RE: Phase I Environmental Site Assessment
2226 and 2240 Fleetwood Drive
APN #s 178-350-024, -029 and -030
Jurupa Valley, California 92509

1.0 INTRODUCTION

This report presents the results of our Phase I Environmental Site Assessment performed on the subject property known as 2226 and 2240 Fleetwood Drive, APN#'s 178-350-024, -029, -030 in the City of Jurupa Valley and County of Riverside, California. Authorization for this assessment performed on the subject property was given by Ms. Rita Jankouzian

Report Organization

This report is divided into sections that discuss the field investigation, government records search, regulatory agency contacts and recommendations. Appendices follow the text.

1.1 Purpose and Scope of Work

The purpose of a Phase I Environmental Site Assessment is to attempt to discover past or present environmentally related events that may negatively impact the subject property. The research includes a search of available records concerning the property and the performance of an on-site inspection. Procedures followed in the performance of a Phase I Environmental Site Assessment include executing a government records search, researching various permits for the site, interviewing the occupants of the subject property and/or neighboring sites in close proximity, reviewing historical aerial photographs, obtaining supporting documents from regulatory agencies and conducting a physical survey of the subject property.

1.2 Involved Parties/Information Sources

The *Property Consultants* Phase I Environmental Site Assessment is produced through the efforts of an Environmental Professional working in conjunction with Federal, State and County regulatory agencies. These government agencies are contacted based on their involvement with the property in question. Agencies may not be accessed based on the operations, or lack there of, conducted on the subject site. Attempts will be made to interview the property owner and/or present and past occupants of the subject site. Their description of past activities conducted on the subject property is an important addition to the historical uses of the property. The information obtained from these interviews will be relied upon as accurate, but will be compared to historic documents and photographs for authentication and verification.

The field investigation includes a site assessment, observations of the neighboring facilities and verification of building permits and other records, as necessary. This review was performed by James W. McElroy, an Environmental Professional Assessor. The site visit was performed on Monday, January 10, 2022.

2.0 PRINCIPAL FINDINGS

Based upon a review of all available government regulatory agency records, the site history, the land use, the review of historical aerial photographs and a physical inspection, there were no recognized environmental conditions (RECs) identified during the course of this Phase I Environmental Site Assessment.

History

As far back as 1931 to approximately 1938 the subject property was utilized as part of a citrus orchard. From the early 1940s to present the subject property has been identified as three graded unimproved parcels. Currently, the two parcels to the north are a combined 1.96-acres (each 0.98-acre) in size and have gravel and dirt surfaces, natural vegetation and trees bordering Fleetwood Drive to the west. These two rectangle shaped parcels are identified as 2226 Fleetwood Drive and the County of Riverside Assessor as APN #s 178-350-029 and -030. The irregular shaped parcel to the south consists of 4.27-acres in size and is identified as 2240 Fleetwood Drive. This parcel consists of dirt and gravel surfaces, natural vegetation and trees bordering the west side and southeast corner. There was one small portable office trailer located on the northwest corner of the site.

According to information gathered during this investigation the only known tenant was located at 2240 Fleetwood Drive. From 2005 to present, United Traveling Driving School, a truck and bus driving school has been the tenant. Use of a small portable office trailer located on the northwest corner of the site is used for administrative offices and classroom training. There was no evidence found that 2226 Fleetwood Drive has been occupied.

Site Observation

Currently, the two parcels to the north (2226 Fleetwood Drive) were observed to be vacant. It appears that recently these parcels were partially graded with new gravel and sand surfaces. There was no evidence of hazardous materials, petroleum products or hazardous waste storage on either of the two parcels. In addition, there was no staining on any of the surfaces indicating a release had occurred from dumping. Bordering the subject property was a chain link fence.

The parcel to the north (2240 Fleetwood Drive) was occupied by a bus and driving school. It appears that 90 % of all surfaces were dirt and gravel surfaces. There was no evidence of hazardous materials, petroleum products or hazardous waste storage by this current tenant. In addition, there was no staining on any of the surfaces indicating a release had occurred. Bordering the subject property was a chain link fence.

There was no evidence of any underground storage tanks (USTs), above ground storage tanks (ASTs), surface drains or industrial clarifiers located on the subject property. There were no current environmental concerns identified during the site visit.

Government Records Search (EDR)
The subject property 2226 and 2240 Fleetwood Drive are not listed in any of EDR Radius Map Report's databases searched.

There were very few sites in the vicinity of the subject property that were identified in one or more of the databases searched in the EDR Radius Map Report. All of these records were reviewed and no information was identified which indicated that any of these listed off-site properties represented an environmental concern to the subject property.

Vapor Encroachment Condition (VEC)
In our opinion, none of the listed sites in EDR Radius Map Report's databases pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but the medium affected was the soil only and the site is beyond the critical distance of 100-feet, or the site location and/or plume of contamination is excess of the critical distance of 100-feet from the subject property. Thus, a VEC can be ruled out. A VEC does not or is not likely to exist at the subject property.

Current RECs, HRECs and CRECs
In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions (RECs). The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the subject property or into the ground, ground water, or surface water of the subject property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions. *Property Consultants* did not identify any current RECs during the course of this assessment.

A historical recognized environmental concern (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by regulatory authority, without subjecting the

property to any required controls (e.g. property use restrictions, AULs, institutional controls, or engineering controls). This assessment has revealed no evidence of HRECs in connection with the subject property.

A controlled recognized environmental concern (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (property use restrictions, AULs, institutional controls, or engineering controls). This assessment has revealed no evidence of CRECs in connection with the subject property.

Government Agencies

The County of Riverside Department of Environmental Health was contacted for information regarding Hazardous Waste, Underground Storage Tanks (UST), Above Ground Storage Tanks (AST), Hazardous Material Disclosures and Accidental Releases in relation to the subject property. An email response by this Agency indicated they show not records for the subject property. A copy of this email response can be viewed in the following Appendices.

The Santa Ana Regional Water Quality Control Board was contacted for information regarding the subject property for USTs, leaking USTs or groundwater releases. An email response by this Agency indicated they show not records for the subject property. A copy of this email response can be viewed in the following Appendices.

The South Coast Air Quality Management District (SCAQMD) was contacted for information regarding the subject property for issued Permits to Operate and noncompliance violations. An email response from this Agency did not find any requested information in their archives. A copy of this email response can be viewed in the following Appendices.

A review of the GEOTRACKER website made available by the California Regional Water Quality Control Board (CRWQCB) for database information regarding the subject property for Leaking Underground Storage Tanks (LUSTs), Underground Storage Tanks (USTs), Clean-ups, Land Disposal, Military, WDR and Department of Toxic Substance Control (DTSC) permits. The subject property was not identified in any of the databases listed by this Agency. In addition, there is no evidence of any listed sites located adjacent or up gradient from the subject property that has posed an environmental threat.

Data Gap

Property Consultants has performed this Phase I Environmental Site Assessment on historical information dating back to 1931 to present. The content of the report is thorough and has no significant data gaps that would affect the integrity of the report.

User Provided Information

Per ASTM E 1527-13, Section 6.2, the USER is required to provide and/or report the environmental professional any environmental liens or activity and use limitations (AULs) so identified for the subject property. The environmental professional per ASTM is not responsible to undertake a review of recorded land title records and judicial records for environmental leans or AULs.

A preliminary Title Report was not provided to *Property Consultants* by the user.

The user did not request *Property Consultants* to coordinate with a title company or title professional to undertake a review of Recorded Title records and judicial records for environmental liens or AULs.

Therefore, no title records were searched and no information was provided for environmental liens or AUL which is the responsibility of the User.

The property owner, operator and tenants provided no information or response regarding specialized knowledge, actual knowledge, experience, or commonly known and reasonably ascertainable information within the local community concerning recognized environmental conditions at the subject property.

Per ASTM standard, in a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for significantly lower price which does not reasonably reflect fair market value if the property was not contaminated, and make a written record as such. The ASTM standard does not require that real estate appraisal be obtained on order to ascertain fair market of the property.

This report was prepared by *Property Consultants* for a potential property purchase.

This report is intended to satisfy the requirements of a Phase I Environmental Site Assessment as outlined in the ASTM standards. This standard is intended to define the scope of due diligence necessary in a real estate transaction to provide for the "innocent buyer's defense" under the SARA amendments to CERCLA, and to establish a level of comfort for potential purchasers and their lending institutions concerning the environmental integrity of the property in question.

3.0 SITE OVERVIEW

3.1 Location

The subject property is situated on the east side of Fleetwood Drive, located approximately 0.82-mile southeast from the main intersection of Rubidoux

Boulevard and Market Street, in the City of Jurupa Valley and County of Riverside, California. The immediate surrounding area is a mixture of commercial, light industrial, unimproved and residential properties.

3.2 Adjacent Properties

Location	Adjacent Properties
North	**2200 Fleetwood Drive** Southern Stretch Forming (SSF), provide close-tolerance stretch forming of lineal materials.
West	**An unimproved parcel and 2285 Fleetwood Drive** C-Thru Industries, Inc., sunrooms and solariums contractors.
East	**Natural Vegetation, a dry river bed and beyond is the Santa Ana River**
South	**2304 Fleetwood Drive** Walker Evans Enterprises, an automotive service and repair shop of custom shocks and wheels.

No environmentally unsafe leakage, spillage, discharges or emissions were noted emanating from any adjacent properties during the site visit. None of these adjacent sites appear to have had an unauthorized release of hazardous materials, petroleum products of hazardous waste that may have posed an environmental threat to the subject property.

3.3 Site Description

The subject property consists of three unimproved parcels. All three parcels consist of dirt, gravel, natural vegetation and trees bordering the west side and southeast corner. All parcels are enclosed with a chain link fence and gate. The main entrance to these parcels is the west side. There were no permanent signs of structures. The parcel to the south had a small portable office structure.

3.4 Discharge/Disposal of Solid and/or Liquid Wastes

Septic Tanks and Cesspools - Septic tanks and cesspools are often associated with the disposal of wastewater from structures that are not served by public sewer systems. Septic tanks and cesspools may be associated with hazardous materials, if such materials have been inappropriately disposed of in the past via sinks. Information obtained from the site reconnaissance indicated that septic tanks and cesspools do not currently exist and have not existed on the subject property.

Pits, Ponds, and Lagoons - Pits, ponds and lagoons are often associated with the disposal of solid and liquid wastes, which may include hazardous materials. Information obtained from the site assessment indicated that pits, ponds, and lagoons do not currently exist on the property. Based on the review of historical

records of the subject site, it is very unlikely that pits, ponds or lagoons have ever existed on the property.

Wells, Cisterns, Clarifiers and Sumps – There was no evidence of wells, cisterns, clarifiers or sumps located on-site. In addition, there was no evidence of any exterior surface drains.

3.5 Utility Company Transformer Investigation

In 1976, the *United States Environmental Protection Agency* (US EPA) banned the manufacture and sale of poly-chlorinated biphenyls (PCB)-containing transformers. Prior to this date, transformers were frequently filled with dielectric fluid containing PCB-laden oil. By 1985, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling and remove combustible materials within 5.0 meters (40 Code of Federal Regulations 761.30: "Fire Rule").

The US EPA has the following categories for PCB-containing transformers:

- Non-PCB Containing Transformer, if less than 50 ppm PCB;
- PCB-Contaminated Transformer, if between 50 and 499 ppm PCB, and it must conform to the US EPA Fire Rule for disposal;
- PCB-Transformer, if greater than 500 ppm PCB.

There was no evidence of pole or pad-mounted electrical transformers located on the subject property.

3.6 Asbestos Materials in Structures

Asbestos-containing building materials were widely utilized in structures built between 1945 and 1980. Common asbestos containing building materials include vinyl flooring and associated mastic, wallboard and associated joint compound, plaster, stucco, acoustic ceiling spray, ceiling tiles, heating system components and roofing materials. Commercial/industrial structures are affected by asbestos regulations if damage occurs or if remodeling, renovation or demolition activities disturb asbestos containing building materials. There were no permanent structures occupying the subject property.

3.7 Lead-Based Paint in Structures

Leaded based paint was primarily utilized from the 1920s-1978. If the property in question is used as a dwelling, regulations are in effect that require identifications of lead-based paint. Commercial/industrial structures are affected by lead-based paint regulations if damage occurs or if remodeling, renovation or demolition activities disturb lead-based paint surfaces. There were no permanent structures occupying the subject property.

3.8 Radon Gas

Radon is a radioactive gas that occurs naturally in the environment and cannot be seen, smelled or tasted. The human health effect associated with exposure to elevated levels of radon is an increased risk of developing lung cancer. The *US Environmental Protection Agency* (US EPA) and the *US Center for Disease Control* are concerned about the increased risk of lung cancer developing in individuals exposed to above average levels of radon in their homes or offices. In order to address these concerns, the US EPA conducted a radon survey and presented the results for various counties in 1993.

The EPA's map of Radon Zones assigns each of the 3,141 counties in the United States to one of three zones. The zone designations were determined by assessing five factors that are known to be important indicators of radon potential: indoor radon measurements, geology, aerial radioactivity surveys, soil parameters and foundation types. The subject property falls within the designation of Zone 3. Zone 3 counties have a predicted average indoor radon screening level of less than two picocuries per liter (pCi/l) of air. Based on the results of the survey, the subject property appears to be below the recommended EPA Action Level of four pCi/l. Based upon these results, radon is unlikely to adversely impact the subject property.

4.0 SITE HISTORY AND OPERATIONS

4.1 Site History

As far back as 1931 to approximately 1938 the subject property was utilized as part of a citrus orchard. From the early 1940s to present the subject property has been identified as three graded unimproved parcels. Currently, the two parcels to the north are a combined 1.96-acres (each 0.98-acre) in size and have gravel and dirt surfaces, natural vegetation and trees bordering Fleetwood Drive to the west. These two rectangle shaped parcels are identified as 2226 Fleetwood Drive and the County of Riverside Assessor as APN #s 178-350-029 and -030. The irregular shaped parcel to the south consists of 4.27-acres in size and is identified as 2240 Fleetwood Drive. This parcel consists of dirt and gravel surfaces, natural vegetation and trees bordering the west side and southeast corner. There was one small portable office trailer located on the northwest corner of the site.

According to information gathered during this investigation the only known tenant was located at 2240 Fleetwood Drive. From 2005 to present, United Traveling Driving School, a truck and bus driving school has been the tenant. Use of a small portable office trailer located on the northwest corner of the site is used for administrative offices and classroom training. There was no evidence found that 2226 Fleetwood Drive has been occupied.

4.2 Sanborn Map Review

Due to limited historical coverage of the subject property Sanborn Map coverage was not available for this report.

4.3 Historical Aerial Photograph Review

Historical aerial photographs were specifically examined for evidence of hazardous materials, as well as on and off-site features that may affect the environmental quality of the property. These features included sumps, pits, ponds, lagoons, aboveground tanks, landfills, outside storage of hazardous materials and general land use.

Eighteen historical aerial photographs were reviewed. None of the above anomalies mentioned above were identified to be on the property.

Photograph Dates	Description
1931 and 1938	The subject property and its vicinity consist of a citrus grove. Bordering the subject property to the southeast is a dry creek bed. Located 0.18-mile north is Wilson Street.
1949, 1953, 1959 & 1967	The citrus grove has been removed and the subject property appears as unimproved land. Graded unimproved land with natural vegetation describes the immediate vicinity. The dry creek bed remains present to the southeast. Observed 300 feet to the east is the Santa Ana River. Scattered residential dwellings are depicted to the north of the subject property.
1975, 1978 & 1985	The subject property appears to have been graded and has its current irregular shape. Bordering to the west is Fleetwood Drive, a paved street. The adjacent property to the north is developed with a commercial structure. Via Ricardo is located approximately 0.07-mile northwest. Directly east is an unimproved parcel and the dry creek bed mentioned previously. The Santa Ana River remains present to the east.
1989 & 1990	The subject property remains unchanged. Scattered commercial structures are developed within the vicinity of the subject property.
1994 & 1995	The subject property remains unchanged. Increasing commercial development is observed throughout the photographs.
2002, 2005 & 2009	The subject remains unchanged. Increasing commercial developments are observed throughout the vicinity.
2012 & 2016	The subject property and its vicinity are observed as their current configurations. Most of the unimproved parcels have been replaced with commercial developments.

4.4 Operations

As a result of all historical operations, there is no evidence or information reviewed that identifies any RECs or environmental concerns.

4.5 Operational Permits, Manifests and Material Safety Data Sheets

EPA ID Number - An EPA ID number identifies a facility to the State and Federal governments as a hazardous waste generator. There is no evidence of any historical tenants being assigned an EPA ID number.

Hazardous Waste Manifests - A hazardous waste manifest file is maintained when hazardous materials are transported and disposed of from a site. There was no hazardous waste generation or storage observed on-site.

Air Emissions - The *South Coast Air Quality Management District (SCAQMD)* issues permits for sites that are emitting hazardous waste into the atmosphere from their operations. Based on the present status of the subject property there was no current source of air emissions observed on-site.

Material Safety Data Sheets (MSDS) - Material Safety Data Sheets are required for chemicals and products being used in businesses that may be of a hazardous nature. There were no MSDS Sheets made available to *Property Consultants* during the site visit.

5.0 ENVIRONMENTAL SETTING

5.1 Regional Physiographic/Geology

The subject property is at an approximate elevation between 867 to 873 feet above mean sea level, as recorded by the US Geological Survey maps. The land around the subject property slopes gradually to the southeast, towards the Santa Ana River located approximately 300 feet east. The Santa Ana River flows in a northeast to southwest direction.

The subject property lies in the central portion of the Peninsular Ranges Geomorphic Province which is bounded on the north by the Transverse Ranges Province and the east by the Colorado Desert Province (Geomorphic Map of California, 1938, California Division of Mines and Geology). The nearest active faults include the Casa Loma Fault, San Jacinto Fault and the Wildomar Fault, which are located approximately 17 miles southeast, 6 miles northeast, and 14 miles southwest of the subject property, respectively (Fault Activity Map of California and Adjacent Areas, 1994, California Division of Mines and Geology). The site is underlain by alluvial deposits of Pleistocene age composed of silt, sand, and gravel (Geologic Map of California Santa Ana Sheet, 1966, California Division of Mines and Geology).

5.2 Site Hydrogeology

The subject site lies within the Chino II Groundwater Basin within the Upper Santa Ana River Watershed (Water Quality Control Plan, 1995, California Regional Water Quality Control Board).

A review of a 2005 3rd Quarter Groundwater Monitoring Report by SECOR, dated November 11, 2005, indicated that the Fleetwood Homes site located 958 feet northwest had a release of gasoline and its constituents into the soils and possibly the groundwater beneath this site. All contaminated soils were excavated at 19 feet bgs. One groundwater monitoring well was installed at this site, which testing found non-detected results of gasoline contaminants. Groundwater was encountered at this site at 75.52 feet bgs. and was estimated to flow to the southeast towards the Santa Ana River. Based on the remediation of the soils and the review of SECOR's 2005 3rd Quarter Groundwater Monitoring Report's non-detected results for gasoline and its constituents, the County of Riverside Department of Environmental Health issued closure to the Fleetwood Homes site on June 4, 2010. This information was reviewed on the GeoTracker website.

5.3 Surface Water Resources and Drainage

There is a slight downgradient slope in the vicinity of the subject property to the southeast. Surface waters flow in a predominately southern direction via concrete street gutters. The water then empties into flood control channels, located approximately 1.24-mile southeast.

5.4 Groundwater Conditions

Groundwater in the immediate vicinity is known to be at an approximate of 75.52 feet (bgs.) according to information reviewed on the GEOTRACKER website. Groundwater in the vicinity is estimated to flow to the southeast towards the Santa Ana River. There were no tests found of the groundwater directly under the subject property. Based upon the type of uses of the subject property, contamination of the groundwater does not present a current environmental concern.

5.5 Soil Conditions

There were no soil reports in the *City of Jurupa Valley* records. There were no obvious discolorations of the soils or stressed vegetation on the subject property. The gradient seemed consistent throughout and there were no unusual appearing stains, mounds, contours or anomalous conditions on the ground surfaces that would indicate any foreign materials were dumped on the site.

5.6 Earthquake Faults

Mapping information, as published by the *State of California Department of Conservation, Division of Mines and Geology*, was referenced to determine if the property in question is part of any special studies zone as defined by the Alquist-Priolo Earthquake Fault Rupture Hazard Act of 1972, a mandatory study of active

faults in California. An active fault zone is described as having had a surface displacement within the Holocene Period (within the last approximate 11,000 years). The subject property is not situated in a known active fault zone. The closest known earthquake fault the Colton-Rialto Fault, located approximately 2.0-miles east of the subject property.

5.7 Flood Zone Information

The *Federal Emergency Management Agency* (FEMA) has designated and mapped areas in which 100-year flood events have had an impact.

Based on mapping information, the property in question is not in a designated 100-year flood zone.

5.8 Wetlands Designation

Wetlands is a collective term for marshes, swamps and similar areas. The Clean Water Act (1972), Section 404, establishes federal authority to regulate activities in wetlands. Many areas have been designated as wetlands; however, some land has yet to be assessed. In the immediate vicinity of the property in question, the surrounding sites are utilized as paved and covered commercial/industrial sites. According to mapping information (*US Department of Fish and Game*, undated), the site and the immediate surrounding area is not designated, or likely to be deemed, as a wetland.

5.9 Oil and Gas Wells

Oil and gas wells are potential concerns when they seep oil or gas, are not abandoned to current regulations or have associated surface contamination. They may also be associated with methane hazards. Unreported "wildcat" oil wells could be on or near the site.

Oil and gas field maps published by the California Division of Oil, Gas & Geothermal Resources (DOGGR) were reviewed for the property. The purpose of this review was to determine the possible presence of current or past oil and/or gas wells that could impact the property. Potential sources of hazardous wastes associated with the oil field operations include drilling fluids, crude oil spills, sump bottoms, waste oil, wastewater lines and improper well abandonment.

Based on a review of oil and gas mapping, no plugged, abandoned or active oil and/or gas wells are located on or adjacent to the subject property.

5.11 Historic Pesticide Usage

There are no reported pesticide/insecticide/herbicide contamination problems associated with the soil or groundwater in the vicinity of the subject property.

6.0 RESULTS OF INVESTIGATION

6.1 Site Inspection Observations

Currently, the two parcels to the north (2226 Fleetwood Drive) were observed to be vacant. It appears that recently these parcels were partially graded with new gravel and sand surfaces. There was no evidence of hazardous materials, petroleum products or hazardous waste storage on either of the two parcels. In addition, there was no staining on any of the surfaces indicating a release had occurred from dumping. Bordering the subject property was a chain link fence.

The parcel to the north (2240 Fleetwood Drive) was occupied by a bus and driving school. It appears that 90 % of all surfaces were dirt and gravel surfaces. There was no evidence of hazardous materials, petroleum products or hazardous waste storage by this current tenant. In addition, there was no staining on any of the surfaces indicating a release had occurred. Bordering the subject property was a chain link fence.

There was no evidence of any underground storage tanks (USTs), above ground storage tanks (ASTs), surface drains or industrial clarifiers located on the subject property. There were no current environmental concerns identified during the site visit.

6.2 Site Records Review

There were no site records made available during the site visit for use in this report.

6.3 Synopsis of Previous Environmental Investigations

There were no previous environmental investigations made available to *Property Consultants* for use in this report.

6.4 Personal Interviews

A personal interview was conducted during the site visit with Mr. Juan Covarrubias with Daum Commercial. He is the commercial broker representing the buyer of the subject property. Mr. Covarrubias was unaware of any hazardous chemical spills, USTs or any environmentally related liens associated with the subject property.

6.5 Regulatory Agency Contacts

6.5.1 City of Jurupa Valley Water District

The *City of Jurupa Valley Water District* was contacted concerning the source of water supplied to the subject site. A customer service representative stated that he operates three water wells ranging from 185 to 1,230 feet in depth. The wells are drilled through shallower aquifers at about 250 to 400 feet. Eighty percent of all potable water delivered to the vicinity of the subject property is from these wells. The remaining twenty percent is imported water.

All the water is chlorinated and filtered at the wellhead, fluoridated and put into the distribution system. Some of the water goes into a reservoir for storage. All water supplied to the end user meets the State of California Drinking Water Standards.

6.5.2 City of Jurupa Valley Building Department

A permit research was conducted at the City of Jurupa Valley Building Department offices. A Response by this Agency indicated that there were no building permit information or plans identified in their archives.

6.5.3 County of Riverside Department of Environmental Health

The County of Riverside Department of Environmental Health was contacted for information regarding Hazardous Waste, Underground Storage Tanks (UST), Above Ground Storage Tanks (AST), Hazardous Material Disclosures and Accidental Releases in relation to the subject property. An email response by this Agency indicated they show no records for the subject property. A copy of this email response can be viewed in the following Appendices.

6.5.4 Santa Ana Regional Water Quality Control Board

The Santa Ana Regional Water Quality Control Board was contacted for information regarding the subject property for USTs, leaking USTs or groundwater releases. An email response from this Agency did not find any requested information in their archives. A copy of this email response can be viewed in the following Appendices.

6.5.5 South Coast Air Quality Management District

The South Coast Air Quality Management District (SCAQMD) was contacted for information regarding the subject property for issued Permits to Operate and noncompliance violations. An email response from this Agency did not find any requested information in their archives. A copy of this email response can be viewed in the following Appendices.

6.5.6 GEOTRACKER (website)

A review of the GEOTRACKER website made available by the California Regional Water Quality Control Board (CRWQCB) for database information regarding the subject property for Leaking Underground Storage Tanks (LUSTs), Underground Storage Tanks (USTs), Clean-ups, Land Disposal, Military, WDR and Department of Toxic Substance Control (DTSC) permits. The subject property was not identified in any of the databases listed by this Agency. In addition, there is no evidence of any listed sites located adjacent or up gradient from the subject property that pose any environmental threat.

7.0 SUMMARY OF GOVERNMENT RECORDS SEARCH

NOTE: This government records summary is based on the ASTM Standard for investigating properties near the subject property. The ASTM Standard has defined these sites as being at various distances (based on each individual list). Other sites more distant in proximity may be listed but not considered critical and, therefore, not further investigated.

SEMS: This is a list compiled by the *US Environmental Protection Agency* (EPA) for designation under the Federal SUPERFUND Program as sites representing an environmental concern for the discharge of hazardous wastes. There are no SEMS (CERCLIS) sites listed as being within a 0.50-mile radius of the subject property.

NFRAP: There are no NFRAP sites listed as being within a 0.50-mile radius of the subject property.

NPL: This is a National Priority List compiled by the EPA. The sites on this list are prioritized as to their significant risks to human health and the environments. Only NPL sites can receive CERCLA funding. There are no NPL sites listed as being within a 1.0-mile radius of the subject property.

INDIAN: There are no INDIAN TRIBAL LUST/VCP/UST sites listed as being within a 0.50-mile radius of the subject property.

SWIS: The *California Waste Management Board* maintains this list of active, inactive and closed solid waste disposal and transfer facilities. There are four SWIS sites listed as being within a 0.50-mile radius of the subject property. The following SWIS site is located within 0.25-mile radius from the subject property:

RIOS RECYCLING FACILITY 5190 WILSON ST .17 mile NE

This SWIS site is a recycling plant of hard items and does not except liquids or hazardous wastes. This SWIS site does not appear to have posed an environmental threat to the subject property.

LUST: The LUST list indicates leaks of hazardous substances from underground storage tanks and provides information on the extent to which the soil and groundwater have been affected. There are three LUST sites listed as being within a 0.50-mile radius of the subject property. The following LUST site is located within 0.25-mile radius from the subject property.

FLEETWOOD MOTOR HOME 5300 VIA RICARDO DR .11 mile NW

A review of a 2005 3rd Quarter Groundwater Monitoring Report by SECOR, dated November 11, 2005, indicated that the Fleetwood Homes site located 958 feet northwest had a release of gasoline and its constituents into the soils and possibly the groundwater beneath this site. All contaminated soils were excavated at 19 feet bgs. One groundwater monitoring well was installed at this site, which testing found non-detected results of gasoline contaminants. Groundwater was encountered at this site at 75.52 feet bgs. and was estimated to flow to the southeast towards the Santa Ana River. Based on the remediation of the soils and the review of SECOR's 2005 3rd Quarter Groundwater Monitoring Report's non-detected results for gasoline and its constituents, the County of Riverside Department of Environmental Health issued closure to the Fleetwood Homes site on June 4, 2010. This information was reviewed on the GeoTracker website.

VCP: There are no VOLUNTARY CLEANUP PROGRAM sites listed as being within a 0.50-mile radius of the subject property**.**

TSD: The TSD list is a list generated by the EPA for sites that store, treat dispose or incinerate hazardous waste. There are no TSD sites listed as being within a 0.50-mile radius of the subject property.

RCRA: Sites that generate hazardous waste are required to use EPA identification numbers. An EPA identification number does not indicate a problem with a site, but merely that they use or dispose of a minimum quantity of a hazardous waste. There are four RCRA sites listed within a 0.25-mile radius of the subject property.

WALKER EVAN GOODYEAR	**2304 FLEETWOOD DR**	**.03 mile SW**
FLEETWOOD MOTOR HOME	**5300 VIA RICARDO**	**.11 mile NW**
SIERRA ALUMINM COMP	**2345 FLEETWOOD DR**	**.11 mile SW**
DURA COAST PRODUCTS	**5361 VIA RICARDO**	**.16 mile NW**

These RCRA sites do not appear to pose any environmental threat to the subject property.

TRIS: The SARA Title III list contains facilities which are required by the *Environmental Protection Agency* to report releases of toxic chemicals to the air, water and land under Section 313 of the Emergency Planning and Community Right to Know Act contained in the SUPERFUND Amendments and Reauthorization Act of 1986. There are no TRIS sites listed as being within a 0.20-mile radius of the subject property.

UST: The *State of California Water Resources Control Board* (WRCB) in Sacramento provides a list of all permitted underground tanks containing hazardous substances. These sites are provided for information only. Any sites which are problematic are also found on the LUST (Leaking Underground Storage Tank) list and have been explained above as not being considered a problem for migratory contamination to the subject property. There are three registered Underground Storage Tank site listed within 0.25-mile of the subject property.

FLEETWOOD MOTOR HOME	**5300 VIA RICARDO**	**.11 mile NW**
ASR CONSTRUCTORS	**5230 WILSON ST**	**.14 mile N**
DURACOAT PRODUCTS	**5361 VIA RICARDO**	**.16 mile NW**

Based on current information reviewed, it is unlikely that these listed UST sites have posed a threat to the subject property with subsurface contamination. The subject property is not a listed UST site.

ERNS: ERNS is a national database retrieval system of Incident-Notification information, as initially reported by any party regarding incidents of reported releases of oil and hazardous substances. The information in this report combines data from the *United States Coast Guard National Response Center* database with data from the 10 EPA Regions. ERNS supports the release notification requirements of Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), as amended; Section 311 of the Clean Water Act; and Sections 300.51 and 300.65 of the National Oil and Hazardous Substances Contingency Plan. There are no ERNS sites listed within 0.20-mile of the subject property. The subject property is not a listed ERNS site.

8.0 CONCLUSIONS

8.1 Areas of No Apparent Concern

There was no apparent concern for migration of contaminants from any off-site sources to the subject property.

8.2 Areas of No Further Concern

There are no apparent areas of further concern regarding the current or historical uses of the subject property. There is no evidence of current RECs, HRECs or CRECs.

9.0 RECOMMENDATIONS

9.1 No Further Investigation

Property Consultants has found no evidence of any RECs that would affect the integrity of the subject property. *Property Consultants* does not warrant any further environmental investigations at this time.

10.0 LIMITATIONS

This report is intended to satisfy the requirements of a Phase I Environmental Site Assessment as outlined in the ASTM standards. This standard is intended to define the scope of due diligence necessary in a real estate transaction to provide for the "innocent buyer's defense" under the SARA amendments to CERCLA, and to establish a level of comfort for potential purchasers and their lending institutions concerning the environmental integrity of the property in question.

The findings set forth in this Phase I Environmental Site Assessment are strictly limited in time and scope to the date of evaluation(s). Government records searched are limited to the accuracy of the agency prepared lists. The conclusions presented in the report are based solely on the services described therein and not on scientific tasks or procedures beyond the scope of the agreed upon Phase I Environmental Site Assessment. It is hereby acknowledged that, within the scope of this survey, no level of assessment can ensure the real property is completely free of chemicals or toxic substances.

The public records search was conducted with available Federal, State, County and City agency departments, according to recognized procedures and current availability of records. Conclusions resulting from these searches are solely a result of the same. *Property Consultants* assumes no responsibility for events that are not part of these public records.

Property Consultants has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of 2226 and 2240 Fleetwood Drive, Jurupa Valley, California 92509, the property. There are no exceptions to, or deletions from, this practice. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR §312.10. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR §312.

Property Consultants

James W. McElroy
Principal/Environmental Professional

RESUME
James W McElroy
Principal/Environmental Professional

Mr. McElroy has worked in the environmental service industry since 1998. He initially developed and serviced major lending and financial institutions, commercial brokers, REETS, developers and property owners with Phase I Environmental Site Assessments, Transaction Screen Assessments (TSA), Phase II Environmental Site Assessments, government records search reviews and preliminary site screenings. In late 2001, Mr. McElroy developed a partnership with qualified registered environmental assessors (REAs) and started Property Consultants. In 2010, Mr. McElroy qualified as an Environmental Professional became sole owner of Property Consultants and has maintained since then a quality customer base serving California, Nevada and Arizona. As owner and Project Manager for Property Consultants, Mr. McElroy oversees annually a combined total of 120 to 150 environmental assessments, report reviews and subsurface investigations for commercial, industrial, retail, automotive, office, dry cleaners, plating and circuit board industries.

Project Experience:

AEF Ostlund Equities, LLC.
Property Consultants has performed several Phase I and II Environmental Site Assessments for this entity's portfolio. In addition, performs environmental property searches for their potential real estate transactions.

Pioneer Circuits
Performed a Phase I and Phase II Environmental Site Assessment on a circuit board manufacturing site for a potential real estate purchase.

JD Holdings, LLC.
Performed a Phase I Environmental Site Assessment on a shopping center plaza in Palm Desert, California.

Andre Landscape Services, Inc.
Performed several Phase I Environmental Site Assessments for new nursery locations though out Southern California.

JD Holdings. LLC.
Performed an extensive Phase I Environmental Site Assessment on 5.6 acres of rural unimproved land in Riverside County for development.

Heitman Holdings
Performed several Phase I Environmental Site Assessments for Mr. Fred Heitman's real estate portfolio.

Professional Experience:

1998
S & S Commercial Environmental Services
Developed and maintained accounts promoting environmental services.

2000
NATEC, International, Inc.
Developed and maintained accounts promoting environmental services. In addition, assisted in site visits and report preparations.

2001 to Present
Property Consultants
Mr. McElroy is the founder and current principal of Property Consultants. His experiences in the environmental filed for the past twenty years qualifies him as an Environmental Professional. He has developed a customer base that includes financial institutions, major banks, developers and commercial brokers throughout the southwest. James has assisted in over 1,800 site investigations and has written over 1,600 Phase I Environmental Site Assessments and Transaction Screen Assessments. He is also project manager for all Phase II Environmental Site Assessments performed by Property Consultants.

Education:

Mr. McElroy has a Bachelor of Arts and Sciences in Business Administration from San Diego State University.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 4 SWF/LF sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NPDES: A listing of NPDES permits, including stormwater.

A review of the NPDES list, as provided by EDR, and dated 05/10/2021 has revealed that there is 1 NPDES site within approximately 0.001 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
INLAND EMPIRE LIMOUS Facility Status: Active	***2200 FLEETWOOD DRIVE***	***0 - 1/8 (0.000 mi.)***	***A3***	***9***

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 08/30/2021 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
INLAND EMPIRE LIMOUS	***2200 FLEETWOOD DRIVE***	***0 - 1/8 (0.000 mi.)***	***A3***	***9***

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 10/18/2021 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RB Case Number:	Not reported
Local Agency:	RIVERSIDE COUNTY LOP
File Location:	Local Agency
Local Case Number:	200420231
Potential Media Affect:	Soil
Potential Contaminants of Concern:	Gasoline
Site History:	Site History/Release Information Two 2,000 gallon gasoline USTs were removed along with associated piping and fuel dispensers in November 2003. Soil samples were collected beneath the dispensers at 2 feet and 5 feet bgs, beneath piping, adjacent to and west of the USTs at 6 feet bgs, and within the UST cavity at 2 feet and 6 feet bgs. Maximum concentrations were 3780 ppm TPHg (T2-6), 520 ppb B (T2-6), 52600 ppb T (T2-6), 20000 ppb E (T2-6), 522000 ppb X (T2-6), 46 ppb MTBE (LED2), ND<4000 ppb TBA (T2-6), 9.45 ppm lead (T2-6). Samples were analyzed for TPHg, BTEX and oxygenates. The site was placed into LOP on October 23, 2003 for further assessment. Assessment Two soil borings (SB-1 and SB-2) were advanced to groundwater (approximately 76 feet bgs) in the vicinity of the former USTs on April 16, 2004.

FLEETWOOD MOTOR HOMES OF CALIFORNIA (Continued) **S106387361**

Soil samples from SB-1 and SB-2 were collected at five-foot intervals to a maximum explored depth of 76.5 feet bgs. The highest concentrations were observed from soil samples collected from soil boring SB-1 (UST cavity) at the 15 and 20 foot depths. Maximum concentrations: 350 ppm TPHg (SB-1 at 20 feet bgs), 0.13 ppm B (SB-1 at 20 feet bgs), 5.6 ppm T (SB-1 at 20 feet bgs), 3.8 ppm E (SB-1 at 20 feet bgs), 35 ppm X (SB-1 at 20 feet bgs), 0.53 ppm MTBE (SB-1 at 15 feet bgs), 0.36 ppm tert-Butylbenzene (SB-1 at 20 feet bgs), 1.2 ppm Naphthalene (SB-1 at 20 feet bgs), 5.6 ppm 1,2,4-Trimethylbenzene (SB-1 at 20 feet bgs), 2.7 ppm 1,3,5-Trimethylbenzene (SB-1 at 20 feet bgs), ND<0.50 ppm Ethanol and Methanol. SVE Pilot Testing One vapor extraction well (VE-1) was installed on July 8, 2006 near the southeast corner of the former UST location. SVE well VE-1 was installed to 30 feet bgs and screened between 15 and 30 feet bgs. Soil samples were collected at 5 foot intervals and select samples were analyzed for gasoline and VOCs by EPA Method 8260B. Soil samples collected at 10, 20 and 30 feet bgs were analyzed and were ND for all constituents tested. A SVE pilot test was conducted July 12th through 14th, 2006. The SVE test was proposed for 5-days but was terminated after 48 hours due to a VOC breakthrough. PID readings reported during the SVE test were between 92 to >9999 ppmV and were believed to be erroneous. The consultant stated that laboratory analysis results for vapor samples were at relatively low levels and were inconsistent with field PID readings and more consistent with soil data. The overall mass of vapor phase gasoline recovered over the 48-hour duration of system operation was estimated at 34 lbs (average of 0.7 lbs per hour). Flow rates at VE-1 fluctuated between 50 and 75 cfm. Maximum vapor concentrations were: 740 ppmV TPHg (VE1-3), 2.5 ppmV B (VE1-3), 110 ppmV T (VE1-3), 23 ppmV E (VE1-3), 149 ppmV X (VE1-3), ND MTBE, 11 ppmV 1,2,4 TMB (VE1-3), 5.5 ppmV 1,3,5, TMB (VE1-3). Closure was requested based on the results of the pilot test and five quarters of groundwater monitoring RCDEH denied closure and required the 5-day SVE test to be repeated since vapor concentrations increased over time and the test was terminated after two days. A 5-day SVE pilot test using VE-1 was performed February 17th through 23rd, 2009. Flow rates at VE-1 were erroneously reported to fluctuate between 98 and 269.5 cfm and later corrected to range from 84 to 146 cfm. PID readings throughout the SVE test ranged from 40.4 to >15,000 ppmV. The ROI was calculated to include the entire footprint of the former UST cavity and dispensers. MW-1 is screened from 60 to 95 feet bgs and VE-1 is screened between 15 to 30 feet bgs. The overall mass of vapor phase gasoline recovered over the 143-hr duration of system operation was estimated at 233 lbs (avg of 1.6 lbs/hr). Maximum vapor concentrations were: 1100 ppmV TPHg, 0.97 ppmV B, 80 ppmV T, 20 ppmV E, 176 ppmV X, ND<0.28 ppmV MTBE, 0.94 ppmV isopropylbenzene, 2.4 ppmV n-propylbenzene, 0.24 ppmV PCE, 0.20 ppmV sec-butylbenzene, 11 ppmV 1,2,4-TMB, 5.7 ppmV 1,3,5-TMB. Ending vapor concentrations for most constituents detected were higher at the end of the 5-day SVE pilot test than at the beginning of the test. Based on the elevated vapor concentrations detected and mass of vapor phase gasoline recovered during the 5-day SVE pilot test, a 30-day SVE test was required by RCDEH to clearly demonstrate that vapor recovery has reached the point of diminishing returns (asymptotic levels). Soil Excavation Excavation of contaminated soil was proposed in lieu of performing additional SVE testing to expedite site cleanup. Approximately 3200 tons of impacted soil was excavated March 1st through March 23rd, 2010. Twelve (12) confirmation soil samples were

FLEETWOOD MOTOR HOMES OF CALIFORNIA (Continued) **S106387361**

collected at the bottom and side walls of the approximately 8192 square feet excavation pit. All soil samples were non-detect for all constituents tested except for 0.006 ppm Xylene and 0.006 ppm 1,2,4 TMB detected in the deep soil sample collected at the west wall of the excavation pit (X24 Deep Wall-W@ approximately 30 feet bgs). Groundwater Monitoring To assess the potential for groundwater impact near the UST, one groundwater monitoring well (MW-1) was installed on July 19, 2004 approximately 20 feet southeast of the former UST cavity that is believed to be downgradient. Soil samples were analyzed at 5 foot intervals from 5 feet to 75 feet bgs. MW-1 was advanced to a depth of 95.5 feet bgs and screened from 56 to 95 feet bgs. Groundwater was encountered at 75 feet bgs. Analytical results for the groundwater sample collected from MW-1 were non-detect for all constituents tested. Maximum soil concentrations were at 65 feet bgs: ND<0.5 ppm TPHg, ND<0.001 ppm B, 0.004 ppm T, 0.002 ppm E, 0.012 ppm X, 0.011 ppm MTBE, ND<0.002 ppm tert-BBNZ, ND<0.002 ppm Napthalene, ND<0.001 ppm 1,2,4-TMB, ND<0.001 ppm 1,3,5-TMB. Five groundwater sampling events were conducted from August 2004 through October 2007. Maximum groundwater concentrations: ND<0.50 ppm TPHg, ND<0.5 ppb B, 0.6 ppb T (10/17/07), ND<1.0 ppb E, ND<1.0 ppb X, ND<5.0 ppb MTBE, 7.6 ppb Naphthalene (9/19/05). Water levels have fluctuated from 73.20 to 78.66 feet bgs. Anticipated groundwater flow direction is to the southeast towards the Santa Ana River. The closest domestic water supply well (Well 04 Old Skotty) is located approximately 1049 feet west of the site and according to the well report on Geotracker, VOCs have not been detected in this well. Regional Board concurred with closure on 5/13/2010 and the no further action/closure letter was issued 6/14/2010

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Comments:	Not reported
Description:	RP states that a pump seal failed causing the release of cooling tower water to a drainage swale. The storm drain system would discharge into the Santa Ana River. However, the water has not been detected any further than 100' into the drainage swale. The estimated amount of the release is in excess of 10,000 gallons.

Site ID:	542400
Site Name:	Sierra Aluminum
Violation Date:	09-28-2000
Citation:	2014-0057-DWQ - Industrial General Permit
Violation Description:	SW - Deficient BMP Implementation
Violation Notes:	Discharge of process water into drainage channel 1000 ft from Santa Ana River. Aluminum material all over facility ground and in channel. Analyticals, lack of training, SWPPP needs revising, major housekeeping
Violation Division:	Water Boards
Violation Program:	INDSTW
Violation Source:	SMARTS,

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-13-2013

SIERRA ALUMINUM A DIVISION OF SAMUEL SON & CO (USA) INC (Continued) **S100220249**

Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Metal shavings on concrete and asphalt at E and W driveway sampling points (discharge locations) were observed. A review of Form 5 of the 2012-13 Annual Report indicates that in the beginning of 2013, the roof and structure of the dross storage area was modified. A roof was installed to cover the pumps and chemical tank for treatment of cooling tower water plus a berm was installed around the cooling tower and chemical tanks and pumps to prevent any discharges from future pump failures. However, additional sweeping will be necessary to prevent metal shavings from flowing into the storm drain with storm water. The SWPPP was not available for review.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS,
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-08-2005
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	SWPPP was available however, the BMP inspection records were not. Aluminum prevalent at site but not tested in analytical monitoring. Annual certification in SWPPP was not present. No documentation of new employee orientation. A sweeper and scrubber
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS,

POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-03-2014
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Tanker trucks are worked on and maintained at this site. All activities take place within covered ports. Some empty drums were noted on a secondary containment palette but it was stored without a cover. A look inside the container palette indicated previous leaks. Staff asked the site supervisor to have all drums under the cover, even if they are empty. All maintenance is taking place indoors and the floors are cleaned every night. A fuel tank was noted on site. The tank was set within a secondary containment to catch any spills or leaks. The facility grounds were very clean and no evidence of spill or leak was noted. The storm water conveyance system was clean. A fiber (straw) roll was used to hold sediments from the unpaved portion of the site. Overall, the site is in good condition and no furthur

Eval Source:	CERS,

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-03-2014
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Tanker trucks are worked on and maintained at this site. All activities take place within covered ports. Some empty drums were noted on a secondary containment palette but it was stored without a cover. A look inside the container palette indicated previous leaks. Staff asked the site supervisor to have all drums under the cover, even if they are empty. All maintenance is taking place indoors and the floors are cleaned every night. A fuel tank was noted on site. The tank was set within a secondary containment to catch any spills or leaks. The facility grounds were very clean and no evidence of spill or leak was noted. The storm water conveyance system was clean. A fiber (straw) roll was used to hold sediments from the unpaved portion of the site. Overall, the site is in good condition and no furthur action is necessary.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)

DURA COAT PRODUCTS INC (Continued) **1001115474**

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
OSHA ESTABLISHMENT
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

SPARTAN CLEAN UP (Continued) **1004676960**

Local Agency: RIVERSIDE COUNTY LOP
File Location: Local Agency Warehouse
Local Case Number: 200420607
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Gasoline
Site History: Site History/Release Information: March 2004 - One 5000-gallon gasoline underground storage tank (UST) was removed in March 2004. Soil samples were collected at 2- and 6-feet below the west end of the UST, 2-feet below the east end of the UST and 2-feet below the dispenser. The highest concentrations detected were: 3014 ppm TPHg (T-2 East @13 \\%), 42.1 ppm toluene (T-2 East @13 \\%), 27.9 ppm ethylbenzene (T-2 East @13 \\%), 3.9 ppm xylenes (T-1 West @17), 0.115 ppm MTBE (T-1 West @17), 213 ppm 1,2,4-TMB (T-2 East @13 \\%), 61 ppm 1,3,5-TMB (T-2 East @13 \\%), and 21.6 ppm N-propyl benzene (T-2 East @13 \\%). The UST excavation was left open and the site was placed into LOP on May 17, 2004. Assessment: November 2005 - Three soil borings (B1, B2 and B3) were drilled around the former UST to a maximum of 40 feet below grade (ft bg). Groundwater (GW) was encountered at 18 ft bg. One soil sample from each boring and a GW grab sample from B2 were analyzed. Soil samples from B1 (northwest side of the UST cavity) and B3 (northeast side of the UST cavity) were below the detection limits (ND) for all constituents tested (TPHc6-c36 and VOCs 8260 full scan). Soil sample from B2, located south of the UST cavity, detected 74 ppm TPHC6-C10, 15 ppm TPHC10-C22, ND<5 ppm TPHC22-C30, 0.8 ppm 1,2,4-TMB, and ND all other constituents (8260 full scan). The GW sample from B2 detected 190 ppb ethylbenzene and 270 ppb xylenes with all other constituents ND. January 2006 - Four GW monitoring wells (MW1 through MW4) were installed with screens from 11.5 to 31.5 ft bg. Soil samples were collected from MW2 and MW3 at depths of 8, 13, 19 and 24 ft bg. Soil samples were not collected from MW1 and MW4 since they were drilled adjacent to B2 and B3. All samples were ND for TPHc6-c36, BTXE, and oxygenates except 17 ppm TPHc10-c22 (MW2 @ 8 ft). GW samples from the four wells were ND for all constituents tested (TPHc6-c36, BTXE, and oxygenates). Remediation: January 2006 The UST cavity was excavated to approximately 23 ft bg (5 feet below the water table). Verification samples were collected from the excavation sidewalls (Spartan-B and Spartan-C) and soil stockpile (Spartan-A). The sidewall samples were ND for TPH, BTEX, and MTBE whereas the stockpiled soil sample detected 78.4 ppm TPHg, 225 ppm TPHd, and 4.84 ppm xylenes. Groundwater Monitoring: November 2005 A GW grab sample was collected from boring B2 and it had detections of 190 ppb ethylbenzene and 270 ppb xylenes. All other constituents tested were ND. 2006 to 2007 The four GW monitoring wells were sampled quarterly for 5 quarters. Depth to GW fluctuated from 22.61 to 25.35 ft bg during the monitoring events. The flow direction was unable to be determined as the wells were never surveyed. All samples from all of the wells were ND for TPH, BTEX and MTBE. VOCs (full scan 8260) was requested, but never analyzed. Subsurface Soil types: sand, silty sand, and sand with gravel to 40 ft bg Remediation: soil excavation from UST cavity Sensitive Receptors: The Santa Ana River is located approximately 400 feet south of the site. Other information: The site is currently vacant dirt lot in the riverbed. RP non-responsive for multiple years. 8/2013 - RCDEH determined that site met LTCP criteria and requested RP to properly abandon wells. 5/2015 - Three of the four gw mon wells were properly abandoned, however, MW-2 was unable to be located and has not been properly abandoned. 7/9/2015 -

SPARTAN CLEAN UP (Continued) **1004676960**

Documentation for well destructions received. 7/20/2015 - RCDEH issued NFA/case closure letter.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/20/2021

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 10/18/2021

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

PUBLIC RECORDS REQUEST FORM

PRU Office Use Only
CONTROL NUMBER

ATTENTION REQUESTOR: To expedite your request for District records, please fill out this form completely, and identify specifically the type of records you are requesting. Please limit your request to one facility or one site address for each request form filed, and three requested items per form. Additional forms or pages can be used if requesting information for more than one facility or for records not identified on this form. Requests should reasonably describe identifiable records prepared, owned, used, or retained by the District. Public Records Unit staff is available to assist you in identifying those records in the District's possession. The District is not required by law to create a new record or list from an existing record.

Contact: JAMES W MCELROY

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by PC Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # EBE2-428E-8BC5

PO # 2022003

Project NA

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: EBE2-428E-8BC5

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✓ Library of Congress
- ✓ University Publications of America
- ✓ EDR Private Collection
