Project Description (Proposed actions, location, and/or consequences).

The project is located in the community of Point Reyes Station, in Marin County, California. The proposed project would replace the existing bridge over Olema Creek with a new single-span, cast-in-place, post-tensioned concrete slab bridge approximately 77 feet in length and accommodating two 11-foot-wide lanes, 6-foot-wide shoulders in each direction, and new 2-foot wide bridge barriers in each direction, resulting in an approximate bridge width of 38 feet.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

See Initial Study for more information.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Provide a list of the responsible or trustee agencies for the project.
