GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2023

Next Scheduled EDR Contact: 07/10/2023
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2022

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022
Date Data Arrived at EDR: 11/16/2022
Date Made Active in Reports: 02/06/2023
Number of Days to Update: 82

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

VALLEY CENTRE
14404-14436 E. VALLEY BLVD & 102-190 S. 6TH AVE
CITY OF INDUSTRY, CA 91746

TARGET PROPERTY COORDINATES

Latitude (North):	34.036082 - 34° 2' 9.90''
Longitude (West):	117.978361 - 117° 58' 42.10''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	409685.0
UTM Y (Meters):	3766393.8
Elevation:	301 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015951 BALDWIN PARK, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

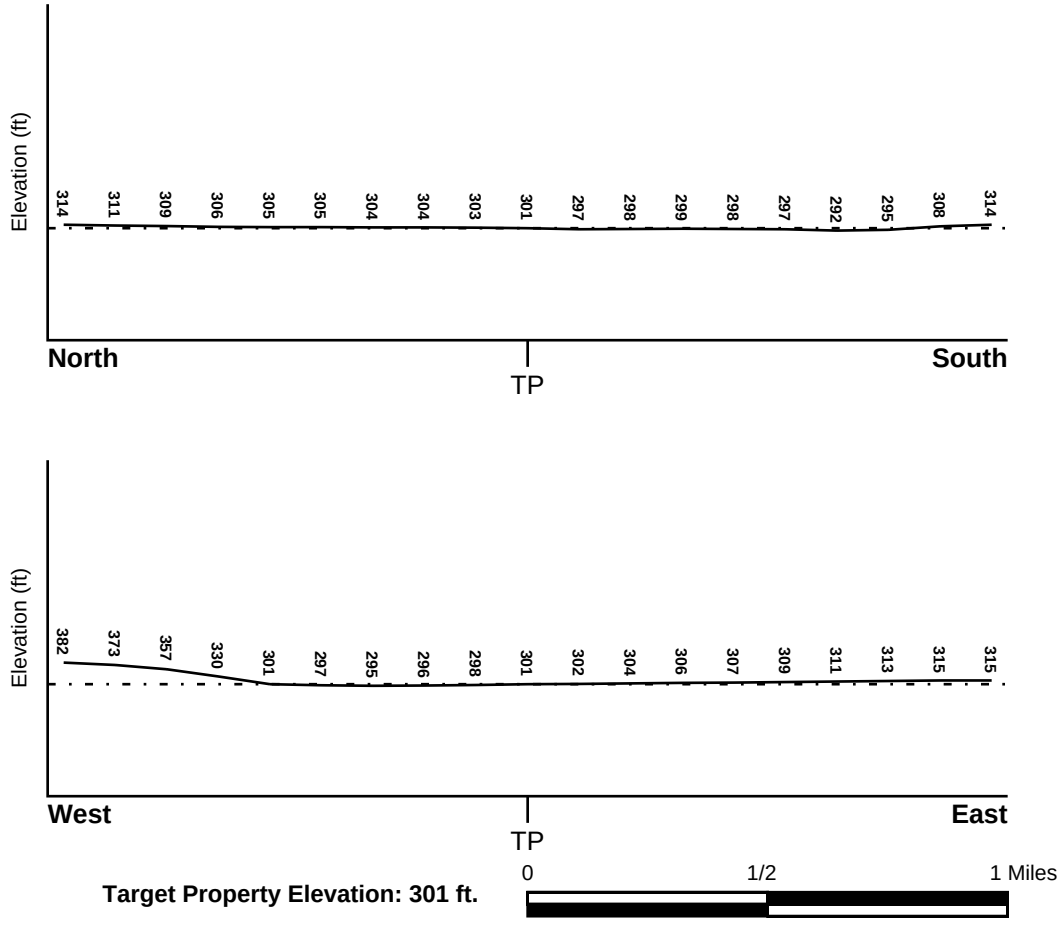
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1700F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BALDWIN PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile ESE
Site Name:	Brough Industries Inc.
Site EPA ID Number:	CAD983633710
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	not available.
Hydraulic Connection:	Aquifers under the site are most likely hydraulically connected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

INSPECTION REPORT

Los Angeles County Fire Department - Health Hazardous Materials Division
Certified Unified Program Agency - Participating Agency
Southeast District Office
12622 Leffingwell Road, Santa Fe Springs, CA 90670
Tel: (562) 379-8781 / Fax: (562) 229-9359
www.fire.lacounty.gov/hhmd

Business: EVERSUN TECHNOLOGIES			**Inspection Date:** 05/15/2015
Address: 148 S 006TH AVE		**City/State:** INDUSTRY, CA 91746	**Telephone:** (626) 934-9868
Owner: EVERSUN TECHNOLOGIES		**Email:** Pending	
FA #: FA0001620	**PR:** PR0008846	**Program Element:** HM HANDLER, FEE GROUP 00	**Inspection Type:** ROUTINE INSPECTION
CERS ID #: 10298131			

☐ - No violations observed at the time of inspection.

This document constitutes a Summary of Violations reported by the inspector; and a Notice to Comply for all cited minor violations.

OUT = Out of Compliance COS = Corrected on Site RPT = Repeat Violation

Annually reviewed and electronically certified that HMBP is complete, accurate and up-to-date — MINOR

■ OUT ☐ COS ☐ RPT — COMPLY BY: 6/14/2015

Violation Description:

Failure to annually review and electronically certify that the business plan is complete and accurate on or before the required due date. HSC 6.95 25508.2

Violation Comments:

OBSERVATION: The facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date.

CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).

OVERALL INSPECTION COMMENTS

Consent Given By:

Jason Chen, President

Attention: Your facility may be subject to reinspection at any time to verify compliance. Failure to comply with the violations cited may result in reinspection fees, permit revocation, and/or administrative/civil/criminal penalties. Any time granted for correction of the violation(s) does not preclude any enforcement action by this Department or other agencies.

It is improper and illegal for any County officer, employee or inspector to solicit bribes, gifts, or gratuities in connection with performing their official duties. Improper solicitations include requests for anything of value such as cash, discounts, free services, paid travel or entertainment, or tangible items such as food or beverages. Any attempt by a County employee to solicit bribes, gifts or gratuities for any reason should be reported immediately to either the County manager responsible for supervising the employee or the Fraud hotline at (800) 544-6861 or www.lacountyfraud.org. YOU MAY REMAIN ANONYMOUS.

CERTIFICATON OF COMPLIANCE

	Los Angeles County Fire Department - Health Hazardous Materials Division **Certified Unified Program Agency - Participating Agency**	
Business:	**FA #:** Pending	**Date:**

The violations cited on the inspection report must be corrected, or disputed, not more than 30 days from the date of receipt of the report; or as otherwise noted. Please submit this certification, and/or any other documentation in support of your claim compliance, to this department in order to avoid penalties. Failure to submit compliance documentation may result in the reinspection of your facility and associated fees pursuant to Los Angeles County Ordinance Section 12.50.131.

VIOLATION(S)	STATEMENT OF CORRECTIVE (OR PROPOSED) ACTIONS:	DATE

I certify under penalty of law that the violations cited on this report have been corrected as indicated. I have personally examined the documentation submitted as proof of compliance and I believe the information to be true, accurate, and complete. I am authorized to file this certification for the facility, and am aware that there are significant penalties for submitting false information pursuant to CA Health & Safety Code Section 25191(b)(1).

■ OUT ■ COS ☐ RPT	COS: 12/20/2017

Violation Description:

Administration/Documentation - General Local Ordinance

Violation Comments:

OBSERVATION: Owner/Operator failed to obtain or maintain an active permit.

CORRECTIVE ACTION: Every business or business concern within the jurisdiction of the LACoCUPA and subject to one or more of the program elements shall be required to apply for, pay the permit fees, and obtain from the LACoCUPA a unified program facility permit for the program elements applicable to such facility prior to the commencement of any business or activity related to any of the program elements. The permit required under this section shall be posted and conspicuously displayed at the location falling under the requirements of this chapter.

Every person, business, or business concern within the jurisdiction of the LACoCUPA and subject to the requirements of one or more of the program elements shall be required to pay the applicable annual fees and any applicable late payment penalty and apply for and obtain from the LACoCUPA a unified program facility permit for the program elements applicable to such facility prior to the commencement of any business or activity related to any of the program elements. Upon receipt of full payment from a unified program facility for all the annual fees, including previous unpaid annual fees, any late payment penalties and the state imposed service charge, assessed pursuant to this chapter and provided all of the applicable regulatory requirements for the permit have been met, the LACoCUPA shall issue a consolidated unified program facility permit to the unified program facility. Each such permit shall be renewable annually as provided for in this chapter. The permit required under this section shall be posted and conspicuously displayed at the location falling under the requirements of this chapter. Failure to pay the annual fee, late payment penalty, or state imposed service charge is a violation of this chapter and may subject the violator to collection action pursuant to Section 12.50.160 of the Los Angeles County. CERTIFICATON OF COMPLIANCE

	Los Angeles County Fire Department - Health Hazardous Materials Division **Certified Unified Program Agency - Participating Agency**	
Business:	**FA #:** Pending	**Date:**

The violations cited on the inspection report must be corrected, or disputed, not more than 30 days from the date of receipt of the report; or as otherwise noted. Please submit this certification, and/or any other documentation in support of your claim compliance, to this department in order to avoid penalties. Failure to submit compliance documentation may result in the reinspection of your facility and associated fees pursuant to Los Angeles County Ordinance Section 12.50.131.

VIOLATION(S)	STATEMENT OF CORRECTIVE (OR PROPOSED) ACTIONS:	DATE

I certify under penalty of law that the violations cited on this report have been corrected as indicated. I have personally examined the documentation submitted as proof of compliance and I believe the information to be true, accurate, and complete. I am authorized to file this certification for the facility, and am aware that there are significant penalties for submitting false information pursuant to CA Health & Safety Code Section 25191(b)(1).

☐ - No violations observed at the time of inspection.

This document constitutes a Summary of Violations reported by the inspector; and a Notice to Comply for all cited minor violations.

OUT = Out of Compliance COS = Corrected on Site RPT = Repeat Violation

Signed copy of Uniform Hazardous Waste Manifest kept for 3 years — MINOR

■ OUT ☐ COS ☐ RPT — COMPLY BY: 2/22/2019

Violation Description:

Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste. 22 CCR 12 66262.40(a)

Violation Comments:

OBSERVATION: Uniform Hazardous Waste Manifests for hazardous waste oil were not available at the time of inspection.

CORRECTIVE ACTION: Locate a copy of all manifests for hazardous waste oil and submit copies to the CUPA.

Labeled all containers or portable tanks containing hazardous waste — MINOR

■ OUT ☐ COS ☐ RPT — COMPLY BY: 2/22/2019

Violation Description:

Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date. 22 CCR 12 66262.34(f)

Violation Comments:

OBSERVATION: A 20 gallon metal drum of used oil located near the roll-up door of the warehouse was observed without a legible label.

CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.

Administration/Documentation - General	MINOR
■ OUT ☐ COS ☐ RPT	COMPLY BY: 2/22/2019

Violation Description:

Administration/Documentation - General 22 CCR Multiple Chapters, Multiple Sections; 40 CFR 1 265; HSC 6.5 Multiple Sections

Violation Comments:

OBSERVATION: Owner/Operator failed to submit the hazardous waste notification electronically to CERS.

CORRECTIVE ACTION: Owner/Operator shall submit a notification of hazardous waste generated by the facility in accordance with HSC 25158 electronically to CERS.

HSC 25404(e)(4) No later than three years after the statewide information management system is established, each CUPA, PA, and regulated business shall report program data electronically. The secretary shall work with the CUPAs to develop a phased in schedule for the electronic collection and submittal of information to be included in the statewide information management system, giving first priority to information relating to those chemicals determined by the secretary to be of greatest concern. The secretary, in making this determination shall consult with the CUPAs, the California Emergency Management Agency, the State Fire Marshal, and the boards, departments, and offices within the California Environmental Protection Agency. The information initially included in the statewide information management system shall include, but is not limited to, the hazardous materials inventory information required to be submitted pursuant to Section 25504.1 for perchlorate materials.

HSC 25158. (a) Except as provided in subdivision (f), any person generating hazardous waste, or owning or operating a facility for the treatment, storage, or disposal of hazardous waste, shall file with the director, or the director's designee, on a form provided by the director, or the director's designee, a hazardous waste notification statement. An amended statement shall be filed with the department whenever there has been a substantial change in the information provided on the previously filed notification statement. A person shall not generate, treat, store, or dispose of hazardous waste, unless the person files a notification statement with the director pursuant to this section, unless exempted pursuant to subdivision(f).

(b) A hazardous waste notification statement shall include all of the following information:

(1) The name and address of the person owning the facility or conducting the activity specified in subdivision (a).

(2) The address and location of the activity or facility, including the city and county.

(3) The name and 24-hour telephone number of the contact person in the event of an emergency involving the facility or activity.

(4) The quantities of hazardous waste annually handled pursuant to the activity or at the facility.

(5) A description of the hazardous waste activity being conducted, such as generation, treatment, storage, or disposal.

(6) A general description of the hazardous waste being handled.

(c) The department shall prepare and distribute the hazardous waste notification statement forms. The form shall include a statement which clearly states who is required to file the form. The form shall also include a statement that the form is not a substitute for the federal notification required by the Environmental Protection Agency pursuant to subsection (a) of Section 6930 of Title 42 of the United States Code.

(d) Any person who is required to submit a hazardous waste notification statement to the director pursuant to subdivision (a) and who fails to do so is subject to a civil penalty of not less than fifty dollars ($50) and not more than five hundred dollars ($500) for each day for which the department does not receive a statement. Any person who knowingly submits false information to the department is subject to a civil penalty of not less than two thousand dollars ($2,000) and not more than twenty thousand dollars ($20,000) for each day that the false information goes uncorrected.

(e) The director shall compile and organize the statements by the city and county within which each activity and facility are located, and shall transmit the compiled statements to the appropriate regional offices, the California regional water quality control boards, and the officers and agencies authorized to enforce this chapter pursuant to subdivision (a) of Section 25180.

(f) Subdivision (a) does not apply to any of the following:

(1) A person who has filed notification with the Administrator of the Environmental Protection Agency pursuant to subsection (a) of Section 6930 of Title 42 of the United States Code.

(2) A person who only produces household hazardous waste, as defined in subdivision (d) of Section 25218.1.

(3) Any person who owns property on which a cleanup of, or other removal of, or remedial action to, a hazardous waste site is

taking place, or who is engaged in any of those activities on a hazardous waste site.

OVERALL INSPECTION COMMENTS

Consent Given By:
ALBERT RUIZ BRISENO, MANAGER

Attention: Your facility may be subject to reinspection at any time to verify compliance. Failure to comply with the violations cited may result in reinspection fees, permit revocation, and/or administrative/civil/criminal penalties. Any time granted for correction of the violation(s) does not preclude any enforcement action by this Department or other agencies.

It is improper and illegal for any County officer, employee or inspector to solicit bribes, gifts, or gratuities in connection with performing their official duties. Improper solicitations include requests for anything of value such as cash, discounts, free services, paid travel or entertainment, or tangible items such as food or beverages. Any attempt by a County employee to solicit bribes, gifts or gratuities for any reason should be reported immediately to either the County manager responsible for supervising the employee or the Fraud hotline at (800) 544-6861 or www.lacountyfraud.org. YOU MAY REMAIN ANONYMOUS.

CERTIFICATON OF COMPLIANCE

	Los Angeles County Fire Department - Health Hazardous Materials Division **Certified Unified Program Agency - Participating Agency**	
Business:	**FA #:** Pending	**Date:**

The violations cited on the inspection report must be corrected, or disputed, not more than 30 days from the date of receipt of the report; or as otherwise noted. Please submit this certification, and/or any other documentation in support of your claim compliance, to this department in order to avoid penalties. Failure to submit compliance documentation may result in the reinspection of your facility and associated fees pursuant to Los Angeles County Ordinance Section 12.50.131.

VIOLATION(S)	STATEMENT OF CORRECTIVE (OR PROPOSED) ACTIONS:	DATE

I certify under penalty of law that the violations cited on this report have been corrected as indicated. I have personally examined the documentation submitted as proof of compliance and I believe the information to be true, accurate, and complete. I am authorized to file this certification for the facility, and am aware that there are significant penalties for submitting false information pursuant to CA Health & Safety Code Section 25191(b)(1).

☐ - No violations observed at the time of inspection.

This document constitutes a Summary of Violations reported by the inspector; and a Notice to Comply for all cited minor violations.

OUT = Out of Compliance COS = Corrected on Site RPT = Repeat Violation

Labeled all containers or portable tanks containing hazardous waste — MINOR

■ OUT ■ COS ☐ RPT — COS: 1/4/2022

Violation Description:

Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date. 22 CCR 12 66262.34(f)

Violation Comments:

OBSERVATION: Observed liquid waste drum located in the shop with the hazardous waste label soiled and faded to the point of being illegible.
Observed container used for solid waste without a waste label attached to include facility name and address, waste classification-solid waste, facility EPA ID number and accumulation start date.

CORRECTIVE ACTION: Hazardous waste labels were replaced on both of the containers listed above at the time of inspection. The waste containers have been properly labeled and violation corrected in site.

Containers of hazardous waste closed except when adding or removing waste — MINOR

■ OUT ☐ COS ☐ RPT — COMPLY BY: 2/3/2022

Violation Description:

Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak. 22 CCR 12 66262.34(d)(2); 40 CFR 1 262.34(d)(2), 265.173

Violation Comments:

OBSERVATION: Observed liquid waste container was observed left with the filling cap open.
Observed container used for solid waste without a lid provided.

CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the containers listed above has been properly closed.

ADDRESS: 190 S 6th Ave, Industry CA 91746
FA: 0000268
DATE: 1/4/2022

OPENING CONFERENCE:
Consent given by Manager Albert Briseno

Walk through: Facility is a retail hose and fittings shop with a service area for replacing hoses and mounting fittings. Facility periodically generates HW from draining old hoses and equipment prior to replacing lines. Also occasional solid waste from spill clean-up and old contaminated hose

Haz Mat Observed:
25 X 5-Gallon containers of new hydraulic oil (retail product, not HM.)
1 X 8-Gallon cylinder of liquid propane gas for one forklift equipment.
FACILITY VERIFIED AS HAVING NO REPORTABLE QUANTITIES OF HM. HM PERMIT CLOSED EFFECTIVE 1/5/2022

Haz Waste Observed:
• (1) 30-GAL metal mini drum of liquid waste hydraulic fluid, label heavily soiled and illegible. NOV
• (1) 55-GAL plastic container of Solid HW, used absorbent and contaminated hose fittings- no label or accumulation start date, NOV.

III Documents:
EPA ID: CAL000409970
CERS #10289614 HW only, no HMBP elements to submit for HM Inventory, Emergency Response Plan or Site Map.

MANIFESTS:
4/1/2021 CK Environmental Services, Manifest #006445438GBF; 1 DM, 30 Gallons liquid waste oil and water mixture.

IV Closing Conference
Violations regarding hazardous waste container waste labels and lid violations discussed with Manager Albert onsite at time of inspection. New labels for the solid and liquid waste drums were filled out and replaced during inspection. Compliance needed for remaining violations. NOV sent via email.

PROGRAM ELEMENT: HAZARDOUS WASTE GENERATOR

RECORD ID: PR0018459

INSPECTED BY: DAVID KORNOFF

EPA ID: CAL000409970

Labeled all containers or portable tanks containing hazardous waste

MINOR

COS: 1/4/2022

☒ **OUT** ☒ **COS** ☐ **RPT**

Violation Description:
Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date. 22 CCR 12 66262.34(f)

Violation Comment:
OBSERVATION: Observed liquid waste drum located in the shop with the hazardous waste label soiled and faded to the point of being illegible.
Observed container used for solid waste without a waste label attached to include facility name and address, waste classification-solid waste, facility EPA ID number and accumulation start date.

CORRECTIVE ACTION: Hazardous waste labels were replaced on both of the containers listed above at the time of inspection. The waste containers have been properly labeled and violation corrected in site.

☒ **OUT** ☐ **COS** ☐ **RPT**

Violation Description:
Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers. 22 CCR 12 66262.34(d)(2); 40 CFR 1 262.34(d)(2), 265.174

Violation Comment:
OBSERVATION: Observed 30 Gallon liquid waste drum located inside the shop with drained oil residue left spilled on top.

CORRECTIVE ACTION: Ensure the hazardous waste storage area is kept tidy and that the waste drums are being inspected weekly and cleaned-off

Containers of hazardous waste closed except when adding or removing waste — **MINOR**

COMPLY BY: 2/3/2022

☒ **OUT** ☐ **COS** ☐ **RPT**

Violation Description:
Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak. 22 CCR 12 66262.34(d)(2); 40 CFR 1 262.34(d)(2), 265.173

Violation Comment:
OBSERVATION: Observed liquid waste container was observed left with the filling cap open.
Observed container used for solid waste without a lid provided.

CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the containers listed above has been properly closed.

INSPECTOR FIELD NOTES

Tuesday, January 4, 2022 - DKORNOFF

DBA Industry Hoses and Fasteners
ADDRESS: 190 S 6th Ave, Industry CA 91746
FA: 0000268
DATE: 1/4/2022

OPENING CONFERENCE:
Consent given by Manager Albert Briseno

Walk through: Facility is a retail hose and fittings shop with a service area for replacing hoses and mounting fittings.
Facility periodically generates HW from draining old hoses and equipment prior to replacing lines. Also occasional solid waste

Business:	FA #:	Date:
INDUSTRY HOSES & FASTENERS	FA0000268	01/04/2022

from spill clean-up and old contaminated hose

Haz Mat Observed:
25 X 5-Gallon containers of new hydraulic oil (retail product, not HM.)
1 X 8-Gallon cylinder of liquid propane gas for one forklift equipment.
FACILITY VERIFIED AS HAVING NO REPORTABLE QUANTITIES OF HM. HM PERMIT CLOSED EFFECTIVE 1/5/2022

Haz Waste Observed:
• (1) 30-GAL metal mini drum of liquid waste hydraulic fluid, label heavily soiled and illegible. NOV
• (1) 55-GAL plastic container of Solid HW, used absorbent and contaminated hose fittings- no label or accumulation start date, NOV.

III Documents:
EPA ID: CAL000409970
CERS #10289614 HW only, no HMBP elements to submit for HM Inventory, Emergency Response Plan or Site Map.

MANIFESTS:
4/1/2021 CK Environmental Services, Manifest #006445438GBF; 1 DM, 30 Gallons liquid waste oil and water mixture.

IV Closing Conference
Violations regarding hazardous waste container waste labels and lid violations discussed with Manager Albert onsite at time of inspection. New labels for the solid and liquid waste drums were filled out and replaced during inspection. Compliance needed for remaining violations. NOV sent via email.

Violation Description:
Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste. 22 CCR 12 66262.40(a)

Violation Comment:
OBSERVATION: Uniform Hazardous Waste Manifests for waste paint related liquids were not available at the time of inspection.

CORRECTIVE ACTION: Locate a copy of all manifests for waste paint related liquids from 2020 to present and submit copies to the CUPA.

3/22/2021 G. Wang:

Follow-up review conducted to show no compliance for updating facility's CERS account.

Operator also sent email on 2/1/2021 to provide supporting document (see attachment) to demonstrate compliance.

Pending compliance for operator to update its CERS account. Follow-up required.

INSPECTOR FIELD NOTES

Field Notes for GM Auto Paint Supplies, Inc. (D.B.A. GM Auto Paint #3) located at 14414 Valley Blvd., Industry, CA 91746 on 1/11/2021 by G. Wang:

Routine HM and HW inspections and a license investigation were conducted on 1/11/2021.

License investigation conducted to show the facility is a retail store of auto paints and supplies. The facility was verified to be a SQG hazardous waste generator with 1 HW employee corresponding to PE 1000 and a hazardous materials handler with volume thresholds corresponding to PE 3001. Observed the following hazardous wastes and hazardous materials on site at the time of inspection:

- 27 x 5-gallon containers containing lacquer thinner – Total: 135 gallons of lacquer thinner;
- 17 x 5-gallon containers containing acetone – Total: 85 gallons of acetone;
- 50 x 5-gallon containers containing reducer – Total: 250 gallons of reducer;
- 1 x 35-gallon metal container containing HW waste paint related liquids

Business:	**FA #:**	**Date:**
GM AUTO PAINT #3	FA0053325	01/11/2021

The facility was verified to be a(n):
- hazardous materials handler with volume thresholds corresponding to PE 3001;
- SQG hazardous waste generator with 2 HW employees corresponding to PE 1000;

OPENING CONFERENCE:

Richard Flores, Manager, was informed that the purpose of this visit was to conduct routine inspections and gave consent for inspection.

WALK THROUGH:

The facility is a retail store of auto paints and supplies.

Facility info:
- has 6 employees including 1 sale, 2 drivers, 2 counters, and 1 color matcher;
- sales both solvent based and water based auto paints;

Store:
- 27 x 5-gallon containers containing lacquer thinner – Total: 135 gallons of lacquer thinner;
- 17 x 5-gallon containers containing acetone – Total: 85 gallons of acetone;
- 50 x 5-gallon containers containing reducer – Total: 250 gallons of reducer;
- has a small paint spray booth – advised operator that used filters could be HW;
- 1 x 35-gallon metal container containing HW waste paint related liquids – labeled;

DOCUMENTS:

Permits ? None (NOV)
EPA ID# (CAL000387730) ? active
CERS ID# ? No CERS account and nothing has been submitted to CERS (NOV);
HMBP training record ? None (NOV)
Manifest ? None (NOV)

IV. CLOSING CONFERENCE

- The inspection report and inspection findings were explained to the operator/owner.
- The owner/operator was advised to update, review and submit any and all information missing in the California Environmental Reporting System (CERS) online system.
- The owner/operator was advised of proper hazardous waste management, hazardous materials handling, record-keeping, permit payment, and good business practices.

LOG SHEET

3/22/2021 G. Wang:

Follow-up review conducted to show no compliance for updating facility's CERS account.

Operator also sent email on 2/1/2021 to provide supporting document (see attachment) to demonstrate compliance.

Pending compliance for operator to update its CERS account. Follow-up required.

INSPECTOR FIELD NOTES

Field Notes for GM Auto Paint Supplies, Inc. (D.B.A. GM Auto Paint #3) located at 14414 Valley Blvd., Industry, CA 91746 on 1/11/2021 by G. Wang:

Routine HM and HW inspections and a license investigation were conducted on 1/11/2021.

Business:	FA #:	Date:
GM AUTO PAINT #3	FA0053325	01/11/2021

License investigation conducted to show the facility is a retail store of auto paints and supplies. The facility was verified to be a SQG hazardous waste generator with 1 HW employee corresponding to PE 1000 and a hazardous materials handler with volume thresholds corresponding to PE 3001. Observed the following hazardous wastes and hazardous materials on site at the time of inspection:

- 27 x 5-gallon containers containing lacquer thinner – Total: 135 gallons of lacquer thinner;
- 17 x 5-gallon containers containing acetone – Total: 85 gallons of acetone;
- 50 x 5-gallon containers containing reducer – Total: 250 gallons of reducer;
- 1 x 35-gallon metal container containing HW waste paint related liquids

The facility was verified to be a(n):
- hazardous materials handler with volume thresholds corresponding to PE 3001;
- SQG hazardous waste generator with 2 HW employees corresponding to PE 1000;

OPENING CONFERENCE:

Richard Flores, Manager, was informed that the purpose of this visit was to conduct routine inspections and gave consent for inspection.

WALK THROUGH:

The facility is a retail store of auto paints and supplies.

Facility info:
- has 6 employees including 1 sale, 2 drivers, 2 counters, and 1 color matcher;
- sales both solvent based and water based auto paints;

Store:
- 27 x 5-gallon containers containing lacquer thinner – Total: 135 gallons of lacquer thinner;
- 17 x 5-gallon containers containing acetone – Total: 85 gallons of acetone;
- 50 x 5-gallon containers containing reducer – Total: 250 gallons of reducer;
- has a small paint spray booth – advised operator that used filters could be HW;
- 1 x 35-gallon metal container containing HW waste paint related liquids – labeled;

DOCUMENTS:

Permits ? None (NOV)
EPA ID# (CAL000387730) ? active
CERS ID# ? No CERS account and nothing has been submitted to CERS (NOV);
HMBP training record ? None (NOV)
Manifest ? None (NOV)

IV. CLOSING CONFERENCE

- The inspection report and inspection findings were explained to the operator/owner.
- The owner/operator was advised to update, review and submit any and all information missing in the California Environmental Reporting System (CERS) online system.
- The owner/operator was advised of proper hazardous waste management, hazardous materials handling, record-keeping, permit payment, and good business practices.

Business:	FA #:	Date:

RE: PRA of April 05, 2023, Reference # H058658-040523.

Dear Junior Project Manager Kofi Bonner,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 116 S 006TH AVE
INDUSTRY CA 91746

The search revealed that no records were found for the above noted address.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, CulverCity, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance& Underground Storage Tanks in Los Angeles County jurisdiction click here.

If you have any questions regarding your request, please contact our office at (562) 379-8781.

Dear Junior Project Manager Kofi Bonner:

Thank you for your interest in public records of the Los Angeles County Fire Department. Your request was received in this office on 4/5/2023 and given the reference number H058658-040523 for tracking purposes.

Your request will be forwarded to the relevant department(s) to locate the information you seek and to determine the volume and any costs associated with satisfying your request. You will be contacted about the availability and/or provided with copies of the records in question.

You can monitor the progress of your request at the My Request Center and you'll receive an email when your request has been completed.

In an effort to reduce the spread of COVID-19, our Department administrative offices are temporarily closed until further notice. Department personnel will be unable to access physical files to process any Public Records Act (PRA) requests in a timely manner. Once business operations resume, the PRA requests will be processed in the order they are received. The Los Angeles County Fire Department's Health Hazardous Materials Division greatly appreciates your patience in this time of crisis.

SAN GABRIEL VALLEY WATER COMPANY
-CONSUMER CONFIDENCE REPORT-
-YEAR 2021-

This report contains important information about your drinking water.
If necessary, have someone who understands it translate or explain it to you.
Este informe contiene información muy importante sobre su agua potable.
Si, necesario, tradúzcalo o hable con alguien que lo entienda bien.
此份有关你的食水报告，内有重要资料和讯息，请找他人为你翻译及解释清楚。

The source of water provided to San Gabriel Valley Water Company's customers, except those located in the Whittier/Santa Fe Springs area, was groundwater produced from the Main San Gabriel Basin. The source of water provided to customers in the Whittier/Santa Fe Springs area south of Beverly Boulevard was a blend of groundwater from the Main San Gabriel Basin and the Central Basin.

All water samples were collected by state-certified employees of the water company or independent engineering firms. Samples were analyzed by state-certified independent laboratories and the results were forwarded to the State Water Resources Control Board ("State Board"), Division of Drinking Water. The following report provides detailed information about the quality of the water delivered to customers. The water supplied by San Gabriel Valley Water Company complies with all state and federal safe drinking water standards and regulations.

DETECTED WATER QUALITY CONSTITUENTS - GROUNDWATER

Primary Standards

Microbiological	*Units*	*PHG (MCLG)*	*MCL*	*Highest Percentage of Positive Samples Collected*	*SampleYear*	*Likely Source of Detected Constituent*
Total Coliform Bacteria	%	(0)	5% **(a)**	0.51%	2021	Naturally present in the environment
Fecal Coliform and E. coli	%	0	0	0.00%	2021	Human and animal fecal waste

Radiological

Water Quality Constituent	*Units*	*PHG (MCLG)*	*MCL*	*Range*	*Average*	*SampleYear*	*Likely Source of Detected Constituent*
Gross Alpha	pCi/L	(0)	15	ND - 7.67	1.79	2013-21	Erosion of natural deposits
Uranium	pCi/L	0.43	20	ND - 10.00	3.05	2015-21	Erosion of natural deposits

Inorganics

Aluminum **(b)**	ppb	600	1000	ND	ND	2019-21	Erosion of natural deposits
Arsenic	ppb	0.004	10	ND - 3.30	1.34	2019-21	Erosion of natural deposits; runoff from orchards; glass and electronics production wastes
Barium	ppb	2,000	1,000	ND - 210.00	63.93	2019-21	Discharges of oil drilling wastes and from metal refineries; erosion of natural deposits
Fluoride	ppm	1	2	0.15 - 0.78	0.35	2019-21	Erosion of natural deposits; discharge from fertilizer and aluminum factories
Nitrate (as Nitrogen)	ppm	10	10	ND - 7.60	4.32	2020-21	Runoff and leaching from fertilizer use; leaching from septic tanks and sewage; erosion of natural deposits
Selenium	ppb	30	50	ND - 6.40	0.22	2019-21	Discharge from petroleum, glass, and metal refineries; erosionof natural deposits; discharge from mines and chemical manufacturers; runoff from livestock lots (feed additives)

Organics

Tetrachloroethylene(PCE)	ppb	0.06	5	ND - 0.53	<0.50	2021	Discharge from factories, dry cleaners, and autoshops (metal degreaser)
Xylenes	ppb	1800	1750	ND - 0.58	<0.50	2021	Discharge from petroleum and chemical factories; fuel solvent

Secondary Standards (Aesthetic Standards)

Aluminum **(b)**	ppb	NS	200	ND	ND	2019-21	Erosion of natural deposits
Chloride	ppm	NS	500	3.80 - 130.00	39.68	2019-21	Runoff and leaching from natural deposits
Color	units	NS	15	ND	ND	2021	Naturally-occurring organic materials
Iron	ppb	NS	300	ND - 110.00	3.14	2019-21	Leaching from natural deposits; industrial wastes
Manganese	ppb	NS	50	ND - 7.90	<0.40	2019-21	Leaching from natural deposits
Odor-Threshold	units	NS	3	1.00	1.00	2021	Naturally-occurring organic materials
Specific Conductance	µs/cm	NS	1,600	320.00 - 1100.00	613.29	2019-21	Substances that form ions when in water
Sulfate	ppm	NS	500	19.00 - 200.00	63.49	2019-21	Runoff and leaching from natural deposits; industrial wastes
Total Dissolved Solids	ppm	NS	1,000	190.00 - 660.00	390.83	2019-21	Runoff and leaching from natural deposits
Turbidity **(c)**	NTU	NS	5	ND - 0.75	<0.10	2021	Soil runoff

Additional Constituents (Unregulated)

Alkalinity (CaCO3)	ppm	NS	NS	140.00 - 250.00	190.00	2019-21	Unknown

Perfluorooctanesulfonic Acid (PFOS)	ppt	NS	6.5	ND - 5.00	<2.00	2021	Man-made substances used in surface coatings and protectant formulations. Discharge of runoff from fire training/response sites, industrial sites, landfills and wastewater treatment plants.

Disinfectant / Disinfection By-Products							
Water Quality Constituent	**Units**	**PHG (MCLG) [MRDLG]**	**MCL [MRDL]**	**Range**	**Average**	**Sample Year**	**Likely Source of Detected Constituent**
Total Trihalomethanes	ppb	NS	80	ND - 13.00	10.30	2021	By-product of drinking water disinfection
Haloacetic Acids	ppb	NS	60	ND - 2.10	1.50	2021	By-product of drinking water disinfection
Chlorine Residual	ppm	[4]	[4]	0.84 - 1.80	1.30	2021	Drinking water disinfectant added for treatment

Lead and Copper Monitoring (El Monte/Whittier System)						
Water Quality Constituent	**Units**	**Regulatory Action Level (d)**	**Sample Year**	**90th Percentile**	**Number of Samples Exceeding The Action Level**	**Likely Source of Detected Constituent**
Lead	ppb	15	2020	ND	0	Internal corrosion of household water plumbing systems; discharges from industrial manufacturers; erosion of natural deposits
Copper	ppb	1300	2020	460.00	0	Internal corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives

Pursuant to Title 22 of the California Code of Regulations, Lead and Copper monitoring for San Gabriel Valley Water Company's El Monte/Whittier system was completed in 2020 with the collection of 50 samples. The next sampling event will commence in September 2023.

Lead and Copper Monitoring (Montebello System) (e)						
Water Quality Constituent	**Units**	**Regulatory Action Level (d)**	**Sample Year**	**90th Percentile**	**Number of Samples Exceeding The Action Level**	**Likely Source of Detected Constituent**
Lead	ppb	15	2019	ND	0	Internal corrosion of household water plumbing systems; discharges from industrial manufacturers; erosion of natural deposits
Copper	ppb	1300	2019	290.00	0	Internal corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives

Pursuant to Title 22 of the California Code of Regulations, Lead and Copper monitoring for San Gabriel Valley Water Company's Montebello system was completed in 2019 with the collection of 20 samples. The next sampling event will commence in September 2022.

Lead Monitoring for Schools							
Water Quality Constituent	**Units**	**Action Level**	**Sample Year**	**Range**	**Average**	**Number of Schools**	**Likely Source of Detected Constituent**
Lead	ppb	15	2018-19	ND - 43	1.60	29	Internal corrosion of household water plumbing systems; discharges from industrial manufacturers; erosion of natural deposits

During 2018-2019 twenty-nine schools were tested for lead. Of the twenty-nine schools tested, 2 schools exceeded the action level of 15 ppb. One school was resampled with confirmation results below the action level and one school took the source out of service. No further action was required.

THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY ("USEPA") AND STATE BOARD REQUIRE US TO PROVIDE THE FOLLOWING INFORMATION:

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline (1-800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA/Centers for Disease Control guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- *Microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.*
- *Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, and mining.*
- *Pesticides and herbicides, that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.*
- *Organic chemical contaminants, including synthetic and volatile organic chemicals, that are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.*
- *Radioactive contaminants, that can be naturally-occurring or be the result of oil and gas production and mining activities.*

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. San Gabriel Valley Water Company is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you do so, you may wish to collect the flushed water and reuse it for another beneficial purpose, such as watering plants. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/lead.

Nitrate: Nitrate in drinking water at levels above 10 ppm is a health risk for infants of less than six months of age. Such nitrate levels in drinking water can interfere with the capacity of the infant's blood to carry oxygen, resulting in a serious illness; symptoms include shortness of breath and blueness of the skin. Nitrate levels above 10 ppm may also affect the ability of the blood to carry oxygen in other individuals, such as pregnant women and those with certain specific enzyme deficiencies. If you are caring for an infant, or you are pregnant, you should ask advice from your health care provider.

Perfluoroalkyl substances: Perfluoroalkyl substances, PFOA and PFOS, are a group of man-made chemicals used for many years in firefighting foams and in grease and stain-resistant, non-stick coatings and consumer products such as carpets, clothing, furniture and cookware. Exposure to levels of PFOA and PFOS in drinking water in excess of the Notification Level over many years may result in adverse health effeccts including developmental effects to fetuses during pregnancy, cancer, liver effects, thyroid effects and other effects (e.g., cholesterol changes).

This Consumer Confidence Report (CCR) reflects changes in drinking water regulatory requirements during 2021. These revisions add the requirements of the federal Revised Total Coliform Rule, effective since April 1, 2016, to the existing state Total Coliform Rule. The revised rule maintains the purpose to protect public health by ensuring the integrity of the drinking water distribution system and monitoring for the presence of microbials (i.e., total coliform and E. coli bacteria). The U.S. EPA anticipates greater public health protection as the rule requires water systems that are vulnerable to microbial contamination to identify and fix problems. Water systems that exceed a specified frequency of total coliform occurrences are required to conduct an assessment to determine if any sanitary defects exist. If found, these must be corrected by the water system. The state Revised Total Coliform Rule became effective July 1, 2021.

In order to ensure that tap water is safe to drink, the USEPA and the State Board prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. The U.S. Food and Drug Administration regulations and California law also establish limits for contaminants in bottled water that provide the same protection for public health.

Additional Water Quality Information

San Gabriel Valley Water Company completed groundwater source assessments in 2002 and new assessments were completed in 2005, 2008 and 2017 for new sources added to the system. Groundwater sources are considered vulnerable to discharge from industry, factories, landfills, dry cleaners, automobile repair shops, gas stations, high density housing, fleet truck and bus terminals, underground storage tanks, and sewer collection systems. Copies of the groundwater source assessments are available for review at San Gabriel Valley Water Company's main office. All groundwater sources are disinfected before the water is distributed to the customers.

In addition to the constituents listed in this report, San Gabriel Valley Water Company conducted monitoring for over 100 additional constituents and the results show none of those constituents detected in the water. Included in this additional monitoring were constituents for which Division of Drinking Water and USEPA have not yet set standards. The State Board allows us to monitor for some contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of our data, though representative, are more than one year old. For additional water quality information, contact: Hai-Van Nguyen, Water Quality Superintendent, at htnguyen@sgvwater.com or at (626) 448-6183, or write to San Gabriel Valley Water Company, Post Office Box 6010, El Monte, California 91734-2010.

Definitions and Footnotes:

MCL = Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.

MCLG = Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the USEPA.

MRDL = Maximum Residual Disinfectant Level: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

MRDLG = Maximum Residual Disinfectant Level Goal: The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

ND = None Detected

NL = Notification Level: Non-regulatory health based advisory levels established by the State Board for chemicals in drinking water that lack maximum contaminant levels.

NS = No Standard

NTU = Nephelometric Turbidity Units: A measurement of the turbidity of water as determined by the methods in 40 Code of Federal Regulations, part 141.74(a)(1) (67 Fed. Reg. 65888 (October 29, 2002), which is incorporated by reference.

pCi/L = picocuries per Liter

PHG = Public Health Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency, Office of Environmental Health Hazard Assessment.

ppb = parts per billion. A ppb is equivalent to 1 second in nearly 32 years

ppm = parts per million. A ppm is equivalent to to 1 second in 11.5 days

ppt = parts per trillion. A ppt is equivalent to 1 second in nearly 32,000 years

units = Units of Measure

TT = Treatment Technique: A required process intended to reduce the level of a contaminant in drinking water.

µs/cm = microSiemens per centimeter

(a) = When 40 or more routine samples are collected per month, no more than 5% of the samples may be total coliform positive.

(b) = Aluminum has both primary and secondary standards.

(c) = Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of water quality. High turbidity can hinder the effectiveness of disinfectants.

(d) = Regulatory Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

(e) = The Montebello System is that portion of the City of Montebello south of the Pomona Freeway.

< = Detected but the average is less than than California's Detection Limits for the Purposes of Reporting (DLR).

This report along with other important information can be found on the company's website at ***www.sgvwater.com.***

Morehouse College, Atlanta, GA

CERTIFICATIONS

OSHA 10HR

Lead Sampling Technician - California

WITH HILLMANN SINCE 2022

PROFESSIONAL EXPERIENCE

Mr. Bonner is currently a Junior Project Manager for our Southern California Office. He came to Hillmann with a diverse background in Environmental Engineering and Project Management. He conducts a variety of real estate due diligence services including Phase I and Phase II Environmental Site Assessments in addition to performing subsurface soil, groundwater, and vapor intrusion investigations for residential, commercial, and industrial properties.

Mr. Bonner regularly performs indoor air quality assessments for several high-profile clients throughout Southern California. He is also responsible for performing air and surface hazard materials testing, and potable and non-potable water sampling. Mr. Bonner supervises work practices and controls in accordance with job specifications, current EPA, OSHA, and state regulations.

RELEVANT PROJECT EXPERIENCE

ENGEO Inc. | San Ramon, CA
As a Project Manager for ENGEO, Inc., Mr. Bonner worked on a multitude of environmental projects, working directly with clients and county representatives to assess potential environmental issues on site. He actively sampled soil, soil gas, and groundwater and then analyzed data received from labs to compare the results against applicable environmental screening levels. He made recommendations as to what steps would need to be taken to remediate sites based on sample analysis results and created programs that were able to take environmental data and automatically compare them to state screening levels.

Morehouse College Smart Biomaterials Lab | Atlanta, GA
As a Research Assistant in Morehouse College's Smart Biomaterials Lab, Mr. Bonner worked directly under Dr. Juana Mendenhall to perform research on thermosensitive plastics. He researched and experimented on PVCL membranes and their ability to filter out contaminants in soil. He also researched radionuclides and attempted to create PVCL hybrid membranes that were able to filter out harmful radionuclides from water and soil.

STEPHEN BARTLETT

Senior Project Manager
Environmental Health & Safety

PROFESSIONAL EXPERIENCE

Mr. Bartlett is a Senior Project Manager for our Southern California Office. Mr. Bartlett has supervised work practices and controls in accordance with job specifications, current EPA, OSHA, and state regulations for asbestos abatement projects in schools, as well as commercial, industrial, public, and multi-family residential buildings.

As a Senior Project Manager, Mr. Bartlett performs quality assurance air sampling for asbestos, lead, and mold abatement projects. Mr. Bartlett is also responsible for performing air and surface hazard materials testing, and potable and non-potable water sampling. He regularly performs indoor air quality assessments for several high-profile clients.

Mr. Bartlett is skilled at performing phase I environmental site assessments and transaction screens to meet environmental due diligence requirements under CERCLA.

RELEVANT PROJECT EXPERIENCE

Tishman Speyer Properties | Nationwide
Hillmann has been providing the complete environmental program for Tishman Speyer properties since 1987. Our services include phase I environmental site assessments, asbestos surveys, air monitoring, bid administration, O&M programs, industrial hygiene, and indoor air quality programs.

Brookfield Properties | Various Locations
Since 1987, Hillmann has performed industrial hygiene, mold and moisture assessments, indoor air quality, asbestos surveys, project design and management services, and geotechnical services in numerous locations in the New York and Los Angeles metropolitan areas.

WITH HILLMANN SINCE 1988

PROFESSIONAL EXPERIENCE

Mr. Rutherford currently serves as Hillmann's Quality Management and Technical Director of Environmental Due Diligence services. Previously, Mr. Rutherford served as the Director of Due Diligence. He has over 3 decades of experience in the environmental consulting industry, specifically in managing and performing environmental property assessments including USEPA and NJDEP Preliminary Assessments.

As the Quality Management Director, Mr. Rutherford is responsible for overseeing the quality of all services across the company, including development of standard protocols, report content/templates, and account management strategies. He has managed large national accounts for real estate due diligence services including a desktop review service that handled nearly 500 properties per year.

Additionally, Mr. Rutherford has performed and/or managed Phase II Environmental Site Assessments (ESAs), Underground Storage Tank (UST) investigations/closures, Property Condition Assessments (PCA), Construction Monitoring inspections, Asbestos surveys, Asbestos Abatement Project Monitoring services, Indoor Air Quality (IAQ) surveys, NPDES Discharge Monitoring, Community Right-to-Know surveys, and Environmental Risk Analysis for compliance with the Sarbanes-Oxley act.

RELEVANT PROJECT EXPERIENCE

TD Bank, N.A. | Various Locations
Hillmann has performed phase I ESAs at several properties on behalf of TD Bank. Mr. Rutherford previously managed the group that conducts the assessments for this contract, which is ongoing.

HSBC Bank | NYC Metro
Hillmann provided complete environmental program including phase I ESAs, asbestos surveys, air monitoring, bid administration, O&M programs, industrial hygiene, and indoor air quality programs.

Peapack Gladstone Bank | NY, NJ, and PA
Hillmann has performed phase I ESAs at numerous properties on behalf of Peapack Gladstone Bank since 2013. Mr. Rutherford

HILLMANN
CONSULTING

RELEVANT PROJECT EXPERIENCE CONTINUED

previously managed the team that conducts the assessments for this contract, which is ongoing.

The Davis Companies | Norwalk, CT
On behalf of The Davis Companies, Hillmann provided an Advisory Report of analysis and opinion regarding the potential electromagnetic fields (EMF) health risks that may be associated with a newly constructed sub-station on an adjacent property.

Multi-Family Portfolio | New York, NY
Hillmann conducted environmental due diligence services and a construction plan and cost review for a rehabilitation project of 45 low-income multi-family apartment buildings in upper Manhattan. Mr. Rutherford coordinated and oversaw the completion of 45 phase I ESA reports and 5 phase II site investigations associated with this project.

MBD Community Housing Corporation | Bronx, NJ
Hillmann conducted environmental due diligence services for various multi-family apartment buildings located throughout New York City; including a portfolio of 11 buildings in Bronx, NY.

International Portfolio of Industrial Properties
Mr. Rutherford was the Project Manager for a multi-level environmental due diligence assessment for a portfolio of 113 light industrial properties located throughout the United States and Mexico.

Confidential Client | Various Locations
Mr. Rutherford was responsible for conducting multiple risk assessments for a confidential client. The purpose for conducting the assessments was to project a cost estimate for potential environmental liabilities associated with over 3,700 former drug store facilities in compliance with the Sarbanes-Oxley act.

REPORT OF FINDINGS
ENVIRONMENTAL PROPERTY INVESTIGATION
VALLEY CENTER AND DON JULIAN PROPERTIES

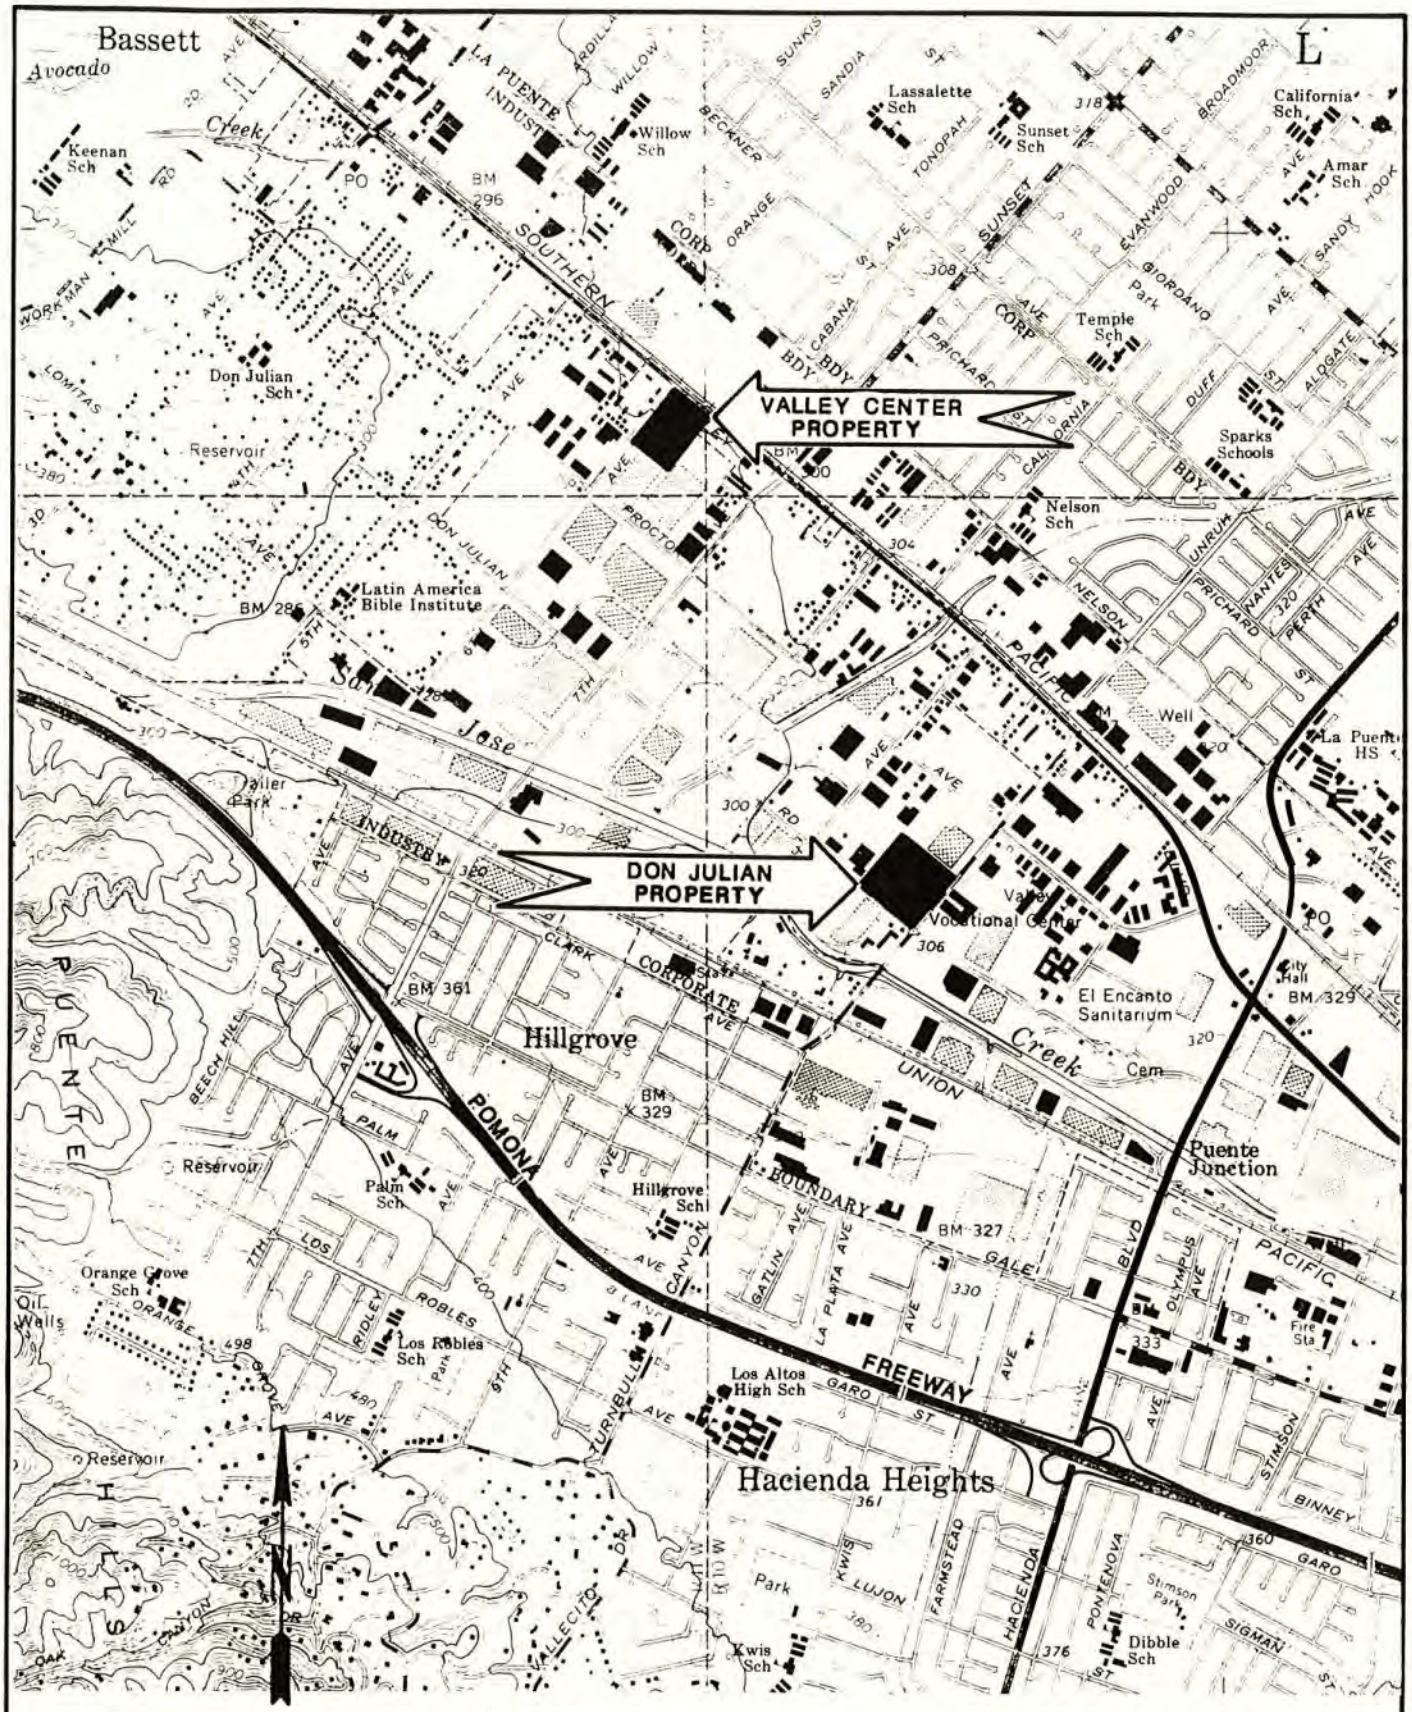
1.0 INTRODUCTION

This report presents the findings of Hydrotech Consultants, Inc.'s (Hydrotech) Environmental Property Investigation of the Don Julian and Valley Center Properties, both located in the City of Industry, California. The Don Julian Property is located at 15151 Don Julian Road and 425-427 Turnbull Canyon Road. The Valley Center property is located at 14404-14436 Valley Boulevard and 100-190 South Sixth Street (see Figure 1, Location Map). The investigation was performed in accordance with Proposal Number HTC-9-1015 as authorized by Mr. Richard C. Hunsaker on June 22, 1989.

1.1 Purpose

The purpose of the investigation was to assess whether surficial indications of potential hazardous waste contamination are present at the sites and to evaluate whether past or present land use activities may be potential sources of contamination at the sites. Specific objectives were to evaluate agency files relevant to the sites, to observe for surficial evidence of hazardous waste contamination, to investigate historic land use, to assess the general geologic/hydrogeologic nature of the site and to collect samples of potential asbestos-containing building materials for laboratory analysis. This project did not include subsurface investigations or sampling of surface or subsurface soils and water for analyses.



ADAPTED FROM U.S.G.S. 7.5' BALDWIN PARK QUADRANGLE (1981)

LOCATION MAP-DON JULIAN & VALLEY CENTER PROPERTIES-INDUSTRY, CALIF.

JOB NO.:	DATE:	FIGURE:
HTC-7594-005-00-00	JULY 1989	1

HYDROTECH CONSULTANTS, INC.

1.2 Scope of Work

The scope of authorized services included:

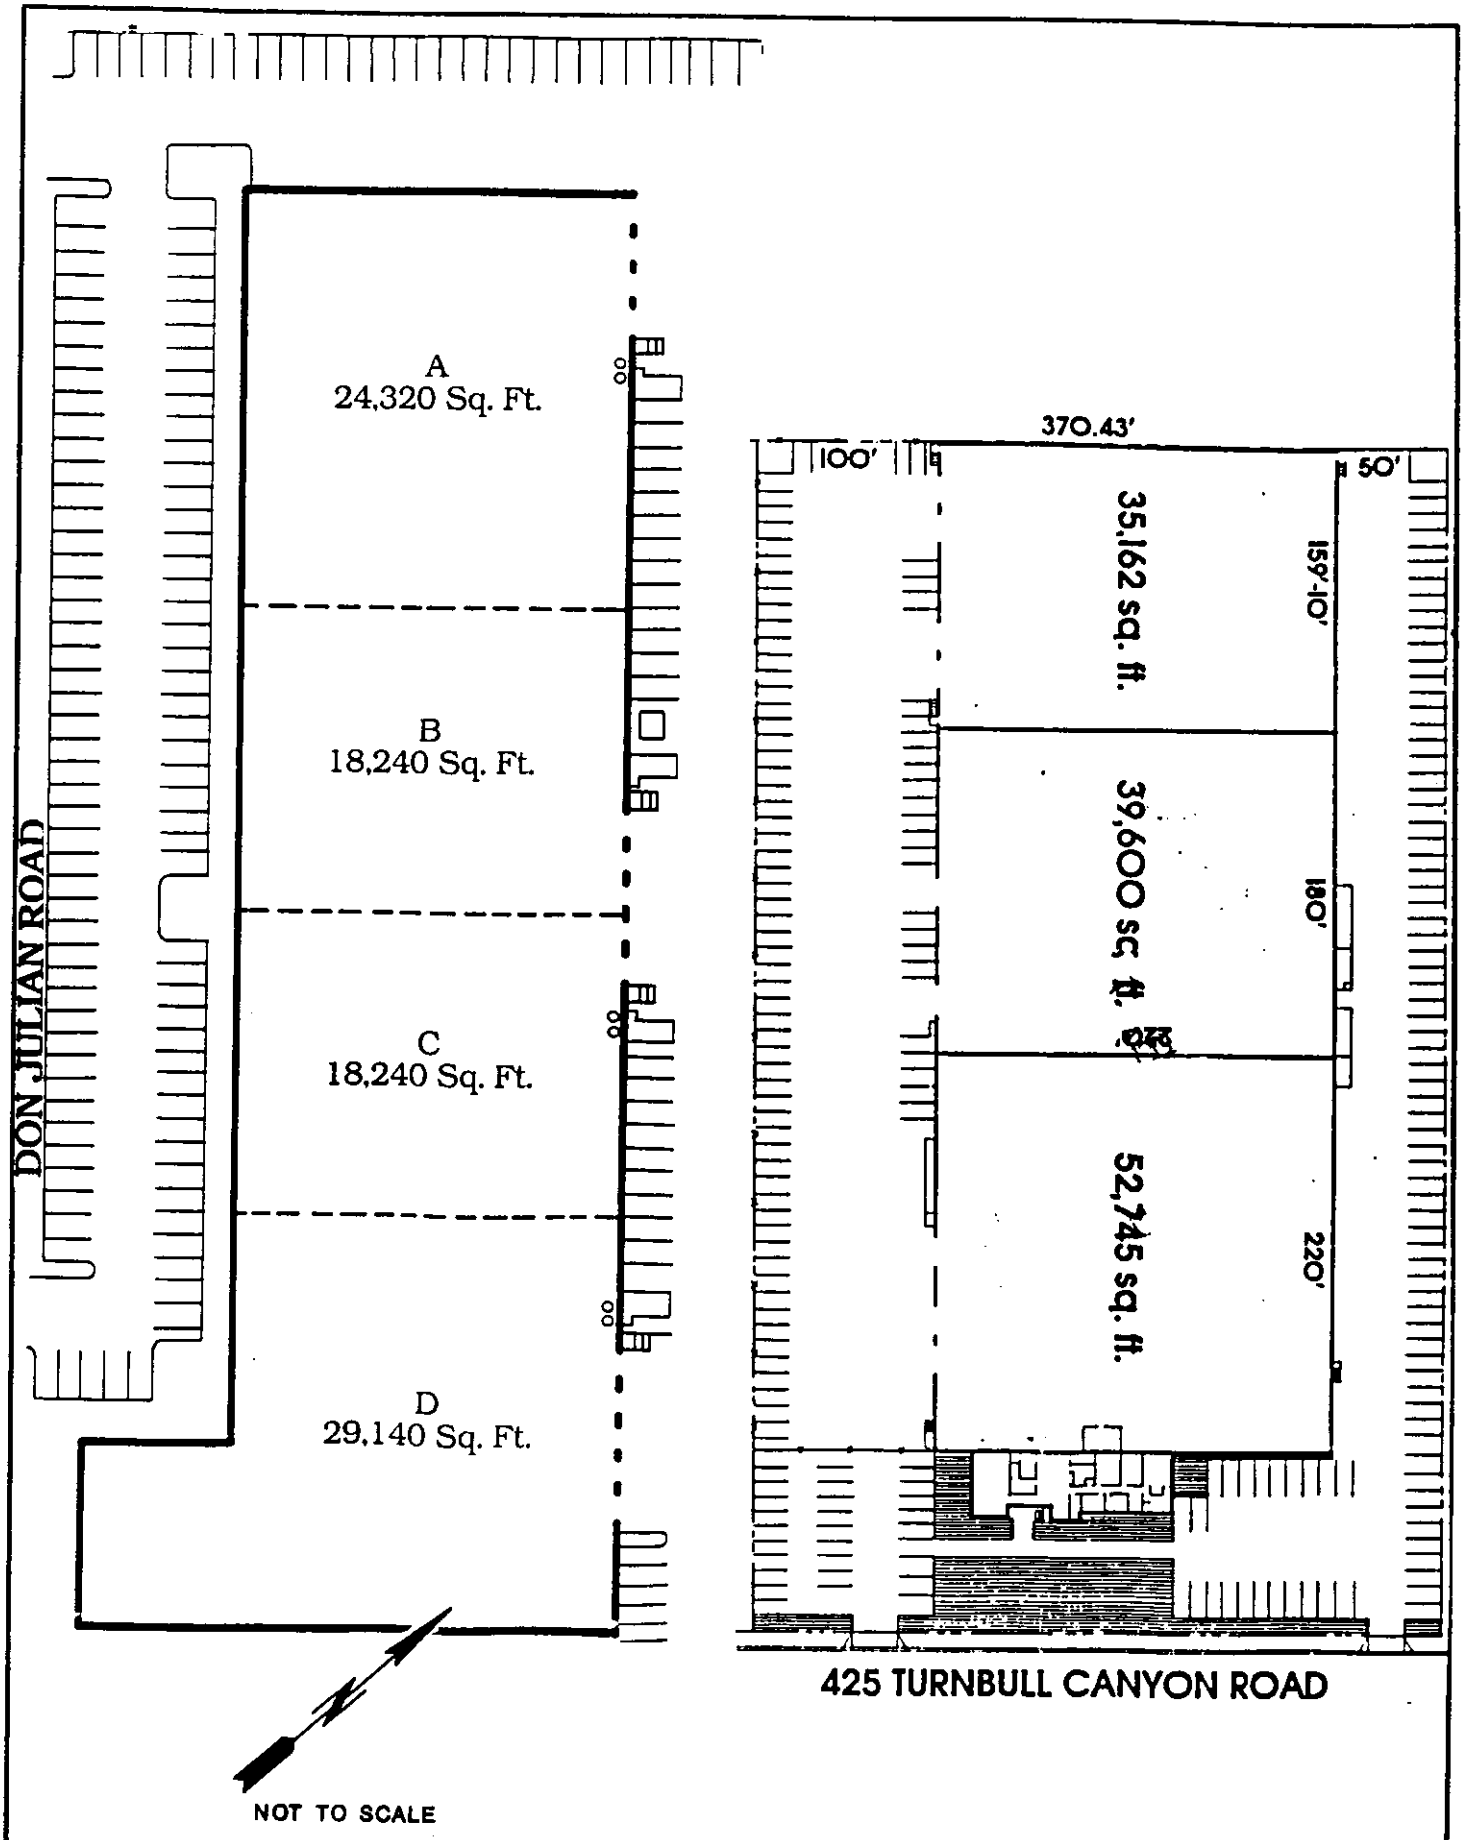
- Review of selected agency files, lists and publications for information regarding hazardous waste contamination at the subject sites or neighboring sites.
- Review of available aerial photographs to investigate historic land use activities.
- Conduct a reconnaissance of the subject sites to assess the present surficial condition of each property.
- Collect samples of potential asbestos-containing building materials for laboratory analysis.
- Prepare a report presenting Hydrotech's findings regarding the potential presence of hazardous waste contaminants that may impact either subject site.

2.0 SITE DESCRIPTION

Both of the subject sites are located in the City of Industry, California and are approximately one mile apart. The City of Industry is located in the southeastern San Gabriel Valley in close proximity to the Puente Hills.

2.1 Don Julian Property

The Don Julian Property is located at the intersection of Don Julian Road and Turnbull Canyon Road in the City of Industry, California (see Site Plan, Figure 2). The Don Julian Property is composed of two manufacturing/ warehouse buildings. The building facing Don



PLOT PLAN - DON JULIAN PROPERTY - INDUSTRY, CALIFORNIA

JOB NO.: HTC-7594-005-00-00	DATE: JULY 1989	FIGURE: 2

HYDROTECH CONSULTANTS, INC.

Julian Road is approximately 90,000 square feet in size and is currently divided into four distinct spaces for storage warehousing and distribution-type operations. Tenants in this building include Bell and Howell Records Storage, Marboro, Royce Union and a fourth unidentified (possibly vacant) tenant. The building to the north, with access off Turnbull Canyon Road, is approximately 128,000 square feet in size and houses a furniture manufacturer (Futura Furniture) and a storage operation (ProPak). Surrounding land use is industrial, with some of the larger industrial neighbors being DuBois Chemical, Calmar Dispensing Products and Hysol/Dexter. The ground surface at the subject site is relatively flat with a gentle slope to the northwest. Drainage is also to the northwest but most likely flows to the southwest toward San Jose Puente Creek after it leaves the subject site.

2.2 Valley Center Property

The Valley Center site is located at the corner of Sixth Street and Valley Boulevard in the City of Industry, California (see Site Plan, Figure 3). The Valley Center site is composed of seven, free standing, light industrial buildings. Thirty three tenants were observed at the subject site. These included Victory Coatings, Benson Printing, Ram Van, Magnum, Restaurant Equipment Manufacturing, Graphics Service, DFA Sales, King Vega, Tristar Color Separation, United Carlton International, Clark and Associates, Printer Terminal Services, DBN Data, Later Engineering, Whittington Strobel, TASCA International, RYOSEI Pollution Control Equipment, Morton Industries, Dooblett Fashions, Golden Bright International Corporation,

JOB NO.:	DATE:	FIGURE:
HTC-7594-005-00-00	JULY 1989	3

HYDROTECH CONSULTANTS, INC.

51 Sales Team, Downing Sound and Communication, Export Import, Bragel Incorporated, Barron Properties, Sales Media II, San Gabriel Valley Water Company, and unnamed construction, sewing, clothing manufacturer and tool distributor companies.

The surrounding land is also used for industrial purposes. The larger industrial operations adjacent to the subject site include La Victoria Foods, A & E Plastics, Burnham Trucking, Hexcel/MCI and GNB. The ground surface at the subject site is relatively flat and has a gentle slope to the north. Drainage appears to be to the northwest.

3.0 GEOLOGY AND HYDROGEOLOGY

The subject sites are located in the San Gabriel Valley, south of the San Jose Hills and north of the Puente Hills. The shallow sediments are alluvial in nature and overlie older, more consolidated sediments and bedrock (Yerkes, et. al., 1965).

The subject sites overlie the San Gabriel groundwater basin. Groundwater in this basin is present within the alluvial deposits and, on a regional scale, flows from the San Gabriel Mountains toward the southwest and the Whittier Narrows (USGS Prof. Paper 1360, 1985). Organic solvent contamination of the San Gabriel groundwater basin is presently being investigated by the Los Angeles Regional Water Quality control Board (RWQCB) (Phil Chandler, RWQCB, pers. comm., 1989).

Groundwater is present below the Don Julian site at depths of approximately 18 feet (Sladden Eng. 1984). Similar depths to groundwater have been reported from other nearby sites (Clayton

Environmental Consultants, 1988) and are assumed to be similar at the Valley Center site. Groundwater flow beneath the subject sites is reported to be in a northwesterly direction (Phil Chandler, RWQCB, pers. comm., 1989; Clayton 1988).

4.0 REVIEW OF AGENCY RECORDS

A review of selected and accessible agency records for the subject site was conducted as part of this investigation. Hydrotech contacted or referenced the following agencies for information pertinent to the subject sites:

- California Regional Water Quality Control Board
- California Department of Health Services
- Los Angeles County Department of Health
- Los Angeles County Department of Public Works
- City of Industry Fire Department

4.1 California Regional Water Quality Control Board (RWQCB)

4.1.1 Don Julian Property - RWQCB Records

Records made available to Hydrotech by the California Regional Water Quality Control Board indicate that several neighboring sites within a one mile radius of the Don Julian property are currently under investigation for both soil and groundwater contamination. The sites include:

1. Western Gear Corp.
   14724 Proctor Avenue, Industry

2. Mobil Oil Corp. - Station 11 E-34
   15580 Valley Blvd., Industry

3. DuBois Chemical Company
   15010 Don Julian Road, Industry

4. Hertz-Penske Truck Leasing
   14804 Valley Blvd., Industry

5. Southern Pacific Railroad
   650 Stimson Avenue, Industry

6. Challenge-Cook Bros. (now U.S. Postal Service)
   15421 Gale Avenue, Industry

7. Universal Paint Corporation
   111 Hudson Avenue, Industry

8. Hysol Electronics
   15051 Don Julian Road, Industry

9. Calmar Dispensing Products
   300 Turnbull Canyon Road, Industry

10. Richardson Battery
    14755 E. Salt Lake Avenue, Industry

11. Benchmark Tech
    200 Turnbull Canyon Road, Industry

12. Aerosol Services Company
    425 South 9th Avenue, Industry

Three sites of the above-listed twelve are adjacent to the subject site. Calmar Dispensing Products is adjacent to the north, Hysol Electronics is adjacent to the west, and DuBois Chemical Company is across Don Julian Road to the southwest.

Hydrotech was informed, during a telephone interview with Mr. Phil Chandler (CRWQCB), that a tenant at the Don Julian site, located at 425 Turnbull Canyon Road (Futura Furniture), was being notified of a pending investigation as a potential source of groundwater contamination in the area.

According to Mr. Chandler, monitoring wells at the property boundary between Futura Furniture and the Calmar Dispensing Products (Calmar) site have yielded organic contaminants and indicate that groundwater flows from the Don Julian site towards the Calmar site. This suggests that the contaminants may have migrated from an upgradient source (such as the Don Julian site) toward Calmar. Mr. Chandler is aware of the fact that Futura Furniture is a present and historic user of organic chemicals such as paint, lacquer, solvent and stain, associated with furniture manufacturing. He has also witnessed a discharge of unknown liquid out of the facility and into the surface drainage network. In addition, Mr. Chandler is concerned with the structural integrity of what he described as a clarifier located on-site. (The developer stated that there were no clarifiers on-site.) Therefore, Mr. Chandler believes that a subsurface investigation at 425 Turnbull Canyon Road is warranted, and will be requested by his agency (CRWQCB).

Conditions at the Calmar Dispensing Products, Hysol Electronics and DuBois Chemical sites do not appear likely to impact the subject site as they are not upgradient to the subject site with respect to groundwater flow direction.

4.1.2 Valley Center Property - RWQCB Records

Records made available to Hydrotech by the CRWQCB indicate that several neighboring sites within a one mile radius of the Valley Center property are currently under investigation

for both soil and groundwater contamination. The sites include:

1. A & E Plastics
   14505 E. Proctor, Industry

2. Hexcel/MCI
   140 N. Orange Avenue, Industry

3. GNB
   14500 Nelson Avenue, Industry

4. Hansen's Foods
   14380 Nelson Avenue, Industry

5. Texaco Service Station
   22040 Valley Blvd., Industry

6. DuBois Chemical Company
   15010 Don Julian Road, Industry

7. Richardson Ba Hery
   14755 E. Salt Lake Avenue, Industry

8. Hysol Electronics
   15051 Don Julian Road, Industry

9. Hertz-Penske Truck Leasing
   14804 Valley Blvd., Industry

Four sites of the above-listed nine are adjacent to the subject site. A & E Plastics is adjacent to the east, and Hexcel/MCI, GNB and Hansen's Foods are all located across Valley Boulevard to the north.

Hydrotech was informed, during a telephone interview with Mr. Phil Chandler (CRWQCB), that A & E Plastics was installing monitoring wells adjacent to the common property line as part of an investigation of groundwater and soil contamination at that facility. According to Mr. Chandler, ethylbenzene and styrene have been found in the soil at the

A&E Plastics site. Groundwater analyses are not available at this time. Groundwater is known to flow from the A & E Plastics site to the subject site. Mr. Chandler indicated an extension of the A & E Plastics investigation could involve a request for monitoring well installation at the subject site by A & E Plastics.

Conditions at the Hexcel/MCI, GNB and Hansen's Foods sites do not appear likely to impact the subject site as they are not upgradient to the subject site with respect to groundwater flow direction.

4.2 California Department of Health Services (DHS)

4.2.1 Don Julian Property - DHS Records

The California Department of Health Services publishes the Expenditure Plan for the Hazardous Substances Cleanup Bond Act of 1984 (State Superfund). This two volume compendium lists sites of known contamination that have been identified by the state as requiring remedial investigation and possibly cleanup. Hydrotech has reviewed the Expenditure Plan for sites within a one-mile radius of the subject site. The following sites were listed:

1. San Gabriel Valley Groundwater Basin 4
   La Puente, CA 91744

This Bond Expenditure Plan listing corresponds to regional aquifer contamination by trichloroethylene, perchloroethylene and carbon tetrachloride. Currently, the

RWQCB is identifying potentially responsible parties in conjunction with DHS and USEPA in this investigation. Several of these potentially responsible parties were listed in Section 4.1. This area is also a U.S. Environmental Protection Agency (EPA) National Priority List site.

4.2.2 Valley Center Property - DHS Records

The California Department of Health Services publishes the Expenditure Plan for the Hazardous Substances Cleanup Bond Act of 1984 (State Superfund). This two volume compendium lists sites of known contamination that have been identified by the state as requiring remedial investigation and possibly cleanup. Hydrotech has reviewed the Expenditure Plan for sites within a one-mile radius of the subject site. The following sites were listed:

1. San Gabriel Valley Groundwater Basin 4
   La Puente, CA 91744

This Bond Expenditure listing corresponds to regional aquifer contamination by trichloroethylene, perchloroethylene and carbon tetrachloride. This area is also a U.S. Environmental Protection Agency (EPA) National Priority List site. Currently, the RWQCB is identifying potentially responsible parties in conjunction with the DHS and USEPA in this investigation. Several of these potentially responsible parties were listed in Section 4.1.

4.3 Los Angeles County Department of Health (LACDH)

4.3.1 Don Julian Property - LACDH Records

The Los Angeles County Department of Health was contacted by telephone and letter to gain access to files that may contain information relevant to this investigation. Several records were found for 425 Turnbull Canyon Road and are included with this report in Appendix B. According to these records, a company named Eagle Manufacturing operated a vapor degreaser using 1,1,1, Trichloroethane on-site through 1978. Reference is also made to toluene, paints, mixed solvents and paint thinners for several years dating back to 1965.

4.3.2 Valley Center Property - LACDH Records

The Los Angeles County Department of Health was contacted by telephone and letter to gain access to files that may contain information relevant to this investigation. No files were found by the County for the Valley Center Property.

4.4 Los Angeles County Department of Public Works (DPW)

4.4.1 Don Julian Property - DPW Records

Hydrotech personnel visited the Los Angeles County Department of Public Works on July 3, 1989 to review files relating to the subject site. The DPW has a single file on 425 Turnbull Canyon Road that contains a letter dated June 30, 1961 from Eagle Manufacturing Company (see

Appendix C). Eagle Manufacturing is stated to have operated a vapor degreaser, and used paints and solvents at the site beginning in 1961. The duration of these activities is known from LACDH records described above to have continued through 1978. In addition, it was indicated that waste liquids containing organic chemicals and other hazardous constituents were discharged to the sewer.

No records of underground storage tanks or tank permits for the Don Julian site were found in DPW files.

4.4.2 Valley Center Property - DPW Records

Hydrotech personnel visited the Los Angeles County Department of Public Works on July 3, 1989 to review files relating to the subject site. The DPW did not have records for the addresses at the Valley Center Property.

No records of underground storage tanks or tank permits for the Valley Center Property were found in DPW files.

4.5 City of Industry Fire Department (IFD)

4.5.1 Don Julian Property - IFD Records

The City of Industry Fire Department was contacted by telephone and letter to gain access to files that may contain information relevant to this investigation. As of the date of this writing, no response was received by Hydrotech regarding the Don Julian Property. Pertinent information received after issuance of this report will be forwarded to the client.

4.5.2 Valley Center Property - IFD Records

The City of Industry Fire Department was contacted by telephone and letter to gain access to files that may contain information relevant to this investigation. As of the date of this writing, no response was received by Hydrotech regarding the Valley Center Property. Pertinent information received after issuance of this report will be forwarded to the client.

5.0 AERIAL PHOTOGRAPH REVIEW

A review of aerial photographs for the subject sites was conducted as part of this investigation. A Hydrotech representative reviewed photographs from the Whittier College/Fairchild collection and the Aerial Map Industries collection on July 19, 1989. Aerial photograph coverage of the subject sites for several dates between 1927 and 1986 was available and is summarized in the following sections.

5.1 Don Julian Property - Aerial Photographs

1927

The subject site and surrounding area were being used for agricultural purposes at this time as furrowed fields are evident. No structures were apparent on the subject site.

1935

In 1935, the property was still being used for agricultural purposes. However, the furrowed fields were replaced by an orchard (probably citrus). Additionally, a house, barn and

several small out-buildings were apparent in this photograph on the subject site.

1947

The subject site was still being used as an orchard. No apparent change was observed in site conditions from 1935.

1952

By 1952, the orchard and all buildings were removed and the site returned to furrowed fields.

1965

By 1965, the site was partially developed. The 425 Turnbull Canyon Road structure was built but did not extend to the western property boundary as it does presently. The corner property, which currently has an address of 15151 Don Julian Road, was still undeveloped and possibly was being used for agricultural purposes.

1969

In the 1969 photograph, the site appears as it does in the 1965 photograph with the following exceptions. The 425 Turnbull Canyon Road structure was enlarged to approximately two-thirds its present size. The neighboring sites to the west and north were developed with large buildings, probably the structures present today.

1977

Other than the final addition to the 425 Turnbull Canyon Road building extending toward the west property line, the subject site appears as it did in 1969.

1986

The subject site in 1986 appears similar to the 1977 photograph and no additional improvements were noted. At this time, the 15151 Don Julian building was not constructed and the lot on which it is currently located was vacant.

5.2 Valley Center Property - Aerial Photographs

1927

The subject site and surrounding area were being used for agricultural purposes at this time as furrowed fields were evident. No apparent structures were located on the subject site. A small building was located on the subject site at the corner of Sixth Street and Valley Boulevard.

1935

In 1935, the property was still used for agricultural purposes. However, the small structure on the property was removed.

1948

The subject site was still used for agricultural purposes and no change was apparent in site conditions from 1935.

1952

The subject site was still used for agricultural purposes and no change was apparent in site conditions from 1935.

1965

The subject site was still used for agricultural purposes and no change was apparent in site conditions from 1952.

1969

In the 1969 photograph, the site appears as it did in 1965. No apparent improvements were observed in this photograph.

1973

In 1973, the subject site was still unimproved while the surrounding properties were being developed. The large warehouse to the south was present and the light industrial area to the west was under development.

1979

By 1979, the Valley Center Property was developed as a seven unit light industrial complex, the same complex that is located at the subject site today.

1986

The subject site in 1986 appears as it did in 1979. No additional improvements were noted.

6.0 SITE RECONNAISSANCE

Hydrotech personnel conducted a site reconnaissance on June 27 and July 13, 1989 to look for surficial evidence, or potential sources of, contamination at the subject site and immediately adjacent portions of neighboring sites. Sampling of potential asbestos-containing materials was completed concurrently with the site reconnaissance. The findings of the site reconnaissance and the asbestos sampling are summarized in the following sections.

6.1 Reconnaissance of Buildings and Immediately Adjacent Areas

6.1.1 Don Julian Property - Observations

Operations and facilities of on-site tenants were observed to assess whether potential sources of chemical contamination were present at the subject site. Two accessible operations at the 15151 Don Julian Road building, Bell and Howell Records Storage and Royce Union, were not observed to use hazardous materials. The other two operations were not accessible and were not entered. The four distinct units in this building are built-out as warehouse spaces.

Both operations at the 425 Turnbull Canyon Road building were observed and only Futura Furniture appeared to use hazardous materials and generate hazardous waste. Futura Furniture uses glue, varnish, stain, paint and solvents in its daily operation. Varnish, stains and paint are sprayed onto furniture inside of the building in a paint booth. Bulk storage of these materials and several drums labeled as hazardous waste were located outside of the building to the north in a fenced in and bermed area. During the site reconnaissance, Hydrotech observed that the six-inch high berm surrounding the bulk storage area had been broken away at one location and there appeared to be discoloration of the surrounding asphalt possibly due to liquid flow from the storage area. The other occupied space in this building is used as a warehouse and hazardous materials were not observed.

Calmar Dispensing Products shares a common property line with the subject site to the north. Along this property line, on the Calmar side, there are numerous 55 gallon drums stored on pallets. Several of these drums appear to store purged groundwater from the ongoing RWQCB investigation at that site, as well as solvents and waste liquids. Additionally, Calmar uses bulk chemicals which are stored in large tanks near the property boundary. Bulk storage of chemicals or wastes was not observed on nearby portions of the other adjacent sites.

6.1.2 Valley Center Property - Observations

Operations and facilities of on-site tenants were observed from the exterior to evaluate whether potential sources of chemical contamination were present at the subject site. Although access to several of the building interiors was not available several operations at the seven Valley Center buildings were observed through open warehouse doors to use hazardous materials. Hazardous materials users include Victory Coatings, Benson Printing, Ram Van, Magnum, Graphic Services and Morton Industries. The types of materials observed include solvents, ink, dye, paint, motor oil and other similar organic materials. Quantities ranged from several hundred gallons stored in 55-gallon drums to several gallons stored in 5-gallon buckets.

At the Magnum facility, there are two full to partially full 55-gallon drums stored outside of the building that appear to be used to collect waste organic liquids. The soil in this area and to the east toward the railroad tracks is

stained with a heavy petroleum-like substance that appears to have been spilled. Possibly, a drum was toppled over and the contents flowed downhill toward the railroad easement and A & E Plastics. The surface area of stained soil is approximately 50 square feet.

A & E Plastics shares a common property line with the subject site to the east. Along this property line, on the A & E Plastics side, there are six large aboveground storage tanks, each with an estimated 40,000-gallon capacity. These tanks appear to contain styrene and ethylbenzene as indicated by placards on rail cars that were either being filled or were unloaded into the tanks on the day of the site reconnaissance. Several hundred thousand gallons of bulk liquid chemicals are transported and unloaded at regular but unknown intervals to the A & E Plastics facility from a railroad easement within 20 feet of structures at the subject site.

It was noted in a previous section that A & E Plastics is undergoing a groundwater investigation by the CRWQCB. Several monitoring wells are located around the large aboveground storage tanks in close proximity to the subject site. As noted above, a small amount of organic liquid has been spilled adjacent to the subject site within 50 feet of one of these monitoring wells.

6.2 Asbestos Sampling

Sampling of suspected asbestos-containing materials (ACM) was conducted during the site reconnaissance. Samples were submitted to and analyzed by a State of California and EPA certified laboratory using Polarized Light Microscopy by EPA Method 600/M4-82-020. Confirmation samples (8 total or 17%) were sent to a second certified laboratory for quality control purposes. Laboratory results and Chain of Custody documentation are found in Appendices D and E, respectively.

6.2.1 Don Julian Property - Asbestos Results

The findings of previous visual inspection for potential ACM (Hygienetics, Inc., 1989) were used as a guide for the Don Julian Property sampling program. A total of seven bulk samples were collected from the 15151 Don Julian Road building and 29 bulk samples were collected from the 425 Turnbull Canyon Road building.

Sampling of the 15151 Don Julian Road building was limited to the Bell and Howell Records Storage facility. This limited sampling program was deemed appropriate because the building was constructed after most uses of commercial asbestos-containing materials were banned (circa 1980) and because apparent similarity between building materials was noted throughout the building in a previous report (Hygienetics, Inc., 1989) and also during site reconnaissance for this investigation. Table I presents the sample locations, descriptions and results of the asbestos analysis. Asbestos was not detected in any of the seven samples above the detection limit of one percent (1.0%).

TABLE I

Asbestos Analysis Results

15151 Don Julian Road

Sample Number	Location	Description	Result*	QC**
15151-1	Insulation Paper backing	Foil w/paper	<1.0%

15151-7	Ceiling Tile	Office	<1.0%	

* Detection Limit 1.0%
** Results of Duplicate Sample Analyzed at Second Laboratory

Sampling at the 425 Turnbull Canyon Road building was more extensive due to the variety and age of the materials. Table II lists sample locations, descriptions and results of the asbestos analysis. Asbestos was detected in floor tiles and mastic, ceiling tiles and air conditioning duct connections in or associated with the front office space at that location. Asbestos was not detected in a majority of the 29 samples above the detection limit of one percent (1.0%).

TABLE II

Asbestos Analysis Results

425 Turnbull Canyon Road

425-29	Main office	Drywall	<1.0%	

* Detection Limit 1.0%

** Results of Duplicate Sample Analyzed at Second Laboratory

The distribution of the HVAC duct connection material that has been shown to contain asbestos appears to be of limited extent. This material was observed on the three air handling units which appear to feed the main office area. It was apparently used to connect the duct to the fan unit. The condition of this material is fair to poor, as it has been subject to air erosion and vibration for as much as 28 years.

The surficial area of 2 x 2 ceiling tile type #2 that has been found to contain asbestos is estimated to be 900 square feet. It is found throughout the main office lobby, reception and typing area, both hallways and in the three offices to the north of the men's restroom. This material is friable but is in fair to good general condition.

Asbestos containing floor tile is thought to be distributed throughout the main office area but is presently covered in most areas by carpet. This material is not friable and is in good condition.

6.2.2 Valley Center Property - Asbestos Results

A visual inspection was conducted and eleven bulk samples were collected at the 100 South Sixth Street unit of the subject site. Sampling was restricted to a vacant unit. However, a general similarity of building materials was observed in several other units at the subject site. Table III lists sample locations, descriptions and results of the asbestos analysis. Asbestos was not detected in any of the eleven samples above the detection limit of one percent (1.0%).

TABLE III

Asbestos Analysis Results

100 S. Sixth Street

Sample Number	Location	Description	Result*	QC**
100-1	Main office	Ceiling tile	<1.0%	
100-2	Executive Offices	Ceiling tile	<1.0%	
100-3	Lounge	Ceiling tile	<1.0%	
100-4	Back office	Ceiling tile	<1.0%

* Detection Limit, Minimum, 1.0%
** Results of Duplicate Sample Analyzes at Second Laboratory

7.0 CONCLUSIONS

This investigation has yielded evidence that hazardous substances may have impacted both subject sites.

7.1 Don Julian Property

Soil and groundwater contamination in the San Gabriel groundwater basin is presently under investigation by the RWQCB, State DHS and USEPA. Several potentially responsible parties for portions of this contamination have been identified in the vicinity of the subject site. Information acquired by the RWQCB from Calmar Dispensing Products, a neighboring site downgradient from the subject site, suggests that soil and groundwater contamination may exist

at the subject site. The RWQCB may request in the near future that a subsurface investigation be conducted at the subject site (Futura Furniture) (Phil Chandler, RWQCB, pers. comm., 1989).

Based on information reviewed and observations made during this investigation, it appears that former or current operations at the site have involved vapor degreasing, and the use, storage and handling of hazardous materials, including paint, varnish and solvents for approximately 28 years. Accordingly, it is possible that contaminants related to former and current site use may be present within on-site subsurface soils and groundwater.

Asbestos was identified in three building materials at the 425 Turnbull Canyon Road building. Asbestos was not identified in the samples collected from the 15151 Don Julian Road building. Floor tiles in the main office appear to be in good condition where exposed, however, most of this material is covered by carpet. Ceiling tile type #2 in the main office appears to be in good general condition but care should be exercised when handled to minimize the potential for fiber release. These materials are both approximately distributed over the same 900 square foot area. The HVAC-ducting material is in fair to poor condition due to age and the forces of air erosion. This material was identified on three air handling units and may be found on other HVAC components not accessed during this investigation.

7.2 Valley Center Property

Soil and groundwater contamination in the San Gabriel groundwater basin is presently under investigation by the RWQCB, State DHS and USEPA. Several potentially responsible parties for portions of this contamination have been identified in the vicinity of the subject site. Information acquired by the RWQCB from A & E Plastics, a neighboring site upgradient from the subject site, suggests that soil and groundwater contaminants may have migrated on to the subject site. The RWQCB may request in the near future that access be given to A & E Plastics to the subject site to conduct additional investigations (Phil Chandler, RWQCB, pers. comm., 1989).

Additionally, observations made at the subject site suggest that organic contaminants have been spilled adjacent to the subject site near the railroad property boundary with A & E Plastics. Therefore, Hydrotech concludes that contaminants related to site use activities may be present within on-site soils or groundwater.

Asbestos was not identified in building materials that were sampled in the 100 South Sixth Street unit. To the extent that identical building materials were used during construction in all other areas of the Valley Center Property, asbestos was not identified in the materials sampled and no further work is recommended.

8.0 RECOMMENDATIONS

8.1 Don Julian Property

- Hydrotech recommends further communication with the RWQCB to investigate details of studies in progress at adjacent sites and establish what investigative actions may be required for the Futura Furniture site.

- Hydrotech recommends further investigation of Eagle Manufacturing and Futura Furniture operations to evaluate what potential contaminants may be found at the subject site. Such investigation might include review of industrial sewer discharge permits, chain-of-title search or interviews with former employees, as available.

- Finally, Hydrotech recommends that notification requirements of employees and building occupants regarding asbestos, such as Proposition 65, be investigated, evaluated and complied with where applicable. Additionally, Hydrotech recommends that air monitoring for airborne asbestos be conducted in the main office area at the 425 Turnbull Canyon Road building based on the identified use of asbestos-containing materials in the HVAC system. Should elevated airborne asbestos fiber levels be detected, Hydrotech would recommend further study of HVAC components for asbestos and, based on these findings, removal of all asbestos-containing components.

8.2 Valley Center Property

- Hydrotech recommends further communication with the RWQCB to investigate details of studies in progress at adjacent sites and establish what investigative actions may be required for the A & E Plastics study.

- Finally, Hydrotech recommends that the responsible party for the organic liquid spill adjacent to Magnum be identified. Once identified, the responsible party should be required to characterize and remediate any associated soil and groundwater contamination. This area is likely to be noticed during any future RWQCB work regarding A & E Plastics and may bring the subject site under regulatory pressures.

Hydrotech is very familiar with the regulatory agencies and their current investigations in the San Gabriel Valley as well as the local hydrogeologic conditions at the subject sites. Therefore, Hydrotech would be pleased to provide the additional professional services recommended above.

9.0 LIMITATIONS OF INVESTIGATIONS

Our investigation was performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable Engineers and Geologists practicing in this or similar localities. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report.

The samples taken and used for testing and the observations made are believed representative of the entire project; however, building material compositions can vary significantly between sampling locations.

The interpretations and conclusions contained in this report are based on the results of laboratories tests and analysis intended to detect the presence and concentration of certain chemical constituents in samples taken from the subject property. Such testing and analysis have been conducted by an independent laboratory which is certified by the State of California to conduct such tests analysis and which uses methodologies mandated by the Environmental Protection Agency in the performance of such test and analysis. Consultant has no involvement in, or control over, such testing and analysis and has no non-laboratory means of confirming the accuracy of such laboratory results. Consultant, therefore, disclaims any responsibility for any inaccuracy in such laboratory results.

As in most projects, conditions revealed by excavation may be at variance with preliminary findings. If this occurs, the changed conditions must be evaluated by the Project Engineer and Geologist and designs and plans adjusted as required or alternate designs and plans recommended.

This report is issued with the understanding that it is the responsibility of the owner, or of his representative,a to ensure that the information and recommendations contained herein are brought to the attention of the regulatory agencies.

The findings of this report are valid as of the present date.

However, changes in the conditions of a property can occur with the passage of time, whether they be due to natural processes or the works of man on this or adjacent properties. In addition, changes in applicable or appropriate standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated wholly or partially by changes outside our control.

Our professional services have been performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable engineers practicing in this or similar localities. No other warranty, expressed or implied is made as to the professional advice included in this report.

Sincerely,
HYDROTECH CONSULTANTS, INC.

APPENDIX C

LETTER FROM EAGLE MANUFACTURING
425 TURNBULL CANYON ROAD
TO LOS ANGELES COUNTY DEPARTMENT OF PUBLIC WORKS

Eagle Manufacturing Company

3508 AVALON BOULEVARD • LOS ANGELES 11, CALIFORNIA

C. R. HENGER
PRESIDENT

June 30, 1961

Los Angeles County Building Dept.
Industrial Waste Section
201 E. Bonita Avenue
San Dimas, California

Attn: Joseph B. Grancich

Subject: New Building

Gentlemen:

This is to clarify the details of our operation in our new building at 425 Turnbull Canyon Road, in the City of Industry.

Our degreaser will be cooled by a recirculating cooling tower, which will be located on the west side of the building. Our compressor and spot welders will be cooled by a recirculating cooling tower, which will be located on the north side of the building.

Our paint room will have recirculating water wash spray booths that will periodically be cleaned and the stagnant water will be dumped into the sewer. (EVERY [illegible])

Our glass processing section will have a washing machine to wash the pieces of window glass with warm water and a mild detergent. We will grind the edges of this glass and drill holes in it with water wash drills and abrasive belts. The waste water from these operations will be emptied into the sewer. We have no other processes in our operation that requires dumping of waste material or water into the sewer. (150 G.P.M.)

1. I-5250

Eagle Manufacturing Company

DATE: 07/24/89

RECEIVED: 07/14/89

SAMPLE: Eleven Bulk Materials
Project Name: Hunsaker/Valley Center Site
Project No: 13-7594-005-00-00

LABORATORY NO.: 38050-1

INVESTIGATION: Asbestos Content of Bulk Materials (EPA 600/M4-82-020)

RESULTS

Procedure: Portions of the samples were examined with conventional/stereo microscopy (30 and 100X) and polarized light/dispersion staining (60X). The results are as follows:

Sample Designation	Macroscopic Description	Macroscopic Description	Asbestos in Sample
100-1 Ceiling tile	Three layers		
	(a)Grey, friable, fibrous solids	(a)Fibrous glass (85%) Plant fiber (5%) Minerals (10%)	(a)<1.0% (None detected)
	(b)Silver foil-nonfibrous	(b)Metallic foil (100%)	(b)<1.0%
	(c)Brown paper	(c)Plant fiber (100%)	(c)<1.0%
100-2 Ceiling tile	As #100-1	As #100-1	(a)<1.0% (b)<1.0% (c)<1.0%
100-3 Ceiling tile	As #100-1 layer (a)	As #100-1 layer (a)	(a)<1.0%
100-4 Ceiling tile	As above	As above	(a)<1.0%

Attention: Jerry P. Andes

Re: Hunscker Q.C. ME-6602

Dear Mr. Andes:

Enclosed is the laboratory report for bulk analysis on the 8 (eight) samples we analyzed on July 18, 1989.

The samples were analyzed by industry-accepted methods in accordance with the EPA "Interim Method for the Determination of Asbestos in Bulk Insulation Samples" using polarized light microscopy (PLM) with dispersion staining in conjunction with stereomicroscopical analysis. Reported percentages are visual estimates by volume.

McCrone Environmental Services, Inc. meets the requirements of the Asbestos Hazard Emergency Response Act (AHERA). We are enrolled in the National Institute for Standards and Technology (NIST-formerly NBS) National Voluntary Laboratory Accreditation Program (NVLAP) for bulk asbestos samples, and we maintain a perfect performance rating in the EPA Interim-Asbestos Bulk Sample Analysis Quality Assurance Program. Our central laboratory is accredited for asbestos analysis by the American Industrial Hygiene Association (AIHA). Ten percent of all client-submitted samples undergo reanalysis by a second analyst. We also maintain a monthly blind sample program and an interlaboratory exchange program with our Georgia laboratory facility.

Thank you for consulting McCrone Environmental Services, Inc. Should you have any questions regarding this report please do not hesitate to contact our office.

Sincerely,

Catherine J. Szeliga
Analyst, Optical Microscopist

Notes On Bulk Asbestos Sample Analytical Results

Method of Analysis. Bulk samples of suspected asbestos-containing material (ACM) are examined with a stereo microscope for suspect fibers. Asbestos is identified using a polarized light microscope equipped with a dispersion staining objective lens. An estimate of the amount of each type of asbestos present along with other identified components is reported for each sample.

Reported Percentages. All reported percentages are by volume estimates. In the case of inhomogeneous samples (samples which contain more than one visually distinct material which are not pervasively mixed) reported percentages are based on the total samples as received. The type of material in which asbestos is located and an approximate percentage or range of percentages of each type of asbestos present in the material are reported in the "Comments" section of the report.

Types of Asbestos. There are currently six types of mineral fiber that are regulated as asbestos minerals. These are divided into two categories: serpentine asbestos and amphibole asbestos. Serpentine asbestos is called chrysotile which is the most commonly encountered type of asbestos in the United States. Five of the asbestos minerals are amphiboles. Included in this group are fibrous grunerite (amosite), fibrous riebeckite (crocidolite, or 'blue asbestos'), fibrous anthophyllite, fibrous tremolite and fibrous actinolite.

Non-Asbestos Amphiboles. Fragments of non-asbestos amphiboles (usually tremolite or actinolite) that have aspect ratios equal to or exceeding 3:1 and lengths greater than or equal to five micrometers (5um) are occasionally detected in some samples. As these particles do not meet the criteria inherent to the classical definitions of asbestos, specifically its tendency to occur in bundles from which strong, flexible fibers having aspect ratios commonly at least 20:1 or 100:1 are separable [1-4], it is not scientifically accurate to report them as such. McCrone Environmental Services, Inc. reports the non-asbestos amphibole fragments with aspect ratios greater than or equal to 3:1 and lengths of 5um or greater which may be considered regulatory fibers as defined by the National Institute for Occupational Safety and Health and the Environmental Protection agency [5,6] in a separate independent category. The range of aspect ratios observed for these particles are also reported to aid in client decisions regarding compliance with federal regulations and proper treatment of the analyzed materials.

New Policy Concerning Disposal of Samples After Analysis

Due to the high cost of returning samples and as a part of our ongoing attempt to provide quality service at a minimum cost to our clients, McCrone Environmental Services, Inc. is instituting a new policy concerning disposal of samples. We shall continue to hold samples for 30 days after completion of analyses at no additional charge to the client. At the end of the 30 day period, it will now be our policy to dispose of the samples. If requested, samples will be returned provided written notification is received in our office prior to expiration of the waiting period. A sample return fee of $5.00 and postage plus 15% will be charged for each group of samples mailed.

Thank you for your cooperation.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

14408 VALLEY BOULEVARD
LA PUENTE, CA 91746

COORDINATES

Latitude (North):	34.0361620 - 34° 2' 10.18''
Longitude (West):	117.9782370 - 117° 58' 41.65''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	409696.5
UTM Y (Meters):	3766402.5
Elevation:	302 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 05/22/2024 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY (Cerclis ID:: 902092 EPA Id: CAD980818512	***SUNSET & SAN BERNARD***	***NNW 1/2 - 1 (0.917 mi.)***	***0***	***9***

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/24/2024 has revealed that there are 3 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

QUEMETCO INC EPA ID:: CAD066233966	***720 S.7TH AVE***	***SSW 1/2 - 1 (0.720 mi.)***	***AJ239***	***1101***

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/22/2024 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 4 SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that

there are 36 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Database: FTTS INSP, Date of Government Version: 04/09/2009				

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, has revealed that there is 1 HIST FTTS site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/13/2024 has revealed that there are 8 FINDS sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/01/2024 has revealed that there are 6 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 11 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is

EXECUTIVE SUMMARY

1 UST FINDER site within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 13 E MANIFEST sites within approximately 0.25 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2023 has revealed that there are 9 HAZNET sites within approximately 0.001 miles of the target property.

LA CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LA CO LF METHANE list, as provided by EDR, and dated 04/13/2023 has revealed that there are 4 LA CO LF METHANE sites within approximately 0.5 miles of the target property.

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 08/20/2024 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 07/10/2024 has revealed that there are 5 CERS sites within approximately 0.001 miles of the target property.

Scoring:	4

NPL Status:	Currently on the Final NPL
Substance ID:	U228
CAS Number:	79-01-6
Substance:	TRICHLOROETHYLENE (TCE)
Pathway:	GROUND WATER PATHWAY

SAN GABRIEL VALLEY (AREA 2) (Continued) **1000114961**

Scoring: 2

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 2) is a ground water plume that parallels the San Gabriel River to the west in the San Gabriel ground water basin in the Baldwin Park area of Los Angeles County, California. The plume is about 7.5 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene TCE), perchloroethylene PCE), and carbon tetrachloride, according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies containless than 5 parts per billion ppb) of TCE, a level considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984): A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the threeother San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Category as of 08/2019:

NPL Status:	Currently on the Final NPL
Category Description:	Depth To Aquifer-<= 10 Feet
Category Value:	1
NPL Status:	Currently on the Final NPL
Category Description:	Distance To Nearest Population-> 0 And <= 1/4 Mile
Category Value:	10

Pathway:	GROUND WATER PATHWAY
Scoring:	4

NPL Status:	Currently on the Final NPL
Substance ID:	U228
CAS Number:	79-01-6
Substance:	TRICHLOROETHYLENE (TCE)
Pathway:	GROUND WATER PATHWAY
Scoring:	4

SAN GABRIEL VALLEY (AREA 4) (Continued) **1000114960**

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 4) is a ground water plume that runs along the axis of the San Jose Creek in the San Gabriel ground water basin in La Puenta, Los Angeles County, California. The plume is about1 mile long and 1 mile wide. Ground water is contaminated with trichloroethylene TCE) and perchloroethylene PCE), according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA SuggestedNo Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion ppb) of TCE, alevel considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984):
A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem.
EPA continues its investigation to identify sources of the contamination.
This site, along with the three other San Gabriel Valley sites, was added tothe NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Category as of 08/2019:

NPL Status:	Currently on the Final NPL
Category Description:	Depth To Aquifer-<= 10 Feet
Category Value:	1

NPL Status:	Currently on the Final NPL
Category Description:	Distance To Nearest Population-> 0 And <= 1/4 Mile
Category Value:	10

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
THE SUPERFUND ENTERPRISE MANAGEMENT SYSTEM (SEMS) INTEGRATES MULTIPLE LEGACY SYSTEMS INTO A COMPREHENSIVE TRACKING AND REPORTING TOOL, PROVIDING DATA ON THE INVENTORY OF ACTIVE AND ARCHIVED HAZARDOUS WASTE SITES EVALUATED BY THE SUPERFUND PROGRAM. IT CONTAINS SITES THAT ARE

SAN GABRIEL VALLEY (AREA 4) (Continued) **1000114960**

EITHER PROPOSED TO BE OR ARE ON THE NATIONAL PRIORITIES LIST (NPL) AS WELL AS SITES THAT ARE IN THE SCREENING AND ASSESSMENT PHASE FOR POSSIBLE INCLUSION ON THE NPL.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 01-12-2021
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 02/01/2021. OBSERVATION: Uniform Hazardous Waste Manifests for waste paint related liquids were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for waste paint related liquids from 2020 to present and submit copies to the CUPA.
Violation Division: Los Angeles County Fire Department

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

CERS HAZ WASTE:

Name:	CAL TEX PRECISION INC
Address:	190 S 006TH AVE
City,State,Zip:	INDUSTRY, CA 91746
Site ID:	14966
CERS ID:	10289614
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	14966
Site Name:	CAL TEX PRECISION INC
Violation Date:	01-04-2022
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or

VICTORY COATING, INC. (Continued) **S123537076**

stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 02/03/2022. OBSERVATION: Observed liquid waste container was observed left with the filling cap open. Observed container used for solid waste without a lid provided. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the containers listed above has been properly closed.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 14966
Site Name: CAL TEX PRECISION INC
Violation Date: 04-03-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 04/01/2020. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 14966
Site Name: CAL TEX PRECISION INC
Violation Date: 01-23-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/02/2019. OBSERVATION: A 20 gallon metal drum of used oil located near the roll-up door of the warehouse was observed without a legible label. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.

Citation:	HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description:	Failure to amend the SPCC Plan within 6 months: 1. When the facility has had a change in design, construction, operation, or maintenance which affects the facility s discharge potential. AND/OR 2. To include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation.
Violation Notes:	Returned to compliance on 10/23/2023. OBSERVATION: 1. Failure to amend SPCC plan within 6 months of when the facility has had a change in: design, construction, operation, or maintenance which affects the facility s discharge potential. 2. Failure to amend SPCC plan within 6 months to include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation. Observed two new oil tanks on site which were not included on the SPCC plan. CORRECTIVE ACTION: Amend SPCC as required.
Violation Division:	Los Angeles County Fire Department
Violation Program:	APSA

Violation Date:	01-19-2021
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 08/30/2021. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the required due date. Log onto the California Environmental Reporting System (CERS) to submit the required information, including the sections for business activities, business owner/operator identification, site map, hazardous material inventory, emergency response plan, and employee training plan. Nothing has been submitted to CERS. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the required due date.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
MN-TEMPO is the Minnesota Pollution Control Agency's (MPCA) permitting, compliance, and enforcement information management system, which facilitates the issuance of permits and manages compliance.

SIC Code: 3441
SIC Code 2: Not reported
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff

HOERTIG IRON WORKS (Continued) **S106102955**

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:

Site ID:	147705
Site Name:	RICE FIELD CORP
Violation Date:	08-09-2019
Citation:	HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description:	Business Plan Program - Release/Leaks/Spills - General
Violation Notes:	Returned to compliance on 09/07/2020. OBSERVATION: Operator failed to follow under 19 CCR 2658(c) mitigation, prevention, or abatement of hazards to persons, property, or the environment. It was observed that storage area for hazardous materials used for cleaning equipment were stored in a manner in which a potential for materials to co-mingle with the potential to cause a reaction. CORRECTIVE ACTION: To clean up areas where cleaning products (solids and liquids) are stored. Ensuring secondary containment area and grounds surrounding areas free of all solids and liquids. Manifest waste if the clean-up requires to be managed as hazardous waste. Submit photos/documentation to the CUPA demonstrating the spill has been properly removed and managed.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.
Violation Notes:	Returned to compliance on 05/27/2020. OBSERVATION: The business failed to establish and electronically submit an adequate employee training plan, which is reasonable and appropriate for the size of the business and the nature of the hazardous material handled. Per 19 CCR 2659(a)training program shall, at a minimum, include: (1) methods for safe handling of hazardous materials. Violations observed demonstrates that the training requirements have not been fulfilled. CORRECTIVE ACTION: Establish and electronically submit an adequate employee training plan, which is reasonable and appropriate for the size of the business and the nature of the hazardous material handled.

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 06/08/2017. OBSERVATION: Observed multiple (15-20) 55 gallon containers that were not labeled outside at the west side of the facility CORRECTIVE ACTION: Each empty container larger than 5 gallons that previously held a hazardous material must be marked with the date it was emptied and be shipped for recycling, reconditioning, or reclamation of its scrap value or managed on site in such a manner within one year of being emptied. 22CCR 11 66261.7
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 147705
Site Name: RICE FIELD CORP
Violation Date: 08-09-2019
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 05/13/2020. OBSERVATION: The used oil filters were stored observed with a hazardous waste label without an accumulation start date and lids were not properly and securely affixed to the container. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the used oil and fuel filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal.

Eval Date: 07-25-2022
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Conducted remote review for follow-up of hazardous waste inspection report dated 6/22/22. Facility Manager Eric Lee contacted Me by email to inform that the waste hydraulic oil drums had complete labels. Pictures of the new waste labels filled out and attached to waste drums were included in the email for verification. Hazardous Waste violations verified corrected. Abate the report, no further action required. Record of Follow-up inspection emailed to the Facility Manager.

Environmental Interest/Information System:

The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

FORMER TROPICANA PRODUCT SALES (Continued) **S105023295**

Baseline Flow: 0
Reclamation: Not reported
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS ID: 10284523
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 393125
Site Name: FRESHPOINT SOUTHERN CALIFORNIA
Violation Date: 03-20-2018
Citation: 19 CCR 4.5 2760.12(c) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.12(c)
Violation Description: Failure to periodically evaluate the performance of the contract owner or operator in fulfilling the following: 1. Each contract employee is trained in the work practices necessary to safely perform his or her job. 2. Each contract employee is instructed in the known potential fire, explosion, or toxic release hazards related to his or her job and the process, and the applicable provisions of the emergency action plan. 3. Document that each contract employee has received and understood the training required by this section. 4. Prepare a record which contains Training record contains the identity of the contract employee, date of training, and the means used to verify that the employee understood the training. 5. Each contract employee follows the safety rules of the stationary source including the safe work practices required by Section 2760.3(d) (operating procedures). 6. Advise the owner or operator of any unique hazards presented by the contract owner or operator s work, or of any hazards found by the contract owner or operator s work.
Violation Notes: Returned to compliance on 05/15/2018. Observation: Owner/operator failed to provide ammonia training records for the contractors who are tasked with servicing the ammonia refrigeration system. Corrective Action: Provide and maintain training records for the ammonia refrigeration system contractors.
Violation Division: Los Angeles County Fire Department

Violation Source: CERS,

Site ID: 393125
Site Name: FRESHPOINT SOUTHERN CALIFORNIA
Violation Date: 02-24-2022
Citation: 19 CCR 4.5 2760.1(d)(2) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.1(d)(2)
Violation Description: Failure to document that equipment complies with recognized and generally accepted good engineering practices.
Violation Notes: Returned to compliance on 03/22/2023. 2.OBSERVATION: The owner/operator failed to document that equipment complies with recognized and generally accepted good engineering practices. The visual and audible alarm systems were not provided to the inside and outside of cooler units, freezer unit, and food prep area, as required per Fire code 6004.2.2.10.2. The ammonia sensors were available to monitor the ammonia leaks near the air handler units; however, visual and audible alarms were not provided inside and outside of the above-mentioned units to warn the employees in the event of an ammonia release. CORRECTIVE ACTION: Provide visual and audible alarm system inside and outside of walk-in coolers, freezer units, and food repackaging areas and submit documentation to the CUPA.

Citation:	19 CCR 4.5 2760.5(e) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.5(e)
Violation Description:	Failure to correct deficiencies in equipment that are outside acceptable limits before further use or in a safe and timely manner when necessary means are taken to assure safe operation.
Violation Notes:	Returned to compliance on 03/03/2022. OBSERVATION: The owner/operator failed to correct deficiencies in equipment that are outside acceptable limits before further use or in a safe and timely manner when necessary means are taken to assure safe operation. 1) The ammonia sensor calibration test result indicates, not every ammonia vapor sensor is functioning. The result showed several sensors failed the test and or failed to respond to the calibration tests. There were no records available for review to ensure the owner/operator repaired or replaced the inoperable ammonia sensors. 2) Observed the presence of corrosion on the relief pipe header that connected to the diffusion tank. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating the owner/operator has corrected deficiencies in the equipment that is outside acceptable limits.

Violation Description:	Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 08/19/2014. The business plan was not submitted to the Certified Unified Program Agency. Your California Environmental Reporting System (CERS) account number is 10284523. Use this system to submit the business plan. Please ensure that the business plan includes the following sections: (1) The inventory of hazardous materials, including anhydrous ammonia, oil, used oil, and the chemical that is supplied by Apollo Technologies. (2) A site map that contains north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. Updates to existing maps to meet these requirements shall be completed by January 1, 2015. (3) Emergency response plans and procedures in the event of a reportable release or threatened release of a hazardous material, including, but not limited to, all of the following: (A) [Truncated]

Citation: 19 CCR 4.5 2760.1(a)(d)(1) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.1(a)(d)(1)
Violation Description: Failure to compile written process safety information pertaining to the equipment in the process that includes the following: 1. Materials of construction; 2. Piping and instrument diagrams (P&IDs); 3. Electrical classification; 4. Relief system design and design basis: ? Ventilation system design; 5. Design codes and standards employed; 6. Material and energy balances for processes built after June 21, 1999; 7. Safety systems (e.g., interlocks, detection, or suppression systems).
Violation Notes: Returned to compliance on 12/19/2014. OBSERVATION: The owner/operator failed to update process safety information when a management of change occurred that resulted in a change in the process safety information. A management of change for the Interlogix control system was conducted on April 23, 2013. The system controls set points for pressure at the ammonia process equipment and plays an important role in shutting down equipment if the ammonia leaks are detected by the sensors. CUPA CORRECTIVE ACTION: Update process safety information affected by the management of change and submit a copy to the CUPA.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California

A & E PLASTICS (Continued) **1000111522**

law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Date:	02-21-2023
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 01-26-2015
Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.
Violation Notes: Returned to compliance on 01/26/2015. OBSERVATION: Generator failed to properly handle, manage, label, and/or recycle used oil and fuel filters. Observed one 55 gallon drum of drained used oil filters not labeled. CORRECTIVE ACTION: Owner/Operator shall immediatly comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil and fuel filters. Verify compliance with the CUPA within [30 days].
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 142464
Site Name: PEREZ WHEELS & TIRES
Violation Date: 01-26-2015
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 07/21/2015. OBSERVATION: Copies of hazardous waste disposal records for were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. A record review and interview revealed that there was no manifest or receipt for the waste coolant on-site. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 2/25/15.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 06/19/2018. OBSERVATION: The Hazardous

PEREZ WHEELS & TIRES (Continued) **S123501477**

Materials Business Plan (HMBP) submitted in the California Environmental Reporting System (CERS) on 02/08/18 & 05/03/18 was reviewed and found to be inaccurate and/or with missing information Site map with missing information per HSC 25505(a)2; Map must have al of the following, north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. Hazardous Materials inventories not accurate: Disclose all chemicals at or above 55gallons, 500lbs and/or 200cuft. Effective December 28, 2017, CalEPA replaced five (5) federal hazard categories available in CERS used for the completion of chemical inventories as part of the annual Hazardous Materials Inventory submittal with twenty-four (24) new federal hazard categories adopted by the United States Environmental Protection [Truncated]

Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 142464
Site Name: PEREZ WHEELS & TIRES
Violation Date: 06-19-2018
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 08/23/2018. OBSERVATION: Bills of lading for used oil and fuel filters were not available at the time of inspection & (1) 55-gallon metal drum storing drained used oil filter found unlabeled CORRECTIVE ACTION: Crushed or punctured oil filters must be stored in a container labeled "DRAINED USED OIL FILTERS" with the "ACCUMULATION START DATE". Submit photos to the CUPA demonstrating that the used oil and fuel filters are being properly managed or submit a bill of lading to this department demonstrating proper disposal.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 142464
Site Name: PEREZ WHEELS & TIRES
Violation Date: 01-26-2015
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 07/21/2015. OBSERVATION: A complete business plan has not been received by the CUPA. A record review revealed that the last CERS submittal date of 10/1/2013 was incomplete (missing contingency plan and employee traiining plan, complete list of hazardous materials inventory). CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Violation Date:	06-03-2015
Citation:	22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description:	Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment of the effect, since the baseline year, of each implemented hazardous waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.
Violation Notes:	Returned to compliance on 06/03/2015. OBSERVATION: All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Observed a container for the sand blast media and a 55 G drum of waste paint without a hazardous waste label. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized.
Violation Notes:	Returned to compliance on 07/27/2022. OBSERVATION: The facility failed to dispose of hazardous waste at a facility which has a permit from the Department of Toxic Substances Control (DTSC) by causing the disposal of hazardous waste at a point which is not authorized

WYNHAUSEN CORPORATION (Continued) **S106763924**

pursuant to Health and Safety Code (HSC) Chapter 6.5. According to the Slug Discharge report dated 1/31/22, the facility disposed of approximately 22,000 gallons of low pH wastewater (pH 1.7-5.4) to the Los Angeles County Sanitation District s (LACSD) sewer system on 1/25/22 between 0645 and 1140. Facility was instructed by the LACSD on 1/25/22 at 1310, that under no circumstance are they allowed to discharge wastewater to the sewer with pH <6.0. The Slug Discharge report revealed that the facility disposed of an additional 36,000 gallons of low pH wastewater (pH <2.0) to the sewer system on 1/25/22 between 1330 and 1500. CORRECTIVE ACTION: Immediately discontinue disposing of hazardous waste at any facility not permitted by DTSC or to any [Truncated]

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 08/14/2019. Observation: Owner/operator failed to accurately submit hazardous materials inventory to the California Environmental Reporting System (CERS). Corrective Action: Log onto the California Environmental Reporting System (CERS) to correct the deficiencies in the HAZARDOUS MATERIALS INVENTORY section. Ensure all reportable hazardous materials (55 gal for liquid, 500 lb for solid, 200 cu. ft for gas) are properly reported to the hazardous materials inventory. Several reportable hazardous materials including (1) 5,400 gal tank of sodium hydroxide solutions, (1) 300 gal tote of glycol, (4) 55 gal drums of sodium hypochlorite and (2) 55 gal drums of waste oil, have not been reported to CERS. Also, ensure each entry is submitted correctly: (1) The anhydrous ammonia is reported as 16,000 lb; there is 21,000 lb of ammonia in the refrigeration system, per operators, (2) Specify the storage location of all hazardous materials, (3) Ensure all hazardous materials are properly in the [Truncated]

Violation Date: 04-24-2019
Citation: 19 CCR 4.5 2760.5(d) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.5(d)
Violation Description: Failure to ensure the following: 1. Inspections and tests are performed on process equipment; 2. Inspection and testing procedures follow recognized and generally accepted good engineering practices; 3. The frequency of inspections and tests of process equipment is consistent with applicable manufacturers recommendations and good engineering practices, and more frequently if determined to be necessary by prior operating experience; 4. Each inspection or test that has been performed on process equipment is documented and includes the date of inspection or test, name of the person who performed the inspection or test, serial number or other identifier of the equipment inspected or tested, description of the inspection or test performed, and the results of the inspection or test.
Violation Notes: Returned to compliance on 07/18/2019. Observation: Owner/operator failed to label the ammonia detection alarms. All ammonia alarms throughout the site were not labeled. Corrective Action: Ensure the audible/visual ammonia alarms are properly labeled to indicate that these are ammonia detection alarms. (IIAR 2 2014 17.6). Observation: Owner/operator failed to ensure the ammonia system is properly labeled. The diffusion tank for the ammonia system was not labeled and the label on the Accumulator vessel in Chiller Room #9 was damaged/faded and not legible. Corrective Action: Ensure the ammonia system is properly labeled as required. (IIAR 2014 5.14.2) Observation: Owner/operator failed to maintain covered process equipment in good condition. Peeling paint was observed on the liquid line of the Accumulator vessel in Chiller Room #9. Corrective Action: Repair/repaint the liquid line of the Accumulator vessel in Chiller Room #9.
