RE: Phase I Environmental Site Assessment
100 - 190 South Sixth Avenue, 14404 -14436 East Valley Boulevard
City of Industry, California 91746
Hillmann Project No: C3-10154

Dear Mr. Kelvin Koh:

Hillmann Consulting LLC has completed a Phase I Environmental Site Assessment at the above referenced site. This assessment was performed in conformance with the scope and limitations of ASTM E1527-21, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental consulting services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at (714) 634-9500.

Sincerely,

Hillmann Consulting LLC

Kofi Bonner
Project Manager

David Rutherford
Technical Director

LIST OF ACRONYMS/ABBREVIATIONS

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

AOC	-Area of Concern
AST	-Above Ground Storage Tank
ASTM	-American Society for Testing Materials
BER	-Business Environmental Risk
CERCLA	-Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	-Comprehensive Environmental Response Compensation and Liability Information System
CESQG	-Conditionally Exempt Small Quantity Generator
COC	-Chemicals of Concern
CORRACTS	-Corrective Action Sites
CREC	-Controlled Recognized Environmental Condition
DEC	-Department of Environmental Conservation
DEP	-Department of Environmental Protection
DHS	-Department of Health Services
DNPL	-Delisted National Priority List
DOB	-Department of Buildings
DOH	-Department of Health
DOT	-Department of Transportation
EPA	-Environmental Protection Agency
ERNS	-Emergency Response Notification System
FD	-Fire Department
FOI/FOIA/FOIL	-Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	-Heating Ventilation & Air Conditioning
HREC	-Historical Recognized Environmental Condition
IAQ	-Indoor Air Quality
ISRA	-Industrial Site Recovery Act
LBP	-Lead-Based Paint
LCP	-Lead-Containing Paint
LQG	-Large Quantity Generator
LTANK	-Leaking Storage Tank
LUST	-Leaking Underground Storage Tank
SDS/MSDS	-Safety Data Sheet / Material Safety Data Sheet
NA	-Not Applicable
NFA	-No Further Action
NFRAP	-No Further Remedial Actions Planned
NPDES	-National Pollutant Discharge Elimination System
NPL	-National Priorities List
OPRA	-Open Public Records Act
PAH	-Polycyclic Aromatic Hydrocarbon
PCE	-Perchloroethylene
RAO	-Response Action Outcome
RCRA	-Resource Conservation and Recovery Act
RCRIS	-Resource Conservation and Recovery Information System
REC	-Recognized Environmental Concern
SDG	-Significant Data Gap
SEMS	-Superfund Enterprise Management System
SRP	-Site Remediation Program
SQG	-Small Quantity Generator
SVOC	-Semi-Volatile Organic Compound
TCE	-Trichloroethylene
TSDF	-Treatment Storage and/or Disposal Facility
UST	-Underground Storage Tank
VEC	-Vapor Encroachment Condition
VOC	-Volatile Organic Compound

1.0 INTRODUCTION

1.1 Executive Summary

Hillmann Consulting LLC (Hillmann) has performed a Phase I Environmental Site Assessment (ESA) of 100 - 190 South Sixth Avenue, 14404 -14436 East Valley Boulevard, City of Industry, California (the Subject Property) in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-21 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

Summary of Project Details

Primary Street Address:	100 - 190 South Sixth Avenue, 14404 -14436 East Valley Boulevard				
City:	City of Industry	County:	Los Angeles	State:	California
Tax ID/Parcel Number:	8206027058, 8206027080				
Property Owner:	Richard C. Hunsaker				
Zoning Designation:	Light Manufacturing				
Approx. Property Area:	6.47 acres				
Buildings:	Six				
Approx. Building Size:	28,800 SF (Building A), 17,280 SF(Building B), 19,200 SF (Building C), 12,800 SF (Fmr. Building D), 8,640 SF (Building E), 8,640 SF (Building F), 12,800 SF (Building G)				
Approx. Year Built:	1977				
Commercial Occupants:	See rent roll				
Current Use:	Commercial/ lLight Industrial				
Site Visit Personnel:	Kofi Bonner				
Site Contact/Company:	Kelvin Koh / CapRock Partners				
Site Escort/Company:	Unescorted /				
Inspection Date:	September 11, 2024				
Weather Conditions:	87° F / Sunny

1.2 Findings, Opinions and Conclusions

Recognized Environmental Conditions & Significant Data Gaps

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property as described in Section 2.2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed the following recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs) and/or significant data gaps (SDGs) in connection with the Subject Property:

RECOGNIZED ENVIRONMENTAL CONDITIONS
No RECs were identified.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS
The Subject Property is located within a broad area of groundwater contamination that is part of the "Puente Valley/San Gabriel Valley Area 4" Superfund site. According to the USEPA, Puente Valley is one of eight (8) operable units (OUs) of the San Gabriel Valley Superfund case and is also known as San Gabriel Valley Superfund Site Area 4. The Puente Valley OU includes most of the City of Industry, portions of the City of La Puente, and portions of unincorporated Los Angeles County. Groundwater and soil are contaminated with various volatile organic compounds (VOCs, primarily trichloroethene (TCE) and tetrachloroethene (PCE)), 1,4-dioxane, perchlorate, and hexavalent chromium. Groundwater contamination occurs primarily in the shallow and intermediate groundwater zones of the aquifer, with most of the contaminant mass found in the shallow groundwater zone. VOC concentrations exceed drinking water standards in both the shallow and intermediate zones. Based on a review of groundwater quality data indicated by a 2017 monitoring report for Puente Valley Operable Unit-Shallow Zone North Remedy, monitoring wells installed within the shallow groundwater zone on adjoining properties to the southeast and northwest (MW-13 and MW-14) indicated zero to minimal concentrations of VOCs below MCLs, and depths to groundwater of approximately 50 to >60 feet below grade. The EPA is identified as the regulatory agency and there are remedial actions underway. Hillmann found no indication of current/former occupants of the Subject Property having been identified as contributing to the contaminant plume. Based on review of WIP database listings, former

tenants of the Property were investigated in the 1980s for potentially contributing and granted "Case-Closed" status in 1987. Two (2) adjoining historical facilities appear to have been flagged as potentially contributing; however, neither were identified by regulatory review as having unresolved contamination cases. Considering that the NPL/Superfund case is actively managed by the USEPA, the regional groundwater plume is considered to be a CREC in connection with the Subject Property.
SIGNIFICANT DATA GAPS
No SDGs were identified.
RECOMMENDATIONS
No additional investigation is recommended regarding the Puente Valley/San Gabriel Valley Area 4 NPL case. Use of groundwater beneath the Subject Property is likely restricted and subject to agency notifications/approval. It is Hillmann's opinion that no additional action or investigation is warranted at this time.

Historical Recognized Environmental Conditions (HRECs)

If identified, *historical recognized environmental conditions* (HRECs) in connection with the Subject Property are described below:

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS
No HRECs were identified.

De Minimis and Other Environmental Conditions

If identified, *de minimis* and other environmental conditions are described below:

OTHER ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS
1. The Subject Property has been utilized by multiple tenants for various light industrial operations since approximately 1977. Historical occupants included several printing/graphics businesses, which are considered potentially high risk for environmental impacts. Other occupants included light manufacturing operations, machine servicing businesses, auto painting supplies, and oil supplies. Phase I ESA reports by Hillmann in 2023 concluded that, collectively, the historical light industrial operations since 1977 were considered to a REC in connection with the Subject Property due to the potential for undocumented spills/releases of hazardous substances and/or petroleum hydrocarbons to have occurred. Hillmann performed a Limited Phase II Subsurface Investigation in May 2023 to address concerns of potential contamination on the Subject Property from historical uses and nearby offsite sources. Hillmann proposed a Limited Phase II Subsurface assessment that included twenty-one (21) soil borings and twenty (20) soil gas probes on the Subject Property. The report indicated the following conclusions: *"The results from soil sampling indicated no detectable concentrations of petroleum hydrocarbons and no heavy metals concentrations greater than current residential or commercial screening levels. The results from PFAS testing beneath the burned former building indicate many of these compounds were detected, but none at significant concentrations. The results from soil gas sampling indicate very low concentrations of VOC in some samples, none greater than current commercial screening levels."* *"Based on these results, no additional sampling is recommended for the site."* Based on the findings of the 2023 limited subsurface investigation, the historical uses of the Subject Property are

not considered to be a REC in association with the Subject Property.
2. A former occupant of the Subject Property, Duraware Plastics, was listed on the CERS. CPS-SLIC and CHMIRS databases. The CERS listing indicated the facility on the Subject Property was registered as a Cleanup Program Site with a Site ID of “602373” and a CERS ID of “T10000014239.” The CPS-SLIC listing indicated the former occupant Duraware Plastics Co. was investigated in the 1980s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. There was no indication of an actual reported release. The case was granted "Completed - Case Closed" status on August 11, 1987. The CHMIRS listing indicated the site had a release on March 18, 2021. According to the listing, the release was of diesel exhaust fluid to the road, as a result of a multi-vehicle collision. The listing reported a release of 10 gallons that was cleaned up by the tow company onsite, and that no waterways or storm drains were affected. Based on the details provided above, a REC is not suspected in connection with the Subject Property.
3. A former occupant of the Subject Property, Victory Coating, Inc., was listed on the CERS and CPS-SLIC databases. The CERS listing referenced "Well Investigation Program-Los Angeles RWQCB" and indicated the facility on the Subject Property was registered as a Cleanup Program Site with a Site ID of “605255” and a CERS ID of “T10000014262.” The related CPS-SLIC listing indicated the former occupant Victory Coating was investigated in the mid-1980s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. There was no indication of an actual reported release. The case was granted "Completed - Case Closed" status on February 5, 1987. Based on the details provided above, these listings are not considered to be REC in connection with the Property.
4. A former occupant of the Subject Property, Elite Salon Service, -14420 Valley Boulevard, was listed on the CERS, CPS-SLIC and WIP databases. The WIP, CERS and CPS-SLIC listings indicated the site was investigated in the mid-1980s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. The case was granted "Completed - Case Closed" status on December 16, 1996. Based on the details provided above, a REC is not suspected in connection with the Subject Property.
5. An adjoining property to the west, Former Patterson Resources-161 Sixth Avenue, was listed on the CPS-SLIC, WIP and CERS databases. This site is located approximately 65 feet cross gradient of the Subject Property. The WIP, CERS and CPS-SLIC listings indicated the site was investigated in the mid-1980s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. A release was reported in 1985 and was granted "Completed - Case Closed" status on October 23, 2009. According to the online Geotracker Database, several soil and groundwater investigations were conducted in 1989 to characterize the historical activities of heavy equipment use, repair, and storage, as well as welding and component building at the Subject facility. The RWQCB granted the site "Case Closure" on October 23, 2009. Based on the regulatory oversight, and positioning of the site in reference to the Subject Property these listings are not considered a REC in association with the Subject Property.
6. An adjoining property to the southeast, 14505 Proctor Avenue cross/downgradient of the Subject Property, was listed on the CPS-SLIC, AST, RCRA-SQG, DEED, WIP and other databases. The listings were under the names Former Packaging Corporation, Hilltop Mini Mart, and Pactiv Corporation. Available details from the Radius Map report and online Geotracker portal indicated that a release was reported in 1990 and granted "Completed - Case Closed" status on August 21, 2012. The facility formerly managed an AST farm area that held petroleum and non-chlorinated volatile organic compounds tanks. Investigations from 1986 to 1989 identified styrene, ethylbenzene, and oil as the main impacts in the subsurface, in addition to several detected VOCs. From 1996 to 2010 Vapor extraction has been used to mitigate concentrations of ethylbenzene and styrene in soil. As a result of residual contamination, the property was given a "Land Use Covenant" on March 16, 2012. The RWQCB granted the site "Case Closure" on August 21, 2012.

Based on the available database details as well as the 2023 limited subsurface investigation findings, the site and historical use is not considered to be a REC in connection with the Subject Property.

Environmental Professional Statement

I/We declare that, to the best of my professional knowledge and belief, I/we meet the definition of Environmental professional as defined in § 312.10 of 40 C.F.R. 312. I/we have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I/We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Ryan Terwilliger
Environmental Professional

David Rutherford
Environmental Professional

1.3 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential *business environmental risks* (BER), also known as "*Non-ASTM Scope*" concerns, in accordance with the contracted scope of work scope for this assessment. Additional details of the scope of work and findings are included in Sections 2 and 7.

Subject	Findings	Not Appl.	Rpt. Ref.
Asbestos	Suspected ACM noted within the accessed building areas included vinyl sheet flooring, floor tiles and associated mastic, mirror mastic, carpeting and associated mastic, roofing systems, penetration mastics, and thermal systems insulation.		7.1
Lead Paint	No residential buildings built prior to 1978 were present at the Property.		7.2
Radon	Property is located in the USEPA radon designation Zone 2 or 'moderate risk' area for radon.		7.3
Mold/ Microbial Damage	No evidence of significant problems with moisture intrusion or mold/ microbial growth was noted at the Subject Property.		7.4
NWI Wetlands	A review of NWI Wetlands Mapper did not indicate regulated wetland areas on the Property.		7.5
Lead in Drinking Water	Potable water service at the Property is provided by a utility connection with San Gabriel Valley Water Company. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water.		7.6

2.0 GENERAL

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-21. The ASTM describes these methodologies as representing good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. § 9601) and petroleum products. This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability ("landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the Subject Property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The goal of the processes established by ASTM E1527-21 is to identify *recognized environmental conditions* in connection with the Subject Property.

The term *recognized environmental condition* (REC) is defined by ASTM E1527-21 as "*(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*"

The term *controlled recognized environmental condition* (CREC) is a type of recognized environmental condition and defined by ASTM E1527-21 as a "*recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*"

The term *historical recognized environmental condition* (HREC) is defined as a "*previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).*" The ASTM E1527-21 standard has clarified that a historical recognized environmental condition is not a recognized environmental condition.

The term *de minimis condition* is defined by the ASTM, "*…a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.*" A condition determined to be a de minimis condition is not REC nor a CREC.

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Subject Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Subject Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historical record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Subject Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

Business Environmental Risks/Non-ASTM Scope Considerations

Hillmann has performed a limited review of the following potential *business environmental risks* (BER), also known as "*Non-ASTM Scope*" concerns, in accordance with the contracted scope of work scope for this assessment. BER is defined by ASTM E 1527-21 as *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

- Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Subject Property. If the Subject Property contains buildings built in 1990 or later, the contracted scope of work excludes a cursory non-intrusive visual screening or any other level of evaluation for suspect ACM; however, the exclusion for buildings built ≥1990 should not be interpreted to suggest that any such buildings are free of ACM or would not warrant evaluation of building materials for ACM prior to disturbance. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if a greater certainty is desired regarding ACM and potential asbestos hazards at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

- Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Subject Property. If the Subject Property contains buildings built in 1980 or later, the contracted scope of work excludes any cursory non-intrusive visual screening or other level of evaluation for suspect LPB; however, the scope of work exclusion for building built ≥1980 should not

be interpreted to suggest that any such buildings are free of LPB or other lead hazards. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

- USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Subject Property.

- Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Subject Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Subject Property.

- NWI Wetlands: The Subject Property has been reviewed for jurisdictional wetlands using the National Wetlands Inventory-Wetland Mapper to determine whether mapped federal wetlands have been indicated on the Subject Property. Any further evaluation or legal delineation of regulated wetlands areas is excluded from the scope of work. It is also emphasized that a field delineation of regulated wetlands by a qualified professional would be warranted to more fully determine the presence or absence of regulated wetlands at the Subject Property.

- Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:		100 - 190 South Sixth Avenue, 14404 -14436 East Valley Boulevard			
City:	City of Industry	County:	Los Angeles	State:	California
Tax ID/Parcel Number:		8206027058, 8206027080			
Approx. Land Area:		6.47 acres			
Apprx. Latitude/Longitude:		North 34.0360820 degrees/West 117.9783610 degrees			
Additional Details (if appl.)		N/A			
Property Owner:		Richard C. Hunsaker			
Zoning Designation:		Light Manufacturing			

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	The date and/or type of the first developed use of the Subject Property was not determined. Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.
User and Owner questionnaires were not received as of date of report	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 ESA Report Component Dates/Viability

The ASTM E1527-21 standard states that an environmental site assessment (ESA) is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). Specifically, all of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction. The following table summarizes the component completion dates:

ESA Component	Completion Date
Interviews:	Last attempt: September 10, 2024
Env. Lien Search:	(excluded from scope)
Government Records Review:	September 3, 2024
Visual Inspections:	September 11, 2024
Env. Professional Declaration:	September 18, 2024

2.5 User Reliance

This report is for the exclusive use of CapRock Partners and additional relying entities, if any, named on the front cover. No additional individuals or entities shall be permitted to rely upon any data, interpretation, reports or other information or documentation contained in this report, without first obtaining the consent of CapRock Partners; and without obtaining written consent from Hillmann in the form of a reliance agreement/letter.

Hillmann may, in its sole discretion, withhold its consent to additional reliance and/or Hillmann may condition consent for reliance upon payment of a fee or other conditions.

2.6 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Subject Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Subject Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site-specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Subject Property and immediate surrounding area.

2.7 General Limitations and Exceptions

Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, would be further specified in Section 4.1.

Significant limitations related to the condition or accessibility of the Subject Property at the time of the site reconnaissance, if encountered, are reported in Section 6.1.

Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-21 are reported.

Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Subject Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents.

No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources, including information obtained during the assessment, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or government agency source. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-21 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

Recommended response actions offered in Section 1.3, if any, are provided as an option to the Client, and may have taken into account the Client's relation to the Subject Property and/or their intended purpose of this assessment. If included, it is not intended by Hillmann to represent the only course(s) of action, or inaction, to take. Furthermore, it is emphasized that additional response actions may become advisable depending on the outcome of the initial action(s)

taken. Hillmann advises that Client and any additional authorized relying parties as specified on the report Cover and Section 2.5, or via letter of reliance extension, undertake consultation with legal counsel familiar with environmental and real estate law would be beneficial to the decision making process for the type and timing of a response action to identified RECs or Business Environmental Risks, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User(s) of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

The User(s) assumes responsibility for business decisions that it makes utilizing information in the report provided by Hillmann. Hillmann shall not be responsible for any conclusions, interpretations and/or decisions of the User(s).

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term “User” is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Subject Property; specifically, the entity or entities named on the front cover to which the report has been addressed.

3.1 Prior Environmental Reports/Documentation

Environmental Property Investigation, Don Julian and Valley Center Properties 15151 Don Julian Road, 525 - 427 Turnbull Canyon Road, 100 - 190 South Sixth Street & 14404-14436 Valley Boulevard, City of Industry, CA; prepared by Hydrotech Consultants, Inc.; dated September 27, 1989. The report concluded the following:

> *“This investigation has yielded evidence that hazardous substances may have impacted both Subject sites…*
>
> *7.2 Valley Center Boulevard*
>
> *Soil and groundwater contamination in the San Gabriel groundwater basin is presently under investigation by the RWQCB, State DHS and USEPA. Several potentially responsible parties for portions of this contamination have been identified in the vicinity of the Subject site. Information acquired by the RWQCB from A & E Plastics, a neighboring site upgradient from the Subject site, suggests that soil and groundwater contaminants may have migrated on to the Subject site. The RWQCB may request in the near future that access be given to A & E Plastics to the Subject site to conduct additional investigations (Phil Chandler, RWQCB, pers. comm., 1989).*
>
> *Additionally, observations made at the Subject site suggest that organic contaminants have been spilled adjacent to the Subject site near the railroad property boundary with A & E Plastics. Therefore, Hydrotech concludes that contaminants related to site use activities may be present within on-site soils or groundwater. Asbestos was not identified in building materials that were sampled in the 100 South Sixth Street unit. To the extent that identical building materials were used during construction in all other areas of the Valley Center Property, asbestos was not identified in the materials sampled and no further work is recommended…*
>
> > *- Hydrotech recommends further communication with the RWQCB to investigate details of studies in progress at adjacent sites and establish what investigative actions may be required for the A & E Plastics study.*
> >
> > *- Finally, Hydrotech recommends that the responsible party for the organic liquid spill adjacent to Magnum be identified. Once identified, the responsible party should be required to characterize and remediate any associated soil and groundwater contamination. This area is likely to be noticed during any future RWQCB work regarding A & E Plastics and may bring the subject site under regulatory pressures."*

Phase I Environmental Site Assessment, 100-190 South Sixth Avenue, City of Industry, CA; prepared by Hillmann Consulting, LLC; dated April 27, 2023. This scope of this report only included parcel 8206027058 and excluded parcel 8206027080. The report concluded the following:

"*The adjoining property to the east addressed as 14505 Proctor Avenue located approximately 700 feet to the southeast and cross/downgradient of the Subject Property had a release and was granted "Completed - Case" Closed status on August 21, 2012. The CPS-SLIC listing indicated the site known as the Former Packaging Corporation or Pactiv Corporation facility. The facility formerly managed an AST farm area that held petroleum and non-chlorinated volatile organic compounds tanks. Investigations from 1986 to 1989 identified styrene, ethylbenzene, and oil as the main impacts in the subsurface, in addition to several detected VOCs. From 1996 to 2010 Vapor extraction has been used to mitigate concentrations of ethylbenzene and styrene in soil. As a result of residual contamination, the property was given a Land Use Covenant on March 16, 2012. The RWQCB granted the site case closure on August 21, 2012. However, based on the positioning of the site in reference to the Subject Property and the nature of the remedial methods utilized, these listings are considered a REC in connection with the Subject Property. A REC is considered due to the potential for soil vapor intrusion at the area immediately adjoining the adjoining tank farm. The Subject Property has been utilized by multiple tenants for various light industrial operations since approximately 1977. Historical occupants included several printing/graphics businesses, which are considered potentially high risk for environmental impacts. Other occupants included light manufacturing operations, machine servicing businesses, auto painting supplies, and oil supplies. Collectively, the historical light industrial operations since 1977 are considered a REC in connection with the Subject Property due to the potential for undocumented spills/releases of hazardous substances and/or petroleum hydrocarbons to have occurred."*

Additionally, the report identified the following CREC in association with the Subject Property:

"*A portion of the Property was listed as "San Gabriel Valley Area (2 & 4)" on the Los Angeles County Areas of Concern (AOC) database due to previously reported VOCs in groundwater exceeding Maximum Contaminant Levels (MCLs) as designated by region 9 EPA. The EPA is identified as the regulatory agency and there are remedial actions underway."*

Hillmann recommended the following:

"*A Phase II Investigation is recommended to further evaluate the potential for subsurface impacts due to historical industrial uses as well as the adjoining former Packaging Corp site to the southeast."*

Phase I Environmental Site Assessment, 14404 -14436 East Valley Boulevard, La Puente, CA; prepared by Hillmann Consulting, LLC; dated April 27, 2023. This scope of this report only included parcel 8206027080 and excluded parcel 8206027058. The report concluded the following:

"*The Subject Property has been utilized by multiple tenants for various light industrial operations since approximately 1977. Historical occupants included several printing/graphics businesses, which are considered potentially high risk for environmental impacts. Other occupants included light manufacturing operations, machine servicing businesses, auto painting supplies, and oil supplies. Collectively, the historical light industrial operations since*

1977 are considered a REC in connection with the Subject Property due to the potential for undocumented spills/releases of hazardous substances and/or petroleum hydrocarbons to have occurred."

Additionally, the report identified the following CREC in association with the Subject Property:

> " *A portion of the Property was listed as "San Gabriel Valley Area (2 & 4)" on the Los Angeles County*
> *Areas of Concern (AOC) database due to previously reported VOCs in groundwater exceeding*
> *Maximum Contaminant Levels (MCLs) as designated by region 9 EPA. The EPA is identified as the*
> *regulatory agency and there are remedial actions underway. The San Gabriel Valley Areas 2 and 4*
> *represent a CREC in association with the Subject Property."*

Hillmann recommended the following:

> "A Phase II Investigation is recommended to further evaluate the potential for subsurface impacts due to historical industrial uses."

Limited Phase II Subsurface Investigation Report, 100-190 S. SIXTH AVE. AND 14404-14436 E. VALLEY BLVD., CITY OF INDUSTRY/ LA PUENTE, CA; Prepared by Hillmann Consulting, LLC; dated June 1, 2023. The scope of work is summarized as follows:

In April 2023, Hillmann conducted a Phase I Environmental Site Assessment at the site and found that the property has been utilized by multiple tenants for various light industrial operations since approximately 1977. Historical occupants included several printing/graphics businesses, which are considered potentially high risk for environmental impacts. Other occupants included light manufacturing operations, machine servicing businesses, warehouse storage, auto painting supplies, and oil supplies. Based on the historical use of the Subject Property Hillmann proposed a Limited Phase II Subsurface assessment that involved installing twenty-one (21) soil borings and installing a total of twenty 20) soil gas probes on the Subject Property. Specifically...

" a total of twenty (20) soil gas probes in targeted areas of the site identified as formerly or currently maintaining suspect operations, including printing and other light industrial use. These included tenant suites located at 14414, 14420, and 14426 East Valley Boulevard and 110, 122, 126, 132, 138, and 190 South Sixth Avenue. Two (2) of the borings (B19 and B20) were installed at the edge of the footprint of the burned former structure at 140-148 South Sixth Avenue. The borings were installed to total depths ranging from 2.5 to 6 feet below grade using hand auger tools. Each boring (except for B19) was completed as a soil gas sampling probe (SG1-SG21) with sample tips installed at maximum depth. A twentieth soil gas probe (SG21) was installed near the southeast corner of the site nearest to the off-site impacted property that was closed with restrictions."

Hillmann reported the following conclusions regarding the Subject Property:

"The results from soil sampling indicated no detectable concentrations of petroleum hydrocarbons and no heavy metals concentrations greater than current residential or commercial screening levels. The results from PFAS testing beneath the
burned former building indicate many of these compounds were detected, but none at significant concentrations. The results from soil gas sampling indicate very low concentrations of VOC in some samples, none greater than current commercial screening levels.

Based on these results, no additional sampling is recommended for the site."

3.2 User Responsibilities

A User Questionnaire was provided to the User to assist in gathering information, as detailed below, that is required for disclosure during the assessment to meet All Appropriate Inquiry requirements. If completed and returned to Hillmann, a copy of the Questionnaire has been included in Appendix C.A completed questionnaire was not returned to Hillmann.

Question:	Yes/No:	Detail:
1. Search of Land Title and Judicial Records: Has the User performed a search of land title records and judicial records for environmental liens and/or Activity and Use Limitations (AULs) filed or recorded against the Subject Property?		NA
1.a. If yes to Question 1: Did the search identify any environmental liens or Activity and Use Limitations (AUL), such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded against the Subject Property under federal, tribal, state or local law?		NA
1.b. If yes to Question 1: Has the User provided the result of the search of land title and judicial records to Hillmann?		NA
2. Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		NA
3. Relationship of the purchase price to the fair market value of the Subject Property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the Subject Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?		NA
4. Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:		NA
4.a. Do you know the past uses of the Subject Property?		NA
4.b. Do you know of specific chemicals that are present or were once present at the Subject Property?		NA

4.c. Do you know of spills or other chemical releases that have taken place at the Subject Property?		NA
4.d. Do you know of any environmental cleanups that have taken place at the Subject Property?		NA
5. The degree of obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the Subject Property are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?		NA
6. Litigation, Administrative Proceedings, Government Notices: As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Subject Property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		NA
7. User's Reason/Purpose for Performing Phase I ESA:	Hillmann understands that the assessment is being prepared in connection with a prospective real estate transaction involving the Property.	

4.0 RECORDS REVIEW

4.1 Environmental Information

Physical Setting

Source	Discussion
USGS 7.5 minute Topo Map:	The Subject Property lies at an elevation of approximately 299 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the southwest.
USDA Soil Data: (EDR GeoCheck)	The soil type at the Subject Property is classified as "Urban Land". The Urban Land designation indicates that a majority of the original soils on the site have been disturbed by development or covered with impervious surfaces, such as buildings or pavement.
Geologic Data: (EDR GeoCheck)	The geologic formation in the vicinity of the Property is described as the Cenozoic era, Quaternary System, and Quaternary Series.
Prior Env. Reports: (Section 3.2)	Prior environmental reports reviewed as part of this assessment, as detailed in Section 3.1, provided the following pertinent detail of physical setting data: - The Subject Site is located within the San Gabriel Groundwater Basin. Groundwater in this basin is present within the alluvial deposits and flows from the San Gabriel Mountains. - Groundwater is estimated to be approximately 18 feet below ground surface.
Additional Sources/ Data:	No additional physical setting sources or data was obtained.
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the southwest.

Federal, State and Tribal Environmental Record Sources

Standard government records were obtained and reviewed primarily via a third-party regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT. The report provided government records from the standard environmental resources and within minimum search distances specified by Section 8.2.2-Table 2 of the ASTM E1527-21; and were reviewed for the purpose of identifying potential RECs in connection with the Subject Property. Additional detail of the source and significance of the regulatory databases can be found in the regulatory database report in Appendix E. Hillmann has also included discussion of records pertaining to the Subject Property from other government record sources not specifically listed under Table 2, as applicable.

Reported distances for adjoining property listings, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Subject Property in the up-gradient direction, 365 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Subject Property in the up-gradient direction, 165 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the Subject Property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Subject Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Subject Property, if any, are identified and discussed in this section.

The EDR Radius Map report is attached in Appendix D.

Subject Property Listings

The following listings of the Subject Property were identified:

Name/Address:	Elite Salon Service/ 14420 Valley Boulevard
Database(s):	CERS, CPS-SLIC, WIP
Data Discussion:	The CERS listing indicated the site on the Subject Property is registered as a Cleanup Program Site with a Site ID of "602467" and a CERS ID of "T10000014227." The CPS-SLIC listing indicated the site Elite Salon Service was investigated in the 1990s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. There was no indication of an actual reported release. the case was granted "Completed - Case Closed" status on December 16, 1996. Based on the details provided above, a REC is not suspected in connection with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	GM AUTO PAINT #3/ 14414 Valley Boulevard
Database(s):	CERS, CERS HAZ WASTE, FINDS, ECHO, HWTS, HAZNET, RCRA NONGEN/NLR
Data Discussion:	The CERS and CERS HAZ WASTE listings indicated the site on the Subject Property is registered as a Chemical Storage Facility and a Hazardous Waste Generator with a Site ID of "571683" and a CERS ID of "10863403." The CERS listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials.

	No spills were reported for the site. The ECHO and FINDS listings indicated the site is registered on the RCRA databases with a registry ID of "110070412354". The HWTS listing indicated the site is registered as a hazardous waste transfer site. The permit was created on July 24, 2013, and is listed as "Active". The HAZNET listing indicated the following waste streams on the site: Unspecified solvent mixture, that was disposed of through fuel blending prior to energy recovery at another site. The RCRA NONGEN/NLR listing indicated the site is registered as a non-generator of hazardous wastes since July 24, 2013, with an EPA ID of "CAL000387730." No releases or violations were noted for the site. Given the lack of reported spills or releases, these listings are not considered to be REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Rico Products Inc. Duraware Plastics Co. /14412 Valley Boulevard
Database(s):	FINDS, CERS, CPS-SLIC, CHMIRS, WIP
Data Discussion:	The FINDS listing indicated the site on the Subject Property is registered on the National Compliance Database (NCDB) database with a registry ID of "110011646102". The CERS listing indicated the facility on the Subject Property was registered as a Cleanup Program Site with a Site ID of "602373" and a CERS ID of "T10000014239." The CPS-SLIC listing indicated the former occupant Duraware Plastics Co. was investigated in the 1980s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. There was no indication of an actual reported release. The case was granted "Completed - Case Closed" status on August 11, 1987. The CHMIRS listing indicated the site had a release on March 18, 2021. According to the listing, the release was of diesel exhaust fluid to the road, as a result of a multi-vehicle collision. The listing reported a release of 10 gallons that was cleaned up by the tow company onsite, and that no waterways or storm drains were effected. Based on the details provided above, a REC is not suspected in connection with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	C & N Office Specialties Inc./ 166 S. 6th Avenue
Database(s):	FINDS, ECHO, HWTS, HAZNET, RCRA-SQG,
Data Discussion:	The ECHO and FINDS listings indicated the site on the Subject Property is registered on the RCRA databases with a registry ID of "110002762993". The HWTS listing indicated the site was previously registered as a hazardous waste transfer site. The permit was created on October 26, 2018, and is listed as inactive since July 27, 2018. The HAZNET listing indicated the following waste streams for the site: halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc.), Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), and unspecified solvent mixture. These materials were disposed of through a recycler or incinerated. The RCRA-SQG listing indicated the site is registered as a non-generator of hazardous wastes since April

	13,1987 and with an EPA ID of "CAD981979628." No spills or violations were reported. Based on the absence of reported releases or violations, these listings are not considered to be a REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Hunsaker Management, Cal Tex Precision Inc., Victory Coating/ 190 S. 6th Avenue
Database(s):	HWTS, HAZNET, FINDS, CERS, CPS-SLIC, CERS HAZ WASTE
Data Discussion:	Hunsaker Management: The HWTS listing indicated the site on the Subject Property was previously registered as a "Hazardous Waste Transfer" site. The permit was created on April 9, 1999, and is listed as "Inactive" since December 01, 2003. The HAZNET listing indicated the following waste streams for the site: unspecified solvent mixture, and Off-specification, aged or surplus organics. These materials were disposed of through a transfer station. No spills or violations were reported. Based on the absence of reported releases or violations, these listings are not considered to be REC in connection with the Property. Cal TEX Precision Inc.: The FINDS listing indicated the site on the Subject Property is registered on the RCRA databases with a registry ID of "110066058385". The CERS HAZ WASTE listing indicated the facility on the Subject Property was registered as a "Hazardous Waste Generator" with a Site ID of "14966" and a CERS ID of "10289614." The CERS HAZ WASTE listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials. Based on the absence of reported releases or violations, these listings are not considered to be REC in connection with the Property. Victory Coating, Inc.: The CERS listing indicated the facility on the Subject Property was registered as a "Cleanup Program" site with a Site ID of "605255" and a CERS ID of "T10000014262." Review of GeoTracker details indicate the site was investigated in the 1980s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. There was no indication of an actual reported release. The case was granted "Completed - Case Closed" status on February 5, 1987. Based on the regulatory oversight, these listings are not considered to be REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Multi-Color Tech LLC, 6 sign Inc./ 136 S. 6th Avenue
Database(s):	FINDS, ECHO, NPDES, CIWQS, CERS
Data Discussion:	Multi-Color Tech LLC: The ECHO and FINDS listings indicated the site on the Subject Property is registered on the RCRA databases with a registry ID of "110070266596".

	6 Sign Inc.: The CERS, CIWQS, and NPDES listings indicated that the site on the Subject Property maintains an "Industrial Facility Stormwater" permit that has remained "Active" as of March 17, 2021. The facility has a Site ID of " 578042" and a CERS ID of "890556".
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Titto Inc., Benson Printers/ 172 S. 6th Avenue
Database(s):	CERS, HAZNET, HWTS
Data Discussion:	The CERS listing indicated the site on the Subject Property is registered as a Chemical Storage Facility with a Site ID of “547728” and a CERS ID of “10286908.” The CERS listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials. No spills were reported for the site. The HWTS listing indicated the site is registered as a "Hazardous Waste Transfer" site. The permit was created on February 14, 1994, and is listed as "Inactive" as of December 31, 1999. The HAZNET listing indicated the following waste streams on the site: Unspecified organic liquid mixture, that was disposed of through fuel blending prior to energy recovery at another site. No releases were noted for the site. Given the lack of reported spills or releases, these listings are not considered to be REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Atkinson Construction/ 148 S. 6th Avenue
Database(s):	HWTS, HAZNET
Data Discussion:	The HWTS listing indicated the site on the Subject Property is registered as a "Hazardous Waste Transfer" site. The permit was created on October 20, 2008, and is listed as "Inactive" as of June 30, 2012. The HAZNET listing indicated the following waste streams on the site: Other organic solids, off-specification, aged or surplus organics, and unspecified oil-containing waste. These materials were disposed of through storage, bulking, and/or transferred off-site with no treatment or recovery. No releases or violations were noted for the site. Given the lack of reported spills or releases, these listings are not considered to be REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Lawrence Wire Cloth Inc./ 178 S. 6th Avenue
Database(s):	CERS
Data Discussion:	The CERS listing indicated the site on the Subject Property is registered as a Chemical Storage Facility with a Site ID of “396354” and a CERS ID of “10295218.” The CERS listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials.

REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Adjoining Property Listings

The following adjoining property listings were identified.

Name/Address:	Southern California Sanitation/ 163 S. 6th Avenue
Database(s):	HWTS, CERS HAZ WASTE, CERS TANKS, LOS ANGELES CO. HMS, HAZNET, CERS, RCRA NONGEN/NLR
Dist./Dir./Gradient:	123 Feet/ West/ Down-gradient
Data Discussion:	The CERS HAZ WASTE and CERS TANKS listing indicated the site is a Hazardous Waste Generator with CERS ID "10863556" and manages aboveground storage tanks. The HAZNET listing indicated the following waste streams for the site: Other organic solids, and unspecified oil-containing waste. These materials were stored/bulked and then transferred off-site with no recovery, for disposal. The HWTS listing indicated the property as a hazardous waste transfer site from December 21, 1998, to June 30, 2001. The HAZNET listing indicated the following waste streams for the site: Other organic solids, and unspecified oil-containing waste that were stored/bulked then transferred offsite with no recovery. The RCRA NONGEN/NLR listing indicated the site as a non-generator of hazardous wastes since January 7, 2008, with an EPA ID of "CAR000122390." Based on the details provided above, a REC is not suspected in connection with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Former Patterson Resources/ 161 S. 6th Avenue
Database(s):	CERS, CPS-SLIC, WIP
Dist./Dir./Gradient:	125 Feet/ West/ Down-gradient
Data Discussion:	The CERS listing indicated the site is registered as a Cleanup Program Site with a Site ID of "209015" and a CERS ID of "SL603798557." The CPS-SLIC listing indicated the site known as the Former Patterson Resources had a release and was granted a "Completed - Case Closed" status on October 23, 2009. According to the CPS-SLIC listing and the online Geotracker Database in 1989, several soil and groundwater investigations were conducted on the site to characterize the historical activities of heavy equipment use, repair, and storage, as well as welding and component building at the Subject facility. According to the "No Further Action" letter, prepared by the RWQCB and dated October 23, 2009 "*From 1989 to 1992, environmental assessment activities substantiated soil impact from prior releases at concentrations up to 48,900 milligrams per kilogram (mg/kg) of TRPH and 0.635 mg/kg of tetrachloroethene (PCE). As a result of subsequent soil excavations and off-site disposal, the highest TRPH soil concentrations were reduced to 4 7 mg/kg onsite. In addition, in January 1992, soil gas investigations revealed 1, 1, 1: trichloroethane (1, 1-TCA) contamination up to concentrations of 1,045 micrograms per liter (ug/L) and for*

	PCE up to 219.8 flg/L in a small area in the southeastern portion of the site, immediately adjacent to an off-site drum storage area used by the EEMUS Manufacturing facility. From 1996 through 1997, EEMUS operated a soil vapor extraction (SVE) system, which successfully remediated the shallow impacted soil along the northern portion of the EEMUS facility. Based on these results, the Regional Board issued a "No Further Action" (NFA) letter to EEMUS dated May 30, 1997. In October ~ 2001, a subsequent soil gas survey indicated no detectable concentrations of VOCs in soil gas samples collected beneath the existing warehouse/distribution building, and low concentrations of VOCs (up to 5.8 flg/L of PCE, 4.9 flg/L of 1,1,1-TCA, and 1.8 flg/L of 1,1-DCA in the samples collected in the southern portion of the site currently occupied by an outside loading dock). The only groundwater contaminant discovered beneath the site was PCE at low concentrations up to 0.73 ug/L. " The RWQCB granted the site case closure on October 23, 2009. Based on the regulatory oversight, and positioning of the site in reference to the Subject Property these listings are not considered a REC in association with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Burnham Service Corporation, Rice Field Corporation, Orange County Container/ 14500 Valley Boulevard
Database(s):	CERS, CERS HAZ WASTE, CPS-SLIC, LOS ANGELES CO. HMS, , FINDS, EMI, HAZNET, HWTS, RCRA NONGEN/NLR
Dist./Dir./Gradient:	40 Feet/ East/ Up-gradient
Data Discussion:	Rice Field Company: The CERS listing indicated the site is registered as a "Chemical Storage Facility" and a "Hazardous Waste Generator" with a Site ID of “147705” and a CERS ID of “10285069.” The CERS listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials. The HWTS listing indicated the site is registered as a "Hazardous Waste Transfer" site. The permit was created on June 9, 20120 and is listed as "Active". The HAZNET listing indicated the following waste streams on the site: waste oil and mixed oil that was stored/bulked then transferred offsite with no recovery, for disposal or that was recovered using organic recovery. The RCRA NONGEN/ NLR listing indicated the site as a non-generator of hazardous wastes since June 9, 2010, with an EPA ID of “CAL000353161.” Burnham Service Corporation: The HWTS listing indicated the site is registered as a "Hazardous Waste Transfer" site. The permit was created on February 24, 1992, and is "Inactive" as of June 30, 1997. The CPS-SLIC listing indicated the site had a release and was granted a "Completed - Case Closed" status on July 15, 1987. No other pertinent information was provided. Orange County Container: The FINDS and EMI listings indicated the site is registered with the South Coast Air Quality Management District for air emissions with a Registry ID of "110013829063." The CERS listing indicated the site is registered as a US EPA Air Emission Inventory System (EIS) with a CERS ID of "110013829063".
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.

VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	Former Packaging Corporation, Hilltop Mini-Mart, Pactiv Corp./14505 Proctor Avenue
Database(s):	CERS, CIWQS, DEED, CPS-SLIC, HIST CORTESE, AST, RCRA-SQG
Dist./Dir./Gradient:	700 Feet/ Southeast/ Cross/Down-Gradient
Data Discussion:	The CERS listing indicated the site is registered as a "Cleanup Program" site with a CERS ID of "SL0603776483". The EMI listing indicated the site is registered with the South Coast Air Quality Management District for air emissions with a facility ID of "43046". The AST listing indicated the site previously managed an AST; however, no other pertinent information was provided. The CPS-SLIC listing indicated the site known as the former Packaging Corporation and located approximately 700 feet to the southeast and cross/downgradient of the Subject Property had a release and was granted a "Completed - Case Closed" status on August 21, 2012. According to the CPS-SLIC listing and the online Geotracker Database the site has been used for plastics manufacturing since the 1970's. Soil and groundwater assessments are complete. Vapor extraction has been used to mitigate concentrations of ethylbenzene and stryene in soil. Hillmann reviewed the most recent Phase II report dated May 8,2012 and the "No Further Action" letter from the RWQCB dated August 21, 2012. The letter stated the following, " B*ased on staffs review of the information on source removal, confirmation soil sampling after the implementation of bioventing, and acceptable risk assessment determinations for the Site, the Executive Officer of the Regional Board has determined that Pactiv Corporation has fulfilled the requirements for site assessment and soil cleanup criteria for an industrial and commercial land use scenario - the current designated zoning. The Regional Board has determined that "No Further Action"(NFA) is required with respect to the site. The NF A determination for this site is made at this time based upon the most current information/data contained in the subject file. The NFA applies only to the known chemicals of concern which have been tested during the site assessment phase of work and with the provision that the information provided to the Regional Board staff is accurate and representative of site conditions. If new contamination is encountered during future site construction or redevelopment activities, you are required to provide a verbal notification to this Regional Board immediately and submit a follow-up written report within 72-hours."* The RWQCB granted the site "Case Closure" on August 21, 2012. In May 2024 Hillmann performed a Limited Phase II Subsurface Investigation in order to address concerns of potential contamination on the Subject Property from nearby sources. The investigation included twenty-one (21) soil borings and installing a total of twenty (20) soil gas probes on the Subject Property. Hillmann reported the following conclusions: *"The results from soil sampling indicated no detectable concentrations of petroleum hydrocarbons and no heavy metals concentrations greater than current residential or commercial screening levels. The results from PFAS testing beneath the burned former building indicate many of these compounds were detected, but none at significant concentrations. The results from soil gas sampling indicate very low concentrations of VOC in some samples, none greater than current commercial screening levels."* *"Based on these results, no additional sampling is recommended for the site."*

	Based on the available database details and the findings of the limited subsurface investigation these listings are not considered to be a REC in connection with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Name/Address:	HEXCEL - MCI SITE, Hexcel Corp. Advance Products Div./ 140 N. Orange Avenue
Database(s):	CERS, CPS-SLIC, FINDS, ECHO, HIST UST, RCRA-SQG
Dist./Dir./Gradient:	305 Feet/ Northwest/ Cross/ Up-gradient
Data Discussion:	The CERS listing indicated the site is registered as a "Cleanup Program" site with a CERS ID of "SL603792633." The FINDS and ECHO listings indicate that the site is listed on the US EPA TRIS and RCRA databases with a Registry ID of "110002143216". The EMI listing indicated the site is registered with the South Coast Air Quality Management District for air emissions with a facility ID of "43046". The HIST UST listing indicated the site previously managed a 1000-gallon concrete UST that held liquid wastes from metal working. The tank was installed in 1984. The CPS-SLIC listing indicated the site had a release and was granted a "Completed - Case Closed" status on May 2, 2013. According to the CPS-SLIC listing and the online Geotracker Database in 1986, several soil and groundwater investigations were conducted on the site to characterize the historical activities of metal fabrication, heavy equipment use, repair, and storage, as well as the use of PCE as a degreaser in industrial operations. According to the "No Further Action" letter, prepared by the RWQCB and dated May 1, 2013 "*Soil Vapor Extraction (SVE) was implemented at the Site between 1989 and 2001 to remediate the impacted soil; air sparging was used to remediate impacted groundwater beneath the Site during 2000 and 2001. Hexcel Corporation entered into the "Acorn Consent Decree" in December 2002. The Consent Decree resolved Hexcel's Superfund liability with regard to the Puente Valley Operable Unit (PVOU) of the San Gabriel Valley Groundwater Basin. An interim remedy for PVOU groundwater is overseen by the US Environmental Protection Agency (USEPA)...Based on the staff's review of the information on source removal, confirmation soil sampling, and acceptable risk assessment determinations for the Subject Property, Regional Board staff has determined that the subsurface contamination at the subject property has been cleaned up to standards typically acceptable for industrial and commercial land use. Therefore, a "No Further Requirement" (NFR) status for soil only is granted to the property."* The RWQCB granted the site "Case Closure" on May 2, 2013. Based on the regulatory oversight, and positioning of the site in reference to the Subject Property and 2023 Limited Subsurface Investigation findings, these listings are not considered a REC in association with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Surrounding Area Findings

The following is a discussion of non-adjoining sites identified as located within the ASTM specified search distance surrounding the Subject Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Subject Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Subject Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status.

Federal - NPL

ASTM Search Distance:	1-mile	Number of listings within ASTM Search Distance:	2
Notable Listing:	San Gabriel Valley (Area 4)/ Stimson Avenue & Old Valley Boulevard		
Dist/Dir/Gradient:	TP		
Details:	Puente Valley is one (1) of eight (8) operable units (OUs) identified by the U.S. Environmental Protection Agency (USEPA) for the San Gabriel Valley Superfund Site and is also known as San Gabriel Valley Superfund Site Area 4. The Puente Valley OU includes most of the City of Industry, portions of the City of La Puente, and portions of unincorporated Los Angeles County. Groundwater and soil are contaminated with various volatile organic compounds (VOCs, primarily trichloroethene (TCE) and tetrachloroethene (PCE)), 1,4-dioxane, perchlorate, and hexavalent chromium. Groundwater contamination occurs primarily in the shallow and intermediate groundwater zones of the aquifer, with most of the contaminant mass found in the shallow groundwater zone. VOC concentrations exceed drinking water standards in both the shallow and intermediate zones. The USEPA issued the Interim Record of Decision (IROD) for the Puente Valley OU in September 1998 to address VOC-contaminated groundwater. In 2005 the USEPA issued an Explanation of Significant Differences to the IROD to address 1,4-dioxane and perchlorate. The interim remedy includes extraction, containment, and treatment of contaminated groundwater in the shallow and intermediate zones at the mouth of Puente Valley. The remedy also includes wells for monitoring groundwater in the shallow, intermediate, and deep zones at mid-valley and the mouth of the valley to ensure that the remedy meets performance criteria set in the IROD. While multiple individual facilities may have contributed to contamination in the area, there are two (2) work parties responsible for implementing the cleanup plan under USEPA oversight: Carrier Corporation (and its parent company, United Technologies Corporation) and Northrop Grumman Corporation. Carrier Corporation is required to implement groundwater cleanup actions for the shallow zone north of Puente Creek under a consent decree. Northrop Grumman is required to implement groundwater cleanup actions for the intermediate zone and		

	for the shallow zone south of Puente Creek under a consent decree and Unilateral Administrative Order, respectively. The total cost of the remedy is estimated to be $75 million. Three (3) ground water extraction and treatment systems are planned to protect the water supply in the mouth of Puente Valley and to prevent further contaminant movement. Completion of the systems was delayed identifying and evaluate additional options for discharge and conservation of treated water, and to design treatment systems capable of treating the identified contaminants. For the cleanup project, known as the "Shallow Zone-North" remedy, construction of a network of ten (10) groundwater extraction wells was completed in 2007. The project will clean up contaminated shallow groundwater north of Puente Creek. Construction of the treatment plant will begin after agreements are reached for discharge of the treated water. Design and construction of the project known as the "Intermediate Zone" remedy, should be completed by 2019. This project will clean up deeper, less contaminated groundwater in the mouth of Puente Valley. Six (6) extraction wells have already been constructed for the Intermediate Zone Remedy, and one (1) or two (2) more may also be constructed. The extracted water will be treated using several technologies to address all the contaminants of concern. Granular activated carbon will be used to treat for volatile organic contaminants, advance oxidation will be used to treat 1,4-dioxane, ion exchange will be used to treat for perchlorate and reverse osmosis will be used to inorganics to meet drinking water standards. The "Shallow Zone South" Remedy will address groundwater contamination in the shallow zone south of Puente Creek. Based on a review of groundwater quality data indicated by a 2017 monitoring report for Puente Valley Operable Unit-Shallow Zone North Remedy, monitoring wells installed within the shallow groundwater zone on adjoining properties to the southeast and northwest (MW-13 and MW-14) indicated zero to minimal concentrations of VOCs below MCLs, and depths to groundwater of approximately 50 to >60 feet below grade.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

State/Tribal - Superfund / Hazardous Waste Sites

ASTM Search Distance:	1-mile	Number of listings within ASTM Search Distance:	9
Notable Listing:	Exide Technologies/ GNB Battery/ 14500 Nelson Avenue		
Dist/Dir/Gradient:	1142 Feet/ Northeast/ Up-gradient		
Details:	The ENVIROSTOR listing indicated the site is currently an "Evaluation" site but is not listed on the NPL list. The site is listed as "Refer:1248 Local Agency" as of January 25, 2006. No other pertinent information was provided.		
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.		
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.		

State/Tribal - Landfill / Solid Waste Disposal

ASTM Search Distance:	1/2-mile	Number of listings within ASTM Search Distance:	4
Notable Listing:	Arrow Disposal Services Inc./ 14245 Proctor Avenue		
Dist/Dir/Gradient:	1127 Feet/ West/ Down-gradient		
Details:	The SWF/LF listing indicated the site is an "Active Waste Hauler" with Facility ID/ SWIS Number “19-AS-0087”. No other pertinent information was provided. Based on the absence of reported releases or violations, this listing is not considered to be a REC in connection with the Property.		
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.		
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.		

State/Tribal - Leaking Storage Tanks

ASTM Search Distance:	1/2-mile	Number of listings within ASTM Search Distance:	12
Notable Listing:	Hansen Foods/ 14380 Nelson Avenue		
Dist/Dir/Gradient:	304 Feet/ Northeast/ Up-gradient		
Details:	The LUST listing indicated the site reported a release of solvents on April 11, 1990, during UST removal operations. The LUST was given a "Completed - Case Closed" status on September 17, 1997. Hillmann reviewed the "No Further Requirements" letter prepared by the RWQCB and dated, June 29, 1998. According to the letter the site previously managed five (5) USTs, unlined settling pits, surface drainage channels, and a three-stage clarifier that were decommissioned and removed from the site on April 11, 1990. The RWQCB letter states the following "Diesel, volatile organic compounds (VOCs), and hydrochloric/ lead acid-impacted soil were excavated and properly disposed of off-site between 1990 and 1994. Discovery of peak concentrations in the soil of 1, 1-DCE (17 ~glkg) and I, I, 1-TCA (670 ~glkg), where VOCs were stored in drums along the		

	northeastern property boundary, was promptly remediated to non-detect levels through soil vapor extraction technology. The data did not indicate a track of contaminants from the vadose zone to groundwater. The groundwater monitoring results for the December 1997 sampling period show non-detects to low concentrations of VOCs. The highest concentration detected was 43 ~giL of TCE, a chemical reportedly not used onsite based on historical records. This chemical may have emanated from off-site sources. Based on these findings, Regional Board staff concludes that the work performed to date at your facility adequately has fulfilled our assessment and remediation requirements. As a result, no further requirements need to be met with respect to the San Gabriel Superfund Cleanup Program. Please maintain your groundwater monitoring wells in operable condition to allow for future use in relation to regional sampling and/or cleanup activities." Based on regulatory oversight, this listing is not suspected to be a REC in connection with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the reviewed data, a VEC is not suspected.

Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Subject Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Subject Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
www.realquest.com	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
CA DTSC Envirostor database (www.envirostor.dtsc.ca.gov/public/)	Online search	Hillmann reviewed available on-line records pertaining to the Property. Details of the Puente Valley/San Gabriel Valley NPL case including a 2017 shallow zone groundwater monitoring report, were reviewed. No information indicative of a REC was identified.
CA GeoTracker database (geotracker.waterboards.ca.gov/)	Online search	Hillmann reviewed available on-line records pertaining to the Property. The following pertinent records and/or information was obtained: Hillmann reviewed the online GeoTracker database created by the RWQCB. The database showed three (3) separate cleanup programs that were completed and given a "Case Closure" on the Subject Property. Duraware Plastics Co. Inc. (RB Case #: 102.0066), Elite Salon Service (RB Case#: 102.0057), and Victory Coating Inc. (RB Case#: 102.0086). The cases are discussed further above in section 4.1 of this report.
EPA MyProperty	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
South Coast Air Quality Management District (SCAQMD)	FOI request	A response was received providing the following pertinent records: Hillmann reviewed the SCQAMD inspection reports for multiple addresses on the Subject Property. The inspection reports stated that the facility addressed as Victory Coating previously maintained a silk screen printing unit that utilized organic solvents. Additionally, the facility addressed as C & H Office Equipment previously managed a spray paint and solvent booth that utilized organic solvents. As of 1994 all of the equipment is listed as inactive, and no violations were noted.

Source	Type of Request	Outcome
Los Angeles Co. Fire Dept./CUPA	FOI request	A response was received providing the following pertinent records: Hillmann reviewed several fire inspection reports for multiple addresses on the Subject Property beginning in 2015. The reports noted several violations of tenants on the Subject Property for failures to maintain the Best Management Practices when handling, storing, or using hazardous materials. No spills were reported within the fire inspection reports.

4.2 Historical Research

Historical records have been compiled and analyzed for historical property information and developing a history of previous uses of the Subject Property, adjoining properties and surrounding area. These records were reviewed for the purpose of identifying the likelihood of past uses having led to RECs in connection with the Subject Property.

The historical record sources listed below have been sought with the objective to document past uses of the Subject Property from the present back to the Subject Property's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural use, placement of fill dirt and other uses that do not involve structures. Hillmann has sought to review historical records in minimum intervals of five years.

Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historical fire insurance maps for the Subject Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Subject Property	Adjoining Properties
None	None	None

A copy of the Certified Sanborn Map Report is attached in Appendix E.

City Directories

An EDR City Directory Abstract report was reviewed for data of prior occupants of the Subject Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Subject Property.

Subject Property Use(s) / Occupant(s)	Years
Various light industrial and commercial occupants. Notable listings are details	1982 - 2020
Durawear Plastics (14412 Valley)	1982, 1987
Printers Diversified Inc	1982, 1987
Glossit Mfg (14426 Valley)	1982

Subject Property Use(s) / Occupant(s)	Years
Color scan/Plate Ready Co (14420 Valley)	1982
C L W Plastic Bag Mfg (14422 Valley)	1987
D B W Data Machine Srvc/Printer Term Srvc (110 S. Sixth)	1987
Industry Color Graphics (138 S. Sixth)	1987
Tri Star Colr Sprth (122 S. Sixth)	1987, 1992
Benson Prnting Co. (132 S. Sixth)	1992, 1995
Victory Coatings (190 S. Sixth)	1992, 1995
Graphic Service (132 S. Sixth)	1992, 1995
American Speedy Printing Center (14426 Valley)	1992, 1995
Wonderful World Prnt (14414 Valley)	1992
Alpha & Omega Printing (126 S. Sixth)	2010
VC Screenprinting Inc. (190 S. Sixth)	2014
Central Truck & Oil Supply (14426 Valley)	2014

The EDR City Directory Abstract report was also reviewed for listings of prior occupants of the adjoining properties. The following is a generalized summary of the findings of city directory research for past occupants of the adjoining properties:

Adjoining Property Use(s) / Occupant(s)	Years
Mix of residential and commercial occupants. Commercial occupants included gasoline service stations.	1961 - 1976
Mix of light industrial and commercial.	1982 - 2020

A copy of the EDR City Directory report is attached in Appendix E.

Historical Topographic Maps

Historical topographic maps of the Property and vicinity obtained from an EDR Historical Topographic Map report (as attached in Appendix E) have been reviewed. The following interpretation of land usage was made by review of the maps:

Year(s)	Subject Property	Adjoining Properties
1894, 1897, 1898, 1904	The Subject Property is depicted as undeveloped land.	The adjoining properties to the east, west, and south are all depicted as undeveloped land. North of the Subject Property the Southern Pacific Railroad is mapped.
1927	The Subject Property is depicted as undeveloped land.	The adjoining properties to the east and south are all depicted as undeveloped land. West of the Subject Property a structure is depicted. North of the Subject Property an improved road is

Year(s)	Subject Property	Adjoining Properties
		depicted as Pomona Boulevard. Further north of the Subject Property, the Southern Pacific Railroad is mapped.
1953	The Subject Property is depicted with a structure located on the northwestern corner of the property. The remaining area is depicted as undeveloped land.	The adjoining properties to the east and south are all depicted as undeveloped land. West of the Subject Property a structure is depicted. North of the Subject Property an improved road is depicted as Valley Boulevard. Further north of the Subject Property, the Southern Pacific Railroad is mapped.
1966	The Subject Property is depicted as undeveloped land.	The adjoining properties to the north, west, and east of the Subject Property are all depicted with several structures. South of the Subject Property is depicted as undeveloped land.
1972	The Subject Property is depicted as undeveloped land.	The surrounding properties are depicted with several structures.
1981	The Subject Property is depicted as developed with seven (7) structures.	The surrounding properties are depicted with several structures.
2012, 2015, 2018	No improvements or structures are depicted on this topographic map.	No improvements or structures are depicted on this topographic map.

If obtained, copies of historical aerial photographs have been included in Appendix E.

Historical Aerial Photographs

Historical aerial photographs of the Property and vicinity obtained from an EDR Aerial Photo Decade Package report, as attached in Appendix E, were reviewed. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Subject Property	Adjoining Properties
1928	The Subject Property appears to be agricultural land developed as furrowed fields. No structures are noted on the Subject Property.	The adjoining properties appear to be agricultural land. North of the Subject Property there appears to be a railway.
1938, 1948, 1952	The Subject Property appears to be agricultural land developed as furrowed fields. No structures are noted on the Subject Property.	The adjoining properties appear to be agricultural land. North of the Subject Property there appears to be a railway. The adjoining property to the west of the Subject Property appears to have several structures and various items of equipment on the premises.

Year(s)	Subject Property	Adjoining Properties
1964	The Subject Property appears to be agricultural land developed as furrowed fields. There appears to be a small structure located on the northeastern corner of the Subject Property.	The adjoining properties appear to be agricultural land. North of the Subject Property there appears to be a railway. The adjoining property to the west of the Subject Property appears to have several structures and various items of equipment on the premises.
1972,1977	The Subject Property appears to be under development. There is a structure located on the northeastern portion of the Subject Property along with several items that appear to be equipment	South of the Subject Property appears to be agricultural land. East and north of the Subject Property there appears to be a light industrial area under development. The adjoining parcel west of the Subject Property appears to have several structures and unrecognizable items and equipment throughout the premises.
1981, 1983	The Subject Property appears developed with several of the present-day commercial structures on the property, as well as the asphalt-paved parking areas.	The surrounding properties to the south, east, and north all appear to have large light industrial structures. The adjoining parcel west of the Subject Property appears to have several structures and unrecognizable items and equipment throughout the premises.
1990, 2005, 2009, 2012, 2016, 2020	The Subject Property appears developed with several of the present-day commercial structures on the property, as well as the asphalt-paved parking areas.	The surrounding properties all appear to have light industrial structures on the premises.

If obtained, copies of historical aerial photographs have been included in Appendix E.

EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.1 and attached in Appendix D, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Subject Property. These databases include EDR Hist Cleaner – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Hist Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a proprietary database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings	Adjoining/Off-site Listings
EDR Hist Cleaner: (on-site/adjoining only)	None	None

EDR Database	On-site Listings	Adjoining/Off-site Listings
EDR Hist Auto: (on-site/adjoining only)	None	None
EDR MGP: (1-mile distance)	None	None

Petroleum/Natural Gas Well Review

No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.The historical record sources and the California Geologic Energy Management Division (CalGEM) online mapping application were reviewed for records of petroleum and/or natural gas wells at the Subject Property.

Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/ Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports:	Prior environmental reports reviewed as part of this assessment, as detailed in Section 3.1, did not provide additional pertinent detail of historical site usage.
Site Observations:	Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance.
Other Sources:	No additional pertinent historical data was obtained.

Summary of Identified Historical Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Subject Property:

Date Range	Subject Property Use(s)
1884 to 1927	Undeveloped Land
1928 to 1964	Agricultural furrowed fields
1972 to 1977	Vacant land with a structure
1981 to Present	Mix of commercial and light industrial warehouses/offices

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Date Range	Adjoining Property Use(s)
1894 to 1927	Agricultural
1938 to 1964	Mix of agricultural land and commercial/industrial properties

Date Range	Adjoining Property Use(s)
1972 to present	Mix of commercial and light industrial properties

Historical Records Data Failure

The ASTM E1527-21 standard defines data failure as failure to achieve the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historical use/conditions were sought in intervals no less than approximately five years, unless the Subject Property conditions appear unchanged over a longer interval. In encountered, data failure and its significance as a data gap is discussed below:

Objective	Met?	Detail	Significant?
First developed use/ date determined?	No	The earliest documented use of the Property was agricultural crop fields, circa 1928.	No
Record sources at 5-year intervals back to 1940 or first developed use?	No	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Summary of Identified Past Uses of this section.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

Historical Uses REC Discussion

The Subject Property has been utilized by multiple tenants for various light industrial operations since approximately 1977. Historical occupants included several printing/ graphics businesses, which are considered potentially high risk for environmental impacts. Other occupants included light manufacturing operations, machine servicing businesses, auto painting supplies, and oil supplies.

Hillmann performed a Limited Phase II Subsurface Investigation in May 2023 to address concerns of potential contamination on the Subject Property from historical uses and nearby offsite sources. Hillmann proposed a Limited Phase II Subsurface assessment that included twenty-one (21) soil borings and twenty (20) soil gas probes on the Subject Property. The report indicated the following conclusions:

> *"The results from soil sampling indicated no detectable concentrations of petroleum hydrocarbons and no heavy metals concentrations greater than current residential or commercial screening levels. The results from PFAS testing beneath the burned former building indicate many of these compounds were detected, but none at significant*

concentrations. The results from soil gas sampling indicate very low concentrations of VOC in some samples, none greater than current commercial screening levels."

"Based on these results, no additional sampling is recommended for the site."

Based on the findings of the 2023 Limited Subsurface Investigation, the historical uses of the Subject Property are not considered to be a REC in association with the Subject Property.

The Property was historically utilized for agricultural purposes from 1928 to 1964. Given the subsequent site redevelopment, the potential for concentrated pesticides in shallow soils is considered low; therefore, historical agricultural use is not considered a REC.

5.0 INTERVIEWS

5.1 Interviews with Owners, Operators and Occupants

Property Owner

Property Owner	Contact Name	Affiliation	Interview Type	Date
Richard C. Hunsaker		Owner	Questionnaire	
Attempts were made via telephone and email (environmental questionnaire); however, no response was received.				

Key Site Manager/Operator

Name	Company/Title	Yrs @ Site	Interview Type	Date
None			In person	
A knowledgeable site representative was not identified or made available for interview.				

Occupant(s)

Name	Company/Title	Yrs @ Site	Interview Type	Date
(none)				
No occupant interviews were conducted.				

Prior Owners/Operators/Occupant(s)

Name	Company/Title	Yrs @ Site	Interview Type	Date
(none)				
No interviews of prior owners, operators or occupants were conducted.				

Neighboring Property Owner(s)/Occupant(s)

Name	Company/Title	Yrs @ Site	Interview Type	Date
(none)				
The Subject Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.				

5.2 Interviews with State and/or Local Government Officials

State and/or local governmental officials have been interviewed to obtain information of potential RECs in connection with the Subject Property. Many government agencies and their officials require submittal of written request for records in order to respond. The details in Section 4.1 list the various state and local government agencies contacted as part of this assessment, and the outcome of each inquiry. In addition, the details of regulatory database research in Section 4.1 may have included detail of interviews with officials pertinent to government records review and identification of RECs.

Additional interview of government officials not previously detailed in Sections 4.1 are discussed below, if applicable.

Name	Agency Name/Title	Interview Type
(none)		
Interview Outcome/Findings:		
No additional local/state government officials were interviewed.		

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted to collect information and make observations to help identify RECs in connection with the Subject Property. This included visual and/or physical observations of the Subject Property and its structures, adjoining properties as viewed from the Subject Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares and accessed Subject Property structures. Subject property building exteriors were observed at ground level, unless otherwise indicated. Where applicable, building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Kofi Bonner
Property Escort/ Company:	Unescorted/
Inspection Date:	September 11, 2024
Weather Conditions:	87° F / Sunny

Significant Inaccessible Areas

The following significant areas of the Property were not accessed at the time of the site visit:

- Several of the tenant's units were unable to be accessed during site reconnaissance. The following units were not accessed:

East Valley Boulevard	South 6th Avenue
- Unit 14410	- Unit 100
- Unit 14412	- Unit 102
- Unit 14414	- Unit 104
- Unit 14416	- Unit 108
- Unit 14422	- Unit 112
- Unit 14424	- Unit 114
- Unit 14428	- Unit 116
- Unit 14430	- Unit 118
- Unit 14436	- Unit 172
	- Unit 178
	- Unit 156
	- Unit 160
	- Unit 138
	- Unit 136
	- Unit 134
	- Unit 132
	- Unit 130
	- Unit 128
	- Unit 126

	- Unit 124
	- Unit 122
	- Unit 120

Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

6.2 General Site Setting

Site and Vicinity Characteristics

Abutting Roadways:	Valley Boulevard to the northeast; South 6th Avenue to the northwest
Current Property Use:	Commercial/ lLight Industrial
Evidence of Past Property Uses:	None
Evidence of Past Adjoining Property Uses:	None
Surrounding Area Uses:	Light industrial warehouses

Current Adjoining Property Uses

Dir	Street Address	Description
N	240 North Orange Avenue	Tropicana Products Inc. - Naked Juice Co.
E	14500 Valley Boulevard	Rice Field Corporation
SE	14505 Proctor Avenue	NFI Cal Cartage
S	102 -190 South 6th Avenue	Various light industrial operations
SW	207 S 6th Avenue	Dvenegas Designs
W	14350 Valley Boulevard	Dukes Restaurant

Topographic Characteristics

Terrain:	Flat
Direction of Downward Slope:	Southwest
On-site Water Bodies:	None
Other Significant Features:	None

General Description of Structures and Improvements

Buildings:	Six
Approx. Building Size:	28,800 SF (Building A), 17,280 SF(Building B), 19,200 SF (Building C), 12,800 SF (Fmr. Building D), 8,640 SF (Building E), 8,640 SF (Building F), 12,800 SF (Building G)
Approx. Year Built:	1977
Number of Stories:	One
Subgrade Levels:	None
Exterior Ground Cover:	Asphalt Parking Lot, Landscaping,
Ancillary Structures:	Concrete pad of former building
Sources of Heating and Cooling:	Electrical heating and cooling systems
Potable Water/Sewage Disposal:	Municipal utility connections

6.3 Site Features and Conditions

Storage/Usage of Hazardous Substances and Petroleum Products

The following approximate number of containers, and general description of their contents, capacity, container types and storage conditions, were observed to be stored and/or used at the Subject Property:

Occupant	Substance	Qty/Container Type	Storage Conditions
3M MCS Warranty	Multicolored Ink for printers	Several cases of ink	Stored on shelves within office area.
Sage Wedding Albums	All-purpose Thinner	2/ 1-gallon containers	Stored on floor of office workspace.
Sage Wedding Albums	Petroleum	1 portable no-spill petroleum container	Stored on top of generator in warehouse area.
Industry Hoses & Fasteners	Hydraulic oil	Approx.15/ 5-gallon containers	Stored on ground near entrance of office area.
Industry Hoses & Fasteners	Brake fluid/ degreasing fluid	Various containers and sizes	Stored within a hazardous materials chest within warehouse area.
Industry Hoses & Fasteners	Liquid Petroleum Gas	Approx. 2/ 8-gallon metal drums	Stored on the ground near the hangar doorway. Attached to forklift equipment.
GM Auto Paint Supplies	Spray Paint	50+ / 8-fl.oz containers	Stored on shelves within office area.
GM Auto Paint Supplies	Lacquer Thinner	Approx. 10/ 5-gallon containers	Stored on concrete underneath storage shelves.

Occupant	Substance	Qty/Container Type	Storage Conditions
GM Auto Paint Supplies	Various Paints	50+/ 32 -fl.oz containers	Stored/In-use on shelves in the back area of warehouse.
Bathplanet	Silicone Sealent	Approx. 30/ Silicone Sealant tubes	Store on shelves within warehouse area.

Bulk Petroleum/Hazardous Material Storage Tanks

If identified or suspected, storage tanks for bulk petroleum or hazardous material storage are described as follows:

AST/UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
None						No storage tanks were identified.

Strong, Pungent or Noxious Odors and their Sources

No strong, pungent or noxious odors were noted at the Subject Property.

Standing Surface Water/Pools & Sumps

No standing water, pools or sumps containing liquids likely to be hazardous substances or petroleum products were noted.

Drums, Totes and Intermediate Bulk Containers

No hazardous substance or petroleum product drums were noted.

Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted.

PCBs in Oil Filled Electrical/Hydraulic Equipment

The following oil-filled electrical/hydraulic equipment was identified at the Property:

During site reconnaissance Hillmann observed two (2) utility owned oil-filled pad-mounted transformers on the Subject Property. The transformers appeared to be in good condition with no staining observed in their respective proximities.

It is noted that identification of PCB containing fluorescent light ballasts, caulk, paint, or other materials located inside and are part of the building or structure is outside of the scope of the ASTM E1527-21 standard and this assessment.

Stains or Corrosion on Floors, Walls or Ceilings

No stains or corrosion of floors, walls or ceilings, excluding any staining from water, were noted.

Drains and Sumps

No floor drains or sumps were noted at the Subject Property.

Pits/Ponds/Lagoons

No pits, ponds or lagoons were identified in connection with waste treatment or disposal.

Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed.

On-Site Solid Waste Disposal/Fill Material

The following evidence of on-site disposal of trash, construction debris, demolition debris or other solid waste was observed:

Consumer debris was noted in front of the 130 S t6th Avenue building. The debris appeared to be a mix of packing materials and consumer debris. No staining or spills were observed in proximity to the debris.

The Subject Property has several dumpsters that are serviced by Valley Vista Services Waste Disposal and Recycling services.

Waste Water

Sanitary sewage generated at the Subject Property is discharged via a connection to the local public sewer system.

Storm water runoff at the Subject Property is discharged via roof drains into the municipal sewer system.

No additional wastewater discharges were identified at the Subject Property.

Septic Systems/Cesspools

No septic systems or cesspools were identified at the Subject Property.

Wells

No wells (including any dry wells, irrigation wells, injection wells, abandoned wells, or other wells) were identified at the Subject Property.

Railroad Spurs

No railroad spurs were identified on the Subject Property.

An offsite rail spur, apparently inactive, was observed adjoining the southeast side of the Subject Property.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as “Non-Scope Considerations”). The ASTM E1527-21 standard defines the term business environmental risk (BER) as, “a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.”

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Subject Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Suspected ACM noted within the accessed building areas included vinyl sheet flooring, floor tiles and associated mastic, mirror mastic, carpeting and associated mastic, roofing systems, penetration mastics, and thermal systems insulation.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

No residential buildings built prior to 1978 were present at the Property.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Subject Property is located in an area classified as Zone 2 or 'moderate risk'. area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

The contracted scope of work included a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth.

No evidence of significant problems with moisture intrusion or mold/microbial growth was noted at the Subject Property.

7.5 NWI Mapped Wetlands

The National Wetlands Inventory online Wetland Mapper was reviewed for indications of jurisdictional wetlands at or immediately adjoining the Subject Property. The scope of work for this assessment excluded a visual determination of regulated wetlands at the Subject Property. It is emphasized that, regardless of the data reviewed via the NWI Wetlands Mapper, a field delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Subject Property.

A review of NWI Wetlands Mapper did not indicate regulated wetland areas on the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data. Potable water service at the Property is provided by a utility connection with the San Gabriel Valley Water Company.

Hillmann Project Number: C3-9529

Dear Mr. Doherty:

Hillmann Consulting, LLC, is pleased to provide this Limited Phase II Subsurface Investigation Report prepared for the above referenced property.

This report is for the exclusive use of the entities named on the front cover, its affiliates, designates and assignees, rating agencies, prospective bond holders and bond holders, and no other party shall have any right to rely on any service provided by Hillmann Consulting, LLC, without prior written consent.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact the Project Manager at 714-634-9500.

Very Truly Yours,
Hillmann Consulting, LLC

Stephen Bartlett
Senior Project Manager

1.0 INTRODUCTION / BACKGROUND

Hillmann Consulting, LLC (Hillmann) conducted a Limited Phase II Subsurface Investigation at the commercial property, located at 100-190 S. Sixth Ave. and 14404-14436 E. Valley Blvd., City of Industry/ La Puente, CA. The property occupies about 6.5 acres located on the southern corner of East Valley Boulevard and South Sixth Avenue in a primarily industrial area of the City of Industry (**Figure 1)**. The property is developed with six (6) industrial buildings built around 1977 and a seventh former industrial building that recently burned and has since been demolished and removed (Bldg. Nos 140 and 148). The layout of the site is depicted on **Figure 2**.

In April 2023, Hillmann conducted a Phase I Environmental Site Assessment at the site and found that the property has been utilized by multiple tenants for various light industrial operations since approximately 1977. Historical occupants included several printing/graphics businesses, which are considered potentially high risk for environmental impacts. Other occupants included light manufacturing operations, machine servicing businesses, warehouse storage, auto painting supplies, and oil supplies. Collectively, the historical light industrial operations were identified as a recognized environmental condition that justified preliminary subsurface investigation. In addition, an adjoining property to the south (14505 Proctor Avenue) formerly managed an above ground storage tank farm that resulted in a known release of VOC to the subsurface. Vapor extraction activities were conducted at that site from 1996 to 2010 and the site was closed with a land use covenant in 2012 by the Los Angeles Regional Water Quality Control Board.

Based on these results, Hillmann conducted a Limited Phase II Subsurface Investigation at the property that included soil and soil gas sampling in targeted locations. The current investigation is an independent assessment of the site that was constrained by time and cost factors as part of a self-directed effort. The investigation included the installation of twenty-one (21) soil borings, twenty (20) of them completed as soil gas sampling probes in targeted areas of the site including suites with a documented history of conducting printing operations. This investigation was not intended to meet the more stringent requirements of a regulatory driven assessment.

2.0 GEOLOGY/HYDROGEOLOGY

During drilling, a California Professional Geologist described the soil using the Unified Soil Classification System. Based on the drilling logs, the sediments beneath the site consist primarily of dense silty sand from near surface to about three feet below grade, underlain by dense silty clay to 6 feet below grade, the maximum depth of exploration. Groundwater was not encountered during drilling to 6 feet below grade and based on data presented on the GeoTracker website, groundwater lies at about 55 feet below grade at a nearby site. Descriptions of the sediments encountered are presented in the drilling logs (**Appendix C**).

3.0 SITE INVESTIGATION

On May 11th and May 12th, 2023, Hillmann installed twenty-one (21) soil borings (B1-B21) for a total of twenty (20) soil gas probes in targeted areas of the site identified as formerly or

currently maintaining suspect operations, including printing and other light industrial use. These included tenant suites located at 14414, 14420 and 14426 East Valley Boulevard and 110, 122, 126, 132, 138, and 190 South Sixth Avenue. Two (2) of the borings (B19 and B20) were installed at the edge of the footprint of the burned former structure at 140-148 South Sixth Avenue. The borings were installed to total depths ranging from 2.5 to 6 feet below grade using hand auger tools. Each boring (except for B19) was completed as a soil gas sampling probe (SG1-SG21) with sample tips installed at maximum depth. A twentieth soil gas probe (SG21) was installed near the southeast corner of the site nearest to the off-site impacted property that was closed with restrictions. The boring and probe locations are shown on **Figure 2**. *(Note: there is no probe SG19 and no soil sample from SG21.)*

During drilling, a California Professional Geologist described the soil using the Unified Soil Classification System. Soil samples were obtained at select depths in each boring and were preserved for analysis in laboratory glass jars that were sealed with Teflon tape and threaded caps and stored on ice pending delivery to the laboratory. Select samples were analyzed for TPHcc (including full carbon chain analysis through C44) by EPA Method 8015M and heavy metals by EPA Method 6010B. The soil samples were analyzed by A&R Laboratories of Ontario, California. In addition, the soil samples from borings B19 and B20, installed beneath the burned building edge, were tested for Per- and Polyfluoroalkyl Substances (PFAS) by EPA Method 537. These samples were analyzed by Sun Star Laboratories, Inc.

The soil gas sampling probes consist of plastic micro-porous vapor implants that are approximately 2 inches long with a 0.5-inch outside diameter, connected to 0.25-inch outside diameter nylaflow tubing that extended above the surface. The annulus around each vapor implant was backfilled with approximately 1 foot of screen-washed #3 sand. 6 inches of dry bentonite was placed immediately above the sand pack, followed by one-foot of bentonite that was hydrated during placement. The probes were further sealed with hydrated bentonite and neat cement to grade to provide a secure borehole seal. The probes were finished with gas-tight fittings at the surface pending vapor purging and sampling.

The probes were allowed to equilibrate for at least 48 hours before purging and sampling. The probes were sampled using an on-site mobile laboratory service. Prior to vapor sampling, shut-in and leak tests were conducted on the probes.

After purging three (3) volumes through the system, vapor samples were collected from the probes between May 18-23, 2023 by technicians from A&R Laboratories of Ontario, California. The soil gas samples were tested for VOC using EPA Method 8260B by A&R Laboratories of Ontario, California.

3.1 Laboratory Results

Results from soil sampling indicated none of the samples had detectable concentrations of petroleum hydrocarbons or heavy metal concentrations exceeding conservative residential or commercial screening levels. The results from PFAS testing indicated sample B19-1.5 had very low concentrations of some PFAS compounds, none approaching EPA Regional Screening Levels for residential or commercial settings. The soil sampling results are summarized in

Table 1, and in **Table 1A** (heavy metals). The laboratory report from soil sampling is included in **Appendix B**.

Results from soil gas sampling indicated ten (10) of the twenty (20) samples had detectable concentrations of VOC. Five VOC compounds (toluene, ethylbenzene, xylenes, 1,1,1 trichloroethane (1,1,1 TCA), and tetrachloroethene (PCE)), were detected in low concentrations. No other VOC was detected in any of the samples. The detected concentrations were compared to the Regional Screening Levels (RSLs) for soil gas which are based on human health risk factors for residential and commercial settings and are commonly used as screening tools. The screening criteria uses defined indoor air concentrations based on human health risk factors that are modified using the recently adopted attenuation factor provided by DTSC (0.03). Results indicate none of the detected concentrations exceed these conservative commercial screening levels. These results are summarized in **Table 2**. The laboratory reports from soil gas sampling are included in **Appendix B**.

4.0 CONCLUSIONS AND RECOMMENDATIONS

The subject site is a light industrial property with multiple buildings constructed in 1977 that are divided into tenant suites, some of which historically conducted printing or other environmentally sensitive operations. In addition, the site lies near a property that was impacted by subsurface VOC contamination which was treated using vapor extraction over a number of years and was ultimately closed with a deed restriction. Based on these results, preliminary subsurface investigation in targeted locations was recommended.

In May 2023, Hillmann conducted an investigation that included the installation of twenty-one (21) shallow soil borings where soil samples were laboratory analyzed, and twenty (20) of these locations were completed as soil gas sampling probes. The twentieth soil gas probe (SG21) was installed along the southern property line to gauge possible impacts from the known off-site contamination. The results from soil sampling indicated no detectable concentrations of petroleum hydrocarbons and no heavy metals concentrations greater than current residential or commercial screening levels. The results from PFAS testing beneath the burned former building indicate many of these compounds were detected, but none at significant concentrations. The results from soil gas sampling indicate very low concentrations of VOC in some samples, none greater than current commercial screening levels.

Based on these results, no additional sampling is recommended for the site.

5.0 LIMITATIONS

This Subsurface Investigation was performed in accordance with generally and currently accepted engineering practices and principles; however, the procedures and methodologies used in this investigation are not intended to meet all specific regulatory guidelines as this work was completed as a self-directed effort. Although the data in this report is indicative of subsurface conditions in areas investigated, no further conclusions regarding the absence or presence of subsurface contamination in other areas of the site should be construed or inferred other than those expressly stated in this report. The conclusions made are based on information

obtained from field observations, independent laboratory analytical results, and from current and relevant Federal, State, regional, and local agencies.

Notes: ND - Not Detected. EPA Regional Screening Levels (RSLs) are human health risk based screening levels used by EPA and DTSC in residential and commercial settings. The RSL levels for total petroleum hydrocarbons are divided into six non-descript categories that depend on the relative speciation of aromatic and aliphatic hydrocarbons in the source contaminant. The most conservative screening level for petroleum hydrocarbons used. Please refer to lab report for complete results.

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications . The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications . The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications . The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

RE: 14414 Valley Blvd., City of Industry

Enclosed are the results of analyses for samples received by the laboratory on 05/15/23 14:55. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Jeff Lee
Project Manager

Notes and Definitions

QM-07	The spike recovery and or RPD was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Total number of coolers received: 1 Thermometer ID: SC-1 Calibration due : 8/2/23

Temperature: Cooler #1	1.6 °C +/- the CF (+ 0.1°C) =	1.7 °C	corrected temperature
Temperature: Cooler #2	°C +/- the CF (+ 0.1°C) =	°C	corrected temperature
Temperature: Cooler #3	°C +/- the CF (+ 0.1°C) =	°C	corrected temperature

Temperature criteria = ≤ 6°C (no frozen containers)	Within criteria?	☑ **Yes** ☐ **No** ☐ **N/A**
If NO:		
Samples received on ice?	☐ Yes	☐ **No → Complete Non-Conformance Sheet**
If on ice, samples received same day collected?	☐ Yes → Acceptable	☐ **No → Complete Non-Conformance Sheet**

Custody seals intact on cooler/sample	☐ Yes	☐ No*	☑ N/A
Sample containers intact	☑ Yes	☐ No*	
Sample labels match Chain of Custody IDs	☑ Yes	☐ No*	
Total number of containers received match COC	☑ Yes	☐ No*	
Proper containers received for analyses requested on COC	☑ Yes	☐ No*	
Proper preservative indicated on COC/containers for analyses requested	☐ Yes	☐ No*	☑ N/A
Complete shipment received in good condition with correct temperatures, containers, labels, volumes preservatives and within method specified holding times	☑ **Yes**	☐ **No***	

* Complete Non-Conformance Receiving Sheet if checked

Cooler/Sample Review - Initials and date: PB 5/15/23

HILLMANN
CONSULTING

April 27, 2023

Mr. Charlie Doherty
Caprock Acquisitions III, LLC
1300 Dove Street
Newport Beach, California 92660

RE: Phase I Environmental Site Assessment
14404 -14436 East Valley Boulevard
La Puente, California 91746
Hillmann Project No: C3-9529

Dear Mr. Charlie Doherty:

Hillmann Consulting LLC has completed a Phase I Environmental Site Assessment at the above referenced site. This assessment was performed in conformance with the scope and limitations of ASTM E1527-21, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental consulting services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 714 634-9500.

Sincerely,

Hillmann Consulting LLC

Stephen Bartlett
Senior Project Manager

Ryan Terwilliger
Regional Manager

LIST OF ACRONYMS/ABBREVIATIONS

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

AOC	-Area of Concern
AST	-Above Ground Storage Tank
ASTM	-American Society for Testing Materials
BER	-Business Environmental Risk
CERCLA	-Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	-Comprehensive Environmental Response Compensation and Liability Information System
CESQG	-Conditionally Exempt Small Quantity Generator
COC	-Chemicals of Concern
CORRACTS	-Corrective Action Sites
CREC	-Controlled Recognized Environmental Condition
DEC	-Department of Environmental Conservation
DEP	-Department of Environmental Protection
DHS	-Department of Health Services
DNPL	-Delisted National Priority List
DOB	-Department of Buildings
DOH	-Department of Health
DOT	-Department of Transportation
EPA	-Environmental Protection Agency
ERNS	-Emergency Response Notification System
FD	-Fire Department
FOI/FOIA/FOIL	-Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	-Heating Ventilation & Air Conditioning
HREC	-Historical Recognized Environmental Condition
IAQ	-Indoor Air Quality
ISRA	-Industrial Site Recovery Act

1.0 EXECUTIVE SUMMARY

Hillmann Consulting LLC (Hillmann) has performed a Phase I Environmental Site Assessment (ESA) of 14404 -14436 East Valley Boulevard, La Puente, California (the Subject Property in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-21 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Primary Street Address:	14404 -14436 East Valley Boulevard				
City:	La Puente	County:	Los Angeles	State:	California
Tax ID/Parcel Number:	8206027080, 8206027058				
Property Owner:	Richard C. Hunsaker				
Zoning Designation:	Light Manufacturing				
Approx. Property Area:	1.89 Acres				
Buildings:	One				
Approx. Building Size:	28,800 SF				
Approx. Year Built:	1977				
Commercial Occupants:	See rent roll				
Current Use:	Commercial/ Light industrial				
Site Visit Personnel:	Kofi Bonner Jason Norton				
Site Contact/Company:	Mike Malone / Hunsaker Management, Inc.				
Site Escort/Company:	Mike Malone / Hunsaker Management Inc.				
Inspection Date:	April 10, 2023				
Weather Conditions:	68° F / Overcast

1.3 Findings, Opinions and Conclusions

Recognized Environmental Conditions & Significant Data Gaps

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property as described in Section 2.2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs) or significant data gaps (SDGs) in connection with the Subject Property.

RECOGNIZED ENVIRONMENTAL CONDITIONS
The Subject Property has been utilized by multiple tenants for various light industrial operations since approximately 1977. Historical occupants included several printing/graphics businesses, which are considered potentially high risk for environmental impacts. Other occupants included light manufacturing operations, machine servicing businesses, auto painting supplies, and oil supplies. Collectively, the historical light industrial operations since 1977 are considered a REC in connection with the Subject Property due to the potential for undocumented spills/releases of hazardous substances and/or petroleum hydrocarbons to have occurred.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS
A portion of the Property was listed as “San Gabriel Valley Area (2 & 4)” on the Los Angeles County Areas of Concern (AOC) database due to previously reported VOCs in groundwater exceeding Maximum Contaminant Levels (MCLs) as designated by region 9 EPA. The EPA is identified as the regulatory agency and there are remedial actions underway. The San Gabriel Valley Areas 2 and 4 represent a CREC in association with the Subject Property.
SIGNIFICANT DATA GAPS

No SDGs were identified.
RECOMMENDATIONS
A Phase II Investigation is recommended to further evaluate the potential for subsurface impacts due to historical industrial uses.

Historical Recognized Environmental Conditions (HRECs)

If identified, *historical recognized environmental conditions* (HRECs) in connection with the Subject Property are described below:

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS
No HRECs were identified.

De Minimis and Other Environmental Conditions

If identified, *de minimis* and other environmental conditions are described below:

OTHER ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS
1. The Property was historically utilized for agricultural purposes from 1928 to 1964. Given the subsequent site redevelopment, the potential for concentrated pesticides in shallow soils is considered to be low and therefore historical agricultural use is not considered a REC.
2. The FINDS listing indicated the site on the Subject Property is registered on the National Compliance Database (NCDB) database with a registry ID of "110011646102". The CERS listing indicated the facility on the Subject Property was registered as a Cleanup Program Site with a Site ID of “602373” and a CERS ID of “T10000014239.” The CPS-SLIC listing indicated the site Duraware Plastics Co. reported a spill on January 1, 1985. No pertinent information was provided. However, the case was granted "Completed - Case Closed" status on August 11, 1987. The CHMIRS listing indicated the site had a release on March 18, 2021. According to the listing, the release was of diesel exhaust fluid to the road, as a result of a multi-vehicle collision. The listing reported a release of 10 gallons that was cleaned up by the tow company onsite, and that no waterways or storm drains were effected. Based on the details provided above, a REC is not suspected in connection with the Subject Property.
3. The CERS listing indicated the site on the Subject Property is registered as a Cleanup Program Site with a Site ID of “602467” and a CERS ID of “T10000014227.” The CPS-SLIC listing indicated the site Elite Salon Service reported a spill on January 1, 1985. No pertinent information was provided. However, the case was granted "Completed - Case Closed" status on December 16, 1996. Based on the details provided above, a REC is not suspected in connection with the Subject Property.

Environmental Professional Statement

I/We declare that, to the best of my professional knowledge and belief, I/we meet the definition of Environmental professional as defined in § 312.10 of 40 C.F.R. 312. I/we have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I/We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Stephen Bartlett
Environmental Professional

David Rutherford
Environmental Professional

1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as "Non-ASTM Scope concerns", in accordance with the contracted scope of work scope for this assessment. BER is defined by ASTM E1527-21 as "*a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.*" The following is a summary of findings for the limited review of potential BERs, where applicable, as per the contracted scope of work and limitations outlined in Section 2. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

Subject	Findings	Not Appl.	Rpt. Ref.
Asbestos	Suspected ACM noted within the accessed building areas included vinyl sheet flooring, floor tiles and associated mastic, mirror mastic, carpeting and associated mastic, roofing systems, penetration mastics, and thermal systems insulation.		7.1
Lead Paint	No residential buildings built prior to 1978 were present at the Property.		7.2
Radon	Property is located in the USEPA radon designation Zone 2 or 'moderate risk' area for radon.		7.3
Mold/ Microbial Damage	No evidence of significant problems with moisture intrusion or mold/ microbial growth was noted at the Subject Property.		7.4
NWI Wetlands	A review of NWI Wetlands Mapper did not indicate regulated wetland areas on the Property.		7.5
Lead in Drinking Water	Potable water service at the Property is provided by a utility connection with San Gabriel Valley Water Company. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water.		7.6

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-21. The ASTM describes these methodologies as representing good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. § 9601) and petroleum products. This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability ("landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the Subject Property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The goal of the processes established by ASTM E1527-21 is to identify *recognized environmental conditions* in connection with the Subject Property.

The term *recognized environmental condition* (REC) is defined by ASTM E1527-21 as "*(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*"

The term *controlled recognized environmental condition* (CREC) is a type of recognized environmental condition and defined by ASTM E1527-21 as a "*recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*"

The term *historical recognized environmental condition* (HREC) is defined as a "*previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).*" The ASTM E1527-21 standard has clarified that a historical recognized environmental condition is not a recognized environmental condition.

The term *de minimis condition* is defined by the ASTM, "*…a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.*" A condition determined to be a de minimis condition is not REC nor a CREC.

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Subject Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Subject Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historical record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Subject Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-21 standard:

- Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Subject Property. If the Subject Property contains buildings built in 1990 or later, the contracted scope of work excludes a cursory non-intrusive visual screening or any other level of evaluation for suspect ACM; however, the exclusion for buildings built ≥1990 should not be interpreted to suggest that any such buildings are free of ACM or would not warrant evaluation of building materials for ACM prior to disturbance. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/ inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if a greater certainty is desired regarding ACM and potential asbestos hazards at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

- Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Subject Property. If the Subject Property contains buildings built in 1980 or later, the contracted scope of work excludes any cursory non-intrusive visual screening or other level of evaluation for suspect LPB; however, the scope of work exclusion for building built ≥1980 should not be interpreted to suggest that any such buildings are free of LPB or other lead hazards. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

- USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Subject Property.

- Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Subject Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Subject Property.

- NWI Wetlands: The Subject Property has been reviewed for jurisdictional wetlands using the National Wetlands Inventory-Wetland Mapper to determine whether mapped federal wetlands have been indicated on the Subject Property. Any further evaluation or legal delineation of regulated wetlands areas is excluded from the scope of work. It is also emphasized that a field delineation of regulated wetlands by a qualified professional

would be warranted to more fully determine the presence or absence of regulated wetlands at the Subject Property.

- Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:	14404 -14436 East Valley Boulevard				
City:	La Puente	County:	Los Angeles	State:	California
Tax ID/Parcel Number:	8206027080, 8206027058				
Approx. Land Area:	1.89 Acres				
Apprx. Latitude/Longitude:	North 34.0360820 degrees/West 117.9783610 degrees				
Additional Details (if appl.)	N/A				
Property Owner:	Richard C. Hunsaker				
Zoning Designation:	Light Manufacturing				

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	The date and/or type of the first developed use of the Subject Property was not determined. Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

Data Gap:	Significant (Yes/No)?	Discussion
User and Owner questionnaires were not received as of date of report	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 ESA Report Component Dates/Viability

The ASTM E1527-21 standard states that an environmental site assessment (ESA) is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). Specifically, all of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction. The following table summarizes the component completion dates:

ESA Component	Completion Date
Interviews:	April 10, 2023
Env. Lien Search:	(excluded from scope)
Government Records Review:	April 6, 2023
Visual Inspections:	April 10, 2023
Env. Professional Declaration:	April 27, 2023

2.5 User Reliance

This report is for the exclusive use of Caprock Acquisitions III, LLC and additional relying entities, if any, named on the front cover. No additional individuals or entities shall be permitted to rely upon any data, interpretation, reports or other information or documentation contained in this report, without first obtaining the consent of Caprock Acquisitions III, LLC; and without obtaining written consent from Hillmann in the form of a reliance agreement/letter.

Hillmann may, in its sole discretion, withhold its consent to additional reliance and/or Hillmann may condition consent for reliance upon payment of a fee or other conditions.

2.6 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise,

it is assumed that no areas of the Subject Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Subject Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site-specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Subject Property and immediate surrounding area.

2.7 General Limitations and Exceptions

Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, would be further specified in Section 4.1.

Significant limitations related to the condition or accessibility of the Subject Property at the time of the site reconnaissance, if encountered, are reported in Section 6.1.

Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-21 are reported.

Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Subject Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents.

No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources, including information obtained during the assessment, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or government agency source. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-21 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

Recommended response actions offered in Section 1.3, if any, are provided as an option to the Client, and may have taken into account the Client's relation to the Subject Property and/or their intended purpose of this assessment. If included, it is not intended by Hillmann to represent the only course(s) of action, or inaction, to take. Furthermore, it is emphasized that additional response actions may become advisable depending on the outcome of the initial action(s) taken. Hillmann advises that Client and any additional authorized relying parties as specified on the report Cover and Section 2.5, or via letter of reliance extension, undertake consultation with legal counsel familiar with environmental and real estate law would be beneficial to the decision making process for the type and timing of a response action to identified RECs or Business Environmental Risks, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User(s) of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

The User(s) assumes responsibility for business decisions that it makes utilizing information in the report provided by Hillmann. Hillmann shall not be responsible for any conclusions, interpretations and/or decisions of the User(s).

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term "User" is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Subject Property; specifically, the entity or entities named on the front cover to which the report has been addressed.

3.1 Prior Environmental Reports/Documentation

The following prior environmental reports/documentation was provided:

Environmental Property Investigation, Don Julian and Valley Center Properties 15151 Don Julian Road, 525 - 427 Turnbull Canyon Road, 100 - 190 South Sixth Street & 14404-14436 Valley Boulevard, City of Industry, CA; prepared by Hydrotech Consultants, Inc. ; dated September 27, 1989. The report concluded the following:

> *"This investigation has yielded evidence that hazardous substances may have impacted both subject sites…*
>
> *7.2 Valley Center Boulevard*
>
> *Soil and groundwater contamination in the San Gabriel groundwater basin is presently under investigation by the RWQCB, State DHS and USEPA. Several potentially responsible parties for portions of this contamination have been identified in the vicinity of the subject site. Information acquired by the RWQCB from A & E Plastics, a neighboring site upgradient from the subject site, suggests that soil and groundwater contaminants may have migrated on to the subject site. The RWQCB may request in the near future that access be given to A & E Plastics to the subject site to conduct additional investigations (Phil Chandler, RWQCB, pers. comm., 1989).*
>
> *Additionally, observations made at the subject site suggest that organic contaminants have been spilled adjacent to the subject site near the railroad property boundary with A & E Plastics. Therefore, Hydrotech concludes that contaminants related to site use activities may be present within on-site soils or groundwater. Asbestos was not identified in building materials that were sampled in the 100 South Sixth Street unit. To the extent that identical building materials were used during construction in all other areas of the Valley Center Property, asbestos was not identified in the materials sampled and no further work is recommended…*
>
> *- Hydrotech recommends further communication with the RWQCB to investigate details of studies in progress at adjacent sites and establish what investigative actions may be required for the A & E Plastics study.*

- Finally, Hydrotech recommends that the responsible party for the organic liquid spill adjacent to Magnum be identified. Once identified, the responsible party should be required to characterize and remediate any associated soil and groundwater contamination. This area is likely to be noticed during any future RWQCB work regarding A & E Plastics and may bring the subject site under regulatory pressures."

3.2 User Responsibilities

In order to qualify for Landowner Liability Protections (LLPs) offered by federal regulations, the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The User should provide the following information to the environmental professional (Hillmann). Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete. To assist the report User to meet these requirements, Hillmann has provided a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 with instructions to complete and return to Hillmann. A completed questionnaire was not returned to Hillmann.

Question:	Yes/No:	Detail:
1. Search of Land Title and Judicial Records: Has the User performed a search of land title records and judicial records for environmental liens and/or Activity and Use Limitations (AULs) filed or recorded against the Subject Property?		
1.a. If yes to Question 1: Did the search identify any environmental liens or Activity and Use Limitations (AUL), such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded against the Subject Property under federal, tribal, state or local law?		
1.b. If yes to Question 1: Has the User provided the result of the search of land title and judicial records to Hillmann?		
2. Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business		

Question:	Yes/No:	Detail:
as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		
3. Relationship of the purchase price to the fair market value of the Subject Property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the Subject Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?		
4. Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:		
4.a. Do you know the past uses of the Subject Property?		
4.b. Do you know of specific chemicals that are present or were once present at the Subject Property?		
4.c. Do you know of spills or other chemical releases that have taken place at the Subject Property?		
4.d. Do you know of any environmental cleanups that have taken place at the Subject Property?		
5. The degree of obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the Subject Property are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?		
6. Litigation, Administrative Proceedings, Government Notices: As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Subject Property; and (3) any notices from any		

governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		
7. User's Reason/Purpose for Performing Phase I ESA:	The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-21, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.	

4.0 RECORDS REVIEW

4.1 Environmental Information

Physical Setting

Source	Discussion
USGS 7.5 minute Topo Map:	The Subject Property lies at an elevation of approximately 298 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the southwest. There are no downgradient water bodies within two miles of the Subject Property. .
USDA Soil Data: (EDR GeoCheck)	The soil type at the Subject Property is classified as "Urban Land". The Urban Land designation indicates that a majority of the original soils on the site have been disturbed by development or covered with impervious surfaces, such as buildings or pavement.
Geologic Data: (EDR GeoCheck)	The geologic formation in the vicinity of the Property is described as the Cenozoic era, Quaternary System, and Quaternary Series,
Prior Env. Reports: (Section 3.2)	Prior environmental reports reviewed as part of this assessment, as detailed in Section 3.1, provided the following pertinent detail of physical setting data: - The Subject Site is located within the San Gabriel Groundwater Basin . Groundwater in this basin is present within the alluvial deposits and flows from the San Gabriel Mountains. - Groundwater is estimated to be approximately 18 feet below ground surface.
Additional Sources/ Data:	No additional physical setting sources or data was obtained.
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the southwest.

Federal, State and Tribal Environmental Record Sources

Standard government records were obtained and reviewed primarily via a third-party regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT. The report provided government records from the standard environmental resources and within minimum search distances specified by Section 8.2.2-Table 2 of the ASTM E1527-21; and were reviewed for the purpose of identifying potential RECs in connection with the Subject Property. Additional detail of the source and significance of the regulatory databases can be found in the regulatory database report

in Appendix E. Hillmann has also included discussion of records pertaining to the Subject Property from other government record sources not specifically listed under Table 2, as applicable.

Reported distances for adjoining property listings, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Subject Property in the up-gradient direction, 365 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Subject Property in the up-gradient direction, 165 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the Subject Property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Subject Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Subject Property, if any, are identified and discussed in this section.

The EDR Radius Map report is attached in Appendix D.

Subject Property Listings

The following listings of the Subject Property were identified:

Name/Address:	Elite Salon Service/ 14420 Valley Boulevard
Database(s):	CERS, CPS-SLIC, WIP

Details:	The CERS listing indicated the site on the Subject Property is registered as a Cleanup Program Site with a Site ID of “602467” and a CERS ID of “T10000014227.” The CPS-SLIC listing indicated the site Elite Salon Service was investigated in the 1990s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. There was no indication of an actual reported release. the case was granted "Completed - Case Closed" status on December 16, 1996. Based on the details provided above, a REC is not suspected in connection with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	GM AUTO PAINT #3/ 14414 Valley Boulevard
Database(s):	CERS, CERS HAZ WASTE, FINDS, ECHO, HWTS, HAZNET, RCRA NONGEN/NLR
Details:	The CERS and CERS HAZ WASTE listings indicated the site on the Subject Property is registered as a Chemical Storage Facility and a Hazardous Waste Generator with a Site ID of “571683” and a CERS ID of “10863403.” The CERS listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials. No spills were reported for the site. The ECHO and FINDS listings indicated the site is registered on the RCRA databases with a registry ID of "110070412354". The HWTS listing indicated the site is registered as a hazardous waste transfer site. The permit was created on July 24, 2013, and is listed as active. The HAZNET listing indicated the following waste streams on the site: Unspecified solvent mixture, that was disposed of through fuel blending prior to energy recovery at another site. The RCRA NONGEN/ NLR listing indicated the site is registered as a non-generator of hazardous wastes since July 24, 2013, with an EPA ID of “CAL000387730.” No releases or violations were noted for the site. Given the lack of reported spills or releases, these listings are not considered to be REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Rico Products Inc. ,Duraware Plastics Co. /14412 Valley Boulevard
Database(s):	FINDS, CERS, CPS-SLIC, CHMIRS, WIP
Details:	The FINDS listing indicated the site on the Subject Property is registered on the National Compliance Database (NCDB) database with a registry ID of "110011646102". The CERS listing indicated the facility on the Subject Property was registered as a Cleanup Program Site with a Site ID of “602373” and a CERS ID of “T10000014239.” The CPS-SLIC listing indicated the former occupant Duraware Plastics Co. was investigated in the 1980s under a "Well

	Investigation Program", to identify potential responsible parties to regional groundwater contamination. There was no indication of an actual reported release. The case was granted "Completed - Case Closed" status on August 11, 1987. The CHMIRS listing indicated the site had a release on March 18, 2021. According to the listing, the release was of diesel exhaust fluid to the road, as a result of a multi-vehicle collision. The listing reported a release of 10 gallons that was cleaned up by the tow company onsite, and that no waterways or storm drains were effected. Based on the details provided above, a REC is not suspected in connection with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Adjoining Property Listings

The following adjoining property listings were identified.

Name/Address:	Burnham Service Corporation, Rice Field Corporation, Orange County Container/ 14500 Valley Boulevard
Database(s):	CERS, CERS HAZ WASTE, CPS-SLIC, LOS ANGELES CO. HMS, , FINDS, EMI, HAZNET, HWTS, RCRA NONGEN/NLR
Dist./Dir./Gradient:	40 Feet/ East/ Up-gradient
Details:	Rice Field Company: The CERS listing indicated the site is registered as a Chemical Storage Facility and a Hazardous Waste Generator with a Site ID of “147705” and a CERS ID of “10285069.” The CERS listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials. The HWTS listing indicated the site is registered as a hazardous waste transfer site. The permit was created on June 9, 20120, and is listed as active. The HAZNET listing indicated the following waste streams on the site: waste oil and mixed oil that was stored/bulked then transferred offsite with no recovery, for disposal or that was recovered using organic recovery. The RCRA NONGEN/NLR listing indicated the site as a non-generator of hazardous wastes since June 9, 2010, with an EPA ID of “CAL000353161.” Burnham Service Corporation: The HWTS listing indicated the site is registered as a hazardous waste transfer site. The permit was created on February 24, 1992, and is inactive as of June 30, 1997. The CPS-SLIC listing indicated the site had a release and was granted Completed - Case Closed status on July 15, 1987. No other pertinent information was provided. Orange County Container: The FINDS and EMI listings indicated the site is registered with the South Coast Air Quality Management District for air emissions with a Registry ID of "110013829063." The CERS listing indicated the site is registered as a US EPA Air Emission Inventory System (EIS) with a CERS ID of "110013829063".

REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	HEXCEL - MCI SITE, Hexcel Corp. Advance Products Div./ 140 N. Orange Avenue
Database(s):	CERS, CPS-SLIC, FINDS, ECHO, HIST UST, RCRA-SQG
Dist./Dir./Gradient:	305 Feet/ Northwest/ Cross/ Up-gradient
Details:	The CERS listing indicated the site is registered as a Cleanup Program Site with a CERS ID of "SL603792633." The FINDS and ECHO listings indicate that the site is listed on the US EPA TRIS and RCRA databases with a Registry ID of "110002143216". The EMI listing indicated the site is registered with the South Coast Air Quality Management District for air emissions with a facility ID of "43046". The HIST UST listing indicated the site previously managed a 1000-gallon concrete UST that held liquid wastes from metal working. The tank was installed in 1984. The CPS-SLIC listing indicated the site had a release and was granted Completed - Case Closed status on May 2, 2013. According to the CPS-SLIC listing and the online Geotracker Database in 1986, several soil and groundwater investigations were conducted on the site to characterize the historical activities of metal fabrication, heavy equipment use, repair, and storage, as well as the use of PCE as a degreaser in industrial operations. According to the No Further Action letter, prepared by the RWQCB and dated May 1, 2013 "*Soil Vapor Extraction (SVE) was implemented at the Site between 1989 and 2001 to remediate the impacted soil; air sparging was used to remediate impacted groundwater beneath the Site during 2000 and 2001. Hexcel Corporation entered into the "Acorn Consent Decree" in December 2002. The Consent Decree resolved Hexcel's Superfund liability with regard to the Puente Valley Operable Unit (PVOU) of the San Gabriel Valley Groundwater Basin. An interim remedy for PVOU groundwater is overseen by the US Environmental Protection Agency (USEPA)...Based on the staff's review of the information on source removal, confirmation soil sampling, and acceptable risk assessment determinations for the subject property, Regional Board staff has determined that the subsurface contamination at the subject property has been cleaned up to standards typically acceptable for industrial and commercial land use. Therefore, a no further requirement (NFR) status for soil only is granted to the property."* The RWQCB granted the site case closure on May 2, 2013. Based on the regulatory oversight, and positioning of the site in reference to the Subject Property these listings are not considered a REC in association with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Former Packaging Corporation, Hilltop Mini-Mart, Pactiv Corp./14505 Proctor Avenue

Database(s):	CERS, CIWQS, DEED, CPS-SLIC, HIST CORTESE, AST, RCRA-SQG
Dist./Dir./Gradient:	700 Feet/ Southeast/ Cross/Down-Gradient
Details:	The CERS listing indicated the site is registered as a Cleanup Program Site with a CERS ID of "SL0603776483". The EMI listing indicated the site is registered with the South Coast Air Quality Management District for air emissions with a facility ID of "43046". The AST listing indicated the site previously managed an AST; however, no other pertinent information was provided. The CPS-SLIC listing indicated the site known as the former Packaging Corporation and located approximately 700 feet to the southeast and cross/downgradient of the Subject Property had a release and was granted Completed - Case Closed status on August 21, 2012. According to the CPS-SLIC listing and the online Geotracker Database the site has been used for plastics manufacturing since the 1970's. Soil and groundwater assessments are complete. Vapor extraction has been used to mitigate concentrations of ethylbenzene and stryene in soil. Hillmann reviewed the most recent Phase II report dated May 8,2012 and the No Further Action letter from the RWQCB dated August 21, 2012. The letter stated the following " B*ased on staffs review of the information on source removal, confirmation soil sampling after the implementation of bioventing, and acceptable risk assessment determinations for the Site, the Executive Officer of the Regional Board has determined that Pactiv Corporation has fulfilled the requirements for site assessment and soil cleanup criteria for an industrial and commercial land use scenario - the current designated zoning. The Regional Board has determined that "No Further Action"(NFA) is required with respect to the site. The NF A determination for this site is made at this time based upon the most current information/data contained in the subject file. The NFA applies only to the known chemicals of concern which have been tested during the site assessment phase of work and with the provision that the information provided to the Regional Board staff is accurate and representative of site conditions. If new contamination is encountered during future site construction or redevelopment activities, you are required to provide a verbal notification to this Regional Board immediately and submit a follow-up written report within 72-hours."* The RWQCB granted the site case closure on August 21, 2012. Based on the regulatory oversight, and positioning of the site in reference to the Subject Property these listings are considered a REC in connection with the Subject Property due to the potential for soil vapor intrusion at the area immediately adjoining the adjoining tank farm.
REC Discussion:	Based on the details provided above, a REC is suspected in connection with the Subject Property. Additional evaluation would be required to determine whether a REC exists.
VEC Discussion:	Based on the available data, a VEC cannot be ruled out. Additional evaluation would be required to confirm whether a signficant vapor intrusion impact to the Subject Property exists.

Name/Address:	Hunsaker Management, Cal Tex Precision Inc., Victory Coating/ 190 S. 6th Avenue
Database(s):	HWTS, HAZNET, FINDS, CERS, CPS-SLIC, CERS HAZ WASTE
Dist./Dir./Gradient:	71 Feet/ Southeast/ Down-gradient
Details:	Hunsaker Management: The HWTS listing indicated the site on the Subject Property was previously registered as a hazardous waste transfer site. The permit was created on April 9, 1999, and is listed as inactive since December 01, 2003. The HAZNET listing indicated the following waste streams for the site: unspecified solvent mixture, and Off-specification, aged or surplus organics. These materials were disposed of through a transfer station. No spills or violations were reported. Based on the absence of reported releases or violations, these listings are not considered to be REC in connection with the Property. Cal TEX Precision Inc.: The FINDS listing indicated the site on the Subject Property is registered on the RCRA databases with a registry ID of "110066058385". The CERS HAZ WASTE listing indicated the facility on the Subject Property was registered as a Hazardous Waste Generator with a Site ID of “14966” and a CERS ID of “10289614.” The CERS HAZ WASTE listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials. Based on the absence of reported releases or violations, these listings are not considered to be REC in connection with the Property. Victory Coating, Inc.: The CERS listing indicated the facility on the Subject Property was registered as a Cleanup Program Site with a Site ID of “605255” and a CERS ID of “T10000014262.” Review of GeoTracker details indicate the site was investigated in the 1980s under a "Well Investigation Program", to identify potential responsible parties to regional groundwater contamination. There was no indication of an actual reported release. The case was granted "Completed - Case Closed" status on February 5, 1987. Based on the regulatory oversight, these listings are not considered to be REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Atkinson Construction/ 148 S. 6th Avenue
Database(s):	HWTS, HAZNET
Dist./Dir./Gradient:	71 Feet/ Southeast/ Down-gradient
Details:	The HWTS listing indicated the site on the Subject Property is registered as a hazardous waste transfer site. The permit was created on October 20, 2008, and is listed as inactive as of June 30, 2012. The HAZNET listing indicated

	the following waste streams on the site: Other organic solids, off-specification, aged or surplus organics, and unspecified oil-containing waste. These materials were disposed of through storage, bulking, and/or transferred offsite with no treatment or recovery. No releases or violations were noted for the site. Given the lack of reported spills or releases, these listings are not considered to be REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	C & N Office Specialties Inc./ 166 S. 6th Avenue
Database(s):	FINDS, ECHO, HWTS, HAZNET, RCRA-SQG,
Dist./Dir./Gradient:	71 Feet/ Southeast/ Down-gradient
Details:	The ECHO and FINDS listings indicated the site on the Subject Property is registered on the RCRA databases with a registry ID of "110002762993". The HWTS listing indicated the site was previously registered as a hazardous waste transfer site. The permit was created on October 26, 2018, and is listed as inactive since July 27, 2018. The HAZNET listing indicated the following waste streams for the site: halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc.), Oxygenated solvents (acetone, butanol, ethyl acetate, etc.), and unspecified solvent mixture. These materials were disposed of through a recycler or incinerated. The RCRA-SQG listing indicated the site is registered as a non-generator of hazardous wastes since April 13,1987 and with an EPA ID of “CAD981979628.” No spills or violations were reported. Based on the absence of reported releases or violations, these listings are not considered to be a REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Lawrence Wire Cloth Inc./ 178 S. 6th Avenue
Database(s):	CERS
Dist./Dir./Gradient:	71 Feet/ Southeast/ Down-gradient
Details:	The CERS listing indicated the site on the Subject Property is registered as a Chemical Storage Facility with a Site ID of “396354” and a CERS ID of “10295218.” The CERS listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Titto Inc., Benson Printers/ 172 S. 6th Avenue
Database(s):	CERS, HAZNET, HWTS
Dist./Dir./Gradient:	315 Feet/ Southeast/ Down-gradient
Details:	The CERS listing indicated the site on the Subject Property is registered as a Chemical Storage Facility with a Site ID of “547728” and a CERS ID of “10286908.” The CERS listing indicated the site had multiple administrative violations for failure to maintain proper Best Management Practices (BMPs) for hazardous materials. No spills were reported for the site. The HWTS listing indicated the site is registered as a hazardous waste transfer site. The permit was created on February 14, 1994, and is listed as inactive as of December 31, 1999. The HAZNET listing indicated the following waste streams on the site: Unspecified organic liquid mixture, that was disposed of through fuel blending prior to energy recovery at another site. No releases were noted for the site. Given the lack of reported spills or releases, these listings are not considered to be REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Multi-Color Tech LLC, 6 sign Inc./ 136 S. 6th Avenue
Database(s):	FINDS, ECHO, NPDES, CIWQS, CERS
Dist./Dir./Gradient:	300 Feet/ Southeast/ Down-gradient
Details:	Multi-Color Tech LLC: The ECHO and FINDS listings indicated the site on the Subject Property is registered on the RCRA databases with a registry ID of "110070266596". 6 Sign Inc.: The CERS, CIWQS, and NPDES listings indicated that the site on the Subject Property maintains an industrial facility stormwater permit that has remained active as of March 17, 2021. The facility has a Site ID of " 578042" and a CERS ID of "890556".
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Surrounding Area Findings

The following is a discussion of non-adjoining sites identified as located within the ASTM specified search distance surrounding the Subject Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Subject Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances

not specifically discussed below were reviewed and concluded not to be RECs in connection with the Subject Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status.

Federal - NPL

ASTM Search Distance:	1-mile	Number of listings within ASTM Search Distance:	2
Notable Listing:	San Gabriel Valley (Area 4)/ Stimson Avenue & Old Valley Boulevard		
Dist/Dir/Gradient:	TP/		
Details:	Puente Valley is one of eight operable units (OUs) identified by the U.S. Environmental Protection Agency (USEPA) for the San Gabriel Valley Superfund Site and is also known as San Gabriel Valley Superfund Site Area 4. The Puente Valley OU includes most of the City of Industry, portions of the City of La Puente, and portions of unincorporated Los Angeles County. Groundwater and soil are contaminated with various volatile organic compounds (VOCs, primarily trichloroethene (TCE) and tetrachloroethene (PCE)), 1,4-dioxane, perchlorate, and hexavalent chromium. Groundwater contamination occurs primarily in the shallow and intermediate groundwater zones of the aquifer, with most of the contaminant mass found in the shallow groundwater zone. VOC concentrations exceed drinking water standards in both the shallow and intermediate zones. The USEPA issued the Interim Record of Decision (IROD) for the Puente Valley OU in September 1998 to address VOC-contaminated groundwater. In 2005 the USEPA issued an Explanation of Significant Differences to the IROD to address 1,4-dioxane and perchlorate. The interim remedy includes extraction, containment, and treatment of contaminated groundwater in the shallow and intermediate zones at the mouth of Puente Valley. The remedy also includes wells for monitoring groundwater in the shallow, intermediate, and deep zones at mid-valley and the mouth of the valley to ensure that the remedy meets performance criteria set in the IROD. While multiple individual facilities may have contributed to contamination in the area, there are two work parties responsible for implementing the cleanup plan under USEPA oversight: Carrier Corporation (and its parent company, United Technologies Corporation) and Northrop Grumman Corporation. Carrier Corporation is required to implement groundwater cleanup actions for the shallow zone north of Puente Creek under a consent decree. Northrop Grumman is required to implement groundwater cleanup actions for the intermediate zone and for the shallow zone south of Puente Creek under a consent decree and Unilateral Administrative Order, respectively. The total cost of the remedy		

	is estimated to be $75 million. Three ground water extraction and treatment systems are planned to protect the water supply in the mouth of Puente Valley and to prevent further contaminant movement. Completion of the systems was delayed to identify and evaluate additional options for discharge and conservation of treated water, and to design treatment systems capable of treating the identified contaminants. For the cleanup project, known as the "Shallow Zone-North" remedy, construction of a network of 10 groundwater extraction wells was completed in 2007. The project will clean up contaminated shallow groundwater north of Puente Creek. Construction of the treatment plant will begin after agreements are reached for discharge of the treated water. Design and construction of the project known as the "Intermediate Zone" remedy, should be completed by 2019. This project will clean up deeper, less contaminated groundwater in the mouth of Puente Valley. Six extraction wells have already been constructed for the Intermediate Zone Remedy, and one or two more may also be constructed. The extracted water will be treated using several technologies to address all the contaminants of concern. Granular activated carbon will be used to treat for volatile organic contaminants, advance oxidation will be used to treat 1,4-dioxane, ion exchange will be used to treat for perchlorate and reverse osmosis will be used to inorganics to meet drinking water standards. The "Shallow Zone South" Remedy will address groundwater contamination in the shallow zone south of Puente Creek. The Remedial Design Investigation report will be completed in the summer of 2015.
REC Discussion:	Based on the details provided above, a CREC in connection with the Subject Property has been identified.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Federal - Delisted NPL

State/Tribal - Landfill / Solid Waste Disposal

ASTM Search Distance:	1/2-mile	Number of listings within ASTM Search Distance:	4
Notable Listing:	Arrow Disposal Services Inc./ 14245 Proctor Avenue		
Dist/Dir/Gradient:	1127 Feet/ West/ Down-gradient		
Details:	The SWF/LF listing indicated the site is an active waste hauler with Facility ID/ SWIS Number “19-AS-0087”. No other pertinent information was provided. Based on the absence of reported releases or violations, this listing is not considered to be a REC in connection with the Property.		
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.		
VEC Discussion:	Based on the available data, a VEC is not suspected.		

State/Tribal - Leaking Storage Tanks

ASTM Search Distance:	1/2-mile	Number of listings within ASTM Search Distance:	12
Notable Listing:	Hansen Foods/ 14380 Nelson Avenue		
Dist/Dir/Gradient:	304 Feet/ Northeast/ Up-gradient		
Details:	The LUST listing indicated the site reported a release of solvents on April 11, 1990, during UST removal operations. The LUST was given Completed - Case Closed status on September 17, 1997. Hillmann reviewed the No Further Requirements letter prepared by the RWQCB and dated, June 29, 1998. According to the letter the site previously managed five (5) USTs, unlined settling pits, surface drainage channels, and a three-stage clarifier that were decommissioned and removed from the site on April 11, 1990. The RWQCB letter states the following "Diesel, volatile organic compounds (VOCs), and hydrochloric/ lead acid-impacted soil were excavated and properly disposed of offsite between 1990 and 1994.		

	Discovery of peak concentrations in the soil of 1, 1-DCE (17 ~glkg) and I, I, 1-TCA (670 ~glkg), where VOCs were stored in drums along the northeastern property boundary, was promptly remediated to non-detect levels through soil vapor extraction technology. The data did not indicate a track of contaminants from the vadose zone to groundwater. The groundwater monitoring results for the December 1997 sampling period show non-detects to low concentrations of VOCs. The highest concentration detected was 43 ~giL of TCE, a chemical reportedly not used onsite based on historical records. This chemical may have emanated from offsite sources. Based on these findings, Regional Board staff concludes that the work performed to date at your facility adequately has fulfilled our assessment and remediation requirements. As a result, no further requirements need to be met with respect to the San Gabriel Superfund Cleanup Program. Please maintain your groundwater monitoring wells in operable condition to allow for future use in relation to regional sampling and/or cleanup activities." Based on regulatory oversight, this listing is not suspected to be a REC in connection with the Subject Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Subject Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Subject Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
www.realquest.com	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
CA DTSC Envirostor database (www.envirostor.dtsc.ca.gov/public/)	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
CA GeoTracker database (geotracker.waterboards.ca.gov/)	Online search	Hillmann reviewed available on-line records pertaining to the Property. The following pertinent records and/or information was obtained: - Hillmann reviewed the online GeoTracker database created by the RWQCB. The database showed three (3) separate cleanup programs that were completed and given case closure on the

Source	Type of Request	Outcome
		Subject Property. Duraware Plastics Co. Inc. (RB Case #: 102.0066), Elite Salon Service (RB Case#: 102.0057). The cases are discussed further above in section 4.1 of this report.
Los Angeles Co. Fire Dept./CUPA	FOI request	A response was received providing the following pertinent records: - Hillmann reviewed several fire inspection reports for multiple addresses on the Subject Property beginning in 2015. The reports noted several violations of tenants on the Subject Property for failures to maintain the Best Management Practices when handling, storing, or using hazardous materials. No spills were reported within the fire inspection reports.
South Coast Air Quality Management District (SCAQMD)	FOI request	A response was received providing the following pertinent records: - Hillmann reviewed the SCQAMD inspection reports for multiple addresses on the Subject Property The inspection reports stated that the facility addressed as C & H Office Equipment previously managed a spray paint and solvent booth that utilized organic solvents. As of 1994 all of the equipment is listed as inactive and no violations were noted.
Regional Water Quality Control Board (RWQCB)	FOI request	No response was received prior to report issuance.

4.2 Historical Research

Historical records have been compiled and analyzed for historical property information and developing a history of previous uses of the Subject Property, adjoining properties and surrounding area. These records were reviewed for the purpose of identifying the likelihood of past uses having led to RECs in connection with the Subject Property.

The historical record sources listed below have been sought with the objective to document past uses of the Subject Property from the present back to the Subject Property's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural use, placement of fill dirt and other uses that do not involve structures. Hillmann has sought to review historical records in minimum intervals of five years.

Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historical fire insurance maps for the Subject Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Subject Property	Adjoining Properties
None	None	None

A copy of the Certified Sanborn Map Report is attached in Appendix E.

City Directories

An EDR City Directory Abstract report was reviewed for data of prior occupants of the Subject Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Subject Property.

Subject Property Use(s) / Occupant(s)	Years
Various light industrial and commercial occupants. Notable listings are details below.	1982 - 2020
Wonderful World Prnt (14414 Valley)	1992
Durawear Plastics (14412 Valley)	1982, 1987
Glossit Mfg (14426 Valley)	1982
Color scan/Plate Ready Co (14420 Valley)	1982
C L W Plastic Bag Mfg (14422 Valley)	1987
American Speedy Printing Center (14426 Valley)	1992, 1995
Central Truck & Oil Supply (14426 Valley)	2014

The EDR City Directory Abstract report was also reviewed for listings of prior occupants of the adjoining properties. The following is a generalized summary of the findings of city directory research for past occupants of the adjoining properties:

Adjoining Property Use(s) / Occupant(s)	Years
Mix of residential and commercial occupants. Commercial occupants included gasoline service stations.	1961 - 1976
Mix of light industrial and commercial. Notable listings are detailed below.	1982 - 2020
Tri Star Colr Sprth (122 S. Sixth)	1987, 1992
Benson Prnting Co. (132 S. Sixth)	1992, 1995
Victory Coatings (190 S. Sixth)	1992, 1995
Graphic Service (132 S. Sixth)	1992, 1995

Adjoining Property Use(s) / Occupant(s)	Years
Printers Diversified Inc	1982, 1987
D B W Data Machine Srvc/Printer Term Srvc (110 S. Sixth)	1987
Industry Color Graphics (138 S. Sixth)	1987
Alpha & Omega Printing (126 S. Sixth)	2010
VC Screenprinting Inc. (190 S. Sixth)	2014

A copy of the EDR City Directory report is attached in Appendix E.

Historical Topographic Maps

Historical topographic maps of the Property and vicinity obtained from an EDR Historical Topographic Map report (as attached in Appendix E) have been reviewed. The following interpretation of land usage was made by review of the maps:

Year(s)	Subject Property	Adjoining Properties
1894, 1897, 1898, 1904	The Subject Property is depicted as undeveloped land.	The adjoining properties to the east, west, and south are all depicted as undeveloped land. North of the Subject Property the Southern Pacific Railroad is mapped.
1927	The Subject Property is depicted as undeveloped land.	The adjoining properties to the east and south are all depicted as undeveloped land. West of the Subject Property a structure is depicted. North of the Subject Property an improved road is depicted as Pomona Boulevard. Further north of the Subject Property, the Southern Pacific Railroad is mapped.
1953	The Subject Property is depicted with a structure located on the northwestern corner of the property. The remaining area is depicted as undeveloped land.	The adjoining properties to the east and south are all depicted as undeveloped land. West of the Subject Property a structure is depicted. North of the Subject Property an improved road is depicted as Valley Boulevard. Further north of the Subject Property, the Southern Pacific Railroad is mapped.
1966	The Subject Property is depicted as undeveloped land.	The adjoining properties to the north, west, and east of the Subject Property are all depicted with several structures. South of the Subject Property is depicted as undeveloped land.

Year(s)	Subject Property	Adjoining Properties
	The Subject Property is depicted as undeveloped land.	The surrounding properties are depicted with several structures.
1981	The Subject Property is depicted as developed with seven (7) structures.	The surrounding properties are depicted with several structures.
2012, 2015, 2018	No improvements or structures are depicted on this topographic map	No improvements or structures are depicted on this topographic map

If obtained, copies of historical aerial photographs have been included in Appendix E.

Historical Aerial Photographs

Historical aerial photographs of the Property and vicinity obtained from an EDR Aerial Photo Decade Package report, as attached in Appendix E, were reviewed. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Subject Property	Adjoining Properties
1928	The Subject Property appears to be agricultural land developed as furrowed fields. No structures are noted on the Subject Property.	The adjoining properties appear to be agricultural land. North of the Subject Property there appears to be a railway.
1938, 1948, 1952	The Subject Property appears to be agricultural land developed as furrowed fields. No structures are noted on the Subject Property.	The adjoining properties appear to be agricultural land. North of the Subject Property there appears to be a railway. The adjoining property to the west of the Subject Property appears to have several structures and various items of equipment on the premises.
1964,	The Subject Property appears to be agricultural land developed as furrowed fields. There appears to be a small structure located on the northeastern corner of the Subject Property.	The adjoining properties appear to be agricultural land. North of the Subject Property there appears to be a railway. The adjoining property to the west of the Subject Property appears to have several structures and various items of equipment on the premises.
1972, 1977	The Subject Property appears to be under development. There is a structure located on the northeastern portion of the Subject Property along with several items that appear to be equipment.	South of the Subject Property appears to be agricultural land. East and north of the Subject Property there appears to be a light industrial area under development. The adjoining parcel west of the Subject Property appears to have

Year(s)	Subject Property	Adjoining Properties
		several structures and unrecognizable items and equipment throughout the premises.
1981, 1983	The Subject Property appears developed with the present-day commercial structure on the property, as well as the asphalt-paved parking areas.	The surrounding properties to the south, east, and north all appear to have large light industrial structures. The adjoining parcel west of the Subject Property appears to have several structures and unrecognizable items and equipment throughout the premises.
1990, 2005, 2009, 2012, 2016, 2020	The Subject Property appears developed with the present-day commercial structure on the property, as well as the asphalt-paved parking areas.	The surrounding properties all appear to have light industrial structures on their premises.

If obtained, copies of historical aerial photographs have been included in Appendix E.

EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.1 and attached in Appendix D, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Subject Property. These databases include EDR Hist Cleaner – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Hist Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a proprietary database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings	Adjoining/Off-site Listings
EDR Hist Cleaner: (on-site/adjoining only)	None	None
EDR Hist Auto: (on-site/adjoining only)	None	None
EDR MGP: (1-mile distance)	None	None

Petroleum/Natural Gas Well Review

The historical record sources and the California Geologic Energy Management Division (CalGEM) online mapping application were reviewed for records of petroleum and/or natural gas wells at the Subject Property.The historical record sources were reviewed for records of petroleum and/or natural gas wells at the Subject Property.

Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/ Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports:	Prior environmental reports reviewed as part of this assessment, as detailed in Section 3.1, did not provide additional pertinent detail of historical site usage.
Site Observations:	Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance.
Other Sources:	No additional pertinent historical data was obtained.

Summary of Identified Historical Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Subject Property:

Date Range	Subject Property Use(s)
1894 to 1927	Undeveloped Land
1928 to 1964	Agricultural furrowed fields
1972 to 1977	Vacant land with a structure
1981 to Present	Mix of commercial and light industrial warehouses/offices

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Date Range	Adjoining Property Use(s)
1894 to 1927	Agricultural
1938 to 1964	Mix of agricultural land and commercial/industrial properties
1972 to present	Mix of commercial and light industrial properties

Historical Records Data Failure

The ASTM E1527-21 standard defines data failure as failure to achieve the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historical use/conditions were sought in intervals no less than approximately five years, unless the Subject Property conditions appear unchanged over a longer interval. In encountered, data failure and its significance as a data gap is discussed below:

Objective	Met?	Detail	Significant?
First developed use/ date determined?	No	The earliest documented use of the Property was agricultural crop fields, circa 1928.	No
Record sources at 5-year intervals back to 1940 or first developed use?	No	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Summary of Identified Past Uses of this section.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

Historical Uses REC Discussion

The Subject Property has been utilized by multiple tenants for various light industrial operations since approximately 1977. Historical occupants included several printing/ graphics businesses, which are considered potentially high risk for environmental impacts. Other occupants included light manufacturing operations, machine servicing businesses, auto painting supplies, and oil supplies. Collectively, the historical light industrial operations since 1977 are considered a REC in connection with the Subject Property due to the potential for undocumented spills/releases of hazardous substances and/or petroleum hydrocarbons to have occurred.

The Property was historically utilized for agricultural purposes from 1928 to 1964. Given the subsequent site redevelopment, the potential for concentrated pesticides in shallow soils is considered low; therefore, historical agricultural use is not considered a REC.

5.0 INTERVIEWS

5.1 Interviews with Owners, Operators and Occupants

Property Owner

Property Owner	Contact Name	Affiliation	Interview Type	Date
Richard C. Hunsaker	Mike Malone	Owner's counsel	Questionnaire	04/10/23
An environmental questionnaire for information pertinent to the assessment was forwarded; however, a completed questionnaire was not returned to Hillmann.				

Key Site Manager/Operator

Name	Company/Title	Yrs @ Site	Interview Type	Date
None				
A knowledgeable site representative was not identified or made available for interview.				

Occupant(s)

Name	Company/Title	Yrs @ Site	Interview Type	Date
(none)				
No occupant interviews were conducted.				

Prior Owners/Operators/Occupant(s)

Name	Company/Title	Yrs @ Site	Interview Type	Date
(none)				
No interviews of prior owners, operators or occupants were conducted.				

Neighboring Property Owner(s)/Occupant(s)

Name	Company/Title	Yrs @ Site	Interview Type	Date
(none)				
The Subject Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.				

5.2 Interviews with State and/or Local Government Officials

State and/or local governmental officials have been interviewed to obtain information of potential RECs in connection with the Subject Property. Many government agencies and their officials require submittal of written request for records in order to respond. The details in Section 4.1 list the various state and local government agencies contacted as part of this assessment, and the outcome of each inquiry. In addition, the details of regulatory database research in Section 4.1 may have included detail of interviews with officials pertinent to government records review and identification of RECs.

Additional interview of government officials not previously detailed in Sections 4.1 are discussed below, if applicable.

Name	Agency Name/Title	Interview Type
(none)		
Interview Outcome/Findings:		
No additional local/state government officials were interviewed.		

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted to collect information and make observations to help identify RECs in connection with the Subject Property. This included visual and/or physical observations of the Subject Property and its structures, adjoining properties as viewed from the Subject Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares and accessed Subject Property structures. Subject property building exteriors were observed at ground level, unless otherwise indicated. Where applicable, building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Kofi Bonner
Property Escort/ Company:	Mike Malone/Hunsaker Management Inc.
Inspection Date:	April 10, 2023
Weather Conditions:	68° F / Overcast

Significant Inaccessible Areas

The following significant areas of the Property were not accessed at the time of the site visit:

- Several of the tenant's units were unable to be accessed during site reconnaissance.

Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

6.2 General Site Setting

Site and Vicinity Characteristics

Abutting Roadways:	Valley Boulevard to the northeast; South 6th Avenue to the northwest
Current Property Use:	Commercial/ Light industrial
Evidence of Past Property Uses:	None
Evidence of Past Adjoining Property Uses:	None

Surrounding Area Uses:	Light industrial warehouses

Current Adjoining Property Uses

Dir	Street Address	Description
N	240 North Orange Avenue	Tropicana Products Inc. - Naked Juice Co.
E	14500 Valley Boulevard	Rice Field Corporation
SE	14505 Proctor Avenue	NFI Cal Cartage
S	102 -190 South 6th Avenue	Various light industrial operations
SW	207 S 6th Avenue	Dvenegas Designs
W	14350 Valley Boulevard	Dukes Restaurant

Topographic Characteristics

Terrain:	Flat
Direction of Downward Slope:	Southwest
On-site Water Bodies:	None
Other Significant Features:	None

General Description of Structures and Improvements

Buildings:	One
Approx. Building Size:	28,800 SF OR
Approx. Year Built:	1977
Number of Stories:	One
Subgrade Levels:	None
Exterior Ground Cover:	Asphalt pavement
Ancillary Structures:	None
Sources of Heating and Cooling:	Electrical heating and cooling systems
Potable Water/Sewage Disposal:	Municipal utility connections

6.3 Site Features and Conditions

Storage/Usage of Hazardous Substances and Petroleum Products

The following approximate number of containers, and general description of their contents, capacity, container types and storage conditions, were observed to be stored and/or used at the Subject Property:

Occupant	Substance	Qty/Container Type	Storage Conditions
GM Auto Paint Supplies	Spray Paint	50+ / 8-fl.oz containers	Stored on shelves within office area
GM Auto Paint Supplies	Lacquer Thinner	Approx. 10/ 5-gallon containers	Stored on concrete underneath storage shelves
GM Auto Paint Supplies	Various Paints	50+/ 32 -fl.oz containers	Stored/In-use on shelves in the back area of warehouse
Bathplanet	Silicone Sealent	Approx. 30/ Silicone Sealant tubes	Store on shelves within warehouse area

Bulk Petroleum/Hazardous Material Storage Tanks

If identified or suspected, storage tanks for bulk petroleum or hazardous material storage are described as follows:

AST/UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
None						No storage tanks were identified.

<<Insert WordBank item>>

Strong, Pungent or Noxious Odors and their Sources

No strong, pungent or noxious odors were noted at the Subject Property.

Standing Surface Water/Pools & Sumps

No standing water, pools or sumps containing liquids likely to be hazardous substances or petroleum products were noted.

Drums, Totes and Intermediate Bulk Containers

The following hazardous substance or petroleum product drums were noted:

- Hillmann observed a 55-gallon drum labeled "Flammable Solvent Paint" within the warehouse area of GM Auto Paint Supplies. Noticeable staining was observed around the drum from several paints.

Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted.

PCBs in Oil Filled Electrical/Hydraulic Equipment

No oil-filled electrical or hydraulic equipment was identified at the Subject Property.

It is noted that identification of PCB containing fluorescent light ballasts, caulk, paint, or other materials located inside and are part of the building or structure is outside of the scope of the ASTM E1527-21 standard and this assessment.

Stains or Corrosion on Floors, Walls or Ceilings

No stains or corrosion of floors, walls or ceilings, excluding any staining from water, were noted.

Drains and Sumps

No floor drains or sumps were noted at the Subject Property.

Pits/Ponds/Lagoons

No pits, ponds or lagoons were identified in connection with waste treatment or disposal.

Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed.

On-Site Solid Waste Disposal/Fill Material

The following evidence of on-site disposal of trash, construction debris, demolition debris or other solid waste was observed:

- The Subject Property has several dumpsters that are serviced by Valley Vista Services Waste Disposal and Recycling services.

Waste Water

Sanitary sewage generated at the Subject Property is discharged via a connection to the local public sewer system.

Storm water runoff at the Subject Property is discharged via roof drains into the municipal sewer system.

No additional waste water discharges were identified at the Subject Property.

Septic Systems/Cesspools

No septic systems or cesspools were identified at the Subject Property.

Wells

No wells (including any dry wells, irrigation wells, injection wells, abandoned wells, or other wells) were identified at the Subject Property.

Railroad Spurs

No railroad spurs were identified on the Subject Property.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as “Non-Scope Considerations”). The ASTM E1527-21 standard defines the term business environmental risk (BER) as, “a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.”

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Subject Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Suspected ACM noted within the accessed building areas included vinyl sheet flooring, floor tiles and associated mastic, mirror mastic, carpeting and associated mastic, roofing systems, penetration mastics, and thermal systems insulation.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

No residential buildings built prior to 1978 were present at the Property.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Subject Property is located in an area classified as Zone 2 or 'moderate risk'. area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

The contracted scope of work included a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth.

No evidence of significant problems with moisture intrusion or mold/microbial growth was noted at the Subject Property.

7.5 NWI Mapped Wetlands

The National Wetlands Inventory online Wetland Mapper was reviewed for indications of jurisdictional wetlands at or immediately adjoining the Subject Property. The scope of work for this assessment excluded a visual determination of regulated wetlands at the Subject Property. It is emphasized that, regardless of the data reviewed via the NWI Wetlands Mapper, a field delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Subject Property.

A review of NWI Wetlands Mapper did not indicate regulated wetland areas on the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data. Potable water service at the Property is provided by a utility connection with the San Gabriel Valley Water Company.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

14404-14436 E. VALLEY BLVD & 102-190 S. 6TH AVE
CITY OF INDUSTRY, CA 91746

COORDINATES

Latitude (North):	34.0360820 - 34° 2' 9.89''
Longitude (West):	117.9783610 - 117° 58' 42.09''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	409685.0
UTM Y (Meters):	3766393.8
Elevation:	301 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: A review of the NPL list, as provided by EDR, and dated 01/25/2023 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

VALLEY CENTRE
14404-14436 E. VALLEY BLVD & 102-190 S. 6TH AVE
CITY OF INDUSTRY, CA 91746

TARGET PROPERTY COORDINATES

Latitude (North):	34.036082 - 34° 2' 9.90''
Longitude (West):	117.978361 - 117° 58' 42.10''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	409685.0
UTM Y (Meters):	3766393.8
Elevation:	301 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015951 BALDWIN PARK, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

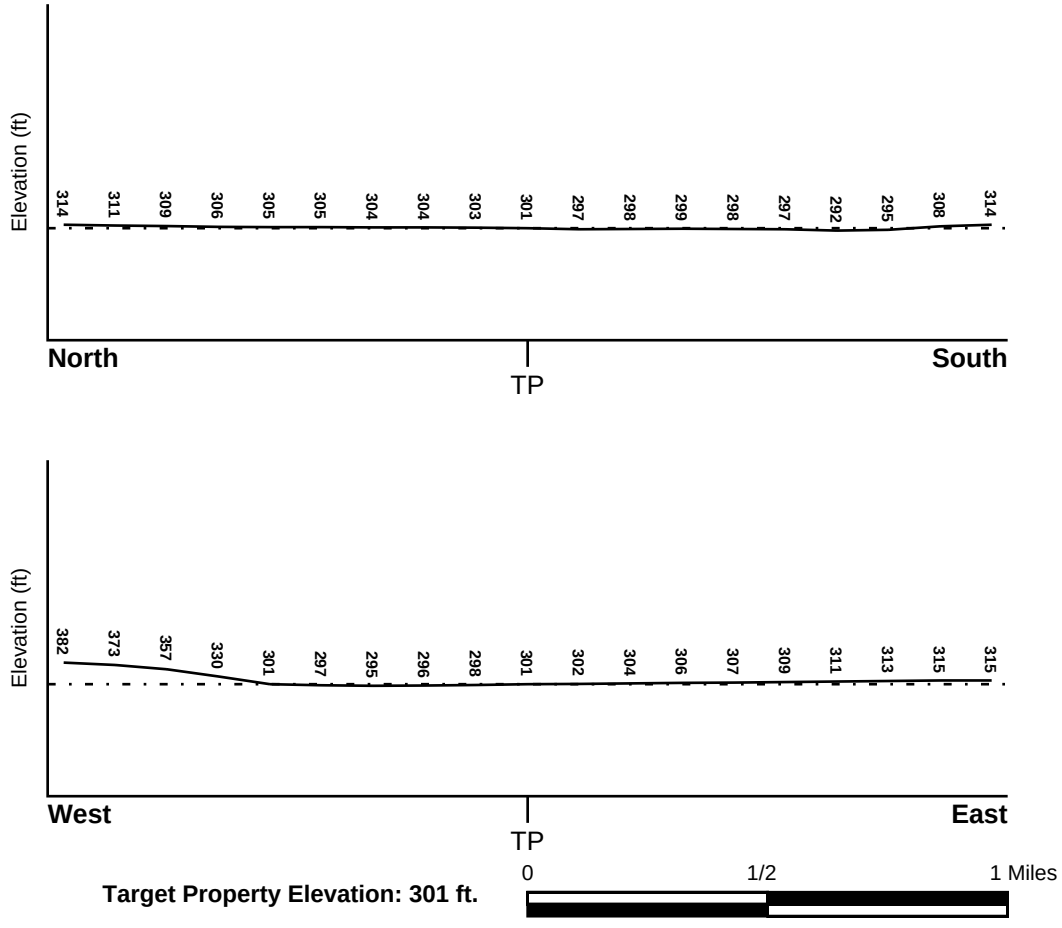
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1700F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BALDWIN PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile ESE
Site Name:	Brough Industries Inc.
Site EPA ID Number:	CAD983633710
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	not available.
Hydraulic Connection:	Aquifers under the site are most likely hydraulically connected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

14404-14436 E. VALLEY BLVD & 102-190 S. 6TH AVE
CITY OF INDUSTRY, CA 91746

COORDINATES

Latitude (North):	34.0360820 - 34° 2' 9.89''
Longitude (West):	117.9783610 - 117° 58' 42.09''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	409685.0
UTM Y (Meters):	3766393.8
Elevation:	301 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2023 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2023 has revealed that there are 3 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAP000321927

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 13 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 4 SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 32 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ECHO: ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

A review of the ECHO list, as provided by EDR, and dated 01/01/2023 has revealed that there is 1 ECHO site within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY (	***STIMSON AVE & OLD VA***	***0 - 1/8 (0.000 mi.)***	***0***	***117***
Registry ID: 110009267907				

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/30/2023 has revealed that there are 6 PFAS ECHO sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 2 DRYCLEANERS sites within approximately 0.25 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 01/10/2022 has revealed that there are 4 LOS ANGELES CO LF METHANE sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Scoring: 2

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 2) is a ground water plume that parallels the San Gabriel River to the west in the San Gabriel ground water basin in the Baldwin Park area of Los Angeles County, California. The plume is about 7.5 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene TCE), perchloroethylene PCE), and carbon tetrachloride, according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies containless than 5 parts per billion ppb) of TCE, a level considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984): A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the threeother San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Substance:	TRICHLOROETHYLENE (TCE)
Pathway:	GROUND WATER PATHWAY
Scoring:	4

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 4) is a ground water plume that runs along the axis of the San Jose Creek in the San Gabriel ground water basin in La Puenta, Los Angeles County, California. The plume is about1 mile long and 1 mile wide. Ground water is contaminated with trichloroethylene TCE) and perchloroethylene PCE), according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA SuggestedNo Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion ppb) of TCE, alevel considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984):

SAN GABRIEL VALLEY (AREA 4) (Continued) **1000114960**

A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the three other San Gabriel Valley sites, was added tothe NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Category as of 08/2019:
NPL Status: Currently on the Final NPL
Category Description: Depth To Aquifer-<= 10 Feet
Category Value: 1

NPL Status: Currently on the Final NPL
Category Description: Distance To Nearest Population-> 0 And <= 1/4 Mile

Environmental Interest/Information System:
SUPERFUND NPL
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 02/08/2022. OBSERVATION: Uniform Hazardous Waste Manifests for used/waste oil, used/waste coolant, used absorbents, and used and drained oil filters were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for used/waste oil, used/waste coolant, used absorbents, and used and drained oil filters from 2020 to present and submit copies to the CUPA.

Violation Source: CERS,

Site ID: 571961
Site Name: SoCal Industries
Violation Date: 01-19-2021
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a

SOUTHERN CALIFORNIA SANITATION (Continued) **S111828109**

hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 02/07/2022. OBSERVATION: The business failed to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material; or failed to document and maintains training records for a minimum of three years. CORRECTIVE ACTION: Establish and electronically submit an employee training program containing provisions for training applicable staff in release reporting procedures. Submit documentation to the unified program agency demonstrating appropriate personnel have received initial training and maintain ongoing annual training records for a minimum of three years.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 571961
Site Name: SoCal Industries
Violation Date: 01-19-2021
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 02/07/2022. OBSERVATION: Two 55-gallon plastic containers containing HW used coolant located inside the mechanic shop were observed open. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SIC Code:	3441
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS:
Name: RICE FIELD CORP
Address: 14500 E VALLEY BLVD
City,State,Zip: INDUSTRY, CA 91746
Site ID: 147705
CERS ID: 10285069
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 147705
Site Name: RICE FIELD CORP
Violation Date: 08-09-2019
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Release/Leaks/Spills - General
Violation Notes: Returned to compliance on 09/07/2020. OBSERVATION: Operator failed to follow under 19 CCR 2658(c) mitigation, prevention, or abatement of hazards to persons, property, or the environment. It was observed that storage area for hazardous materials used for cleaning equipment were stored in a manner in which a potential for materials to co-mingle with the potential to cause a reaction. CORRECTIVE ACTION: To clean up areas where cleaning products (solids and liquids) are stored. Ensuring secondary containment area and grounds surrounding areas free of all solids and liquids. Manifest waste if the clean-up requires to be managed as hazardous waste. Submit photos/documentation to the CUPA demonstrating the spill has been properly removed and managed.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 147705
Site Name: RICE FIELD CORP
Violation Date: 02-15-2013
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 03/12/2014. 4 drums of waste oil have only one label
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 147705
Site Name: RICE FIELD CORP
Violation Date: 06-22-2022
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 06/22/2022. OBSERVATION: Observed 2 X

RICE FIELD CORP (Continued) **S118231968**

55-Gallon drums of used hydraulic fluid with the screw lids left off. CORRECTIVE ACTION: Instructed the Maintenance worker to secure the lids onto the waste containers during the inspection. Violation corrected on site, no further corrective action required.

Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes:	Returned to compliance on 06/22/2017. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. A review of CERS revealed that the last submittal of a HMBP to CERS was on 2/12/14. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

operation. The ammonia sensor calibration test result indicates, not every ammonia vapor sensor was functioning. The calibration result showed that several ammonia sensors located throughout ammonia system, including the engine room sensor, failed to respond to the calibration tests. There were no records available for review to ensure the owner/operator repaired or replaced the inoperable ammonia sensors. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating the owner/operator has corrected deficiencies in the equipment that is outside acceptable limits.

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS HAZ WASTE:

Name:	PAINT ANDETAIL EXPRESS
Address:	125 S 007TH AVE
City,State,Zip:	LA PUENTE, CA 91746
Site ID:	141252
CERS ID:	10286167
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	141252
Site Name:	PAINT ANDETAIL EXPRESS
Violation Date:	03-24-2017
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/23/2017. OBSERVATION: A business plan has not been received by the CUPA. CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	141252
Site Name:	PAINT ANDETAIL EXPRESS
Violation Date:	03-24-2017
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 03/24/2017. OBSERVATION: Owner/Operator failed to obtain or maintain an haz-waste active permit. CORRECTIVE ACTION: Every business or business concern within the jurisdiction of the LACoCUPA and subject to one or more of the program elements shall be required to apply for, pay the permit fees, and obtain from the LACoCUPA a unified program facility permit for the program elements applicable to such facility prior to the commencement of any business or activity related to any of the program elements. The permit required under this section shall be posted and conspicuously displayed at the location falling under the requirements of this chapter. Every person, business, or business concern within the jurisdiction of the LACoCUPA and subject to the requirements of one or more of the program elements shall be required to pay the applicable annual fees and any applicable late payment penalty and apply for and obtain from the LACoCUPA a unified program facility permit for the program [Truncated]

PAINT ANDETAIL EXPRESS (Continued) **S123501371**

Violation Date:	02-06-2020
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 02/06/2020. OBSERVATION: The following containers of hazardous waste were observed with incomplete or no hazardous waste (HW) labels: - 1 x 25-gallon drum containing HW paint waste (acetone, xylene toluene) was observed with a HW label without accumulate date info; - 1 x 25-gallon drum containing HW waste liquid (water borne cleaning solution) was observed with a HW label without accumulate date info; CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled. Operator was able to correct this violation during the inspection.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	141252

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/23/2017. Facility failed to adequately complete and electronically submit HMBP to CERS.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	141252
Site Name:	PAINT ANDETAIL EXPRESS
Violation Date:	02-06-2020
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A

PAINT ANDETAIL EXPRESS (Continued) **S123501371**

container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 02/06/2020. OBSERVATION: One 25-gallon drum containing Hazardous Waste paint waste (acetone, xylene toluene) located in the paint room was observed open. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed. Operator was able to correct this violation during the inspection.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 141252
Site Name: PAINT ANDETAIL EXPRESS
Violation Date: 02-06-2020
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 10/13/2021. OBSERVATION: Uniform Hazardous Waste Manifests for paint wastes (acetone, xylene toluene), waste liquid (water borned cleaning solutions), and used paint spray booth filters were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for paint wastes (acetone, xylene toluene), waste liquid (water borned cleaning solutions), and used paint spray booth filters from 2019 to present and submit copies to the CUPA.

Site Name: PAINT ANDETAIL EXPRESS
Violation Date: 03-24-2017
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 03/24/2017. OBSERVATION: Owner/Operator failed to obtain or maintain an active HM permit. CORRECTIVE ACTION: Every business or business concern within the jurisdiction of the LACoCUPA and subject to one or more of the program elements shall be required to apply for, pay the permit fees, and obtain from the LACoCUPA a unified program facility permit for the program elements applicable to such facility prior to the commencement of any business or activity related to any of the program elements. The permit required under this section shall be posted and conspicuously displayed at the location falling under the requirements of this chapter. Every person, business, or business concern within the jurisdiction of the LACoCUPA and subject to the requirements of one or more of the program elements shall be required to pay the applicable annual fees and any applicable late payment penalty and apply for and

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violations:
Site ID: 142464
Site Name: PEREZ WHEELS & TIRES
Violation Date: 01-26-2015
Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.
Violation Notes: Returned to compliance on 01/26/2015. OBSERVATION: Generator failed to properly handle, manage, label, and/or recycle used oil and fuel filters. Observed one 55 gallon drum of drained used oil filters not labeled. CORRECTIVE ACTION: Owner/Operator shall immediatly comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil and fuel filters. Verify compliance with the CUPA within [30 days].
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 142464
Site Name: PEREZ WHEELS & TIRES
Violation Date: 06-19-2018
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 08/23/2018. OBSERVATION: Bills of lading for used oil and fuel filters were not available at the time of inspection & (1) 55-gallon metal drum storing drained used oil filter found unlabeled CORRECTIVE ACTION: Crushed or punctured oil filters must be stored in a container labeled "DRAINED USED OIL FILTERS" with the "ACCUMULATION START DATE". Submit photos to the CUPA demonstrating that the used oil and fuel filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal.
Violation Division: Los Angeles County Fire Department
Violation Program: HW

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:

Name:	CRAFTSMAN LIGHTING DESIGNS INC
Address:	14266 E VALLEY BLVD # A
City,State,Zip:	INDUSTRY, CA 91746
Site ID:	390766
CERS ID:	10284067
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	390766
Site Name:	Craftsman Lighting Designs Inc
Violation Date:	06-03-2015
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Haz Waste Generator Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 07/14/2017. OBSERVATION: The Owner/Operator failed to obtain or no longer has an active hazardous waste generator permit. During an interview with the owner and a review of the facility proofile revealed that the facility does not have a current HW permit. CORRECTIVE ACTION: The Owner/Operator shall immediately apply to receive a new or renewed hazardous waste generator permit and maintain that permit as active as long as the facility is in operation and continues to generate hazardous waste.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS,

Site ID:	390766
Site Name:	Craftsman Lighting Designs Inc
Violation Date:	06-03-2015
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes:	Returned to compliance on 07/14/2017. OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. A review of CERS revealed that there was no annual submital of the HMBP to CERS. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).
Violation Division:	Los Angeles County Fire Department

Citation:	22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description:	Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste

RAPID MFG (Continued) **S106838023**

management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment of the effect, since the baseline year, of each implemented hazardous waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.

Violation Notes: Returned to compliance on 06/03/2015. OBSERVATION: All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Observed a container for the sand blast media and a 55 G drum of waste paint without a hazardous waste label. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 03-17-2022
Citation: HSC 6.95 25510(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25510(a)
Violation Description: Failure to report a release or threatened release of a hazardous material to the unified program agency and to OES.
Violation Notes: Returned to compliance on 08/16/2022. OBSERVATION: The facility failed to immediately report a release of a hazardous material to the local unified program agency (Los Angeles County Fire Department s Health Hazardous Materials Division), and the California State Warning Center (Cal OES). On 1/25/22, the facility had a release of approximately 22,000 gallons of low pH wastewater (pH 1.7-5.4) to the sewer between 0645 and 1140, and then had a second discharge of approximately 36,000 gallons of low pH wastewater (pH <2.0) to the sewer between 1330 and 1500. Quantities and pH levels of wastewater discharged to sewer were verified by review of Slug Discharge Report dated 1/31/22 that was prepared by Tropicana Manufacturing Company Inc; review of inspection reports and pictures of pH recorder data from Los Angeles County

Citation:	HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized.
Violation Notes:	Returned to compliance on 07/27/2022. OBSERVATION: The facility failed to dispose of hazardous waste at a facility which has a permit from the Department of Toxic Substances Control (DTSC) by causing the disposal of hazardous waste at a point which is not authorized pursuant to Health and Safety Code (HSC) Chapter 6.5. According to the Slug Discharge report dated 1/31/22, the facility disposed of approximately 22,000 gallons of low pH wastewater (pH 1.7-5.4) to the Los Angeles County Sanitation District s (LACSD) sewer system on 1/25/22 between 0645 and 1140. Facility was instructed by the LACSD on 1/25/22 at 1310, that under no circumstance are they allowed to discharge wastewater to the sewer with pH <6.0. The Slug Discharge report revealed that the facility disposed of an additional 36,000 gallons of low pH wastewater (pH <2.0) to the sewer system on 1/25/22 between 1330 and 1500. CORRECTIVE ACTION: Immediately discontinue disposing of hazardous waste at any facility not permitted by DTSC or to any [Truncated]

Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 08/14/2019. Observation: Owner/operator failed to accurately submit hazardous materials inventory to the California Environmental Reporting System (CERS). Corrective Action: Log onto the California Environmental Reporting System (CERS) to correct the deficiencies in the HAZARDOUS MATERIALS INVENTORY section. Ensure all reportable hazardous materials (55 gal for liquid, 500 lb for solid, 200 cu. ft for gas) are properly reported to the hazardous materials inventory. Several reportable hazardous materials including (1) 5,400 gal tank of sodium hydroxide solutions, (1) 300 gal tote of glycol, (4) 55 gal drums of sodium hypochlorite and (2) 55 gal drums of waste oil, have not been reported to CERS. Also, ensure each entry is submitted correctly: (1) The anhydrous ammonia is reported as 16,000 lb; there is 21,000 lb of ammonia in the refrigeration system, per operators, (2) Specify the storage location of all hazardous

Violation Description: Failure to ensure the following: 1. Inspections and tests are performed on process equipment; 2. Inspection and testing procedures follow recognized and generally accepted good engineering practices;

WYNHAUSEN CORPORATION (Continued) **S106763924**

3. The frequency of inspections and tests of process equipment is consistent with applicable manufacturers recommendations and good engineering practices, and more frequently if determined to be necessary by prior operating experience; 4. Each inspection or test that has been performed on process equipment is documented and includes the date of inspection or test, name of the person who performed the inspection or test, serial number or other identifier of the equipment inspected or tested, description of the inspection or test performed, and the results of the inspection or test.

Violation Notes: Returned to compliance on 07/18/2019. Observation: Owner/operator failed to label the ammonia detection alarms. All ammonia alarms throughout the site were not labeled. Corrective Action: Ensure the audible/visual ammonia alarms are properly labeled to indicate that these are ammonia detection alarms. (IIAR 2 2014 17.6). Observation: Owner/operator failed to ensure the ammonia system is properly labeled. The diffusion tank for the ammonia system was not labeled and the label on the Accumulator vessel in Chiller Room #9 was damaged/faded and not legible. Corrective Action: Ensure the ammonia system is properly labeled as required. (IIAR 2014 5.14.2) Observation: Owner/operator failed to maintain covered process equipment in good condition. Peeling paint was observed on the liquid line of the Accumulator vessel in Chiller Room #9. Corrective Action: Repair/repaint the liquid line of the Accumulator vessel in Chiller Room #9.

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 02/23/2018. OBSERVATION: Hazardous Waste (HW) employee training records per 22 CCR 66265.16 was not available for review at time of inspection. CORRECTIVE ACTION: As a Large Quantity Hazardous Waste Generator, employee training must be done per 22 CCR 66265.16. All employees shall be trained within six months of assignment and take part in an annual review of the initial training received. The owner or operator shall maintain the following documents and records at the facility: 1) The job title for each position at the facility related to hazardous waste management, and the name of each employee filling each job 2) Written job description for each position

Site Name: TROPICANA MANUFACTURING COMPANY INC.
Violation Date: 04-24-2019
Citation: 19 CCR 4.5 2760.2(e) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.2(e)
Violation Description: Failure to address the following in the Process Hazard Analysis: 1. Establish a system to address the teams findings and recommendations; 2. Assure that the recommendations are resolved and documented; 3. Document what actions are to be taken; 4. Develop a written schedule of when these actions are to be completed; 5. Complete these actions on a timetable agreed upon with the AA, or within two and one-half (2.5) years of performing the PHA, or the next planned turnaround, for those items that require a turnaround; 6. Document the final resolution taken to address each recommendation and actual completion date; and 7. Communicate the actions to operating, maintenance and other employees whose work assignments are in the process and who may be affected by the recommendations or actions.
Violation Notes: Returned to compliance on 07/18/2019. Observation: Owner/operator failed to properly document the completion of the recommendations

WYNHAUSEN CORPORATION (Continued) **S106763924**

identified in the 2014 Seismic Assessment Report. Several recommendations were identified in this report which operators stated have been completed but the completions have not been documented. Corrective Action: Review and verify that all recommendations identified in the 2014 Seismic Assessment Report have been completed. Provide an updated recommendations tracking log to document the completion of these recommendations.

Enforcement Action:
Site ID: 404390
Site Name: TROPICANA MANUFACTURING COMPANY INC.
Site Address: 240 N ORANGE AVE
Site City: INDUSTRY
Site Zip: 91744

WYNHAUSEN CORPORATION (Continued) **S106763924**

Enf Action Date: 06-15-2022
Enf Action Type: AEO - Unified Program
Enf Action Description: Administrative Enforcement Order Based on the Unified Program Statute
Enf Action Notes: Fines/Penalties Assessed: $72,000.00. On March 17, 2022, HHMD Inspector Swearengin conducted a routine inspection at Tropicana Manufacturing Company Inc. The inspector observed three Class I violations. A Notice of Violation was issued and an Administrative Enforcement case was initiated for failure of the following: 19 CCR 4 2631; HSC 6.95 25510(a), 22 CCR 12 66262.34(a)(4); 22 CCR 15 66265.51, and HSC 6.5 25189.5(a), 25201(a). On August 2, 2022, company representatives participated in the settlement conference. All parties mutually agreed to a penalty in the amount of $72,000.00.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Registry ID: 110070864185

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
