RE: MITIGATED NEGATIVE DECLARATION FOR THE KASBERGEN SINGLE FAMILY
SUBDIVISION DATED MAY 21, 2026, STATE CLEARINGHOUSE NUMBER
[2026050849](#)

Dear Kevin White,

The Department of Toxic Substances Control (DTSC) reviewed the Mitigated Negative Declaration (MND) for the Kasbergen Single Family Subdivision (Project). The Applicant is initiating the annexation of three parcels totaling approximately 43.68 acres. Additionally, the Applicant is requesting approval to subdivide the 43.68-acre site into 152 residential lots and seven letter lots. DTSC recommends and requests consideration of the following comments:

1. When agricultural crops and/or land uses are proposed or rezoned for residential use, several contaminants of concern (COCs) can be present. The Lead Agency shall identify the amounts of Pesticides and Organochlorine Pesticides (OCPs) historically used on the property. If present, OCPs requiring further analysis are dichloro-diphenyl-trichloroethane, toxaphene, and dieldrin. Additionally, any level of arsenic present would require further analysis and sampling and must meet approved local area baselines or

thresholds. If they do not, remedial action must take place to mitigate them below those thresholds. Additional COCs may be found in mixing/loading/storage areas, drainage ditches, farmhouses, or any other outbuildings and should be sampled and analyzed. If smudge pots had been routinely utilized, additional sampling for Polycyclic Aromatic Hydrocarbons and/or Total Petroleum Hydrocarbons may be required. These recommendations should be adhered to and become part of the environmental document. Please refer to the [DTSC's Human and Ecological Risk Office \(HERO\) webpage](#) for the most recent guidance and screening levels.

2. DTSC recommends all imported soil/fill material be tested to ensure all COCs meet screening levels as outlined in [DTSC's Preliminary Endangerment Assessment \(PEA\) Guidance Manual](#). Furthermore, DTSC advises referencing the [DTSC Information Advisory Clean Imported Fill Material Fact Sheet](#) if importing soil/fill is necessary. To minimize the possibility of introducing contaminated soil/fill material, there should be documentation of the origins of the soil/fill material and, if applicable, sampling be conducted to ensure that the imported soil/fill material is suitable for the intended land use. The sampling should include analysis based on the source of the soil/fill and knowledge of prior land use.
3. The City of San Jacinto should consider soil testing as mentioned in comment #1. If, in the event any COC results are above DTSC residential screening levels, DTSC recommends the City of San Jacinto address the contaminations within the Project area through an Environmental Site Assessment and/or receive oversight from a [self-certified local agency](#), DTSC or Regional Water Quality Control Board. If entering into one of DTSC's voluntary agreements, please note that DTSC uses a single standard Request for Lead Agency Oversight Application for all agreement types. Please apply for DTSC oversight using this link: [Request for Agency Oversight Application](#). Submittal of the online application includes an

agreement to pay costs incurred during agreement preparation. If you have any questions about the application portal, please contact the relevant [Regional Brownfield Coordinator](#) for your Project.

4. If buildings or other structures are to be demolished on any Project sites included in the proposed Project, surveys should be conducted for the presence of lead-based paints or products, mercury, asbestos containing materials, and polychlorinated biphenyl caulk. Removal, demolition, and disposal of any of the above-mentioned chemicals should be conducted in compliance with California environmental regulations and policies. In addition, sampling near current and/or former buildings should be conducted in accordance with [DTSC's PEA Guidance Manual](#).

DTSC would like to thank you for the opportunity to comment on the MND for the Kasbergen Single Family Subdivision. Thank you for your assistance in protecting California's people and environment from the harmful effects of toxic substances. If you have any questions or would like clarification on DTSC's comments, please respond to this letter or via our [CEQA Review email](#) for additional guidance.

Sincerely,

Dave Kereazis
