Project Description: *(please use a separate page if necessary)*

Kiefer Landfill Generating III, LLC is proposing to construct a renewable natural gas (RNG) plant with a capacity of 8,000 standard cubic feet per minute (scfm) at Kiefer Landfill and a pipeline connecting the plant to existing Pacific Gas & Electric (PG&E) natural gas pipelines in Sacramento County. The RNG plant would process landfill gas to meet air quality standards and produce pipeline-quality natural gas (i.e., primarily methane) by removing moisture and impurities. The proposed project would also construct a new pipeline to transfer the pipeline-quality RNG from the plant to existing PG&E pipeline infrastructure, with two route options under evaluation.

See additional page.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
