Riverside, CA 92507

Project Title: City of Beaumont Stream Gage Installation Project

Project Location: The project will be located at 4 separate sites, including one along Cooper's Creek and 3 along San Timoteo Creek. The specific coordinates are as follows:

- CC-03: 33.929545°, -117.021603°, located in the City of Beaumont, within Riverside County
 - Assessor's Parcel Number (APN): 424010007
- STC-01: 33.972931°, -117.085200°, located in Unincorporated Riverside County, adjacent to the City of Calimesa Boulevard
- STC-02: 33.941267°, -117.017003°, located in the City of Beaumont, within Riverside County
- YVWD-A: 33.986681°, -117.134239°, located in Unincorporated Riverside County
 - APN: 413380004

Project Location - City: City of Beaumont

Project Location - County: Riverside

Description of Nature, Purpose,

and Beneficiaries of the Project: The City of Beaumont seeks to increase the beneficial use of its treated wastewater that is currently being discharged to Cooper's Creek. To support this effort, the City prepared the Cooper's Creek and San Timoteo Creek (CCSTC) Habitat Characterization and Sustainability Report. The purpose of the report was to inform strategies for reducing recycled water discharges and to prepare an Adaptive Management and Mitigation Plan (AMMP) for riparian habitat along Cooper's Creek and San Timoteo Creek that could be impacted by reduced flows.

The City is presently pursuing analysis and implementation of reducing its discharge of treated wastewater (i.e. recycled water) from the Beaumont wastewater treatment plant (WWTP) to Cooper's Creek, and divert that water for other beneficial uses discussed below.

The CCSTC Habitat Characterization and Sustainability Report (Phase 1 Report) identified the need for a baseline monitoring program for information gathering purposes, and the need for surface water monitoring (stage, flow, temperature, and specific conductance (SC)) was identified. The high-frequency flow, temperature, and SC data will provide a more comprehensive understanding of the long-term and short-term trends in surface water flow downstream of the WWTP and help understand surface water conditions in response to storms and discharges from the Beaumont WWTP. The high-frequency data will also help discern groundwater and surface water interactions downstream of the WWTP. The project proposes a total of 4 new stream gages located at the locations described under project locations, above.

Name of Public Agency Approving Project: City of Beaumont

Name of Person or Agency Carrying Out Project: City of Beaumont

Exempt Status: (Check One)

- Statutory Exemption
 Categorical Exemption (Section 15306)

Reasons why project is exempt: The proposed City of Beaumont Stream Gage Installation Project meets the criteria for a Class 6 Categorical Exemption (15306). Class 6 consists of "Information Collection" outlined under Section 15306 of the State CEQA Guidelines. Class 6 exemptions consist of "basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be strictly for information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted, or funded." The Class 6 Criteria that is met by this project is that the proposed project would consist of data collection that would not result in serious or major disturbance to an environmental resource, and the data collected from this project would be used as part of a study leading to an action which a public agency has not yet approved, adopted, or funded. The City of Beaumont Stream Gage Installation Project has been evaluated against the Categorical Exemption exceptions, and does not fall under any exception based on the lack of historical, archaeological, and scenic resources within the stream gage sites, and that no hazardous waste sites are located in the vicinity of the project, and no cumulative or significant effects are anticipated to occur as a result of project implementation. The project activities have been determined not to have a potential to cause significant adverse environmental effects. Therefore, this proposed project is not expected to result in significant adverse environmental impacts and meets the criteria for a Class 6 Categorical Exemption (15306).
