Project Description: (please use a separate page if necessary)

The Citrus Heights Creek Erosion and Bridge Scour Protection Project (project) would include the installation of scour and erosion protection measures, including creek channel and slope stabilization, underneath the Indian River Drive Bridge (Indian River Bridge), Matheny Way Bridge (Matheny Bridge), Arcade-Cripple Creek Trail Bridge (Sundance Bridge), and Patton Avenue Bridge (Patton Bridge). The project would also include the removal of an abandoned Consolidated Communications, Inc. (CCI) and Comcast joint trench with exposed conduits in the creek bed of the Indian River Bridge project impact area and would include the relocation of existing and exposed Pacific Gas and Electric (PG&E) inactive and active gas lines in the Matheny Bridge project impact area. The project work would occur where natural erosion is impacting existing public infrastructure and inhibiting City of Citrus Heights maintenance activities. The project is proposed to extend the service life of the bridges, maintain public safety, protect critical infrastructure, and reduce long-term maintenance needs.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
