UST	underground storage tank
VOC	volatile organic compound

1 Executive Summary

Dudek conducted this Phase I Initial Site Assessment (ISA) for the proposed Palm Avenue Multimodal Corridor Project (project or proposed project) in Imperial Beach, San Diego County, California (Figure 1, Subject Property Location). The subject property includes 0.82 miles of Palm Avenue and associated intersections and rights-of-way beginning approximately 580 feet northwest of Rainbow Drive and ending approximately 250 feet east of Georgia Street in Imperial Beach, California (subject property, see Figure 1). The proposed project includes improving the Palm Avenue corridor with enhancements that would increase safety, expand multimodal utilization, and improve the aesthetics of this gateway corridor.

This Phase I ISA is being conducted to identify recognized environmental conditions (RECs), historical RECs, and controlled RECs associated with the subject property. The findings of this investigation are based on historical sources, information in regulatory agency databases, available local agency records, and a site reconnaissance.

Information gathered for this report indicates the following:

- The subject property has been developed as Palm Avenue since at least 1904.
- Areas adjoining the subject property include commercial and residential areas in all directions and undeveloped land to the northwest. The San Diego Bay National Wildlife Refuge adjoins the northeastern end of the subject property.
- The areas surrounding the subject property include commercial and residential areas to the north, east, and south. Two naval facilities are located within the surrounding area, the Silver Strand Training Complex to the northwest and the Naval Outlying Landing Field Base to the south.
- Multiple hazardous material and petroleum product releases were identified within 1.0 miles of the subject property. Although many of these releases have been remediated and received regulatory closure, there are a few open and ongoing cleanup cases, and some have residual contamination above current regulatory screening levels. These cases are further discussed below.

This assessment identified the following data gap, which is considered significant and requires further investigation.

- No response was received from San Diego Regional Water Quality Control Board (SDRWQCB) as of the date of this report for 1002–1010 Palm Avenue. This is considered a data gap, as it could not be determined if the site is contributing contamination to the subject property. Because there is not enough information to determine if the site is contributing contamination to the subject property, this is considered a significant data gap.

The following RECs were identified during this assessment. California Department of Transportation (Caltrans) risk evaluation (Caltrans 2023) and mitigation measures are also provided for each REC identified. The Initial Site Assessment Checklist is provided as Appendix A:

- Several RECs were identified during the search of regulatory agency databases. These RECs were from both open and closed cleanup sites. These sites have had releases of hazardous materials and/or petroleum products, either on or adjoining the subject property, that have impacted the subject property. Although some of these sites have received regulatory closure, which allowed contamination to remain in place, this contamination does not meet current screening levels and therefore presents a risk to the subject property.

The sites are shown on Figure 2, Subject Property Features. Given the nature of construction projects, contaminated soil, soil vapor, and groundwater could be encountered during implementation of the proposed project. Therefore, this REC represents a high risk, and mitigation will likely be required (e.g., a soil management plan).

- Wooden signposts were observed on the subject property. Wooden signposts were historically treated with arsenic, chromium, copper, and pentachlorophenol. As such, these wooden posts should be managed as treated wood waste (TWW), which is a California hazardous waste. Effective January 1, 2021, California Department of Toxic Substances Control (DTSC) alternative management standards for TWW expired, and TWW must now be disposed of at a Class I hazardous waste facility (DTSC 2020). A visual assessment of all wood wastes associated with the project should be conducted to determine the quantity of TWW that will be disposed of during construction activities. Given that impacts from TWW are generally localized (i.e., leaching into soil immediately around a signpost), this REC represents a low risk to the proposed project.
- The subject property has been used as a roadway since at least 1904. Several areas of dirt, including Triangle Park, are located throughout the subject property. Given that soil has likely not been removed from these spots since the roadway was developed, there is a likelihood that aerially deposited lead (ADL) has resulted in elevated concentrations of lead in shallow soils on the subject property. Sampling of soil in these areas prior to excavation for the proposed project must be completed to appropriately determine the risk to the project. If lead concentrations in the soil are determined to be below concentrations considered appropriate for unrestricted use, defined as 80 milligrams per kilogram (mg/kg) total lead by DTSC, there is no risk to the project. Project risk would increase accordingly with total lead concentrations above 80 mg/kg. However, although ADL may be present, it represents a low risk to the proposed project.
- Culverts were observed on the subject property at the intersection of Palm Avenue and Rainbow Drive. Materials and sediments removed from the culverts during construction may contain contaminants such as volatile organic compounds (VOCs), total petroleum hydrocarbon (TPH), and metals, which could require special handling and disposal. Sampling of culvert catch basin sediments for VOCs, TPH, and metals is required to appropriately determine the risk to the project. If contaminants are present, remedial efforts would include excavation and appropriate disposal of the contaminated media. Given that contaminated sediment is likely limited to the culvert catch basins, this REC represents a low risk to the project.
- As observed during the site reconnaissance, electrical equipment and utility boxes are present along the subject property. A hazardous materials survey would be needed to identify any hazardous materials contained within electrical equipment to determine appropriate handling and disposal procedures. Given that evidence of a release was not apparent around electrical equipment during site reconnaissance, this REC represents a low risk to the proposed project.
- Yellow traffic striping was observed on the subject property along Palm Avenue. Based on Caltrans guidance (Caltrans 2019), yellow traffic striping used prior to 2005 likely contains lead chromate and would need to be handled and disposed of as hazardous waste if the striping is removed. However, although lead chromate may be present in yellow traffic striping, it represents a low risk to the proposed project.

The following environmental concerns and non-ASTM Caltrans RECs were also identified. Caltrans mitigation measures are also provided for each environmental concern identified:

- As noted above, concrete culverts were observed on the subject property at the intersection of Palm Avenue and Rainbow Drive. Asbestos-containing material (ACM) may be present in the concrete culvert structure, joint seals, mastic adhesives, weep holes, piping, and other culvert construction materials. An ACM survey would need to be conducted prior to construction activities. Identified ACMs require appropriate handling

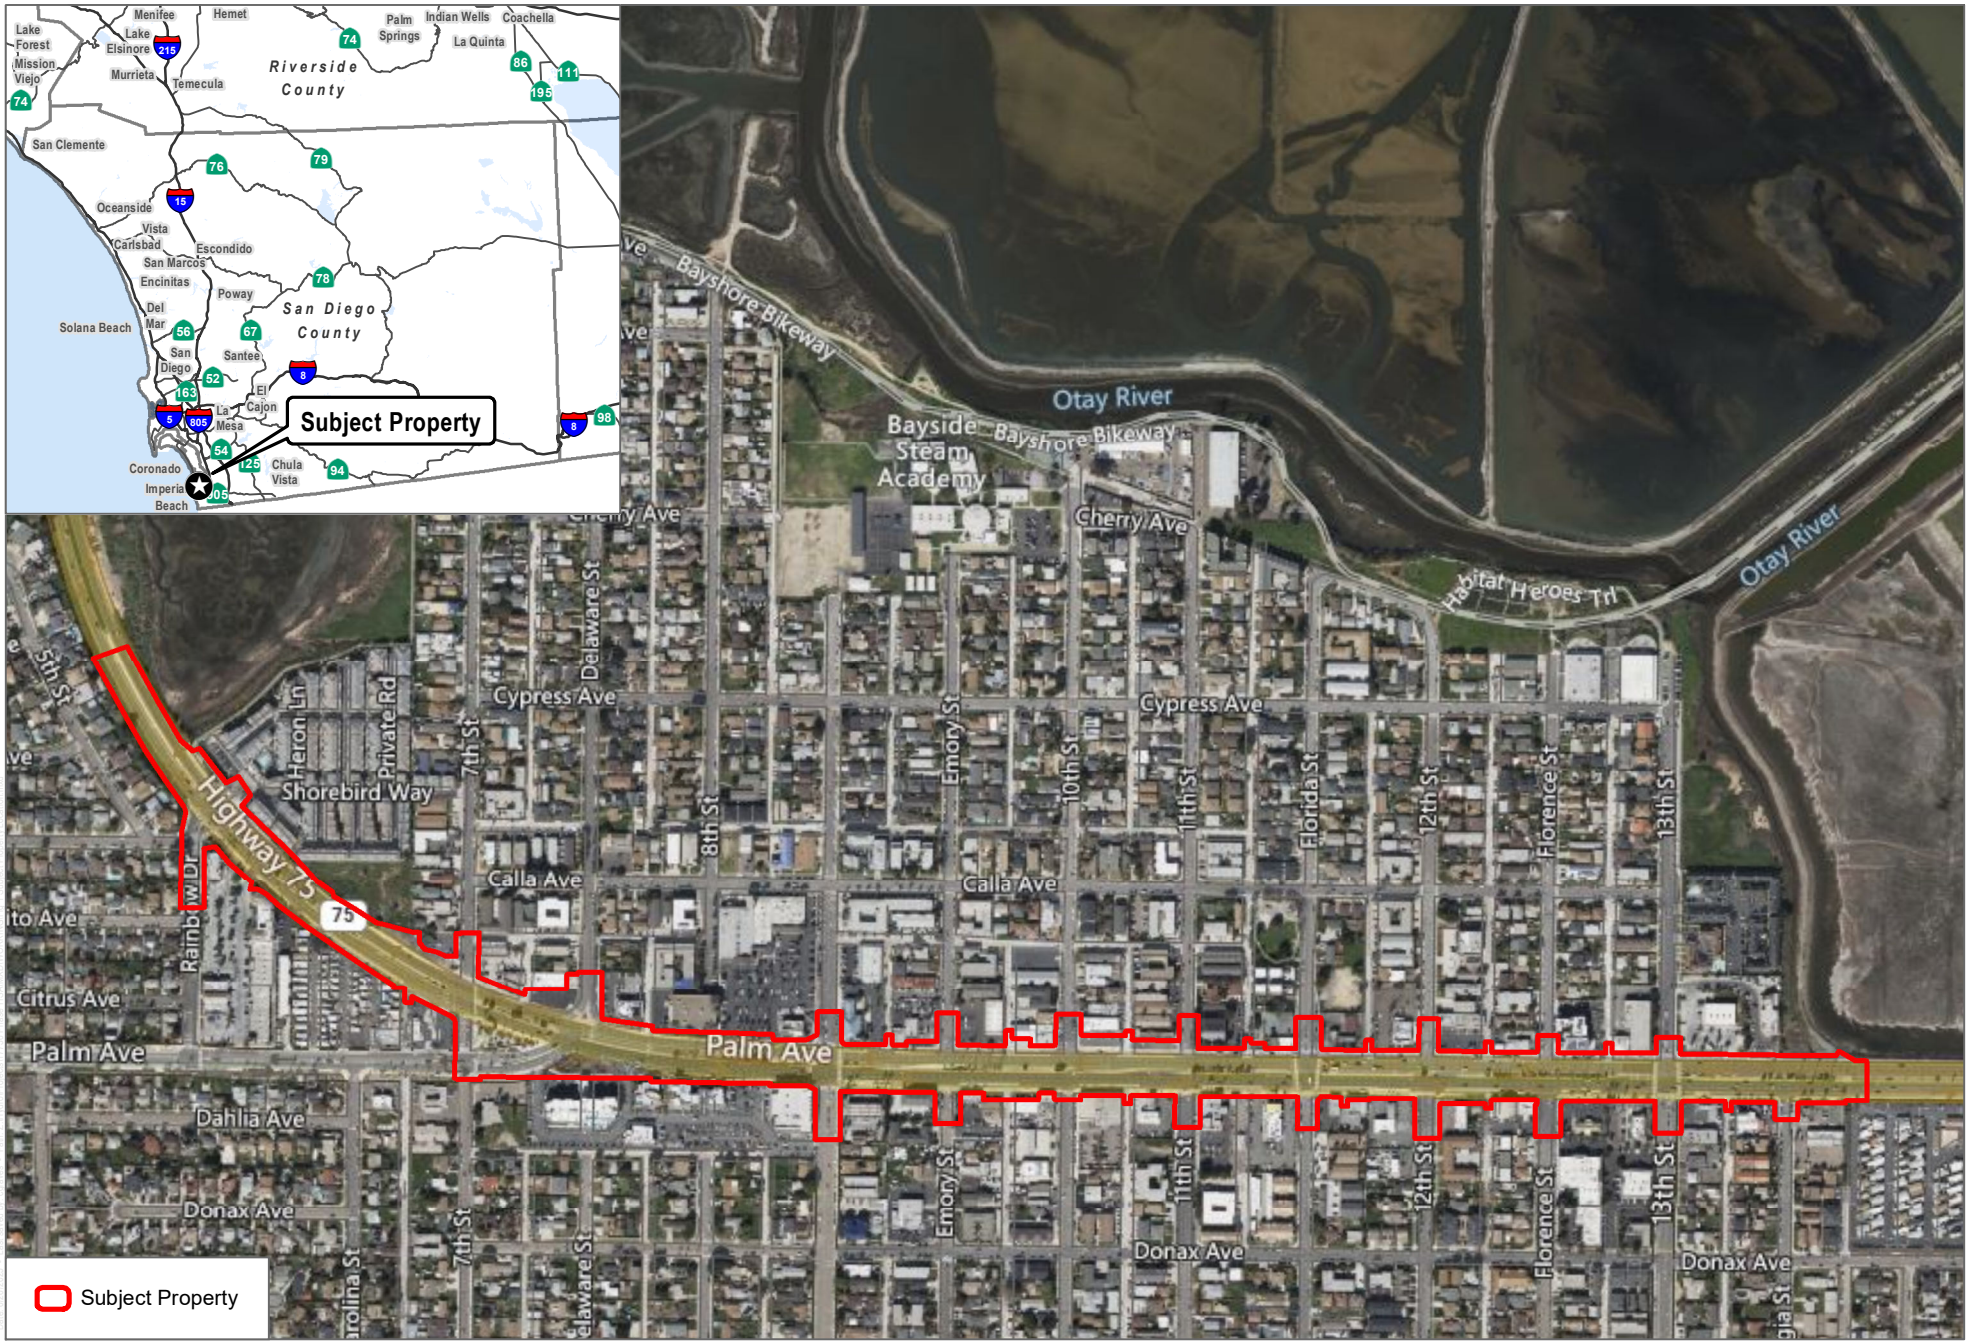

and removal in accordance with state and local requirements consistent with Caltrans specifications. An ACM survey is required to appropriately determine the risk to the project; however, given the nature and quantity of the potential ACM (two culverts and associated materials), risk to the project is anticipated to be low.

The following conclusions are based on the proposed construction and nature of the project:

- **Treated Wood Waste:** Traffic signs on wood posts scheduled for removal will require special handling. As of January 1, 2021, TWW must be disposed of in a Class I hazardous waste facility.
- **Contaminated Sediments:** Sediments within the culverts must be tested for VOCs, TPH, and metals prior to removal and disposal. Contaminated sediments may require special handling and disposal procedures.
- **Aerially Deposited Lead:** The subject property has been used as a roadway since at least 1904. As such, there is a likelihood that ADL has resulted in elevated concentrations of lead in soils on the subject property. Soils contaminated with lead may require special handling and disposal procedures.
- **Asbestos-Containing Material:** ACM may be present in culvert construction materials. An ACM survey would need to be conducted prior to construction activities. Identified ACMs require appropriate handling and removal in accordance with state and local requirements consistent with Caltrans specifications.
- **Electrical Waste:** Electrical equipment may contain hazardous materials, such as mercury or polychlorinated biphenyls (PCBs). Electrical equipment is located along the subject property. If such equipment is scheduled for removal, a hazardous materials survey is required to identify hazardous materials contained within the electrical equipment to determine appropriate handling and disposal procedures.

A preliminary site investigation should be conducted to further assess the RECs listed above. At minimum, the preliminary site investigation should include the following:

- Soil sampling to determine the presence or absence of ADL in soils to be excavated for the proposed project
- Survey for hazardous materials, universal waste, and ACM
- Sampling of culvert catch basin sediments

Phase I ISA - Palm Avenue Complete Multimodal Corridor Project, Imperial Beach, CA

2 Introduction

This Phase I ISA was performed according to the guidelines stipulated in the ASTM Standard E 1527-21, Standard Practice for Environmental Site Assessments (ESAs): Phase I Environmental Site Assessment Process (ASTM 2021), and guidelines stipulated in Appendix DD of the Caltrans Project Development Procedures Manual, Preparation Guidelines for ISA Checklist for Hazardous Waste (Caltrans 2020). The subject property includes approximately 0.82 miles of Palm Avenue and associated intersections and rights-of-way beginning approximately 580 feet northwest of Rainbow Drive and ending approximately 250 feet east of Georgia Street in Imperial Beach, California (Figure 1). The proposed project includes improving the Palm Avenue corridor with enhancements that would increase safety, expand the multimodal utilization, and improve the aesthetics of this gateway corridor.

2.1 Assessment Procedure and Scope of Investigation

Phase I ISAs assist in identifying past and present land use, including identification of possible releases or disposal of manufacturing or other wastes, if such information is contained within regulatory reports or files and/or is currently visible on site. The assessment reviews local, county, state, and U.S. Environmental Protection Agency lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to a site.

The scope of this environmental investigation consisted of (1) a reconnaissance of the subject property, (2) a search of regulatory agency records, (3) review of available historical aerial photographs, (4) review of historical topographic maps, and (5) preparation of this Phase I ISA report and checklist (see Appendix A) detailing the findings of the investigation.

These activities were conducted to identify RECs. The term "REC" (recognized environmental condition) means the presence or likely presence of any hazardous substances or petroleum products on the subject property under conditions that indicate an existing release, a past release, or a material threat of a future release into the ground, groundwater, or surface water.

The term "controlled REC" is an environmental condition that would have been considered a REC in the past but that has been remediated and received risk-based closure by a regulatory agency (i.e., No Further Action letter) where residual contamination remains in place. Furthermore, the term "controlled REC" is used if the property is subject to a control or use restriction (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls) due to residual on-site contamination.

The term "historical REC" is an environmental condition that would have been considered a REC in the past but that has been remediated and received unrestricted closure by the regulatory agency. Therefore, no controls or use restrictions have been applied to the property.

The term "REC" is not intended to include de minimis conditions. De minimis conditions are conditions that generally do not present a material risk of harm to public health or the environment and thus would not be subject to an enforcement action if brought to the attention of governmental agencies.

2.2 Qualifications of Environmental Professionals

This Phase I ISA was prepared by Cheyenne Graves, environmental engineer; Audrey Herschberger, environmental engineer; and Glenna McMahon, environmental engineer. Qualifications for Ms. Graves, Ms. Herschberger, and Ms. McMahon are presented in Appendix B.

The following statement is made by the environmental professionals, Glenna McMahon and Audrey Herschberger:

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professionals as defined in Section 312.10(b) of Title 40 of the Code of Federal Regulations, Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed All Appropriate Inquires in conformance with the standards and practices set forth in Title 40 of the Code of Federal Regulations, Part 312.

3 Site Location

The subject property includes 0.82 miles of Palm Avenue (also identified as Highway 75) and associated intersections and rights-of-way beginning approximately 580 feet northwest of Rainbow Drive and ending approximately 250 feet east of Georgia Street in the City of Imperial Beach, San Diego County, California. The subject property is entirely located within City-owned rights-of-way. Adjoining properties include primarily commercial properties, as well as two manufactured home parks, one to the southwest between Rainbow Drive and 7th Street and one adjoining the southeastern corner of the subject property, and an apartment complex to the north/northeast at Rainbow Drive. Palm Avenue continues to the east and northwest ends of the subject property. The surrounding areas mostly comprise residential and commercial properties. Two naval bases are also in the surrounding vicinity to the northwest (Silver Strand Training Complex) and south (Naval Outlying Landing Field) of the subject property.

4 Environmental Setting

The subject property is located in Imperial Beach in southern San Diego County. approximately 3.30 miles north of the United States–Mexico International Border. The subject property is surrounded by two bodies of water, the Pacific Ocean, approximately 0.65 miles to the east, and the San Diego Bay, approximately 1 mile to the north. Interstate 5 is approximately 0.95 miles east of the subject property.

General topographic information for the subject property and the surrounding area was obtained from a review of topographic maps and from a site visit. The subject property is relatively flat with slight hills. The elevation of the subject property ranges between approximately 15 feet above mean sea level (amsl) to 32 feet amsl (Google Earth 2025).

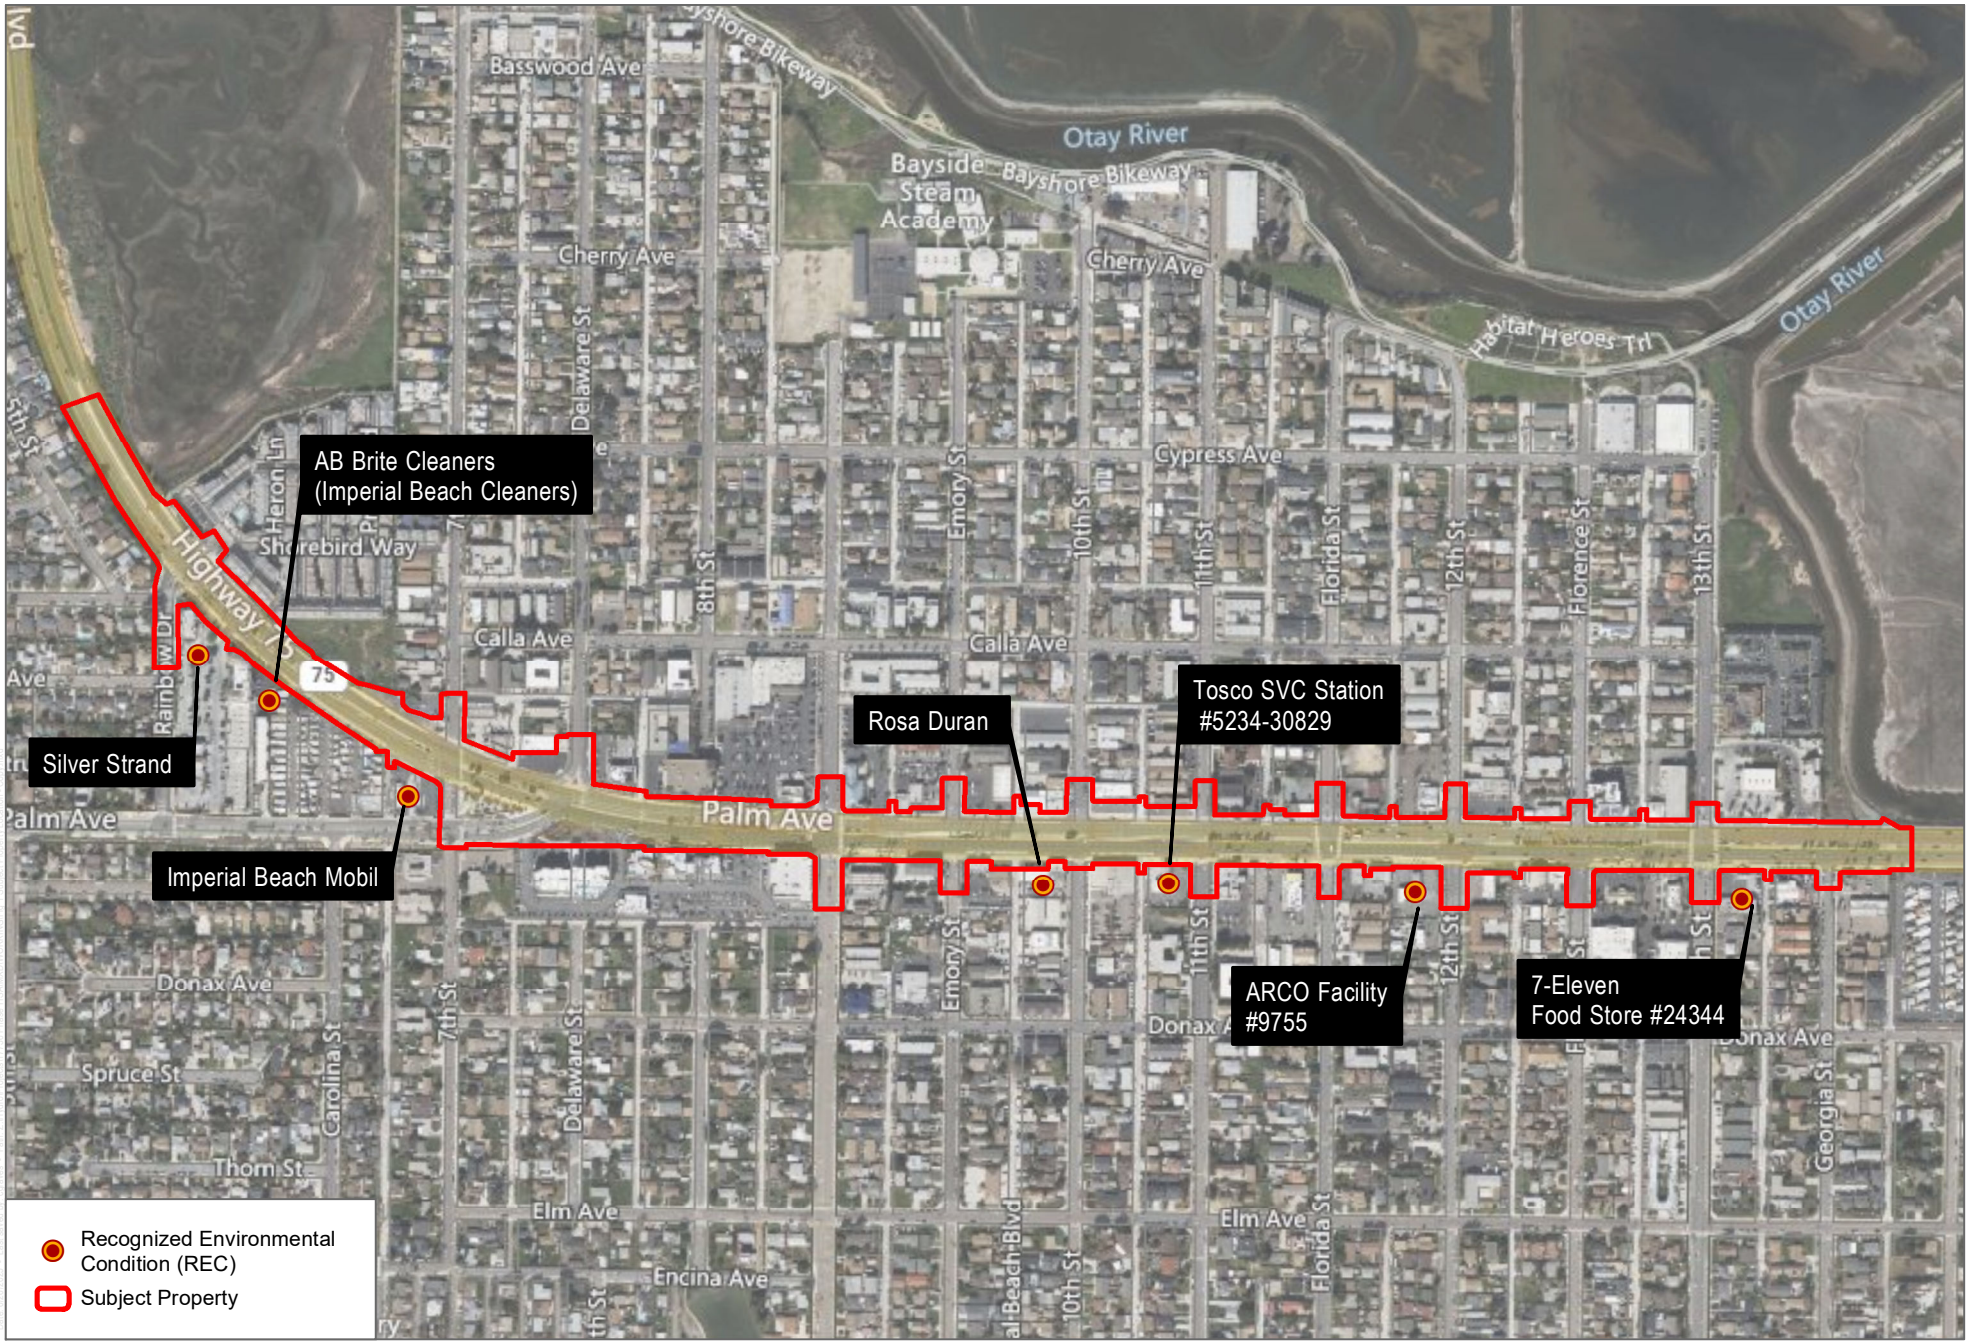

Dudek reviewed the U.S. Fish and Wildlife Service National Wetlands Inventory online mapper (USFWS 2025). An estuarine and marine wetland (San Diego Bay National Wildlife Refuge) adjoins the subject property on its northeastern boundary, extending east-northeast toward the San Diego Bay. The San Diego Bay is approximately 1 mile north of the subject property.

Dudek reviewed the Federal Emergency Management Agency National Flood Hazard Layer Viewer (FEMA 2025). The subject property is not located in a regulatory floodway (Appendix C).

The State Water Resources Control Board's Groundwater Ambient Monitoring and Assessment (GAMA) Program Groundwater Information System (SWRCB 2025a) was used to identify groundwater wells on or near the subject property. The database includes locations of domestic, irrigation, industrial, municipal, monitoring, and other water supply wells in the State of California. There were 14 monitoring wells identified on the subject property associated with various cleanup cases adjoining the subject property. Upon further research, it appears all the monitoring wells were destroyed between 2013 and 2014 as the cleanup cases received regulatory closure (URS 2015; Lynco 2014). Depth to groundwater in these monitoring wells was between 19.6 and 25.2 feet below ground surface, with a northwesterly flow direction (URS 2014; Wayne Perry 2013).

The Environmental Data Resources (EDR) Radius Map Report (Appendix D) did not identify any water supply wells on the subject property. Monitoring wells mapped on the EDR Radius Map Report matched those identified on GAMA.

According to the California Geologic Energy Management Division (CalGEM 2025) online well finder application, one plugged dry hole was mapped 0.82 miles to the northeast of the subject property. Oil wells mapped on the EDR Radius Map Report matched those on CalGEM.

FIGURE 2

Subject Property Features

Phase I ISA - Palm Avenue Complete Multimodal Corridor Project, Imperial Beach, CA

5 Local Agency Records

5.1 City of Imperial Beach

The subject property is located within the City of Imperial Beach, California. Based on review of the City of Imperial Beach zoning map (Appendix E), adjoining properties to the north and south of the subject property are zoned general commercial and mixed use, adjoining properties to the northwest are zoned as an urban reserve, and adjoining properties to the southwest are zoned for single-family residential. The adjoining properties to the east and west are outside of the city boundaries. The surrounding properties to the north and south are zoned for residential use.

5.2 San Diego County Department of Environmental Health

The San Diego County Department of Environmental Health and Quality (DEHQ) Hazardous Materials Division is the Certified Unified Program Agency for San Diego County and as such maintains information about spills, tanks, or chemical use that may have impacted the environmental conditions on the subject property. Records searches are conducted by physical address. Regulatory oversight for certain cleanup sites in San Diego County is shared between DEHQ and SDRWQCB. Cleanup sites under SDRWQCB oversight are maintained in the GeoTracker database, which is further discussed in Section 5.3. Because the subject property is a roadway and is not identified by a physical address, no records request could be submitted to DEHQ for the subject property. However, on June 25, 2025, Dudek accessed the DEHQ online Environmental Health Document Search (DEH 2025) to search for information on adjoining properties identified in the EDR Report as "San Diego Co SAM" and had indications of releases to the subject property (Section 8). The DEHQ online Environmental Health Document Search was also referenced for properties in the State Water Resources Control Board GeoTracker database with limited information and hazardous material or petroleum product releases that could have impacted the environmental conditions of the subject property. Records identified in the Environmental Health Document Search that met these criteria are listed in Table 1.

Table 1. Department of Environmental Health and Quality Environmental Health Document Search Records for Adjoining Properties

Business Name	Record Type	Details
Adjoining Property to the South, 674 Palm Avenue		
AB Brite Cleaners (Imperial Beach Cleaners)	SDRWQCB Correspondence	2021 correspondence between SDRWQCB and County of San Diego about regulatory oversight at the site.
	Boring Construction Permit	Permits approved in 2020, 2022, and 2023 for construction soil borings. A site map with boring locations and a report containing boring logs and laboratory data were provided in 2023.
	Phase II ESA	A 2021 Phase II ESA that identifies the dry cleaning site as a REC for the residential properties located nearby. The REC designation was due to a vapor

Table 1. Department of Environmental Health and Quality Environmental Health Document Search Records for Adjoining Properties

Business Name	Record Type	Details
		intrusion condition from a PCE release at the dry cleaning facility.
Adjoining Property to the Southwest, 600 Palm Avenue		
Silver Strand Plaza	SAM Application Inspection	Memorandum for RWQCB from March 1988. A release was detected at the site. A total of four tanks had previously been on site, three gasoline and one waste oil. A subsurface investigation in February 1988 identified total petroleum hydrocarbon (TPH) in soil at a maximum concentration of 820 ppm (AGI 1988). In March 1988, soil and groundwater samples were collected beneath the waste oil tank. TPH was detected at 14 ppm in the soil sample; it was not detected in the groundwater sample (AGI 1988).
	SAM Technical Report	Lab reports for soil samples taken at the site in 1988.
Adjoining Property to the South, 1311 Palm Avenue		
7-Eleven Food Store No. 24344	SAM Technical Report	A 1992 tank integrity test report due to a failed tightness test on the premium unleaded line. During the second test it was determined that the turbine head needed to be replaced. The repair was completed and the line retested with passing results.
	SAM Correpondance	Memorandum for RWQCB from April 1992. The site had an unauthorized release of oil from an underground storage tank because of a product line failure.
	SAM Inspection Application	Tank integrity test reports for the April 1992 unauthorized release.
	SAM Closure Documents	Closure document for April 1992 failed integrity test, dated October 1992.
Adjoining Property to the North, 1002–1010 Palm Avenue		
1002–1010 Palm Avenue	SAM Correspondence	Correspondence from DEHQ detailing the opening of a Voluntary Assistance Program case at the site in October 2019 and transfer of oversight of the case to RWQCB.

Note: SDRWQCB = San Diego Regional Water Quality Control Board; ESA = Environmental Site Assessment; REC = recognized environmental condition; PCE = tetrachloroethylene; SAM = Site Assessment and Mitigation; TPH = total petroleum hydrocarbon; ppm = parts per million; DEHQ = San Diego County Department of Environmental Health and Quality.

Based on information in the Environmental Health Document Search , three of the sites discussed above were determined to present RECs to the subject property. AB Brite Cleaners was determined to be a REC due to high

levels of tetrachloroethylene (PCE) impacts that have resulted in a vapor intrusion risk at the site, and the direction of groundwater flow to the northwest has the potential to impact the subject property. 7-Eleven Food Store No. 24344 was also determined to be a REC. The site was issued case closure for a failed integrity test for an underground storage tank (UST) system. However, no investigation was done for the leak before closure was issued, and the site continued to receive violations until at least 2022 for failure of the leak detection monitoring system on USTs. Silver Strand Plaza was determined to be a REC due to elevated levels of TPH at the time of closure and the direction of groundwater flow to the northwest, which has the potential to impact the subject property.

Dudek requested records from the State Water Resources Control Board for 1002–1010 Palm Avenue on June 25, 2025, for further information on the status of the case. As of the date of this report a response has not been received; thus, this is considered a data gap.

5.3 State Water Resources Control Board

Dudek reviewed GeoTracker, the State Water Resource Control Board's data management system, on June 18, 2025, which is a database for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater (SWRCB 2025b).

5.3.1 Leaking Underground Storage Tanks

Five leaking underground storage tank (LUST) cases were identified within 0.5 miles of the subject property. However, due to distance, type, and characteristics of the contaminated media, and the groundwater flow direction, it is unlikely they have impacted the environmental conditions of the subject property. Six closed leaking LUST cases were identified adjoining the subject property both to the north and south. The adjoining LUST cases are discussed below.

The **Rosa Duran** property is located at 989 Palm Avenue, adjoining the subject property to the south. Site investigations identified three areas of contamination, one from an on-site waste oil tank and two from off-site sources, including gasoline from the north and chlorinated hydrocarbons from the west. Both soil and groundwater impacts were identified. Following cleanup efforts, SDRWQCB noted remaining soil contamination included benzene (690 mg/kg), toluene (8,800 mg/kg), ethylbenzene (6,200 mg/kg), xylene (21,500 mg/kg), and lead (23 mg/kg) at the time of closure (County of San Diego 2002). Groundwater had detectable total recoverable petroleum hydrocarbons at concentrations of 2,800 microgram per liter (µg/L). The closure report also suggests that a second release under Palm Avenue may have occurred, but there were no additional details. Based on the fact that concentrations observed at the time of closure are above the current Tier 1 Environmental Screening Level (ESL) values and that the direction of groundwater flow is toward the northwest and therefore crosses the subject property boundaries, this site is considered a REC. This site is shown on Figure 2.

ARCO Facility No. 9755 is located at 1185 Palm Avenue, adjoining the subject property to the south. The site has a closed LUST case, with documented releases in 1986 and 1992. Remediation was conducted between May 1989 and April 2012, including soil removal, soil vapor extraction, and groundwater treatment, as well as removal of USTs, fuel islands, and piping. Residual soil impacts were found to cover an area of approximately 19,200 square feet at a depth interval of 21 to 27 feet below ground surface. During the last sampling event in May 2013, the maximum gasoline-range TPH concentration was 38,000 µg/L, detected in a monitoring well located on the subject property (Wayne Perry 2013). This well also contained benzene at 670 µg/L, toluene at 150 µg/L, ethylbenzene at 2,000 µg/L, and total xylenes at 7,200 µg/L (Wayne Perry 2013). These values are above the California Groundwater Tier 1 ESLs for benzene (0.42 µg/L), toluene (40 µg/L), ethylbenzene (3.5 µg/L), and total xylenes

(20 µg/L). Several other wells located on and adjoining the subject property also had detected concentrations of gasoline-range TPH and VOCs above the Tier 1 ESLs. The site was issued closure in August 2014, and it was determined natural attenuation would occur at the site by 2077 (County of San Diego 2014a). Based on the known groundwater contamination within the boundaries of the subject property, the fact that concentrations were above current regulatory screening levels (Tier 1 ESLs) at time of closure, and the fact that natural attenuation was estimated by the regulator to occur in 2077, this site is considered a REC. The site is shown on Figure 2.

All American Car Wash is located at 1158 Palm Avenue, adjoining the subject property to the north. In March 1994 gasoline-contaminated soil was identified during the removal of three USTs. Contaminated soil was removed and a groundwater monitoring well was installed. Prior to regulatory closure, final reported groundwater contamination included benzene (58 µg/L), toluene (1,905 µg/L), ethylbenzene (2,012 µg/L) and xylenes (8,000 µg/L) (County of San Diego 1996). The site was issued closure in 1996 on the basis that benzene was below the current SDRWQCB cleanup goal of 400 µg/L. Concentrations of contaminants in groundwater at the time of closure exceed current regulatory screening levels (Tier 1 ESLs). However, the site is located to the north of the subject property, and groundwater flow is away from the subject property (to the northwest). Therefore, it is unlikely that the site has impacted the environmental conditions of the subject property.

Tosco SVC Station No. 5234-30829 (Genes Auto Service) is located at 1085 Palm Avenue, adjoining the subject property to the south. The site has two LUST cases, one received closure in 1995 and the other in 2014. The site was historically a gasoline station and an auto repair and truck rental facility, and it is currently a Mobil gas station. Four USTs were removed from the site in 2003 along with 250 tons of hydrocarbon-impacted soil. A vapor risk assessment, conducted in July 2007, calculated vapor risk under the Site Assessment and Mitigation (SAM) Program Vapor Risk 2000 Model threshold, and it was determined that no further assessment of vapor risk was warranted (County of San Diego 2014b). The last groundwater monitoring event conducted for the site, in October 2013, identified groundwater contamination within the boundaries of the subject property (within Palm Avenue), specifically methyl tert-butyl ether at a maximum concentration of 3.2 µg/L (URS 2014). This concentration is lower than the current Tier 1 ESL of 5 µg/L. Although contaminants of concern within the subject property boundary at the time of the last monitoring (2013) were not above current screening levels, contaminant concentrations in groundwater within the gas station boundary, south of the subject property, were above current screening levels. Groundwater flow is northwest, toward the subject property. Based on this information, there is a potential for remaining contamination to migrate into the subject property boundary, and this site is considered a REC. The site is shown on Figure 2.

Imperial Beach Mobil is located at 681 Highway 75, adjoining the subject property to the south. According to the case closure summary dated March 1998, soil contamination was identified during a gas station remodel. Following the remodel, TPH remained in the site soils at depths between 20 and 25 feet below ground surface. The remaining soil contamination was characterized as two plumes with concentrations above 1,000 parts per million, one with a volume of approximately 700 cubic yards extending northward toward Palm Avenue (the subject property), the other approximately 200 cubic yards extending toward 7th Street (the subject property) (County of San Diego 1998). The groundwater depth was reportedly between 19.2 feet and 23.84 feet below ground surface (County of San Diego 1998). Based on this data, there is a potential for petroleum-contaminated soil to be located on the subject property. Therefore, this site is considered a REC. The site is shown on Figure 2.

5.3.2 Other Environmental Cleanup Sites

One open cleanup site was identified adjoining the subject property to the southwest. **Imperial Beach Cleaners** is located at 674 Palm Avenue. The site has been occupied by dry cleaning operations since at least 1969. Solvents including PCE were used between 1995 and 2012 (GES 2024). Currently the site is operating a petroleum-based dry cleaning operation. Subsurface investigations were completed in 2020, 2022, and 2023 for the site. Maximum concentrations of PCE were as follows: 1,300,000 micrograms per cubic meter (µg/m^3) in soil vapor, 3,400,000 µg/m^3 in subslab soil vapor, 21 µg/m^3 in indoor air, 41,000 µg/kg in soil, and 590 µg/L in groundwater. All of these values were above screening levels applicable at the time of the investigation. Maximum concentrations of trichloroethylene were as follows: 2,200 µg/m^3 in soil vapor, 4,000 µg/m^3 subslab soil vapor, 9.48 µg/m^3 in indoor air, and 5.8 µg/L in groundwater. All of these values were above screening levels applicable at the time of the investigation (GES 2024). The horizontal extents of soil vapor and groundwater contamination have not been delineated and may extend northward onto the subject property (GES 2024). Depth to groundwater was reported to range between 18.5 and 20.2 feet below ground surface. Soil vapor impacts were identified at 5 feet below ground surface. Presently, the regulatory agency recommends a pilot test workplan to assess soil vapor extraction as a remedial alternative. Based on the reported levels of contamination above regulatory screening levels and the potential for groundwater and soil vapor impacts to extend into the subject property, this site is considered a REC. The site is shown on Figure 2.

There were 13 closed regulatory cleanup cases identified within 0.5 miles of the subject property, 3 of which are connected to the Imperial Beach Mobil LUST case discussed in Section 5.3.1 above. The others were reviewed, and it was determined that based on distance from subject property, impacted media on the site, and groundwater flow away from the subject property, these sites are not likely to have impacted the environmental conditions of the subject property.

5.4 Department of Toxic Substances Control

Dudek reviewed the DTSC data management system, EnviroStor, on June 18, 2025. EnviroStor is used for tracking cleanup, permitting, enforcement, and investigation efforts at sites with known contamination or at those that use hazardous materials (DTSC 2025).

The subject property was not identified in the EnviroStor database. One site (Bayside Elementary School) was identified 0.35 miles to the north of the subject property. It was determined that, based on the location, type of contamination, and distance from the subject property, the site is not likely to have impacted the environmental conditions of the subject property.

5.5 California Department of Resources Recycling and Recovery Solid Waste Information System

Dudek searched the California Department of Resources Recycling and Recovery Solid Waste Information System (SWIS) online database, which contains information on solid waste facilities, operations, and disposal sites throughout the State of California on June 18, 2025.

The subject property was not identified in the SWIS database, nor were any sites of concern located within 1 mile of the subject property (CalRecycle 2025).

5.6 National Pipeline Mapping System

The National Pipeline Mapping System provides a public map viewer application of data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under U.S. Department of Transportation Pipeline and Hazardous Material Safety Administration jurisdiction (PHMSA 2025).

A review of the National Pipeline Mapping System was conducted on June 18, 2025, to check for hazardous pipelines on and around the subject property. No pipelines are documented on or within 1 mile of the subject property.

6 Site Reconnaissance

A site reconnaissance of the subject property was conducted on June 19, 2025, by Cheyene Graves of Dudek. Ms. Graves was unaccompanied during the site reconnaissance. The site reconnaissance was done on foot as well as through a windshield survey. During the site reconnaissance, current conditions were noted and photographs were taken of both the subject property and adjoining properties. Observations are described below, and photographs are presented in Appendix F. Features of note are shown on Figure 2.

6.1 Site Description

The subject property consists of a 0.82-mile strip of Palm Avenue (Highway 75) and adjoining City of Imperial Beach-owned rights-of-way (Appendix F, Photographs 1 through 3). Adjoining properties include residential properties to the southwest and southeast and commercial properties to the north and south, many of which include gas stations (Appendix F, Photographs 4 through 6). Two culverts with concrete piping adjoin the subject property to the southwest and Rainbow Drive to the north (Appendix F, Photographs 7 and 8). Various utility vaults for electric, sewer, water, and communications were observed along the subject property (Appendix F, Photographs 9 through 12).

6.2 Summary of Observations

Wetlands and Natural Waterways

No wetlands or natural waterways were observed on the subject property. The San Diego Bay National Wildlife Refuge adjoins the subject property on the eastern boundary (Appendix F, Photograph 1).

Surface Water Discharge

No surface water discharge was observed on the subject property at the time of the site reconnaissance. A culvert was observed on the subject property. The culvert was observed parallel to Palm Avenue and running on either side of Rainbow Drive (Appendix F, Photographs 7 and 8). The culvert contained a cement pipe and led into a natural ditch (vegetated on the northern side and dirt on the southern side) for stormwater collection.

Distressed Vegetation

No distressed vegetation was observed on the subject property that would indicate hazardous materials/waste releases.

Solid Debris Storage

No solid debris storage was observed on the subject property.

Chemical Storage or Use

No chemical storage or signs of chemical use were identified on the subject property. Adjoining properties included multiple gas stations and commercial facilities, which likely include the use of hazardous materials and/or petroleum products. It did not appear that this use or storage extended onto the subject property.

Unnaturally Discolored Ponds or Flowing Waters

No unnaturally discolored ponds, pools, or flowing water were observed on the subject property.

Groundwater Wells, Cisterns, Cesspools, or Septic Tanks

No groundwater wells, cisterns, cesspools, or septic tanks were observed on the subject property.

Sumps

No sumps were observed on the subject property.

Transformers

Transformers (Appendix F, Photograph 14) and other electrical access points were observed on the subject property (Appendix F, Photograph 11).

Abnormal Odor

No abnormal odors were observed on the subject property.

Soil Disturbances

A soil disturbance was observed on the subject property. The soil was disturbed due to construction (Appendix F, Photograph 13). Construction included removal of concrete around the stoplight at the time of the site reconnaissance. Dirt was exposed from the removal of concrete. No discoloration or abnormal odors were observed in this area.

Storage Tanks

No storage tanks or evidence of storage tanks were observed on the subject property. As noted above, multiple gas stations (likely with USTs) are present adjoining the subject property.

Other Hazardous Materials

The following non-ASTM Caltrans-specific hazardous materials were observed on the subject property: treated wood used for signposts (Appendix F, Photographs 16 and 17), culverts with sediments (Photographs 7 and 8), patches of open soil that have not been developed (Appendix F, Photograph 18), and electrical waste including yellow traffic striping (Appendix F, Photograph 19).

7 Site History

Based on review of historical aerial photographs and topographic maps, the subject property has been developed as Palm Avenue (or Highway 75) since at least 1904. The areas adjoining and surrounding the subject property were used for residential and commercial purposes from at least 1904 to the present day, with increased urbanization through the decades. The San Diego Bay National Wildlife Refuge is located to the north-northeast of the subject property. The site was formerly used for salt evaporators from approximately 1943 to 2012. Naval bases including Silver Strand Training Complex and Naval Outlying Landing Field (an air station) have been located in the northern and southern surrounding areas of the subject property, respectively, from at least 1953 to present day. Multiple gas stations have adjoined the subject property since at least the 1950s.

7.1 Historical Aerial Photographs

Dudek reviewed historical aerial photographs obtained from EDR for 1949, 1953, 1964, 1966, 1970, 1979, 1985, 1989, 1994, 1996, 2002, 2005, 2009, 2012, 2016, and 2020 (see Appendix G). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. Observations are described in Table 2.

Table 2. Aerial Photograph Observations

Date	Subject Property	Surrounding Area
1949	The subject property appears to be developed as a road with adjoining intersections and rights-of-way. The road appears narrower than present day, and portions of the subject property therefore overlap land on either side of the road.	Palm Avenue continues to the north. The adjoining and surrounding areas to the northwest of Palm Avenue include undeveloped land with small roads. The adjoining and surrounding area to the east of Palm Avenue comprise salt evaporators, as denoted in the topographic maps (see Section 7.2). The salt evaporators appear in the northeastern portion of the aerial photograph. A railroad track appears to run through the southern boundary of the salt evaporators. The adjoining area to the east of the subject property appears to be a continuation of the road (present day Palm Avenue) and the salt evaporators. The areas adjoining and surrounding the central portion of the subject property are residential and commercial areas.
1953	Residential homes have been developed on lots that fall within the boundary of the subject property.	Larger commercial buildings are now observed adjoining the subject property to the southwest. A school campus is now observed approximately 0.30 miles to the southwest of the subject property. Additional areas appear to be developed for residential and commercial sites in the surrounding areas.

Table 2. Aerial Photograph Observations

Date	Subject Property	Surrounding Area
1964	Palm Avenue appears to have been widened and now appears to take up most of the subject property, with the exception of a few commercial properties that overlap the subject property boundary on the north side.	All surrounding area to the south now appears developed. Several gas stations are now observed on southern adjoining properties. The school campus to the southwest has expanded in size. The adjoining and surrounding areas to the north, west, and east of the subject property appear to be more developed, with residential and commercial buildings.
1966	The subject property appears similar to the 1964 aerial photograph.	Almost all southern adjoining properties now appear to be commercial buildings. The rest of the adjoining and surrounding properties appear similar to the 1964 aerial photograph.
1970	The subject property appears similar to the 1966 aerial photograph.	The adjoining and surrounding areas appear similar to the 1966 aerial photograph.
1979	The subject property appears similar to the 1970 aerial photograph.	The adjoining and surrounding areas appear similar to the 1970 aerial photograph.
1985	The subject property appears similar to the 1979 aerial photograph.	The adjoining and surrounding areas appear similar to the 1979 aerial photograph.
1989	The subject property appears similar to the 1985 aerial photograph.	The adjoining and surrounding areas appear similar to the 1985 aerial photograph.
1994	The subject property appears similar to the 1989 aerial photograph.	The adjoining and surrounding areas appear similar to the 1989 aerial photograph.
1996	The subject property appears similar to the 1994 aerial photograph.	The adjoining and surrounding areas appear similar to the 1994 aerial photograph.
2002	The subject property appears similar to the 1996 aerial photograph.	The adjoining and surrounding areas appear similar to the 1996 aerial photograph.
2005	The subject property appears similar to the 2002 aerial photograph.	The adjoining and surrounding areas appear similar to the 2002 aerial photograph.
2009	The subject property appears similar to the 2005 aerial photograph.	The adjoining and surrounding areas appear similar to the 2005 aerial photograph.
2012	The subject property appears similar to the 2009 aerial photograph.	An area adjoining the south-central portion of the subject property no longer has buildings or asphalt and has been graded down to dirt. The rest of the adjoining and surrounding areas appear similar to the 2009 aerial photograph.
2016	The subject property appears similar to the 2012 aerial photograph.	The adjoining and surrounding areas appear similar to the 2012 aerial photograph.
2020	The subject property appears similar to the 2016 aerial photograph.	The adjoining lot that was graded down to dirt now appears to have buildings and asphalt. The rest of the adjoining and surrounding areas appear similar to the 2016 aerial photograph.

Note: See Appendix G for corresponding photographs.

7.2 Historical Topographic Maps

Dudek reviewed historical topographic maps obtained from EDR for 1904, 1930, 1943, 1953, 1975, 1991, 1996, 2012, 2015, 2018, and 2021 (see Appendix H). The topographic maps provide background information to assess the possibility of past activities that could present environmental concerns. Observations are described in Table 3.

Table 3. Topographic Map Observations

Date	Description
1904	The subject property is depicted with two buildings in the central portion. The central portion of the subject property is depicted with a road through it. Several roads are crossing through the subject property from north to south. The western and eastern portions of the subject property are depicted in the body of water (current San Diego Bay National Wildlife Refuge). San Diego Bay National Wildlife Refuge is depicted in the surrounding area to the north of the subject property. The areas to the north, south, east, and west of the subject property are depicted with sparse building structures, roads, and train tracks. The ocean is depicted to the west of the subject property. A Forest Service administration area is depicted near the western end of the subject property. The area is depicted from the ocean to the refuge.
1930	The subject property is depicted similarly to the 1904 topographic map. Additional roadways and buildings are depicted in the southern surrounding areas. The railroad is depicted as the Southern Pacific Line.
1943	The main road depicted through the central portion of the subject property is now depicted as Highway 75 and Palm Avenue. Additional buildings and roadways are depicted on the subject property. Residential areas are depicted adjoining and surrounding the subject property to the north and south. A marsh is depicted approximately 0.79 miles to the southwest of the subject property. A landing field is depicted approximately 0.98 miles to the south of the subject property. The San Diego Bay National Wildlife Refuge is depicted as occupying a smaller area, and some of its former land is now the Otay River and Salt Works. The subject property is depicted within Imperial Beach. The western portion of the surrounding area is unmapped.
1953	No buildings are depicted on the subject property. The former area of the San Diego Bay National Wildlife Refuge now has salt evaporators depicted in the refuge area to the south. Interstate 5 is now depicted approximately 0.92 miles to the east of the subject property. The Naval Auxiliary Air Station is depicted approximately 0.95 miles to the south of the subject property. A sewage disposal area is depicted approximately 0.82 miles to the southwest of the subject property. A borrow pit is depicted approximately 0.70 miles to the southeast of the subject property. The western portion of the surrounding area is unmapped.
1975	The subject property is depicted similarly to the 1953 topographic map. The U.S. Naval Radio Station is depicted 0.09 miles to the north of the western end of the subject property. A sewage disposal site is depicted approximately 0.66 miles to the northeast. The sewage disposal area depicted to the southwest is now depicted as a sewage disposal pond. The Oneita Slough is depicted as a marshland approximately 0.83 miles to the southwest. All of the surrounding areas are depicted as developed. A well is depicted approximately 0.80 miles to the east.

Table 3. Topographic Map Observations

Date	Description
1991	The subject property is depicted similarly to the 1975 topographic map. Border Field State Park is depicted approximately 1.65 miles to the south of the subject property. Heliports and a control tower are now depicted on the Naval Auxiliary Air Station. Six landmark objects (Athletic Field Lights) are depicted approximately 0.58 miles to the southeast. The rest of the adjoining and surrounding areas are depicted similarly to the 1975 topographic map.
1996	The subject property is depicted similarly to the 1991 topographic map. A small portion of the salt evaporator area is now depicted as the San Diego National Wildlife Refuge northeast of the subject property. The southwest corner of the U.S. Naval Communication Station is now depicted as a wildlife refuge. The U.S. Naval Radio Station is now depicted as the U.S. Naval Communication Station. The sewage disposal pond is no longer depicted. The rest of the adjoining and surrounding areas are depicted similarly to the 1991 topographic map.
2012	The subject property is depicted similarly to the 1996 topographic map. The U.S. Naval Radio Station is not depicted with a title anymore. The salt evaporators are not depicted with a title anymore. The adjoining and surrounding areas are depicted similarly to the 1996 topographic map.
2015	The subject property is depicted similarly to the 2012 topographic map. The naval areas are depicted as Naval Base Coronado Silver Strand to the northwest of the subject property and as Naval Base Coronado Imperial Beach to the south of the subject property. The rest of the adjoining and surrounding areas are depicted similarly to the 2012 topographic map.
2018	The subject property is depicted similarly to the 2015 topographic map. Naval Base Coronado Imperial Beach is depicted with the Tijuana Slough National Wildlife Refuge over portions. All of the salt evaporators to the north of the subject property are depicted as the San Diego Bay National Wildlife Refuge. The rest of the adjoining and surrounding areas are depicted similarly to the 2015 topographic map.
2021	The subject property and adjoining and surrounding areas are depicted similarly to the 2018 topographic map.

Note: See Appendix H for corresponding maps.

8 Regulatory Agency Records Search

The regulatory database search gives a listing of sites within up to a 1-mile radius of the subject property ("target property" is the term used by EDR) that are known to be chemical handlers or hazardous waste generators or that have reported releases of hazardous substances or petroleum products. Information in these listings includes the location of the site of concern relative to the subject property, type of potential environmental concern present, and the status of the site of concern. EDR conducted the database search for this Phase I ISA on May 30, 2025; the EDR Radius Map Report is included in Appendix D.

The regulatory databases, as listed in ASTM Standard E 1527-21 and shown in Table 4, were included in this search. Additional databases related to hazardous materials were also searched by EDR. The complete list of databases is included in the EDR Radius Map Report.

Table 4. Regulatory Database Search Results

Acronym	Database	Search Distance	Subject Property Listed	Number of Surrounding Sites Listed
NPL	National Priorities List (NPL) (including proposed NPL sites and NPL Liens [target property only])	1 mile	No	0
Proposed NPL	Sites proposed for NPL	1 mile	No	0
Delisted NPL	National Priority List Deletions	1 mile	No	0
NPL Liens	NPL Liens	1 mile	No	0
CERCLIS –SEMS	Comprehensive Environmental Response, Compensation, and Liability Act – Superfund Enterprise Management System	0.5 miles	No	0
CERCLIS NFRAP SEMS-ARCHIVE	CERCLIS No Further Remedial Action Planned	0.5 miles	No	1
CORRACTS	Resource Conservation and Recovery Act (RCRA) Corrective Action	1 mile	No	1
RCRA TSDF	RCRA – Transportation, Storage, and Disposal Facilities	0.5 miles	No	0
RCRA GEN	RCRA Registered Small or Large Quantity Generators of Hazardous Waste	0.25 miles	No	0
RCRA-LQG	RCRA Large Quantity Generators	0.25 miles	No	1
RCRA-SQG	RCRA Small Quantity Generators	0.25 miles	No	8
RCRA-CESQG RCRA-VSQG	RCRA Conditionally Exempt Small Quantity Generators	0.25 miles	No	2
ERNS	Emergency Response Notification System	Target Property	No	1
US ENG CONTROLS	Sites with Engineering Controls	0.5 miles	No	0
US INST CONTROLS	Sites with Institutional Controls	0.5 miles	No	0
RESPONSE	State- and Tribal-Equivalent NPL	1 mile	No	0
ENVIROSTOR	State- and Tribal-Equivalent CERCLIS	1 mile	No	6

Table 4. Regulatory Database Search Results

Acronym	Database	Search Distance	Subject Property Listed	Number of Surrounding Sites Listed
SWF/LF	State and Tribal Landfill and/or Solid Waste Disposal Site	0.5 miles	No	1
LUST	State and Tribal Leaking Underground Storage Tank	0.5 miles	No	24
San Diego Co. SAM	San Diego Site Assessment and Mitigation Program	0.5 miles	No	17
CPS-SLIC	State and Tribal Leaking Underground Storage Tank	0.5 miles	No	10
Indian LUST	Tribal Leaking Underground Storage Tank	0.5 miles	No	0
UST	State and Tribal Registered Underground Storage Tank	0.25 miles	No	12
AST	State and Tribal Registered Aboveground Storage Tank	0.25 miles	No	4
Indian UST	Registered Underground Storage Tank on Tribal Land	0.25 miles	No	0

LUCIS	Institutional Control/Engineering Control	0.5 miles	No	0
Indian VCP	State and Tribal Voluntary Cleanup sites	0.5 miles	No	0
VCP	State and Tribal Voluntary Cleanup sites	0.5 miles	No	0
US Brownfields	State and Tribal Brownfields	0.5 miles	No	0
Additional Environmental Records, including State and Local Lists		Varies	Yes	459

Note: Refer to Appendix D.

8.1 Subject Property

Due to the nature of the geospatial referencing within the database search, the subject property is listed in multiple databases. However, each of the subject property listings was reviewed and determined to represent an adjoining or nearby property. Therefore, there were no listings for the subject property.

8.2 Adjoining and Surrounding Properties

A total of 356 listings were reported within 1 mile of the subject property. Most of the listings are administrative in nature and are not expected to have adversely impacted the environmental conditions of the subject property. The following sites are those that have known or suspected releases of hazardous materials or petroleum products, and the resultant contamination is likely to have either occurred on or encroached upon the subject property boundary; these sites are therefore considered RECs.

Silver Strand Plaza (Sea Coast Veterinary Group, Express Dry Cleaners, Tschakert Robert L) is located at 600 Palm Avenue and adjoins the subject property to the southwest. The site is listed in the LUST, San Diego Co. SAM, San Diego Co. HMMD, CERS Haz Waste, Cortese, Hist Cortese, CERS, UST Finder, EDR Hist Cleaner, and EDR Hist Auto databases.

As discussed in Section 5.2, based on elevated levels of TPH at the time of closure and the flow of groundwater to the northwest that has the potential to impact the subject property, this site is considered a REC.

AB Brite Cleaners & Laundry (FRV Embroidery and Cleaners) is located at 674 Palm Avenue and adjoins the subject property to the south. The site is listed in the EDR Hist Cleaner, RCRA-SQG, FINDS, ECHO, HWTS, HAZNET, CPS-SLIC, San Diego Co. HMMD, DryCleaners, EMI, and RCRA NonGen/NLR. Based on information provided in historical databases, this site appears to have been a dry cleaner since at least 1969. As discussed in Section 5.3.2 under Imperial Beach Cleaners, based on the reported levels of contamination above regulatory screening levels and the potential for groundwater and soil vapor impacts to extend into the subject property, this site is considered a REC.

Imperial Beach Mobil (Mobil Station 18-FPL, 1X Mobile Oil_Station 18-FPL, EXXON Mobil Oil Corp, Abbys Mobil Station, Mohsen Oil Inc., Stars Gas IB Inc., Beachside Station, Ramirez Abelerado Mobil) is located at 681 Highway 75 and adjoins the subject property to the south. The site is listed in the LUST, CPS-SLIC, San Diego Co. HMMD, Cortese, HIST CORTESE, San Diego Co. LOP, SWEEPS UST, RCRA NonGen/NLR, CERS TANKS, UST Finder Release, and E Manifest. As discussed in Section 5.3.1, based on available data, there is potential for petroleum-contaminated soil to be located on the subject property. Therefore, this site is considered a REC.

Smittys Kawasaki (Smittys ATC CTR, Smitty's Kawasaki Yamaha Cycle, Stoney's Motorcycle) is reported to be located at 710 and 730 Highway 75. The site was mapped adjoining the subject property to the south. Based on a review of current maps, the address no longer appears to exist (Google Earth 2025). The site is listed in the HMMD San Diego, CHMIRS, and HWTS. A leak from an abandoned container was reported in September 2000. The report indicates 2 gallons of sulfuric acid leaked from the container. The spill was reported as contained. Based on the amount spilled and the subsequent containment, it is unlikely this release impacted the environmental conditions of the subject property.

The Rosa Duran property (Imperial Beach Auto Paint, High and Mighty Off Road Center, Duran Transmission, Viking Autobody, S&R Transmission) is located at 989 Palm Avenue to the south of subject property. The site is listed in the San Diego Co. HMMD, HWTS, HAZNET, RCRA-SQG, LUST, SWEEPS UST, FINDS, ECHO, RGA LUST, Cortese, HIST Cortese, RCRA NonGen/NLR, and E Manifest databases. As discussed in Section 5.3, there is groundwater contamination present above present-day regulatory screening levels, and groundwater flows toward the northwest and crosses the subject property boundary; this site is therefore considered a REC.

Tune Up Masters No. 410 (Tunes Lubes, City of Imperial Beach Redevelopment Agency) is located at 741 Palm Avenue and adjoins the subject property to the south. The site was listed in the SWEEPS UST, HWTS, HAZNET, and San Diego Co. HMMD. According to SWEEPS UST, the site had one 500-gallon petroleum tank. No spills were reported with the UST. The location of the site was reviewed on the historical aerial photographs and appeared to be demolished and the site graded before the present-day building was built on the site. Based on the site being removed and the soil graded at the site, it is unlikely this site has impacted the environmental conditions of the subject property.

724 9th Street is located on 9th Street; the site was listed in the CHMIRS database. The site was reported to have a pump station failure into the storm drain. The drain leads into the Tijuana Estuary. Although the release resulted in potential impacts to the environment, it is unlikely it has impacted the environmental conditions of the subject property.

ARCO 42141 (Tesoro No. 42141, Thrifty Petroleum – Imperial Beach, Wert John L, ARCO Facility No.9755, Service Station No. 416, Um Petroleum DBA Thrifty), located at 1185 Palm Avenue adjoining the subject property to the south. The site is listed in the LUST, SWEEPS UST, Cortese, HIST Cortese, HWTS, HAZNET, CERS, ECHO, E Manifest, UST, UST Finder, EDR Hist Auto, RCRA-SQG, RCRA NonGen/NLR, San Diego Co. SAM, and San Diego Co. HMMD. As

discussed in Section 5.3.1 under **ARCO Facility No. 9755**, based on the known groundwater contamination within the boundaries of the subject property, that concentrations were above present-day regulatory screening levels (Tier 1 ESLs) at time of closure, and that natural attenuation was estimated by the regulator to occur in 2077, this site is considered a REC, and is shown on Figure 2.

Jefferson Standard Life Insurance is located at 1022 Palm Avenue and adjoins the subject property to the north. The site is listed in the HIST UST database, with four reported USTs. Documents provided in the listing indicate the tanks were present in 1988, but no further information is provided. The site may be associated with 1002–1010 Palm Avenue, which is further discussed in Section 5.2.

All American Car Wash (Imperial Beach Car Wash, Crystal Clean Car Wash-Inc, 1X Rose, Alfred) is located at 1158 Palm Avenue, adjoining the subject property to the north. The site is listed in the HWTS, HAZNET, San Diego Co. HMMD, FINDS, UST Finder Release, San Diego Co. SAM, Cortese, LUST, RGA LUST, and San Diego Co LOP databases. The site has a closed LUST case and is further discussed in Section 5.3.1.

7-Eleven Food Store No. 24344 is located at 1311 Palm Avenue and adjoins the subject property to the south. The site is listed in the UST, SWEEPS UST, HIST UST, San Diego Co. LOP, San Diego Co. SAM, CPS-SLIC, San Diego Co. HMMD, CERS HAZWASTE, RCRA NonGen/ NLR, E Manifest, and UST Finder databases. This site has three documented USTs. According to the San Diego Co. SAM database the site had a failed integrity test in April 1992. The case was issued closure in October 1992. The site has received multiple violations including failure to meet monitoring requirements for equipment, failure of leak detection equipment to be located, and failure to comply with overfill prevention equipment requirements. This site is further discussed in Section 5.2.

Multiple gas stations and automotive repair facilities are, or were formerly, located along the subject property. Although gas stations and auto repair facilities handle hazardous materials and petroleum products, there are no documented releases from these locations, and there is therefore no evidence of an impact to the environmental conditions of the subject property. These gas stations include:

- **United Pacific 0657** (G&M Oil No. 177, Equilon Enterprises LLC, New West Petroleum EXXON No 1022, GSE Palm 851650, APRO LLC DBA United Pacific 0657) is located at 907 Palm Avenue and adjoins the subject property to the south. This site is also associated with the former address 901 Palm Avenue, under the name New West Petroleum Palm Ave EXXON 1022. These sites were listed in the RCRA-SQG, FINDS, ECHO, HWTS, UST FINDER, San Diego Co. HMMD, CERS HAZ WASTE, CERS TANKS, EMI, EDR Hist Auto, UST, RCRA NonGen/NLR, and E-manifest databases.
- **Dependable Carburetor Exchange** (Nelsons Automotive Service) is located at 660 Emory Street adjoining the subject property to the north. The site was listed in the San Diego Co. HMMD, CERS, HAZ WASTE, HWTS, HAZNET CERS, RCRA NonGEN/NLR, E-MANIFEST, and EDR Hist Auto databases. The site was listed as a historical auto service from 1971.
- **Land Adjacent to former VMT Auto Sales** is located west of 1502 Palm Avenue, adjoining the subject property to the east. The site is listed in the CPS-SLIC database. The purpose of the remediation work at this site was to remove soil impacted by diesel for wetland rehabilitation. Soil was excavated and deemed appropriate for terrestrial natural habitat. The highest remaining diesel concentration was 59 mg/kg, which was below the ESL for terrestrial natural habitat. Other detected contaminants (metals) were determined to be below U.S. Environmental Protection Agency regional screening levels for construction workers.
- **Fortna Warren Reed** is located at 890 Palm Avenue and adjoins the subject property to the north. The site is listed in the EDR Hist Auto database. The site was listed as a gasoline service station from 1971 to 1976.

There are no reports of a spill or release. Therefore, it is unlikely the site would have affected the environmental conditions of the subject property.

Bayside Elementary School, City of IB Public Works, and EF Mikelson were listed as closed cleanup cases. The sites were evaluated and, based on the location and nature of the documented release, they do not appear to have impacted the environmental conditions of the subject property. Multiple past dry cleaning sites were identified and are located adjoining or near the subject property. No spills or releases were reported for these sites, and they no longer appear to be operational dry cleaners (Google Earth 2025). The sites are listed below.

- **Family Cleaners** (Liberty Call Embroidery) is located at 762 13th street, adjoining the subject property to the south. The site is listed in the San Diego Co. HMMD, DRYCLEANERS, HWTS, and EDR Hist Cleaner databases. The EDR Hist Cleaner database lists the site as a dry cleaner since at least 1980.
- **Village Cleaners** is located at 1211 Donax Avenue and is approximately 0.1 miles to the south of the subject property. The site is listed in the EDR Hist Cleaner database for one year, 2005.
- **M&M Super Cleaners** (Super Cleaner) is located at 824 Palm Avenue and adjoins the subject property to the north. The site is listed in the San Diego Co. HMMD and EDR Hist Cleaner databases. The site is reported to have been a dry cleaning business since 1994.
- **CAL AIRE Enterprises** is located at 940 Donax Street. This site is approximately 0.08 miles to the south of the subject property. The site is listed in the EDR Hist Cleaner database. The site was listed in the Hist Cleaner database for the years 1969 and 1970.

Two naval bases, Silver Strand Training Complex (Silver Strand South) and Naval Outlying Landing Field (Imperial Beach NOLF) were mapped near the subject property. One is over 1 mile to the south of the subject property, whereas the second is approximately 0.09 miles to the north. Although there are multiple environmental database listings for these naval sites, including one Superfund review for the Imperial Beach NOLF, there is no indication that releases have, based on the distance and location relative to the subject property, impacted the environmental conditions of the subject property.

8.3 Unmapped Sites

Unmapped sites are flagged by EDR but not mapped due to insufficient address information. They are usually included in the database search report because they are in the same zip code as the subject property. Seven unmapped sites were listed in the EDR Radius Map Report.

Dudek reviewed these listings and determined that, based on the type of environmental listing, distance from the subject property, and known groundwater gradient, it is unlikely that these sites have impacted the environmental conditions of the subject property.

8.4 Vapor Encroachment Condition

Dudek evaluated vapor encroachment to determine whether there is potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future on-site structures. Information obtained from other sources (geologic and hydrogeological information, site reconnaissance, local regulatory agency responses), as discussed in this report, was also considered. The vapor encroachment condition assessment was conducted in accordance with ASTM Standard E 2600-15 guidance (ASTM 2015). The

EDR Radius Map Report (Appendix D) was used to evaluate listed contaminated sites as identified in federal, state, and local databases.

Government and historical records were used to identify the presence of chemicals of concern within ASTM-specified areas of concern. Several sites of concern that are RECs based on levels of volatile contamination in the groundwater and soil vapor are located within the applicable search radius around the subject property (see Sections 5.2, 5.3, and 8). These sites indicate potential for a vapor encroachment condition. Identified RECs associated with these potential vapor encroachment conditions are shown on Figure 2.

9 Potential Hazards and Environmental Concerns

Information regarding potential sources of hazards and hazardous material releases from the site reconnaissance and review of regulatory agency records is presented in the following paragraphs.

Agricultural Use

Based on a review of historical records, the subject property was not used for agricultural purposes.

Off-Site Sources

Several LUST and cleanup sites were identified that have the potential to impact the environmental conditions of the subject property. The off-site sources are discussed in Sections 5.2, 5.3, and 8.

Residential Use

The subject property is currently not developed for residential use. However, residences adjoin the subject property and previously occupied portions of the subject property before it was expanded.

Polychlorinated Biphenyl Items

Pad-mounted and underground transformers were observed on the subject property. These transformers could contain PCBs (Appendix F, Photograph 14).

Fill Material

Palm Avenue has been present in some form since at least 1904, and although fill material is often used when grading roads and developing urban areas, there is no evidence in historical records of recent fill activity, nor was evidence of fill material observed during the site reconnaissance.

Stained Soil

Staining on asphalt was observed within the subject property in the form of oil staining (Appendix F, Photograph 15). These minor spills observed on the subject property appeared to be de minimis.

Debris

No debris was observed on the subject property.

Tanks

No storage tanks or evidence of storage tanks were observed on the subject property. As noted above, multiple gas stations (likely with USTs) are present adjoining the subject property. It does not appear the associated USTs encroach on the subject property.

Lead

The subject property has been used as a roadway since at least 1904. As such, there is a likelihood that ADL has caused elevated concentrations of lead in soils on the subject property.

Asbestos

ACM may be present in the concrete culvert structures (Appendix F, Photographs 7 and 8) observed on the subject property adjoining Palm Avenue and Rainbow Drive to the west and east. ACM may be present in joint seals, mastic adhesives, weep holes, piping, and other culvert construction materials.

Hazardous Materials

Wooden signposts were observed on the subject property (Appendix F, Photographs 16 and 17). Wooden signposts were likely treated with arsenic, chromium, copper, and pentachlorophenol. These wooden posts should be managed as TWW, which is a California hazardous waste.

As noted above, culverts were observed on the subject property adjoining Palm Avenue and Rainbow Drive to the west and east (Appendix F, Photographs 7 and 8). Materials and sediments removed from the culverts during construction may contain contaminants such as VOCs, TPH, and metals, which could require special handling and disposal. To determine appropriate disposal, testing of sediments for VOCs, TPH, and metals would be necessary.

Electrical equipment, such as mercury sensors, switches, timers, mercury vapor lamps, ballasts, fluorescent and LED bulbs, and other materials, may contain hazardous substances and require special handling and disposal if removed. As observed during the site reconnaissance, electrical equipment and utility boxes are present along the subject property (Appendix F, Photograph 14).

Railways

Dudek did not identify any railways within or near the subject property.

Vapor Encroachment Condition

As discussed in Section 8.4, several expected vapor encroachment conditions are associated with the subject property.

10 Findings and Conclusions

Dudek conducted this Phase I ISA for the proposed improvements to the proposed Palm Avenue Multimodal Corridor Project in Imperial Beach, San Diego County, California (Figure 1). The subject property includes 0.82 miles of Palm Avenue and associated intersections and rights-of-way beginning approximately 580 feet northwest of Rainbow Drive and ending approximately 250 feet east of Georgia Street in Imperial Beach, California (subject property, see Figure 1). The proposed project includes improving the Palm Avenue corridor with enhancements that would increase safety, expand multimodal utilization, and improve the aesthetics of this gateway corridor.

This Phase I ISA is being conducted to identify RECs, historical RECs, and controlled RECs associated with the subject property. The findings of this investigation are based on historical sources, information in regulatory agency databases, available local agency records, and a site reconnaissance.

Information gathered for this report indicates the following:

- The subject property has been developed as Palm Avenue since at least 1904.
- Areas adjoining the subject property include commercial and residential areas in all directions and undeveloped land to the northwest. The San Diego Bay National Wildlife Refuge adjoins the northeastern end of the subject property.
- The areas surrounding the subject property include commercial and residential areas to the north, east, and south. Two naval facilities are located within the surrounding area, the Silver Strand Training Complex to the northwest and the Naval Outlying Landing Field Base to the south.
- Multiple hazardous material and petroleum product releases were identified within 1.0 miles of the subject property. Although many of these releases have been remediated and received regulatory closure, there are a few open and ongoing cleanup cases, and some have residual contamination above current regulatory screening levels. These cases are further discussed below.

This assessment identified the following data gap, which is considered significant and requires further investigation.

- No response was received from San Diego RWQCB as of the date of this report for 1002–1010 Palm Avenue. Because there is not enough information to determine if the site is contributing contamination to the subject property, this is considered a significant data gap.

The following RECs were identified during this assessment. Caltrans risk evaluation (Caltrans 2023) and mitigation measures are also provided for each REC identified. The ISA Checklist is provided as Appendix A:

- Several RECs were identified during the search of regulatory agency databases. These RECs were from both open and closed cleanup sites. These sites have had releases of hazardous materials and/or petroleum products, either on or adjoining the subject property, that have impacted the subject property. Although some of these sites have received regulatory closure, which allowed contamination to remain in place, this contamination does not meet current screening levels and therefore presents a risk to the subject property. The sites are shown on Figure 2. Given the nature of construction projects, contaminated soil, soil vapor, and groundwater could be encountered during implementation of the proposed project. Therefore, this REC represents a high risk, and mitigation will likely be required (e.g., a soil management plan).

- Wooden signposts were observed on the subject property. Wooden signposts were historically treated with arsenic, chromium, copper, and pentachlorophenol. As such, these wooden posts should be managed as TWW, which is a California hazardous waste. Effective January 1, 2021, DTSC alternative management standards for TWW expired, and TWW must now be disposed of at a Class I hazardous waste facility (DTSC 2020). A visual assessment of all wood wastes associated with the project should be conducted to determine the quantity of TWW that will be disposed of during construction activities. Given that impacts from TWW are generally localized (i.e., leaching into soil immediately around a signpost), this REC represents a low risk to the proposed project.
- The subject property has been used as a roadway since at least 1904. Several areas of dirt, including Triangle Park, are located throughout the subject property. Given that soil has likely not been removed from these spots since the roadway was developed, there is a likelihood that ADL has resulted in elevated concentrations of lead in shallow soils on the subject property. Sampling of soil in these areas prior to excavation for the proposed project must be completed to appropriately determine the risk to the project. If lead concentrations in the soil are determined to be below concentrations considered appropriate for unrestricted use, defined as 80 mg/kg total lead by the DTSC, there is no risk to the project. Project risk would increase accordingly with total lead concentrations above 80 mg/kg. However, although ADL may be present, it represents a low risk to the proposed project.
- Culverts were observed on the subject property at the intersection of Palm Avenue and Rainbow Drive. Materials and sediments removed from the culverts during construction may contain contaminants such as VOCs, TPH, and metals, which could require special handling and disposal. Sampling of culvert catch basin sediments for VOCs, TPH, and metals is required to appropriately determine the risk to the project. If contaminants are present, remedial efforts would include excavation and appropriate disposal of the contaminated media. Given that contaminated sediment is likely limited to the culvert catch basins, this REC represents a low risk to the project.
- As observed during the site reconnaissance, electrical equipment and utility boxes are present along the subject property. A hazardous materials survey would be needed to identify any hazardous materials contained within electrical equipment to determine appropriate handling and disposal procedures. Given that evidence of a release was not apparent around electrical equipment during site reconnaissance, this REC represents a low risk to the proposed project.
- Yellow traffic striping was observed on the subject property along Palm Avenue. Based on Caltrans Guidance (Caltrans 2019), yellow traffic striping used prior to 2005 likely contains lead chromate and would need to be handled and disposed of as hazardous waste if the striping is removed. However, although lead chromate may be present in yellow traffic striping, it represents a low risk to the proposed project.

The following environmental concerns and non-ASTM Caltrans RECs were also identified. Caltrans mitigation measures are also provided for each environmental concern identified:

- As noted above, concrete culverts were observed on the subject property at the intersection of Palm Avenue and Rainbow Drive. ACM may be present in the concrete culvert structure, joint seals, mastic adhesives, weep holes, piping, and other culvert construction materials. An ACM survey would need to be conducted prior to construction activities. Identified ACMs require appropriate handling and removal in accordance with state and local requirements consistent with Caltrans specifications. An ACM survey is required to appropriately determine the risk to the project; however, given the nature and quantity of the potential ACM (two culverts and associated materials), risk to the project is anticipated to be low.

The following conclusions are based on the proposed construction and nature of the project:

- **Treated Wood Waste:** Traffic signs on wood posts scheduled for removal will require special handling. As of January 1, 2021, TWW must be disposed of in a Class I hazardous waste facility.
- **Contaminated Sediments:** Sediments within the culverts must be tested for VOCs, TPH, and metals prior to removal and disposal. Contaminated sediments may require special handling and disposal procedures.
- **Aerially Deposited Lead:** The subject property has been used as a roadway since at least 1904. As such, there is a likelihood that ADL has resulted in elevated concentrations of lead in soils on the subject property. Soils contaminated with lead may require special handling and disposal procedures.
- **Asbestos-Containing Material:** ACM may be present in culvert construction materials. An ACM survey would need to be conducted prior to construction activities. Identified ACMs require appropriate handling and removal in accordance with state and local requirements consistent with Caltrans specifications.
- **Electrical Waste:** Electrical equipment may contain hazardous materials, such as mercury or PCBs. Electrical equipment is located along the subject property. If such equipment is scheduled for removal, a hazardous materials survey is required to identify hazardous materials contained within the electrical equipment to determine appropriate handling and disposal procedures.

A preliminary site investigation should be conducted to further assess the RECs listed above. At minimum, the preliminary site investigation should include the following:

- Soil sampling to determine the presence or absence of ADL in soils to be excavated for the proposed project
- Survey for hazardous materials, universal waste, and ACM
- Sampling of culvert catch basin sediments

11 Limitations

11.1 Data Gaps and Data Failures

As defined in ASTM E1527-21, a data failure is a failure to achieve the historical research objective required by the ASTM Standard even after reviewing the standard historical resources that are reasonably ascertainable and likely to be useful. A data failure is a type of data gap.

No data failures were identified for this Phase I ISA.

As defined in ASTM E1527-21, a data gap is the lack of or inability to obtain information required by this practice despite good faith efforts. A data gap is considered significant when it affects the ability of the environmental professional to identify RECs.

The following data gaps were identified for this Phase I ISA:

- A response was not received from San Diego RWQCB as of the date of this report for the site located at 1002–1010 Palm Avenue. Because there is not enough information to determine if the site is contributing contamination to the subject property, this is considered a significant data gap.

Should Dudek receive information following submission of this Phase I ISA report that completes one of these data gaps and changes the findings of the Phase I ISA report, Dudek will submit the findings to the user in an addendum.

The following Phase I ESA items, as required by ASTM Standard E 1527-21, were not included in this Phase I ISA:

- User questionnaire for Limited Liability Protection to Comprehensive Environmental Response, Compensation, and Liability Act liability
- Review of title and judicial records for environmental liens and activity and use limitations
- Interviews with present and past property owners, operators, and occupants of the subject property
- Sanborn Fire Insurance maps

11.2 Report Limitations

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report, as reflected in the discussion in this report of the visual observations of the subject property and vicinity and documentation reviewed and based on the foregoing, our interpretation of this information, and these documents. Dudek makes no warranty, guarantee, or representation, express or implied, as to statements made by others or information included in documentation reviewed or otherwise provided to Dudek, as described in this report. This report does not purport to identify or describe all potential contamination or other issues related to the environment respecting the subject property and/or the vicinity. Likewise, it is understood that it is possible that conditions or contamination exist at the subject property or in the vicinity that are not identified in this Phase I ISA.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except for the representation that this report has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services in the same or similar geographical locality. This report, including its conclusions and/or recommendations, is intended exclusively and solely for the purpose outlined herein and for the client identified herein. This report may not be relied upon by any other person or entity without the express advance written consent of Dudek specifically identifying such person or entity. Dudek reserves the right to further condition any such third-party use based on matters it deems appropriate under the circumstances, in its sole discretion.

This report is subject to the conditions and restrictions and limitations described in ASTM Standard E 1527-21 and the guidelines stipulated in Appendix DD of the Caltrans Project Development Procedures Manual.

In accordance with ASTM Standard E 1527-21, a Phase I ESA is valid as a general matter for not longer than 180 days from the date of the first interview, first review of government records, or first visual inspection. If the Phase I ESA has been prepared for the purposes of a transaction, the report must have been completed no more than 180 days prior to the transaction date to be considered viable. Otherwise, the report must be updated or revised in accordance with ASTM Standard E 1527-21. In accordance with Caltrans Standard Environmental Reference, Volume 1, Chapter 10: Hazardous Materials, Hazardous Waste, and Contamination, a Phase I ISA is valid for up to 1 year and thereafter must be re-evaluated and updated as needed. The site reconnaissance, historical records search, and local agency records requests were completed in June 2025.

Initial Site Assessment Checklist

Initial Site Assessment (ISA) Checklist

Project Information

District: 11 County: San Diego Route: Palm Avenue Post Mile:_____ EA: _____

Description Palm Avenue Corridor Improvements

Is the project on the HW Study Minimal-Risk Projects List (HW1)? See Sections 5 and 8 of the Phase I ISA report.

Project Manager: Glenna McMahon, PE phone # 760-479-4130

Project Engineer_____ phone # _____

Project Screening

Attach the project location map to this checklist to show location of all known and/or potential HW sites identified. See Figures 1-3 included with this ISA report.

1. Project Features: New R/W? No Excavation? Yes Railroad Involvement? No

   Structure demolition/modification? Yes Subsurface utility relocation? No

2. Project Setting: Palm Avenue and associated intersections and rights-of-way beginning approximately 580 feet northwest of Rainbow Drive and ending approximately 250 feet east of Georgia Street, Imperial Beach, San Diego County, California.

   Rural or Urban: Urban

   Current land uses: Palm Avenue/State Route 75 - thoroughfare

   Adjacent land uses: residential and commercial
   (industrial, light industry, commercial, agricultural, residential, etc.)

3. Check federal, State, and local environmental and health regulatory agency records as necessary, to see if any known hazardous waste site is in or near the project area. If a known site is identified, show its location on the attached map and attach additional sheets, as needed, to provide pertinent information for the proposed project.
   See Phase I ISA report (Sections 5 and 8)

4. Conduct Field Inspection. Yes Date June 19, 2025. Use the attached map to locate potential or known HW Sites

   STORAGE STRUCTURES / PIPELINES:

   Underground tanks: None
   Surface tanks: None
   Sumps: None
   Ponds: None
   Drums: None
   Basins: None
   Transformers: Pad Mounted
   Landfill: None
   Other:

Initial Site Assessment (ISA) Checklist

(continued)

CONTAMINATION: (spills, leaks, illegal dumping, etc.)

Surface staining: Yes Oil sheen: None

Odors: None Vegetation damage: None

Other: sediments in culverts may contain VOCs, metals, and TPH.

HAZARDOUS MATERIALS: (asbestos, lead, etc.)

Buildings: None Spray-on fireproofing: None

Pipe wrap: None Friable tile: None

Acoustical plaster: None Serpentine: None

Paint: None

Other: Treated wood waste (TWW) in signposts, asbestos-containing materials (ACMS) including concrete culvert structure (removal portion), mercury and other hazardous materials in electrical equipment and accessories scheduled to be removed, and aerially deposited lead (ADL) in site soils.

5. Additional record search, as necessary, of subsequent land uses that could have resulted in a hazardous waste site. Use the attached map to show the location of potential hazardous waste sites.

   See Phase I ISA report.

6. Other comments and/or observations: _____

ISA Determination

Does the project have potential hazardous waste involvement? Yes If there is known or potential Hazardous waste involvement, is additional ISA work needed before task orders can be prepared for the Investigation? **YES** If "YES," explain; then give an estimate of additional time required:

Treated Wood Waste (TWW) due to removal of sign wood posts. TWW must be disposed of in a Class I hazardous waste facility.

ACM may be present in concrete in culvert structure, and joint seals, mastic, adhesives, weep holes, and piping due to culvert removal. ACM survey is required.

Material generated from culvert may contain contaminants such as VOCs, TPH, and metals. Site soils could also be impacted by ADL due to long-term use of subject property as a road. To determine disposal options, testing of sediments and excavated soil is required.

Electrical equipment may contain hazardous materials, such as mercury or PCBs. Electrical equipment is located along the subject property. If scheduled for removal, a hazardous materials survey is required to identify hazardous materials contained within electrical equipment to determine appropriate handling and disposal procedures.

The timeline will be dependent on the project schedule and contractors. As the project progresses into the ready-to-list and bid and award stages, prospective bidders are required to include the necessary steps that will address the above items as an integrated element of their construction contract documentation.

ISA Conducted by _____ **Date update upon final**

- Regulatory Floodway

OTHER AREAS OF FLOOD HAZARD

- 0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile *Zone X*
- Future Conditions 1% Annual Chance Flood Hazard *Zone X*
- Area with Reduced Flood Risk due to Levee See Notes. *Zone X*
- Area with Flood Risk due to Levee *Zone D*

OTHER AREAS

- NO SCREEN — Area of Minimal Flood Hazard *Zone X*
- Area of Undetermined Flood Hazard *Zone D*

GENERAL STRUCTURES

- Channel, Culvert, or Storm Sewer
- Levee, Dike, or Floodwall

OTHER FEATURES

- 18.2 / 17.5 — Cross Sections with 1% Annual Chance Water Surface Elevation
- Coastal Transect
- Coastal Transect Baseline
- Profile Baseline
- Hydrographic Feature
- 513 — Base Flood Elevation Line (BFE)
- Limit of Study
- Jurisdiction Boundary

NOTES TO USERS

For information and questions about this Flood Insurance Rate Map (FIRM), available products associated with this FIRM, including historic versions, the current map date for each FIRM panel, how to order products, or the National Flood Insurance Program (NFIP) in general, please call the FEMA Map Information eXchange at 1-877-FEMA-MAP (1-877-336-2627), or visit the FEMA Flood Map Service Center website at https://msc.fema.gov. Available products may include previously issued Letters of Map Change, a Flood Insurance Study Report, and/or digital versions of this map. Many of these products can be ordered or obtained directly from the website.

Communities annexing land on adjacent FIRM panels must obtain a current copy of the adjacent panel as well as the current FIRM Index. These may be ordered directly from the Flood Map Service Center at the number listed above.

For community and countywide map dates refer to the Flood Insurance Study report for this jurisdiction.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at 1-800-638-6620.

Base map information shown on this FIRM was derived from digital orthophotography collected by the U.S. Department of Agriculture Farm Service Agency. Department of Agriculture imagery was flown in 2016 and was produced with a 1-meter ground sample distance.

Coastal Base Flood Elevations shown on the map apply only landward of 0.0' North American Vertical Datum of 1988 (NAVD 88). Coastal flood elevations are also provided in the Coastal Transect Parameters table in the FIS Report for this jurisdiction. Elevations shown in the Coastal Transect Parameters table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on the FIRM.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no

further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/03/2024 has revealed that there is 1 ERNS site within approximately 0.001 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 24 LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 12 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 12 SWEEPS UST sites within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

CHMIRS: The California Hazardous Material Incident Report System contains information on reported hazardous material incidents, i.e., accidental releases or spills. The source is the California Office of Emergency Services.

A review of the CHMIRS list, as provided by EDR, and dated 12/30/2024 has revealed that there are 3 CHMIRS sites within approximately 0.001 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 108 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/22/2025 has revealed that there are 17 FINDS sites within approximately 0.001 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/24/2025 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 12 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are

EXECUTIVE SUMMARY

72 E MANIFEST sites within approximately 0.25 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2024 has revealed that there are 29 HAZNET sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/12/2025 has revealed that there are 11 CERS sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 11 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 6 RGA LUST sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information.

NAVAL BASE COLORADO NAVAL OUTLYING LANDING FIELD NAVY EXCHAN (Continued) **1014670550**

Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently

VERIZON WIRELESS - IMPERIAL BEACH (Continued) **1023204694**

implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
Registry ID: 110006487621

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violation Date: 12-06-2018
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 01/02/2019. Inspection Sequence ID:6057805;Tank ID:18832;Violation Description:(TCR 12) Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR, 2715(c). For designated operator (DO) 30 day in

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Used Oil Recycling System (UORS) is managed by the California Integrated Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Violation Code:	2030036 (TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overfill prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overfill prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)

Violations:

Site ID:	55101
Site Name:	United Pacific 0657
Violation Date:	08-06-2019
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after

G&M OIL #177 (Continued) **S104753041**

October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 08/06/2019. Inspection Sequence ID:6226115;Tank ID:28614,28615,28616,28617;Violation Description:(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfil

Site History: Case Summary: Unauthorized release case H05360-001 was opened after an environmental assessment conducted in 1986 showed the presence of fuel-degraded soil and groundwater at the site. Free product was also reported in two monitoring wells. Release case H05360-002 was later opened following the discovery of a release of gasoline from a product line in 1992. The two cases were consolidated into one case (H05360-002) in January 2010. A total of 30 groundwater monitoring wells were installed and sampled to delineate the extent of petroleum hydrocarbon contamination from the two releases. A soil vapor extraction (SVE) remediation system operated at the site between May 1989 and February 1997, and reportedly removed approximately 19,530 pounds of petroleum hydrocarbons. Approximately 326 gallons of free product was recovered by hand-bailing from May 1996 to April 2010, when free product was no longer observed in any wells. In 1994, approximately 25 tons of impacted soil was excavated during a UST realignment and transported to the Candelaria facility in Anza, CA.
In September 2000, one 250-gallon waste oil underground storage tank (UST) and three 10,000-gallon gasoline USTs were removed from the site along with the dispensers and associated product piping. The tank cavity was over-excavated, and a total of approximately 774 tons (521 cubic yards) of hydrocarbon-impacted soil was transported to the Soil Wash Technologies, Inc. facility in San Diego, CA for disposal.
In August 2005, soil vapor samples were collected from ten on-site locations at depths of five feet and ten feet below grade. The maximum benzene, toluene, ethylbenzene, and xylenes concentrations were reported in a vapor sample collected at a depth of ten feet below ground surface. MTBE was not detected in any of the vapor samples. A cancer risk of 1.4 X 10-7 was calculated for benzene in soil vapor. The consultant states that the residual contaminants pose no significant health risk (below one in one million). In accordance with a DEH-approved Corrective Action Plan (CAP), a multi-phase extraction system was operational between September 2010 and April 2012. An estimated 1,565 pounds of petroleum hydrocarbons was removed as vapor, and approximately 2,548,760 gallons of groundwater were treated and released under a sewer discharge permit. Residual soil impacts cover an area of approximately 19,200 square feet at a depth interval between 21 to 27 feet below grade. This represents an estimated volume of residual impacted soil of 4,200 cubic yards.
Following the shutdown of the system in late 2012, due to asymptotic conditions, four consecutive quarters of post remediation groundwater sampling were conducted. Trend analyses were completed using the post-remediation data, and Thrifty calculated that benzene concentrations will naturally attenuate to the Maximum Contaminant Level (MCL) of one microgram per liter by 2077. The California American Water Company, the water district which provides water to the City of Imperial Beach, states that they have no plans to pump groundwater in the City of Imperial Beach for distribution to its customers. Thrifty concludes that site remediation efforts were effective in removing/remediating the secondary source to the extent practicable and predicts that the residual dissolved contaminant

TESORO #42141 (Continued) **S104581408**

concentrations will continue to naturally attenuate on site and off site. Case closure is recommended, and DEH concurs. A 60-day public review and comment period regarding DEH s intent to close the case was completed on June 2, 2014. DEH received a comment letter from the City of San Diego, Public Utilities Department expressing concerns regarding potential impacts on the City s ability to develop groundwater resources near the site in the future. Both Thrifty and DEH sent response letters addressing their comments.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Last Update:	2025-01-14T09:52:00.000
Inspection Date:	2019-01-24T06:03:24.000
Violation Code:	2030036 (TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overfill prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overfill prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)

CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	6643
Site Name:	ARCO 42141
Violation Date:	01-24-2019
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided

ARCO #09755 (Continued) **S104746163**

the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 01/24/2019. Inspection Sequence ID:6068461;Tank ID:19362,19363;Violation Description:(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention

Inspection Date:	2022-01-07T00:00:00.000
Violation Code:	2030036 (TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overfill prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overfill prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)

Violation Date:	01-07-2022
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 04/26/2022. Inspection Sequence ID:6891188;Tank ID:19523,19524,19525;Violation Description:(TCR 12) Failure to comply with one or more of the following Designated Operator (DO) inspection requirements: Conduct the DO visual inspection at least once every 30 days. Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented.Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). The owner/operator sign and date the Designated Underground Storage Tank Operator Visual Inspection Report within 72 hours

Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 04/11/2023. Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 04/26/2022. Inspection Sequence ID:6891188;Tank ID:19523,19524,19525;Violation Description:(TCR 12) Failure to comply with one or more of the following Designated Operator (DO) inspection requirements: Conduct the DO visual inspection at least once every 30 days. Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Violation Date: 04-16-2024
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95

STARS GAS IB INC. (Continued) **S129444340**

percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Inspection Sequence ID:7427106;Tank ID:19523,19524,19525;Violation Description:(TCR 9b)Failure to comply with one or more of the following overfill prevention equipment requirements: 1) Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2) Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3) Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4) Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5) Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipme

7-ELEVEN #24344 (Continued) **S104749440**

Violation Code:	2030036 (TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overfill prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overfill prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)

Violation Date: 10-15-2019
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 10/21/2019. Inspection Sequence ID:6262020;Tank ID:25386,25387,25388;Violation Description:(TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months

Claim Number:	21192
Claim Status:	Active
Site History:	Comments: The Site is located on the southwestern corner of the intersection of Palm Avenue and 11th Street in Imperial Beach, CA. The Site is a former gasoline station which included four underground storage tanks (USTs): two 12,000-gallon regular unleaded gasoline USTs, one 10,000-gallon diesel UST, and one 500-gallon waste oil UST. Other previous features of the Site included eight fuel dispensers located at two islands. Currently, the Site is an auto repair and truck rental facility. On November 4, 2003, the product piping, dispensers and four USTs were removed from the Site. One 10,000-gallon diesel UST, two 12,000-gallon unleaded gasoline USTs, and one 280-gallon waste oil UST were removed. Free product was observed in the tank excavation upon removal of the USTs. Approximately 250 tons of potentially hydrocarbon-impacted soil was excavated and disposed during demolition activities. Based on these results, SAM opened Unauthorized Release Case H12196-002. In July 2007, a vapor risk assessment was conducted to evaluate potential health risk posed by benzene and naphthalene vapor migration to the surface from impacted soil and groundwater at the Site. A total of four vapor probes were installed (two near the station building and two on the western portion of the Site) to assess potential risk to occupants of the station building and an adjacent building. Vapor risk was evaluated using the SAM Vapor Risk 2000 Model. Based on the results of the assessment, it was concluded that the vapor risk was below the SAM threshold of 1 x 10-6 and that no further assessment of vapor risk was warranted. In September 2008, a 72-hour dual-phase extraction (DPE) feasibility test was conducted to evaluate the technical feasibility of DPE as a method of soil and groundwater remediation at the Site. During the DPE event, approximately 924 pounds of vapor-phase hydrocarbons were extracted from the soil and approximately 6,500 gallons of groundwater were extracted. The total residual petroleum hydrocarbon mass in soil (<100 mg/kg TPHg) is estimated to be approximately 1,204 pounds in the areas of the dispensers/piping and USTs. Fifteen groundwater monitoring wells and three remedial wells have been installed at the Site. Groundwater was monitored between February 2005 and May 2013. Historically, free product has been detected in MW-3. Free product removal was conducted in 2008 during the DPE feasibility test and was removed on a quarterly basis using a bailer between May 2005 and April 2012. Free product thickness ranged from 0.01 to 0.03 feet from April 2010 to April 2012 and no free product was detected during the Third Quarter 2012 groundwater sampling event. Free product has been removed to the maximum extent practicable. Hydrocarbon-impacted groundwater at the Site appears to be consistent with a release from the former dispensers, piping, and USTs. On-site dissolved phase petroleum hydrocarbon concentrations are stable to declining over time. A Corrective Action Plan (CAP) and CAP Addendum were submitted on

GENE'S AUTO SERVICE (Continued) **S104747223**

December 15, 2011 and October 1, 2013, respectively, requesting case closure. The CAP Addendum concluded that no active remediation is required to mitigate remaining hydrocarbon impacts beneath the Site. It was proposed that groundwater data be collected during the subsequent four semi-annual monitoring and sampling events to determine groundwater contaminant trends and distribution. The public participation process for the above-referenced CAP and CAP Addendum was completed. DEH received no public comments and concurred with the CAP and CAP Addendum. According to the environmental consultant s registered professional, the Site presents no significant risk to human health and the environment. DEH concurs with this conclusion

Violation Code:	2030013 (TCR 12) Failure to comply with one or more of the following Designated Operator (DO) inspection requirements: Conduct the DO visual inspection at least once every 30 days. Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented.Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). The owner/operator sign and date the Designated Underground Storage Tank Operator Visual Inspection Report within 72 hours of being provided a signed copy. 23 CCR 2716 (a-e)

	Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Inspection Sequence ID:7483534;Tank ID:2016-1156-1,2016-1156-2,2016-1156-3;Violation Description:(TCR 9b)Failure to comply with one or more of the following overfill prevention equipment requirements: 1) Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2) Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3) Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4) Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5) Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill

Waste Description: 1,1-Dichloroethylene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

CVS PHARMACY # 9120 (Continued) **1015740270**

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: P204
Waste Description: Physostigmine (Or) Pyrrolo[2,3-B]Indol-5-Ol, 1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethyl-Methylcarbamate (Ester), (3as-Cis)-

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U059
Waste Description: 5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin

Waste Code: U070
Waste Description: Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene

Waste Code: U072
Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

CVS PHARMACY # 9120 (Continued) **1015740270**

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U151
Waste Description: Mercury

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U187
Waste Description: Acetamide, N-(4-Ethoxyphenyl)- (Or) Phenacetin

Waste Code: U188
Waste Description: Phenol

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or)

CVS PHARMACY # 9120 (Continued) **1015740270**

Streptozotocin

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U236
Waste Description: 2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U248
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenyl-Butyl)-, & Salts, When Present At Concentrations Of 0.3% Or Less (Or) Warfarin, & Salts, When Present At Concentrations Of 0.3% Or Less

FINDS:
Registry ID: 110046525774

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site History:	The Site, noted by Assessorn++s Parcel Number 616-020-12-00, is located along the northern side of Palm Avenue, and includes the former VMT Auto Sales property located at 1502 Palm Avenue. The area of investigation is on the southern side of a former salt evaporation pond known as Pond 20, which was formerly used for salt production from the early 1870s until the 1960n++s. As part of a 95-acre n++Salt Pond 20 Restoration Projectn++ (the Project) involving the development of the Salt Pond 20 area into a wetlands mitigation bank,

LAND ADJACENT TO FORMER VMT AUTO SALES (Continued) **S128568500**

an evaluation was performed whereby the floor drain at VMT Auto Sales was identified as an area of concern and sampled with exceedances of diesel noted. As a result, this Voluntary Assistance Program case was opened to oversee the removal of this diesel-impacted soil. The Site is located on sloping land extending from the former VMT Auto Sales property to generally flat-lying land at approximate elevations ranging from 5 to 10 feet above mean sea level. Soil in the general vicinity of the Site consists of a surficial salt crust layer 0.25 foot to 0.5 foot thick, which overlies marine deposits consisting of silty sands and silt with sand. Groundwater was not encountered in hand auger sampling locations HA-5 and HA-6, which were advanced to depths of approximately 6 feet below ground surface (bgs). A 2018 Phase I discusses the advancement of 32 test pits and 12 hand auger borings throughout the Project area, including the VMT floor-drain area, which resulted in the advancement of two hand auger borings within the vicinity of the floor drain outfall. The first boring, HA-5, was advanced at the approximate outfall discharge point, and the second boring, HA-6, a short distance downslope from HA-5. Samples were collected on June 2018 and analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), phenols, Title 22 Metals, organochlorine pesticides (OCPs), and polychlorinated biphenyls (PCBs). Sample analysis indicated an exceedance of TPHd from the HA-5 surface soil sample (HA-5-0.5) with a concentration of 1,244 mg/kg, exceeding its respective Tier I environmental screening level (ESL) 260 mg/kg for a terrestrial habitat. Although there were no additional ESL exceedances, concentrations of metals (including copper, lead, nickel, and zinc), the OCPs 4,4-DDE and 4,4-DDT in HA-5-0.5, and lead in HA-6-0.5 were reported at concentrations exceeding their respective effects range low (ERL) for adverse biological effects; however, they were below screening levels for the synthetic precipitation leaching procedure analyses. Based on these ERL exceedances, soil in the vicinity of the former VMT Auto Sales facility was not considered suitable for on-site reuse in an aquatic environment. A June 2022 Workplan and Community Health and Safety Plan were submitted by WSP USA (WSP) and approved for soil excavation, removal, and verification sampling at the HA-5 and HA-6 areas. On September 15, 2022, excavation activities occurred, resulting in an excavation that was approximately 23 feet long and 5 feet wide with an average depth of 2 feet reaching a maximum depth of 4 feet at sampling location HA-5. Groundwater was not encountered during the excavation. Following excavation activities, 12 verification samples were collected, including eight sidewall samples at 0.5 bgs, with one sample on each end and three on each long side of the excavation. In addition, four floor samples were collected with two in the vicinity of HA-5 at depths of approximately 2 feet and 4 feet bgs, followed by one collected in the center of the excavation and the other at sampling location HA-6, both at 2 feet bgs. The samples were analyzed for DRO, carbon range of C10n++C28, by U.S. EPA Method 8015, total metals (including mercury) by U.S. EPA Methods 6020/7471, and OCPs by U.S. EPA Method 8081. Analysis of the samples indicated the highest remaining diesel concentration of 59 mg/kg in sample FL-3, which was below its respective ESL (Terrestrial Natural Habitat) of 260 mg/kg. Several exceedances of arsenic were noted with a maximum concentration of 4.11 mg/kg in sample SW-5. Per WSP, although arsenic exceeded screening levels, it was below the DTSC established background arsenic level of 12 mg/kg for Southern California soils, and the ERL value of 8.2 mg/kg for adverse

LAND ADJACENT TO FORMER VMT AUTO SALES (Continued) **S128568500**

biological effects. Lead had a maximum remaining concentration of 203 mg/kg in sample SW-3, in addition to five samples exceeding the ERL of 42.7 mg/kg. Per WSP, although lead exceeded screening levels it was below the U.S. EPA regional screening level (RSL) for Composite Worker Soil of 800 mg/kg, and environmental risk medium (ERM) value of 218 mg/kg for adverse biological effects. Other metals, such as cadmium, copper, nickel, silver, and zinc, exceeded their respective ERLs but did not exceed ERMs or RSLs for a construction worker. WSP concluded that the soil removal action was deemed successful in removing site contaminants, and the site can be considered for the planned reuse as a wetlandn++s mitigation bank. Based on the lack of environmental risks, no further action (NFA) is requested for the assessment and mitigation of this Site. DEHQ concurs with the conclusions and request for NFA. A 30-day public notification ended on May 24, 2023, with no comments received.

IMPERIAL WHEEL LTD (Continued) **S100182231**

Site History: The subject 2.15 acre Site is identified as Assessor s Parcel Numbers 616-021-10-00, 626-192-03-00, & 626-192-04-00 and is located on the end of Florence Street and 13th Street in the City of Imperial Beach. The Site is bounded on the north by Bayshore Bikeway, vacant land, and the Otay River; on the south by two commercial buildings. The Department of Environmental Health (DEH) opened Voluntary Assistance Program (VAP) case #DEH2015-LSAM-000291 at the request of Bikeway Village LLC for oversight of a proposed reuse of two existing warehouses located at 535 Florence Street and 536 13th Street. A vacant 1.15 acre portion of the Site will remain vacant, but will be subject to landscaping improvements with planting of native plants. The 535 Florence Street building, Suites B and C, were previously assessed under DEH oversight under case #H02185-001, due to former plating shop operations. The contaminants of concern were nickel and total chromium. Contaminated areas of concrete, walls, and soil were removed. DEH approved that Suite B, the chemical storage room, was safe for occupancy on January 19, 1989. Suite C received no further action on March 28, 1990; however, due to high levels of both nickel and chrome remaining on the north facing wall, it was closed with conditions. It was reported that continued cleanup of the north wall may jeopardize the structural integrity of the building, so an epoxy coating was painted over the area of concern. Monitoring of the coating was required, and all future tenants and/or owners of the building must be notified of the potential hazard with contact with the wall. A Phase I Environmental Site Assessment was prepared in 2010, and records indicated the vacant portion of the Site was located within a railroad right-of-way from approximately 1904 until the late 1990s. Recommendations were made to conduct shallow soil sampling based on the historical use. A Phase II investigation was conducted in 2010 with eight soil borings advanced in the vicinity of the former railroad alignment. Total Petroleum Hydrocarbons (TPH) was not detected, and various metals were detected at low concentrations and below health risk screening levels. However, Polynuclear Aromatic Hydrocarbons concentrations (PAHs) at two locations (boring B6 and B8) in the northern portion of the Site were found to exceed human health risk screening levels for both commercial and residential use. In May 2011, thirty-six additional soil borings were advanced to a maximum of three feet below ground surface (bgs) to delineate the extent of soil contamination. Based on the additional soil sampling results, the consultant estimated there was approximately 725 cubic yards of shallow soil impacted with PAH concentrations, and approximately 470 cubic yards of that amount exceeds health risk screening levels. A soil management plan was submitted in 2015 to address the PAH impacted soil. At that time there was no mitigation proposed for the reuse of 535 Florence Street building at the Site, as there was no plans to disturb the north wall. No contaminants of concern were identified at the 536 13th Street warehouse. Due to archeological and Native American significance determined in the area where PAH impacts are present, disturbing the impacted soil was not economically feasible. To mitigate the risk of encountering PAH impacted soil, imported clean soil was proposed to be placed on top of both impacted and non-impacted soil through the parcel. The Site grading contractor identified a source of native clean fill to be delivered to the Site from 1810 State Street in downtown San Diego, which was undergoing excavation for a new underground parking garage. The prior uses of the property were for both residential and commercial purposes. The soil was evaluated by the consultant in

IMPERIAL WHEEL LTD (Continued) **S100182231**

accordance with Department of Toxic Substances Control (DTSC) Information Advisory Clean Imported Fill Material , and four native soil samples were collected at 10 feet below adjacent street grades. The samples were analyzed for petroleum hydrocarbons, volatile organic compounds, semi-volatile organic compounds, PCBs, asbestos and heavy metals. All of the samples were non-detect or were below the environmental screening levels (ESLs) for heavy metals for residential use. Eight hundred cubic yards of the native soil was used for capping. A minimum of one foot of the imported soil was placed over the PAH impacted area and was re-compacted. A geotextile fabric material was placed on top of the PAH impacted soil prior to the importing of the cap material. This area will be used only for native landscaping (see attached figure). On September 15, 2016, the consultant notified DEH that the developer and general contractor were notified by the City of Imperial Beach that because on the original plan for the project, four cuts were proposed in the north wall of the 535 Florence Street building, that there would be risk of losing funding for the project. The consultant conducted a visual inspection of the wall and there was no evidence of staining, etching etc. The four proposed cuts were marked out along the wall identified as Cuts #4 through #7. Sampling of the concrete north wall was conducted from the surface to approximately an inch into the material. Four samples from each cut area were obtained by chisels for a total of 16 samples, and were analyzed for Title 22 Metals. Nickel, the contaminant of concern for the north wall, was detected in each of the concrete samples at concentrations ranging from 6.31 mg/kg to 3,390 mg/kg (sample 6W). Five of the samples contained nickel that exceeded its Total Threshold Limit Concentration (TTLC) of 2,000 mg/kg including samples 6C, 6E, 6W, 7C, and 7W. It was determined that the concrete from proposed Cuts 4 and 5 could be disposed of as general construction debris. However, some of the concrete from proposed cuts 6 and 7 would need to be disposed of a hazardous waste when removed. Additional sampling was conducted in October 2016 on cuts 6 and 7 at both 6 feet and 9 feet in order to test the concrete for disposal options. None of the additional samples results exceeded the TTLC of 2,000 mg/kg. However to profile the concrete waste to be disposed of as hazardous waste, solubility testing of select concrete samples was conducted using Soluble Threshold Limit Concentration (STLC) and/or Toxicity Characteristic Leaching Procedure (TCLP). Four of the soluble nickel concentrations exceeded its STLC of 20 mg/l. The results indicated that concrete generated from the entire area of proposed Cut #6 and the lower six feet of Cut #9 would require special handling and disposal when disturbed. During the cutting and handling of the impacted concrete, workers utilized half face respirators with high-efficiency particulate air (HEPA) filters, using wet sawing and drilling techniques into the concrete. Dust suppression measures conducted during the project were successful and no visible dust was observed or noted during the removal and disposal activities. A total of 7.55 tons of concrete were transported to the South Yuma County Landfill under a uniformed hazardous waste manifest. Following completion of work, the remaining concrete block was covered with a new epoxy coating to prior heights of known impacts to ensure any residual metals are contained. A photograph log was submitted that shows images of the soil capping work and the new epoxy coating applied to the north wall of 535 Florence Street in the final report. The consultant has requested that no further action at the Site is

IMPERIAL WHEEL LTD (Continued) **S100182231**

required based on commercial use, and DEH concurs with the consultant s recommendations. However, the conditions that were originally provided with the DEH Closure Letter dated March 28, 1990 for 535 Florence (H02185-001) still apply. Ongoing monitoring of the epoxy coating is required, and all future tenants and/or owners of the building must be notified of the potential hazard with contact with the north wall. If any more modifications to the north wall is proposed for 535 Florence or if any grading will be conducted in the vacant area with the PAH contamination, you will be required to reenter the Voluntary Assistance Program.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site History:	The Site is a former Shell service station located on the northeast corner of the intersection of Imperial Beach Boulevard and 13th Street in Imperial Beach. The Site is currently a Valero-Branded service station and consists of four dispensers, three underground storage tanks (USTs), and a station building. In March and April 1999, six soil borings were advanced and soil samples were collected and analyzed. Based on the laboratory results, the Department of Environmental Health (DEH) opened case H03167-001 on October 15, 1999. A brief summary of assessment and cleanup activities are presented below: Between 1999 and 2008, six soil borings were advanced, seven hydropunch borings were advanced, and 14 groundwater monitoring wells were installed; On November 30, 1999, three USTs were removed and soil samples were collected and analyzed under the direction of DEH; On December 2, 1999, approximately 875 cubic yards of impacted soil was excavated from the UST cavity and treated offsite; On October 8, 2003, soil vapors were collected and analyzed from four onsite locations; In August 2012, a groundwater extraction remediation event was conducted to remove free product to the extent practicable from MW-1; Between 2006 and 2012, free product was recovered by either hand bailing, passive skimmers, or absorbent socks. Approximately 0.62 gallon of free product was recovered during this timeframe. SOIL Based on the analytical results from soil samples collected during the monitoring well installation, the soil boring advancement, and the UST removal activities, the consultant concludes that the petroleum hydrocarbon impacted soil has been adequately defined. The consultant estimates that approximately 1,543 cubic yards of total petroleum hydrocarbon impacted soil greater than concentrations of 100 milligrams per kilogram remains beneath the Site, most of which exists in the vicinity of SB-1 and B-11 in the southwest corner of the Site. GROUNDWATER The groundwater has been monitored and sampled between September 2000 and April 2013. Groundwater flow is towards the southwest and dissolved plume extends offsite to the west and south, 250 feet and 60 feet, respectively. Free product was detected only in MW-1 at a maximum thickness of 0.11 feet. Free product has not been detected in MW-1 since May 2012. Based on the groundwater samples collected from the Site s monitoring well network as well as the monitoring well network from the nearby 7-Eleven property to the south, the consultant concluded that the dissolved-phase plume is adequately defined, has stable to decreasing concentration trends, and is collapsing to its core. SOIL VAPOR In

IMPERIAL BEACH SHELL (Continued) **S109277048**

October 2003, soil vapors were collected and analyzed from four onsite locations at 6 and 10 feet below ground surface. Based on laboratory results and the SAM Vapor Risk Model, the consultant concluded that vapors do not pose a health risk to the occupants of the onsite building. The calculated risk for benzene was 4.84 x 10-8. A Corrective Action Plan (CAP) dated April 30, 2013 was submitted to DEH. The CAP recommends No Further Action and Case Closure. Based on data obtained throughout the case history, the consultant and Shell Oil Products US, conclude that Site conditions present no significant risk to human health, the environment, and nearby sensitive receptors. DEH concurs with these conclusions.

Claim Number:	17020
Claim Status:	Active
Site History:	The Site is an operating convenience store with three gasoline underground storage tanks (USTs) and two dispenser islands. In August 1993, six soil samples were collected beneath a former dispenser island during product piping upgrade activities. Total petroleum hydrocarbons in the gasoline range (TPH-g) were detected in three shallow samples, with concentrations ranging from 2,470 milligrams per kilogram (mg/kg) to 16,218 mg/kg. Based on the laboratory results, DEH opened case #H20488-001. Groundwater beneath the site does not meet the criteria for beneficial uses due to salinity and total dissolved solids concentrations, and is exempt as a drinking water source. Between 2000 and 2004, eleven groundwater monitoring wells were installed to investigate the extent of contamination. Gasoline-related hydrocarbons and additives, including TPH-g, benzene, toluene, ethylbenzene, and xylenes (BTEX), and methyl tertiary butyl ether (MTBE), were identified as the principal contaminants of concern (COCs). Liquid-phase hydrocarbons (LPH) were historically present in two site wells. The maximum measured product thickness was 1.04 feet in October 2005. LPH has not been reported in either well since October 2010. In October 2005, an on-site soil vapor risk assessment was conducted. Seven soil vapor probes were installed around the perimeter of the store, and vapor samples were collected at depths of six feet and ten feet below ground surface. No COCs were detected, and the consultant determined that there was no significant health threat posed by the potential migration of benzene vapors from the subsurface. The pre-remediation estimate of the volume of hydrocarbon-impacted soil containing TPH-g concentrations greater than or equal to 100 mg/kg was approximately 4,107 cubic yards, containing 11,622 pounds of hydrocarbons. In October 2006, three remediation wells were installed, and four-hour air sparging (AS) and soil vapor extraction (SVE) tests were conducted in November 2006. A one-month ozone sparge test was also conducted beginning in December 2006. Between September 2012 and June 2013, five ninety-six hour AS/SVE events were conducted which removed approximately 1,665 pounds of the estimated 11,622 pounds of hydrocarbons. During the remediation, the mass removal rate declined from almost 11 pounds per

7-ELEVEN #23982 (Continued) **S104749439**

hour to 0.5 pounds per hour. The consultant concludes that the secondary contaminant source at the site has been removed to the extent practicable. In the 2014 Corrective Action Plan (CAP) and 2015 CAP Addendum prepared for the case, remediation by natural attenuation (RNA) was selected as the remedial alternative for further reducing the residual dissolved benzene and MTBE concentrations. The environmental consultant states that the dissolved-phase hydrocarbon concentrations appear to be stable and/or decreasing. Based on concentration trends, DEH staff estimate that the Maximum Contaminant Level (MCL) for benzene of 1 microgram per liter (g/l) will be reached in approximately 113 years. The consultant estimates that the secondary MCL for MTBE of 5 g/l will be reached within approximately four years. No water supply/production wells were identified by the consultant within a 1,000-foot radius, and the nearest wells were located at least one half-mile from the site. The consultant recommends case closure based on the following: Groundwater beneath the site has no designated beneficial uses and is not considered a suitable or potentially suitable source of drinking water, free product has not been detected at the site since October 2010, and dissolved-phase hydrocarbon concentrations are generally decreasing or stable. The residual benzene, toluene, ethylbenzene, and xylene impacts are limited to the site, generally around the existing tank system. The consultant also concludes that the case meets the State s Low-Threat Underground Storage Tank Case Closure Policy criteria. The required public notifications and comment/review period were completed, and no comments were received. Groundwater monitoring wells and remediation wells associated with the site will be destroyed under permit number DEH2016-LMWP-002264.

Violation Date: 06-07-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 06/07/2019. Inspection Sequence ID:6170371;Tank ID:25383,25384,25385;Violation Description:(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker,

7-ELEVEN INC #23982 (Continued) **1006823839**

California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D010
Waste Description:	Selenium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D012
Waste Description:	Endrin (1,2,3,4,10,10-Hexachloro-1,7-Epoxy-1,4,4a,5,6,7,8,8a-Octahydro-1,4-En do, Endo-5,8-Dimeth-Ano-Naphthalene)
Waste Code:	D013
Waste Description:	Lindane (1,2,3,4,5,6-Hexa-Chlorocyclohexane, Gamma Isomer)
Waste Code:	D014
Waste Description:	Methoxychlor (1,1,1-Trichloro-2,2-Bis [P-Methoxyphenyl] Ethane)
Waste Code:	D015
Waste Description:	Toxaphene (C10 H10 Cl8, Technical Chlorinated Camphene, 67-69 Percent Chlorine)
Waste Code:	D016
Waste Description:	2,4-D (2,4-Dichlorophenoxyacetic Acid)
Waste Code:	D017
Waste Description:	2,4,5-Tp Silvex (2,4,5-Trichlorophenoxypropionic Acid)
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D019
Waste Description:	Carbon Tetrachloride
Waste Code:	D020

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description: Chlordane

Waste Code: D021
Waste Description: Chlorobenzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D023
Waste Description: O-Cresol

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D030
Waste Description: 2,4-Dinitrotoluene

Waste Code: D031
Waste Description: Heptachlor (And Its Epoxide)

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D034
Waste Description: Hexachloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D037
Waste Description: Pentachlorophenol

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: D041
Waste Description: 2,4,5-Trichlorophenol

Waste Code: D042
Waste Description: 2,4,6-Trichlorophenol

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F006
Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.
Waste Code:	F007
Waste Description:	Spent Cyanide Plating Bath Solutions From Electroplating Operations.
Waste Code:	F008
Waste Description:	Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.
Waste Code:	F009
Waste Description:	Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.
Waste Code:	F026
Waste Description:	Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or Hexachlorobenzene Under Alkaline Conditions.
Waste Code:	F027
Waste Description:	Discarded Unused Formulations Containing Tri-, Tetra-, Or Pentachlorophenol Or Discarded Unused Formulations Containing Compounds Derived From These Chlorophenols. (This Listing Does Not Include Formulations Containing Hexachlorophene Synthesized From Prepurified 2,4,5-Trichlorophenol As The Sole Component.)
Waste Code:	P001
Waste Description:	2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%
Waste Code:	P002
Waste Description:	1-Acetyl-2-Thiourea (Or) Acetamide, N-(Aminothioxomethyl)-
Waste Code:	P003
Waste Description:	2-Propenal (Or) Acrolein
Waste Code:	P004
Waste Description:	1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5alpha, 8alpha, 8abeta)- (Or) Aldrin

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code:	P005
Waste Description:	2-Propen-1-Ol (Or) Allyl Alcohol
Waste Code:	P006
Waste Description:	Aluminum Phosphide (R,T)
Waste Code:	P007
Waste Description:	3(2h)-Isoxazolone, 5-(Aminomethyl)- (Or) 5-(Aminomethyl)-3-Isoxazolol
Waste Code:	P008
Waste Description:	4-Aminopyridine (Or) 4-Pyridinamine
Waste Code:	P009
Waste Description:	Ammonium Picrate (R) (Or) Phenol, 2,4,6-Trinitro-, Ammonium Salt (R)
Waste Code:	P010
Waste Description:	Arsenic Acid H3aso4
Waste Code:	P011
Waste Description:	Arsenic Oxide As2o5 (Or) Arsenic Pentoxide
Waste Code:	P012
Waste Description:	Arsenic Oxide As2o3 (Or) Arsenic Trioxide
Waste Code:	P013
Waste Description:	Barium Cyanide
Waste Code:	P014
Waste Description:	Benzenethiol (Or) Thiophenol
Waste Code:	P015
Waste Description:	Beryllium
Waste Code:	P016
Waste Description:	Dichloromethyl Ether (Or) Methane, Oxybis[Chloro-
Waste Code:	P017
Waste Description:	2-Propanone, 1-Bromo- (Or) Bromoacetone
Waste Code:	P018
Waste Description:	Brucine (Or) Strychnidin-10-One, 2,3-Dimethoxy-
Waste Code:	P020
Waste Description:	Dinoseb (Or) Phenol, 2-(1-Methylpropyl)-4,6-Dinitro-
Waste Code:	P021
Waste Description:	Calcium Cyanide (Or) Calcium Cyanide Ca(Cn)2
Waste Code:	P022
Waste Description:	Carbon Disulfide
Waste Code:	P023
Waste Description:	Acetaldehyde, Chloro- (Or) Chloroacetaldehyde
Waste Code:	P024
Waste Description:	Benzenamine, 4-Chloro- (Or) P-Chloraniline

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: P026
Waste Description: 1-(O-Chlorophenyl)Thiourea (Or) Thiourea, (2-Chlorophenyl)-

Waste Code: P027
Waste Description: 3-Chloropropionitrile (Or) Propanenitrile, 3-Chloro-

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P031
Waste Description: Cyanogen (Or) Ethanedinitrile

Waste Code: P033
Waste Description: Cyanogen Chloride (Or) Cyanogen Chloride (Cn)Cl

Waste Code: P034
Waste Description: 2-Cyclohexyl-4,6-Dinitrophenol (Or) Phenol, 2-Cyclohexyl-4,6-Dinitro-

Waste Code: P036
Waste Description: Arsonous Dichloride, Phenyl- (Or) Dichlorophenylarsine

Waste Code: P037
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2aalpha, 3beta, 6beta, 6aalpha, 7beta, 7aalpha)- (Or) Dieldrin

Waste Code: P038
Waste Description: Arsine, Diethyl- (Or) Diethylarsine

Waste Code: P039
Waste Description: Disulfoton (Or) Phosphorodithioic Acid, O,O-Diethyl S-[2-(Ethylthio)Ethyl] Ester

Waste Code: P040
Waste Description: O,O-Diethyl O-Pyrazinyl Phosphorothioate (Or) Phosphorothioic Acid, O,O-Diethyl O-Pyrazinyl Ester

Waste Code: P041
Waste Description: Diethyl-P-Nitrophenyl Phosphate (Or) Phosphoric Acid, Diethyl 4-Nitrophenyl Ester

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P043
Waste Description: Diisopropylfluorophosphate (Dfp) (Or) Phosphorofluoridic Acid, Bis(1-Methylethyl) Ester

Waste Code: P044
Waste Description: Dimethoate (Or) Phosphorodithioic Acid, O,O-Dimethyl

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

S-[2-(Methylamino)-2-Oxoethyl] Ester

Waste Code: P045
Waste Description: 2-Butanone, 3,3-Dimethyl-1-(Methylthio)-, O-[Methylamino)Carbonyl] Oxime (Or) Thiofanox

Waste Code: P046
Waste Description: Alpha,Alpha-Dimethylphenethylamine (Or) Benzeneethanamine, Alpha, Alpha-Dimethyl-

Waste Code: P047
Waste Description: 4,6-Dinitro-O-Cresol, & Salts (Or) Phenol, 2-Methyl-4,6-Dinitro-, & Salts

Waste Code: P048
Waste Description: 2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-

Waste Code: P049
Waste Description: Dithiobiuret (Or) Thioimidodicarbonic Diamide [(H2n)C(S)]2nh

Waste Code: P050
Waste Description: 6,9-Methano-2,4,3-Benzodioxathiepin,6,7,8,9,10,10-Hexachloro-1,5,5a,6, 9,9a-Hexahydro-,3-Oxide (Or) Endosulfan

Waste Code: P051
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2abeta, 3alpha, 6alpha, 6abeta, 7beta, 7aalpha)- & Metabolites (Or) Endrin (Or) Endrin, & Metabolites

Waste Code: P054
Waste Description: Aziridine (Or) Ethyleneimine

Waste Code: P056
Waste Description: Fluorine

Waste Code: P057
Waste Description: Acetamide, 2-Fluoro- (Or) Fluoroacetamide

Waste Code: P058
Waste Description: Acetic Acid, Fluoro-, Sodium Salt (Or) Fluoroacetic Acid, Sodium Salt

Waste Code: P059
Waste Description: 4,7-Methano-1h-Indene, 1,4,5,6,7,8,8-Heptachloro-3a,4,7,7a-Tetrahydro- (Or) Heptachlor

Waste Code: P060
Waste Description: 1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5beta, 8beta, 8abeta)- (Or) Isodrin

Waste Code: P062
Waste Description: Hexaethyl Tetraphosphate (Or) Tetraphosphoric Acid, Hexaethyl Ester

Waste Code: P063
Waste Description: Hydrocyanic Acid (Or) Hydrogen Cyanide

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: P064
Waste Description: Methane, Isocyanato- (Or) Methyl Isocyanate

Waste Code: P065
Waste Description: Fulminic Acid, Mercury(2+) Salt (R,T) (Or) Mercury Fulminate (R,T)

Waste Code: P066
Waste Description: Ethanimidothioic Acid, N-[[(Methylamino)Carbonyl]Oxy]-, Methyl Ester (Or) Methomyl

Waste Code: P067
Waste Description: 1,2-Propylenimine (Or) Aziridine, 2-Methyl-

Waste Code: P068
Waste Description: Hydrazine, Methyl- (Or) Methyl Hydrazine

Waste Code: P069
Waste Description: 2-Methyllactonitrile (Or) Propanenitrile, 2-Hydroxy-2-Methyl-

Waste Code: P070
Waste Description: Aldicarb (Or) Propanal, 2-Methyl-2-(Methylthio)-, O-[(Methylamino)Carbonyl]Oxime

Waste Code: P071
Waste Description: Methyl Parathion (Or) Phosphorothioic Acid, O,O,-Dimethyl O-(4-Nitrophenyl) Ester

Waste Code: P072
Waste Description: Alpha-Naphthylthiourea (Or) Thiourea, 1-Naphthalenyl-

Waste Code: P073
Waste Description: Nickel Carbonyl (Or) Nickel Carbonyl Ni(Co)4, (T-4)-

Waste Code: P074
Waste Description: Nickel Cyanide (Or) Nickel Cyanide Ni(Cn)2

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P076
Waste Description: Nitric Oxide (Or) Nitrogen Oxide No

Waste Code: P077
Waste Description: Benzenamine, 4-Nitro- (Or) P-Nitroaniline

Waste Code: P078
Waste Description: Nitrogen Dioxide (Or) Nitrogen Oxide No2

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: P082
Waste Description: Methanimine, N-Methyl-N-Nitroso- (Or) N-Nitrosodimethylamine

Waste Code: P084
Waste Description: N-Nitrosomethylvinylamine (Or) Vinylamine, N-Methyl-N-Nitroso-

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: P085
Waste Description: Diphosphoramide, Octamethyl- (Or) Octamethylpyrophosphoramide

Waste Code: P087
Waste Description: Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

Waste Code: P088
Waste Description: 7-Oxabicyclo[2.2.1]Heptane-2,3-Dicarboxylic Acid (Or) Endothall

Waste Code: P089
Waste Description: Parathion (Or) Phosphorothioic Acid, O,O-Diethyl-O-(4-Nitrophenyl) Ester

Waste Code: P092
Waste Description: Mercury, (Acetato-O)Phenyl- (Or) Phenylmercury Acetate

Waste Code: P093
Waste Description: Phenylthiourea (Or) Thiourea, Phenyl-

Waste Code: P094
Waste Description: Phorate (Or) Phosphorodithioic Acid, O,O-Diethyl S-[(Ethylthio)Methyl] Ester

Waste Code: P095
Waste Description: Carbonic Dichloride (Or) Phosgene

Waste Code: P096
Waste Description: Hydrogen Phosphide (Or) Phosphine

Waste Code: P097
Waste Description: Famphur (Or) Phosphorothioic Acid O-[4-[(Dimethylamino)Sulfonyl]Phenyl] O,O-Dimethyl Ester

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P099
Waste Description: Argentate (1-), Bis(Cyano-C)-, Potassium (Or) Potassium Silver Cyanide

Waste Code: P101
Waste Description: Ethyl Cyanide (Or) Propanenitrile

Waste Code: P102
Waste Description: 2-Propyn-1-Ol (Or) Propargyl Alcohol

Waste Code: P103
Waste Description: Selenourea

Waste Code: P104
Waste Description: Silver Cyanide (Or) Silver Cyanide Ag(Cn)

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: P109
Waste Description: Tetraethyldithiopyrophosphate (Or) Thiodiphosphoric Acid, Tetraethyl Ester

Waste Code: P110
Waste Description: Plumbane, Tetraethyl- (Or) Tetraethyl Lead

Waste Code: P111
Waste Description: Diphosphoric Acid, Tetraethyl Ester (Or) Tetraethyl Pyrophosphate

Waste Code: P112
Waste Description: Methane, Tetranitro- (R) (Or) Tetranitromethane (R)

Waste Code: P113
Waste Description: Thallic Oxide (Or) Thallium Oxide Tl2o3

Waste Code: P114
Waste Description: Selenious Acid, Dithallium (1+) Salt (Or) Thallium(I) Selenite

Waste Code: P115
Waste Description: Sulfuric Acid, Dithallium (1+) Salt (Or) Thallium(I) Sulfate

Waste Code: P116
Waste Description: Hydrazinecarbothioamide (Or) Thiosemicarbazide

Waste Code: P118
Waste Description: Methanethiol, Trichloro- (Or) Trichloromethanethiol

Waste Code: P119
Waste Description: Ammonium Vanadate (Or) Vanadic Acid, Ammonium Salt

Waste Code: P120
Waste Description: Vanadium Oxide V2o5 (Or) Vanadium Pentoxide

Waste Code: P121
Waste Description: Zinc Cyanide (Or) Zinc Cyanide Zn(Cn)2

Waste Code: P122
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Greater Than 10% (R,T)

Waste Code: P123
Waste Description: Toxaphene

Waste Code: P127
Waste Description: P127

Waste Code: P128
Waste Description: P128

Waste Code: P185
Waste Description: 1,3-Dithiolane-2-Carboxaldehyde, 2,4-Dimethyl-, O-[(Methylamino)-Carbonyl]Oxime (Or) Tirpate

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: P189
Waste Description: Carbamic Acid, [(Dibutylamino)-Thio]Methyl-, 2,3-Dihydro-2,2-Dimethyl -7-Benzofuranyl Ester (Or) Carbosulfan

Waste Code: P190
Waste Description: Carbamic Acid, Methyl-, 3-Methylphenyl Ester (Or) Metolcarb

Waste Code: P191
Waste Description: Carbamic Acid, Dimethyl-, 1-[(Dimethyl-Amino)Carbonyl]- 5-Methyl-1h-Pyrazol-3-Yl Ester (Or) Dimetilan

Waste Code: P192
Waste Description: Isolan (Or) Carbamic Acid, Dimethyl-, 3-Methy-L-(1-Methylethyl)-1h-Pyrazol-5-Yl Ester

Waste Code: P194
Waste Description: Ethanimidothioc Acid, 2-(Dimethylamino)-N-[[(Methylamino) Carbonyl]Oxy]-2-Oxo-, Methyl Ester (Or) Oxamyl

Waste Code: P196
Waste Description: Manganese Dimethyldithiocarbamate (Or) Manganese, Bis(Dimethylcarbamodithioato-S,S')-,

Waste Code: P197
Waste Description: Formparanate (Or) Methanimidamide, N,N-Dimethyl-N'-[2-Methyl-4-[[(Methylamino)Carbonyl]Oxy]Phenyl]

Waste Code: P198
Waste Description: Methanimidamide, N,N-Dimethyl-N'-[3-[[(Methylamino)-Carbonyl]Oxy]Phenyl]-, Monohydrochloride (Or) Formetanate Hydrochloride

Waste Code: P199
Waste Description: P199

Waste Code: P201
Waste Description: Phenol, 3-Methyl-5-(1-Methylethyl)-, Methyl Carbamate (Or) Promecarb

Waste Code: P202
Waste Description: M-Cumenyl Methylcarbamate (Or) 3-Isopropylphenyl N-Methylcarbamate (Or) Phenol, 3-(1-Methylethyl)-, Methyl Carbamate

Waste Code: P203
Waste Description: Aldicarb Sulfone (Or) Propanal, 2-Methyl-2-(Methyl-Sulfonyl)-, O-[(Methylamino)Carbonyl] Oxime

Waste Code: P204
Waste Description: Physostigmine (Or) Pyrrolo[2,3-B]Indol-5-Ol, 1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethyl-Methylcarbamate (Ester), (3as-Cis)-

Waste Code: P205

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description: Zinc, Bis(Dimethylcarbamodithioato-S,S')-, (Or) Ziram

Waste Code: U001
Waste Description: Acetaldehyde (I) (Or) Ethanal (I)

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U003
Waste Description: Acetonitrile (I,T)

Waste Code: U004
Waste Description: Acetophenone (Or) Ethanone, 1-Phenyl-

Waste Code: U005
Waste Description: 2-Acetylaminofluorene (Or) Acetamide, N-9h-Fluoren-2-Yl

Waste Code: U006
Waste Description: Acetyl Chloride (C,R,T)

Waste Code: U007
Waste Description: 2-Propenamide (Or) Acrylamide

Waste Code: U008
Waste Description: 2-Propenoic Acid (I) (Or) Acrylic Acid (I)

Waste Code: U009
Waste Description: 2-Propenenitrile (Or) Acrylonitrile

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U011
Waste Description: 1h-1,2,4-Triazol-3-Amine (Or) Amitrole

Waste Code: U012
Waste Description: Aniline (I,T) (Or) Benzenamine (I,T)

Waste Code: U014
Waste Description: Auramine (Or) Benzenamine, 4,4'-Carbonimidoylbis[N,N-Dimethyl-

Waste Code: U015
Waste Description: Azaserine (Or) L-Serine, Diazoacetate (Ester)

Waste Code: U016
Waste Description: Benz[C]Acridine

Waste Code: U017
Waste Description: Benzal Chloride (Or) Benzene, (Dichloromethyl)-

Waste Code: U018
Waste Description: Benz[A]Anthracene

Waste Code: U019

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description:	Benzene (I,T)
Waste Code:	U020
Waste Description:	Benzenesulfonic Acid Chloride (C,R) (Or) Benzenesulfonyl Chloride (C,R)
Waste Code:	U021
Waste Description:	[1,1'-Biphenyl]-4,4'-Diamine (Or) Benzidine
Waste Code:	U022
Waste Description:	Benzo[A]Pyrene
Waste Code:	U023
Waste Description:	Benzene, (Trichloromethyl)- (Or) Benzotrichloride (C,R,T)
Waste Code:	U024
Waste Description:	Dichloromethoxy Ethane (Or) Ethane, 1,1'-[Methylenebis(Oxy)]Bis[2-Chloro-
Waste Code:	U025
Waste Description:	Dichloroethyl Ether (Or) Ethane, 1,1'-Oxybis[2-Chloro-
Waste Code:	U026
Waste Description:	Chlornaphazin (Or) Naphthalenamine, N,N'-Bis(2-Chloroethyl)-
Waste Code:	U027
Waste Description:	Dichloroisopropyl Ether (Or) Propane, 2,2'-Oxybis[2-Chloro-
Waste Code:	U028
Waste Description:	1,2-Benzenedicarboxylic Acid, Bis(2-Ethylhexyl) Ester (Or) Diethylhexyl Phthalate
Waste Code:	U029
Waste Description:	Methane, Bromo- (Or) Methyl Bromide
Waste Code:	U030
Waste Description:	4-Bromophenyl Phenyl Ether (Or) Benzene, 1-Bromo-4-Phenoxy-
Waste Code:	U031
Waste Description:	1-Butanol (I) (Or) N-Butyl Alcohol (I)
Waste Code:	U032
Waste Description:	Calcium Chromate (Or) Chromic Acid H2cro4, Calcium Salt
Waste Code:	U033
Waste Description:	Carbon Oxyfluoride (R,T) (Or) Carbonic Difluoride
Waste Code:	U034
Waste Description:	Acetaldehyde, Trichloro- (Or) Chloral
Waste Code:	U035
Waste Description:	Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil
Waste Code:	U036
Waste Description:	4,7-Methano-1h-Indene, 1,2,4,5,6,7,8,8-Octachloro-2,3,3a,4,7,7a-Hexahydro- (Or) Chlordane, Alpha & Gamma Isomers

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U038
Waste Description: Benzeneacetic Acid, 4-Chloro-Alpha-(4-Chlorophenyl)-Alpha-Hydroxy-, Ethyl Ester (Or) Chlorobenzilate

Waste Code: U039
Waste Description: P-Chloro-M-Cresol (Or) Phenol, 4-Chloro-3-Methyl-

Waste Code: U041
Waste Description: Epichlorohydrin (Or) Oxirane, (Chloromethyl)-

Waste Code: U042
Waste Description: 2-Chloroethyl Vinyl Ether (Or) Ethene, (2-Chloroethoxy)-

Waste Code: U043
Waste Description: Ethene, Chloro- (Or) Vinyl Chloride

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U045
Waste Description: Methane, Chloro- (I,T) (Or) Methyl Chloride (I,T)

Waste Code: U046
Waste Description: Chloromethyl Methyl Ether (Or) Methane, Chloromethoxy-

Waste Code: U047
Waste Description: Beta-Chloronaphthalene (Or) Naphthalene, 2-Chloro-

Waste Code: U048
Waste Description: O-Chlorophenol (Or) Phenol, 2-Chloro-

Waste Code: U049
Waste Description: 4-Chloro-O-Toluidine, Hydrochloride (Or) Benzenamine, 4-Chloro-2-Methyl-, Hydrochloride

Waste Code: U050
Waste Description: Chrysene

Waste Code: U051
Waste Description: Creosote

Waste Code: U052
Waste Description: Cresol (Cresylic Acid) (Or) Phenol, Methyl-

Waste Code: U053
Waste Description: 2-Butenal (Or) Crotonaldehyde

Waste Code: U055
Waste Description: Benzene, (1-Methylethyl)- (I) (Or) Cumene (I)

Waste Code: U056
Waste Description: Benzene, Hexahydro- (I) (Or) Cyclohexane (I)

Waste Code: U057

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description:	Cyclohexanone (I)
Waste Code:	U058
Waste Description:	2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide
Waste Code:	U059
Waste Description:	5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin
Waste Code:	U060
Waste Description:	Benzene, 1,1'-(2,2-Dichloroethylidene)Bis[4-Chloro- (Or) Ddd
Waste Code:	U061
Waste Description:	Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Chloro- (Or) Ddt
Waste Code:	U062
Waste Description:	Carbamothioic Acid, Bis(1-Methylethyl)-, S-(2,3-Dichloro-2-Propenyl) Ester (Or) Diallate
Waste Code:	U063
Waste Description:	Dibenz[A,H]Anthracene
Waste Code:	U064
Waste Description:	Benzo[Rst]Pentaphene (Or) Dibenzo[A,I]Pyrene
Waste Code:	U066
Waste Description:	1,2-Dibromo-3-Chloropropane (Or) Propane, 1,2-Dibromo-3-Chloro-
Waste Code:	U067
Waste Description:	Ethane, 1,2-Dibromo- (Or) Ethylene Dibromide
Waste Code:	U068
Waste Description:	Methane, Dibromo- (Or) Methylene Bromide
Waste Code:	U069
Waste Description:	1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate
Waste Code:	U070
Waste Description:	Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene
Waste Code:	U071
Waste Description:	Benzene, 1,3-Dichloro- (Or) M-Dichlorobenzene
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U073
Waste Description:	[1,1'-Biphenyl]-4,4'-Diamine, 3,3'-Dichloro- (Or) 3,3'-Dichlorobenzidine
Waste Code:	U074
Waste Description:	1,4-Dichloro-2-Butene (I,T) (Or) 2-Butene, 1,4-Dichloro- (I,T)
Waste Code:	U075

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description: Dichlorodifluoromethane (Or) Methane, Dichlorodifluoro-

Waste Code: U076
Waste Description: Ethane, 1,1-Dichloro- (Or) Ethylidene Dichloride

Waste Code: U077
Waste Description: Ethane, 1,2-Dichloro- (Or) Ethylene Dichloride

Waste Code: U078
Waste Description: 1,1-Dichloroethylene (Or) Ethene, 1,1-Dichloro-

Waste Code: U079
Waste Description: 1,2-Dichloroethylene (Or) Ethene, 1,2-Dichloro-,(E)-

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U081
Waste Description: 2,4-Dichlorophenol (Or) Phenol, 2,4-Dichloro-

Waste Code: U082
Waste Description: 2,6-Dichlorophenol (Or) Phenol, 2,6-Dichloro-

Waste Code: U083
Waste Description: Propane, 1,2-Dichloro- (Or) Propylene Dichloride

Waste Code: U084
Waste Description: 1,3-Dichloropropene (Or) 1-Propene, 1,3-Dichloro-

Waste Code: U085
Waste Description: 1,2:3,4-Diepoxybutane (I,T) (Or) 2,2'-Bioxirane

Waste Code: U086
Waste Description: Hydrazine, 1,2-Diethyl- (Or) N,N'-Diethylhydrazine

Waste Code: U087
Waste Description: O,O-Diethyl S-Methyl Dithiophosphate (Or) Phosphorodithioic Acid, O,O-Diethyl S-Methyl Ester

Waste Code: U088
Waste Description: 1,2-Benzenedicarboxylic Acid, Diethyl Ester (Or) Diethyl Phthalate

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U090
Waste Description: 1,3-Benzodioxole, 5-Propyl- (Or) Dihydrosafrole

Waste Code: U091
Waste Description: [1,1'-Biphenyl]-4,4'-Diamine, 3,3'-Dimethoxy- (Or) 3,3'-Dimethoxybenzidine

Waste Code: U092
Waste Description: Dimethylamine (I) (Or) Methanamine, N-Methyl- (I)

Waste Code: U093

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description: Benzenamine, N,N-Dimethyl-4-(Phenylazo)- (Or) P-Dimethylaminoazobenzene

Waste Code: U094
Waste Description: 7,12-Dimethylbenz[A]Anthracene (Or) Benz[A]Anthracene, 7,12-Dimethyl-

Waste Code: U095
Waste Description: [1,1'-Biphenyl]-4,4'-Diamine, 3,3'-Dimethyl- (Or) 3,3'-Dimethylbenzidine

Waste Code: U096
Waste Description: Alpha,Alpha-Dimethylbenzylhydroperoxide (R) (Or) Hydroperoxide, 1-Methyl-1-Phenylethyl- (R)

Waste Code: U097
Waste Description: Carbamic Chloride, Dimethyl- (Or) Dimethylcarbamoyl Chloride

Waste Code: U098
Waste Description: 1,1-Dimethylhydrazine (Or) Hydrazine, 1,1-Dimethyl-

Waste Code: U099
Waste Description: 1,2-Dimethylhydrazine (Or) Hydrazine, 1,2-Diphenyl-

Waste Code: U101
Waste Description: 2,4-Dimethylphenol (Or) Phenol, 2,4-Dimethyl-

Waste Code: U102
Waste Description: 1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

Waste Code: U105
Waste Description: 2,4-Dinitrotoluene (Or) Benzene, 1-Methyl-2,4-Dinitro-

Waste Code: U106
Waste Description: 2,6-Dinitrotoluene (Or) Benzene, 2-Methyl-1,3-Dinitro-

Waste Code: U107
Waste Description: 1,2-Benzenedicarboxylic Acid, Dioctyl Ester (Or) Di-N-Octyl Phthalate

Waste Code: U108
Waste Description: 1,4-Diethyleneoxide (Or) 1,4-Dioxane

Waste Code: U109
Waste Description: 1,2-Diphenylhydrazine (Or) Hydrazine, 1,2-Diphenyl-

Waste Code: U110
Waste Description: 1-Propanimine, N-Propyl-(I) (Or) Dipropylamine (I)

Waste Code: U111
Waste Description: 1-Propanamine, N-Nitroso-N-Propyl- (Or) Di-N-Propylnitrosamine

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U113

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description: 2-Propenoic Acid, Ethyl Ester (I) (Or) Ethyl Acrylate (I)

Waste Code: U114
Waste Description: Carbamodithioic Acid, 1,2-Ethanediylbis-, Salts & Esters (Or) Ethylenebisdithiocarbamic Acid, Salts & Esters

Waste Code: U115
Waste Description: Ethylene Oxide (I,T) (Or) Oxirane (I,T)

Waste Code: U116
Waste Description: 2-Imidazolidinethione (Or) Ethylenethiourea

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U118
Waste Description: 2-Propenoic Acid, 2-Methyl-, Ethyl Ester (Or) Ethyl Methacrylate

Waste Code: U119
Waste Description: Ethyl Methanesulfonate (Or) Methanesulfonic Acid, Ethyl Ester

Waste Code: U120
Waste Description: Fluoranthene

Waste Code: U121
Waste Description: Methane, Trichlorofluoro- (Or) Trichloromonofluoromethane

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U124
Waste Description: Furan (I) (Or) Furfuran (I)

Waste Code: U125
Waste Description: 2-Furancarboxaldehyde (I) (Or) Furfural (I)

Waste Code: U126
Waste Description: Glycidylaldehyde (Or) Oxiranecarboxyaldehyde

Waste Code: U127
Waste Description: Benzene, Hexachloro- (Or) Hexachlorobenzene

Waste Code: U128
Waste Description: 1,3-Butadiene, 1,1,2,3,4,4-Hexachloro- (Or) Hexachlorobutadiene

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U130
Waste Description: 1,3-Cyclopentadiene, 1,2,3,4,5,5-Hexachloro- (Or) Hexachlorocyclopentadiene

Waste Code: U131

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Description: Ethane, Hexachloro- (Or) Hexachloroethane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U135
Waste Description: Hydrogen Sulfide (Or) Hydrogen Sulfide H2s

Waste Code: U136
Waste Description: Arsinic Acid, Dimethyl- (Or) Cacodylic Acid

Waste Code: U137
Waste Description: Indeno[1,2,3-Cd]Pyrene

Waste Code: U138
Waste Description: Methane, Iodo- (Or) Methyl Iodide

Waste Code: U140
Waste Description: 1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)

Waste Code: U141
Waste Description: 1,3-Benzodioxole, 5-(1-Propenyl)- (Or) Isosafrole

Waste Code: U142
Waste Description: 1,3,4-Metheno-2h-Cyclobuta[Cd]Pentalen-2-One,
1,1a,3,3a,4,5,5,5a,5b,6-Decachlorooctahydro- (Or) Kepone

Waste Code: U143
Waste Description: 2-Butenoic Acid, 2-Methyl-,
7-[[2,3-Dihydroxy-2-(1-Methoxyethyl)-3-Methyl-1-Oxobutoxy]Methyl]-2,3,
5,7a-Tetrahydro-1h-Pyrrolizin-1-Yl Ester, [1s-[1alpha(Z), 7(2s*,3r*),
7aalpha]]- (Or) Lasiocarpine

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

Waste Code: U145
Waste Description: Lead Phosphate (Or) Phosphoric Acid, Lead(2+) Salt (2:3)

Waste Code: U146
Waste Description: Lead Subacetate (Or) Lead, Bis(Acetato-O)Tetrahydroxytri-

Waste Code: U147
Waste Description: 2,5-Furandione (Or) Maleic Anhydride

Waste Code: U148
Waste Description: 3,6-Pyridazinedione, 1,2-Dihydro- (Or) Maleic Hydrazide

Waste Code: U149
Waste Description: Malononitrile (Or) Propanedinitrile

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U151
Waste Description: Mercury

Waste Code: U152
Waste Description: 2-Propenenitrile, 2-Methyl- (I,T) (Or) Methacrylonitrile (I,T)

Waste Code: U153
Waste Description: Methanethiol (I,T) (Or) Thiomethanol (I,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U155
Waste Description: 1,2-Ethanediamine, N,N-Dimethyl-N'-2-Pyridinyl-N'-(2-Thienylmethyl)- (Or) Methapyrilene

Waste Code: U156
Waste Description: Carbonochloridic Acid, Methyl Ester, (I,T) (Or) Methyl Chlorocarbonate (I,T)

Waste Code: U157
Waste Description: 3-Methylcholanthrene (Or) Benz[J]Aceanthrylene, 1,2-Dihydro-3-Methyl-

Waste Code: U158
Waste Description: 4,4'-Methylenebis(2-Chloroaniline) (Or) Benzenamine, 4,4'-Methylenebis[2-Chloro-

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U160
Waste Description: 2-Butanone, Peroxide (R,T) (Or) Methyl Ethyl Ketone Peroxide (R,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U163
Waste Description: Guanidine, N-Methyl-N'-Nitro-N-Nitroso- (Or) Mnng

Waste Code: U164
Waste Description: 4(1h)-Pyrimidinone, 2,3-Dihydro-6-Methyl-2-Thioxo- (Or) Methylthiouracil

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U166
Waste Description: 1,4-Naphthalenedione (Or) 1,4-Naphthoquinone

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: U167
Waste Description: 1-Napthalenamine (Or) Alpha-Naphthylamine

Waste Code: U168
Waste Description: 2-Napthalenamine (Or) Beta-Naphthylamine

Waste Code: U169
Waste Description: Benzene, Nitro- (Or) Nitrobenzene (I,T)

Waste Code: U170
Waste Description: P-Nitrophenol (I,T) (Or) Phenol, 4-Nitro-

Waste Code: U171
Waste Description: 2-Nitropropane (I,T) (Or) Propane, 2-Nitro- (I,T)

Waste Code: U172
Waste Description: 1-Butanamine, N-Butyl-N-Nitroso- (Or) N-Nitrosodi-N-Butylamine

Waste Code: U173
Waste Description: Ethanol, 2,2'-(Nitrosoimino)Bis- (Or) N-Nitrosodiethanolamine

Waste Code: U174
Waste Description: Ethanamine, N-Ethyl-N-Nitroso- (Or) N-Nitrosodiethylamine

Waste Code: U176
Waste Description: N-Nitroso-N-Ethylurea (Or) Urea, N-Ethyl-N-Nitroso-

Waste Code: U177
Waste Description: N-Nitroso-N-Methylurea (Or) Urea, N-Methyl-N-Nitroso-

Waste Code: U178
Waste Description: Carbamic Acid, Methylnitroso-, Ethyl Ester (Or) N-Nitroso-N-Methylurethane

Waste Code: U179
Waste Description: N-Nitrosopiperidine (Or) Piperidine, 1-Nitroso-

Waste Code: U180
Waste Description: N-Nitrosopyrrolidine (Or) Pyrrolidine, 1-Nitroso-

Waste Code: U181
Waste Description: 5-Nitro-O-Toluidine (Or) Benzenamine, 2-Methyl-5-Nitro

Waste Code: U182
Waste Description: 1,3,5-Trioxane, 2,4,6-Trimethyl- (Or) Paraldehyde

Waste Code: U183
Waste Description: Benzene, Pentachloro- (Or) Pentachlorobenzene

Waste Code: U184
Waste Description: Ethane, Pentachloro- (Or) Pentachloroethane

Waste Code: U185
Waste Description: Benzene, Pentachloronitro- (Or) Pentachloronitrobenzene (Pcnb)

Waste Code: U186
Waste Description: 1,3-Pentadiene (I) (Or) 1-Methylbutadiene (I)

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: U187
Waste Description: Acetamide, N-(4-Ethoxyphenyl)- (Or) Phenacetin

Waste Code: U188
Waste Description: Phenol

Waste Code: U189
Waste Description: Phosphorus Sulfide (R) (Or) Sulfur Phosphide (R)

Waste Code: U190
Waste Description: 1,3-Isobenzofurandione (Or) Phthalic Anhydride

Waste Code: U191
Waste Description: 2-Picoline (Or) Pyridine, 2-Methyl-

Waste Code: U192
Waste Description: Benzamide, 3,5-Dichloro-N-(1,1-Dimethyl-2-Propynyl)- (Or) Pronamide

Waste Code: U193
Waste Description: 1,2-Oxathiolane, 2,2-Dioxide (Or) 1,3-Propane Sultone

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U203
Waste Description: 1,3-Benzodioxole, 5-(2-Propenyl)- (Or) Safrole

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U207
Waste Description: 1,2,4,5-Tetrachlorobenzene (Or) Benzene, 1,2,4,5-Tetrachloro-

Waste Code: U208
Waste Description: 1,1,1,2-Tetrachloroethane (Or) Ethane, 1,1,1,2-Tetrachloro-

Waste Code: U209
Waste Description: 1,1,2,2-Tetrachloroethane (Or) Ethane, 1,1,2,2-Tetrachloro-

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U214
Waste Description: Acetic Acid, Thallium(1+) Salt (Or) Thallium(I) Acetate

Waste Code: U215
Waste Description: Carbonic Acid, Dithallium(1+) Salt (Or) Thallium(I) Carbonate

Waste Code: U216
Waste Description: Thallium Chloride Tlcl (Or) Thallium(I) Chloride

Waste Code: U217
Waste Description: Nitric Acid, Thallium(1+) Salt (Or) Thallium(I) Nitrate

Waste Code: U218
Waste Description: Ethanethioamide (Or) Thioacetamide

Waste Code: U219
Waste Description: Thiourea

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U221
Waste Description: Benzenediamine, Ar-Methyl- (Or) Toluenediamine

Waste Code: U222
Waste Description: Benzenamine, 2-Methyl-, Hydrochloride (Or) O-Toluidine Hydrochloride

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Waste Code: U225
Waste Description: Bromoform (Or) Methane, Tribromo-

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U234
Waste Description: 1,3,5-Trinitrobenzene (R,T) (Or) Benzene, 1,3,5-Trinitro-

Waste Code: U235
Waste Description: 1-Propanol, 2,3-Dibromo-, Phosphate (3:1) (Or) Tris(2,3,-Dibromopropyl) Phosphate

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code:	U236
Waste Description:	2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue
Waste Code:	U237
Waste Description:	2,4-(1h,3h)-Pyrimidinedione, 5-[Bis(2-Chloroethyl)Amino]- (Or) Uracil Mustard
Waste Code:	U238
Waste Description:	Carbamic Acid, Ethyl Ester (Or) Ethyl Carbamate (Urethane)
Waste Code:	U239
Waste Description:	Benzene, Dimethyl- (I,T) (Or) Xylene (I)
Waste Code:	U240
Waste Description:	2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D
Waste Code:	U243
Waste Description:	1-Propene, 1,1,2,3,3,3-Hexachloro- (Or) Hexachloropropene
Waste Code:	U244
Waste Description:	Thioperoxydicarbonic Diamide [(H2n)C(S)]2s2, Tetramethyl- (Or) Thiram
Waste Code:	U246
Waste Description:	Cyanogen Bromide (Cn)Br
Waste Code:	U247
Waste Description:	Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Methoxy- (Or) Methoxychlor
Waste Code:	U249
Waste Description:	Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less
Waste Code:	U271
Waste Description:	Benomyl (Or) Carbamic Acid, [1-[(Butylamino)Carbonyl]-1h-Benzimidazol-2-Yl]-, Methyl Ester
Waste Code:	U278
Waste Description:	Bendiocarb (Or) 1,3-Benzodioxol-4-Ol, 2,2-Dimethyl-, Methyl Carbamate
Waste Code:	U279
Waste Description:	U279
Waste Code:	U280
Waste Description:	Barban (Or) Carbamic Acid, (3-Chlorophenyl)-, 4-Chloro-2-Butynyl Ester
Waste Code:	U328
Waste Description:	Benzenamine, 2-Methyl- (Or) O-Toluidine
Waste Code:	U353
Waste Description:	Benzenamine, 4-Methyl- (Or) P-Toluidine
Waste Code:	U359
Waste Description:	Ethanol, 2-Ethoxy- (Or) Ethylene Glycol Monoethyl Ether

NAVY REGION SOUTHWEST, COMMANDER (Continued) **1015730583**

Waste Code: U364
Waste Description: Bendiocarb Phenol (Or) 1,3-Benzodioxol-4-Ol, 2,2-Dimethyl-

Waste Code: U367
Waste Description: 7-Benzofuranol, 2,3-Dihydro-2,2-Dimethyl- (Or) Carbofuran Phenol

Waste Code: U372
Waste Description: Carbamic Acid, 1h-Benzimidazol-2-Yl, Methyl Ester (Or) Carbendazim

Waste Code: U373
Waste Description: Carbamic Acid, Phenyl-, 1-Methylethyl Ester (Or) Propham

Waste Code: U387
Waste Description: Carbamothioic Acid, Dipropyl-, S-(Phenylmethyl) Ester (Or) Prosulfocarb

Waste Code: U389
Waste Description: Carbamothioic Acid, Bis(1-Methylethyl)-, S-(2,3,3-Trichloro-2-Propenyl) Ester (Or) Triallate

Waste Code: U394
Waste Description: A2213 (Or) Ethanimidothioic Acid, 2-(Dimethylamino)-N-Hydroxy-2-Oxo-, Methyl Ester

Waste Code: U395
Waste Description: Diethylene Glycol, Dicarbamate (Or) Ethanol, 2,2'-Oxybis-, Dicarbamate

Waste Code: U404
Waste Description: U404

Waste Code: U409
Waste Description: Carbamic Acid, [1,2-Phenylenebis (Iminocarbonothioyl)]Bis-, Dimethyl Ester (Or) Thiophanate-Methyl

Waste Code: U410
Waste Description: Ethanimidothioic Acid, N,N'-[Thiobis[(Methylimino)Carbonyloxy]]Bis-, Dimethyl Ester (Or) Thiodicarb

Waste Code: U411
Waste Description: U411

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/27/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2025

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Next Scheduled EDR Contact: 07/14/2025
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/02/2025

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

West Map:	50003508 IMPERIAL BEACH OE W, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

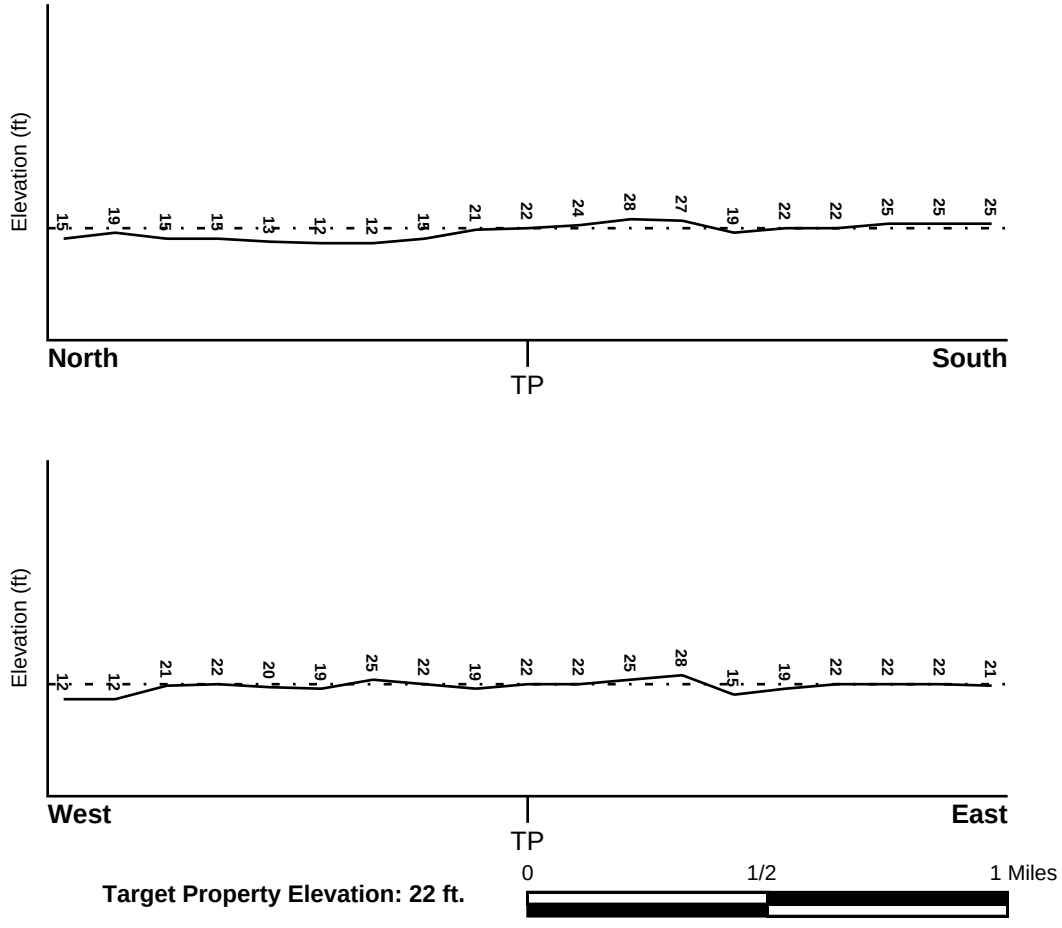

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 22 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06073C2153F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06073C2132G	FEMA FIRM Flood data

06073C2134G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
IMPERIAL BEACH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
B16	1/8 - 1/4 Mile East	SW
1G	1/8 - 1/4 Mile East	SW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: HUERHUERO

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	11 inches	55 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	55 inches	72 inches	stratified sand to sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
