Project Description (Proposed actions, location, and/or consequences).

The Central Trunk Sewer Replacement Project (Project) consists of the replacement of an existing 36-inch diameter sanitary sewer trunk line that is deteriorated and aged connecting to the Union Road Lift Station (URLS) located within the Parks Department Corporation Yard. The new 36-inch trunk sewer line will be approximately 4,300 LF of 36-inch PVC SDR 26 pipe. The existing lifting station will be decommissioned in the future by others. The new sewer line will begin downstream near the newly constructed subdivision off the Airport Road and extend eastward through the Kaiser Development, crossing the canal, through the Manteca Park Golf Course, continuing under the Parks Department Corp Yard and tie-in to the URLS at an existing sewer manhole.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.
