Violation Description: Failure to report a release or threatened release of a hazardous material to the unified program agency and to OES.
Violation Notes: Returned to compliance on 08/16/2022. OBSERVATION: The facility failed to immediately report a release of a hazardous material to the local unified program agency (Los Angeles County Fire Department s Health Hazardous Materials Division), and the California State Warning Center (Cal OES). On 1/25/22, the facility had a release of approximately 22,000 gallons of low pH wastewater (pH 1.7-5.4) to the sewer between 0645 and 1140, and then had a second discharge of approximately 36,000 gallons of low pH wastewater (pH <2.0) to the sewer between 1330 and 1500. Quantities and pH levels of wastewater discharged to sewer were verified by review of Slug Discharge Report dated 1/31/22 that was prepared by Tropicana Manufacturing Company Inc; review of inspection reports and pictures of pH recorder data from Los Angeles County

Violation Notes:	Returned to compliance on 07/27/2022. OBSERVATION: The facility failed to dispose of hazardous waste at a facility which has a permit from the Department of Toxic Substances Control (DTSC) by causing the disposal of hazardous waste at a point which is not authorized pursuant to Health and Safety Code (HSC) Chapter 6.5. According to the Slug Discharge report dated 1/31/22, the facility disposed of approximately 22,000 gallons of low pH wastewater (pH 1.7-5.4) to the Los Angeles County Sanitation District s (LACSD) sewer system on 1/25/22 between 0645 and 1140. Facility was instructed by the LACSD on 1/25/22 at 1310, that under no circumstance are they allowed to discharge wastewater to the sewer with pH <6.0. The Slug Discharge report revealed that the facility disposed of an additional 36,000 gallons of low pH wastewater (pH <2.0) to the sewer system on 1/25/22 between 1330 and 1500. Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Registry ID: 110070864185

Environmental Interest/Information System:
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 11/29/2021. OBSERVATION: During the inspection process, it was determined that facility operates a powder coating process for their lighting manufacturing process. The lighting products once manufactured get powder coated according to customer specifications. The leftover powdercoat that is deemed no longer used is swept up and placed into 55 gal drums. Per conversation with Mr. Beil, the waste is placed into a drum and shipped off as non-hazardous waste. No receipts available for review for the waste powdercoat disposal. The powder coat collected filters per Mr. Beil are being thrown into the trash. During the review of the SDS sheets of the most common powder coats used onsite, the SDS showed pictograms of GHS08 and GHS05 with NFPA Diamond of Health 2 and Flammability 1. A proper waste determination has not been made. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the waste powdercoat has

Site History:	The Regional Board file indicates that the former Sewell Plastics, Inc. manufactured plastic containers from 1978 to 1989. Sewell Plastics, Inc. is a subsidiary of Constar International. In 1992, Constar International was sold to Crown Cork & Seal Company, Inc. Environmental investigations were conducted at the Site between 1990 and 1997 to define the extent of chlorinated solvents in soil and soil vapor. PCE, 1,1,1-trichloroethane (1,1,1-TCA), and 1,1-dichloroethylene (1,1-DCE) in soil were detected at maximum concentrations of 63 milligrams per kilogram (mg/kg), 6.8 mg/kg and 0.93 mg/kg, respectively. PCE, 1,1,1-TCA, and 1,1-DCE in soil vapor were detected at maximum concentrations of 27 micrograms per liter (ug/L), 9,200 ug/L, and 270 ug/L, respectively.

Site History:	Burroughs Electronics developed the subject site with the existing concrete tilt-up building in 1969. Prior to that time the site was vacant and undeveloped. Between 1969 and 1974, Burroughs used the property to manufacture electronic equipment. In 1974, Western Gear leased the property for the purpose of manufacturing gears and housings for the aerospace industry. Western Gear and its successors continued to manufacture aerospace parts until it closed the facility and vacated the property in February 1995. Prior to vacating the facility all known sources of chemical storage, including aboveground storage tanks (ASTs), underground storage tanks (USTs), chemical pipelines, sumps, clarifiers, etc. were removed or closed in place.

WESTERN GEAR CORPORATION (FORMER) (Continued) **S111760533**

From 1995 to 1998 the site was used as a dry goods warehouse by Tyco Toys. In June 1998, Robert. H. Peterson moved into the facility and resumed manufacturing operations. Robert. H. Peterson currently uses the facility to manufacture gas grills and fireplace inserts. The UST Farm area of concern is the last of 5 original areas of concern to complete remediation. Due to the presence of residual VOC concentrations above the residential CHHSLs on the Site and the results of the Human Health Risk Assessment conducted for the former Plating Shop Vapor Degreaser Area of Concern, final closure of the Site required the filing of a deed restriction that will effectively restrict the property to commercial/industrial use.

Quarterly Update:	QUARTERLY UPDATE Quarterly Update Period: July 1, 2022 - September 30, 2022 Permit Renewal: DTSC is reviewing the Permit Renewal Application provided by Quemetco related to current operations and post closure monitoring. DTSC is still reviewing portions of the application including the Closure and Post Closure Plan and associated cost estimates. DTSC will complete its review before making a tentative decision to issue a draft permit or deny the permit request. DTSC is planning to make this decision available for public comment in January of 2023. FACILITY DESCRIPTION/HISTORY: Quemetco Facility is on a 15-acre property located in the City of Industry, Los Angeles County. This Facility is a lead battery recycling facility which has operated at this location since 1959.The Facility is located on previously rural land, but is currently in an industrial and residential mixed use area. The Facility includes hazardous waste management units and two post-closure units. The Post-closure units are the closed surface impoundment and former waste pile and these units are subject to post closure monitoring. The Facility recovers lead from automotive batteries, and other lead bearing materials received from off-site; and from slag generated on-site. PERMITTING REGULATORY DESCRIPTION: Closure of the surface impoundment unit was completed on December 13,

1994. DTSC received the Certification of Closure Report in February 1995, and acknowledged the Closure Certification on June 28, 1995. Post-Closure care was required because the groundwater had been contaminated. On June 10, 1998, a post-closure permit application was requested from the facility. It was submitted on March 24, 2000. The current operating and Post-Closure Permit was finalized by DTSC on September 15, 2005. The Permit was appealed by community groups in the neighborhood in 2005. The revised Permit was later reissued on December 18, 2007 as mandated by the appeal decision order. A Class 1 permit modification was also approved on November 18, 2010 for the enclosure

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as
