The Mariposa County Public Works Department (County) proposes to construct a transit yard featuring a solar canopy and electric vehicle (EV) charging stations on the 1.54-acre project site, located east of SR-49 within the northern portion of the Town of Mariposa, east of Frank Wilson Road and Lemee Lane. The proposed project would support fleet electrification and the expansion of the local Dial-a-Ride service. The project includes the installation of a solar canopy consisting of elevated structures designed to support photovoltaic (PV) panels mounted above paved surfaces. The canopy would be approximately 14 feet high and configured to provide overhead coverage for vehicles while allowing continued circulation, parking, and operational use of the underlying areas. Associated electrical equipment, such as conduits and connections, would be installed to convey electricity generated by the PV panels to on-site electrical systems. The proposed project would also include batteries for power storage to support fleet electrification. The electricity generated by the solar canopies would be used to support on-site operations, including EV charging and other facility energy demands. One driveway would connect to Frank Wilson Road, and new storm drain facilities would be constructed.

The project site is not part of a site that is included on the State Cortese List (Government Code Section 65962.5[a]).
