Subject: CDFW Comments on the Citrus Heights Creek Erosion and Bridge Scour Protection Project IS/MND (SCH 2026050929)

Hi Daniel:

I have reviewed the City's IS/MND and just have comments regarding the CDFW Streambed Alteration Agreement permitting requirements.

1. The Arcade-Cripple Creek Trail Bridge (Sundance Bridge) is not covered under the City of Citrus Heights' Routine Maintenance Agreement (1600-2018-0178-R2) since the bridge is not located within the City's jurisdictional boundary. The bridge is located within the County of Sacramento's boundary. The City has three options here. 1) It can amend its Routine Maintenance Agreement to include the bridge area. 2) It can request permission from the County's Department of Water Resources to use their Routine Maintenance Agreement to cover the bridge work. 3) It can notify for a separate Streambed Alteration Agreement.
2. The Matheny Bridge includes the relocation of existing exposed inactive and active PG&E gas lines. It is unclear in the IS/MND if the lines are attached to the bridge or buried into the creek channel. If the lines are not attached to the bridge and excavation/trenching is required in the channel, then the activity is not covered under the City's Routine Maintenance Agreement. The City will have to notify for a separate Streambed Alteration Agreement for that activity.

Thanks,

Harvey Tran
