for inclusion in this report.

4.1.3 Fire Department

Regulatory Agency Data

Name of Agency:	City of Orange Fire Department (OFD)
Point of Contact:	Barbara Reid
Agency Address:	176 South Grand Avenue
Agency Phone Number:	(714) 288.2500
Date of Contact:	February 3, 2016
Method of Communication:	E-mailed request
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the OFD

A copy of pertinent documents is included in Appendix B of this report.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data

Name of Agency:	South Coast Air Quality Management District (AQMD)
Source:	http://www3.aqmd.gov/webappl/fim/prog/search.aspx
Agency Phone Number:	(909) 396-2000
Date of Contact:	February 3, 2016
Method of Communication:	Online
Summary of Communication:	Records indicate three permits to operate three diesel emergency power generators are on file. No violations were noted. No Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD.

A copy of pertinent documents is included in Appendix B of this report.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data

Name of Agency: Regional Water Quality Control Board (RWQCB)
Source: <http://geotracker.waterboards.ca.gov/default.asp>
Agency Phone Number: (916) 341-5791
Date of Contact: February 3, 2016
Method of Communication: Online
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data

Name of Agency: California Department of Toxic Substances Control (DTSC)
Source: <http://www.envirostor.dtsc.ca.gov/public/>
http://hwts.dtsc.ca.gov/report_list.cfm
Agency Phone Number: (800) 728-3618
Date of Contact: February 3, 2016
Method of Communication: Online
Summary of Communication: The subject property is listed as Digital Graphics Advantage at 2411 North Glassell Street and generated 0.2672 tons of hazardous waste in the form of photochemical/photoprocessing in 1997, 0.2340 tons in 1996, 0.0258 tons in 1995 and 0.2260 tons in 1994. Digital Advantage was listed as inactive in 1998. The subject property is listed as Volt at 2401 North Glassell Street and generated 0.072 tons of unspecified solvent mixture in 2008. No records regarding releases, or the presence of USTs and AULs on the subject property were on file with the DTSC.

4.1.7 Building Department

Regulatory Agency Data

Name of Agency: Orange Building Department (OBD)
Point of Contact: William Crouch
Agency Address: 300 East Chapman Avenue, Orange, California
Agency Phone Number: (714) 744-7200
Date of Contact: December 14, 2015
Method of Communication: In Person
Summary of Communication: Records were available for review, as further discussed in the following table.

Building Records Reviewed for 2401-2421 North Glassell Street (Subject Property)

Year(s)	Owner/Applicant	Description
1986	Volt Information Services	Sewer Connection for New Construction

Regulatory Agency Data

Name of Agency: Orange Building Department (OBD)
Point of Contact: William Crouch
Agency Address: 300 East Chapman Avenue, Orange, California
Agency Phone Number: (714) 744-7200
Date of Contact: December 14, 2015
Method of Communication: In Person
Summary of Communication: Records were available for review, as further discussed in the following table.

Building Records Reviewed for 2401-2421 North Glassell Street (Subject Property)

1987	Volt	Information	Certificate of Occupancy (2401 North Glassell Street)
	Sciences		
1987	Volt	Directory Data	Certificate of Occupancy (2411 North Glassell Street)
1987	Volt	Information	Building Permit for New Construction
	Sciences		
1993	Volt		Tenant Improvement (mopsinks, floor sinks)
1997	Volt	Information	Tenant Improvement
	Sciences		
1999	Volt		Install Electrical Backup Generator
2007	Volt		Add System Cooling Tower
2007	Volt		Install New Generator and Two Battery Cabinets
2009	Volt		Install New Generator, Battery Back Up System
2010	Volt		Install Garbage Disposal and Tenant Reconfiguration

Copies of pertinent documents are included in Appendix B of this report.

4.1.8 Planning Department

Regulatory Agency Data

Name of Agency: City of Orange, Planning Division
Source: http://www.cityoforange.org/depts/commdev/planning/current_planning/zoning_map.asp
Agency Phone Number: (714) 744-7220
Date of Contact: February 3, 2016
Method of Communication: Online
Summary of Communication: According to records reviewed, the subject property is zoned M2 for retail development by the City of Orange.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data

Name of Agency: California Division of Oil, Gas and Geothermal Resources (DOGGR)
Source: <http://maps.conservation.ca.gov/doggr/#close>
Agency Phone Number: (916) 322-1080
Date of Contact: February 3, 2016
Method of Communication: Online
Summary of Communication: According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data

Name of Agency:	Orange County Assessor (OCA) and Chicago Title online
Agency Address:	11 Civic Center Plaza, Santa Ana 92701
Agency Phone Number:	(714) 834-2727
Date of Contact:	February 3, 2016
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Numbers (APNs) 374-381-01 and 374-381-02, and is currently owned by Volt Orange Co. Real Estate Group since 2005. The current buildings were constructed in 1987 and total approximately 191,129 square feet on an 11.88 acre lot.

A copy of pertinent documents is included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	Y	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N/A	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
State/Tribal Leaking Storage Tank Site	0.50	N	Y	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	N	Y	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	N	N
EDR US Hist Cleaners	Varies	N	N	N
CA HAZNET	Varies	Y	N	N
CA PROC	Varies	Y	N	N

4.2.2 Subject Property Listings

The subject property is identified as a CA Proc and CA HAZNET site in the regulatory database report, as discussed below:

- The subject property, identified as SA Recycling at 2411 North Glassell Street is listed on the CA PROC list for recycling activities. However, recycling activities actually take place on another property that is located several miles from the subject property. SA Recycling only uses the subject property for general office purposes. Based on the foregoing information, this listing is not expected to represent a significant environmental concern.
- The subject property, identified as Digital Graphics Advantage at 2411 North Glassell Street, is listed on the HAZNET list for generating photochemical waste in 1994 thru 1997. This tenant is no longer present onsite. Inclusion on the HAZNET database generally indicates compliance with applicable regulations pertaining hazardous waste generation. Based on the nature of waste generated and short duration of occupancy, this listing is not expected to represent a significant environmental concern.
- The subject property, identified as Volt at 2401 North Glassell Street, is listed on the HAZNET list for generating unspecified solvent mixture waste in 2008 likely related to servicing of an emergency power generator, based on site reconnaissance interviews. Inclusion on the HAZNET database generally indicates compliance with applicable regulations pertaining hazardous waste generation. Based on the small quantities and nature of onsite operations, this listing is not expected to represent a significant environmental concern.
- The subject property, identified as Southern California Edison at 2401 North Glassell Street, is listed on the HAZNET list for generating waste oil and mixed oil in 2011. This activity was likely related to replacing a transformer as there are only dry transformers currently onsite. Inclusion on the HAZNET database generally indicates compliance with applicable regulations pertaining

hazardous waste generation. Based on this information, the HAZNET listing is not expected to represent a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent properties to the west across North Glassell Street are identified as Historic UST, LUST (with status of closed), Historic Cortese, HAZNET and RCRA-SQG sites in the regulatory database report, as discussed below:

- The adjacent property, identified as Gasco Service Station/Desert Petroleum at 2440 North Glassell Street, located adjacent to the west across North Glassell Street is listed as Historic UST, LUST (with status of closed), and Historic Cortese site. This facility was equipped with three 10,000-gallon gasoline USTs and reported a release of gasoline in 1989, which reportedly impacted only soil. The release occurred as a result of a tank leak discovered during removal of USTs and was reported to the lead agency (Orange County Health Care Agency) in 1989. Gasoline impacted soil was remediated through 1991. The responsible party is identified as Gasco Service Station/Desert Petroleum, and regulatory closure from the City of Orange Fire Department was granted on April 5, 1995. Based on the remediation of petroleum-impacted soil, distance of the impacted soil to the subject property boundary, absence of identified groundwater contamination (limiting the potential for off-site migration), this listing is not expected to represent a significant environmental concern.
- The adjacent property, identified as EMS Analytical Lab at 2404 North Glassell Street, located adjacent to the west across North Glassell Street is listed as a HAZNET and RCRA Small Quantity Generator of corrosive waste, reactive waste and various metals. The database indicates electroplating operations were conducted onsite circa 2002. This facility disposed of more than 8 tons of metals recovery (including retoring, smelting, chemicals, etc) between 2012 and 2013. No releases were reported for this facility. Based on the lack of a documented release and inferred direction of groundwater flow, this listing is not expected to represent a significant environmental concern.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings are identified within the search radius in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Hines (User of this report).

User Responsibilities				
Item	Provided By User	Not Provided By User	Discussed Below	Does Not Apply
Environmental Pre-Survey Questionnaire			X	
Title Records, Environmental Liens, and AULs			X	
Specialized Knowledge			X	
Actual Knowledge			X	
Valuation Reduction for Environmental Issues			X	
Identification of Key Site Manager	Section 5.1.3			
Reason for Performing Phase I ESA	Section 1.1			
Prior Environmental Reports		X		
Other	X	X		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 2005, identified as Volt Orange CA Real Estate Group, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

5.1.3 Interview with Key Site Manager

Mr. Clark Marine, key site manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Marine, the subject property was developed in 1987 for office use. Prior to that, the subject property was developed agriculturally. Mr. Marine further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of his knowledge, with the exception of three emergency power generators that have self-contained integral tanks for diesel fuel.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner contracted EDR to perform an environmental lien search for the subject property. No environmental liens or AULs were identified for the subject property. An updated preliminary title report was also provided to Partner for review. The title report was prepared by First American Title Company and dated January 20, 2016. The report shows 2401-2421 North Glassell Street (Subject Property) identified with two deeds dated on November 11, 1984 with titles received from Volt Information Sciences, Inc. Legal current owners are Volt Orangeca Real Estate Corp., a corporation.

Copies of pertinent pages are included in Appendix B of this report.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following pertinent documentation was provided to Partner for review during the course of this assessment:

Offering Memorandum, Cushman & Wakefield (August 2015)

According to the Offering Memorandum (OM) prepared by Cushman & Wakefield, the subject property is identified as the Volt Corporate Park, 2401, 2411 and 2421 North Glassell Street in Orange, California, 92865. The four subject property buildings were constructed on 11.88 acres across two parcels in 1987 of concrete tilt-up construction on a concrete slab. The buildings total 191,127 square feet, as follows:

- Building 2401A – 66,613 square feet
- Building 2401B – 45,950 square feet
- Building 2411 – 39,282 square feet
- Building 2421 – 39,282 square feet

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data

Site Assessment Performed By: Yvonne Rodriguez

Site Assessment Conducted On: February 8, 2016

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 2401-2421 North Glassell Street (Subject Property)

Name	Title/Role	Contact Number	Site Walk* Yes/No
Clark Marine	Team Lead – VIS Facilities	(714) 921-7499	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property.

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the northern side of the subject property. Solid waste generated at the subject property includes food waste, waste, cooking oil, and general household trash. An independent solid waste disposal contractor, CR&R Disposal, removes general household trash from the subject property. Cooking oil is stored in grease containers in Building 2401A. An independent grease recycling contractor, Darling International, removes cooking oil on an as needed basis.

No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Orange services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Southern California Edison and Southern California Gas. The mechanical system is comprised of electric rooftop-mounted packaged units. Hot water is provided by individual natural gas hot water heaters. An additional cooling tower is used to cool air in the computer server room located on the northern side of the property.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Partner identified hazardous substances used, stored, and/or generated on the subject property as noted in the following table:

Hazardous Substances and/or Petroleum Products Noted Onsite				
Substance	Container Size	Location	Nature of Use	Disposal Method
Diesel Fuel	Three 500-1,486 gallon ASTs	Northern side of buildings	Emergency Power Generators	Not Applicable (N/A)
Cooling tower chemical (anticorrosive)	20-gallon container	Northern side of buildings	Cooling Tower Water Maintenance	N/A
Equipment Cleaner Clean-N-Flush	Three five-gallon containers	Northern side of buildings	Routine maintenance for boilers and processing equipment	N/A

Hazardous Substances and/or Petroleum Products Noted Onsite

Substance	Container Size	Location	Nature of Use	Disposal Method
Paint	Two Paint Containers 5-gallon	Maintenance area/Northern side of buildings	Routine Maintenance	N/A
Halon 1301	Five containers 627lbs	Server Room	Fire Suppression	N/A
Hydraulic Fluid	1-5 gallon container	Elevator Equipment Room 5	Routine Maintenance	N/A

The materials were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. Based on the nature of use, overall small quantities observed, presence of secondary containment, and lack of violations on-file with the local fire department, these materials are not expected to represent a significant environmental concern.

Partner noted minor amounts of surface staining observed within the cooling tower storage area. The staining appeared to be located around the equipment cleaner Clean-N-Flush associated with cooling tower maintenance. The staining was located on soil, and no drains were observed in the vicinity. Based on the small size and surficial nature of the staining, it is not expected to represent a significant environmental concern.

Partner noted a leak near the mechanical equipment related to the trash compacter

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

Partner observed three aboveground storage tanks (ASTs) for the storage of diesel fuel on the subject property. The ASTs are located on the northern side of the buildings and are part of three self-contained emergency power generators, with the ASTs located in the belly of each generator. According to Mr. Marine, the ASTs were installed between 1999 and 2011, and are equipped with secondary containment. No staining, leaks or spills were noted in the vicinity of the ASTs, and no releases have been reported to the local agencies. Based on the aforementioned conditions, these ASTs are not an environmental concern.

No other evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

One five-gallon bucket of motor oil was observed next to one of the emergency power generators. A small leak had occurred (approximately several ounces) of the motor oil which had stained the soil immediately next to the bucket. Based on the very small quantity of oil spilled, the stained soil is considered a de minimis condition.

No other spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Four dry transformers were observed on the subject property. Dry transformers do not contain hydraulic oil, and therefore are not expected to represent a significant environmental concern. One trash compactor was observed inside the northern side of one of the buildings. No staining or spills of hydraulic fluid associated with the trash compactor were observed.

Five hydraulic elevators are located on-site. Based on the date of construction of the site buildings (1987), it is unlikely the hydraulic machinery contains PCBs. Upon inspection of the elevator rooms, no surface staining was observed on the concrete flooring immediately below the elevator equipment. The elevators are serviced on a monthly basis by Kone Elevator Company. Review of service records in the elevator rooms did not reveal any major incidents with the elevator equipment. Based on the above, the presence of the elevator equipment is not anticipated to have an adverse impact on the Property.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner’s reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

Partner observed a sump pump located in the northern portion of the property. No staining or evidence of releases were observed near the sump pump.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in 1987. As such, an asbestos evaluation was not required by the scope of services; however, please refer to the table below for observed materials that would be considered suspect ACMs in the event of a thorough survey:

Suspect ACMs			
Suspect ACM	Location	Friable Yes/No	Physical Condition
Vinyl Floor Tiles	Some building Breakrooms/some Bathrooms	No	Good
Vinyl Floor Sheeting	Some building Breakrooms/some Bathrooms		
Floor Tile Mastic	Throughout Building Interior	No	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 3. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the City of Orange Water Department (OWD) serves the subject property vicinity. According to a representative of the OWD, shallow groundwater beneath the subject property is not utilized for domestic purposes. The sources of public water for the City of Orange are surface water from the Colorado River and deep groundwater. According to the City of Orange and the 2014 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g. in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner did not identify any environmental issues during the course of this assessment.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 2401-2421 North Glassell Street in the City of Orange, Orange County, California (the “subject property”). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends no further investigation at this time.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2401-2421 North Glassell Street in the City of Orange, Orange County, California in general conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

PHASE I ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The following questionnaire is required by the ASTM Standard E 1527-13, which adheres to the All Appropriate Inquiries (AAI) Rule (United States Environmental Protection Agency) (40 CFR 312).

As defined by ASTM, the User of the report is the "party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice."

PROPERTY ADDRESS:	2401-2421 N Glassell Street
PROPERTY CITY, STATE ZIP:	Orange, CA

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)

Did a search of recorded land title records (or judicial records) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

☐ YES ☐ NO

Unknown - title is still under review

2. Activity and use limitations (AULs) that are in place on the property or that have been filed or records against the property (40 CFR 312.26(a)(1)(v) and (vi))

Did a search of recorded land title records (or judicial records) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

☐ YES ☐ NO

Unknown - title is still under review

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ YES ☒ NO

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

☒ YES ☐ NO

Those are two separate questions. Yes on the first. NA on the second.

5. Commonly known or reasonably ascertainable information about the Property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

☐ YES ☒ NO

- a. Do you know the past uses of the property?

☐ YES ☒ NO

- b. Do you know of specific chemicals that are present or once were present at the property?

☐ YES ☒ NO

- c. Do you know of spills or other chemical releases that have taken place at the property?

☐ YES ☒ NO

- d. Do you know of any environmental cleanups that have taken place at the property?

☐ YES ☒ NO

- e. Do you have any prior knowledge that the property was developed as a gas station, dry cleaner, manufacturing/industrial facility in the past?

☐ YES ☒ NO

- f. Are you aware of historical use of hazardous materials or petroleum products used or present on the property?

☐ YES ☒ NO

g. Do you know if the property is currently or was formerly equipped with underground storage tanks (USTs) or septic tanks?

☐ YES ☒ NO

h. Do you know of any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?

☐ YES ☒ NO

6. **The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

☐ YES ☒ NO

PERMIT TO OPERATE

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for the annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner
or Operator:

VOLT INFORMATION SCIENCES INC
2401 N GLASSELL ST
ORANGE, CA 92865

ID 85829

Equipment Location: 2401 N GLASSELL ST, ORANGE, CA 92865

Equipment Description :

INTERNAL COMBUSTION ENGINE, CUMMINS, 6 CYLINDERS, TURBOCHARGED/AFTERCOOLED,
MODEL NO. QSK23-G7 NR2, 1220 BHP, DIESEL FUELED, DRIVING AN EMERGENCY ELECTRICAL
GENERATOR.

Conditions :

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
3. A NON-RESETTABLE TOTALIZING TIMER SHALL BE INSTALLED AND MAINTAINED TO INDICATE THE ENGINE ELAPSED OPERATING TIME.
4. THIS ENGINE SHALL NOT OPERATE MORE THAN 200 HOURS IN ANY ONE YEAR, WHICH INCLUDES NO MORE THAN 50 HOURS IN ANY ONE YEAR FOR MAINTENANCE AND TESTING PURPOSES AND NO MORE THAN 4.2 HOURS IN ANY ONE MONTH FOR MAINTENANCE AND TESTING PURPOSES.
5. AN ENGINE OPERATING LOG OF ENGINE OPERATIONS SHALL BE KEPT AND MAINTAINED DOCUMENTING THE TOTAL TIME THE ENGINE IS OPERATED EACH MONTH AND THE SPECIFIC REASON FOR OPERATION AS:
 - A. EMERGENCY USE
 - B. MAINTENANCE AND TESTING
 - C. OTHER (BE SPECIFIC)IN ADDITION, FOR EACH TIME THE ENGINE IS MANUALLY STARTED, THE LOG SHALL INCLUDE THE DATE OF ENGINE OPERATION, THE SPECIFIC REASON FOR OPERATION, AND THE TOTALIZING HOUR METER READING (IN HOURS AND TENTHS OF HOURS) AT THE BEGINNING AND THE END OF THE OPERATION.
6. ON OR BEFORE JANUARY 15TH OF EACH YEAR, THE OPERATOR SHALL RECORD IN THE ENGINE OPERATING LOG:

FILE COPY

PERMIT TO OPERATE

- A. THE TOTAL HOURS OF ENGINE OPERATION FOR THE PREVIOUS CALENDAR YEAR, AND
 - B. THE TOTAL HOURS OF ENGINE OPERATION FOR MAINTENANCE AND TESTING FOR THE PREVIOUS CALENDAR YEAR.
-
- 7. ENGINE OPERATION LOG(S) SHALL BE RETAINED ON SITE FOR A MINIMUM OF FIVE CALENDAR YEARS AND SHALL BE MADE AVAILABLE TO THE EXECUTIVE OFFICER OR REPRESENTATIVE UPON REQUEST.
 - 8. THE OPERATOR SHALL NOT PURCHASE ANY DIESEL FUEL UNLESS THE FUEL IS LOW SULFUR DIESEL FOR WHICH THE SULFUR CONTENT DOES NOT EXCEED 15 PPM BY WEIGHT. EFFECTIVE JANUARY 1, 2006, THE OPERATOR SHALL ONLY USE DIESEL FUEL WITH A SULFUR CONTENT THAT DOES NOT EXCEED 15 PPM BY WEIGHT, UNLESS THE OPERATOR DEMONSTRATES IN WRITING TO THE EXECUTIVE OFFICER THAT SPECIFIC ADDITIONAL TIME IS NECESSARY.
 - 9. OPERATION BEYOND THE 50 HOURS PER YEAR ALLOTTED FOR ENGINE MAINTENANCE AND TESTING SHALL BE ALLOWED ONLY IN THE EVENT OF A LOSS OF GRID POWER OR UP TO 30 MINUTES PRIOR TO A ROTATING OUTAGE, PROVIDED THAT: (A) THE UTILITY DISTRIBUTION COMPANY HAS ORDERED ROTATING OUTAGES IN THE CONTROL AREA WHERE THE ENGINE IS LOCATED OR HAS INDICATED THAT IT EXPECTS TO ISSUE SUCH AN ORDER AT A CERTAIN TIME; AND (B) THE ENGINE IS LOCATED IN A UTILITY SERVICE BLOCK THAT IS SUBJECT TO THE ROTATING OUTAGE. ENGINE OPERATION SHALL BE TERMINATED IMMEDIATELY AFTER THE UTILITY DISTRIBUTION COMPANY ADVISES THAT A ROTATING OUTAGE IS NO LONGER IMMINENT OR IN EFFECT.
 - 10. THIS ENGINE SHALL NOT BE USED AS PART OF AN INTERRUPTIBLE SERVICE CONTRACT IN WHICH A FACILITY RECEIVES A PAYMENT OR REDUCED RATES IN RETURN FOR REDUCING ELECTRICAL LOAD ON THE GRID WHEN REQUESTED TO DO SO BY THE UTILITY OR THE GRID OPERATOR.
 - 11. THIS ENGINE SHALL BE A US EPA CERTIFIED, NON-ROAD COMPRESSION-IGNITION ENGINE, AS EVIDENCED BY THE MANUFACTURER'S ENGINE TAG.

FILE COPY

PERMIT TO OPERATE

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

Equipment Description :

INTERNAL COMBUSTION ENGINE DIESEL SIX CYLINDER, TURBOCHARGED, AFTERCOOLER,
MODEL 6063-HV35 (310 KW) 415 HP, DIESEL FUEL-PUMP, DRIVING AN EMERGENCY ELECTRICAL
GENERATOR

Conditions :

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW
2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES
3. THIS ENGINE SHALL NOT OPERATE MORE THAN 20 HOURS IN ANY ONE YEAR, WHICH INCLUDES NOT MORE THAN 20 HOURS IN ANY ONE YEAR FOR MAINTENANCE AND TESTING PURPOSES
4. AN OPERATIONAL NON-RESETTABLE CUMULATING ENGINE HOUR METER SHALL BE INSTALLED AND MAINTAINED TO INDICATE THE ENGINE ELAPSED OPERATING TIME
5. THE OPERATION OF THE ENGINE BEYOND THE 20 HOURS PER YEAR ALLOCATED FOR ENGINE MAINTENANCE AND TESTING SHALL BE ALLOWED ONLY IN THE EVENT OF A LOSS OF GRID POWER OR UP TO 30 MINUTES PRIOR TO A ROTATING OUTAGE PROVIDED THAT THE ELECTRICAL GRID OPERATOR OR ELECTRIC UTILITY HAS ORDERED ROTATING OUTAGES IN THE CONTROL AREA WHERE THE ENGINE IS LOCATED OR HAS INDICATED THAT IT EXPECTS TO ISSUE SUCH AN ORDER AT A CERTAIN TIME AND THE ENGINE IS LOCATED IN A UTILITY SERVICE BLACK THAT IS SUBJECT TO THE ROTATING OUTAGE. ENGINE OPERATION SHALL BE TERMINATED IMMEDIATELY AFTER THE UTILITY DISTRIBUTION COMPANY ADVISES THAT A ROTATING OUTAGE IS NO LONGER IMMINENT OR IN EFFECT
6. THIS ENGINE SHALL NOT BE USED AS PART OF A DEMAND RESPONSE PROGRAM USING INTERRUPTIBLE SERVICE CONTRACT IN WHICH A FACILITY RECEIVES A PAYMENT OR REDUCED RATES IN RETURN FOR REDUCING ITS ELECTRIC LOAD ON THE GRID WHEN REQUESTED TO DO SO BY THE UTILITY OR THE GRID OPERATOR

FILE COPY

PERMIT TO OPERATE

7. AN ENGINE OPERATING LOG SHALL BE MAINTAINED WHICH ON A MONTHLY BASIS SHALL LIST ALL ENGINE OPERATIONS IN EACH OF THE FOLLOWING AREAS:
- A. EMERGENCY USE HOURS OF OPERATION
 - B. MAINTENANCE AND TESTING HOURS
 - C. OTHER OPERATING HOURS (DESCRIBE THE REASON FOR OPERATION)
- IN ADDITION, EACH TIME THE ENGINE IS STARTED MANUALLY, THE LOG SHALL INCLUDE THE DATE OF OPERATION AND THE TIMER READING IN HOURS AT THE BEGINNING AND END OF OPERATION. THE LOG SHALL BE KEPT FOR A MINIMUM OF THREE CALENDAR YEARS PRIOR TO THE CURRENT YEAR AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST. THE TOTAL HOURS OF OPERATION FOR THE PREVIOUS CALENDAR YEAR SHALL BE RECORDED SOMEWHERE DURING THE FIRST 15 DAYS OF JANUARY OF EACH YEAR.
8. THE OPERATOR SHALL COMPLY WITH ALL APPLICABLE REQUIREMENTS OF RULES 431.2 AND 147.8.

THIS PERMIT TO OPERATE R-F79759 SUPERSEDES PERMIT TO OPERATE F79759 ISSUED 12/14/2005

LIMITATIONS OF LIABILITY

THIS REPORT IS LIMITED IN SCOPE. IT IS NOT A COMMITMENT, ABSTRACT OF TITLE, TITLE OPINION, CERTIFICATE OF TITLE OR PRELIMINARY TITLE REPORT, NOR IS IT A REPRESENTATION OF THE STATUS OF TITLE, AND ITS ACCURACY IS NOT INSURED. WHILE THIS INFORMATION IS BELIEVED TO BE CORRECT, THE COMPANY MAKES NO REPRESENTATIONS AS TO ITS ACCURACY, DISCLAIMS ANY WARRANTIES AS TO THE REPORT, ASSUMES NO DUTIES TO YOU OR ANY THIRD PARTY, DOES NOT INTEND FOR YOU OR ANY THIRD PARTY TO RELY ON THE REPORT, AND ASSUMES NO LIABILITY FOR ANY LOSS OCCURRING BY REASON OF RELIANCE ON THIS REPORT OR OTHERWISE. IN PROVIDING THIS REPORT, THE COMPANY IS NOT ACTING AS AN ABSTRACTOR OF TITLE. IF IT IS DESIRED THAT LIABILITY BE ASSUMED BY THE COMPANY, YOU MAY REQUEST AND PURCHASE A POLICY OF TITLE INSURANCE, A BINDER, OR A COMMITMENT TO ISSUE A POLICY OF TITLE INSURANCE. NO ASSURANCE IS GIVEN AS TO THE INSURABILITY OF THE TITLE. CUSTOMER RECOGNIZES THAT THE FEE CHARGED IS NOMINAL IN RELATION TO THE POTENTIAL LIABILITY WHICH COULD ARISE FROM SUCH ERRORS, OMISSIONS OR NEGLIGENCE. THEREFORE, CUSTOMER UNDERSTANDS THAT THE COMPANY IS NOT WILLING TO PROCEED IN THE PREPARATION AND ISSUANCE OF THE REQUESTED REPORT UNLESS THE COMPANY'S LIABILITY IS STRICTLY LIMITED. CUSTOMER AGREES, AS PART OF THE CONSIDERATION FOR THE ISSUANCE OF THE REPORT, THAT THE TOTAL AGGREGATE LIABILITY OF THE COMPANY AND ITS AGENTS, SUBSIDIARIES, AFFILIATES, EMPLOYEES AND SUBCONTRACTORS SHALL NOT IN ANY EVENT EXCEED THE COMPANY'S TOTAL FEE FOR THE REPORT. IN NO EVENT WILL THE COMPANY, ITS SUBSIDIARIES, AFFILIATES, EMPLOYEES, SUBCONTRACTORS OR AGENTS BE LIABLE FOR CONSEQUENTIAL, INCIDENTAL, DIRECT, INDIRECT, PUNITIVE, EXEMPLARY OR SPECIAL DAMAGES REGARDLESS OF WHETHER SUCH LIABILITY IS BASED ON BREACH OF CONTRACT, TORT, NEGLIGENCE OF THE COMPANY, STRICT LIABILITY, BREACH OF WARRANTIES, FAILURE OF ESSENTIAL PURPOSE, OR OTHERWISE.

This property profile is being provided as a general service to the community at large without the condition of the referral of title insurance business.

Subject: RE: Records Request - oops correction to reply not 2401- 2400 is 2401 - 2499.

Sorry previous mistype in reply not 2401 – 2400 is 2401 – 2499.

The same as I verbally informed you:

2401 – 2499 N Glassell St (odd)

No current or past records, no UST, or hazmat, no violations.

Only current business within the range:

2401 N Glassell St - Volt
2411 N Glassell St – SA Recycling
2421 N Glassell St - Volt

Hi there Barbara

Is there a way I can have the result you spoke to me over the phone in an e-mail so that I can include in my report?

Thanks

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of January 11, 2016 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Standard Loan Policy and ALTA Standard Owner Policy

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

The estate or interest in the land hereinafter described or referred to covered by this Report is:

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2016-2017, a lien not yet due or payable.
2. General and special taxes and assessments for the fiscal year .

First Installment:	\$, PAID
Penalty:	\$0.00
Second Installment:	\$, OPEN
Penalty:	\$0.00
Tax Rate Area:	
A. P. No.:	374-381-02

(Affects Parcel 2)

General and special taxes and assessments for the fiscal year 2015-2016.

First Installment:	\$133,382.69, PAID
Penalty:	\$0.00
Second Installment:	\$133,382.69, OPEN
Penalty:	\$0.00
Tax Rate Area:	08-178
A. P. No.:	374-381-01

(Affects Parcel 1)

3. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

4. An easement for road and incidental purposes in the document recorded May 13, 1918 in [Book 324 of Deeds, Page 4](#).
5. This item has been intentionally deleted.
6. An easement for right of way for waterline and fire hydrant and incidental purposes, recorded August 20, 1986 as Instrument No. [86-373397](#) of Official Records.
In Favor of: City of Orange, a municipal corporation
Affects: as described therein
7. An easement for public utilities and incidental purposes, recorded February 4, 1987 as Instrument No. [87-064454](#) of Official Records.
In Favor of: Southern California Edison Company
Affects: as described therein
8. Terms and provisions of an unrecorded lease dated September 24, 1996, by and between Orangeca Real Estate Corporation, a Delaware corporation as lessor and Cox California PCS, Inc. a Delaware corporation as lessee, as disclosed by a Memorandum of Lease recorded March 4, 1997 as Instrument No. [19970095968](#) of Official Records.

Defects, liens, encumbrances or other matters affecting the leasehold estate, whether or not shown by the public records are not shown herein.

9. A Deed of Trust to secure an original indebtedness of \$15,150,000.00 recorded September 19, 2001 as Instrument No. [20010661022](#) of Official Records.
Dated: September 18, 2001
Trustor: Volt Orangeca Real Estate Corp., a Delaware corporation
Trustee: Continental Lawyers Title Company
Beneficiary: General Electric Capital Business Asset Funding Corporation, a Delaware corporation

The above deed of trust states that it secures a line of credit. Before the close of escrow, we require evidence satisfactory to us that (a) all checks, credit cards or other means of drawing upon the line of credit have been surrendered to escrow, (b) the borrower has not drawn upon the line of credit since the last transaction reflected in the lender's payoff demand, and (c) the borrower has in writing instructed the beneficiary to terminate the line of credit using such forms and following such procedures as may be required by the beneficiary.

10. A financing statement recorded September 28, 2001 as Instrument No. [20010687592](#) of Official Records.
Debtor: Volt Orangeca Real Estate Corp.
Secured party: General Electric Capital Business Asset Funding Corporation

A continuation statement was recorded June 28, 2006 as Instrument No. [2006000433638](#) of Official Records.

11. Rights of parties in possession.

INFORMATIONAL NOTES

1. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structures known as 2401-2421 North Glassell, Orange, California.
2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

None
3. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.
4. Should this report be used to facilitate your transaction, we must be provided with the following prior to the issuance of the policy:
 - A. WITH RESPECT TO A CORPORATION:
 1. A certificate of good standing of recent date issued by the Secretary of State of the corporation's state of domicile.
 2. A certificate copy of a resolution of the Board of Directors authorizing the contemplated transaction and designating which corporate officers shall have the power to execute on behalf of the corporation.
 3. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
 4. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
 - B. WITH RESPECT TO A CALIFORNIA LIMITED PARTNERSHIP:
 1. A certified copy of the certificate of limited partnership (form LP-1) and any amendments thereto (form LP-2) to be recorded in the public records;
 2. A full copy of the partnership agreement and any amendments;
 3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
 4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
 5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
 - C. WITH RESPECT TO A FOREIGN LIMITED PARTNERSHIP:
 1. A certified copy of the application for registration, foreign limited partnership (form LP-5) and any amendments thereto (form LP-6) to be recorded in the public records;
 2. A full copy of the partnership agreement and any amendment;
 3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;

4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
 5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
- D. WITH RESPECT TO A GENERAL PARTNERSHIP:
1. A certified copy of a statement of partnership authority pursuant to Section 16303 of the California Corporation Code (form GP-I), executed by at least two partners, and a certified copy of any amendments to such statement (form GP-7), to be recorded in the public records;
 2. A full copy of the partnership agreement and any amendments;
 3. Requirements which the Company may impose following its review of the above material required herein and other information which the Company may require.
- E. WITH RESPECT TO A LIMITED LIABILITY COMPANY:
1. A copy of its operating agreement and any amendments thereto;
 2. If it is a California limited liability company, a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) to be recorded in the public records;
 3. If it is a foreign limited liability company, a certified copy of its application for registration (LLC-5) to be recorded in the public records;
 4. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, such document or instrument must be executed in accordance with one of the following, as appropriate:
 - (i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such documents must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
 - (ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
 5. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
 6. Requirements which the Company may impose following its review of the above material and other information which the Company may require.
- F. WITH RESPECT TO A TRUST:
1. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
 2. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
 3. Other requirements which the Company may impose following its review of the material require herein and other information which the Company may require.
- G. WITH RESPECT TO INDIVIDUALS:
1. A statement of information.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

The First American Corporation

First American Title Company

Privacy Policy**We Are Committed to Safeguarding Customer Information**

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
 - (a) building;
 - (b) zoning;
 - (c) land use;
 - (d) improvements on the Land;
 - (e) land division; and
 - (f) environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
 - (a) that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
 - (b) that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
 - (c) that result in no loss to You; or
 - (d) that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
 - (a) to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
 - (b) in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows: For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

<u>Your Deductible Amount</u>	<u>Our Maximum Dollar Limit of Liability</u>
Covered Risk 16: 1% of Policy Amount or \$2,500.00 (whichever is less)	\$10,000.00
Covered Risk 18: 1% of Policy Amount or \$5,000.00 (whichever is less)	\$25,000.00
Covered Risk 19: 1% of Policy Amount or \$5,000.00 (whichever is less)	\$25,000.00
Covered Risk 21: 1% of Policy Amount or \$2,500.00 (whichever is less)	\$5,000.00

ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)
EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
 - (a) and use
 - (b) improvements on the land
 - (c) and division
 - (d) environmental protection

This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.

This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.

2. The right to take the land by condemning it, unless:
 - (a) a notice of exercising the right appears in the public records on the Policy Date
 - (b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking

3. Title Risks:
 - (a) that are created, allowed, or agreed to by you
 - (b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
 - (c) that result in no loss to you
 - (d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
 - (a) to any land outside the area specifically described and referred to in Item 3 of Schedule A OR
 - (b) in streets, alleys, or waterways that touch your land

This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - i. the occupancy, use, or enjoyment of the Land;
 - ii. the character, dimensions, or location of any improvement erected on the Land;
 - iii. the subdivision of land; or
 - iv. environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - a. created, suffered, assumed, or agreed to by the Insured Claimant;
 - b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - c. resulting in no loss or damage to the Insured Claimant;
 - d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
 - e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - a. a fraudulent conveyance or fraudulent transfer, or
 - b. a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - i. the occupancy, use, or enjoyment of the Land;
 - ii. the character, dimensions, or location of any improvement erected on the Land;
 - iii. the subdivision of land; or
 - iv. environmental protection;
 or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
 b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - a. created, suffered, assumed, or agreed to by the Insured Claimant;
 - b. not Known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - c. resulting in no loss or damage to the Insured Claimant;
 - d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
 - e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - a. a fraudulent conveyance or fraudulent transfer, or
 - b. a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - i. the occupancy, use, or enjoyment of the Land;
 - ii. the character, dimensions, or location of any improvement erected on the Land;
 - iii. the subdivision of land; or
 - iv. environmental protection;
 or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
 - b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - a. created, suffered, assumed, or agreed to by the Insured Claimant;
 - b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - c. resulting in no loss or damage to the Insured Claimant;
 - d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
 - e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - a. a fraudulent conveyance or fraudulent transfer, or
 - b. a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERCLIS-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS-NFRAP site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ORANGE PRECISION CIR	812 SOUTHERN AVE	WSW 1/4 - 1/2 (0.495 mi.)	45	120

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/09/2015 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

ORANGE PRECISION CIR	812 SOUTHERN AVE	WSW 1/4 - 1/2 (0.495 mi.)	45	120

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 08/03/2015 has revealed that there

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 112

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 169

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 26

Waste code: D007

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 400

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 45600

Waste code: D008

Waste name: LEAD

Amount (Lbs): 1800

Waste code: F006

Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM;

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 500

Waste code: D007

Waste name: CHROMIUM

Amount (Lbs): 350

Waste code: F006

Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015	Source: EPA
Date Data Arrived at EDR: 04/08/2015	Telephone: N/A
Date Made Active in Reports: 06/22/2015	Last EDR Contact: 11/07/2015
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015	Source: EPA

Number of Days to Update: 64	Next Scheduled EDR Contact: 01/18/2016
	Data Release Frequency: Varies

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy
Date Data Arrived at EDR: 05/29/2015	Telephone: 843-820-7326
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 11/13/2015
Number of Days to Update: 13	Next Scheduled EDR Contact: 02/29/2016
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695
Date Made Active in Reports: 11/03/2015	Last EDR Contact: 11/24/2015
Number of Days to Update: 53	Next Scheduled EDR Contact: 03/14/2016
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695

	Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

VOLT CORPORATE PARK
2401-2421 NORTH GLASSELL STREET
ORANGE, CA 92865

TARGET PROPERTY COORDINATES

Latitude (North):	33.8284 - 33° 49' 42.24"
Longitude (West):	117.8511 - 117° 51' 3.96"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	421242.2
UTM Y (Meters):	3743261.2
Elevation:	206 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641308 ORANGE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
ORANGE, CA

FEMA Flood
Electronic Data
YES - refer to the Overview Map and Detail Map

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
ORANGE

NWI Electronic
Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles SW
Site Name:	GREAT WESTERN CARPET CUSHION CO INC
Site EPA ID Number:	CAD008352361
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	less than 140 feet.
Hydraulic Connection:	Information is not available regarding the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SORRENTO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 6.1
2	11 inches	61 inches	silty clay loam	Not reported	Not reported	Max: 14.11 Min: 1	Max: 8.4 Min: 7.9
3	61 inches	72 inches	stratified loamy fine sand to silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 6 Min: 5.1
2	11 inches	18 inches	sandy clay	Not reported	Not reported	Max: 0.42 Min: 0.01	Max: 6.5 Min: 5.6
3	18 inches	27 inches	sandy clay loam	Not reported	Not reported	Max: 0.42 Min: 0.01	Max: 8.4 Min: 5.6
4	27 inches	70 inches	sandy clay loam	Not reported	Not reported	Max: 0.42 Min: 0.01	Max: 8.4 Min: 6.1
5	70 inches	79 inches	sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1

Soil Map ID: 3

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 4

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX D: QUALIFICATIONS

Education

Master of Public Administration, University of San Francisco 2016
Bachelor of Science in Environmental Studies, American Military University 2013
Coursework including Environmental Impact Assessment, Environmental Policy, Regulation and Law,
Environmental Enforcement and Environmental and Ecosystems Management

Training

Environmental Site Assessment Training, 2015

Highlights

Over 2 years of experience in the environmental consulting industry
Over 4 years of experience in the Department of Defense
Phase I Environmental Site Assessments
Transaction Screen Assessments
Records Search Risk Assessments

Experience Summary

Ms. Rodriguez currently holds the role of a Staff Assessor and her responsibilities include thorough site assessment and technical report writing in line with the American Society of Testing and Materials (ASTM) standard and U.S. Environmental Protection Agency's All Appropriate Inquiry (AAI) as well as customized client formats. Ms. Rodriguez works closely with state and local regulatory agencies to obtain environmentally significant documents regarding property history.

Ms. Rodriguez has experience conducting Regulatory Database Reviews (DR), Records Risk Assessments Reports (RSRA), Historical Records Review (HRR), Historical Records and Database Reviews (HRDR), Environmental Transaction Screen (ETS), and Phase I Environmental Site Assessments.

Affiliations

Association for Public Policy Analysis & Management

Publications

Environmental Scientists Needed, Online Career Tips, November 10, 2015. Ms. Rodriguez explains the importance of Environmental Scientists needed in the real estate due diligence industry.

Contact

yrodriguez@partneresi.com

Education

M.A. Environmental Studies, Brown University

B.S. Biology, University of California, Los Angeles, Emphasis in Ecology, Behavior and Evolution

Registrations

EPA Accredited Asbestos Inspector

National Registry of Environmental Professionals: Registered Environmental Property Assessor (REPA)

Training

California Underground Storage Tank Inspector

Highlights

15 years in environmental service industry

14 years performing Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, radon screening, asbestos inspections, and lead-based paint inspection

13 years of experience with multi-family properties, commercial properties, retail shopping centers, municipal and private airports, oil well properties, oil refineries, gas stations, dry cleaners, aerospace manufacturers, dry cleaning plants, hotels, auto dealership and repair facilities, and various manufacturing operations throughout the US

8 years of project management experience in Environmental Assessments, Property Condition Assessments, Physical Needs Assessments, seismic evaluations, and ALTA Surveys, compliance reports

5 years of project management experience in ESAs and PCAs for properties located in Mexico, Canada, the Caribbean, Southeast Asia and South Pacific

Experience Summary

Ms. Churchill has served as an environmental scientist, project manager, senior author, or client manager for projects associated with thousands of real estate transactions. Ms. Churchill is familiar with the due diligence requirements of a varied number of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Freddie Mac, Fannie Mae DUS, and U.S. Small Business Administration's (SBA) SOP 50 10. She also has experience with fulfilling numerous customized client scopes of work. Furthermore, Ms. Churchill has working experience in performing biological and noise assessments, and in preparing and reviewing environmental documentation in support of CEPA and NEPA.

While in graduate school, Ms. Churchill's Masters Thesis research focused on evaluating the potential of Japanese Knotweed (an invasive plant species) as an effective phytoremediator of heavy metal contaminated soils along a historically polluted river in Rhode Island. Phytoremediation refers to the natural ability of certain plants called hyperaccumulators to bioaccumulate contaminants in soil. Hyperaccumulators can be grown and harvested economically, leaving the soil with a greatly reduced level of toxic contamination. This cost-effective approach to remediation has gained increasing popularity in both academic and practical circles.

Ms. Churchill previously worked for the City of El Segundo, where she regularly collaborated with other local CUPAs to ensure compliance with State and Federal regulations. Ms. Churchill's responsibilities included implementing and enforcing elements of the CUPA program including the following: hazardous waste generator program; underground storage tank program; Hazardous Material Release Response Plan

(Business Plan) Program and the California Accidental Release Response Plan (CalARP) Programs. Ms. Churchill also worked on enforcing city specific environmental programs such as Stormwater Pollution Prevention and Industrial Wastewater Discharge. As the Principal Environmental Specialist for the City, Ms. Churchill worked with large industries such as Chevron, Northrop Grumman, Boeing and International Rectifier to ensure regulatory compliance pertaining to business operations and remedial activities.

Project Experience

International Airport Portfolio. Project Manager and Senior Reviewer for Phase I ESAs and PCAs of a confidential acquisition of airport facilities throughout the South Pacific and Southeast Asia. The project involved working with many foreign agencies and coordinating dual scope site visits at all facilities within a 2-week time frame.

West Coast Gas Station Portfolio. Project Manager for limited PCAs of an acquisition of gas station/car wash facilities throughout California, Oregon and Washington.

Mexico Industrial Site Portfolio. Project Manager and Senior Reviewer for Phase I ESAs of an acquisition of industrial/warehouse facilities throughout Northern Mexico. The project involved coordinating site inspections of multiple industrial facilities with private security in high risk danger areas.

Office Tower Portfolio, Los Angeles. Project Manager and Senior Reviewer for Phase I ESAs of a \$1.34 Billion acquisition of Class A office buildings in Los Angeles.

Freddie Mac Multi-Scope Portfolio. Project Manager and Senior Reviewer for Phase I ESAs, PCAs and PMLs of an acquisition of multifamily apartment complexes throughout Southern California. The project involved coordinating three different scopes of specially qualified assessors to conduct site visits with radon and ACM sampling.

Highlights

15 years in the environmental service industry
Business Development
Client Management
Has experience preparing custom reports for clients

Experience Summary

Ms. Propster has more than 15 years of experience in the environmental service industry. Ms. Propster's experience within the environmental industry has allowed her to become familiar with several aspects of environmental consulting and the needs and requirements of multiple reporting standards, including the current Federal All Appropriate Inquiry (AAI) standard, ASTM E1527-05, ASTM E1528-06, Standard and Poor's Plus Protocol, and customized client formats.

Ms. Propster's day-to-day responsibilities include: business development, client management, cost estimating and proposal preparation, project oversight, marketing, and staff supervision. Ms. Propster's role as operations manager has been instrumental in ensuring greater office efficiency to better service the client's needs in a timely manner. She has strategically developed and implemented protocol, for both a previous environmental company and for Partner, for their nationwide offices and staff to ensure that all proposal and reports follow a timely and standardized reporting template in getting deliverables to the client both punctually and accurately.

Ms. Propster has managed numerous due diligence portfolios, including both nationwide and international projects. She has experience preparing custom limited reports to fit each of her client's special needs.

During her environmental career, Ms. Propster has gained a substantial amount of industry experience and knowledge, which she in turn, has been able to call upon to understand and assist the widely varied needs of her clients. During one such instance, Ms. Propster assisted a client who unknowingly purchased a contaminated industrial property. She guided her client through the processes of subsurface characterization, and thus establishing that the site was polluted by others. By leveraging her expansive network, Ms. Propster assisted the client in the selection of an attorney, and under the attorney's direction, collected data supporting a cost recovery suite against the responsible parties.

Ms. Propster has experience managing several aspects of due diligence, specializing in environmental due diligence for nationwide and local clients including the following types:

- Student Housing Developers
- Commercial Developers
- Mortgage Brokers
- Real Estate Brokers
- Individual Property Owners and Buyers
- Financial Institutions including:
 - CMBS Lenders
 - SBA Lenders
 - Fannie / Freddie Mae Lenders
 - Private Equity Funds

- Insurance Lenders

Ms. Propster's experience includes guiding lenders and real estate investors through many product types. She has assisted on over 100,000 real estate transactions. These transactions have allowed Ms. Propster to oversee numerous Phase I Environmental Site Assessments and have included her guidance to many of her clients through the Phase II Subsurface Investigation and Phase III Site Characterization process. In addition to her knowledge of these processes, Ms. Propster has vast experience in assisting her clients with additional due diligence products such as; ALTA Survey Coordination, Property Condition Assessments (PCAs), Probable Maximum Loss (PML) Assessments, Property Condition Evaluations, and Environmental Transaction Screens (ETSs). Ms. Propster has taken to task the many aspects of building sciences in addition to her PHI, PHII, and PHIII abilities. She is known as the go-to consultant when it comes to PMLs and PCAs. Ms. Propster has helped to see to it that Partner reports are concise by including necessary calculations and tables for both PMLs and PCAs.

Large and small lenders across the country have come to rely on Ms. Propster for their environmental and engineering due diligence.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 12 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 3 CA UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 38 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-09-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Met with Jay Dille, general manager of the site. Walked the facility, perimeter, and inspected the hazardous waste storage area. Observed the municipal trash. No signs of illegal disposal were observed. Discussed hazardous waste management with Mr. Dille. Manifests and emergency response plan was reviewed. A copy of this report will be sent to jay@dilco.com.

Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-22-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Brieana Phillips, office manager, and Jay Dille, general manager, were present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The inspection included a walk behind the shop and its enclosed dumpster area. I did not observe hazardous waste in the shop's trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. The storage container was stored closed and labeled. We reviewed the required information to be marked on containers storing hazardous waste. Labels were provided for use. The signed off manifests and receipts for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. The facility had a business emergency plan in the front office. report PDF to: decals@dilco.com jay@dilco.com jay@dilco.com

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous waste inspection. Met with Nora Valadez of AT&T. Ms. Valadez provided consent to enter and conduct this inspection. Hazardous waste observed included e-waste and universal waste. Containers were labeled and stored properly. Hazardous waste manifests were not available for review (See violation I474 below). Mike Williams of AT&T is responsible for storing manifests and he was not available during this inspection. Please send the last few hazardous waste manifests to mescobedo@ochca.com in order to verify proper disposal. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID: 132752
Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-22-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/22/2019. Hazardous waste containers throughout the facility were properly labeled as hazardous waste but labels did not have the chemical properties marked. The labels were properly marked during the facility walk through, violation corrected on site.
Violation Division: Orange County Environmental Health

Violation Source: CERS

Site ID: 132752
Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-22-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 03/01/2019. One cubic yard box of solid hazardous waste plating debris in the 90 day storage area was observed not covered. Please note containers containing solid hazardous waste must be covered when waste is not being added into the container. Obtain a cover for this container within 30 days.

Site ID: 132752
Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-26-2017
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 05/26/2017. In various areas within secondary containment, hazardous waste accumulation was observed. Although Mr. Hernandez has indicated that secondary containment is cleaned on a daily basis, this is not happening due to the observation of copper crystallization within secondary containment. As part of your daily inspection checklist, this "housekeeping" must be conducted. A reinspection will be conducted to ensure that secondary containment is kept clean and without hazardous waste build-up.

Eval Notes: On site to conduct a Hazardous Waste Recycler inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility manufactures printed circuit boards. Throughout the facility there are 2 buildings where boards are drilled into, which generates fine hazardous copper routing dust. For both buildings the dust is captured through baghouse vacuum units and the dust is managed as Excluded Recyclable Material (ERM). Containers of the routing dust were observed stored closed, but not properly labeled. The ERM labels were missing the hazardous property of the dust (toxicity). The labeling was corrected during the inspection, violation corrected on site. Bills of lading for the removal of the ERM off site for recycling were available for review. The facility's contingency plan was available for review. Employee training records were available for review. This inspection report was sent to Ray Hernandez at

Eval Notes: Reviewed 2017 Financial Assurance documents submitted to CERS on 2/26/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, \$5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at \$5,869.26. Therefore, your minimum 2017 amount must be \$5,869.26 x 1.013 = \$5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

Name: SUMMIT INTERCONNECT INC. ORANGE
Address: 230 W BRISTOL LN
City,State,Zip: ORANGE, CA 92865
Site ID: 132752
CERS ID: 10657684
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 132752
Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-22-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 01/22/2019. Hazardous waste containers throughout the facility were properly labeled as hazardous waste but labels did not have the chemical properties marked. The labels were properly marked during the facility walk through, violation corrected on site.

Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 132752
Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-22-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 03/01/2019. One cubic yard box of solid hazardous waste plating debris in the 90 day storage area was observed not covered. Please note containers containing solid hazardous waste must be covered when waste is not being added into the container. Obtain a cover for this container within 30 days.

Violation Date: 02-25-2014
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 01/27/2015. Dried spilled blue residues were observed on the asphalt adjacent to the waste cupric chloride solution storage tanks. Prevention of the spillage was discussed with the manager. The hazardous waste was removed and added the the facility's TP unit for treatment. Violation was corrected on site.

Site Name: SUMMIT INTERCONNECT INC. ORANGE
Violation Date: 01-26-2017
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 05/26/2017. In various areas within secondary containment, hazardous waste accumulation was observed. Although Mr. Hernandez has indicated that secondary containment is cleaned on a daily basis, this is not happening due to the observation of copper crystallization within secondary containment. As part of your daily inspection checklist, this "housekeeping" must be conducted. A reinspection will be conducted to ensure that secondary containment is kept clean and without hazardous waste build-up.

system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 01/27/2015. The facility's PBR tank systems, except for possibly Regen #1, #2, #3 as discussed below, were not current in the required PE certification. PE assessment of the hazardous waste treatment tank systems that references the standards listed in CCR title 22, 66265.192 is required. Obtain the required report and submit a copy to this Agency for our review.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-15-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection, accompanied
by Dean Freed, Supervising Hazardous Materials Specialist. Met with
Ray Hernandez, EHS Manager. The facility is a Large Quantity Generator
of RCRA Hazardous Waste. The facility is comprised of four buildings,
Building 1 is administration and 2-4 are for production of printed
circuit boards where Hazardous Waste is generated. The perimeter of
the facility and each building was inspected. Building 2 G Developer,
etch, photoresist strip and oxide processing lines were observed.
Process bath solutions are plumbed to below grade holding tanks, which
are plumbed via below grade piping to the treatment system outside of
building 3. Waste cupric chloride from the etch bath is plumbed to an
enclosed hazardous waste tank behind the building, and gets hauled off
as hazardous waste. Waste copper routing dust from board drilling is
captured in a baghouse unit outside the building. The dust is managed

Eval Date: 01-22-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a Hazardous Waste Recycler inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility manufactures printed circuit boards. Throughout the facility there are 2 buildings where boards are drilled into, which generates fine hazardous copper routing dust. For both buildings the dust is captured through baghouse vacuum units and the dust is managed as Excluded Recyclable Material (ERM). Containers of the routing dust were observed stored closed, but not properly labeled. The ERM labels were missing the hazardous property of the dust (toxicity). The labeling was corrected during the inspection, violation corrected on site. Bills of lading for the removal of the ERM off site for recycling were available for review. The facility's contingency plan was available for review. Employee training records were available for review. This inspection report was sent to Ray Hernandez at ray.hernandez@summit-pcb.com.

Eval Notes: On site to conduct a routine Tiered Permitting Conditionally Exempt Limited (CEL) inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility has reported one CEL unit to CERS, the following was observed: FTU 5 G Oily water is routinely generated from multiple air compressors. The waste is placed in an oil water separator. Oil is skimmed from the top and disposed of as hazardous waste, manifests were available for review. The residual contaminated water goes through carbon filtration columns which are then plumbed to FTU 1 for pH adjustment. The following documentation was available for review: - Daily and weekly inspection logs and treatment logs - Wastewater discharge permit 1-600060 - Waste Analysis Plan and records This inspection report was sent to Ray Hernandez at ray.hernandez@summit-pcb.com.

Eval Notes: On site to conduct a routine Hazardous Waste inspection, accompanied by Dean Freed, Supervising Hazardous Materials Specialist. The facility is a Large Quantity Generator of RCRA Hazardous Waste. The facility is comprised of four buildings, Building 1 is administration and 2-4 are for production of printed circuit boards where Hazardous Waste is generated. The perimeter of the facility and each building was inspected. Building 2 G Developer, etch, photoresist strip and oxide processing lines were observed. Process bath solutions are plumbed to below grade holding tanks, which are plumbed via below grade piping to the treatment system outside of building 3. Waste cupric chloride from the etch bath is plumbed to an enclosed hazardous waste tank behind the building, and gets hauled off as hazardous waste. Waste copper routing dust from board drilling is captured in a baghouse unit outside the building. The dust is managed as Excluded Recyclable Material (ERM). [Truncated]

Eval Notes: Reviewed 2017 Financial Assurance documents submitted to CERS on 2/26/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, \$5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at \$5,869.26. Therefore, your minimum 2017 amount must be $\$5,869.26 \times 1.013 = \$5,945.56$. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	04-10-2017
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Please be advised that this Agency has reviewed the Tiered Permitting Financial Assurance Self Certification submitted to CERS on 3/29/17. Closure Cost Estimate (CCE) was not properly calculated since the inflation factor was applied to initial closure cost, \$5,816.91, submitted in 2016. The 2017 CCE should be, at a minimum, your 2016 CCE multiplied by an inflation factor of 1.013. Your 2016 CCE was submitted and approved at \$5,869.26. Therefore, your minimum 2017 amount must be \$5,869.26 x 1.013 = \$5,945.56. Corrected Certification Of Financial Assurance Form and breakdown of costs must be submitted within 30 days of this inspection report.

The annual notification documents were for the operation of 5 on site hazardous waste treatment units. Notification was for 4 permit by rule (PBR) units and 1 conditionally exempt - limited (CEL) unit. FTU-001 was identified as wastewater treatment unit. Waste treated was identified as rinse water from processing operations containing metals. Treatment process was identified as the wastewater treatment unit operated to adjust pH and remove metals. Unit consists of 17 tanks and 4 containers / treatment areas. FTU-002 was identified as batch treatment system. Waste treated was identified as wastewater from processing operations, containing metals. Treatment process was identified as batch treatment system operated to adjust pH and remove metals. Unit consists of 8 tanks and 1 container / treatment area. FTU-003 was identified as filter rinsing. Waste treated was identified as filters are rinsed [Truncated]

Eval Notes: On Site for a re-inspection of the January 2017 hazardous waste inspection. Met with EHS Manager Ray Hernandez of Summit Interconnect. Consent was provided to enter and conduct inspection activities. A walk-through of the facility was conducted to verify that open violations I333 (un kept secondary containment) and I562 (Improper Satellite accumulation) were corrected. On this date, violations I333 and I562 were abated.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

WDS:

Name: SCOPE PACKAGING
Address: 240 W FLETCHER AVE
City: ORANGE
Facility ID: Santa Ana River 30I006339
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 8
Facility Telephone: 7149984411
Facility Contact: WILLIAM FLINN
Agency Name: FLINN WILLIAM & JUDY
Agency Address: 240 W. FLETCHER AVE

Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 105736
Site Name: APCT ANAHEIM
Violation Date: 05-11-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/26/2016. An unmarked container of hazardous waste was positioned beneath leakage at the ammonium stripper line. Hazardous residue crystals accumulated in the area surrounding the container. A second unmarked container storing hazardous debris waste was also in the same area. Two unmarked containers of hazardous copper dust containing mud waste were located an unattended developer room. Containers storing hazardous waste must be marked with the required information. Correct immediately.

Violation Date: 07-30-2018
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: Returned to compliance on 11/08/2018. OBSERVATION: The facility is currently managing their router dust waste as an excluded recyclable material. Per Mr. Martinez, the router dust has not been analyzed to determine if the waste is hazardous. The router dust waste is being sent to ADS Gold for metals recovery. Any person who generates a waste shall determine if the waste is a hazardous waste. If the waste is hazardous, it should be managed according to Title 22 hazardous waste regulations. CORRECTIVE ACTION: Immediately stop shipping the router dust waste. Obtain a representative sample of the router dust and submit it to an approved lab for metals analysis (CAM 17 Metals). Submit a copy of the lab results to this agency within 30 days.

Violation Description: Haz Waste Generator Program - Training - General
Violation Notes: Returned to compliance on 08/12/2014. Training records show 9 employees are current in their annual hazardous waste handling and spill response training. The facility has 47 employees. All facility personnel must receive annual training that will ensure that they are able to respond effectively to hazardous waste related emergencies. The type and degree of training required will depend on each employee's responsibilities associated with his / her job function / description. Also, at a minimum, all employees, regardless of their position, must be familiar with the facility's contingency plan and evacuation procedures so that they can respond effectively in an emergency. Maintain training records available for inspection. Training records include an outline of the training completed along with training roster(s).

Violation Description: Chapter 15, Section(s) 66265.192(h)
Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.

Violation Notes: Returned to compliance on 03/24/2020. A PE Certified Hazardous Waste Tank Assessment dated January 2020 was available for review, however the assessment did not include certification for the waste ammonia etch holding tank or seismic calculations for any of the tanks. Within 60 days, please have a Professional Engineer complete a Hazardous Waste Tank Assessment on the tank and provide seismic calculations for all waste tanks.

Violation Date: 07-30-2018
Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)

Violation Description: Failure to maintain the required documents, including waste analysis plan, contingency plan, training documents, Phase I Environmental Assessment, written inspections schedules, etc. at the facility where the FTU is operating and upon request make these documents available to the authorized agency, DTSC, the CUPA, or EPA, or local government agency.

Violation Notes: Returned to compliance on 10/12/2018. OBSERVATION: The following documents were incorrect and/or incomplete: -The waste analysis plan did not contain the proper analysis at the point of generation. Per Mr. Martinez, sampling was taken at each treatment tank, before treatment occurred. - The closure plan is missing the maximum inventory of waste in storage and in treatment at any time during the operation of the FTU(s) at the facility. CORRECTIVE ACTION: Please complete your waste analysis at the point of generation. In addition, please include the maximum inventory of waste in storage and in treatment in your Closure Plan. Please provide copies of the waste analysis and closure plan to this agency within 60 days.

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 07/30/2018. OBSERVATION: The following containers were observed open when not adding/removing waste: -Two 55-gallon poly drums containing waste waters to be treated -One roll-off bin containing waste debris/absorbent -Two cubic yard boxes containing Excluded Recyclable Material (ERM) CORRECTIVE ACTION: Immediately close these containers when not adding/removing waste. This was corrected on site. No further corrective action necessary.

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby

Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Division: Returned to compliance on 08/12/2014. The facility's tank and/or container containment system was last certified by a professional engineer (PE) on 5-4-09. PE certification is required once every 5 years. The facility was in process of obtaining the certification. A 4-26-14 quote was provided for review. A copy of the current PE certification must be provided to this Agency for our review.

Violation Description: 19 CCR 4.5 2765.2(a) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2765.2(a)

Violation Notes: Failure to develop, implement, and maintain at the stationary source an emergency response program that includes the following elements: 1. Procedures for informing and interfacing with the public and local emergency response agencies about accidental releases, emergency planning, and emergency response. 2. Documentation of proper first-aid and emergency medical treatment necessary to treat accidental human exposures. 3. Procedures and measures for emergency response after an accidental release of a regulated substance. 4. Procedures for the use of emergency response equipment and for its inspection, testing, and maintenance are developed by the stationary source. 5. Training for all employees in relevant procedures and relevant aspects of the Incident Command System. 6. Procedures to review and update the emergency response plan to reflect changes at the stationary source are developed and employees are informed of these changes.

Violation Division: Returned to compliance on 11/14/2016. It was determined this date that the off-site consequence (63 feet) could have an impact on a neighboring business and that Cirtech will now be regulated as a program level 2. Please prepare a Program Level 2 RMP within 60 days.

Eval Notes:	On-site for a routine CalARP inspection. Met with Juan Martinez this date. Also on-site was Marco Escobedo of OCHCA. This is a Program Level 1 CalARP facility for Ammonium Hydroxide. There are two 2,700-gallon tanks in the back of the building that are hard plumbed to the ammonia etchant machine. There are also two holding tanks for the new and used ammonia by the etcher. This facility manufacturers printed circuit boards. Aqueous ammonia is used to etch the boards. Discussed the storage of ammonium hydroxide in 55-poly drums. There are four 55-gallons drums in containment (352 pounds of ammonium). This is below the threshold planning quantity (500 pounds) and is not a regulated process. According to Mr. Martinez, there have been no process changes in regards to the regulated process or substance nor have there been any releases of a regulated substance from a regulated process. The RMP was re-done in 12/2011. The certification is signed 12/20/11. The [Truncated]

Eval Notes:	On site for a routine hazardous waste treatment tiered permitting permit by rule (PBR) inspection. The PBR units were FTU #1 (batch treatment of wastewater from process system), FTU #2 (continuous flow from process tanks), FTU #3 (batch treatment of resist skins). Juan Martinez, environmental /safety manager, was present for the inspection. The inspection included a tour of the treatment unit and each individual tank. The exterior of each unit was marked with the required information. The secondary containment beneath each unit was dry. We reviewed the tank, container, and treatment area identified for each unit. We discussed the on site tiered permitting of container rinsing (11a of the DTSC's flowchart). Documentation maintained on site and available for review included: Phase 1 Environmental Assessment, dated 2-15-97, Wastewater discharge permit #2-1-133, Manifests documenting treatmentG s residual waste disposal, Written log of daily hazardous waste [Truncated]

Eval Notes: On site for a routine RCRA LQG hazardous waste generator inspection. Juan Martinez, EH&S manager, was present for the inspection and provided consent to inspect and take regulatory related photos. The inspection included a walk of the facility's outsider perimeter. Hazardous waste was not observed in the trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. Hazardous waste was stored in a designated hazardous waste storage area along with satellite accumulation storage locations throughout the building. The storage containers were closed and labeled with the required information, except as cited above. We discussed the handling of e-waste. We discussed the storage and recordkeeping requirements of universal waste, which includes e-waste. We discussed marking the designated area / pallet where small containers of hazardous waste (expired chemicals determined to be waste) are stored with the required hazardous waste [Truncated]

Eval Notes:	INSPECTOR COMMENTS: On-site for a routine CalARP inspection. Met with Juan Martinez this date. This is a Program Level 2 CalARP facility for Ammonium Hydroxide. There are two 2,700-gallon tanks in the back of the building that are hard plumbed to the ammonia etchant machine. There are also two holding tanks for the new and used ammonia by the etcher. This facility manufacturers printed circuit boards. Aqueous ammonia is used to etch the boards. It was determined this date that the off-site consequence of 63 feet would impact the building to the south over the fence line. This building had previously been unoccupied. Now the back lot which is within 63 feet of the tanks is being used for storage and for parking cars. Discussed the possibility of using drummed ammonium hydroxide, moving the tanks, or going to smaller tanks. The following must be done in 60 days: 1) Prepare and sign a Program Level 2 Certification 2) Add the Program Level 2 Prevention [Truncated]

Eval Notes: On June 29, 2001 Regional Water Board staff was conducting follow up inspections at the above mentioned facility. Contact was made with Juan Martinez the Waste Water Supervisor. The facility had implemented several new BMPs since the last site visit. Overall the facility was clean. Juan showed us the new BMPs and also told us about new BMPs that will be implemented in the near future. The following observations were made: Improve BMPs around the oil compressors; General housekeeping; Take HW stickers off drums used for trash; Implement BMPs for scrap metal containing copper contamination. Juan stated that he would address these concerns that day. A e-mail was received on July 7,2001 with a plan of action.

Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Regional Board Staff conducted a compliance inspection of the above facility on August 21, 2017. The SWPPP was reviewed and the pollution prevention team needs to be trained on sampling and monitoring requirements. Mr. Martinez purchased a calibrated pH meter and needs to purchase the 3 pH buffers used for calibration. Staff discussed the incorrect data entry errors for the Ad Hoc Report (Event ID 921858). The report will be remanded so Mr. Martinez can correct the issues and resubmit the report. A site walk was then conducted. Significant staining was observed at sampling location SW-2. Two cooling towers were observed uncovered outside and leaking a liquid. Mr. Martinez explained the equipment is only leaking water but he will place a containment around the leaking equipment. An uncovered boneyard of used industrial equipment was also observed at the south end of the facility. Mr. Martinez noted it will either be removed or covered with a tarp. Lastly, there is no sampling location at the southwest end of the facility by the boneyard. Mr. Martinez explained he was told to stop sampling this location over 10 years ago. This area is involved in industrial activities. The facility must add a third sampling location at this portion of the facility, prior to storm water commingling with the neighboring property.

Eval Notes:	From: Krall, Joyce Sent: Thursday, November 07, 2013 8:19 AM To: 'Juan Martinez' Subject: HAZARDOUS WASTE INSPECTION Hello Juan, Thank you for your taking the time to work with me on CirtechG s re-inspection. Attached is the report acknowledging CirtechG s compliance. Also, I conferred with my supervisor regarding your question on the required hazardous waste training for your facilityG s contracted personnel. Contractors working at LQGs fall under the 260.10 definition of G facility personnelG and consequently must receive RCRA training. As such, contractors should be trained in certain areas (e.g., evacuation routes, emergency communications/ alarms, proper hazardous waste handling practices, etc.) Regards, Joyce Krall, REHS

Eval Type:	Other, not routine, done by local agency
Eval Notes:	The facility was cited violation I300 on 7/30/18 for failure to conduct a waste determination on router dust generated from drilling printed circuit boards. The facility had been managing this material as ERM, having it picked up for recycling by ADS Gold in Anaheim, along with copper anodes and other scrap metals. Both the facility and ADS Gold were able to provide receipts for proof of pickup; ADS Gold sends the router dust to Always Recycling Inc in Hayward. Per H&SC 25143.2 (d)(A)(i-ii) this Agency has validated this management of router dust as ERM. Violation I300 is corrected. The facility has no outstanding violations remaining.

Site Name: APCT ANAHEIM
Violation Date: 05-11-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/26/2016. An unmarked container of hazardous waste was positioned beneath leakage at the ammonium stripper line. Hazardous residue crystals accumulated in the area surrounding the container. A second unmarked container storing hazardous debris waste was also in the same area. Two unmarked containers of hazardous copper dust containing mud waste were located an unattended developer room. Containers storing hazardous waste must be marked with the required information. Correct immediately.

Violation Date: 07-30-2018
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: Returned to compliance on 11/08/2018. OBSERVATION: The facility is currently managing their router dust waste as an excluded recyclable material. Per Mr. Martinez, the router dust has not been analyzed to determine if the waste is hazardous. The router dust waste is being sent to ADS Gold for metals recovery. Any person who generates a waste shall determine if the waste is a hazardous waste. If the waste is hazardous, it should be managed according to Title 22 hazardous waste regulations. CORRECTIVE ACTION: Immediately stop shipping the router dust waste. Obtain a representative sample of the router dust and submit it to an approved lab for metals analysis (CAM 17 Metals). Submit a copy of the lab results to this agency within 30 days.

Violation Description: Chapter 12, Section(s) 66262.34(f)
Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 07/30/2018. OBSERVATION: One hazardous waste tank was not properly labeled with the required information. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label this tank with all required elements. This was corrected on site. No further corrective action necessary.

Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 105736
Site Name: APCT ANAHEIM
Violation Date: 05-07-2014
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 08/12/2014. Hazardous waste debris accumulated on floor in the area of the permanganate tank was observed in the plating room. I was informed that the floor grates were removed and cleaning accomplished once every several months. Adjust your practices so that hazardous waste is not stored on the floor. The secondary containment in the plating room is not a hazardous waste storage container. The accumulated hazardous waste debris must be removed from the floor and stored in a properly labeled and closed container, pending removal by a registered hauler.

Violation Division: Orange County Environmental Health

Violation Date: 07-30-2018
Citation: 22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)
Violation Description: Failure to maintain the required documents, including waste analysis plan, contingency plan, training documents, Phase I Environmental Assessment, written inspections schedules, etc. at the facility where the FTU is operating and upon request make these documents available to the authorized agency, DTSC, the CUPA, or EPA, or local government agency.
Violation Notes: Returned to compliance on 10/12/2018. OBSERVATION: The following documents were incorrect and/or incomplete: -The waste analysis plan did not contain the proper analysis at the point of generation. Per Mr. Martinez, sampling was taken at each treatment tank, before treatment occurred. - The closure plan is missing the maximum inventory of waste in storage and in treatment at any time during the operation of the FTU(s) at the facility. CORRECTIVE ACTION: Please complete your waste analysis at the point of generation. In addition, please include the maximum inventory of waste in storage and in treatment in your Closure Plan. Please provide copies of the waste analysis and closure plan to this agency within 60 days.

Violation Date: 07-30-2018
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities,- evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes: Returned to compliance on 10/12/2018. OBSERVATION: The contingency plan was missing the office/home phone numbers and addresses of the emergency coordinator and alternate. CORRECTIVE ACTION: Please update the information on your contingency plan to include these elements. Provide a copy of the amendment to this agency within 30 days.

Violation Date: 07-30-2018
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 07/30/2018. OBSERVATION: The following containers were observed open when not adding/removing waste: -Two 55-gallon poly drums containing waste waters to be treated -One roll-off bin containing waste debris/absorbent -Two cubic yard boxes containing Excluded Recyclable Material (ERM) CORRECTIVE ACTION: Immediately close these containers when not adding/removing waste. This was corrected on site. No further corrective action necessary.

Eval Notes: On site to conduct an unannounced routine inspection. Juan Martinez, env. manager, was not at work this date. Brad0000 , president, requested that I conduct the inspection another day. He was currently involved in an audit and could not participate. I agreed to return but first requested to walk the facility's perimeter and inspect their dumpsters. He agreed and accompanied me on the walk. I did not observe hazardous waste as run off on the ground or in the dumpsters.

Eval Type: Other, not routine, done by local agency
Eval Notes: This Agency received the facility's financial assurance documentation. The annual notification documents were for the operation of three on site hazardous waste treatment units. Notification was for three permit by rule (PBR) units. FTU#1 was identified as batch treatment. Waste treated was identified as aqueous waste with heavy metals. Treatment process was identified as pH adjust, precipitation, flocculation and sludge de water with filter press. Unit consists of 6 tanks and 2 containers/treatment areas. FTU#2 was identified as flow thru system. Waste treated was identified as aqueous waste with heavy metals. Treatment process was identified as pH adjust, precipitation, flocculation and sludge dewater with filter press. Unit consists of 6 tanks and 1 container/treatment area. FTU#3 was identified as resist stripper. Waste treated was identified as photo resist strip. Treatment process was identified as pH adjust, removal of photo resist from waste stream, [Truncated]

Eval Notes: On site for a routine hazardous waste RCRA large quantity generator (LQG) inspection. Juan Martinez, environmental / safety manager, was present for the inspection and provided consent to inspect and take regulatory related photos if needed. The facility's operations and the waste generated were discussed. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the facility's hazardous waste was inspected. Hazardous waste was stored in a designated hazardous waste storage area, along with satellite accumulation storage locations. We discussed the allowable accumulation and storage times for use of the satellite rule. Satellite waste accumulation may not exceed one year from the initial date of accumulation. If the satellite reaches its maximum storage quantity during its one year accumulation period, it then must be removed [Truncated]

Eval Notes:	INSPECTOR COMMENTS: On-site for a routine CalARP inspection. Met with Juan Martinez this date. This is a Program Level 2 CalARP facility for Ammonium Hydroxide. There are two 2,700-gallon tanks in the back of the building that are hard plumbed to the ammonia etchant machine. There are also two holding tanks for the new and used ammonia by the etcher. This facility manufacturers printed circuit boards. Aqueous ammonia is used to etch the boards. It was determined this date that the off-site consequence of 63 feet would impact the building to the south over the fence line. This building had previously been unoccupied. Now the back lot which is within 63 feet of the tanks is being used for storage and for parking cars. Discussed the possibility of using drummed ammonium hydroxide, moving the tanks, or going to smaller tanks. The following must be done in 60 days: 1) Prepare and sign a Program Level 2 Certification 2) Add the Program Level 2 Prevention [Truncated]

Eval Notes:	On June 29, 2001 Regional Water Board staff was conducting follow up inspections at the above mentioned facility. Contact was made with Juan Martinez the Waste Water Supervisor. The facility had implemented several new BMPs since the last site visit. Overall the facility was clean. Juan showed us the new BMPs and also told us about new BMPs that will be implemented in the near future. The following observations were made: Improve BMPs around the oil compressors; General housekeeping; Take HW stickers off drums used for trash; Implement BMPs for scrap metal containing copper contamination. Juan stated that he would address these concerns that day. A e-mail was received on July 7,2001 with a plan of action.

Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a compliance inspection of the above facility on August 21, 2017. The SWPPP was reviewed and the pollution prevention team needs to be trained on sampling and monitoring requirements. Mr. Martinez purchased a calibrated pH meter and needs to purchase the 3 pH buffers used for calibration. Staff discussed the incorrect data entry errors for the Ad Hoc Report (Event ID 921858). The report will be remanded so Mr. Martinez can correct the issues and resubmit the report. A site walk was then conducted. Significant staining was observed at sampling location SW-2. Two cooling towers were observed uncovered outside and leaking a liquid. Mr. Martinez explained the equipment is only leaking water but he will place a containment around the leaking equipment. An uncovered boneyard of used industrial equipment was also observed at the south end of the facility. Mr. Martinez noted it will either be removed or covered with a tarp. Lastly, there is no sampling location at the southwest end of the facility by the boneyard. Mr. Martinez explained he was told to stop sampling this location over 10 years ago. This area is involved in industrial activities. The facility must add a third sampling location at this portion of the facility, prior to storm water commingling with the neighboring property.

Eval Date: 10-22-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: The facility has updated training records to reflect job titles and descriptions, date and topic of training. Copy of one employee record is attached. Violation I126 is corrected. Received and reviewed analytical results for waste determination on router dust. The dust is hazardous for copper. Health and safety code regulations on excluded recyclable material exclusion requirements of non-RCRA hazardous wastes is being reviewed. Also received receipts showing router dust is picked up by ADS Gold for recycling (attached). This waste stream is being evaluated and violation I300 remains outstanding.

Eval Notes:	From: Krall, Joyce Sent: Thursday, November 07, 2013 8:19 AM To: 'Juan Martinez' Subject: HAZARDOUS WASTE INSPECTION Hello Juan, Thank you for your taking the time to work with me on CirtechG s re-inspection. Attached is the report acknowledging CirtechG s compliance. Also, I conferred with my supervisor regarding your question on the required hazardous waste training for your facilityG s contracted personnel. Contractors working at LQGs fall under the 260.10 definition of G facility personnelG and consequently must receive RCRA training. As

Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 11-08-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: The facility was cited violation I300 on 7/30/18 for failure to conduct a waste determination on router dust generated from drilling printed circuit boards. The facility had been managing this material as ERM, having it picked up for recycling by ADS Gold in Anaheim, along with copper anodes and other scrap metals. Both the facility and ADS Gold were able to provide receipts for proof of pickup; ADS Gold sends the router dust to Always Recycling Inc in Hayward. Per H&SC 25143.2 (d)(A)(i-ii) this Agency has validated this management of router dust as ERM. Violation I300 is corrected. The facility has no outstanding violations remaining.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Hazardous waste manifests were available for review. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-11-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Kurtis Breeding, President. The facility is a Very Small Quantity Generator of waste oil from air compressor maintenance. Steel grit media blasting and powder coating operations were discussed and observed. Steel media blast is recycled as scrap metal when spent. Powder coat is applied in a closed loop system. Excess powder coat is captured in baghouse units and used back in process. Walked throughout the facility and observed the facility's Hazardous Waste storage area. One hazardous waste container was observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site Name: Orange Olive Gasoline

Violation Date: 01-13-2020

Citation: 23 CCR 16 2712(b)(1)(F) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(F)

Violation Description: "Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months."

Violation Notes: Returned to compliance on 01/20/2020. SB989 due in April 2019.

Eval Notes:	On site to conduct a routine Hazardous Waste inspection. Met with Bobby Mirhashemi, Manager. The facility is a Very Small Quantity Generator of fuel contaminated waste absorbent. Walked throughout the facility and observed the facility's Hazardous Waste storage area. One container of waste absorbent was observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is currently not active. Please complete DTSC Form 1358 (attached with report) for a Permanent State ID Application to reactivate your number, CAL000351167. Please complete the application and send it to DTSC as provided in the application instructions. Emergency plan is posted in the office, spill response notification was discussed. No hazardous waste violations were observed this date. This [Truncated]

Eval Notes:	On site for a routine hazardous waste inspection. Bobby Mirhashemi, front counter, was present for the inspection and provided consent to inspect. The inspection included a walk behind the building. I did not observe hazardous waste in the facility's trash or as run off on the ground. The facility had not yet had a removal of hazardous waste for proper disposal. The storage of the facility's hazardous waste was inspected. The drum of used absorbents with fuel was almost full. Bobby Mirhashemi advised me that their first removal of hazardous waste was forthcoming. We reviewed maintaining records of hazardous waste removal for 3 years from the date of removal and have available for inspection. Written emergency contact numbers and spill response directions were provided for the employees.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 10-19-2010
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Major improvements in housekeeping and dust management BMPs needed in production areas surrounding the dust collection system. Dust spills caused by negligence and missing system components observed. Improvements in housekeeping are needed in area surrounding the trash compactor and the storage yard. Maintenance, cleaning, or other BMP needed to keep oil on an exposed compressor from being exposed to storm water.

Eval Division: Orange City Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-19-2010
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Facility manufactures/packages drywall mud, sheetrock tape, patch compounds, and similar products. Rainfall occurred throughout inspection. Contact asserts that 3 staff are assigned to sweep the site daily. Storm drain inlet for the production area discharges to sewer; when a certain volume is exceeded, remainder is discharged to street. Main yard (shipping) is neat and orderly. Runoff from main yard is black apparently from tire wear. Storage yard (NW portion) is in need of better housekeeping; area is littered with paper bits and fibers from tape manufacturing. Production area is mostly covered against stormwater but tracking and splashing subject spilled powder to runoff. Found no effective effort to protect against spills at dust collectors: collection barrels were found overflowing, soft downtubes were missing, and areas were heavily coated in dust. Trash and sludge found on ground around trash compactor. Packing peanuts and foam bits found floating in runoff from an outdoor enclosed room; a roof drain from the adjacent main building discharges onto the floor of this room and picks up trash and carries it outside. Found three air compressor blow-down lines plumbed to drain to ground outside; one drain line was actively discharging. A compressor was found outside without a cover and a heavy coating of oil around the motor. On roof, found several dust collection components with small to large piles of dust beneath them; some of the dust had been carried to roof edges by rainwater, leaving a thick mucky deposit. Various parts found stored uncovered outside on racks along a building; some parts were rusting in the rain and others consisted of motors and electrical parts.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Case Development Inspection
Eval Date: 12-07-2010
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Weather was sunny and warm. Rain had occurred over the last weekend. Observed that all real and threatened non-storm water discharges from air compressors had been eliminated. The single outdoor and uncovered air compressor had had the oil cleaned off its exterior. The outside storage racks had been covered with tarp; operations staff expressed dissatisfaction with this solution and will pursue an alternative that

may consist of constructing a fixed overhand and relocated racks under that. Housekeeping on roof is substantially improved; no significant deposits of powder observed. Contact reported that he was now inspecting roof routinely; recent inspections had shown equipment leaking powder onto the roof. Contact reported that these leaks have since been fixed. Dust collection drums have been replaced with a larger hopper and a flexible fabric chute installed to convey dust into the hopper. Flexible chute was on ground nearby and Contact re-installed it immediately. Still observed powder coating most everything in the vicinity. Although hopper area is covered by a high roof, the recent rain has left a distinct line showing where powder had deposited on ground beyond edge of roofline and rainfall had washed it away. Contact will consider other ways to minimize airborne powder but housekeeping will be a continuous issue in this area. Trash compactor area and northwest storage yard have also been cleaned and so has the outbuilding where styrofoam pellets are handled. SWPPP has not yet been updated.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-19-2010
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Facility manufactures/packages drywall mud, sheetrock tape, patch compounds, and similar products. Rainfall occurred throughout inspection. Contact asserts that 3 staff are assigned to sweep the site daily. Storm drain inlet for the production area discharges to sewer; when a certain volume is exceeded, remainder is discharged to street. Main yard (shipping) is neat and orderly. Runoff from main yard is black apparently from tire wear. Storage yard (NW portion) is in need of better housekeeping; area is littered with paper bits and fibers from tape manufacturing. Production area is mostly covered against stormwater but tracking and splashing subject spilled powder to runoff. Found no effective effort to protect against spills at dust collectors: collection barrels were found overflowing, soft downtubes were missing, and areas were heavily coated in dust. Trash and sludge found on ground around trash compactor. Packing peanuts and foam bits found floating in runoff from an outdoor enclosed room; a roof drain from the adjacent main building discharges onto the floor of this room and picks up trash and carries it outside. Found three air compressor blow-down lines plumbed to drain to ground outside; one drain line was actively discharging. A compressor was found outside without a cover and a heavy coating of oil around the motor. On roof, found several dust collection components with small to large piles of dust beneath them; some of the dust had been carried to roof edges by rainwater, leaving a thick mucky deposit. Various parts found stored uncovered outside on racks along a building; some parts were rusting in the rain and others consisted of motors and electrical parts.

storage racks had been covered with tarp; operations staff expressed dissatisfaction with this solution and will pursue an alternative that may consist of constructing a fixed overhand and relocated racks under that. Housekeeping on roof is substantially improved; no significant deposits of powder observed. Contact reported that he was now inspecting roof routinely; recent inspections had shown equipment leaking powder onto the roof. Contact reported that these leaks have since been fixed. Dust collection drums have been replaced with a larger hopper and a flexible fabric chute installed to convey dust into the hopper. Flexible chute was on ground nearby and Contact re-installed it immediately. Still observed powder coating most everything in the vicinity. Although hopper area is covered by a high roof, the recent rain has left a distinct line showing where powder had deposited on ground beyond edge of roofline and rainfall had washed it away. Contact will consider other ways to minimize airborne powder but housekeeping will be a continuous issue in this area. Trash compactor area and northwest storage yard have also been cleaned and so has the outbuilding where styrofoam pellets are handled. SWPPP has not yet been updated.

Eval Notes:	GOLDEN STATE ENTERPRISES 2700039 105 W LINCOLN AVE ORANGE 92865 On site for a change in business ownership hazardous waste inspection. The new business owner was identified as Golden State Enterprises. Armando U., manager, was present for the inspection and provided consent to inspect. The inspection included a walk of the facility's outside perimeter and its trash storage areas. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. The storage containers were closed and labeled with the required information. Two 10 ft. long fluorescent light tubes were observed in the dumpster area pending proper removal. We discussed the handling and disposal of universal waste. An OCCUPA universal waste fact sheet was provided for information. Records for the removal of the facility's hazardous waste are to be maintained for 3 years from the date of removal and be available for [Truncated]

conduct inspection activities. Hazardous waste generating processes were discussed. The following was observed: Hazardous waste: - waste liquids containing gasoline stored in a 55-gallon steel drum. - Waste solids (filters/absorbent) stored in a 55-gallon drum. Containers were stored closed and labeled correctly. Hazardous waste manifests were available for review. Perimeter of the facility was inspected. Did not observe any indication of a hazardous waste release or illegal dumping along the perimeter of the facility.

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Armando Umanzor, Store Manager. The facility is a Small Quantity Generator of fuel contaminated wastes. Walked throughout the facility and observed the facility's Hazardous Waste storage area in the dumpster enclosure. Hazardous Waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and the municipal trash dumpster was observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained on site. No hazardous waste violations were observed this date. This inspection report was sent to Tom.Robins@UnitedPacific.com.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violation Notes: Returned to compliance on 07/03/2017. Records for the removal of hazardous waste were not available for inspection. Records for the removal of the sludge clean out of the on site underground clarifier (separator) were not available for inspection. Please locate the records for the removal of fuel contaminated absorbents, fuel contaminated water, and the separator's oily water and sludge for the last 3 years. Submit copies of the removal receipts to this Agency. If no removal has occurred in the last 3 years, please notify this Agency. Submit the attached certificate of return to compliance, signed and dated, to this Agency within 30 days.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1, - 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 05/01/2019. complete overfill prevention test and submit results of test, not completed by required date of October 13, 2018. Re-inspection 2/11/2019 for overfill. Overfill Prevention completed, 5/1/19 RTC Ball floats removed flapper primary overfill.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-03-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Armen Vermishyan, manager, was present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. I did not observe hazardous waste in the facility's trash or as run off on the ground. The storage of the shop's hazardous waste was inspected. Approximately 20 gallons of fuel contaminated water had accumulated in storage on site. The facility also had a storage drum for used fuel contaminated absorbents. The storage containers were closed and labeled with the required information. The facility operated a clarifier (underground separator). The manager reported that clean out of the clarifier sludge was conducted on an as needed basis. Written spill response direction and emergency contact information must be provided for the employees. A hazardous waste emergency response card was provided for use.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

Address: 310 W GROVE AVE
City,State,Zip: ORANGE, CA 92865
Site ID: 531835
CERS ID: 271851
CERS Description: Industrial Facility Storm Water

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-18-2004
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Watkins Motor Lines is a freight transportation facility. Various types of freight are transported to the facility and transferred from one trailer to another (Photo 2). The facility maintains a covered concrete dock located near the center of the facility and an administrative office located along the east side of the concrete dock. The remainder of the facility is paved. Maintenance for the tractor trucks and trailers was observed to be conducted in a designated area by a subcontracted service company. Hazardous materials, including waste motor oil are transported off site by a subcontractor. The trucks and trailers are routinely washed by a subcontracted truck washing company and the wash water is contained and removed off site by the subcontractor. Spill kits were present in the concrete dock area in the event of a minor spill. Storm water at

the facility is conveyed to a series of drop inlets located throughout the driveway surrounding the concrete loading dock (Photo 3). Storm water runoff associated with the washing area and maintenance area is conveyed to a drain located near the southwest corner of the facility (Photos 4 and 5). Storm water discharge is sampled at this location prior to discharging into the city storm water culvert located along the southern perimeter of the site.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Public Information Officer:	Not reported
Commercial Offsite Facility Types:	Not reported
Quarterly Update:	Inactive facility undergoing Corrective Action: Orange Precision Circuits (OPC) Facility consists of one building. The Facility operated from 1979 to October 1989. The Facility sits on a parcel which is 135 by 250 feet and covers 11,000 square feet or 0.6 acres at 812 Southern Avenue in the City of Orange. All operations were performed in the building. A parking area lies to the south and west of the building. Operations involved the manufacture of printed circuit boards. The Facility operated two hazardous waste units (HWMUs), a former 1,500-gallon underground storage tank (UST) (elementary neutralization) used to neutralize acid and caustic solutions for off-site disposal (HWMU1) and a 1000-gallon above-ground storage tanks (AST) used to store spent copper etchant (HWMU2). An Interim Status Document was issued to the facility on January 4, 1982. The Facility sought a variance in the 1983 for the elementary neutralization unit. The variance was initially granted on July 7, 1987 and later, upon review by DTSC, denied. In October 1989, OPC vacated the site and the land owner, Mr. Amos Deacon, Jr. took responsibility for closure of the regulated units and site cleanup. Mr. Deacon retained Waste Materials Management to prepare a Closure Plan. This Closure Plan, dated May 6, 1991, was submitted to DTSC and was modified by DTSC on February 24, 1992 as part of approval. The HWMU-2 had been removed prior to the facility being vacated by the operators in October 1989. HWMU-1 was removed by Waste Materials Management in 1992. Both of the tanks contained metal waste from plating operations. As part of the closure activities sampling was performed at the two hazardous waste management units. The closure activities were described in a certification report entitled Report of Subsurface Contamination Assessment dated April 29, 1992 prepared by Applied Geotechnical Engineering, Inc. DTSC acknowledged the certification on June 11, 1993.

Waste Description:	REACTIVE WASTE
Waste Code:	D005
Waste Description:	BARIUM
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	U223
Waste Description:	BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-04-2013
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: Warm and sunny. Single SWPPP presented for review. Overall housekeeping is significantly improved; Contact reports that the broken sweeper has been replaced. Sweeping is done each working day during second shift when foam buns are moved around. Leaf-blower is used for hard-to-reach places but frequency is not known to Contact. Form cone impressions still in secondary containment at E tank area. Curtains on unloading pumps have been replaced. Found steam water leaking from pipe next to metering house. North rail line and trash compactor are littered. Unknown demo job left debris next to north loading platform. Outlet #4 has heavy litter and debris inside basin. Abandoned plastic sheeting found at SE corner. Improper leak response found at conveyor and in bun storage area. Improper storage of decommissioned baler found. Evidence of steam water discharge from pipe behind Tank 108 found.

being updated; several versions presented, most lack site plan; agreed to use site plan last revised 3/1/2000. Site is mostly orderly but littered with bits of fresh and weathered foam, including neglected, moldy-looking patches of foam dust. Contact cites lack of personnel and broken sweeping equipment for the condition of the site. Plastic sheeting is piled at the SE corner and not secured against wind. Leaks, or evidence of leaks, found from various process equipment. Heavy litter and weathered plastic sheeting found in NW portion of site near compactor. Storm drain inlet basins are littered; pipes are fitted with sliding gate valves left either open or partly-open; default position is not known to Contact.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to adequately discuss in the SPCC Plan all applicable bulk storage containers, or no discussion regarding all applicable bulk storage containers included.

Violation Notes: Returned to compliance on 12/22/2016. Inspection found the facility's qualifying APSA petroleum storage to differ from what was described in the plan. Additional totes and drums of petroleum products (oils, WD40, diesel) were observed on site that had not been identified in the plan. Also, the actual contents of the baler building's ASTs differed from what was in the plan. Please update the plan's qualifying APSA storage table to be current. Submit a copy of the table to this Agency within 30 days.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to comply with one or more of the following requirements: 1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and integrity tests for at least three years. 3. Keep comparison records.

Violation Notes: Returned to compliance on 12/22/2016. Monthly SPCC inspections as described in the plan were not being conducted. The monthly inspection log that was provided for review did not contain the required SPCC elements. Implement SPCC inspections for the qualifying above ground petroleum storage. Submit a copy of the first month inspection record to this Agency within 30 days.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Notes:	On-site for a routine inspection. Met with Douglas Darling this date. This is a Program Level 1 CalARP facility as well as a Federally Regulated site. The facility has approximately 680,000 pounds of TDI. The federal threshold is 10,000 pounds. The site has filed electronically with EPA, and has made several changes (dates and amount of TDI on-site). The last electronic change was made on 04/14/14. The EPA RMP anniversary date for this facility is 05/09/18. The latest version of the RMP has been submitted and approved by OCHCA. The California Program Level 1 certification is signed 04/26/13. The emergency eye wash and showers are being inspected and were tested this date. An email from Rosie Flores of the City of Orange Fire Department dated 04/22/14 verified that there have been no releases with off-site consequences within the last 5-years. 1) Five Year Accident History: According to Mr.Darling there have been no releases of TDI within the last 5-years [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-08-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Douglas Darling, Regional EHS Manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There was more than 10,000 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 10-22-12. The plan was on site and available for review. Changes in the described qualifying petroleum storage were noted and discussed. Updates will be completed. SPILL CONTROL: Secondary containment and spill response equipment were provided as described in the plan. INSPECTIONS: We discussed the required SPCC inspections [Truncated]

Eval Notes: INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The April 2014 Hazard Assessment by RMP Professionals on page 12, figure 7 (MARPLOT) shows no [Truncated]

Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. Johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Eval Notes:	On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Date: 06-08-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Douglas Darling, Regional EHS Manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There was more than 10,000 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 10-22-12. The plan was on site and available for review. Changes in the described qualifying petroleum storage were noted and discussed. Updates will be completed. Eval Notes: On site for a routine non-RCRA (CA regulated) hazardous waste large quantity generator (LQG) inspection. Doug Darling, Regional EHS manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. The facility's operations and the waste generated were discussed. The facility's outside lot was walked. I did not observe hazardous waste in the facility's trash or as run off on the ground. The signed off manifests for the removal of the facility's hazardous waste were on site and available for inspection. The records for the last year were reviewed. A non-RCRA LQG is a generator of equal to or greater than 1000 kg (roughly 2200 pounds) of non RCRA hazardous waste during a single month during a one year period. In the last year, the facility's records documented that this facility was a non-RCRA hazardous waste LQG. The storage of the facility's hazardous waste was inspected. The containers were stored closed and with [Truncated]

Eval Notes: INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The

Eval Notes: On site for a routine Aboveground Petroleum Storage Tank (APST) inspection. Met with Doug Darling, Regional EHS Manager, and Luis Carbajal, Plant Manager. The facility has aboveground petroleum storage exceeding 1,320 gallons, but less than 10,000 gallons. The following petroleum storage capacity: - 6,000 gallon single-walled AST containing mineral oil (east tank farm) - 300 gallon single-walled diesel AST (fire protection building) - 750 gallon double-walled diesel AST (mechanics building) - 300 gallon single-walled oily water AST (x2) (steam clean area) - 120 gallon hydraulic oil tote (steam clean area) - 120 gallon lube oil tote (steam clean area) - 55 gallon drums of various petroleum throughout facility (x14) All ASTs observed on site have secondary containment. Secondary containment areas were observed free of liquid and debris. An SPCC Plan certified by a Professional Engineer is maintained on site and is dated 7/1/2016. Employee training [Truncated]

Violations Found: No

Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Doug Darling, Regional EHS Manager, and Luis Carbajal, Plant Manager. The facility is a Large Quantity Generator of Non-RCRA Hazardous Waste. The facility's operations and waste generated were discussed. Walked throughout the facility and observed the facility's Hazardous Waste. The facility has a designated hazardous waste storage area in the mechanics building, and also several satellite accumulation areas. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and municipal trash dumpsters were observed. There are no signs of illegal disposal. Hazardous waste manifests were available for review. The facility's EPA ID number is active. Emergency plan is maintained onsite, spill response notification was discussed. Weekly hazardous waste container inspection logs were available for review. Annual employee training records [Truncated]

Eval Notes:	INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. Johnson in his emails clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to adequately discuss in the SPCC Plan all applicable bulk storage containers, or no discussion regarding all applicable bulk storage containers included.
Violation Notes: Returned to compliance on 12/22/2016. Inspection found the facility's qualifying APSA petroleum storage to differ from what was described in the plan. Additional totes and drums of petroleum products (oils, WD40, diesel) were observed on site that had not been identified in the plan. Also, the actual contents of the baler building's ASTs differed from what was in the plan. Please update the plan's qualifying APSA storage table to be current. Submit a copy of the table to this Agency within 30 days.

Eval Date: 04-05-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site for a CalARP routine inspection. Met with Regional EHS Manager Douglas Darling and EHS Coordinator Lidia Gallardo of FXI Inc. Consent was provided to enter and inspect the facility. This facility is regulated under CalARP Program Level 1 requirements for Toluene-2,4-Diisocyanate (TDI) G TQ = 500 pounds and Toluene-2,6-Diisocyanate (TDI) G TQ = 100 pounds. The facility is required to submit electronically with the EPA as the federal threshold is 10,000 pounds. TDI comes into the facility by rail car. Each rail car holds a maximum 180,000 pounds of TDI. On normal operations, the facility receives (2) rail cars per week. Note that the percentage between 2,4- and 2,6- is roughly 80%/20%. The rail cars are immediately emptied into a 35,000 gallon (319,733 pound) aboveground storage tank. Total quantity of TDI at the facility is approximately 680,000 pounds. The facility maintains (2) processes: 1. TDI in storage (Aboveground tank). The regulated [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On site for a routine above ground petroleum storage tank (APST) inspection. Douglas Darling, Regional EHS Manager, and Lidia Gallardo, EHS coordinator, were present for the inspection and provided consent to inspect. This facility is regulated under the Above Ground Storage Act (APSA). There was more than 10,000 gallons of regulated petroleum products in drums or tanks sized 55 gallons or larger on site. We reviewed the qualifying petroleum above ground storage on site, which included machine reservoirs, tanks, and drums. The facility had a Spill Prevention, Control and Countermeasure (SPCC) plan. Its most recent review date was 10-22-12. The plan was on site and available for review. Changes in the described qualifying petroleum storage were noted and discussed. Updates will be completed. SPILL CONTROL: Secondary containment and spill response equipment were provided as described in the plan. INSPECTIONS: We discussed the required SPCC inspections [Truncated]

Eval Notes: INSPECTOR COMMENTS: This inspection report is being written in order to correct the inspections reports dated 05/16/13, 05/17/13, 04/25/14 and 06/085/15. After reviewing the RMP, Federal (EPA) Certification and the Hazardous Assessment completed by RMP Professionals in April 2013 it appears that this facility is not a Program Level 1 but is in fact a Program Level 2 facility with an off-site consequence. The following was taken into account in making this determination: 1) The EPA RMP Submission dated 05/09/13 lists an off-site consequence of 0.01 miles (no off-site consequence) 2) The April 2014 Hazard Assessment by RMP Professionals on page 7 lists the off-site consequence as <0.0128 miles (no off-site consequence) 3) The April 2014 Hazard Assessment by RMP Professionals on page 11 lists the off-site consequence as 0.128 miles (off-site consequence) 4) The April 2014 Hazard Assessment by RMP Professionals on page 12, figure 7 (MARPLOT) shows no [Truncated]

Eval Notes: On site for a routine Aboveground Petroleum Storage Tank (APST) inspection. Met with Doug Darling, Regional EHS Manager, and Luis Carbajal, Plant Manager. The facility has aboveground petroleum storage exceeding 1,320 gallons, but less than 10,000 gallons. The following petroleum storage capacity: - 6,000 gallon single-walled AST containing mineral oil (east tank farm) - 300 gallon single-walled diesel AST (fire protection building) - 750 gallon double-walled diesel AST (mechanics building) - 300 gallon single-walled oily water AST (x2) (steam clean area) - 120 gallon hydraulic oil tote (steam clean area) - 120 gallon lube oil tote (steam clean area) - 55 gallon drums of various petroleum throughout facility (x14) All ASTs observed on site have secondary containment. Secondary containment areas were observed free of liquid and debris. An SPCC Plan certified by a Professional Engineer is maintained on site and is dated 7/1/2016. Employee training [Truncated]

Eval Notes: On site to conduct a routine Hazardous Waste inspection. Met with Doug Darling, Regional EHS Manager, and Luis Carbajal, Plant Manager. The facility is a Large Quantity Generator of Non-RCRA Hazardous Waste. The facility's operations and waste generated were discussed. Walked throughout the facility and observed the facility's Hazardous Waste. The facility has a designated hazardous waste storage area in the mechanics building, and also several satellite accumulation areas. Hazardous waste containers were observed properly labeled and stored closed. The perimeter of the facility was walked and municipal trash

Eval Type: Other, not routine, done by local agency
Eval Notes: INSPECTOR COMMENTS: Received an email (attached) from John Johnson of RMP Corp regarding the April 2013 hazard assessment. Mr. Johnson in his email clarifies the toxic endpoint of a release into the soil from a rail car of the TDI. The OSC is 0.0284 miles or 57 yards. According to OCHCA calculations, 0.0284 miles is 49 yards, not 57. This distance was mapped on Google earth and no off site conscience could be seen. It appears that based on this data, that this is a Program Level 1 CalARP facility.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-04-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: A routine compliance inspection was conducted for this facility on
1-04-01 at 1208. Mr. Jeffrey Stanfill, quality assurance manager, was
onsite to accompany staff memebbers through the site. Mr. David Juarez
was not on site. The facility boundaries have changed; the adjacent
property, which was once not a part of the property, is a part now. A
new NOI needs to be submitted to reflect these changes. Minor staining
was seen on the northern portion of the property, adjacent to empty,
washed, containers ready for disposal. An oily out of use compressor
was also seen here. Staff indicated that all spills must be cleaned up
immediately and out of use equipment that is in contact with storm
water should be covered. On the southern portion of the property, a
few out of use containers were not stored properly. Also, old rusting
equipment was observed. Iron oxide staining was seen in this area
also. Per Mr. Stanfill, there is only one dishcharge/sampling point on
the property. Staff saw two storm swales leading off the property.
Both need to be sampled. A copy of the SWPPP was requested, however
could not be found because Mr. Juarez was not in. A phone call will be
made to follow up with the details of this inspection and to obtain a
copy of the SWPPP.

Violations Found: No
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: On May 19, 2004. Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Enrique Hernandez the acting manager. The SWPPP was not able to be reviewed due to the fact that it was locked up in the managers office and he was not present. Upon inspection of the facility the following observations were made. A filter cake bin was stored directly next to the storm water swale as well as, several used empty drums. Staff instructed site personnel to move the bin and drums to a area that is not so close to the storm drain swale. Furthermore, staff informed site personnel that they must have access to the SWPPP at all times during the hours of business.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-30-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a compliance inspection of the above facility on July 30, 2019. Staff met with Mr. Rafael Salcedo, Plant Supervisor. The SWPPP and training records were reviewed. The SWPPP was dated May 2019 and training records were last documented in June 2016. Mr. Salcedo stated they had a recent training but would have to look for the documentation. The facility is currently in Level 1 for Nitrite + Nitrate. A site walk was conducted and the facility collects samples from one outfall. Mr. Salcedo explained they use sand bags to help collect their sample since the water runs off as sheet flow. Housekeeping is conducted monthly using a push broom. Mr. Salcedo stated they get run-on from their neighbor and this could be the reason for the high parameter results. He went on to explain that the City of Orange came for their yearly inspection and noted the staining on the ground and went to speak to their neighbor about cleaning up the run-on. Filter cakes are stored in lidded scrap metal bins under cover. Mr. Salcedo noted the bins are picked-up once a month. Raw chemicals are stored on secondary containment in locked chemical storage shed. Totes of diesel exhaust fluid are stored under a covered canopy. Some air compressor condensate was observed on the ground. Mr. Salcedo noted the condensate does not travel further than observed.

Eval General Type: Other/Unknown
Eval Date: 12-30-2002
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: ON December 30, 2002 under clear conditions the above referenced facility was viewed from the street by Regional Board staff. Staff attempted to enter the business, but discovered it was closed for the Holidays until January 6, 2003. Staff spoke with office personnel from an adjoining property, who told them that the plant was closed until that date. From the facility's entrance, staff could see through the business' windows, a grouping of 15-20 poly carboys that had hazardous materials labeling. These containers appeared to have adequate

Click Here:

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PCB TRANSFORMER: PCB Transformer Registration Database

The database of PCB transformer registrations that includes all PCB registration submittals.

Date of Government Version: 09/13/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/06/2019	Telephone: 202-566-0517
Date Made Active in Reports: 02/10/2020	Last EDR Contact: 05/07/2021
Number of Days to Update: 96	Next Scheduled EDR Contact: 08/16/2021
	Data Release Frequency: Varies

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/01/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/01/2019	Telephone: 202-343-9775
Date Made Active in Reports: 09/23/2019	Last EDR Contact: 06/22/2021
Number of Days to Update: 84	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: No Update Planned

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

UTM Y (Meters):	3743257.2
Elevation:	205 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641308 ORANGE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ORANGE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SW
Site Name:	GREAT WESTERN CARPET CUSHION CO INC
Site EPA ID Number:	CAD008352361
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	less than 140 feet.
Hydraulic Connection:	Information is not available regarding the hydraulic connection between aquifer(s) underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

6G	1/2 - 1 Mile SSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SORRENTO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	11 inches	61 inches	silty clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	61 inches	72 inches	stratified loamy fine sand to silt loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

3	18 inches	27 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
4	27 inches	70 inches	sandy clay loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1
5	70 inches	79 inches	sandy loam	Not reported	Not reported	Max: 14 Min: 4	Max: 6.5 Min: 6.1

Soil Map ID: 4

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Training

OSHA 40-hour Hazardous Waste Operations Course (OSHA 29 CFR 1910.120)

24 Hour Asbestos Building Inspector Initial Course (DOSH#CA-015-05)

Highlights

5 years of experience in the environmental consulting field including:

- Phase I Environmental Site Assessments
- Transaction Screen Assessments
- Environmental Desktop Reports

Experience Summary

Ms. Chloe Adelman is a Staff Scientist at Partner Engineering and Science, Inc. (Partner) and is located out of the Torrance, California office. Ms. Adelman prepares Phase I Environmental Site Assessments (ESA) and her responsibilities include site inspections, regulatory review, historical research, file review, and technical writing.

Ms. Adelman has five years of Phase I ESA technical writing experience. Former Phase I ESA's have included: residential, commercial, and industrial properties. She has experience with soil, soil vapor, and groundwater sampling, underground storage tank (UST) identification, and Geographic Information Systems (GIS) mapping.

Project Experience

Phase I Environmental Site Assessment, Sea Port, Long Beach, California. Assessor for an industrial sea port property. Identified the historical and current use for oil explorations activities and former Department of Defense navy shipyard maintenance operations. A Phase II ESA was recommended.

Phase I Environmental Site Assessment, Active Gas Station, Los Angeles, California. Assessor for an active gas station in the city of Los Angeles. Identified five historical USTs through regulatory research and reviewed associated regulatory closure reports for each. Inspected and reviewed compliance issues for the active on-site gasoline USTs.

Phase I Environmental Site Assessment, Racetrack, Arcadia, California. Assessor for a 300-acreage commercial racetrack. Inspected and reviewed compliance issues for active gasoline USTs in maintenance yard. Reviewed regulatory closure reports for six former USTs on property. Reviewed various subsurface soil, soil vapor, and groundwater sampling reports regarding former USTs and clarifiers. A Phase II ESA was recommended.

Chloe Adelman

Phase I Environmental Site Assessment, Manufacturing Facility, Torrance, California. Assessor for an industrial aerospace manufacturing facility. Site included use of metal plating and metal machining. Chlorinated solvents identified for plating operations. A Phase II ESA was recommended.

Phase I Environmental Site Assessment, Industrial Property, Industry, California. Assessor for a multiple unit industrial complex. Site included warehouse operations and adjoining leaking underground storage tank release.

Phase I Environmental Site Assessment, San Diego, Industry, California. Assessor for a multiple unit residential complex. Site included former leaking underground storage tank release case and radon sampling.

Asbestos Hazard and Emergency Response Act (AHERA) Building Inspection for Asbestos
Mine Safety and Health Administration (MSHA) – Part 46 and Part 48 Certified
Hazardous Waste Operations and Emergency Response (HAZWOPER), 40-hour (with First Aid, CPR)

Highlights

Over 13 years of experience conducting Phase I and Phase II Environmental Site Assessments (ESAs)
Over 13 years conducting industrial hygiene assessments such as asbestos, lead, radon, and mold surveys

Experience Summary

Mr. Boyce serves as a Project Manager for Partner Engineering and Science, Inc. (Partner), overseeing and managing all aspects of multi-scope projects including Phase I ESAs in accordance with EPA's All Appropriate Inquiry (AAI), Property Condition Assessments (PCAs), Zoning Reports, Seismic Assessments, and Industrial Hygiene-related projects. Mr. Boyce also serves as a senior technical reviewer on environmental due diligence assessments, including Phase I and II ESAs, for a variety of Clients.

Mr. Boyce has significant experience in due diligence assessments for a variety of property types and the needs and requirements of varied number of reporting standards, including ASTM standards, EPA's All Appropriate Inquiry (AAI), and customized client formats. Specifically, Mr. Boyce has performed Phase I Environmental Site Assessments (ESAs), Geotechnical Evaluations, Environmental Transaction Screens, Phase II and III Subsurface Investigations, Regulatory Compliance Assessments, Asbestos Surveys, Lead-based Paint Surveys, Radon Studies, and Mold Assessments.

Environmental Assessments

Duties included performing site visits; gathering zoning, ownership, building permits, fire records, and groundwater well information; geology research; UST and leaking underground storage tank (LUST) file review; aerial photograph interpretation; Resource Conservation Recovery Act (RCRA), Water Quality Assurance Revolving Fund (WQARF), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) database and city directory review; personal interviews; and preparation of technical reports.

Subsurface Investigations

Mr. Boyce has extensive experience in conducting Phase II Subsurface Investigations on industrial manufacturing facilities, gas stations, auto repair facilities, multi-family residential properties, shopping centers, and undeveloped land. Mr. Boyce has conducted soil and soil gas sampling, oversight of underground storage tank (UST) removals, drywell investigations, and soil and groundwater remediation activities (Former Industrial Plating Facilities/Former Military Airport).

Industrial Hygiene Surveys

Mr. Boyce has served as a Project Scientist/Project Manager on numerous Industrial Hygiene related projects. Projects included asbestos, microbial remediation, lead-based paint, and industrial hygiene (plating and paint mixing facilities) related projects, including sampling, report preparation, and senior review for numerous banking entities, municipalities, law firms, and a variety of commercial businesses throughout the United

States. In addition, Mr. Boyce has provided asbestos and microbial abatement oversight activities at private, commercial, and school facilities.

Geotechnical/Forensic

Mr. Boyce's field experience also includes logging and sampling geotechnical borings for civil engineering projects, and conducting floor measurement surveys for forensic-related studies. Duties included placing boring locations via GPS coordinates, logging borings, collection of soil samples, classifying soils in accordance with Unified Soil Classification System (USCS), and supervision and coordination of drilling and utility locating companies.

Project Experience

Various High Profile and Historic Hotel/Resort Properties, Various locations throughout the United States and Caribbean. Mr. Boyce has managed numerous multi-scope equity projects on high profile and historic hotel/resort properties, with scopes of work including Phase I ESAs, PCAs, Zoning Reports, Seismic Assessments, and Industrial Hygiene-related sampling.

Various FDIC Properties, Various locations throughout the United States. Mr. Boyce has managed numerous FDIC projects on various properties, with scopes of work including Phase I ESAs and Industrial Hygiene-related sampling.

Various High-Rise Commercial Properties, Various locations throughout the United States. Mr. Boyce has managed numerous multi-scope equity projects on high-rise properties, with scopes of work including Phase I ESAs, PCAs, Zoning Reports, Seismic Assessments, and Industrial Hygiene-related sampling.

Various Large-Scale Mining Operations, Various locations throughout the Western United States. Mr. Boyce has managed and conducted numerous multi-scope projects on large-scale coal, copper, and surface mining operations located throughout the western United States, with scopes of work including Phase I and Phase II ESAs, aboveground storage tank (AST) compliance, and asbestos (transite pipe) removal.

Department of Defense Cleanup, Mesa, Arizona. Mr. Boyce was subcontracted to provide general technical operation assistance and routine compliance sampling at a Thermally-Enhanced Soil Vapor Extraction pilot test for a former Air Force jet fueling compound and active Superfund Site.

Former Semi-Conductor Facility, Phoenix, Arizona. Mr. Boyce conducted numerous subsurface investigations at a former semiconductor facility and provided technical oversight during remedial activities and post-remedial clearance sampling.

UST Removal Oversight, Throughout Arizona. Mr. Boyce conducted numerous subsurface investigations and UST removals under the oversight of the Arizona Department of Environmental Quality at various locations throughout Arizona. Mr. Boyce provided technical oversight during remedial activities and post-remedial clearance sampling.

Highlights

Almost 20 years in the environmental and engineering consulting industry

Founding member of Partner Engineering and Science, Inc.

Executive Board Member of Partner Engineering and Science, Inc.

Experience Summary

Ms. Redlin brings unique expertise and experience as an almost 20-year veteran of the environmental and engineering consulting industry.

With her strong background in environmental science, coupled with a deep understanding of the commercial real estate business process, Ms. Redlin has become the leading expert in all things relating to commercial real estate due diligence. She has gained valuable knowledge and know-how from having been personally involved in the details of thousands of real estate transactions for various client types, and therefore understands the specific needs and scopes of work required for all parties involved in a transaction. Ms. Redlin's due diligence resume includes advising lenders and real estate investors on a wide gamut of due diligence. This knowledge allows her to offer the most efficient and cost-effective solutions for a wide array of commercial real estate transactions.

Ms. Redlin has extensive experience managing all aspects of due diligence for nationwide and local clients. Real estate investors, redevelopment agencies, financial institutions, insurance lenders, and real estate equity funds have come to rely on her advice and judgment to help them with their real estate business decisions. Ms. Redlin is a dedicated professional who takes pride and pleasure in meeting her client's needs and spearheading and assembling the team with the expertise to handle any issue that may come up during the transaction.

Outside of providing her clients with support on their transactions, Ms. Redlin is a respected and relied upon industry thought leader. She regularly provides insight by contributing to respected industry publications and speaks at industry events.

As an executive board member at Partner, Ms. Redlin is responsible for helping to shape the direction of Partner. Through her leadership contributions, Partner has achieved substantial growth even in the downturn of the commercial real estate market. Average annual growth has been roughly 20% over recent years slowing from exponential growth in the early years of the company. Ms. Redlin has successfully grown her personal book of business at Partner by more than 10% on average annually. As an executive, she provides mentorship to Partner's sales team and operation managers. Additionally, Ms. Redlin works

diligently to develop her own team into future leaders and provide them a path for growth. Colleagues look at Ms. Redlin's high functioning team as a model for their own.

Project Experience

Ms. Redlin has extensive experience in testing soil, soil gas, and groundwater in the context of a real estate transaction, as well as under the supervision of state and federal regulators. Among her specialties is guiding landowners and prospective purchasers through the process of selling or acquiring an environmentally challenged site.

Ms. Redlin has participated in the characterization of groundwater and soil contamination; quarterly groundwater monitoring; implementation of various systems such as soil vapor extraction systems, dual phase extraction systems, ozone sparging, air sparging, pump and treat; and soil excavation projects such as tank removals at several clean-up sites in Los Angeles and Orange County.

Ms. Redlin also has extensive experience in environmental compliance monitoring and biological consulting. She has extensive experience working as an independent contractor for and in conjunction with state and local agencies such as Santa Barbara County Parks, California Department of Fish and Game, California Public Utilities Commission, Los Angeles Water and Sanitation and others. This included monitoring construction activities near sensitive biological receptors; containing, quantifying and reporting any hazardous material spills that occurred; working with construction crews to ensure compliance with environmental permit regulations as well as reporting to interested parties on the progress and compliance of the project.

Distinctions

Real Estate Forum- Woman of Influence 2012

Ms. Redlin was named by the Los Angeles Business Journal for Women Making a Difference in 2010.

Ms. Redlin has been designated a 2009 California Mortgage Bankers Association (CMBA) Future Leader.

Ms. Redlin was named Real Estate Southern California Woman of Influence in 2008 for her role in the area's commercial real estate transactions.

Ms. Redlin was one of only two consultants asked to sit on the Risk Managers Association (RMA) Credit Committee roundtable which discussed the effects of the new Federal All Appropriate Inquiries (AAI) standard on Phase I Environmental Site Assessments.

Ms. Redlin received an Industry Profile of Distinction in Brownfield Renewal.
