Agriculture

Project Description: (please use a separate page if necessary)

The purpose of the Mokelumne River Confluence Multi-Benefit Project is to rehabilitate the levee section from Station 822+00 – 1038+00 to the Delta Specific PL 84-99 Standard and create waterside habitat. Landside work includes raising the levee crown to achieve sufficient freeboard above the 100-year flood elevation and stabilizing the landside slope through the construction of a toe berm. Additionally, a setback levee will be constructed from Station 857+00 – 864+00. Waterside work includes excavation of the existing levee at the setback levee, to construct a habitat bench above Mean Lower Low Water. The habitat bench and setback levee waterside slope will be planted with native riparian species, creating approximately 1 acre of Delta Levee Waterside Habitat. Plantings will be monitored and maintained to ensure success criteria are met.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
