EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Project Name: Mountain View

Geosyntec Consultants
2700 Ygnacio Valley Road, Suite 130
Walnut Creek, CA 94598

Attention: Sara Roy

Dear Ms. Roy

Attached is the Environmental (Hazardous/Toxic Waste) Records Search Summary of 918, 924 & 940 San Rafael Avenue ("Mountain View") site located in Mountain View, California. Environmental Support Services ("**ESS**") received the request on February 23, 2017 (See Appendix A). Should you have any questions regarding the summary, please call.

Sincerely,
Environmental Support Services

Shannon Castagno
Project Manager
Shannon@EnvironmentalSupportServices.com

Records Search Summary

Company:	Geosyntec Consultants
Project Name:	Mountain View
Attention:	Sara Roy
Street Address of Property:	918, 924 & 940 San Rafael Avenue Mountain View, CA

Santa Clara County Environmental Health Department

E-mailed request: 2-23-17, Contact: Public Records Section

ESS submitted a request for a records search concerning the Mountain View site to the Public Records Section, with the Santa Clara County Environmental Health Department (See Appendix B). **ESS** requested information concerning the utilization, manufacture, storage and/or discharge of hazardous materials/waste, and any information concerning previous or on-going site investigations/remediations pertaining to hazardous materials/waste. Melissa Belloso, with that department informed **ESS** February 23, 2017 that her department only had records for 924 San Rafael Avenue, Mountain View, CA (See Appendix B).

Santa Clara Valley Water District

E-mailed request: 2-23-17, Contact: Roberta Stewart

ESS submitted a request for a records search concerning the Mountain View site to Ms. Stewart, with the Santa Clara Valley Water District. **ESS** requested information concerning the storage of hazardous materials/waste, underground storage tanks and industrial waste discharge permits or violations for 918, 924 & 940 San Rafael Avenue, Mountain View, CA (See Appendix C). Mark Bilski, with that department informed **ESS** on February 27, 2017 that his department is no longer the lead agency for solvent and underground storage tank contamination files. He recommended that **ESS** contact the Santa Clara County Environmental Health Department (See Above), City of Mountain View Fire Department and Regional Water Quality Control Board (See Below) for further information.

Department of Toxic Substances Control (DTSC) – Region 2

E-mailed request: 2-23-17, Contact: Public Records Section

Previous contacts with the DTSC have disclosed that this office only collects and stores information (such as treatment, storage and disposal of hazardous waste) concerning sites which have existing businesses, industries, etc. present. **ESS** requested that the Public Records Section, with the DTSC, check the file room records for any files/information concerning 918, 924 & 940 San Rafael Avenue, Mountain View, CA (See Appendix D). As of March 8, 2017, the Public Records Section had not completed **ESS'** request. Should any information concerning the site surface, **ESS** will immediately forward it to Ms. Roy at the Geosyntec office.

City of Mountain View Fire Department – Fire Prevention

On-line request: 2-23-17, Contact: Public Records Section

ESS requested that the Public Records Section, with the City of Mountain View Fire Department, check their records concerning the storage of hazardous materials/waste and underground storage tanks with regards to the following: 918, 924 & 940 San Rafael Avenue, Mountain View, CA (See Appendix E). As of March 8, 2017, the Public Records Section had not completed **ESS'** request. Should any information concerning the site surface, **ESS** will immediately forward it to Ms. Roy at the Geosyntec office.

Cal Fire - Office of the State Fire Marshal

E-mailed request: 2-23-17, Contact: Pubic Records Request

ESS requested that the Public Records Section, with Cal Fire - Office of the State Fire Marshal, check their records concerning the storage of hazardous materials/waste, pipelines and underground storage tanks with regards to the following: 918, 924 & 940 San Rafael Avenue, Mountain View, CA (See Appendix F). Ashely Kephart, with that department informed **ESS** March 8, 2017 that her department only had records for the 924 San Rafael Avenue, Mountain View, CA (See Appendix F).

City of Mountain View Environmental Protection – Industrial Waste Division

On-line request: 2-23-17, Contact: Public Records Section

ESS requested that the Public Records Section, with the City of Mountain View Environmental Protection – Industrial Waste Division, check their records for any information concerning industrial waste discharge permits or violations for 918, 924 & 940 San Rafael Avenue, Mountain View, CA (See Appendix G). Margarita Herrera, with that City of Mountain View City Clerk's Office informed **ESS** March 7, 2017 that her department only had records for the 924 San Rafael Avenue, Mountain View, CA (See Appendix G).

City of Mountain View Building Department

On-line request: 2-23-17, Contact: Public Records Section

ESS requested that the Public Records Section, with the City of Mountain View Building Department, provide the building records (all building permits and certificates of occupancy) for 918, 924 & 940 San Rafael Avenue, Mountain View, CA (See Appendix H). Margarita Herrera, with that City of Mountain View City Clerk's Office provided **ESS** February 28, 2017 with all the available records for the addresses (See Appendix H). No further information concerning the site was obtained from the building department at the time of the investigation.

Bay Area Air Quality Management District (BAAQMD)

On-line request: 2-23-17, Contact: Rochelle Reed

ESS submitted a search request concerning active, inactive and sold files for 918, 924 & 940 San Rafael Avenue, Mountain View, CA to Ms. Reed at the BAAQMD (See Appendix I). She informed **ESS** February 27, 2017 that her department had no records for the 918, 924 & 940 San Rafael Avenue, Mountain View, CA (See Appendix I).

Regional Water Quality Control Board (RWQCB) – Bay Area Region

E-mailed request: 2-23-17, Contact: Melinda Wong

ESS requested that Ms Wong, with the RWQCB, provide the files for 918, 924 & 940 San Rafael Avenue, Mountain View, CA (See Appendix J). She informed **ESS** on March 3, 2017 that her department only had records for 924 San Rafael Avenue, Mountain View, CA. She referred **ESS** to Geotracker on the RWQCB website for the records.

FACILITY SENDS YELLOW COPY TO AGENCY KEEPS PINK COPY

044 Rev 8/06

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance or within 35 days of the inspection whichever comes first you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance Where proposed corrective actions are described you must specify a date by which you expect each violation to be corrected After you have addressed each violation complete the certification box located at the bottom of page 1 of the NOI **Your description of corrective actions taken along with your signed certification of the NOI and any required supporting documents will serve as your written response to this Notice to Comply** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive Suite 300 San Jose CA 95112 2716 The effective date of the certification that any violation has been corrected is the date that it is postmarked

What Does the Information in Each Column Mean?

Violation Code Codes listed in this column identify specific violations of laws regulations or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s)

Summary of Violations, Notice to Comply Observations and Required Corrective Actions Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described you must specify a date by which you expect each violation to be corrected If more space is needed attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1 The yellow copy of each page must be returned to HMCD The pink copy is for your records**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date Address such notices to the attention of the inspector who cited the violation In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space you may use the "Corrective Actions Taken" column of this NOI to dispute violations

What About Photographs or Samples Taken During the Inspection?

If samples were taken split samples will be given to you upon request Since this NOI was prepared and given to you at the end of the inspection any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this NOI Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

- **Per HSC §§25187 8(b) and 25404 1 2(c) failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law**
- **Per HSC §25404 1 2(c)(2) a false statement that compliance has been achieved is a misdemeanor**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2 000 or more than $25,000 and/or imprisonment in the county jail for up to one year**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000**
- **Per HSC §§25187 8(i) HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility**

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance or within 35 days of the inspection whichever comes first you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance Where proposed corrective actions are described you must specify a date by which you expect each violation to be corrected After you have addressed each violation complete the certification box located at the bottom of page 1 of the NOI **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive Suite 300 San Jose CA 95112 2716 The effective date of the certification that any violation has been corrected is the date that it is postmarked

What Does the Information in Each Column Mean?

Violation Code Codes listed in this column identify specific violations of laws regulations or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s)

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described you must specify a date by which you expect each violation to be corrected If more space is needed attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1 The yellow copy of each page must be returned to HMCD The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date Address such notices to the attention of the inspector who cited the violation In your Notice of Disagreement you must explain in detail why you believe the violation does not exist If there is sufficient space you may use the 'Corrective Actions Taken column of this NOI to dispute violations

What About Photographs or Samples Taken During the Inspection?

If samples were taken split samples will be given to you upon request Since this NOI was prepared and given to you at the end of the inspection any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this NOI Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

- **Per HSC §§25187 8(b) and 25404 1.2(c) failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law**
- **Per HSC §25404 1.2(c)(2) a false statement that compliance has been achieved is a misdemeanor**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2 000 or more than $25 000 and/or imprisonment in the county jail for up to one year**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000**
- **Per HSC §§25187 8(i) HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility**

Facility Name El Camino Paving Inc. **Inspection Date** 5/30/07

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
Cont..	or removing waste. Label containers, drums, and tank as required on the violation code sheet and keep containers and drums closed at all times. Labels were provided.	
2204	Currently this facility is operating with an inactive EPA ID# CAL000045158. Re-activate your EPA ID number with the State In the meantime do not dispose of any hazardous waste until your EPA ID# becomes activate it. A sample form was provided	Faxed form was sent on 5/31/07
2210	Based on my observations and the type of violations weekly inspections are not being conducted of the hazardous waste storage area. Begin conducting weekly inspections It is recommended that you keep a log of inspections for proof. A sample form was provided	
2212	Observed used oil inside the secondary containment, observed spills through out the facility, observed saturated oily-debris not being cleaned up properly. Clean up spills immediately Keep secondary containment dry from free liquids and lastly clean up saturated debris after each spill, do not let it stand for long periods of time in order to avoid the spread of the contaminated debris outside the facility	
~~AO 2216~~ NO WASTE OIL TANK	I could not inspect the secondary containment for the above ground used oil tank or around the tank, due to all the clutter that was present(ie., tools, tires, drums, etc.) Additionally, I could not inspect some of the waste drums because there was no aisle space Aisle space must be maintained for movement of personnel and response equipment. Make aisle space available and clean out secondary containment

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or for those violations which are impossible to correct within 30 days propose to take in order to bring your facility into compliance Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the Notice of Inspection Your description of corrective actions taken along with your signed certification of the Notice of Inspection and any required supporting documents, will serve as your written response to the inspection. Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive Suite 300 San Jose CA 95112 2716

What Does the Information in Each Column Mean?

Violation Code Codes listed in this column identify specific violations of laws regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s)

Summary of Violations, Notice to Comply Observations, and Required Corrective Actions Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described you must specify a date by which you expect each violation to be corrected If more space is needed, attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1 The yellow copy of each page must be submitted to HMCD The pink copy is for your records

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection you must submit a written Notice of Disagreement, within 35 days of the inspection date to the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken' column of this Notice of Inspection to dispute violations

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this Notice of Inspection Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

Hazardous Waste Violations

- **Per H&SC §25187 8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law**
- **Per H&SC §25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year**
- **Per H&SC §25187 8(j) this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility**

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (Notice of Inspection) describes the findings made during the inspection including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance or within 35 days of the inspection whichever comes first, you must submit a written response which describes the corrective actions you have taken or for those violations which are impossible to correct within 30 days - propose to take in order to bring your facility into compliance Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected After you have addressed each violation complete the certification box located at the bottom of page 1 of the Notice of Inspection. Your description of corrective actions taken along with your signed certification of the Notice of Inspection and any required supporting documents will serve as your written response to the inspection Your response must be mailed to the Santa Clara County Hazardous Materials Compliance Division (HMCD) at P O Box 28070 San Jose CA 95159 8070

What Does the Information in Each Column Mean?

Violation Code Codes listed in this column identify specific violations of laws regulations or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s)

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken This column on the Notice of Inspection has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described you must specify a date by which you expect each violation to be corrected If more space is needed attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1 The yellow copy of each page must be submitted to HMCD The pink copy is for your records

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this Notice of Inspection you must submit a written Notice of Disagreement, within 35 days of the inspection date to the inspector who cited the violation In your Notice of Disagreement, you must explain in detail why the violation does not exist. If there is sufficient space you may use the Corrective Actions Taken column of this Notice of Inspection to dispute violations

What About Photographs or Samples Taken During the Inspection?

Since this Notice of Inspection was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this Notice of Inspection Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

Hazardous Waste Violations

- **Per H&SC, Section 25187 8(g)(1), failure to sign the certification on this Notice of Inspection and return it to this Department is a violation of State law**
- **Per H&SC, Section 25191, a false statement that compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year**
- **Per H&SC, Section 25187 8(j), this Department has the right to acquire the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility**

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**Yes**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) I
Emergency Procedures

Facility ID:	**722**
Updated:	**6/7/2011**

Business Name
El Camino Paving, Inc.

Facility Street Address
924 San Rafael Avenue

Emergency response to hazardous materials spills or releases is the responsibility of the ***business owner.*** The role of the Fire Department is to provide ***assistance*** to your primary response actions. This site-specific Emergency Response (Contingency) Plan describes your facility's plan for dealing with reportable discharges and shall be implemented immediately whenever they occur. Employees must understand their roles and responsibilities during such an emergency through on-going training and drills. For larger facilities, a more detailed plan may be substituted, but it must include all the items listed here. ***This plan shall be maintained on site for use in the event of an emergency and for inspection by the Fire Department.***

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of this facility:
☐ Bells ☐ Horns/Sirens ☒ Verbal (i.e. Shouting) ☐ Other (specify) Alarm

b. ☒ Evacuation map is displayed throughout the facility inc. entrances to hazmat locations.

2. a. Emergency Contacts:

Fire/Police/Ambulance ..... Phone No. **911**

California Emergency Management Agency ..... Phone No. **(800) 852-7550**

b. Post-Incident Contacts:

Fire Department Fire and Environmental Protection Division ..... Phone No. **(650) 903-6378**

California Department of Toxic Substance Control (DTSC) ..... Phone No. **(800) 728-6942**

Santa Clara County Department of Environmental Health ..... Phone No. **(408) 918-3400**

Cal-OSHA Division of Occupational Safety and Health ..... Phone No. **(650) 573-3812**

Bay Area Air Quality Management District ..... Phone No. **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No. **(510) 622-2300**

c. Emergency Resources:

Poison Control Center ..... Phone No. **(800) 222-1222**

Nearest Hospital: El Camino Hospital Phone No. 650-940-7000

Address: 2500 Grant Road City: Mountain View

Hazwaste Cleanup Contractor: Nor Cal Oil Phone No. 800-332-8710

Contact Name: Emma Puitt EPA ID#: CAD982417255

3. Arrangements With Emergency Responders:

If you have made arrangements with any police department, fire department, hospital, cleanup contractor, or State or local emergency response team to provide specific emergency services, describe them below:

.....

.....

4. Emergency Procedures:

Emergency Coordinator (EC) Responsibilities:

a. Whenever there is a reportable hazardous materials spill or release emergency, the EC (or his/her designee) whose name is **Daniel Campos** and job title is **Maintenance Supervisor** shall:

i. Identify the character, source, amount, and aerial extent of any released hazardous materials.

ii. Assess possible hazards to human health or the environment that may result from the emergency. This assessment must consider both direct and indirect effects.

iii. Activate internal facility alarms or communication systems, where applicable, to notify all facility personnel.

(Continued...)

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) I
Emergency Procedures (Con't)

Facility ID:	**722**
Updated:	**6/7/2011**

Business Name
El Camino Paving, Inc.

Facility Street Address
924 San Rafael Avenue

Emergency Coordinator (EC) Responsibilities (Continued):

iv. Notify appropriate local authorities *(i.e. call 911).*
v. Notify the California Emergency Management Agency at (800) 852-7550.
vi. Monitor for leaks, pressure build up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the emergency.
vii. Take all reasonable measures necessary to ensure that the emergency does not occur, reoccur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the emergency, the EC shall:
i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from the emergency at the facility.
ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the emergency until cleanup procedures are completed.
iii. Ensure that all emergency equipment is cleaned, fit for use, available for use, or properly disposed of.
iv. Notify the applicable "Post-Incident Contacts" listed in item 2.b on the previous page.

Responsibilities of Personnel **Other** Than the EC:

Function:	*Name and Job Title:*
Shutdown of Operations/Systems:	Melissa A. Campos
Evacuation of Building Personnel:	Melissa A. Campos
Oversight of Outside Assembly Areas:	Walter Roland/Foreman, Daniel Campos
Medical Treatment For Injuries (First Aid, CPR, etc.):	Melissa A. Campos

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials emergency that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any emergency situation which triggers implementation of this plan, a written Emergency Incident Report must be submitted to the California Department of Toxic Substances Control and the Fire and Environmental Protection Division of the Mountain View Fire Department. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and complete description of the emergency;
d. Name and quantity of the hazardous material(s) involved;
e. The extent of personal injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where applicable;
g. The estimated quantity and disposition of recovered material that resulted from the emergency;
h. The cause(s) of the emergency;
i. The actions taken in response to the emergency; and
j. Administrative or engineering controls installed to prevent such emergencies in the future.

6. Earthquake Vulnerability: [19 CCR 2731(e)]

a. **Identification** of areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to seismic activity.
b. **Inspection** of all vulnerable hazardous waste/materials areas, including any or all compressed gases and storage tank/containers. All braces, chains and supporting anchors that secure hazardous waste/materials will be inspected for integrity breach.
c. **Isolation** of compressed gases that are incompatible will be segregated to prevent hazard of commingling other chemicals of a hazard category or incompatibility will be segregated as necessary.

7. Hazard Mitigation/Prevention/Abatement [19 CCR 2731(c)]

Describe your procedures that provide for mitigation, prevention or abatement of hazards to persons, property or the environment below:

Emergency Response (Contingency Plan) III: Emergency Training/Recordkeeping

Business Name

El Camino Paving, Inc.

Facility ID:	**722**
Updated:	**6/7/2011**

Facility Street Address

924 San Rafael Avenue

Indicate below the training provided for all new and existing (annual refresher) employees (check all that apply):
[Note: Items marked with an asterisk(*) are required]

1. Personnel are trained in the following procedures:

- ☒ Internal alarm and notification *
- ☒ Evacuation/re-entry procedures & assembly point locations *
- ☒ Emergency incident reporting
- ☒ External emergency response organization notification
- ☒ Location(s) and contents of this Emergency Response/Contingency Plan *
- ☒ Facility evacuation drills, which are conducted at least (specify)*Bi-annually*

2. Chemical Handlers are additionally trained in the following:

- ☒ Safe methods for handling and storage of hazardous materials *
- ☒ Location(s) and proper use of fire and spill control equipment *
- ☒ Spill procedures/emergency procedures
- ☒ Proper use of personal protective equipment *
- ☒ Specific hazard(s) of each chemical to which they may be exposed, inc. routes of exposure *
- ☐ Hazwaste Handlers/Managers are trained in all aspects of hazardous waste management specific to their job duties (e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.

3. Emergency Response Team Members are capable of and engaged in the following:

- ☐ Personnel rescue procedures
- ☐ Shutdown of operations
- ☐ Liaison with responding agencies
- ☐ Use, maintenance and replacement of emergency response equipment
- ☐ Refresher training, which is provided at least annually
- ☐ Emergency response drills, which are conducted at least (specify)

4. The following **records** are maintained by this facility:

- ☒ Current employees' training records (retained until closure of the facility) *
- ☒ Former employees' training records (retained at least 3 years after employee termination) *
- ☒ Training program(s) (i.e. written description of introductory and continuing training) *
- ☒ Current copy of this Emergency Response/Contingency Plan *
- ☒ Written record of recordable/reportable hazardous material/waste releases *
- ☒ Written record of hazardous material/waste storage area inspections *
- ☒ Written record of hazardous waste tank daily inspections *
- ☒ Description and documentation of facility emergency response drills

Subject: Records Search – Hazardous Materials/Waste/Underground Tanks

Site: 918, 924 & 940 San Rafael Avenue
Mountain View, CA 94043

Dear Ms. Stewart,

Environmental Support Services (ESS) is in the process of conducting a records search for an environmental audit at a site in Mountain View, CA. This search includes researching the history of the site, especially as it pertains to hazardous materials/waste. With this in mind, **ESS** requests the following information concerning the subject address which your agency may have on file:

1. utilization, manufacture, storage, or discharge of hazardous materials/waste.
2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste.
3. hazardous materials disclosures concerning the site.
4. information regarding underground storage tank present or previously found at the site.

Should you have any questions concerning this request for information, please call. Your expedient processing of this request is appreciated.

Sincerely,
Environmental Support Services

Shannon Castagno

Jaymae Wentker, Fire Marshal

POST IN A CONSPICUOUS PLACE AT THE "PERMITTED FACILITY" SITE

I. Discharge Limitations:

Process Discharge (industrial waste) shall not exceed 100 Gallons Per Day (GPD).
(Location A1: 100 GPD)
Total Discharge (industrial and domestic waste) shall not exceed 500 Gallons Per Day (GPD).

II. Special Conditions/Requirements:

1. Sump cleaning and sludge removal shall be conducted once each quarter. Maintain cleaning records on site.

III. Self-Monitoring Sampling Analysis:

Pollutant	Sampling Frequency	Sample Type	Sampling Location(s)*	Federal Maximum for any 1 day (mg/L)	Federal Avg. of daily values for 30 consec.days (mg/L)	Local Limit (mg/L)
Copper	Semi-Annually	Grab	A1	No Limit	No Limit	2
Lead	Semi-Annually	Grab	A1	No Limit	No Limit	.5
Zinc	Semi-Annually	Grab	A1	No Limit	No Limit	4

*Sampling Location A1 is at the discharge end of the oil-water separator (clarifier) sump at the east end of the building.

IV. Wastewater Discharge Limits: (MVCC 35.32.12 & CFR 40)

Your industrial wastewater effluent shall not exceed the following limits:

Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]	Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]
Arsenic	No Limit	No Limit	0.1 mg/L[1]	Manganese	No Limit	No Limit	1.0 mg/L[1]
Barium	No Limit	No Limit	5.0 mg/L[1]	Mercury[2]	No Limit	No Limit	0.01 mg/L[2]
Berrylium	No Limit	No Limit	0.75 mg/L[1]	Nickel	No Limit	No Limit	0.5 mg/L
Boron	No Limit	No Limit	1.0 mg/L[1]	Oil & Grease	No Limit	No Limit	200 mg/L
Cadmium	No Limit	No Limit	0.1 mg/L[1]	Phenols	No Limit	No Limit	1.0 mg/L
Chromium Hex.	No Limit	No Limit	1.0 mg/L[1]	pH	No Limit	No Limit	5.0-11
Chromium, Total	No Limit	No Limit	2.0 mg/L[1]	Selenium	No Limit	No Limit	1.0 mg/L[1]
Cobalt	No Limit	No Limit	1.0 mg/L[1]	Silver, Photo	No Limit	No Limit	0.50 mg/L
Copper[4]	No Limit	No Limit	2.0 mg/L[1]	Silver, Non-Photo	No Limit	No Limit	0.25 mg/L
Copper	No Limit	No Limit	0.25 mg/L	Single Toxic Organic	No Limit	No Limit	0.75 mg/L
Cyanide	No Limit	No Limit	0.5 mg/L[1]	Suspended Solids	No Limit	No Limit	6000 mg/L
Fluoride	No Limit	No Limit	65 mg/L	Total Dissolved Solid	No Limit	No Limit	10000 mg/L
Formaldehyde	No Limit	No Limit	5.0 mg/L[1]	Total Toxic Organics[5]	No Limit	No Limit	1.0 mg/L
Lead	No Limit	No Limit	0.5 mg/L[1]	Zinc[6]	No Limit	No Limit	2.0 mg/L[1]

[1]If the daily discharge (averaged over a one year period) at any single sampling location exceeds 50,000 gpd, the local discharge limit for that location shall not exceed ONE-HALF (1/2) of the local limit listed above.

[2]Dental facilities using mercury-containing amalgam shall not exceed a local discharge limit of 0.05 mg/L for mercury.

[3]These limits refer to either grab or 24-hour composite samples.

[4]This limit applies only to the following EPA categories: Non-EPA Non-SIUs, Metal Finishing (Copper), and Electroplating. This limit also applies to cooling towers discharging < 2,000 gpd at any facility.

[5]See Section XIII of this permit for a list of components of Total Toxic Organics.

[6]Vehicle service facilities shall not exceed a local discharge limit of 4.0 mg/L for zinc.

V. Quality Assurance/Quality Control: (MVCC 35.32.13 & 40 CFR 136)

All metals samples must be collected in duplicate and stored and preserved until the next sampling event for that parameter. The duplicate sample must be labeled as a duplicate and made available to any City inspector.

VI. Sample Collection and Analysis: (MVCC 35.32.13.3, 40 CFR 403.12(g)&(h), 40 CFR 136)

All metals shall be collected as specified in the individual permit requirements. Cyanide and Total Toxic Organics (TTO) shall always be collected as grab samples. Samples shall be analyzed by an analytical laboratory approved by the State of Cal. Dept. of Health Services. Sample collection, preservation, and analysis shall be in accordance with EPA regulations (40 CFR 136) and the City of Mountain View's "Sample Collection, Analysis and Reporting Instructions".

VII. Violation Reporting & Follow-Up: (MVCC 35.32.6.2 & 40 CFR 403.12(f) & (g))

If the results of sampling or pH analysis exceed applicable limit(s), or any discharges meet the definition of hazardous waste, you shall:

1) VERBALLY NOTIFY THE CITY OF MOUNTAIN VIEW AT 650-903-6378 AND THE PALO ALTO WATER QUALITY CONTROL PLANT AT 650-329-2598 WITHIN 24 HOURS of knowledge of the violation. If an accidental discharge, slug discharge, or upset or failure of the pretreatment system occurs, verbal notification shall be made within 15 minutes of knowledge of the condition;

2) SUBMIT A WRITTEN REPORT WITHIN 15 WORKING DAYS of knowledge of the violation explaining: the cause, nature volume and duration of the violation, and mitigation measures taken to correct it and prevent reoccurrence;

3) INITIATE A SAMPLING/ANALYSIS PROGRAM demonstrating up to 21 consecutive days of compliance. The first sample result shall be submitted within 30 days of becoming aware of the violation.

VIII. Penalty Provisions: (MVCC 35.32.15)

Any person who violates any provision of this permit, "Notice of Violation", or Chapter 35 MVCC, may be subject to criminal, civil, or administrative penalties. Civil penalties shall not exceed $25,000/day per violation. Administrative penalties shall not exceed the following: (1) $2,000/day for failing or refusing to furnish technical or monitoring reports; (2) $3,000/day for failing or refusing to comply with a compliance schedule; (3) $5,000/day/violation for discharges in violation of any waste discharge limitation, permit condition, or requirement; and (4) $10/gallon for discharges in violation of any suspension, cease and desist order, or any prohibition issued by the City.

IX. Record-Keeping Requirements: (40 CFR 403.12(o))

All Industrial Users shall maintain records for all information resulting from any monitoring activities conducted. Such records shall include for all samples:

1) The date, exact place, method, and time of sampling and the names of the peron or persons taking the samples;
2) The dates analyses were performed;
3) Who performed the analyses;
4) The analytical techniques/methods used; and
5) The results of such analysis.

All Industrial Users shall maintain for a minimum of 3 years any records of monitoring activities and results, and shall make such records available for inspection and copying by the City of Mountain View and Palo Alto Water Quality Control Plant. This period of retention shall be extended during the course of any unresolved litigation regarding the discharge of pollutants by the Industrial User or the operation of the POTW Pretreatment Program or when requested by the Director or the Regional Administrator.

X. Notification of Changed Discharge: (40 CFR 403.12(j))

All Industrial Users shall promptly notify the City of Mountain View at 650-903-6378 and the Palo Alto Water Quality Control Plant at 650-329-2598 in advance of any substantial change in the volume or character of pollutants in their discharge, including the characteristic hazardous wastes for which the Industrial User has submitted initial notification under 40 CFR 403.12(p).

XI. Notification of Bypass: (40 CFR 403.17(c)(2))

All Industrial Users shall verbally notify the City of Mountain View at 650-903-6378 and Palo Alto Water Quality Control Plant at 650-329-2598 of an unanticipated bypass (intentional diversion of its wastestream from the treatment facility) within 24 hours from the time the Industrial User becomes aware of the bypass. A written submission shall also be provided within 5 days of the time the Industrial User becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

XII. Transferability of Permit: (MVCC 35.32.2.4)

This permit is not transferable without prior written notification to and approval by the City and the assumption of all permit conditions by the new owner/operator.

XIII. Definition of Total Toxic Organics: (40 CFR 469.12)

The term "total toxic organics" (TTO) means the sum of the concentrations for each of the following toxic organic components found in the discharge at a concentration greater than ten (10) micrograms per liter. The facility's local TTO and STO limits apply to all of the compounds listed below. Those compounds analyzed using EPA Method 601/602 or 624 are identified by a "■".

■Acenaphthene	■2-Chlorophenol	■Methyl bromide	■Diethyl phthalate	■4,4-DDT
■Acrolein	■1,2-Dichlorobenzene	■Bromoform	■Dimethyl phthalate	■4,4-DDE

COMMENTS/EXPLANATION FOR MISSING WASTEWATER ANALYSIS:

I certify that the wastes discharged during the reporting period do not constitute hazardous waste under Chapter 6.5 of the Health and Safety Code [Sec. 25115 and 25117] and Title 22 of the California Code of Regulations [Sec. 66680-66746] at the point of discharge into the City sanitary sewer system. If I am a zero discharger, I certify that I have not discharged any categorical wastes and will not discharge them without prior notification to the City.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. [40 CFR 403.12(l)]

EPA Category/Subcategory:
Reference:

POST IN A CONSPICUOUS PLACE AT THE "PERMITTED FACILITY" SITE

I. Discharge Limitations:

Process Discharge (industrial waste) shall not exceed 100 Gallons Per Day (GPD).
(Location A1: 100 GPD)
Total Discharge (industrial and domestic waste) shall not exceed 1,100 Gallons Per Day (GPD).

II. Special Conditions/Requirements:

1. Sump cleaning and sludge removal shall be conducted once each quarter. Maintain cleaning records on site.

III. Self-Monitoring Sampling Analysis:

Pollutant	Sampling Frequency	Sample Type	Sampling Location(s)*	Federal Maximum for any 1 day (mg/L)	Federal Avg. of daily values for 30 consec.days (mg/L)	Local Limit (mg/L)
Copper	Quarterly	Grab	A1	No Limit	No Limit	2
Lead	Quarterly	Grab	A1	No Limit	No Limit	.5
Zinc	Quarterly	Grab	A1	No Limit	No Limit	4

*Sampling Location A1 is at the discharge end of the oil-water separator (clarifier) sump at the east end of the building.

IV. Wastewater Discharge Limits: (MVCC 35.32.12 & CFR 40)

Your industrial wastewater effluent shall not exceed the following limits:

Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]	Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]
Arsenic	No Limit	No Limit	0.1 mg/L[1]	Manganese	No Limit	No Limit	1.0 mg/L[1]
Barium	No Limit	No Limit	5.0 mg/L[1]	Mercury[2]	No Limit	No Limit	0.01 mg/L[2]
Berrylium	No Limit	No Limit	0.75 mg/L[1]	Nickel	No Limit	No Limit	0.5 mg/L
Boron	No Limit	No Limit	1.0 mg/L[1]	Oil & Grease	No Limit	No Limit	200 mg/L
Cadmium	No Limit	No Limit	0.1 mg/L[1]	Phenols	No Limit	No Limit	1.0 mg/L
Chromium Hex.	No Limit	No Limit	1.0 mg/L[1]	pH[5]	No Limit	No Limit	5.0-11
Chromium, Total	No Limit	No Limit	2.0 mg/L[1]	Selenium	No Limit	No Limit	1.0 mg/L[1]
Cobalt	No Limit	No Limit	1.0 mg/L[1]	Silver, Photo	No Limit	No Limit	0.50 mg/L
Copper[4]	No Limit	No Limit	2.0 mg/L[1]	Silver, Non-Photo	No Limit	No Limit	0.25 mg/L
Copper	No Limit	No Limit	0.25 mg/L	Single Toxic Organic	No Limit	No Limit	0.75 mg/L
Cyanide	No Limit	No Limit	0.5 mg/L[1]	Suspended Solids	No Limit	No Limit	6000 mg/L
Fluoride	No Limit	No Limit	65 mg/L	Total Dissolved Solid	No Limit	No Limit	10000 mg/L
Formaldehyde	No Limit	No Limit	5.0 mg/L[1]	Total Toxic Organics[6]	No Limit	No Limit	1.0 mg/L
Lead	No Limit	No Limit	0.5 mg/L[1]	Zinc[7]	No Limit	No Limit	2.0 mg/L[1]

[1]If the discharge at any single sampling location exceeds 50,000 gpd, the local discharge limit for that location shall not exceed ONE-HALF (1/2) of the local limit listed above.

[2]Dental facilities using mercury-containing amalgam shall not exceed a local discharge limit of 0.05 mg/L for mercury.

[3]These limits refer to either grab or 24-hour composite samples.

[4]This limit applies only to the following EPA categories: Non-EPA Non-SIUs, Metal Finishing (Copper), and Electroplating. This limit also applies to cooling towers discharging < 2,000 gpd at any facility.

[5]Where pH is monitored continuously, no individual deviation from this range may exceed 20 minutes in length for discharges < 10,000 gpd, nor 10 minutes in length for discharges > 10,000 gpd. The total time of deviations during any seven day period shall not exceed 60 minutes. Any pH reading ≤ 2.0 or ≥ 12.5 is prohibited.

[6] See Section XIII of this permit for a list of components of Total Toxic Organics.

[7]Vehicle service facilities shall not exceed a local discharge limit of 4.0 mg/L for zinc.

V. Quality Assurance/Quality Control: (MVCC 35.32.13 & 40 CFR 136)

All metals samples must be collected in duplicate and stored and preserved until the next sampling event for that parameter. The duplicate sample must be labeled as a duplicate and made available to any City inspector.

VI. Sample Collection and Analysis: (MVCC 35.32.13.3, 40 CFR 403.12(g)&(h), 40 CFR 136)

All metals shall be collected as specified in the individual permit requirements. Cyanide and Total Toxic Organics (TTO) shall always be collected as grab samples. Samples shall be analyzed by an analytical laboratory approved by the State of Cal. Dept. of Health Services. Sample collection, preservation, and analysis shall be in accordance with EPA regulations (40 CFR 136) and the City of Mountain View's "Sample Collection, Analysis and Reporting Instructions".

VII. Violation Reporting & Follow-Up: (MVCC 35.32.6.2 & 40 CFR 403.12(f) & (g))

If the results of sampling or pH analysis exceed applicable limit(s), or any discharges meet the definition of hazardous waste, you shall:

1) VERBALLY NOTIFY THE CITY OF MOUNTAIN VIEW AT 650-903-6378 AND THE PALO ALTO WATER QUALITY CONTROL PLANT AT 650-329-2598 WITHIN 24 HOURS of knowledge of the violation. If an accidental discharge, slug discharge, or upset or failure of the pretreatment system occurs, verbal notification shall be made within 15 minutes of knowledge of the condition;

2) SUBMIT A WRITTEN REPORT WITHIN 15 WORKING DAYS of knowledge of the violation explaining: the cause, nature volume and duration of the violation, and mitigation measures taken to correct it and prevent reoccurrence;

3) INITIATE A SAMPLING/ANALYSIS PROGRAM demonstrating up to 21 consecutive days of compliance. The first sample result shall be submitted within 30 days of becoming aware of the violation.

VIII. Penalty Provisions: (MVCC 35.32.15)

Any person who violates any provision of this permit, "Notice of Violation", or Chapter 35 MVCC, may be subject to criminal, civil, or administrative penalties. Civil penalties shall not exceed $25,000/day per violation. Administrative penalties shall not exceed the following: (1) $2,000/day for failing or refusing to furnish technical or monitoring reports; (2) $3,000/day for failing or refusing to comply with a compliance schedule; (3) $5,000/day/violation for discharges in violation of any waste discharge limitation, permit condition, or requirement; and (4) $10/gallon for discharges in violation of any suspension, cease and desist order, or any prohibition issued by the City.

IX. Record-Keeping Requirements: (40 CFR 403.12(o))

All Industrial Users shall maintain records for all information resulting from any monitoring activities conducted. Such records shall include for all samples:

1) The date, exact place, method, and time of sampling and the names of the peron or persons taking the samples;
2) The dates analyses were performed;
3) Who performed the analyses;
4) The analytical techniques/methods used; and
5) The results of such analysis.

All Industrial Users shall maintain for a minimum of 3 years any records of monitoring activities and results, and shall make such records available for inspection and copying by the City of Mountain View and Palo Alto Water Quality Control Plant. This period of retention shall be extended during the course of any unresolved litigation regarding the discharge of pollutants by the Industrial User or the operation of the POTW Pretreatment Program or when requested by the Director or the Regional Administrator.

X. Notification of Changed Discharge: (40 CFR 403.12(j))

All Industrial Users shall promptly notify the City of Mountain View at 650-903-6378 and the Palo Alto Water Quality Control Plant at 650-329-2598 in advance of any substantial change in the volume or character of pollutants in their discharge, including the characteristic hazardous wastes for which the Industrial User has submitted initial notification under 40 CFR 403.12(p).

XI. Notification of Bypass: (40 CFR 403.17(c)(2))

All Industrial Users shall verbally notify the City of Mountain View at 650-903-6378 and Palo Alto Water Quality Control Plant at 650-329-2598 of an unanticipated bypass (intentional diversion of its wastestream from the treatment facility) within 24 hours from the time the Industrial User becomes aware of the bypass. A written submission shall also be provided within 5 days of the time the Industrial User becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

XII. Transferability of Permit: (MVCC 35.32.2.4)

This permit is not transferable without prior written notification to and approval by the City and the assumption of all permit conditions by the new owner/operator.

XIII. Definition of Total Toxic Organics: (40 CFR 469.12)

The term "total toxic organics" (TTO) means the sum of the concentrations for each of the following toxic organic components found in the discharge at a concentration greater than ten (10) micrograms per liter. The facility's local TTO and STO limits apply to all of the compounds listed below. Those compounds analyzed using EPA Method 601/602 or 624 are identified by a "▣".

▣Acenaphthene	▣2-Chlorophenol	▣Methyl bromide	▣Diethyl phthalate	▣4,4-DDT

ENVIRONMENTAL COMPLIANCE PLAN
Certification Form

Facility ID:	722
Updated:	2/10/2011

Business Name
El Camino Paving, Inc.

Facility Street Address
924 San Rafael Avenue

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the above facility:

I certify that: (Check the appropriate box.)

☒ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☐ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: Daniel Campos Title: Maintenance Supervisor

Signature: [signature] Date: 5-25-11

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) I
Emergency Procedures

Facility ID:	**722**
Updated:	**8/12/2009**

Business Name
El Camino Paving, Inc.

Facility Street Address
924 San Rafael Avenue

Emergency response to hazardous materials spills or releases is the responsibility of the ***business owner.*** The role of the Fire Department is to provide ***assistance*** to your primary response actions. This site-specific Emergency Response (Contingency) Plan describes your facility's plan for dealing with reportable discharges and shall be implemented immediately whenever they occur. Employees must understand their roles and responsibilities during such an emergency through on-going training and drills. For larger facilities, a more detailed plan may be substituted, but it must include all the items listed here. ***This plan shall be maintained on site for use in the event of an emergency and for inspection by the Fire Department.***

1. Evacuation Plan:

The following alarm signal(s) will be used to begin evacuation of this facility:
☐ Bells ☐ Horns/Sirens ☒ Verbal (i.e. Shouting) ☐ Other (Alarm
☒ Evacuation map is displayed throughout the facility inc. entrances to hazmat locations.

2. a. Emergency Contacts:

Fire/Police/Ambulance	Phone No. **911**
California Emergency Management Agency	Phone No. **(800) 852-7550**

b. Post-Incident Contacts:

Fire Department Fire and Environmental Protection Division	Phone No. **(650) 903-6378**
Santa Clara County Department of Environmental Health	Phone No. **(408) 918-3400**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(650) 573-3812**
Bay Area Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

c. Emergency Resources:

Poison Control Center	Phone No. **(800) 222-1222**
Nearest Hospital: El Camino Hospital	Phone No. 650-940-7000
Address: 2500 Grant Road	City: Mountain View
Hazwaste Cleanup Contractor: Nor Cal Oil	Phone No. 800-332-8710
Contact Name: Emma Puitt	EPA ID#: CAD982417255

3. Arrangements With Emergency Responders:

If you have made arrangements with any police department, fire department, hospital, cleanup contractor, or State or local emergency response team to provide specific emergency services, describe them below:

---

4. Emergency Procedures:

Emergency Coordinator (EC) Responsibilities:
a. Whenever there is a reportable hazardous materials spill or release emergency, the EC (or his/her designee) whose name is **Estevan L. Alva** and job title is **President** shall:

i. Identify the character, source, amount, and aerial extent of any released hazardous materials.

Daniel Campos — Maintenance Supervisor

Facility ID:	722
Updated:	8/12/2009

Business Name
El Camino Paving, Inc.
Facility Street Address
924 San Rafael Avenue

Emergency Coordinator (EC) Responsibilities (Continued):

ii. Assess possible hazards to human health or the environment that may result from the emergency. This assessment must consider both direct and indirect effects.

iii. Activate internal facility alarms or communication systems, where applicable, to notify all facility personnel.

iv. Notify and act as a liasion with the "Emergency Contacts" listed in item 2.a on the previous page.

v. Monitor for leaks, pressure build up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the emergency.

vi. Take all reasonable measures necessary to ensure that the emergency does not occur, reoccur, or spread to

b. Before facility operations are resumed in areas of the facility affected by the emergency, the EC shall:

i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from the emergency at the facility.

ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the emergency until cleanup procedures are completed.

iii. Ensure that all emergency equipment is cleaned, fit for use, available for use, or properly disposed of.

iv. Notify the applicable "Post-Incident Contacts" listed in item 2.b on the previous page.

Responsibilities of Personnel **Other** Than the EC:

Function:	*Name and Job Title:*
Shutdown of Operations/Systems:	Estevan L. Alva/President Melissa A Campos ~~Campos~~
Evacuation of Building Personnel:	Estevan L. Alva/President Melissa A Campos
Oversight of Outside Assembly Areas:	Walter Roland/Foreman Daniel Campos
Medical Treatment For Injuries (First Aid, CPR, etc.):	Estevan L. Alva/President Melissa A Campos

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials emergency that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any emergency situation which triggers implementation of this plan, a written Emergency Incident Report must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control and the Fire and Environmental Protection Division of the Mountain View Fire Department. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and complete description of the emergency;
d. Name and quantity of the hazardous material(s) involved;
e. The extent of personal injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where applicable;
g. The estimated quantity and disposition of recovered material that resulted from the emergency;
h. The cause(s) of the emergency;
i. The actions taken in response to the emergency; and
j. Administrative or engineering controls installed to prevent such emergencies in the future.

POST IN A CONSPICUOUS PLACE AT THE "PERMITTED FACILITY" SITE

I. Discharge Limitations:

Process Discharge (industrial waste) shall not exceed 100 Gallons Per Day (GPD).
(Location A1: 100 GPD)
Total Discharge (industrial and domestic waste) shall not exceed 1,100 Gallons Per Day (GPD).

II. Special Conditions/Requirements:

1. Sump cleaning and sludge removal shall be conducted once each quarter. Maintain cleaning records on site.

III. Self-Monitoring Sampling Analysis:

Pollutant	Sampling Frequency	Sample Type	Sampling Location(s)*	Federal Maximum for any 1 day (mg/L)	Federal Avg. of daily values for 30 consec.days (mg/L)	Local Limit (mg/L)
Copper	Quarterly	Grab	A1	No Limit	No Limit	2
Lead	Quarterly	Grab	A1	No Limit	No Limit	.5
Zinc	Quarterly	Grab	A1	No Limit	No Limit	4

*Sampling Location A1 is at the discharge end of the oil-water separator (clarifier) sump at the east end of the building.

IV. Wastewater Discharge Limits: (MVCC 35.32.12 & CFR 40)

Your industrial wastewater effluent shall not exceed the following limits:

Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]	Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]
Arsenic	No Limit	No Limit	0.1 mg/L[1]	Manganese	No Limit	No Limit	1.0 mg/L[1]
Barium	No Limit	No Limit	5.0 mg/L[1]	Mercury[2]	No Limit	No Limit	0.01 mg/L[2]
Berrylium	No Limit	No Limit	0.75 mg/L[1]	Nickel	No Limit	No Limit	0.5 mg/L
Boron	No Limit	No Limit	1.0 mg/L[1]	Oil & Grease	No Limit	No Limit	200 mg/L
Cadmium	No Limit	No Limit	0.1 mg/L[1]	Phenols	No Limit	No Limit	1.0 mg/L
Chromium Hex.	No Limit	No Limit	1.0 mg/L[1]	pH[5]	No Limit	No Limit	5.0-11
Chromium, Total	No Limit	No Limit	2.0 mg/L[1]	Selenium	No Limit	No Limit	1.0 mg/L[1]
Cobalt	No Limit	No Limit	1.0 mg/L[1]	Silver, Photo	No Limit	No Limit	0.50 mg/L
Copper[4]	No Limit	No Limit	2.0 mg/L[1]	Silver, Non-Photo	No Limit	No Limit	0.25 mg/L
Copper	No Limit	No Limit	0.25 mg/L	Single Toxic Organic	No Limit	No Limit	0.75 mg/L
Cyanide	No Limit	No Limit	1.0 mg/L[1]	Suspended Solids	No Limit	No Limit	6000 mg/L
Fluoride	No Limit	No Limit	65 mg/L	Total Dissolved Solid	No Limit	No Limit	10000 mg/L
Formaldehyde	No Limit	No Limit	5.0 mg/L[1]	Total Toxic Organics[6]	No Limit	No Limit	1.0 mg/L
Lead	No Limit	No Limit	0.5 mg/L[1]	Zinc[7]	No Limit	No Limit	2.0 mg/L[1]

[1]If the discharge at any single sampling location exceeds 50,000 gpd, the local discharge limit for that location shall not exceed ONE-HALF (1/2) of the local limit listed above.

[2]Dental facilities using mercury-containing amalgam shall not exceed a local discharge limit of 0.05 mg/L for mercury.

[3]These limits refer to either grab or 24-hour composite samples.

[4]This limit applies only to the following EPA categories: Non-EPA Non-SIUs, Metal Finishing (Copper), and Electroplating. This limit also applies to cooling towers discharging < 2,000 gpd at any facility.

[5]Where pH is monitored continuously, no individual deviation from this range may exceed 20 minutes in length for discharges < 10,000 gpd, nor 10 minutes in length for discharges > 10,000 gpd. The total time of deviations during any seven day period shall not exceed 60 minutes. Any pH reading ≤ 2.0 or ≥ 12.5 is prohibited.

[6]See Section XIII of this permit for a list of components of Total Toxic Organics.

[7]Vehicle service facilities shall not exceed a local discharge limit of 4.0 mg/L for zinc.

V. Quality Assurance/Quality Control: (MVCC 35.32.13 & 40 CFR 136)

All metals samples must be collected in duplicate and stored and preserved until the next sampling event for that parameter. The duplicate sample must be labeled as a duplicate and made available to any City inspector.

VI. Sample Collection and Analysis: (MVCC 35.32.13.3, 40 CFR 403.12(g)&(h), 40 CFR 136)

All metals shall be collected as specified in the individual permit requirements. Cyanide and Total Toxic Organics (TTO) shall always be collected as grab samples. Samples shall be analyzed by an analytical laboratory approved by the State of Cal. Dept. of Health Services.

Sample collection, preservation, and analysis shall be in accordance with EPA regulations (40 CFR 136) and the City of Mountain View's "Sample Collection, Analysis and Reporting Instructions".

VII. Violation Reporting & Follow-Up: (MVCC 35.32.6.2 & 40 CFR 403.12(f) & (g))

If the results of sampling or pH analysis exceed applicable limit(s), or any discharges meet the definition of hazardous waste, you shall:

1) VERBALLY NOTIFY THE CITY OF MOUNTAIN VIEW AT 650-903-6378 AND THE PALO ALTO WATER QUALITY CONTROL PLANT AT 650-329-2598 WITHIN 24 HOURS of knowledge of the violation. If an accidental discharge, slug discharge, or upset or failure of the pretreatment system occurs, verbal notification shall be made within 15 minutes of knowledge of the condition;

2) SUBMIT A WRITTEN REPORT WITHIN 15 WORKING DAYS of knowledge of the violation explaining: the cause, nature, volume and duration of the violation, and mitigation measures taken to correct it and prevent reoccurrence;

3) INITIATE A SAMPLING/ANALYSIS PROGRAM demonstrating up to 21 consecutive days of compliance. The first sample result shall be submitted within 30 days of becoming aware of the violation.

VIII. Penalty Provisions: (MVCC 35.32.15)

Any person who violates any provision of this permit, "Notice of Violation", or Chapter 35 MVCC, may be subject to criminal, civil, or administrative penalties. Civil penalties shall not exceed $25,000/day per violation. Administrative penalties shall not exceed the following: (1) $2,000/day for failing or refusing to furnish technical or monitoring reports; (2) $3,000/day for failing or refusing to comply with a compliance schedule; (3) $5,000/day/violation for discharges in violation of any waste discharge limitation, permit condition, or requirement; and (4) $10/gallon for discharges in violation of any suspension, cease and desist order, or any prohibition issued by the City.

IX. Record-Keeping Requirements: (40 CFR 403.12(o))

All Industrial Users shall maintain records for all information resulting from any monitoring activities conducted. Such records shall include for all samples:

1) The date, exact place, method, and time of sampling and the names of the peron or persons taking the samples;
2) The dates analyses were performed;
3) Who performed the analyses;
4) The analytical techniques/methods used; and
5) The results of such analysis.

All Industrial Users shall maintain for a minimum of 3 years any records of monitoring activities and results, and shall make such records available for inspection and copying by the City of Mountain View and Palo Alto Water Quality Control Plant. This period of retention shall be extended during the course of any unresolved litigation regarding the discharge of pollutants by the Industrial User or the operation of the POTW Pretreatment Program or when requested by the Director or the Regional Administrator.

X. Notification of Changed Discharge: (40 CFR 403.12(j))

All Industrial Users shall promptly notify the City of Mountain View at 650-903-6378 and the Palo Alto Water Quality Control Plant at 650-329-2598 in advance of any substantial change in the volume or character of pollutants in their discharge, including the characteristic hazardous wastes for which the Industrial User has submitted initial notification under 40 CFR 403.12(p).

XI. Notification of Bypass: (40 CFR 403.17(c)(2))

All Industrial Users shall verbally notify the City of Mountain View at 650-903-6378 and Palo Alto Water Quality Control Plant at 650-329-2598 of an unanticipated bypass (intentional diversion of its wastestream from the treatment facility) within 24 hours from the time the Industrial User becomes aware of the bypass. A written submission shall also be provided within 5 days of the time the Industrial User becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

XII. Transferability of Permit: (MVCC 35.32.2.4)

This permit is not transferable without prior written notification to and approval by the City and the assumption of all permit conditions by the new owner/operator.

XIII. Definition of Total Toxic Organics: (40 CFR 469.12)

The term "total toxic organics" (TTO) means the sum of the concentrations for each of the following toxic organic components found in the discharge at a concentration greater than ten (10) micrograms per liter. The facility's local TTO and STO limits apply to all of the compounds listed below. Those compounds analyzed using EPA Method 601/602 or 624 are identified by a "■".

❑Acenaphthene	❑2-Chlorophenol	❑Methyl bromide	❑Diethyl phthalate	❑4,4-DDT
❑Acrolein	❑1,2-Dichlorobenzene	❑Bromoform	❑Dimethyl phthalate	❑4,4-DDE

*** LOCAL FEES ***

Fee

(These fees support the City of Mountain View's local code enforcement programs. For questions, contact Jaymae Wentker, Fire Marshal, at 650-903-6378.)

Hazardous Materials Fee

Combustible Liquid -- 1,613 Gal	$215.00
Corrosive Liquid -- 81 Gal	$215.00
Flammable Gas -- 2,400 Cu Ft	$323.00
Flammable Liquid -- 45 Gal	$108.00
Miscellaneous Liquid -- 700 Gal	$162.00
Nonflammable Gas -- 950 Cu Ft	$162.00
Nonregulated Solid -- 200 Lbs	$0.00

Fire Permit Fee $375.00
This fee is calculated based on specific processes conducted and square footage of the facility.

Wastewater Sampling and Analysis Fee
This fee covers the City's cost of wastewater sampling and analysis. It is provided as a service in leiu of self-monitoring by the business.

1st quarter 2008 monitoring for Cu, Pb, and Zn	$129.00
2nd quarter 2008 monitoring for Cu, Pb and Zn	$129.00
3rd quarter 2008 monitoring for Cu, Pb and Zn	$134.00
4th quarter 2008 monitoring for Cu, Pb, and Zn	$134.00

COUNTY FEES

(These fees support the Santa Clara County Environmental Health Department's hazardous waste generator program. For questions, contact Nicole Pullman, CUPA Program Manager, at 408-918-1984.)

Hazardous Waste Generator Program Fee $400.00
This fee is calculated based on the types and amounts of hazardous waste generated annually.

*** STATE FEES ***

(These fees support various departments of Cal EPA. For questions, contact Kareem Taylor, Chief of the Unified Programs Section, at 916-327-9557.)

CUPA Oversight Service Charge $24.00
This fee is established by Cal EPA to recover their oversight costs in administering the CUPA programs.

Process Discharge (industrial waste) shall not exceed 100 Gallons Per Day (GPD).
(Location A1: 100 GPD)
Total Discharge (industrial and domestic waste) shall not exceed 1,100 Gallons Per Day (GPD).

II. Special Conditions/Requirements:

1. Sump cleaning and sludge removal shall be conducted once each quarter. Maintain cleaning records on site.

III. Self-Monitoring Sampling Analysis:

Pollutant	Sampling Frequency	Sample Type	Sampling Location(s)*	Federal Maximum for any 1 day (mg/L)	Federal Avg. of daily values for 30 consec.days (mg/L)	Local Limit (mg/L)
Copper	Quarterly	Grab	A1	No Limit	No Limit	2
Lead	Quarterly	Grab	A1	No Limit	No Limit	.5
Zinc	Quarterly	Grab	A1	No Limit	No Limit	4

*Sampling Location A1 is at the discharge end of the oil-water separator (clarifier) sump at the east end of the building.

IV. Wastewater Discharge Limits: (MVCC 35.32.12 & CFR 40)

Your industrial wastewater effluent shall not exceed the following limits:

Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[1]
Arsenic	No Limit	No Limit	0.1 mg/L[1]
Boron	No Limit	No Limit	1.0 mg/L[1]
Cadmium	No Limit	No Limit	0.1 mg/L[1]
Chromium Hex.	No Limit	No Limit	1.0 mg/L[1]
Chromium, Total	No Limit	No Limit	2.0 mg/L[1]
Copper[4]	No Limit	No Limit	2.0 mg/L[1]
Copper	No Limit	No Limit	0.25 mg/L
Cyanide	No Limit	No Limit	1.0 mg/L[1]
Fluoride	No Limit	No Limit	65 mg/L
Formaldehyde	No Limit	No Limit	5.0 mg/L[1]
Lead	No Limit	No Limit	0.5 mg/L[1]
Mercury[2]	No Limit	No Limit	0.01 mg/L[2]

Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[1]
Nickel	No Limit	No Limit	0.5 mg/L
Oil & Grease	No Limit	No Limit	200 mg/L
Phenols	No Limit	No Limit	1.0 mg/L
pH[5]	No Limit	No Limit	5.0-11
Selenium	No Limit	No Limit	1.0 mg/L[1]
Silver, Photo	No Limit	No Limit	0.50 mg/L
Silver, Non-Photo	No Limit	No Limit	0.25 mg/L
Single Toxic Organic	No Limit	No Limit	0.75 mg/L
Suspended Solids	No Limit	No Limit	6000 mg/L
Total Dissolved Solid	No Limit	No Limit	10000 mg/L
Total Toxic Organics[6]	No Limit	No Limit	1.0 mg/L
Zinc[7]	No Limit	No Limit	2.0 mg/L[1]

[1]If the discharge at any single sampling location exceeds 50,000 gpd, the local discharge limit for that location shall not exceed ONE-HALF (1/2) of the local limit listed above.

[2]Dental facilities using mercury-containing amalgam shall not exceed a local discharge limit of 0.05 mg/L for mercury.

[3]These limits refer to either grab or 24-hour composite samples.

[4]This limit applies only to the following EPA categories: Non-EPA Non-SIUs, Metal Finishing (Copper), and Electroplating. This limit also applies to cooling towers discharging < 2,000 gpd at any facility.

[5]Where pH is monitored continuously, no individual deviation from this range may exceed 20 minutes in length for discharges < 10,000 gpd, nor 10 minutes in length for discharges > 10,000 gpd. The total time of deviations during any seven day period shall not exceed 60 minutes. Any pH reading ≤ 2.0 or ≥ 12.5 is prohibited.

[6]See Section XIII of this permit for a list of components of Total Toxic Organics.

[7]Vehicle service facilities shall not exceed a local discharge limit of 4.0 mg/L for zinc.

V. Quality Assurance/Quality Control: (MVCC 35.32.13 & 40 CFR 136)

All metals samples must be collected in duplicate and stored and preserved until the next sampling event for that parameter. The duplicate sample must be labeled as a duplicate and made available to any City inspector.

VI. Sample Collection and Analysis: (MVCC 35.32.13.3, 40 CFR 403.12(g)&(h), 40 CFR 136)

All metals shall be collected as specified in the individual permit requirements. Cyanide and Total Toxic Organics (TTO) shall always be collected as grab samples. Samples shall be analyzed by an analytical laboratory approved by the State of Cal. Dept. of Health Services. Sample collection, preservation, and analysis shall be in accordance with EPA regulations (40 CFR 136) and the City of Mountain View's "Sample Collection, Analysis and Reporting Instructions".

VII. Violation Reporting & Follow-Up: (MVCC 35.32.6.2 & 40 CFR 403.12(f) & (g))

If the results of any sampling or pH analysis exceed the applicable limit(s), or any discharges meet the definition of a hazardous waste, you shall:

1) VERBALLY NOTIFY THE CITY OF MOUNTAIN VIEW AT 650-903-6378 AND THE PALO ALTO WATER QUALITY CONTROL PLANT AT 650-329-2598 WITHIN 24 HOURS of knowledge of the violation. If an accidental discharge, slug discharge, or upset or failure of the pretreatment system occurs, verbal notification shall be made within 15 minutes of knowledge of the condition;

2) SUBMIT A WRITTEN REPORT WITHIN 15 WORKING DAYS of knowledge of the violation explaining: the cause, nature, volume and duration of the violation, and mitigation measures taken to correct it and prevent reoccurrence;

3) INITIATE A SAMPLING/ANALYSIS PROGRAM demonstrating up to 21 consecutive days of compliance. The first sample result shall be submitted within 30 days of becoming aware of the violation.

VIII. Penalty Provisions: (MVCC 35.32.15)

Any person who violates any provision of this permit, "Notice of Violation", or Chapter 35 MVCC, may be subject to criminal, civil, or administrative penalties. Civil penalties shall not exceed $25,000/day per violation. Administrative penalties shall not exceed the following: (1) $2,000/day for failing or refusing to furnish technical or monitoring reports; (2) $3,000/day for failing or refusing to comply with a compliance schedule; (3) $5,000/day/violation for discharges in violation of any waste discharge limitation, permit condition, or requirement; and (4) $10/gallon for discharges in violation of any suspension, cease and desist order, or any prohibition issued by the City.

X. *Record-Keeping Requirements:* (40 CFR 403.12(o))

All Industrial Users shall maintain records for all information resulting from any monitoring activities conducted. Such records shall ıclude for all samples:

1) The date, exact place, method, and time of sampling and the names of the peron or persons taking the samples;
2) The dates analyses were performed;
3) Who performed the analyses;
4) The analytical techniques/methods used; and
5) The results of such analysis.

ıll Industrial Users shall maintain for a minimum of 3 years any records of monitoring activities and results, and shall make such records vailable for inspection and copying by the City of Mountain View and Palo Alto Water Quality Control Plant. This period of retention shall be xtended during the course of any unresolved litigation regarding the discharge of pollutants by the Industrial User or the operation of ne POTW Pretreatment Program or when requested by the Director or the Regional Administrator.

Notification of Changed Discharge: (40 CFR 403.12(j))

All Industrial Users shall promptly notify the City of Mountain View at 650-903-6378 and the Palo Alto Water Quality Control Plant t 650-329-2598 in advance of any substantial change in the volume or character of pollutants in their discharge, including the haracteristic hazardous wastes for which the Industrial User has submitted initial notification under 40 CFR 403.12(p).

XI. Notification of Bypass: (40 CFR 403.17(c)(2))

All Industrial Users shall verbally notify the City of Mountain View at 650-903-6378 and Palo Alto Water Quality Control Plant it 650-329-2598 of an unanticipated bypass (intentional diversion of its wastestream from the treatment facility) within 24 hours from the ime the Industrial User becomes aware of the bypass. A written submission shall also be provided within 5 days of the time the Industrial Jser becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, ncluding exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

XII. Transferability of Permit: (MVCC 35.32.2.4)

This permit is not transferable without prior written notification to and approval by the City and the assumption of all permit conditions by the new owner/operator.

XIII. Definition of Total Toxic Organics: (40 CFR 469.12)

The term "total toxic organics" (TTO) means the sum of the concentrations for each of the following toxic organic components found in the discharge at a concentration greater than ten (10) micrograms per liter. The facility's local TTO and STO limits apply to all of the compounds listed below. Those compounds analyzed using EPA Method 601/602 or 624 are identified by a "▣".

❑Acenaphthene	❑2-Chlorophenol	❑Methyl bromide	❑Diethyl phthalate	❑4,4-DDT

Subject: Change in Sample Collection Frequency

Dear Ms. Alva,

The City of Mountain View's Fire and Environmental Protection Division implements a State of California mandated industrial waste control program, which regulates industrial waste process discharges into the sanitary sewer. The City regulates industrial discharges from different types of facilities by issuing permits and monitoring process waste discharge quality, including discharges from vehicle wash operations. Typically, the vehicle washing facility permits require businesses to collect and analyze quarterly self-monitoring samples for selected metals. Most facilities elect to utilize the City's contract monitoring professional, Dysert Environmental, Inc., to collect the monitoring samples and Accutest Analytical Labs, Inc. analyzes the monitoring samples.

The City has modified its Wastewater Discharge Permits, and the re-issued permit for your facility is included with this letter. Based on a recent review of your Facility wastewater discharge permit (# 722) and analytical results over the term of the Permits, The City of Mountain View is modifying Section III *Self-Monitoring Sampling Analysis* of the Wastewater Discharge Permits to reflect changes with the self-monitoring requirements. The City has **reduced** the sampling frequency requirement from a quarterly basis to a semi-annual basis. Samples will be collected in the first (1st) and third (3rd) quarters of the year (between January and March, and again between July and September). If your facilities utilize the City's contract monitoring professional, Dysert Environmental, Inc., to collect the monitoring samples we will notify Dysert Environmental of the change in self-monitoring requirements for your facility.

In addition to the change in the self-monitoring requirements, the method and time of year that you are invoiced for your wastewater sampling and analysis fees has changed. Effective January 2015, you will receive an invoice, along with your Periodic Report of Continued Compliance (PRCC) paperwork, for only your wastewater sampling and analysis fees owed for the previous year. Both the PRCC and the fees owed shall be submitted to the City no later than the specified "Due Date". Please note that additional monitoring will be conducted by staff from the Palo Alto Regional Water Quality Control Plant during the 2nd and 4th quarters of the year, but you will not be billed for those monitoring events.

The facility operator shall continue to clean and maintain the oil/water separator as frequently as needed to ensure compliance with the Discharge Permit. The facility operator is also required to submit, on a semi-annual basis, the maintenance log and any associated manifest to demonstrate compliance with maintaining the oil/water separator as specified in the Discharge Permit.

If you have questions, or if I can be of any assistance, please contact me at (650) 903-6224 or by e-mail at carrie.sandahl@mountainview.gov.

Sincerely,

Carrie Sandahl
Water Environment Specialist

Hi Melissa, Daniel and Stephanie-

This afternoon I conducted the second re-inspection of El Camino Paving's Yard in response to the initial inspection I conducted on June 28, 2013. Unfortunately most of the violations that were noted in the initial inspection and the subsequent re-inspection on 7/12/13 were not corrected. I did note that a new dumpster has replaced the old, broken dumpster as required in the inspection I conducted on 6/28/13. Thank you for addressing that violation. The violations that are outstanding are the following:

-cover or haul all non-active stockpiles (any stockpile of material that will not be used within a 7-day time period is considered a non-active stockpile)
-apply absorbent to all spills in yard
-absorbent has been applied to some of the spills, but the absorbent has not been collected for disposal. Please sweep up and collect all used absorbent that has been used to clean oil spills in the yard for hauling as a hazardous waste
-clean trash along the perimeter of the yard (lots of trash is accumulating near the Cadillac parked in the back of the yard)
-move indoors or double contain and cover hazardous materials stored outdoors (paints, pesticides, gas cans, lubricants, etc.)
-move all electronic equipment (T.V., computer parts, etc.) indoors or haul offsite
-double contain or haul all batteries
-clean up screws, nuts, bolts, etc. that have spilled out of the yellow shelving
-move indoors or haul radiator
-haul or cover used tires

I will send pictures of the areas of the yard that need attention in a few separate e-mails so as to not overwhelm your e-mail system. As I discussed with Melissa today, and with Daniel on multiple occasions, because of the chronic and continued nature of the violations at El Camino Paving, I will be issuing the facility a notice of violation (NOV) for the outstanding violations noted in the inspection reports and listed above. I'll be coming back out to re-inspect El Camino Paving no later than August 8, 2013. Please respond to this e-mail with your plan to address these outstanding violations.

Importance: High

Hi Stephanie-

The link below includes pictures of some of the areas at El Camino Paving that need to be cleaned up before next Tuesday. There's a reasonable chance of heavy rain by next Wednesday so it is extremely important that the yard at El Camino Paving gets cleaned up sufficiently by Tuesday the 24th. I'm planning on coming by El Camino Paving on Tuesday the 24th after 2pm to re-inspect. Thanks Stephanie- have a good weekend.

Subject: RE: Re-Inspection

Importance: High

Hi Stephanie-

Patrick and I swung by El Camino Paving to conduct a re-re-inspection and no one was on-site to meet. When will you be at El Camino Paving tomorrow (Thursday December 3, 2015)? I noticed that some areas of the yard appeared to have been swept up, but since the gate was closed I was not able to inspect the other areas of the yard. There is still a lot of absorbent that had not been swept up in the yard, and the large stockpiles of asphalt and concrete are still there, and have not been covered- nor have straw-wattles and/or absorbent 'socks' been laid around the stockpiles (I'm glad you were able to get some at Grainger).

Please make sure that all of the items noted on the inspection forms from 11/18/15 and 11/24/15 are completed by the inspection tomorrow. Pictures of what I could see from the parking lot area can be seen below. I will plan on inspecting the site again tomorrow at 2:30. Please ensure you are present at the inspection. Thanks Stephanie.

Periodic Report of Continued Compliance (PRCC)
From: 1/1/2016 to 6/30/2016

No metal or organic constituents were sampled or analyzed during this reporting period.

I certify that the wastes discharged during the reporting period do not constitute hazardous waste under Chapter 6.5 of the Health and Safety Code [Sec. 25115 and 25117] and Title 22 of the California Code of Regulations [Sec. 66680-66746] at the point of discharge into the City sanitary sewer system. If I am a zero discharger, I certify that I have not discharged any categorical wastes and will not discharge them without prior notification to the City.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. [40 CFR 122.22(d)]

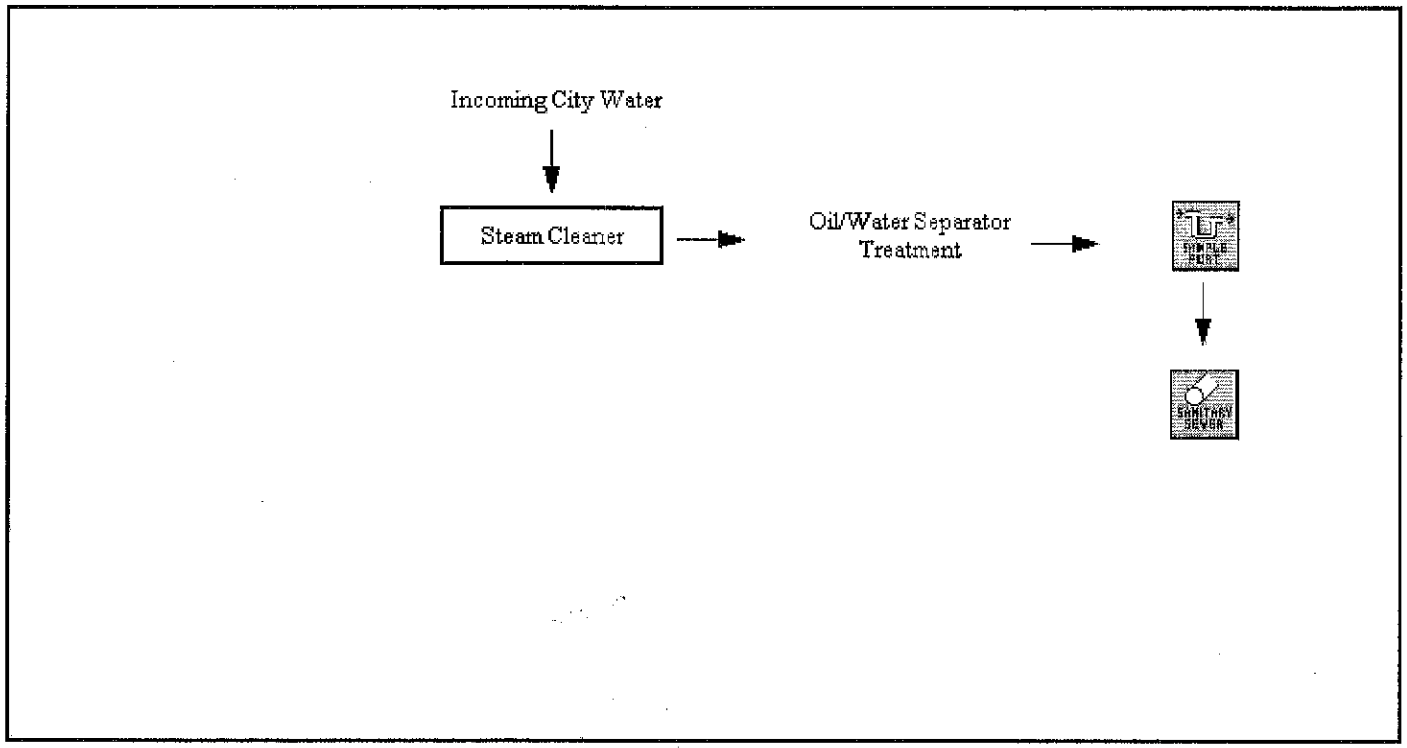
Facility ID:	722
Updated:	4/9/2014

Facility Street Address
924 San Rafael Avenue

Discharge Activity Name: Steam Cleaning **Activity** 1 **of** 1

Discharge Source (Map Location): "Sump" on map **RCMs Required?** No



Sanitary Sewer Discharge Data:
Average Daily Flow: 30 **GPD** **Maximum Daily Flow:** 100 **GPD** **Sample Port:** A1

REASONABLE CONTROL MEASURES (RCMs)

This section does NOT APPLY to this wastewater process discharge.

Control of Bath Make-Up

	Select Best Bath Chemistry
	Use Standard Recipes
	Use De-Ionized Water

Extension of Bath Life

	Bath Purification
	High Purity Anodes
	Change Bath by Analysis
	Purifiable Bath Chemistry

Pretreatment of Spent Baths

	Electrowin Spent Baths, or
	Batch Treat Spent Bath

Minimization of Drag-In

	Efficient Pre-Cleaning of Parts
	Use Coated Racks
	Optimization of Prior Processes
	Use Drag-In/Drag-Out Sequence

Flow Control

	Conductivity Controller, or
	Flow Timer, or
	Contact Switch

Countercurrent Rinsing

	Separate Tank, or
	Divide Existing Tank, or
	Spray Over Existing Tank

Minimization of Drag-Out

	Static Drag-Out Tank
	Spray Rinse, or
	Squeege, or
	Air Knives
	Drain Boards
	Splash Guard
	Drip Bar, or
	Increased Dwell Time
	Recapture Drag Out

Periodic Report of Continued Compliance (PRCC)
From: 7/1/2009 to 12/31/2009

COMMENTS/EXPLANATION FOR MISSING WASTEWATER ANALYSIS:

I certify that the wastes discharged during the reporting period do not constitute hazardous waste under Chapter 6.5 of the Health and Safety Code [Sec. 25115 and 25117] and Title 22 of the California Code of Regulations [Sec. 66680-66746] at the point of discharge into the City sanitary sewer system. If I am a zero discharger, I certify that I have not discharged any categorical wastes and will not discharge them without prior notification to the City.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. [40 CFR 403.12(l)]

TERMS: INVOICES OVER 30 DAYS ARE SUBJECT TO A 1.5% SERVICE CHARGE. CUSTOMER AGREES TO PAY ALL LEGAL FEES IF COURT ACTION BECOMES NECESSARY TO COLLECT THIS INVOICE.

American Valley Waste Oil hereby advises the above Generator the Generators shipment of used oil may be transported to a facility that is required to comply with federal regulations applicable to management of used oil, but that is not required to comply with the more stringent requirements applicable to hazardous waste management facilities. California facilities that handle or process used oil are required to meet those more stringent requirements, and some out-of-state facilities that process used oil also meet those requirements, engineering certifications of tank integrity, and financial assurances for closure and accidental releases. It is lawful to send used oil to out-of-state facilities that comply only with federal used oil management standards and not these more stringent requirements.

This notification is for information purposes only.

Driver signed _____ Date 7-1-8 Generator signed _____ Date 7-1-8

By signing the invoice the generator certifies that the generator has established a program to reduce the volume or quantity and toxicity of the hazardous waste to the degree, as determined by the generator, to be economically practicable.

By both parties signing this invoice it will serve as an agreement that American Valley will submit confirmations for (certain waste streams) to the generator that their waste has been transported to a license treatment or transfer facility.

Tank No.	Product	Size	Single/ Double Wall	Construction Type	Overspill Size	Cathodic Protect?	Inst. Date
1	Diesel	10K	Single	Steel	Grout Seal	No	
2	Regular	4K	Single	Steel	Grout Seal	No	
3	Unleaded	4K	Single	Steel	Grout Seal	No	
4							
5							
6							
7							
8							

IV. Monitoring Characteristics

1) Device Brand Name: Azonic Enviro-Ranger 12-Port System

2) Principle of Detection: MOS Vapor Sensor with Diaphragm Pump

3) Static or Aspirated? Aspirated

Alarm or Alarm and Memory or No Alarm? Alarm and Memory

Periodic or Continuous? Continuous

4) Date of Installation: 12/87

5) Initial Alarm Set Points: 2000 ppm

6) Vapor Probe Calibrated to What Chemical? Isobutane

7) Calibration Frequency: Annually

8) Calibrated to What Concentration? 1000 ppm Isobutane

9) Calibrated By: M.V. Fire Dept.

10) Background Soil Analysis: None Performed

SUBJECT: TANK MONITORING PLANS FOR 824 San Rafael
PC # 881606

Plans APPROVED, Subject to following conditions:

1) Sumps will be covered and product-tight;

2) A new site map showing probe #'s and well depths will be submitted after installation is completed;

3) The remaining tanks will be precision-tested (if not already done so) and results submitted to us prior to installation

FIRE DEPARTMENT
CITY OF MOUNTAIN VIEW
1000 Villa Street
Mountain View, CA 94041
ATTN: Chris Steck

Dear Chris,

The technical approach for El Camino paving re-installation of ER-1200 and Double-wall piping.

1. Testing procedure on sumps and piping will be as follows:

   Primary product piping will be pressure tested per requirements to be witnessed by Mountain View Fire Department. Upon successful completion of test, secondary containment piping will be tested in the presence of Mountain View Fire Department. Additionally, piping sumps will be water tested concurrently with the secondary piping test. Upon successful completion of tests, monitoring system will be re-installed.

2. Re-installation of monitoring system and sump monitoring will be as follows:

   Aspirated vapor system will be re-installed per manufacturers specifications and per illustrations (attached). Piping sumps to be monitored via the use of probes installed at each sump termination. Overspill protection will be installed (OPW 15 gallon) so as to eliminate alarms from surface fill contamination.

Thank you.

Sincerely,

Kevin Krause
Tank Management Consultant

IMPORTANT: A minimum 24-hour notice must be given to SCVWD Inspection Dept. prior to installing the annular seal. Call (408) 265-2600, Ext. 380. For weekends, holidays, after hours call (408) 395-8121 or (408) 265-2605.

El Camino Paving 6/24/88

1) Vapor Probe ALARM (#4) on 6/24, noticed & reported on 6/27. Small crack in piping below dispenser was discovered.

2) 6/27 - 7/1 Dirt & pea gravel around leak removed.

3) 7/6 Met Doug Coker on site. Probe #3 & 5 are now also in alarm. Unit placed in Print Run mode. Appears contamination has spread parallel to dispenser island toward probe #3. El Camino Paving to cut additional concrete, expose, & remove additional pea gravel/dirt. We will monitor vapor levels.

4) 7/11: Charlie TOUAR SAID HE MAY REPLACE ALL PRODUCT LINES. TOLD HIM THAT NEW LINES MUST BE SECONDARILY CONTAINED; SHOULD SUBMIT PLANS BEFORE HE DOES WORK.

5) 7/14: More dirt removed toward well #2. Tankpad being exposed. Hwy has self made overfills. Suggested that they precision test new lines (and tank if curious). Tanks are 4 years old. Petroleum Engineering to do new lines.

6) 7/19 Dropped off Tankremoval permit for 4K Tank. Monitoring now disconnected.

7) 7/27 (408) 729-4990
Kevin Krause/Azonic called to announce proposal. Will excavate around tanks, Tanks to be steamed up, lines to be replaced. Will call us to inspect

8) Called 7/29/88 Still working on quote

9) 8/9/88 Kevin Krause/Azonic to do tankremoval and reinstall lines; will deliver permit forms today. Est removal 8/17/88

OPTION #9

1) Is system functioning? Yes

2) Is system in alarm mode? No

3) Is alarm status checked daily and a log kept of the results? No

I. Genelco/Azonic 4-Probe Aspirated System

1) If system is in alarm, press "Reset" button and count the number of tones.
List alarm conditions: _____

2) Determine system status by removing cover, powering down and powering up again. List all information below:

Port #/Low Alarm Level: #1/_____ #2/_____ #3/_____ #4/_____

Port #/Extreme Alarm Level: #1/_____ #2/_____ #3/_____ #4/_____

Number of Records: _____

Date of Last Access: _____

3) Perform data dump. Start Date: _____ End Date: _____

4) Has system been functional since last inspection? _____
If not, specify reason and dates for alarms:

Probe No.	Date From ,,.To	Reason (Vapor,Power,etc)

1 Green
2 Yellow
3 Orange
4 Red
5 Blue

5) Check alarm thresholds. Are they set appropriately? _____

II. Genelco/Azonic 12-Port Aspirated System

IF SYSTEM IS IN ALARM, PROCEED DIRECTLY TO STEP #9.

1) Determine current vapor levels by pressing "Set" button, and after "Set Mode" is printed, press "Test 3". After this has been printed, enter the two digit probe number.

Port Number/Vapor Level: #1/ 37 #2/ 50 #3/ 85 #4/ 85

#5/ 59 #6/_____ #7/_____ #8/_____ #9/_____ #10/_____

#11/_____ #12/_____

When finished, press "Set", wait for the printer to show "Test 3", and press "Set" again. The printer should display "Set Mode".

2) Determine alarm level settings by pressing the "Set" key, followed by the "Enter" key. List information below:

Port Number/Alarm Level: #1/ 8000 #2/ 8000 #3/ 8000 #4 8000

#5/ 8000 #6/_____ #7/_____ #8/_____ #9/_____ #10/_____

#11/_____ #12/_____

3) Obtain copy of daily vapor level printout from facility operator.
Start Date: N/A End Date: _____

4) Has system been functional since last inspection? YES
If not, specify reason and dates for alarms:

Probe No.	Date From...To	Reason (Vapor, Power, etc)

5) Check alarm thresholds. Are they set appropriately? No - will have
lower to 2000ppm - done 4/1/88

6) Check alarm operation. (If system was in alarm initially, this need not be repeated). Press "Set" button, and after "Set Mode" appears, press "Test 0".
Is alarm in working condition? YES
Clear the alarm by pressing the "Set" key, and after "Set Mode" appears, press "Clear Alarm" key and "Enter" key.

7) Check self-diagnostics. (If system was in alarm initially, this need not be repeated). Press "Set" button, and after "Set Mode" appears, press "Test 6". If system diagnostics are acceptable, the words "Test Complete" will print within 2 minutes.
Do self-diagnostics show acceptable operation? YES

8) Check sensor callibration by first placing unit into "Print & Run" mode. Next, press "Set" key, and after "Set Mode" appears, press "Test 6". The printed "Set Number" should be within the 25-45 range.
Do probes show acceptable callibration? YES
Turn "Print & Run" mode OFF.

9) IF SYSTEM IS IN ALARM, PROCEED AS FOLLOWS:

A) Press "Set" button, and after "Set Mode" appears, press "Clear Alarm" and "Enter" button. The words "Alarm Clear" should be displayed.

B) Press "Set" button, and after "Set Mode" appears, press "Test 3". Press "13" (for port 13). Within 5 minutes, a printout of "garbage" should be displayed.

C) Press "Set" button, and after "Set Mode" appears, press "Test 6". If system diagnostics and background well are acceptable, the words "Test Complete" will print within 2 minutes.
Do self-diagnsotics show acceptable operation?_____
If so, proceed to STEP 1.

If not, stop trouble-shooting and call for service.

III. All Systems

1) Current vapor readings:

Well No.	Reading	Well No.	Reading
_____	_____	_____	_____
_____	_____	_____	_____

February 19 1987

Mr. Gene Johnson
EL CAMINO PAVING
924 San Rafael Ave.
Mountain View, CA 94043

Dear Mr. Johnson:

On February 19, 1987, I inspected your facility for compliance with the underground tank monitoring requirements of the Hazardous Materials Storage Ordinance (Chapter 24, MVMC).

This letter is to confirm that continuous monitoring is now being performed at El Camino Paving at 924 San Rafael, Mountain View, and that this does meet the monitoring requirements.

During the course of monitoring, if a leak is found, our office should be contacted immediately. Also, when Azonic removes the tape from the unit, please forward a copy to us.

If you have any questions, feel free to call me at (415) 966-6378. Thank you for your cooperation.

Sincerely,

Gary Leinweber
Hazardous Materials Specialist

UNDERGROUND TANK VIOLATIONS AT 924 SAN RAFAEL, MOUNTAIN VIEW

Dear Mr. Alva:

The Mountain View Fire Department has informed this office that this location has underground tanks which are not being monitored at the present time, and no removal plans have been submitted. It has requested that this office file a criminal complaint against you for the following violations of the Mountain View Municipal Code:

Section 24.3 of the Municipal Code requires a hazardous material storage permit.

Section 24.10 requires monitoring of underground tanks.

The violation of these sections has specifically been made a criminal offense which could result in your arrest, conviction and imprisonment for up to six months in jail, along with a $500 fine. Additionally, you could be found guilty of a separate offense for each day that these violations have been committed or permitted. Further injunctive action could be filed to prohibit continued or further use of underground tanks. If this matter is not corrected by you on or before 15 days from the date of this letter, this office will file a criminal complaint against you. If you wish to avoid such harsh criminal penalties, please comply immediately.

I sincerely hope that legal action against you may be avoided. If improvements are not made to install the appropriate monitoring systems, the tanks will have to be emptied and removed in accordance with local regulations. A closure plan must be filed

and approved by the Mountain View Fire Department, Hazardous Materials Section. If you have any questions concerning this matter, please do not hesitate to call this office or the Mountain View Fire Department at (415) 966-6378 at your earliest convenience.

Very truly yours,

Peter D. Bulens
City Attorney

-PROVISIONAL-
HAZARDOUS MATERIALS STORAGE PERMIT

Mr. Bryan Hackett
Hackett Construction
924 San Rafael Ave
Mountain View, CA 94043

PROVISIONAL PERMIT TO STORE HAZARDOUS MATERIALS AT
924 San Rafael Ave

This signed and dated letter is to be used as a Provisional Permit to Store Hazardous Materials, pursuant to the Mountain View Municipal Code, Chapter 24, Section 24.37. This Provisional Permit evidences that the firm or corporation named above has paid the applicable fees and is authorized to store hazardous materials at the facility indicated above in accordance with Chapter 24 of the Mountain View Municipal Code (MVMC). This Provisional Permit covers the use and operation of underground storage tank(s) that DO NOT have a MONITORING SYSTEM meeting the requirements of the MVMC.

Once in compliance with the MVMC, facilities with underground storage tank(s) will be issued Full Term Permits. Full Term Permits are to be renewed annually. THIS PROVISIONAL PERMIT IS VALID UNTIL SEPTEMBER 30, 1986. After said date, owners of underground storage tank(s) that are NOT in compliance with the MVMC will discontinue the use and remove the tank(s).

Kenneth R. Daly, Inspector
Hazardous Materials Division

CERTIFICATES OF DISPOSAL

August 25, 1988

H & H Ship Service Company certifies to AZONIC TECHNOLOGY that:

1. The storage tank(s), size(s) One (1) 4,000 Gals.

   removed from the EL CAMINO PAVING COMPANY

   facility at 924 San Rafael

   Mountain View, California

   were transported to H & H Ship Service Company, 220 China Basin Street, San Francisco, California 94107.

2. The following tank(s), H & H Job Number: 8575 have been steamed cleaned, cut with approximately 2' X 2' holes, rendered harmless and disposed of as scrap metal.

3. Disposal site: Levin Metals Corporation, Richmond, California.

4. The foregoing method of destruction/disposal is suitable for the materials involved, and fully complies with all applicable regulatory and permit requirements.

5. Should you require further information, please contact (415) 543-4835.

PERMIT CONDITIONS/PROCEDURES

I. TANK PREPARATION PROCEDURES

1. An inspection must be completed by the Fire Department before the tank(s) may be removed from the excavation. Appointments must be made 48 hours in advance. Call (415) 966-6378 to arrange for an inspection appointment. The Demolition Permit must be displayed at the job site.

2. Arrange for a **State Certified** laboratory to analyze the required soil sample(s) and for sampling by a qualified independent third party.

3. Tank(s) shall be emptied of all liquid product.

4. Render tank(s) inert with a minimum 15 pounds of dry ice per each 1,000 gallons of tank volume. Tank oxygen level must be reduced to less than 10 percent. Keep the dry ice sales receipts available at the tank site for the Inspector to review.

5. Cap all tank(s) opening(s) except for vent pipe(s) and allow a minimum 2 hours for oxygen displacement. Excavation and pipe removal may proceed during this period, but the tank(s) CANNOT be removed from the excavation.

6. Begin excavation to expose tank and pipelines for removal.

7. Remove all pipelines at the tank and cap or plug each tank opening immediately after the pipeline is disconnected. Leave a 1/8" to 3/8" pressure relief hole at the top of the tank for carbon dioxide venting.

8. After the 2-hour period for oxygen displacement has passed, call (415) 966-6378 for an inspection by the Fire Department.

II. REMOVAL PROCEDURES

1. Tank removal may commence only after the Fire Department Inspector has given his approval.

2. Remove the tank(s) from the excavation and load on a vehicle(s). Position the tank(s) so the pressure relief hole is close to the top of the tank.

3. Check tank(s) for leaks or holes, and if present, seal immediately.

4. Properly transport the tank(s) outside of the City limits to the designated location:

   a. If tanks ARE NOT cleaned on-site, only a licensed Hazardous Waste hauler can transport them away from the site. Make sure the tank transporter has a Transporter EPA ID Number. The tank must be taken to a licensed Treatment, Storage, and Disposal (TSD) Facility.

   b. If tanks ARE cleaned on-site, the <u>cleaning effluent</u> can only be transported by a licensed Hazardous Waste Hauler. Make sure the effluent transporter has a Transporter EPA ID Number. The effluent must be taken to a licensed Treatment, Storage, and Disposal (TSD) Facility. In this case, the <u>tank</u> transporter need not be a Hazardous Waste hauler.

   c. In either case, the shipper (i.e. tank owner) must complete a Hazardous Waste Manifest to transport the tank or effluent. The manifest must be used instead of the standard Bill of Lading document.

5. Have the soil sample(s) taken and analyzed as required below.

6. Secure the area around the tank excavation site until soil analyses are complete. At that time, the FIRE DEPARTMENT will notify you as to whether the excavation may be backfilled or further soil removal will be required.

7. Have the monitoring well(s) destroyed as required. When an abandoned well is destroyed, a permit from SCVWD is required.

8. An additional $40 per hour will be charged for inspection time exceeding the allowable time specified in the Demolition Permit (job card).

(The following sections are to be completed by the Fire Department)

III. SOIL SAMPLING PROCEDURES

1. A minimum of 2 representative soil samples shall be taken from the area beneath the tank(s). (2 per tank). Additional samples: 1 sample per 20ft PRODUCTLINE.

2. All soil sampling shall be completed by a qualified independent third party to include delivery of the samples to a State Certified laboratory. A CHAIN OF CUSTODY <u>MUST</u> be maintained throughout the sample transfer process.

3. Soil samples MAY NOT be composited by the laboratory and analyzed together.

4. Testing of samples shall employ EPA standard procedures in all appropriate cases.

5. Laboratory test analysis shall test for:

   X GC scan for Total Petroleum Hydrocarbons (Gasoline), and BTX (analyzed individually)

   X GC scan for Total Petroleum Hydrocarbons (Diesel), and BTX (analyzed individually)

   _____ GC scan for Total Oil and Grease, Total Petroleum Hydrocarbons (High Boiling Hydrocarbons), Volatile Organic Compounds (EPA 8240 or 8010 and 8020 with ten largest peaks identified).

   _____ GC scan for Solvents: _____

   _____ pH, Heavy Metals: _____

   _____ _____

6. A site drawing showing tank and sampling locations must be included in all submitted laboratory analysis so that sampling results can be traced directly to a specific sampling location.

7. **The applicant shall have a copy of ALL LABORATORY TEST RESULTS, CHAIN OF CUSTODY RECORD, AND SITE MAP OF SAMPLING LOCATIONS mailed DIRECTLY to:**

   Mountain View Fire Department
   Hazardous Materials Section
   1000 Villa Street
   Mountain View, CA 94041

   Underground tank removals are not considered complete unless we receive a hard copy of all items listed above.

   IF CONTAMINATION IS FOUND, A CLEAN-UP PROPOSAL MUST BE SUBMITTED TO OUR OFFICE WITHIN 10 DAYS OF RECEIPT OF ANALYSIS.

8. Samples shall be taken only by the modified California sampler technique.

UNDERGROUND TANK REMOVAL AUTHORIZATION

When properly validated, this is an authorized permit subject to the conditions indicated above.

CONTAMINATION AT 924 SAN RAFAEL AVE, MOUNTAIN VIEW

Dear Mr. Alva:

We have been notified of soil contamination at your facility on 924 San Rafael Ave, Mountain View.

The Fire Department has notified the Regional Water Quality Control Board of the contamination. This letter is to inform you of your reporting requirements as a responsible party per the California Regional Water Quality Control Board "Guidelines For Addressing Fuel Leaks".

For any fuel leak notification received, the owner and/or operator should be notified of their responsibility to provide immediate written notification to the Regional Board (California Water Code, Sections 13271 and 13272). This notification should be in the form of a letter, signed by the owner or a responsible corporate official. The letter should describe the available evidence indicating that a discharge has occurred, all steps that have been taken to locate and eliminate the source of discharge, and any immediate remedial actions that have been taken.

The initial report should be followed within thirty days, by a more complete report containing drawings and descriptions of excavation, soil sampling, and any additional soil borings and monitoring well construction, and the results of associated soil and groundwater analysis. This report should include a proposal for any necessary additional remedial actions (such as additional excavation or removal of free product from groundwater), along with a time schedule for their implementation.

The performance, interpretation, and reporting of the initial investigation require professional judgements and important field decisions. Therefore the owner/ operator is responsible for the enlistment of a qualified professional to assume the technical responsibility for performance. For the purposes of the guidelines the overall technical responsibility for performance, interpretation, and report preparation is to be assumed by a State Certified Engineering Geologist or a State Registered Civil Engineer.

Submit correspondence to:

Regional Water Quality Control Board
1111 Jackson Street, Room 6040
Oakland, CA 94607
Attn: Mr. Peter Johnson

Please submit copies of all correspondence to our office, also. If you have any questions, feel free to call me at (415) 966-6378.

Sincerely,

Leonard Chan

Subject: Excavated Soil and Soil Sampling
El Camino Paving, Inc.
924 San Rafael Avenue
Mountain View, CA
[ATT Job #9021]

Dear Mr. Tovar:

Aqua Terra Technologies, Inc. (ATT) is pleased to submit the results of our soil investigation for the property at 924 San Rafael Avenue, Mountain View, CA.

Aqua Terra Technologies
Consulting Engineers
& Scientists

2950 Buskirk Avenue
Suite 120
Walnut Creek, CA
94596
415 934-1884

The objective of the project was to excavate additional diesel contaminated soil in areas where soil samples taken on March 28, 1989, indicated diesel concentrations exceeding agency guidelines. Four additional soil samples were collected on May 11, 1989, after the diesel contaminated soil was removed. Field investigation reports, sample analytical results, and copies of the appropriate hazardous waste manifests for the March 28, and May 11, 1989, soil samples are attached.

SITE SETTING

The site is zoned as general industrial (MM) and borders a residential area (Plate 1, Attachment A). The property currently contains a one-story office building, garage, and an asphalt paved parking area. The surrounding area includes small commercial businesses and residential dwellings.

In general, the site is underlain at the surface by a layer of clayey and silty soils with sandy lenses. The geologic description was obtained from a visual inspection of the 14 feet deep excavation walls. The groundwater interface is exposed at the bottom of the pit. Groundwater flow direction during March 28, 1989, using water level data from monitoring wells MW4, MW5, and MW6, was estimated to be approximately in a northeast direction.

PROJECT HISTORY

During June 1988 the structural integrity of piping which transports diesel fuel between one of three underground diesel tanks and a pump island was

compromised due to an onsite accident. The failed piping caused leakage of over 400 gallons of diesel from The tank to occur. This leaking necessitated the removal of all three underground tanks (Plate 2, Attachment A).

On August 19, 1988, Azonic Technology, Inc. removed the center tank, and installed a recovery sump which recovered 400 gallons of diesel fuel. The remaining two tanks were removed on October 18, 1988, and three monitoring wells, MW4, MW5, and MW6, were installed the following day (Plate 3, Attachment A). Monitoring Wells MW1, MW2, and MW3, located 40 feet north of the excavation, were installed at the site prior to the excavation. A recovery pump and tank were installed on October 28, 1988, to remove the floating product found in the monitoring wells. The recovery pump and tank were leased to El Camino Paving on a monthly basis. The diesel contaminated soil excavated from the pit was disposed at a Class I hazardous waste landfill on November 21, 1988.

SITE INVESTIGATION

To delineate the extent of diesel saturated soil along the walls of the excavation, ATT collected eight soil samples on March 28, 1989 (Attachment B).

On May 11, 1989, ATT supervised the excavation of additional soil and the collection of four soil samples. Soil was excavated to a specified distance from the edge of the pit: six feet at the southeastern corner, three feet at the southwestern corner, three feet along the eastern edges of the pit, and five feet at the center of the northern side of the pit (Plate 2, Attachment A). Soil samples were collected from the backhoe bucket using two inch diameter by six inch long brass tubes which were pounded into the excavated soil. This was done in lieu of samples taken directly from the pit because of the hazard of personnel entering an unshored open pit. Sample results are summarized in Table 2 (Attachment C).

All soil samples were submitted to a California Department of Health Services (DHS) certified laboratory. Samples were analyzed using EPA Method 8015 for total petroleum hydrocarbons (TPH) as diesel and waste oil. Laboratory analyses are summarized in Table 1, Attachment C. Certified laboratory sheets and

accompanying chain of custody forms are included in Attachment D.

RESULTS

Laboratory analyses for the soil samples collected on March 28, 1989, showed that no detectable quantities of TPH diesel and waste oil were found for soil samples along the western side of the excavation. At the request of El Camino Paving, Inc., additional soil was excavated to a depth of 14 feet and transported to the contaminated soil pile located onsite, 20 feet west of the excavation.

Soil sample SSA-10 was collected at a depth of 10.0 feet below grade. Sample results show no detectable TPH diesel or waste oil. Soil sample SSB-8, collected at a depth of 8.0 feet, contained the TPH diesel at a concentration of 470 mg/Kg but did not contain TPH waste oil at concentrations above instrument detection limits. Soil sample SSC-8 was taken at a depth of 8.0 feet below grade. TPH diesel and waste oil concentrations were both below instrument detection limits. Soil sample SSD-9 was collected at a depth of 9.0 feet. The TPH diesel concentration was 280 mg/Kg and the waste oil concentration was below instrument detection limits.

SUMMARY AND CONCLUSION

Analytical results show a TPH diesel concentration of 470 mg/Kg for sample SSB-8 and a TPH concentration of 280 mg/Kg for sample SSD-9. Sample SSB-8 was collected from the south wall of the excavation which is currently eight feet north of the garage building. Further excavation could adversely affect the stability of the foundation of the garage building; therefore, no further excavation should be attempted and the pit should be backfilled using appropriate backfill procedures. Before backfilling procedures can be implemented local agency approval is required. Once backfilling has been approved the local agency should be notified of backfill dates, data and procedures.

The stockpiled soil containing TPH diesel must remain onsite pending completion of the bioreclamation process to be initiated after the excavation has been backfilled. A bioreclamation plan has been submitted

and approved by Don Marchant of Petroleum Engineering, Inc. Once the bioreclamation process is completed, El Camino Paving, Inc. may dispose of the material, in an appropriate manner.

If you have any questions or comments concerning this report, please do not hesitate to contact us.

Sincerely,

AQUA TERRA TECHNOLOGIES, INC.

ATTACHMENT B

Soil and Groundwater Sample Collection & Handling Protocol

ATTACHMENT B

SOIL & GROUNDWATER SAMPLE
COLLECTION & HANDLING PROTOCOL

INTRODUCTION & PURPOSE

Because reliable and representative test results must be generated from soil and groundwater samples, it is essential to establish a sampling procedure which assures that all samples are:

- Collected by approved and repeatable methods
- Representative of the materials(s) at the desired location and depth
- Uncontaminated by container and sampling equipment

The following sampling protocol was designed to be a guide to the sampling and handling procedures for soil and groundwater samples. Based on conditions which may be encountered in the field, some modifications to this protocol may be required to fit the needs of an individual site.

SAMPLING PROCEDURES

Groundwater Sampling

Prior to collecting groundwater samples, monitoring wells were purged by bailing until pH, conductivity, and temperature levels stabilize. Wells were purged and groundwater samples were obtained using a Teflon bailer and nylon rope. New nylon rope is used for each well.

The appropriate number of sample containers and type were used for each sample collected, in accordance with the analytical laboratory requirements and EPA protocol. The bottles were filled using the bailer. All sample bottles were pre-cleaned by the supplier according to EPA protocols.

To prevent cross contamination of groundwater samples by the sampling equipment, all equipment used in sampling was washed with a trisodium phosphate solution, triple rinsed with distilled water, and allowed to air dry prior to each use. A sample of the distilled water used

in the final rinse was retained for analysis as part of sample quality assurance.

Soil Sampling

After the soil sampler is driven to the desired depth and the samples are retrieved, each end of the ring containing the soil sample is retained for laboratory analysis was sealed with Teflon sheeting, covered with plastic end caps, and sealed with PVC tape. All sample containers (tubes and end caps) were steamed cleaned and air dried prior to use. The soil sample recovered in the ring just above the sample retained for chemical analysis was examined in the field for visual and olfactory indications of chemical contamination and used for lithologic description.

The Unified Soil Classification System (USCS) was used to log and describe the soil by the on-site geologist. These logs also include details of the sampling process such as depth, apparent odors, discoloration, and any other factors which may be required to evaluate the presence of contamination at the site.

POST SAMPLING PROCEDURES

One field/travel blank consisting of one sample bottle filled with distilled water accompanied soil and groundwater sample containers at all times, including during transport to and from the site. Distilled water field/travel blanks were analyzed according to the appropriate EPA Methods corresponding to the soil/groundwater sample analyses.

Sample containers were labeled with sample number, project number, date, and the initials of the person collecting the sample. A separate sample collection record was maintained for each groundwater sample collected.

Soil and groundwater samples collected were analyzed by an analytical laboratory certified by the California Department of Health Services (DHS) for complete chemical analysis of hazardous waste as well as drinking water samples. Quality assurance documentation accompanied all analytical reports generated by the laboratory.

The samples were placed in an ice cooler immediately following collection, and remained in the ice cooler until refrigerated at the analytical laboratory. The samples were delivered to the laboratory direct by

courier or overnight freight within 48 hours of time of collection. Appropriate chain of custody forms were used for all samples.

Date Received 10/18/88
Site: El Camino Paving
924 San Rafael
Mountain View, CA

Dear Mr. Krause:

Three soil samples were received for analysis of BTEX plus total hydrocarbons as gasoline and diesel by gas chromatography, using the following EPA method(s):

ANAMETRIX I.D.	SAMPLE I.D.	METHOD(S)
8810135-01	EL CAMINO PAVING #1	TPH/BTEX
-02	" #2	"
-03	" #3	"

RESULTS

See enclosed data sheets, Pages 2 thru 4.

NOTE: Amounts reported are net values, i.e. corrected for method blank contamination.

If there is any more that we can do, please give us a call. Thank you for using ANAMETRIX, INC.

Sincerely,

Sarah Schoen

The following MUST BE completed by the laboratory accepting samples for analysis:

1) Have all samples received for analysis been stored in ice? yes Dry ice

2) Will all samples remain in ice until analyzed? yes

3) Did samples requiring volatile organic analysis have head space? No.

PERMIT CONDITIONS/PROCEDURES

I. TANK PREPARATION PROCEDURES

1. An inspection must be completed by the Fire Department before the tank(s) may be removed from the excavation. Appointments must be made 48 hours in advance. Call (415) 966-6378 to arrange for an inspection appointment. The Demolition Permit must be displayed at the job site.

2. Arrange for a **State Certified** laboratory to analyze the required soil sample(s) and for sampling by a qualified independent third party.

3. Tank(s) shall be emptied of all liquid product.

4. Render tank(s) inert with a minimum 15 pounds of dry ice per each 1,000 gallons of tank volume. Tank oxygen level must be reduced to less than 10 percent. Keep the dry ice sales receipts available at the tank site for the Inspector to review.

5. Cap all tank(s) opening(s) except for vent pipe(s) and allow a minimum 2 hours for oxygen displacement. Excavation and pipe removal may proceed during this period, but the tank(s) CANNOT be removed from the excavation.

6. Begin excavation to expose tank and pipelines for removal.

7. Remove all pipelines at the tank and cap or plug each tank opening immediately after the pipeline is disconnected. Leave a 1/8" to 3/8" pressure relief hole at the top of the tank for carbon dioxide venting.

8. After the 2-hour period for oxygen displacement has passed, call (415) 966-6378 for an inspection by the Fire Department.

II. REMOVAL PROCEDURES

1. Tank removal may commence only after the Fire Department Inspector has given his approval.

2. Remove the tank(s) from the excavation and load on a vehicle(s). Position the tank(s) so the pressure relief hole is close to the top of the tank.

3. Check tank(s) for leaks or holes, and if present, seal immediately.

4. Properly transport the tank(s) outside of the City limits to the designated location:

   a. If tanks ARE NOT cleaned on-site, only a licensed Hazardous Waste hauler can transport them away from the site. Make sure the tank transporter has a Transporter EPA ID Number. The tank must be taken to a licensed Treatment, Storage, and Disposal (TSD) Facility.

   b. If tanks ARE cleaned on-site, the cleaning effluent can only be transported by a licensed Hazardous Waste Hauler. Make sure the effluent transporter has a Transporter EPA ID Number. The effluent must be taken to a licensed Treatment, Storage, and Disposal (TSD) Facility. In this case, the tank transporter need not be a Hazardous Waste hauler.

   c. In either case, the shipper (i.e. tank owner) must complete a Hazardous Waste Manifest to transport the tank or effluent. The manifest must be used instead of the standard Bill of Lading document.

5. Have the soil sample(s) taken and analyzed as required below.

6. Secure the area around the tank excavation site until soil analyses are complete. At that time, the FIRE DEPARTMENT will notify you as to whether the excavation may be backfilled or further soil removal will be required.

7. Have the monitoring well(s) destroyed as required. When an abandoned well is destroyed, a permit from SCVWD is required.

8. An additional $40 per hour will be charged for inspection time exceeding the allowable time specified in the Demolition Permit (job card).

(The following sections are to be completed by the Fire Department)

III. SOIL SAMPLING PROCEDURES

1. A minimum of 4 representative soil samples shall be taken from the area beneath the tank(s). (2 per tank). Additional samples: 1 per 20 feet of piping.

2. All soil sampling shall be completed by a qualified independent third party to include delivery of the samples to a State Certified laboratory. A CHAIN OF CUSTODY MUST be maintained throughout the sample transfer process.

3. Soil samples MAY NOT be composited by the laboratory and analyzed together.

4. Testing of samples shall employ EPA standard procedures in all appropriate cases.

5. Laboratory test analysis shall test for:

X GC scan for Total Petroleum Hydrocarbons (Gasoline), and BTX (analyzed individually)

X GC scan for Total Petroleum Hydrocarbons (Diesel), and BTX (analyzed individually)

____ GC scan for Total Oil and Grease, Total Petroleum Hydrocarbons (High Boiling Hydrocarbons), Volatile Organic Compounds (EPA 8240 or 8010 and 8020 with ten largest peaks identified).

____ GC scan for Solvents: _____

____ pH, Heavy Metals: _____

____ _____

6. A site drawing showing tank and sampling locations must be included in all submitted laboratory analysis so that sampling results can be traced directly to a specific sampling location.

7. **The applicant shall have a copy of ALL LABORATORY TEST RESULTS, CHAIN OF CUSTODY RECORD, AND SITE MAP OF SAMPLING LOCATIONS mailed DIRECTLY to:**

Mountain View Fire Department
Hazardous Materials Section
1000 Villa Street
Mountain View, CA 94041

Underground tank removals are not considered complete unless we receive a hard copy of all items listed above.

IF CONTAMINATION IS FOUND, A CLEAN-UP PROPOSAL MUST BE SUBMITTED TO OUR OFFICE WITHIN 10 DAYS OF RECEIPT OF ANALYSIS.

8. Samples shall be taken only by the modified California sampler technique.

UNDERGROUND TANK REMOVAL AUTHORIZATION

When properly validated, this is an authorized permit subject to the conditions indicated above.

****This Permit Expires Sixty (60) Days From Date Of Authorization****

Chris Steck
Authorized By

10/7/88
**Date

LEL

Tank # 1 Volume 10,000 Const. Steel Contents Diesel
~~Oxygen~~ Content 5% Length 27' Diameter 8'
Bottom of Tank at 13 feet. Soil samples taken at 15' feet.

Tank Condition Solid, Tar Wrapped, No holes observed, wrap disintegrated under and around fill

Soil Condition Soil stained, Heavy petroleum odor.

LEL

Tank # 2 Volume 4,000 Const. Steel Contents Gas
~~Oxygen~~ Content 2% Length 17'6" Diameter 6'6"
Bottom of Tank at 11'6" feet. Soil samples taken at 15' feet.

Tank Condition Solid tar wrap, No holes observed

Soil Condition Stained Soil, Heavy Odor

Tank # _____ Volume _____ Const. _____ Contents _____
Oxygen Content _____ Length _____ Diameter _____
Bottom of Tank at _____ feet. Soil samples taken at _____ feet.

Tank Condition _____

Soil Condition _____

Tank # _____ Volume _____ Const. _____ Contents _____
Oxygen Content _____ Length _____ Diameter _____
Bottom of Tank at _____ feet. Soil samples taken at _____ feet.

- N/A Was Client informed that hold time is 15 min? Yes / No Continue Yes / No
- N/A Was ortho-Phosphate filtered with in 15 min? Yes / No Continue Yes / No
- Are sample within hold time? (Yes) / No
  Are sample in danger of exceeding hold-time Yes / (No)
- Existing Client? (Yes) / No Existing Project? (Yes) / No
  If No: Is Report to info complete and legible, including;
  □ deliverable □ Name □ Address □ phone □ e-mail
  Is Bill to info complete and legible, including;
  □ PO# □ Credit card □ Contact address □ phone □ e-mail
  Is Contact and/or Project Manager identified, including;
  □ phone □ e-mail
- Project name / number □ Special requirements? (Yes) / No
- Sample IDs / date & time of collection provided? (Yes) / No
- Is Matrix listed and correct? (Yes) / No
- Analyses listed we do or client has authorized a subcontract? (Yes) / No
- Chain is signed and dated by both client and sample custodian? (Yes) / No
- TAT requested available? (Yes) / No Approved by PM

Review Coolers: Temperature Blank | 1.3 + 0.3 = 1.6°C @ 13:05
- Were Coolers temperatures measured at ≤6°C? Cooler # 1 Temp 1.6 °C
  - If cooler is outside the ≤6°C; note down below the affected bottles in that cooler
  - Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)
- Shipment Received Method walk In CDET)
- Custody Seals: Present: Yes / (No) If Yes; Unbroken: Yes / No

Review of Sample Bottles: If you answer no, explain to the side
- Chain matches bottle labels? (Yes) / No
- Sample bottle intact? (Yes) / No
- Is there enough sample volume in proper bottle for requested analyses? (Yes) / No
- Proper Preservatives? (Yes) / No Check pH on preserved samples except ~~1664~~, 625, ~~8270~~ and ~~VOAs~~. 250mL pH (<2 HNO3) 200.7-metals
- N/A Headspace-VOAs? Greater than 6mm in diameter Yes / No
  List sample ID and affected container

Client Sample ID	pH Check	Other Comments/Issues
-1	pH<2	250mL pH (<2 HNO3) 200.7

Non-Compliance issues and discrepancies on the COC are forwarded to Project Management

DECASM2288

Review Chain of Custody Chain of Custody is to be complete and legible.

- ☑ Are these regulatory (~~NPDES~~) samples? CWA — (Yes) / No
- ☑ Is pH requested? — Yes / (No)
  - ☑ Was Client informed that hold time is 15 min? N/A — Yes / No
  - If yes, did Client consent to continue? N/A
- ☑ Are sample within hold time? — (Yes) / No
  - Are sample in danger of exceeding hold-time — Yes / (No)
- ☑ Existing Client? (Yes) / No — Existing Project? (Yes) / No
  - If No: Is Report to info complete and legible, including;
    - ☐ deliverable ☐ Name ☐ Address ☐ phone ☐ e-mail
    - Is Bill to info complete and legible, including;
    - ☐ PO# ☐ Credit card ☐ Contact address ☐ phone ☐ e-mail
    - Is Contact and/or Project Manager identified, including;
    - ☐ phone ☐ e-mail
- ☑ Project name / number ☐ Special requirements? — (Yes) / No
- ☑ Sample IDs / date & time of collection provided? — (Yes) / No
- ☑ Is Matrix listed and correct? — (Yes) / No
- ☑ Analyses listed we do or client has authorized a subcontract? — (Yes) / No
- ☑ Chain is signed and dated by both client and sample custodian? — (Yes) / No
- ☑ TAT requested available? (Yes) / No — Approved by PM

Review Coolers:

- ☑ Were Coolers temperatures measured at ≤6°C? Cooler # 1 Temp 2.8 °C
  - If cooler is outside the ≤6°C; note down below the affected bottles in that cooler
  - Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)
- ☑ Shipment Received Method Accutest courier
- ☑ Custody Seals: N/A Present: Yes / (No) If Yes; Unbroken: Yes / No

Review of Sample Bottles: If you answer no, explain to the side

- ☑ Chain matches bottle labels? (Yes) / No — ☑ Sample bottle intact? (Yes) / No
- ☑ Is there enough sample volume in proper bottle for requested analyses? (Yes) / No
- ☑ Proper Preservatives? (Yes) / No Check pH on preserved samples except 1664, 625, 8270 and VOAs. 250mL poly (w/HNO3)
- ☑ Headspace-VOAs? Greater than 6mm in diameter Yes / No
  N/A List sample ID and affected container

Client Sample ID	pH Check	Other Comments/~~Issues~~
-1	pH<2	250mL poly (w/HNO3) 200.7 - metals

Non-Compliance issues and discrepancies on the COC are forwarded to Project Management

C8938: Chain of Custody
Page 1 of 2

Accutest Laboratories Northern California
Sample Receiving Check List

Job# : C8938
Sample Control Rep. Initial: EK

Review Chain of Custody Chain of Custody is to be complete and legible.

- ☑ Are these regulatory (NPDES) samples? CWA — (Yes) / No
- ☑ Is pH requested? — Yes / (No)
  - ☐ Was Client informed that hold time is 15 min? — Yes / No
  - If yes, did Client consent to continue? N/A
- ☑ Are sample within hold time? — (Yes) / No
  - Are sample in danger of exceeding hold-time — Yes / (No)
- ☑ Existing Client? (Yes) / No Existing Project? — (Yes) / No
  - If No: Is Report to Info complete and legible, including;
    - ☐ deliverable ☐ Name ☐ Address ☐ phone ☐ e-mail
    - Is Bill to info complete and legible, including;
    - ☐ PO# ☐ Credit card ☐ Contact ☐address ☐ phone ☐ e-mail
    - Is Contact and/or Project Manager identified, including;
    - ☐ phone ☐ e-mail
- ☑ Project name / number ☐ ~~Special requirements?~~ — (Yes) / No
- ☑ Sample IDs / date & time of collection provided? — (Yes) / No
- ☑ Is Matrix listed and correct? — (Yes) / No
- ☑ Analyses listed we do or client has authorized a subcontract? — (Yes) / No
- ☑ Chain is signed and dated by both client and sample custodian? — (Yes) / No
- ☑ TAT requested available? (Yes) / No Approved by EK

Review Coolers: Samples delivered on Ice

- ☑ Were Coolers temperatures measured at ≤6°C? Cooler # 1 Temp 6.9 °C
  - If cooler is outside the ≤6°C; note down below the affected bottles in that cooler
  - Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)
- ☑ Shipment Received Method Walk In (Desert Environmental)
- ☑ Custody Seals: N/A Present: Yes / (No) If Yes; Unbroken: Yes / No

Review of Sample Bottles: If you answer no, explain to the side

- ☑ Chain matches bottle labels? (Yes) / No ☑ Sample bottle intact? (Yes) / No
- ☑ Is there enough sample volume in proper bottle for requested analyses? (Yes) / No
- ☑ Proper Preservatives? (Yes) / No Check pH on preserved samples except 1664, 625, 8270 and VOAs.
- ☐ Headspace-VOAs? Greater than 6mm in diameter Yes / No
  N/A List sample ID and affected container

DECASM2288

Client Sample ID	pH Check	Other Comments/Issues

Page 1 of 2

Accutest Laboratories Northern California
STANDARD OPERATING PROCEDURE

Sample Receiving Checklist

Job # C5489
Sample Control Initial EK

Review Chain of Custody The Chain of Custody is to be completely and legibly filled out by Client.

- ☑ Are these regulatory (NPDES) samples? Yes / (No) circle one
- ☑ Is pH requested? Yes / (No) circle one ☐ Was Client informed that hold time is 15 min? Yes / No circle one
  If yes, did Client consent to continue? —
- ☑ Are sample within hold time? (Yes) / No circle one Are sample in danger of exceeding its hold-time within 6-48 hours?
- ☑ Report to info is complete and legible, including:
  ☑ Type of deliverable needed ☑ Name ☑ Address ☑ phone ☑ e-mail ON-FILE
- ☑ Bill to info is complete and legible, including; ☐ PO# ☐ Credit card ☐ Contact ☐address ☐ phone ☐ e-mail
- ☑ Contact and/or Project Manager identified, including; ☑phone ☑e-mail
- ☑ Project name / number ☐ Special requirements? (Yes) / No circle one
- ☑ Sample IDs / date & time of collection provided? (Yes) / No circle one
- ☑ Is Matrix listed and correct? (Yes) / No circle one
- ☑ Analyses listed are those we do or client has authorized a subcontract? (Yes) / No circle one
- ☑ Chain is signed and dated by both client and sample custodian? (Yes) / No circle one
- ☑ TAT requested available? Approved by EK

Review Coolers: NOT Iced

- ☑ Were Coolers temperatures measured at ≤6°C? Cooler # — Temp 18.8°C
  - If cooler is outside the ≤6°C; note down below the affected bottles in that cooler
  - Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)
- ☑ Shipment Method Walk In Clysert Environmental
- ☑ Custody Seals: Present : Yes / (No) circle one Unbroken: (Yes) / No circle one

Review of Sample Bottles: If you answer no, explain below

- ☑ Sample ID / bottle number / Date / Time of bottle labels match the COC? (Yes) / No circle one
- ☑ Sample bottle intact? (Yes) / No circle one
- ☑ Is there enough samples for requested analyses? If so, were samples placed in proper containers? (Yes) / No circle one
- ☑ Proper Preservatives? Check pH ✓ on preserved samples except 1664, 625, 8270 and VOAs and list below (1:1 HNO_3)
- ☐ Are VOAs received without headspace? Size of bubble (not greater than 6mm in diameter) Yes / No circle one N/A
  List sample ID and affected container

Lab #	Client Sample ID	pH Check	Other Comments/Issues
-1	PERMIT 722	pH < 2	250mL PDN (1:1 HNO_3) MET (200.7)

Non-Compliance issues and discrepancies on the COC are forwarded to Project Management

C2953: Chain of Custody
Page 1 of 2

Northern California ACCUTEST Laboratories

Sample Receiving Checklist

Job # C2953

Review Chain of Custody: The Chain of Custody is to be completely and legibly filled out by Client. PHF

- ☐ Are these regulatory (NPDES) samples? Yes / (No) circle one ☐ Is pH requested? Yes / (No) circle one
- ☐ Was Client informed that the hold time is 15mins Yes / No circle one If yes, did they consent to continue? _____
- ☐ Are sample within one-half hold-time? Yes / No circle one If no, was the lab informed? _____
- Report to Info is complete and legible, including;
  - Type of Deliverable needed name address phone email
- Bill to info is complete and legible, including: PO# ☐ Credit card contact address phone email
- Contact and/or Project Mgr identified, including; phone email
- Project name / number ☐ Special requirements? (Yes) / No circle one
- Sample IDs / date & time of collection provided? (Yes) / No circle one
- Matrix listed and correct? (Yes) / No circle one
- Analyses listed are those we do or client has authorized a subcontract? (Yes) / No circle one
- Chain is signed / dated by both client and sample custodian? (Yes) / No circle one
- TAT requested available? Approved by ELK

Review Coolers:

- Samples / Coolers are at 0-6°C? 3.2°C If sampled within 4hrs, then "on ice" is acceptable.

If a cooler is outside the 0-6°C range; note below the bottles in that cooler below.
Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)

Shipment Method: AC

Custody Seals Present: Yes / (No) circle one Un-broken: Yes / No circle one

Review of Sample Bottles: If you answer no, explain below

- IDs / bottle number / Date / Time of bottle labels match CoC?
- Sample bottle intact? (Yes) / No circle one
- Proper containers and volumes? (Yes) / No circle one
- Proper preservatives? Check pH on preserved samples except 1664, 625, 8270, and VOAs and list below.
- ☐ VOAs received without headspace? Yes / No circle one N/A

Lab #	Client Sample ID	pH Check:	Other Comments / Issues
-1	Permit 722	pH<2	250mL poly (x) HNO_3 -> metals

☐ Client informed of irregularities at receiving ☐ Project Mgr needs to contact Client for issues

C1989: Chain of Custody
Page 1 of 2

ACCUTEST Laboratories
C1989

Sample Receiving Checklist

Job # C1989

Review Chain of Custody: The Chain of Custody is to be completely and legibly filled out by Client.

- ☐ Are these regulatory (NPDES) samples? Yes / (No) circle one ☐ Is pH requested? Yes / (No) circle one
- ☐ Was Client informed that the hold time is 15mins Yes / No circle one If yes, did they consent to continue? _____
- ☐ Are sample within one-half hold-time? Yes / No circle one If no, was the lab informed? _____
- ☑ Report to Info is complete and legible, including:
  - ☑ Type of Deliverable needed ☑ name ☑ address ☑ phone ☑ email
- ☐ Bill to Info is complete and legible, including: ☐ PO# ☐ Credit card ☐ contact ☐ address ☐ phone ☐ email
- ☑ Contact and/or Project Mgr identified, including: ☑ phone ☑ email
- ☑ Project name / number ☐ Special requirements? (Yes) / No circle one
- ☑ Sample IDs / date & time of collection provided? (Yes) / No circle one
- ☑ Matrix listed and correct? (Yes) / No circle one
- ☑ Analyses listed are those we do or client has authorized a subcontract? (Yes) / No circle one
- ☑ Chain is signed / dated by both client and sample custodian? (Yes) No circle one
- ☑ TAT requested available? Approved by ELK

Review Coolers:

- ☑ Samples / Coolers are at 0-6°C? 5.6°C If sampled within 4hrs, then "on ice" is acceptable.
  If a cooler is outside the 0-6°C range; note below the bottles in that cooler below.
  Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)

Shipment Method: AC

Custody Seals Present: Yes / (No) circle one Un-broken: Yes / No circle one

Review of Sample Bottles: If you answer no, explain below

- ☑ IDs / bottle number / Date / Time of bottle labels match CoC?
- ☑ Sample bottle intact? (Yes) / No circle one
- ☑ Proper containers and volumes? (Yes) / No circle one
- ☑ Proper preservatives? Check pH on preserved samples except 1664, 625, 8270, and VOAs and list below.
- ☐ VOAs received without headspace? Yes / No circle one N/A

Lab #	Client Sample ID	pH Check	Other Comments / Issues
-1	Permit 722	pH<2	250mL poly (HNO3)

☐ Client informed of irregularities at receiving ☐ Project Mgr needs to contact Client for issues

Certificate of Analysis - Final Report

On April 21, 2008, a sample was received under chain of custody for analysis.
Entech analyzes samples "as received" unless otherwise noted. The following results are included:

Matrix	Test / Comments
Liquid	Metals by ICP: EPA 3010A / EPA 6010B for Groundwater and Water - EPA 200.7 for Wastewater

Entech Analytical Labs, Inc. is certified for environmental analyses by the State of California (#2346).
Subcontracted work is the responsibility of the subcontract laboratory, this includes turn-around-time and data quality.
If you have any questions regarding this report, please call us at 408-588-0200 ext. 225.

Sincerely,

Laurie Glantz-Murphy

Request for Records Search to the
City of Mountain View Building Department and
Photocopies Obtained from that Agency

From: city.clerk@mountainview.gov [noreply+3435d9da65ad96f3@formstack.com]
Sent: Sunday, February 26, 2017 7:04 AM
To: Shannon@EnvironmentalSupportServices.com
Subject: Request Received for Public Records Request by the City of Mountain View

Dear Shannon Castagno,

The City of Mountain View has received your request for public records:

Date of Request: Feb 26, 2017 7:03 AM

Request:
I hereby request copies of all building permits and certificates of occupancy for the following addresses:
Site: 918, 924 & 940 San Rafael Avenue
Mountain View, CA 94043

Name: Shannon Castagno

Organization: Environmental Support Services

Address: 30251 Golden Lantern, #E305
Laguna Niguel, CA 92677

Phone No.: (949) 429-3564

Fax No.: (949) 429-3563

Email: Shannon@EnvironmentalSupportServices.com

Request ID: 307588915

Thank you for contacting the City of Mountain View. If you have any questions about this request, please contact the City Clerk's Office and reference the Request ID above.

W____I certify that I am a licensed contractor and that my license is in full force and effect.

Signature

Date | License Number | Class

I certify that I have a certificate of consent to self-insure, or a Certificate of Worker's Compensation Insurance, or a certified copy thereof.

Policy No.____ Company____

____Certified copy is hereby furnished.

____Certified copy is filed with the Division of Inspectional Services, City of Mountain View.

I certify that I am exempt from the provisions of Chapter 9, Division 3, B and P Code (Contractor's License Law) because: (Check applicable statement)

W____A. I am the owner of the above property and I will contract to have all of the above work performed by licensed contractors.

W____B. I am the owner of the above property and the work will be partially accomplished in accordance with Statement "A" and the other work will be accomplished in accordance with Statement "C."

W____C. I am the owner of the above property and I will perform the above work personally or through my employees whose sole compensation will be wages, and the above-described structure is not intended or offered for sale.

Signature | Date

I certify that in the performance of the work for which this permit is issued I shall not employ any person in any manner so as to become subject to the Worker's Compensation Laws of California.

Signature | Date

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

I certify that the use of this facility shall comply with sections 25505, 25533, and 25534 of the Health and Safety Code which regulates the storage, handling, and use of hazardous materials.

I certify that I have read this application and state that the information given is true and correct. I agree to comply to all City ordinances and State laws relating to the building construction, and I make this statement under penalty of law.

Request for Records Search to the
Bay Area Air Quality Management District and
Response Obtained from that Agency

From: publicrecords@baaqmd.gov
Sent: Sunday, February 26, 2017 7:22 AM
To: Shannon@environmentalsupportservices.com
Subject: Public Records Request Number. 2017-02-0215

Importance: High

Dear Shannon Castagno:

We have received your public records request of 2/26/2017 7:22:14 AM PST. We have assigned 2017-02-0215 as your Request Number in order to track your request. You requested the following:

Facility Information
Facility Name: El Camino Paving, Inc.
Facility Street: 918, 924 & 940 San Rafael Avenue
Facility City: Mountain View
Facility State: CA
Facility Zipcode: 94043
Period Covered: All

Print Outs Requested

- Episode
- Permit Application
- Violation
- Complaint

Other Requests: ESS Request the following: 1) Inspection Records 2) Complaints 3) Applications 4) Permits to Operate 5) Emissions Inventory 6) NOV's 7) NTC's

Within 10 days we will determine whether you have requested disclosable records. If we need more time to make that determination, we will let you know within 10 days. If your request is unclear we will also contact you within the 10 days.

If you have requested disclosable records, and your request is simple, we may respond within 10 days by providingyou with the records requested or with our finding tht we have no records. If you have requested disclosable records and your request is more complicated, we will notify you promptly of our determination and provide your with our estimate of when the records will be

made available.

If you have requested records that are exempt from disclosure, we will explain why the records are being withheld.

You can follow our progress in responding to your request by using the PRA Login webpage.

Dear Ms. Castagno:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the site/facility referenced above.

We would like to inform you about Envirostor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

If you have any questions, would like further information regarding your request or would like an appointment to visit Berkeley's Central Files, please contact me at (510) 540-3800.

Sincerely,

André Alexander
Regional Central Files Coordinator

Key Site Documents

June 16, 1989

Mr. Charlie Tovar
El Camino Paving, Inc.
924 San Rafael Avenue
Mountain View, CA 94043

Subject: Excavated Soil and Soil Sampling
El Camino Paving, Inc.
924 San Rafael Avenue
Mountain View, CA
[ATT Job #9021]

Dear Mr. Tovar:

Aqua Terra Technologies, Inc. (ATT) is pleased to submit the results of our soil investigation for the property at 924 San Rafael Avenue, Mountain View, CA.

Aqua Terra Technologies
Consulting Engineers
& Scientists

2950 Buskirk Avenue
Suite 120
Walnut Creek, CA
94596
415 934-4884

The objective of the project was to excavate additional diesel contaminated soil in areas where soil samples taken on March 28, 1989, indicated diesel concentrations exceeding agency guidelines. Four additional soil samples were collected on May 11, 1989, after the diesel contaminated soil was removed. Field investigation reports, sample analytical results, and copies of the appropriate hazardous waste manifests for the March 28, and May 11, 1989, soil samples are attached.

SITE SETTING

The site is zoned as general industrial (MM) and borders a residential area (Plate 1, Attachment A). The property currently contains a one-story office building, garage, and an asphalt paved parking area. The surrounding area includes small commercial businesses and residential dwellings.

In general, the site is underlain at the surface by a layer of clayey and silty soils with sandy lenses. The geologic description was obtained from a visual inspection of the 14 feet deep excavation walls. The groundwater interface is exposed at the bottom of the pit. Groundwater flow direction during March 28, 1989, using water level data from monitoring wells MW4, MW5, and MW6, was estimated to be approximately in a northeast direction.

PROJECT HISTORY

During June 1988 the structural integrity of piping which transports diesel fuel between one of three underground diesel tanks and a pump island was

compromised due to an onsite accident. The failed piping caused leakage of over 400 gallons of diesel from The tank to occur. This leaking necessitated the removal of all three underground tanks (Plate 2, Attachment A).

On August 19, 1988, Azonic Technology, Inc. removed the center tank, and installed a recovery sump which recovered 400 gallons of diesel fuel. The remaining two tanks were removed on October 18, 1988, and three monitoring wells, MW4, MW5, and MW6, were installed the following day (Plate 3, Attachment A). Monitoring Wells MW1, MW2, and MW3, located 40 feet north of the excavation, were installed at the site prior to the excavation. A recovery pump and tank were installed on October 28, 1988, to remove the floating product found in the monitoring wells. The recovery pump and tank were leased to El Camino Paving on a monthly basis. The diesel contaminated soil excavated from the pit was disposed at a Class I hazardous waste landfill on November 21, 1988.

SITE INVESTIGATION

To delineate the extent of diesel saturated soil along the walls of the excavation, ATT collected eight soil samples on March 28, 1989 (Attachment B).

On May 11, 1989, ATT supervised the excavation of additional soil and the collection of four soil samples. Soil was excavated to a specified distance from the edge of the pit: six feet at the southeastern corner, three feet at the southwestern corner, three feet along the eastern edges of the pit, and five feet at the center of the northern side of the pit (Plate 2, Attachment A). Soil samples were collected from the backhoe bucket using two inch diameter by six inch long brass tubes which were pounded into the excavated soil. This was done in lieu of samples taken directly from the pit because of the hazard of personnel entering an unshored open pit. Sample results are summarized in Table 2 (Attachment C).

All soil samples were submitted to a California Department of Health Services (DHS) certified laboratory. Samples were analyzed using EPA Method 8015 for total petroleum hydrocarbons (TPH) as diesel and waste oil. Laboratory analyses are summarized in Table 1, Attachment C. Certified laboratory sheets and

accompanying chain of custody forms are included in Attachment D.

RESULTS

Laboratory analyses for the soil samples collected on March 28, 1989, showed that no detectable quantities of TPH diesel and waste oil were found for soil samples along the western side of the excavation. At the request of El Camino Paving, Inc., additional soil was excavated to a depth of 14 feet and transported to the contaminated soil pile located onsite, 20 feet west of the excavation.

Soil sample SSA-10 was collected at a depth of 10.0 feet below grade. Sample results show no detectable TPH diesel or waste oil. Soil sample SSB-8, collected at a depth of 8.0 feet, contained the TPH diesel at a concentration of 470 mg/Kg but did not contain TPH waste oil at concentrations above instrument detection limits. Soil sample SSC-8 was taken at a depth of 8.0 feet below grade. TPH diesel and waste oil concentrations were both below instrument detection limits. Soil sample SSD-9 was collected at a depth of 9.0 feet. The TPH diesel concentration was 280 mg/Kg and the waste oil concentration was below instrument detection limits.

SUMMARY AND CONCLUSION

Analytical results show a TPH diesel concentration of 470 mg/Kg for sample SSB-8 and a TPH concentration of 280 mg/Kg for sample SSD-9. Sample SSB-8 was collected from the south wall of the excavation which is currently eight feet north of the garage building. Further excavation could adversely affect the stability of the foundation of the garage building; therefore, no further excavation should be attempted and the pit should be backfilled using appropriate backfill procedures. Before backfilling procedures can be implemented local agency approval is required. Once backfilling has been approved the local agency should be notified of backfill dates, data and procedures.

The stockpiled soil containing TPH diesel must remain onsite pending completion of the bioreclamation process to be initiated after the excavation has been backfilled. A bioreclamation plan has been submitted

and approved by Don Marchant of Petroleum Engineering, Inc. Once the bioreclamation process is completed, El Camino Paving, Inc. may dispose of the material, in an appropriate manner.

If you have any questions or comments concerning this report, please do not hesitate to contact us.

Sincerely,

AQUA TERRA TECHNOLOGIES, INC.

Soil and Groundwater Sample Collection & Handling Protocol

AT

ATTACHMENT B

SOIL & GROUNDWATER SAMPLE COLLECTION & HANDLING PROTOCOL

INTRODUCTION & PURPOSE

Because reliable and representative test results must be generated from soil and groundwater samples, it is essential to establish a sampling procedure which assures that all samples are:

- Collected by approved and repeatable methods
- Representative of the materials(s) at the desired location and depth
- Uncontaminated by container and sampling equipment

The following sampling protocol was designed to be a guide to the sampling and handling procedures for soil and groundwater samples. Based on conditions which may be encountered in the field, some modifications to this protocol may be required to fit the needs of an individual site.

SAMPLING PROCEDURES

Groundwater Sampling

Prior to collecting groundwater samples, monitoring wells were purged by bailing until pH, conductivity, and temperature levels stabilize. Wells were purged and groundwater samples were obtained using a Teflon bailer and nylon rope. New nylon rope is used for each well.

The appropriate number of sample containers and type were used for each sample collected, in accordance with the analytical laboratory requirements and EPA protocol. The bottles were filled using the bailer. All sample bottles were pre-cleaned by the supplier according to EPA protocols.

To prevent cross contamination of groundwater samples by the sampling equipment, all equipment used in sampling was washed with a trisodium phosphate solution, triple rinsed with distilled water, and allowed to air dry prior to each use. A sample of the distilled water used

in the final rinse was retained for analysis as part of sample quality assurance.

Soil Sampling

After the soil sampler is driven to the desired depth and the samples are retrieved, each end of the ring containing the soil sample is retained for laboratory analysis was sealed with Teflon sheeting, covered with plastic end caps, and sealed with PVC tape. All sample containers (tubes and end caps) were steamed cleaned and air dried prior to use. The soil sample recovered in the ring just above the sample retained for chemical analysis was examined in the field for visual and olfactory indications of chemical contamination and used for lithologic description.

The Unified Soil Classification System (USCS) was used to log and describe the soil by the on-site geologist. These logs also include details of the sampling process such as depth, apparent odors, discoloration, and any other factors which may be required to evaluate the presence of contamination at the site.

POST SAMPLING PROCEDURES

One field/travel blank consisting of one sample bottle filled with distilled water accompanied soil and groundwater sample containers at all times, including during transport to and from the site. Distilled water field/travel blanks were analyzed according to the appropriate EPA Methods corresponding to the soil/groundwater sample analyses.

Sample containers were labeled with sample number, project number, date, and the initials of the person collecting the sample. A separate sample collection record was maintained for each groundwater sample collected.

Soil and groundwater samples collected were analyzed by an analytical laboratory certified by the California Department of Health Services (DHS) for complete chemical analysis of hazardous waste as well as drinking water samples. Quality assurance documentation accompanied all analytical reports generated by the laboratory.

The samples were placed in an ice cooler immediately following collection, and remained in the ice cooler until refrigerated at the analytical laboratory. The samples were delivered to the laboratory direct by

courier or overnight freight within 48 hours of time of collection. Appropriate chain of custody forms were used for all samples.

Mr. John West
California Regional Water Quality Control Board
San Francisco Bay Region
2101 Webster Street, Suite 500
Oakland, CA 94612

Subject: **El Camino Paving**
924 San Rafael Avenue
Mountain View, CA

Dear Mr. West:

In response to Regional Water Quality Control Board (RWQCB) letter dated May 31, 1994, the following information is provided herein.

On June 3, 1994, El Camino Paving entered into a contractual agreement with CET Environmental Services, Inc. (CET) to implement the workplan prepared by Harding Lawson Associates (HLA) dated April 6, 1994.

The HLA workplan identified the following primary site activities:

- Conduct a offsite investigation to identify the lateral extent of shallow groundwater contamination using CPT/Hydropunch technology.
- Conduct aquifer testing to evaluate aquifer characteristics.

In addition to the above HLA workplan activities, the RWQCB letter dated May 31, 1994 further requires:

- Identification of the onsite artesian well and status.
- A plan to identify solvents detected in the shallow groundwater beneath the site.

In direct response to the items listed above, CET is pleased to present the following completed activities.

OFFSITE INVESTIGATION

- On June 16, 1994, three offsite groundwater samples and two onsite samples were collected using CPT/Hydropunch. The three locations offsite were located at adjacent, downgradient and cross-gradient properties and the two onsite locations were located upgradient of known shallow groundwater contamination. Samples were analyzed for TPH/d, TPH/g, BTEX and halogenated organic compounds.

AQUIFER TESTING

- On June 8, 1994, a 24-hour pumping test was performed at well MW-6. Recovered groundwater

Printed on Recyclable Paper

was discharged to a 7,000 gallon temporary storage tank. Observation wells did not show a response after a 24-hour period.

- On June 22, 1994, a pumping test was performed at MW4A; after 200 minutes no response was observed at any of the observation wells. The groundwater pump was moved to MW4C and the pumping test was reinitiated. After 130 minutes all onsite observation wells showed a response to pumping the shallow aquifer. On June 30, 1994, permission was given by the city of Mountain View to discharge stored groundwater to the sanitary sewer.

ARTESIAN WELL

- The artesian well is located approximately 30 feet upgradient of MW-9. El Camino Paving has contracted with Garcia Well & Pump Company, E. Palo Alto, California to abandon the well. A permit for this activity was issued by the Santa Clara Valley Water District (SCVWD) on June 20, 1994. The well abandonment is scheduled for the week of July 3, 1994.

GROUNDWATER MONITORING

- Routine quarterly groundwater monitoring was completed on June 9, 1994.

A technical report will be prepared and submitted to the RWQCB and the SCVWD by August 5, 1994 describing the results of the completed activities, including a schedule for additional work a the site. We request your concurrence with the date for submittal of the technical report.

Please call if you have any questions or require additional information,

Sincerely,

CET ENVIRONMENTAL SERVICES, INC.

Terrance E. Carter
Senior Environmental Engineer

INTRODUCTION

This report presents the results of groundwater investigation activities conducted by CET Environmental Services, Inc. (CET) at El Camino Paving, Inc. located at 924 San Rafael Avenue, Mountain View, California. The work described herein was conducted in response to correspondence issued to El Camino Paving by the Santa Clara Valley Water District (SCVWD) dated May 4, 1994, and by the San Francisco Regional Water Quality Control Board dated May 31, 1994.

The location of the facility is presented on Plate 1, and a site plan showing current groundwater monitoring well locations is provided on Plate 2.

Previous field activities were described in numerous reports prepared by Azonic Technology, Inc. beginning in 1988, followed by Aqua Terra Technologies, Inc. in 1989, and Harding Lawson Associates, (HLA) Inc., beginning in 1992. These reports presented underground storage tank (UST) closure activities conducted at the site; associated excavated soil remediation; free product removal; and groundwater monitoring well installation and monitoring.

Currently, there are no USTs located at the site and site activities are limited to paving equipment storage and parking, and equipment repair.

The following tasks were performed at the site between June 9 and June 22, 1994:

- Second quarter monitoring and sampling performed June 9, 1994
- Cone Penetration Test (CPT) investigation performed June 16, 1994
- Groundwater pumping test performed June 8 and June 22, 1994.

GEOLOGY AND HYDROGEOLOGY

Regional Geologic Setting - San Francisco Bay is a structural trough formed by downwarping and subsequent ocean-flooding. The northern part of the Santa Clara Valley is part of this structural valley that is above sea level. Structural geology of the hills bordering the bay is very complex. Sedimentary rocks predominate, and many of these are highly deformed, folded, and faulted. They range in age from Jurassic to Quaternary. In some areas, igneous rock has intruded into the sedimentary sequence.

Downwarping of the bedrock surface to considerable depths has allowed the gradual accumulation of a thick section of overlying sediments within the trough. Unconsolidated or slightly consolidated Quaternary and upper Pliocene fresh-water sediments of the Santa Clara formation outcrop along a narrow strip from Palo Alto to Los Gatos, adjacent to the hills in the site area.

The valley floor consists of interbedded Quaternary alluvial deposits consisting of clay, sand and gravel. During glacial stages when sea level was lower, extensive gravel and sand layers and other fluvial deposits were probably deposited. During the interglacial stages, when the bay depression was partially inundated, extensive blue clay layers were deposited.

Regionally the depth to the base of Quaternary alluvium is difficult to determine, due to the similarity in lithology between it and the underlying Santa Clara Formation which makes these two stratigraphic units virtually indistinguishable. The depth to bedrock (the Franciscan Formation) is approximately 2,000 feet below the ground surface at the site (Dept. of Water Resources, 1967).

Local Soils and Unconsolidated Deposits - The Soil Conservation Service (1958, 1968) mapped the soil in the site area as Zamora-Pleasanton association. This association consists of well-drained, medium and moderately fine textured soils, developed on alluvium. Surface drainage is good; however, subsoil permeability is moderately low. Quaternary alluvial deposits with interbedded clay layers have been observed in site borings to a depth of 25 feet, the maximum depth explored.

Surface Soil Conditions - The site is generally covered by pavement (asphalt or concrete) or buildings. A relatively thin layer of aggregate baserock fill overlies native soil at the site. The thickness of the fill is estimated to vary from about six inches at the western edge of the property to 10 inches in the vicinity of MW-9.

Subsurface Soil Conditions - The native sediments underlying the artificial fill, as described in site borings performed by others, consist of a complex sequence of interbedded and intermixed soil units. The native sediments are primarily fine grained (silts and clays) occasionally containing coarse grained (sands and gravels) soils in varying amounts. A unit composed predominantly of coarse-grained alluvium, alternately described as gravelly sand or sandy gravel with fines and gravelly silty sand, approximately two to four feet in thickness, has generally been observed in site borings at depths ranging from 16 to 21 feet. The deepest borings have observed a stiff bluish or brown silty clay underlying this coarse unit to the total boring depth of 25 feet.

Subsurface Hydrogeologic Conditions - Based on groundwater elevation monitoring performed by others shallow groundwater elevations at the site have been observed to vary seasonally from an approximate minimum depth of 9.5 feet (elevation 26.5 msl) in April 1993 to 11.5 feet (elevation 24.5 msl) in October 1993. Based on reported first encountered water depths in site soil borings, the site's shallow water bearing zone appears to exist in the coarse grained units and is confined to semi-confined by overlying silts and clays. The groundwater flow direction is northwest to the San Francisco Bay at an approximate gradient of 0.002 (June, 1994.)

SITE CHARACTERIZATION

Second Quarter Groundwater Monitoring and Sampling

Location, Evaluation, and Destruction of an Artesian Well

The Santa Clara Valley Water District, in their letter dated May 4, 1994, made the following request:

- On October 5, 1993, we were informed by the Mountain View Fire Department that an artesian well exists on the property. We are requesting the precise location of this well, an evaluation of its impact to the investigation, and its eventual and appropriate destruction.

The location of the former deep well is shown on Plate 2. This well was abandoned by Garcia Pump in June 1994 under a permit issued by the SCVWD. A copy of the permit to abandon the well and well abandonment completion notice is provided in Appendix A.

Groundwater Monitoring Wells

A total of nine groundwater monitoring wells currently exist at the site. Wells MW1, MW2, and MW3 are used to monitor chemical concentrations in groundwater at the eastern property boundary. Wells MW4A, MW4B, MW4C, MW5, and MW6 are located adjacent to the former USTs in the vicinity where the highest levels of Diesel were found. Wells MW4A, MW4B, and MW4C were installed as diesel product recovery wells. These wells are clustered and for the purposes of monitoring, are considered a single well. Groundwater monitoring wells MW7 and MW8 are located at the property boundary in the approximate downgradient direction from the former USTs. Monitoring well MW9 is located upgradient of the former USTs. The groundwater data from this well has been used to evaluate background conditions even though the data indicates that the shallow water bearing zone at this location was influenced by the gravel-filled cavity of the former USTs.

Wells MW1 through MW4 are 15 inch diameter wells and range from approximately 15.5 feet in depth to 21.5 feet below ground surface (bgs). Wells MW5 through MW9 are four-inch diameter wells and range from approximately 17.5 feet in depth to 21 feet bgs.

Groundwater Elevation Monitoring

Groundwater elevation data collected by HLA beginning in February 1993 to February 1994 and elevation data collected by CET on June 8 and June 22, 1994 are presented in Table 1. Groundwater elevation contour maps for the June measurements are presented on Plates 3 and 4. Groundwater elevation contours from data collected on June 22 indicate a groundwater flow direction towards the northwest and a flat groundwater gradient of approximately 0.002.

The historic groundwater elevation data compiled from February 1993 through June 22, 1994 indicate that the predominant direction of shallow groundwater flow is towards the northwest.

Groundwater Sample Collection and Analyses

Groundwater samples were collected from the site monitoring wells on June 9, 1994 and analyzed for total petroleum hydrocarbons as gasoline and as diesel (TPH-G and TPH-D), and for benzene, toluene, ethyl benzene, and total xylenes (BTEX) using U.S. Environmental Protection Agency (EPA) methods 5030/8015, 3510/8015, and 602, respectively.

Groundwater Sample Collection and Handling Protocol

Prior to collecting groundwater samples, monitoring wells were purged by bailing until pH, conductivity, and temperature levels stabilize. Approximately four well casing volumes were purged from each well. Wells were purged and groundwater samples were obtained using a disposable polyethelene bailer, and nylon rope. A new bailer and nylon rope was used for each well.

The appropriate numbers and types of sample containers were used for each sample collected, in accordance with the analytical laboratory requirements and EPA protocol. The bottles were filled using the bailer. All sample bottles were pre-cleaned by the supplier according to EPA protocols. To prevent cross contamination of groundwater samples by the sampling equipment, all reusable equipment used in sampling was washed with an Alconox solution, triple rinsed with purified water, and allowed to air dry prior to each use. Sample containers were labeled with sample number, project number, date, and the initials of the person collecting the sample. A separate sample collection record was maintained for each groundwater sample collected. The samples were placed in a cooler with bagged ice immediately following collection, and remained in the cooler until refrigerated at the analytical laboratory. The samples were delivered to the laboratory direct by courier within 48 hours of time of collection. Appropriate chain of custody forms were used for all samples. The groundwater samples collected were analyzed by an analytical laboratory certified by the California Department of Health Services (DHS). Quality assurance documentation accompanied all analytical reports generated by the laboratory.

In addition to the above sampling protocols, the following provides a summary of field observations:

- According to the sample collection records, free product or sheen was not observed in samples collected on June 9. In the First Quarter 1994 report prepared by HLA, 1994, free product or sheen was also not observed in any of the site wells from April 1993 through February 1994.

Analytical chemistry results are summarized on Table 2. Sample collection and handling protocols, chain of custody documentation for samples collected on June 9, 1994 are presented in Appendix B.

Onsite and Offsite CPT Investigation

The intent of onsite and offsite groundwater sampling at the facility was to determine the areal extent of chemicals in groundwater. On June 16, 1994, an investigation was performed to determine if chemicals in groundwater had migrated downgradient of the subject site, and to further define groundwater quality characteristics at the site and upgradient of site activities. A summary of field activities and laboratory analytical results is presented below.

A total of five CPT soil boreholes (identified as CPT1 through CPT5) were advanced to a depth of approximately 15 feet bgs. The approximate CPT sampling locations are shown on Plate 2.

CPT Investigation Field Procedures

Prior to field activities, all borehole locations were cleared for underground utilities by Underground Service Alert (USA) and by Cruz Brothers Locators, a private underground utility locating company. The Earth Technology Corporation of Huntington Beach, California was contracted to provide CPT sampling services. Earth Technology is a California licensed C-57 contractor.

A 20-ton CPT rig was utilized for groundwater sampling activities. The CPT probe is hydraulically pushed into the ground and stratigraphic data is transmitted instantaneously to the operator's monitoring equipment in the rig. This procedure creates an approximately two-inch diameter borehole, and does not generate any soil cuttings. Field sampling activities were initiated and completed on June 16, 1994.

Groundwater Sampling Procedures

Groundwater samples were collected using Push In PVC Piezometer (PIPP) equipment. The PIPP utilizes a high strength steel casing with a disposable tip, which is hydraulically pushed into the

borehole previously created by the CPT probe. A retrievable slotted PVC screen, 5.0 feet in length, was deployed into the steel casing which was then hydraulically retracted approximately 5.0 feet, allowing groundwater to pass through the screened interval. Groundwater samples were collected using a 1/2-inch transparent PVC bailer dropped into the screened zone.

All downhole equipment was decontaminated before and after each penetration using an automatic washing system. The washing system consisted of an enclosed chamber containing scrapers and high pressure spray nozzles fed by a steam cleaner. Upon withdrawal from the ground, all downhole equipment passed through the decontamination chamber where it was automatically scraped and washed with hot water. The rinsate was contained inside the sealed chamber and pumped into a 55-gallon drum. The PIPP sampler and PVC bailer were manually decontaminated and reconditioned between sampling locations, using a triple rinse consisting of one wash in an Alconox - potable water solution followed by two rinses in deionized water.

All boreholes were backfilled by pumping a bentonite slurry through plastic tubes which were manually inserted through steel pipes used to deploy the PIPP. Boreholes were backfilled to within a few inches of grade, and then surfaced with cold patch asphalt material.

CPT Groundwater Sample Analyses

The samples were transported, under CET's chain-of-custody protocol, to Chromalab, Inc, a DHS certified laboratory, for analysis. Copies of the signed laboratory reports, chain-of-custody records, and sample collection records are presented in Appendix B.

Groundwater Sample Analytical Methods

Groundwater samples were analyzed for TPH-D, TPH-G, BTEX, and volatile halogenated compounds (VOCs) using EPA Test Methods 3510, 5030, 8020, and 8010, respectively.

Groundwater Sample Analytical Results and Discussion

Petroleum Hydrocarbons

Analytical data for groundwater samples collected from the site's groundwater monitoring wells and CPT boreholes are presented in Tables 2 and 3. The distribution of TPH-D concentrations in the groundwater samples collected during June 1994 are shown on Plate 5. The distribution of VOCs collected from CPT boreholes are presented on Plate 6. Signed laboratory analytical reports, chain-of-custody documentation, and sample collection records are presented in Appendix B.

During the June groundwater sampling event, concentrations of TPH-G, and BTEX analytes were found to be below test method detection limits in groundwater samples except for concentrations of xylenes detected at the detection limit in MW9 (0.05 μg/L)

Concentrations of TPH-D (Plate 5) were found primarily in the wells located within the property boundaries with the exception of 0.6 mg/L TPH-D detected northwest of the property boundary (sample CPT 5). A comparison of the historic chemical concentrations detected in groundwater shown in Table 2 indicate that TPH-D has remained relatively unchanged.

Chlorinated Hydrocarbons

The SCVWD letter dated May 4, 1994 identified the following VOCs in groundwater at the site: 1,1-dichloroethene (1,1-DCE); 1,1-dichloroethane (1,1-DCA), cis-1,2-dichloroethene (1,2-DCE); 1,1,1-trichloroethane (TCA); trichloroethene (TCE); tetrachloroethene (PCE); 1,1,2,2-tetrachloroethane (PCA); bromodichloromethane (DCM); and chloroform (CHL). Based on the analytical data presented, concentrations of VOCs in samples collected from site wells were not detected above current maximum contaminant levels (MCL) except for a single occurrence in January 1993 from MW5 at 6.9 μg/L for TCE. Subsequent analytical data indicates TCE was not detected above the MCL.

In June 1994, groundwater samples were collected from each CPT borehole. The location of the CPT borehole and the corresponding concentration for VOCs is presented on Plate 6. Analytical results of these samples revealed minor concentrations of VOCs in groundwater upgradient of site activities (CPT1 and CPT2) and off site (CPT3 through CPT5). The highest concentration of any VOC detected above the MCL (MCL = 5.0 μg/L) was TCE which was detected at CPT1 at 13 μg/L and at CPT2 at 8.0 μg/L.

Groundwater Pumping Test

CET conducted three groundwater pumping tests at the site in order to determine the feasibility of implementing a groundwater extraction program as a remedial action. Each test was conducted by placing a submersible electric centrifugal pump into a selected well and producing water at a near constant rate. The groundwater discharged from the pumping well was directed into a 7,000 gallon temporary holding tank for characterization prior to final discharge to the sanitary sewer.

The first test was performed on June 8, 1994 using well MW6 as the extraction well. Wells MW4A, MW7 and MW9 were used as observation wells. The sustainable flow rate from MW6 was only 0.64 gallons per minute (gpm). Over a period of over 24 hours, the maximum drawdown seen in the observation wells was 0.04 foot at MW4A. Virtually no response was seen at the other observation wells. The conclusions drawn from this test were that MW6 is not a

remedial extraction well candidate and that the data was insufficient to estimate the shallow water bearing zone's hydraulic conductivity.

The second test was performed on June 22, 1994 using well MW4A as the extraction well. Again, nearby wells including well MW4B, nine feet from the pumping well, and MW4C, at a distance of eight feet, were used as primary water table drawdown observation wells. The sustainable flow rate from MW4A was only 1.2 gpm. Over a period of 3.5 hours, the maximum drawdown seen in the observation wells was 0.01 foot. This test was deemed inconclusive as virtually no response was recorded in the observation wells.

The third test was performed on June 22, 1994 using well MW4C as the extraction well. During this test a constant groundwater production rate of 11.3 gpm was sustained from the extraction well and a drawdown response was seen in observation wells across the site. Well MW4C differs in its construction from the wells tested previously in that it has a 15 inch diameter casing. Wells MW4A and MW6 are 4 inch diameter wells. The wells used for drawdown observation, their radii from MW4C, and the final drawdowns observed at the end of the 2.2 hour test are summarized below.

Observation Well Number	Distance from MW4C (feet)	Drawdown in Groundwater Elevation from Beginning to End of Test (133 Minutes) (feet)
MW4C (Pumped Well)	0	2.14
MW4A	8.0	0.56
MW6	25	0.28
MW7	82	0.08
MW8	86	0.08

The observed drawdowns at varying distances from MW4C were analyzed to estimate transmissivity at the site by using the Cooper and Jacob (1946) modification to the Theis non-equilibrium equation. First a semi-log graph of distance versus drawdown was constructed for the final drawdown values observed. The plotted data was observed to fall nearly on a straight line, as predicted by the theory. Using the slope of this straight line, a transmissivity for the shallow groundwater bearing zone of about 10,000 gallons per day per foot (gpd/ft) is calculated. Assuming an approximate value of four feet for the thickness of the productive shallow water bearing zone, as observed in the soil borings from approximately 16 to 20 feet bgs, a corresponding hydraulic conductivity value of 2,500 gpd/ft^2 is calculated. This value is at the

high end of typical values for silty sands and intermediate for clean sands, consistent with the coarse grained lithology observed in the soil borings from approximately 16 to 20 feet bgs. Using the zero drawdown intercept of the straight line, a storativity of about 0.045 is calculated. The observation well data and the straight line used for these calculations can be seen in Figure 1 (Appendix C) at t = 0.09 days.

The widespread drawdown pumping response from well MW4C suggests that a capture zone large enough to encompass the known extent of groundwater impacted by petroleum hydrocarbon constituents can be enforced through the long term pumping of this well. In an effort to predict the drawdowns which could be enforced through the pumping of MW4C, estimates of drawdown-distance behavior were developed using the values of transmissivity and storativity determined in the final pump test. The predicted drawdown behavior for two constant groundwater production rates from MW4C are presented in Figures 1 and 2. Figure 1 is based on a flow rate of 11.3 gpm, the rate at which the original test was conducted. Figure 2 is based on a flow rate of 5.0 gpm, the design rate for the proposed groundwater remedial action. A gpm of 5.0 was chosen because, as described below, this rate is expected to create a capture zone sufficient to contain the extent of petroleum hydrocarbon impacted groundwater. The predicted distance-drawdown response relationship for these pumping rates is shown in Figures 1 and 2, (Appendix C), respectively, for various durations of pumping.

Figure 2 predicts that for a 5.0 gpm pumping rate from well MW4C, a drawdown of about 0.13 feet would be observed at a radius of 25 feet after 0.1 day, at a radius of 85 feet after one day, and at a radius of 250 feet after 10 days of continuous pumping. Through long term continuous pumping at a rate of about 5.0 gpm from well MW4C, it is estimated that the zone of capture will extend well beyond the location of CPT-5, which is located about 100 feet from MW4C. This should be confirmed by quarterly groundwater elevation monitoring once the groundwater pumping system has been installed.

CONCLUSIONS AND RECOMMENDATIONS

The current phase of groundwater investigation activities conducted at the El Camino Paving facility included the following:

1. Groundwater monitoring activities were performed including sample collection for chemical analysis and groundwater elevation measurements.

2. Onsite and offsite groundwater sample collection was performed by a CPT investigation which provided an assessment of VOC concentrations in the shallow groundwater upgradient and downgradient of the site.

3. Pumping tests were performed to provide data to design a hydraulic containment system to allow an immediate response mechanism for mitigating flow of groundwater containing petroleum hydrocarbons.

The work conducted during the current investigation supports the following conclusions and proposal recommendations for remedial implementation:

1. The groundwater samples collected from various site wells are consistent with concentrations of detected chemicals among sampling events, including data for the most recent sample collected in June 1994. The groundwater flow direction appears to be consistent with previous reports and indicates that the direction of groundwater flow is generally towards the northwest. Comparison of the concentrations collected using CPT with historic concentrations indicates that petroleum hydrocarbons may have migrated offsite toward the northwest at concentrations of 0.6 mg/L Diesel. VOC concentrations in groundwater are relatively low and appear to emanate from source(s) upgradient of the site. The highest concentration found exceeding the MCL was that for TCE. The source of the TCE detected in groundwater upgradient of the site was not identified.

   Based on the above, the installation of two additional wells is recommended; one well should be located upgradient of the site and one well located downgradient of the site at the approximate locations shown on Plate 2.

2. Three pumping tests have been performed at the facility. All test data and results are presented in Appendix C, including tabulated summaries of pumping rates and drawdown and specific capacity data for constant extraction rate tests performed at the extraction wells.

   The pump test preformed at MW4C provided data to design and construct a hydraulic containment system to allow immediate response mechanism for mitigating petroleum hydrocarbons in the groundwater at and downgradient of the site. Groundwater extracted from MW4C will be discharged to the City of Mountain View sanitary sewer under permit issued by the City on August 3, 1994. A copy of the permit is provided in Appendix D.

3. After installation of the hydraulic containment system and the two additional wells (MW10 and MW11), a revised monitoring schedule is recommended as shown in Table 4. Under the revised monitoring schedule, depth to groundwater will be collected on a quarterly basis and groundwater samples from wells MW2, MW6, MW7, MW9, MW10 and MW11 will be collected on an semi-annual basis.

Groundwater samples at wells MW1, MW3, MW5, and MW8 are proposed on an annual basis for the following reasons:

- MW1 and MW3 are located within 20 feet of MW2 and sampling MW1, MW3 and MW2 is not expected to provide additional groundwater quality information compared to that obtained from sampling MW2 only.

- MW5 is located between MW6 and MW9 and sampling MW5 is not expected to provide additional groundwater quality information compared to that obtained from sampling MW6 and MW9.

- Well MW8 has consistently shown concentrations below method detection levels except for a single occurrence for xylenes in April 1993 at 3.0 μg/L. Subsequent sampling indicates concentrations below method detection levels in this well. In addition, the proposed well MW11 will be located downgradient of MW7 and MW8.

PLANNED ACTIVITIES

The following site activities are planned during the fourth quarter 1994:

- Groundwater elevations will be measured quarterly, and groundwater samples will be collected from various site monitoring wells according to the revised monitoring schedule shown in Table 4.

- Monitoring wells MW10 and MW11 will be installed.

- The recommended remedial action for hydraulic containment will be implemented.

NOTES:
All concentrations in milligrams per liter or parts per million
TPH-D = total petroleum hydrocarbons in diesel range
TPH-G = total petroleum hydrocarbons in gasoline range
nd = not detected; for reportable detection limits; see laboratory analytical reports
nt = not tested
(a) Laboratory reported that the gasoline range detections did not match typical gasoline pattern
(b) Laboratory reported that the diesel range detections did not match typical diesel pattern
(d) Duplicate sample

Table 3 - CPT Volatile Organic Compound Chemical Data Summary
El Camino Paving, Mountain View, CA

CPT	Sampling Date	TCE (a)	1,1,1-TCA	1,1,2-TCA	PCE	cis-DCE	PCA	Freon	CHL	1,1-DCE
CPT 1	06/16/94	13	4.6	0.53	0.66	1.5	0.56	4.5		
CPT 2	06/16/94	8.0				1.1		1.5		
CPT 3	06/16/94	3.7	1.6			1.6		0.6		0.78
CPT 4	06/16/94	1.1	1.7			1.5		0.58	1.3	1.1
CPT 5 (a)	06/16/94	0.7				1.4				0.84

a. TCE = trichloroethene; 1,1,1-TCA = trichloroethane; 1,1,2-TCA = Trichloroethane; PCE = 1,1,2,2-Tetrachloroethane; cis-DCE = cis-1,2-dichloroethene; PCA = bromodichloromethane; Freon = Freon 113; CHL = chloroform; 1,1-DCE = dichloroethene

Table 4 Proposed Groundwater Monitoring Schedule
El Camino Paving, Mountain View, CA

	MONITORING FREQUENCY	
	Quarterly	**Annually (Fourth Quarter)[b]**
Elevation	All Wells	
TPH-D, TPH-G BTEX	MW2, MW6, MW7, MW9, MW10, MW11	MW1, MW3, MW5, MW8

a. Elevation = groundwater surface elevation; BTEX = benzene, toluene, ethyl benzene, and total xylenes, TPH-G, TPH-D = total petroleum hydrocarbons as gasoline and as diesel, respectively.

b. Samples collected annually to be analyzed for TPH-D, TPH-G, BTEX, and Chlorinated Solvents (8010).

APPENDIX A

Well Abandonment

Santa Clara Valley Water District

WELL DESTRUCTION APPLICATION

FC 198 (08-14-90) DP 4-902

DISTRICT PERMIT NO. 94D0189

5750 ALMADEN EXPRESSWAY • SAN JOSE, CA 95118 • (408) 265-2600

Owner's Name: Esteban Alva	Consultant Firm:	Drilling Co.: Garcia Well Pump Co
Address: 924 San Rafael Ave	Address:	Address: 1045 Weeks St.
City, State, Zip: Mt View, Ca	City, State, Zip:	City, State, Zip: E. Palo Alto, Ca 94303
Telephone No.: 965-7283	Telephone No.:	Telephone No.: 415 322-2803 Contractor's Lic. No. (C-57 Req'd): 604909

The well to be destroyed is located on Assessor's Parcel No.: 153-17-045 Well Registration No. (If any): 06S2W15M-unreg

Well Construction Permit No.: N/A Well No.: N/A

Well Address/Location of Well: 924 San Rafael Ave Mountain View

WELL FEATURES:

All items below are to be completed before permit can be issued; if unknown, Applicant shall make necessary on-site investigation to determine correct answers.

DOES THE WELL HAVE:

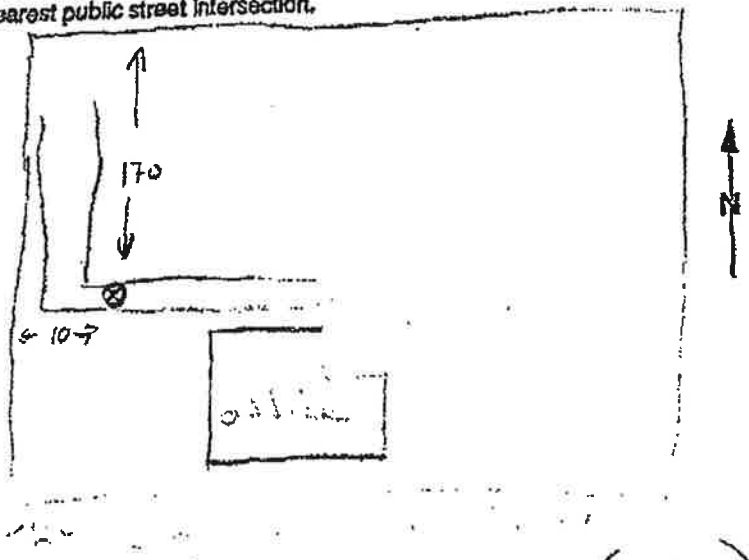
Outer conductor pipe?	☐ Yes	☑ No
Annular concrete seal outside of casing at surface?	☐ Yes	☑ No
A gravel envelope outside of casing at surface?	☐ Yes	☑ No
A water meter attached? (Water well only)	☐ Yes	☑ No

REASON FOR SEALING (Check one):

- ☐ Poor water quality
- ☐ Casing collapsed
- ☒ No longer needed
- ☑ Land development

Site Plan:

Show parcel outline and distance of well from at least two property corners, boundaries, buildings, or other landmarks; give distance and direction to nearest public street intersection.



What is to be placed/constructed on the ground surface over the sealed well? Storage area (open)

Geologic setting: 1 (See Figure 1, Construction Standards).

Well Depth: 140 feet. (If unknown, make sounding; accuracy is to be within 5 feet.)

Well Diameter: 6 inches.

I understand that all work is to be done in accordance with District Well Standards, and conditions of permit on the reverse side. (Special Conditions on Permit may be added by District upon receiving completed Application.)

Richard Garcia — Contractor's Signature

June 13 1994 — Date

APPLICANT TO COMPLETE ALL INFORMATION ON THIS SIDE ONLY

DISTRICT WILL PREPARE PERMIT ON REVERSE SIDE AND RETURN TO APPLICANT

Santa Clara Valley Water District

WELL DESTRUCTION COMPLETION NOTICE

Well destroyed according to provisions of the Permit ☒ Yes ☐ No (If No, see comments below)

FIELD LOG:

Well Depth: 140	Casing Diameter: 6"
Well Type: ☒ Cable-Tool ☐ Rotary ☐ Other:	
Casing Perforated: Ø up to Ø	Sealer Material: 1.5 yds^3 10 sacks

Comments: Sand Tremmied

Distribution: White - Well Section Yellow - Permittee Pink - Water Revenue Div.

FC 198 (10-14-93)

*** DISTRICT USE ONLY ***

Date Issued: 6/20/94

Permit No.: 94D0189 * Well No.: 06S2W15M-Unrg.

Based on information on the Application and attachment(s) thereto (if any) permission is hereby granted to seal and destroy an existing well. Permission to start may be withheld until a field check verifies all statements made on Application by Permittee, and is also subject to the following conditions:

GENERAL CONDITIONS:

A. SCVWD WELL INSPECTION DEPT. (TELEPHONE 408-927-0710, EXT. 660) MUST BE NOTIFIED A MINIMUM ONE WORKING DAY PRIOR TO STARTING WORK. Destruction authorized under this Permit is subject to any instructions relative to the applicable "Standards for the Destruction of Abandoned Wells" by a District Representative. A District Inspector must be on site to witness the destruction procedure.

B. This Permit is valid only for the purpose specified herein. No change in destruction procedure as prescribed in District's Standards and in Special Conditions below will be allowed except upon written permission of the District or instructions of District Inspector in the field.

C. Permittee shall assume entire responsibility for all activities and uses under this Permit and shall indemnify, defend and save the District, its officers, agents, and employees free and harmless from any and all expense, cost, liability in connection with or resulting from the exercise of this Permit including, but not limited to, property damage, personal injury and wrongful death.

D. Compliance with "Cal/OSHA", California Labor Code Section 6300 (and following) is required.

E. Permit will be automatically canceled if not exercised or extension requested by Permittee, within 180 calendar days of above date.

F. It is to be filed State DWR Form 188 and an original to S.C.V.W.D. within 30 days of well completion.

G. [illegible] of all [illegible], a permit must be a licensed C-57 Water Well Drilling Contractor.

H. [illegible] material [illegible] be safely [illegible] and properly disposed of by an approved method.

I. [illegible] a copy of the Worker's Compensation Insurance [illegible] the S.C.V.W.D.

SPECIAL CONDITIONS:

** Well is to be bailed or drilled out to true bottom of well. All debris and hardware must be removed from well prior to sealing.

David C. Fozaya

SIGNED: _____

* District [illegible]

City of Mountain View Discharge Permit

CITY OF MOUNTAIN VIEW
ENVIRONMENTAL SAFETY DIVISION
1000 VILLA STREET, MOUNTAIN VIEW, CA 94041 • 415-903-6378

LIQUID WASTE DISCHARGE PERMIT

THE FIRM/CORPORATION NAMED HEREIN IS AUTHORIZED TO DISCHARGE REGULATED WASTEWATER INTO THE SANITARY SEWER IN ACCORDANCE WITH CHAPTER 35 OF THE MOUNTAIN VIEW CITY CODE.

Permitted Facility: El Camino Paving, Inc.
924 San Rafael Avenue

El Camino Paving, Inc.
P.O. Box 62319
Sunnyvale CA 94088
Attn: Estevan L. Alva

Date Issued: 4/27/94
Date Revised: 8/3/94
Date Expires: 5/1/97
Permit ID: 722

Phil Bobel, Manager
Palo Alto Environmental Compliance Division

Gary Lenweber, Manager
Mountain View Environmental Safety Division

EPA Category/Subcategory: Non-EPA
Reference:
Local Category: Vehicle Svce, Groundwater

POST IN A CONSPICUOUS PLACE AT THE "PERMITTED FACILITY" SITE

I. Discharge Limitations:

Process Discharge (Industrial Waste) shall not exceed 10,900 GPD
Total Discharge (Industrial & Domestic Waste) shall not exceed 25,000 GPD

II. Special Conditions/Requirements:

Due Date:

1. Periodically clean out and maintain oil/water separator (clarifier) in good working order. N/A
2. Sampling analysis for TTO/STO shall employ EPA 8015 and 8020 methods.

III. Self-Monitoring Sampling Analysis:

Pollutant	Sample Frequency	Sample Location(s)*	Fed.Inst. Max.Limit (mg/l)	Fed.Mon. Avg.Limit (mg/l)	Loc.Inst. Max.Limit (mg/l)	Sampled By
Copper	Quarterly	A1	No Limit	No Limit	2.0	CMV
Lead	Quarterly	A1	No Limit	No Limit	0.5	CMV
Total Toxic Organics	Quarterly	B1	No Limit	No Limit	1.0	ECP
Single Toxic Organic	Quarterly	B1	No Limit	No Limit	0.75	ECP

*Sampling Location A1 is at the discharge end of the oil-water separator (clarifier) sump at the east end of the building.
*Sampling Location B1 is adjacent to extraction well MW4A.

IV. Wastewater Discharge Limits: (MVCC 35.32.14 & CFR 40)

If your average wastewater discharge flow into the sanitary sewer system is AT OR BELOW 50,000 gallons per day (GPD), your wastewater effluent shall not exceed the following limits:

Discharge Parameter	Federal Inst.Max.	Federal Mon.Avg.	Local* Inst.Max.	Discharge Parameter	Federal Inst.Max.	Federal Mon.Avg.	Local* Inst.Max.
Arsenic	No Limit	No Limit	0.1 mg/L	Oil & Grease	No Limit	No Limit	200 mg/L
Cadmium	No Limit	No Limit	0.1 mg/L	Phenols	No Limit	No Limit	1.0 mg/L
Chromium Hex.	No Limit	No Limit	1.0 mg/L	pH	No Limit	No Limit	5.5-11
Chromium, Total	No Limit	No Limit	2.0 mg/L	Selenium	No Limit	No Limit	2.0 mg/L
Copper	No Limit	No Limit	2.0 mg/L	Silver, Photo	No Limit	No Limit	0.25 mg/L
Cyanide	No Limit	No Limit	1.0 mg/L	Silver, Non-Photo	No Limit	No Limit	0.50 mg/L
Fluoride	No Limit	No Limit	65 mg/L	Single Toxic Organic	No Limit	No Limit	0.75 mg/L
Formaldehyde	No Limit	No Limit	5.0 mg/L	Suspended Solids	No Limit	No Limit	6000 mg/L
Lead	No Limit	No Limit	0.5 mg/L	Tot. Dissolved Solid	No Limit	No Limit	10000 mg/L
Mercury	No Limit	No Limit	0.05 mg/L	Total Toxic Organic	No Limit	No Limit	1.0 mg/L
Nickel	No Limit	No Limit	1.0 mg/L	Zinc	No Limit	No Limit	2.0 mg/L

*Local instantaneous maximum limits refer to 24-hour composite samples except for Cyanide, Single Toxic Organic, and Total Toxic Organics which are grab samples. If your average wastewater discharge flow EXCEEDS 50,000 GPD, your wastewater effluent shall not exceed ONE-HALF (1/2) of the local limits listed above, except for silver, oil & grease, suspended solids, total dissolved solids, total toxic organics, fluoride, and pH.

V. Sample Collection and Analysis: (MVCC 35.32.17.3, 40 CFR 403.12A(G), 40 CFR 136)

All metals shall be collected as 24-hour composite samples except for Cyanide and Total Toxic Organics (TTO) which shall be collected as grab samples. Samples shall be analyzed by an analytical laboratory approved by the State of Cal. Dept. of Health Services. Sample collection, preservation, and analysis shall be in accordance with EPA regulations (40 CFR 136) and the City of Mountain View's "Sample Collection, Analysis and Reporting Instructions".

VI. Quality Assurance/Quality Control: (MVCC 35.32.17.3, 40 CFR 403.12A(G), 40 CFR 136)

All metals samples must be collected in duplicate and stored and preserved until the next sampling event for that parameter. The duplicate sample must be labeled as a duplicate and made available to any City inspector.

VII. Violation Reporting & Follow-Up: (MVCC 35.32.8.2)

If the results of any sampling or pH analysis exceed the applicable limit(s), you shall:

1) VERBALLY NOTIFY THE CITY OF MOUNTAIN VIEW AT 415-903-6378 AND THE PALO ALTO WATER QUALITY CONTROL PLANT AT 415-329-2598 WITHIN 24 HOURS of knowledge of the violation. If an accidental discharge, slug discharge, or upset or failure of the pretreatment system occurs, verbal notification shall be made within 15 minutes of knowledge of the condition;

2) SUBMIT A WRITTEN REPORT WITHIN 15 WORKING DAYS of knowledge of the violation explaining: the nature, volume, duration of the violation, and mitigation measures taken to correct it and prevent reoccurrence;

3) INITIATE A SAMPLING/ANALYSIS PROGRAM demonstrating up to 21 consecutive days of compliance.

VIII. Penalty Provisions: (MVCC 35.32.21)

Any person who violates any provision of this permit or Chapter 35 MVCC shall be civilly liable in a sum not to exceed $6,000/day for each day in which such violation occurs. In addition, violation of compliance directives in any "Notice of Violation" is subject to administrative penalties not to exceed $6,000/day.

IX. Transferability of Permit: (MVCC 35.32.2.3)

This permit is not transferable without prior written notification to and approval by the City and the assumption of all permit conditions and requirements by the new owner/operator.

A copy of the Industrial Wastewater Ordinance (Chapter 35, MVCC) and "Sample Collection, Analysis and Reporting Instructions" document are available on request from any Industrial Wastewater Specialist at 415-903-6378.

Mr. George Gioia
El Camino Paving
94 San Rafael Avenue
Mountain View, CA 94043

Mr. Estevan and Ms. Maria Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Gioia and Mr. and Ms. Alva:

Subject: Fuel Leak Investigation at El Camino Paving, ~~94~~ 924 San Rafael Avenue, Mountain View, CA

After having reviewed the case file for the subject property, Santa Clara Valley Water District (District) staff has determined that additional groundwater monitoring is needed to determine the current conditions of the groundwater contamination plume.

Subsequently, per Senate Bill 521, responsible parties of all underground storage tank releases, gasoline or otherwise, are to perform analysis for Methyl tert-Butyl Ether (MTBE) and report the analytic results to the lead regulatory agency, the District. Therefore, we request that you sample the monitoring wells (MW1) on the subject property and analyze the samples for the constituents of concern listed below.

Please respond to the technical comments in a Quarterly Groundwater Monitoring Report (QMR).

TECHNICAL COMMENTS

- Continue to sample MW1 thru MW9 on a quarterly basis and list the results in a QMR in accordance with the following schedule:

Report	**Due Date**
First Quarter 2000	**May 20, 2000**
Second Quarter 2000	**July 15, 2000**

Please note: the monitoring wells have not been sampled in a few years and may need to be redeveloped prior to sampling.

- Please analyze all groundwater samples collected for:

  - Total Petroleum Hydrocarbons as Gasoline, Total Petroleum Hydrocarbons as Diesel, Benzene, Toluene, Ethylbenzene, and Xylenes using approved U.S. Environmental Protection Agency (EPA) methods.

- MTBE, tert-Amyl Methyl Ether, Ethyl tert-Butyl Ether, Di-Isopropyl Ether, and tert-Butyl Alcohol by EPA Method 8260 analysis or any other approved method for fuel oxygenates.
- Volatile Organic Compounds by EPA Method 8010.

REPORT REQUEST

We request that you submit a QMR by **May 20, 2000**. This report is requested pursuant to the Regional Water Quality Control Board's authority under Section 13267 of the California Water Code.

ENFORCEMENT

Please note that further delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the state's Underground Storage Tank Cleanup Fund (SB2004) to reimburse you for the cost of the cleanup.

If you have performed additional investigation post-1996, or you have any questions, please contact me at (408) 265-2607, extension 2768.

Sincerely,

Mountain View, CA 94043

Mr. Estevan Alva
Mrs. Maria Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Gioia and Mr. and Mrs. Alva:

Subject: Fuel Leak Investigation at El Camino Paving, 924 San Rafael Avenue, Mountain View, CA

Thank you for your submittal of the "Quarterly Monitoring Report," dated July 7, 2000, prepared by CSS Environmental Services. The Santa Clara Valley Water District staff has reviewed the analytical data and we recommend that, during this next round of groundwater sampling, you continue to include the fuel oxygenates to confirm that these constituents are indeed not at your site.

Furthermore, please include the analytical results regarding the fuel oxygenates in your Historical Concentration Table, as well as calculate the depth to water on your Historical Groundwater Elevation Summary.

TECHNICAL REPORT REQUEST

Please submit a Third Quarter 2000 Quarterly Groundwater Monitoring Report by **October 15, 2000**. These reports are requested pursuant to the Regional Water Quality Control Board's authority under Section 13267 of the California Water Code.

If you have any questions, please contact me at (408) 265-2600, extension 2768.

Sincerely,

Mohammad A. Kahn
Assistant Civil Engineer II
Santa Clara Valley Water District
5750 Alamaden Exp.
San Jose, CA 95118-3686

Subject: Meeting Summary
Remedial Action Items

Dear Mr. Kahn:

This letter provides a summary of a meeting between the Santa Clara Valley Water District (SCVWD), El Camino Paving, and CET Environmental Services, Inc., (CET) on November 7, 1995. The following is a summary of the meeting:

1. *Former Tank Pit Soil Sampling:* A workplan will be submitted to SCVWD for collecting soil and groundwater samples at two locations within the former tank pit. The purpose is to characterize residual total petroleum hydrocarbon concentrations, if found.

2. *Cease Groundwater Extraction:* Since contaminant concentrations for TPH-diesel in groundwater have been below 1 mg/L at wells located at the property boundary, and the groundwater pumping system adequately contained contaminants in groundwater to a point where additional pumping does not appear to be of substantial benefit, SCVWD agreed to a request to cease pumping provided quarterly groundwater sampling from site wells verify that the concentrations do not increase significantly.

3. *Verification of Remediation Appied:* CET will provide results of routine monitoring to the SCVWD for a period of four quarters to verify any concentration trend of groundwater petroleum contaminants.

4. *Resend Installing Wells:* CET's report dated October 14, 1994 recommended installation of two additional groundwater monitoring wells based on concentrations at MW-7. These wells were recommended for installation based on the results of groundwater samples above 1 mg/L as TPH-Diesel at well MW-7 during the fourth quarter 1994. Subsequent to this recommendation, routine groundwater monitoring results have shown an overall decrease in contaminant concentration, especially at monitoring well MW-7. This is further supported by data collected in June 1994 which demonstrated that concentrations in grab groundwater samples collected immediately downgradient of MW-7 were below method detection levels (Plate 2).

Printed on Recyclable Paper

The above was discussed at the November 7 meeting with SCVWD, and it was agreed that installation of these wells does not appear to be necessary, based on site concentration. The distribution of TPH-D, TPH-G and BTEX concentrations in the groundwater samples collected during the third quarter of 1995 are shown on Plate 1. The historical water quality concentrations are provided in Table 1. CET will provide results of the analytical testing results on a quarterly basis.

On behalf of El Camino Paving, we trust that the summary provided above is sufficient to ensure continued compliance with S.B. 2004 inquiries to SCVWD.

you have any questions or comments, please do not hesitate to contact me at (510) 652-7001.

Sincerely,

Terry Carter

Re: Underground Storage Tank Program Streamlining

Dear Ms. Allen:

Thank you for providing us with a copy of the draft streamlining plan for the Santa Clara Valley Water District's ("the District") Underground Storage Tank Program. Indeed, we expect that several aspects of the streamlining project will directly and positively affect the Self-Directed Fuel Leaks Program matter on which we provide counsel: 924 San Rafael Avenue, Mountain View (El Camino Paving).

First, as our client's project is in the Self-Directed Fuel Leaks Program, we understand that the project will soon be assigned a specific Self Directed Case Advisor so that our client will have a particular staff member to contact and to provide more detailed oversight for our client's project. Please notify us with the name of the assigned case advisor once this selection is made.

Moreover, we note that under the streamlining plan, the assigned casehandler and the supervisor responsible for our client's case will be able to more quickly respond to our client's requests to hold meetings and that a written agenda will not be required prior to the meeting.

We are also pleased with the recommended actions to improve closure responsiveness. For example, we expect that development of written closure criteria to evaluate whether or not all types of cases should be fully evaluated for closure will significantly speed up the closure process. In addition, the fact that one person will be allowed to certify a case for closure, rather than the current required four signatures, will be helpful to us.

Finally, we believe that replacing the current resource based groundwater protection approach with a risk based corrective action and Non-Attainment Zone approach would benefit our client's case by possibly allowing only plume management

rather than plume cleanup. In conclusion, it appears that the streamlining plan will significantly impact our client's case and will result in a more speedy and cost-effective closure of the matter at 924 San Rafael Avenue.

As noted above, the draft streamlining plan is very impressive. Clearly, the Santa Clara Valley Water District is interested in addressing the concerns voiced by responsible parties and others in the regulated community. Please let us know if you concur with our understanding of the draft as set forth above.

Very truly yours,

Edward L. Quevedo/SKJ

Re: Site Response at 924 San Rafael Avenue, Mountain View

Dear Ms. Allen:

I am writing regarding the status of the above referenced matter in hope of scheduling a meeting to resolve some ongoing points of conflict between the party responding at the San Rafael site (El Camino Paving, Inc. ("ECP")) and Santa Clara Valley Water District staff. As the enclosed correspondence indicates, we have had ongoing disputes regarding the appropriate level of characterization and response to conditions at the Site.

From our perspective, the most efficient way to proceed with this matter, particularly given the need to develop a mutually acceptable 1994 workplan, would be to schedule a meeting immediately to discuss the following items:

1. Site history and progress to date.

2. Appropriateness of off-site investigation.

3. Necessity for further characterization.

4. Potential for installation of interim remedial measures.

5. Future direction and goals at Site.

ECP is a small company with extremely limited resources which has been diverting substantial funds to this matter for the last six years. Without substantial progress on achieving a mutually acceptable response plan, there is a very good chance that ECP's economic viability will be compromised.

Since we are sure this is not the goal of the District, and since we have been unsuccessful in resolving these issues with District staff, we would request that you schedule a meeting to discuss this matter at your earliest possible convenience. I look forward to your response.

Sincerely,

Edward L. Quevedo
of HOLTZMANN, WISE & SHEPARD

Mr. and Mrs. Estevan L. Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Tovar and Mr. and Mrs. Alva:

Subject: Active Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mountain View, CA

We have reviewed the Quarterly Monitoring Report dated June 29, 1993, and the Monthly Status Reports dated May 28, 1993, July 29, 1993, and August 27, 1993, concerning the subject site. Please address the following comments and submit the technical reports requested below.

TECHNICAL COMMENTS

1. Additional investigation was not performed as recommended in your March 18, 1993, report and the Additional Investigation Report was not submitted by June 30, 1993, as requested in the Santa Clara Valley Water District (District) letter dated May 14, 1993. Furthermore, your Monthly Status Report dated May 26, 1993, stated that additional well installations are not recommended at this time.

   The extent of groundwater contamination must be defined at the subject site. During the April sampling event, laboratory results for groundwater from monitoring wells MW-7 and MW-2 reported 7,100 parts per billion (ppb) and 1,700 ppb Total Petroleum Hydrocarbons as Gasoline (TPHG), respectively.

   Please note that the Additional Investigation Report requested in our May 14, 1993, letter is considered late. Please submit this report and a proposed schedule for the next phases of work you plan to complete at the above site by the due date below.

   If the report is not submitted by the requested due date, we will consider referring your case to the Regional Water Quality Control Board (Regional Board) or other appropriate agency, including the County District Attorney, for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

recycled paper

RECEIVED SEP 10 1993

2. Your Monthly Status Report dated May 26, 1993, states that the floating product previously observed in wells MW-1, MW-2, MW-3, MW-4B, and MW-4C was not floating product; it was iron-stained organic material that accumulated in the inactive wells. We request that you collect a sample of the material from these wells and have it properly characterized by a laboratory. Please submit the results (field and laboratory) of your investigation in the next Quarterly Monitoring Report requested below.

3. In your August 27, 1993, Quarterly Monitoring Report, laboratory results reported detectable concentrations of an unknown substance. Please evaluate field and laboratory data and determine what this substance is and what its source is. We request that you include your evaluation in the next Quarterly Monitoring Report requested below. Also, please include all supporting documents such as laboratory methodology, chromatograms, and field notes, etc.

4. During the sampling events this year, solvents were detected in the groundwater. We request that you investigate potential sources for these chemicals and include your evaluation in the next Quarterly Monitoring Report requested below.

5. Please continue with your quarterly monitoring program which consists of a minimum of monthly well gauging and quarterly groundwater sampling and analyses. Please submit all field and laboratory results which document your activities in the next Quarterly Monitoring Report requested below.

6. Please note that Monthly Status Reports should only be one or two pages in length and should briefly describe activities at the site. Quarterly monitoring results and supporting documentation should be included in the Quarterly Monitoring Reports.

TECHNICAL REPORT REQUEST

We hereby request that you submit the following technical reports according to the schedule below:

- September 30, 1993—Next Quarterly Monitoring Report
- September 30, 1993—Additional Investigation Report

These reports are being requested pursuant to the Regional Board's authority under Section 13267 of the California Water Code.

TECHNICAL REPORTING REQUIREMENTS

Please refer to the District's "Investigation and Remediation at Fuel Leak Sites," revised October 1990 (District Guidelines), for information regarding report preparation and soil/groundwater sampling and to the "Standards for the Construction and Destruction of Wells and Other Deep Excavations in Santa Clara County" for information regarding well construction procedures.

All proposals and reports which contain engineering or geological information, interpretations, or other opinions as specified by the Business and Professions Code (Sections 6735, 7835, and 7835.1) must be signed and stamped by an appropriately registered professional who is in responsible charge of the work being performed.

Please note that all data and information generated during and relating to the investigation of the reported release(s) of petroleum hydrocarbons must be provided to the District, Regional Board, and the local agency (i.e., local fire department or County Health Department) referenced in our letters.

All technical reports shall be accompanied by a letter signed by an officer or legally authorized representative of the responsible party which contains a statement attesting to the legitimacy of the report, as described in the District Guidelines (Appendix A, page 2).

AGENCY OVERSIGHT

If the report is not submitted by the requested due date, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

Please note that further delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the State's Underground Storage Tank Cleanup Fund (SB2004) to reimburse you for the cost of cleanup.

If you have any questions, please contact me at the Camden Office, (408) 927-0710, extension 2628.

Sincerely,

Hollis A. Ude

San Jose, CA 95118-3686

Re: 924 San Rafael Ave., Mountain View

Dear Ms. Ude:

This letter responds to yours of September 8, 1993. Unfortunately, your letter makes clear that substantial misunderstandings exist between the good faith and timely actions of the responsible party and the expectations of the District.

In the first instance, as you know from prior correspondence, confirmed by El Camino Paving, I am the designated representative for communications from and to the property owners regarding this site. I therefore fail to understand why you did not at least provide me with a copy of your letter. In the future, please either address such communications to me or copy me. In addition, please copy Mr. Michael Burns of Harding Lawson Associates (HLA), the environmental consulting firm on this matter, with correspondence as well.

As to the substance of your letter, it ignores the recommendations contained in previous timely submitted reports prepared by HLA and forwarded by this office. All reports and investigation data have been submitted in timely fashion since this office was designated as the responsible party representative. We object to the statements in your letter which claim to the contrary.

Furthermore, contrary to other statements in your letter, all relevant investigation data has been submitted in prior timely filed reports. Specifically, the extent of groundwater contamination at the site has been extensively studied and regularly reported on. With respect to other detected substances in the groundwater, you have been informed

that in our view such substances are not the responsibility of the responsible party.

As you know, the designated responsible party on this site is a small business that has responded diligently and conscientiously to District requirements. This has been accomplished at significant expense to the responding party. We therefore believe that a reasonable approach to collecting and interpreting data at the site must be agreed upon which does not place an undue extent of responsiblity for a large regional condition upon this small business operator.

In order to begin the process of developing this reasonable approach, I will provide you with a detailed analysis of our disagreement with your technical comments on September 27, 1993. Because all relevant technical data has been provided in timely submissions to the District, no additional quarterly report will be forthcoming on September 30, 1993.

However, we maintain the expectation that a productive dialogue, which we earnestly hope will culminate in a reasonable agreed-upon plan for the site consistent with the workplan that the repsonsible party has been diligently performing, can be achieved. Therefore, if we should jointly determine that additional data, beyond that which the responsible party has already agreed to and has provided, should be called for, it will be included in the regularly scheduled October quarterly report.

Sincerely,

Edward L. Quevedo

Re: 924 San Rafael Ave., Mountain View

Dear Ms. Ude:

This letter follows mine of September 24, 1993, and further responds to your letter of September 8, 1993. I also take account here of our telephone conversation of November 2, 1993. As you know, this firm represents the responding party at this site, El Camino Paving, Inc. (ECP).

I note that in its letter of May 14, 1993, the District requested submission of an additional investigation report. However, in the Harding Lawson Associates (HLA) report dated May 26, 1993 (the May monthly status report, hereinafter referred to as the May Report), HLA carefully detailed current conditions and analytical results at the site and recommended against the significant additional expense of further investigation pending the results of additional sampling events. In addition, in the 1993 Second Quarter Monitoring Report dated June 24, 1993 (the June 24 Report), HLA reiterated this point. In Section 6 of the June 24 Report, HLA recommended against additional investigation expenditures in light of the continuing decline in petroleum hydrocarbon concentrations.

Thus, the additional investigation has not been performed based on the recommendations in the May Report and the June 24 Report. The analytical results referred to in these and the other regular reports submitted to the District are for total petroleum hydrocarbons as diesel (TPH-d), not gasoline. The analytical results of all of the sampling events, while not in all cases below reportable detection limits, are relatively low. For example, the July 1993 concentrations of 0.83 micrograms per liter (ug/l) benzene, 2.7 ug/l ethyl benzene, and 1.6 ug/l xylenes, are below their respective California Maximum Contaminant Levels (MCLs) of 1,680, and 1750 ug/l.

Accordingly, the May Report and June 24 Report recommended against new wells and aquifer tests. The District was timely informed by ECP of the basis for its reply to the request for additional investigation. Your letter of September 8, 1993, was sent more than three months after the May Report in which HLA first explained this reply.

The responding party has taken a proactive approach in that each new set of data is evaluated with respect to the overall investigation. One result of this approach, which we believe is justified given the relative significance of the site, is the changes recommended in the May Report and elaborated in the June 24 Report. The responding party is, of course, through its representatives, willing to further discuss this issue.

We continue to be concerned, however, that the District does not appear to fully evaluate all information submitted by the responding party on a monthly basis. A careful reading of the monthly and quarterly reports clearly indicates that there is no floating material of any sort detected or present in any of the wells. Therefore, there is no material to sample and characterize.

As noted in the analytical summary tables of all of the responding party's monthly reports, the "unknown" substances are in the chromatographic ranges of either gasoline or diesel, depending upon the sample analysis, but do not correspond precisely to "fresh" gasoline or diesel. As you are no doubt aware, this chemical signature commonly occurs when the hydrocarbon has undergone degradation in the environment due to bacterial activity or other degradation mechanisms. It does not mean that the substances are "unknown" and certainly does not mandate further immediate evaluation.

Chlorinated solvents are not known to have been used at this site. No on-site sources are known. The relatively low levels of solvents which have been detected in the site's most upgradient well therefore suggests that the source (if any) is upgradient of this site and therefore not the responsibility of ECP.

As you also know, all monthly and quarterly reports, including the most recent round of reports, have been sent to the District on schedule. Additionally, we object to the reference in your September 8, 1993, letter regarding the California Underground Storage Tank Cleanup Fund. This reference unfairly jeopardizes ECP's ability to be compensated for their efforts solely due to what appears to be difficulties

or limitations in communication. The diligence exhibited and substantial costs incurred by ECP surely merit better treatment by the District.

Sincerely,

Edward L. Quevedo

Re: Reinstatement of Lead Oversight for El Camino Paving, 924 San Rafael Avenue, Mountain View, CA

Dear Ms. Allen:

This letter reinstates Santa Clara Valley Water District (District) lead oversight for soil and groundwater cleanup at the subject site. This site was transferred May 4, 1994 to the Regional Board for enforcement followup.

In response to our May 31, 1994, letter, CET Environmental Services, on behalf of Mr. Charles Tovar, has submitted a letter addressing the activities outstanding at both the District and our office for the subject site. This July 1, 1994, letter indicates: a) a work schedule for the April 6, 1994, Harding Lawson workplan; b) the precise location of the artesian well and a scheduled date for abandonment; c) results of aquifer testing, and, d) a recent groundwater investigation, including three offsite groundwater samples and two onsite samples using CPT/Hydropunch.

Mr. Tovar appears to be willing to continue with acceptable investigative and remedial activities related to the soil and possible groundwater pollution at the site. It is appropriate, then, that investigation and remediation activities should be overseen by District staff. Should Mr. Tovar be recalcitrant for future activities at the site, we will consider immediate enforcement actions.

We appreciate the supportive relationship that District staff have with the Regional Board. Please contact John West of my staff at (510) 286-1247 if you have any questions regarding this letter.

Sincerely,

Steven R. Ritchie

Re: El Camino Paving, 924 San Rafael Avenue, Mountain View, California

Ladies and Gentlemen:

The above site has been referred to the Regional Board by the Santa Clara Valley Water District (SCVWD) for possible enforcement action. Board staff have reviewed the information regarding this site and have the following comments:

1) It appears that a significant release of pollution to the subsurface has occurred at the site. Approximately 200 to 400 gallons of "pure" diesel product were removed from the bottom of the tank pit during tank removal. Floating product has been detected in several onsite monitoring wells, while offsite wells near the property line detect diesel concentrations up to 990,000 parts per billion. Small concentrations of solvents, including 1,1-DCE; 1,2-DCE; 1,1-DCA; 1,1,1-TCA; TCE; 1,1,2,2-PCA; PCE; bromodichloromethane; and chloroform have also been detected onsite in groundwater. The source(s) of these solvents have not yet been identified.

2) SCVWD has sent a total of nine letters to you since July 30, 1990, requesting various technical reports. Although SCVWD has received numerous reports and letters, the following items still remain unaddressed:

- Sufficient additional wells to fully define the extent of groundwater pollution both onsite and offsite have not been installed;

- Migration control and remediation of polluted soil and groundwater has not been implemented;

- The source of the solvents detected in onsite groundwater has not been identified;

- Information related to the artesian well that is known to exist on the site has not been submitted; and,

- Timelines for future activities at the site have not been submitted.

3) In a recent conversation with John West of my staff, Mr. Charles Tovar mentioned that he would now like to move ahead with the necessary activities needed to resolve this matter. During this conversation, Board staff stressed the potential liabilities and affects of an enforcement action against noncompliant parties.

Based on this information, please submit by July 1, 1994, an amendment to your April 6, 1994, workplan submitted by Harding Lawson Associates, that describes:

a) A work schedule for the activities originally proposed in the April 6, 1994, workplan;

b) The precise location of the onsite artesian well, as well as an evaluation of its impact to the investigation, and its eventual and appropriate destruction.

c) A plan to identify the source(s) of the solvents found onsite.

We are also aware that you have considered applying for reimbursement of cleanup costs from the Underground Storage Tank Cleanup Fund (Cleanup Fund). While we support your involvement in this program, please be advised that compliance with corrective action orders and directives is a requirement for reimbursement of cleanup costs from the Cleanup Fund. Compliance with the conditions of this letter is necessary to remain eligible for all past and future claims, including claims for the above work.

You should be aware that this is a formal request for a technical report required pursuant to California Water Code Section 13267. Failure to respond or late response may subject you to civil liability imposed by the Board to a maximum amount of $1,000 per day. Any extensions of the time deadline set forth above must be confirmed in writing by Regional Board staff.

The investigation and cleanup of hydrocarbon pollution at this site should be completed under SCVWD Fuel Leak Guidelines. Copies of the guidelines can be obtained by contacting SCVWD. All requested reports should be submitted to both SCVWD and the Regional Board. Based on your response to this request for technical reports, direct oversight of this site may be returned to SCVWD.

Questions regarding the Cleanup Fund or its requirements should be directed to Donna Turcotte at (916) 227-4532. If you have any questions regarding other items in this letter, please contact John West of my staff at (510) 286-1247.

Sincerely,

Steven R. Ritchie
Executive Officer

May 4, 1994

Mr. Steve Morse
Division Chief
Regional Water Quality Control Board
2101 Webster Street, Suite 500
Oakland, CA 94612

Dear Mr. Morse:

Subject: Request for Regional Water Quality Control Board Enforcement for Site No. 45G—El Camino Paving, 924 San Rafael Avenue, Mountain View, CA

The purpose of this letter is to request that the Regional Water Quality Control Board staff consider enforcement against El Camino Paving for failure to submit technical reports which document activities to define the extent of groundwater contamination and to control the migration of contaminated groundwater.

BRIEF SITE HISTORY

During the removal of one 10,000 gallon diesel tank and two 4,000 gallon gasoline tanks, up to 5 inches of floating product was observed on the groundwater at the bottom of the tank pit. Soil contamination as high as 22,000 parts per million of Total Petroleum Hydrocarbons as Diesel (TPHD) was detected in soil samples collected from the former tank area. Approximately 200 to 400 gallons of "pure" diesel product were removed from the bottom of the tank pit during tank removal. However, we are concerned that contamination may have migrated or continues to migrate from the site toward neighboring properties.

BASIS OF REQUEST

The extent of groundwater contamination has not been defined both on site and off site. It appears that contaminated groundwater has migrated beyond the source area and has extended crossgradient and upgradient of the former tank location. Floating product has been detected in several monitoring wells, especially MW-1, MW-2, MW-4, and MW-5. Monitoring wells near the property line have been impacted by contaminated groundwater with a maximum concentration of 990,000 parts per billion of TPHD in MW-2. Solvents, including 1,1-DCE; 1,2-DCE; 1,1-DCA; 1,1,1-TCA; TCE; 1,1,2,2-PCA; PCE; BDCM; and Chloroform have also been detected in the groundwater. The source(s) of these solvents remain unidentified. Hazardous Material Inventory statements dated October 29, 1993 show on-site storage of oil and grease, acetylene, diesel, waste oils, and assorted paints and oils.

We have sent a total of nine letters to the Responsible Parties (RP) since July 30, 1990, requesting various technical reports (please refer to Attachments 1-9). We have received numerous reports and letters from the RPs. However, the following items have not been addressed:

- Additional wells to define the extent of groundwater contamination both on site and off site have not been installed, and the additional Investigation Report originally due March 31, 1993 and subsequently rerequested in our letters dated May 14, 1993 and September 8, 1993 has not been submitted
- Migration control and remediation of contaminated soil and groundwater has not been implemented
- The source of the solvents detected in the groundwater have not been identified

Also, since the most recent Santa Clara Valley Water District (SCVWD) letter dated September 8, 1993, the following have occurred:

- On October 5, 1993, we were informed by the Mountain View Fire Department that an artesian well exists on the property. We are requesting the precise location of this well, an evaluation of its impact to the investigation, and its eventual and appropriate destruction.

On February 17, 1993, a phone conference was held with the RPs and their representatives. We discussed site issues and this referral letter. As a result of that conference call, we delayed finalizing this letter for 1 week because the RPs stated that they would submit a timeline/work proposal responding to our concerns within that following week. The timeline/work proposal was not sent during the following week. However, in a letter dated April 18, 1994, Mr. Quevedo the RPs attorney, stated that a draft work plan has been prepared. On April 28, 1994 the District received a copy of a work plan dated April 6, 1994 prepared by Harding Lawson Associates. We understand a copy of this work plan was also sent to the RWQCB (Attention: Mr. John West). This work plan included a proposal for future phases of work, but had an incomplete work schedule.

Please call Ms. Hollis Ude at the Camden Office, (408) 927-0710, extension 2628, or Miguel A. Silva, extension 2645 to discuss your response to our request.

Sincerely,

Belinda A. Allen
Supervising Engineering
Groundwater Protection Division

September 8, 1993

Mr. Charles Tovar
El Camino Paving
924 San Raphael Avenue
Mountain View, CA 94043

Mr. and Mrs. Estevan L. Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Tovar and Mr. and Mrs. Alva:

Subject: Active Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mountain View, CA

We have reviewed the Quarterly Monitoring Report dated June 29, 1993, and the Monthly Status Reports dated May 28, 1993, July 29, 1993, and August 27, 1993, concerning the subject site. Please address the following comments and submit the technical reports requested below.

TECHNICAL COMMENTS

1. Additional investigation was not performed as recommended in your March 18, 1993, report and the Additional Investigation Report was not submitted by June 30, 1993, as requested in the Santa Clara Valley Water District (District) letter dated May 14, 1993. Furthermore, your Monthly Status Report dated May 26, 1993, stated that additional well installations are not recommended at this time.

   The extent of groundwater contamination must be defined at the subject site. During the April sampling event, laboratory results for groundwater from monitoring wells MW-7 and MW-2 reported 7,100 parts per billion (ppb) and 1,700 ppb Total Petroleum Hydrocarbons as Gasoline (TPHG), respectively.

   Please note that the Additional Investigation Report requested in our May 14, 1993, letter is considered late. Please submit this report and a proposed schedule for the next phases of work you plan to complete at the above site by the due date below.

   If the report is not submitted by the requested due date, we will consider referring your case to the Regional Water Quality Control Board (Regional Board) or other appropriate agency, including the County District Attorney, for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

2. Your Monthly Status Report dated May 26, 1993, states that the floating product previously observed in wells MW-1, MW-2, MW-3, MW-4B, and MW-4C was not floating product; it was iron-stained organic material that accumulated in the inactive wells. We request that you collect a sample of the material from these wells and have it properly characterized by a laboratory. Please submit the results (field and laboratory) of your investigation in the next Quarterly Monitoring Report requested below.

3. In your August 27, 1993, Quarterly Monitoring Report, laboratory results reported detectable concentrations of an unknown substance. Please evaluate field and laboratory data and determine what this substance is and what its source is. We request that you include your evaluation in the next Quarterly Monitoring Report requested below. Also, please include all supporting documents such as laboratory methodology, chromatograms, and field notes, etc.

4. During the sampling events this year, solvents were detected in the groundwater. We request that you investigate potential sources for these chemicals and include your evaluation in the next Quarterly Monitoring Report requested below.

5. Please continue with your quarterly monitoring program which consists of a minimum of monthly well gauging and quarterly groundwater sampling and analyses. Please submit all field and laboratory results which document your activities in the next Quarterly Monitoring Report requested below.

6. Please note that Monthly Status Reports should only be one or two pages in length and should briefly describe activities at the site. Quarterly monitoring results and supporting documentation should be included in the Quarterly Monitoring Reports.

TECHNICAL REPORT REQUEST

We hereby request that you submit the following technical reports according to the schedule below:

- September 30, 1993—Next Quarterly Monitoring Report
- September 30, 1993—Additional Investigation Report

These reports are being requested pursuant to the Regional Board's authority under Section 13267 of the California Water Code.

TECHNICAL REPORTING REQUIREMENTS

Please refer to the District's "Investigation and Remediation at Fuel Leak Sites," revised October 1990 (District Guidelines), for information regarding report preparation and soil/groundwater sampling and to the "Standards for the Construction and Destruction of Wells and Other Deep Excavations in Santa Clara County" for information regarding well construction procedures.

All proposals and reports which contain engineering or geological information, interpretations, or other opinions as specified by the Business and Professions Code (Sections 6735, 7835, and 7835.1) must be signed and stamped by an appropriately registered professional who is in responsible charge of the work being performed.

Please note that all data and information generated during and relating to the investigation of the reported release(s) of petroleum hydrocarbons must be provided to the District, Regional Board, and the local agency (i.e., local fire department or County Health Department) referenced in our letters.

All technical reports shall be accompanied by a letter signed by an officer or legally authorized representative of the responsible party which contains a statement attesting to the legitimacy of the report, as described in the District Guidelines (Appendix A, page 2).

AGENCY OVERSIGHT

If the report is not submitted by the requested due date, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

Please note that further delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the State's Underground Storage Tank Cleanup Fund (SB2004) to reimburse you for the cost of cleanup.

If you have any questions, please contact me at the Camden Office, (408) 927-0710, extension 2628.

Sincerely,

Mountain View, CA 94043

Mr. and Mrs. Estevan L. Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Tovar and Mr. and Mrs. Alva:

Subject: Active Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mounain View, CA

We have reviewed the Hydrogeologic Investigation Report dated March 18, 1993, and the Monthly Status Report dated April 27, 1993, prepared by Harding Lawson Associates. These reports were submitted in response to our late letters dated April 6, 1992, and March 5, 1993. The referenced reports were not formally submitted as requested in Comment No. 4 of our March 5, 1993, letter and the reports are considered late.

We hereby request that you submit a cover letter from the Responsible Party (RP) attesting to the legitimacy of the two referenced reports within 2 weeks of the date of this letter. Please note that if we do not receive the reports as requested, we may consider sending your case to the Regional Water Quality Control Board (RWQCB) or another enforcement agency, such as the District Attorney's Office for enforcement. Also, please address the following comments and submit the technical reports requested below.

TECHNICAL COMMENTS

1. It appears from information in the referenced report that several site-associated wells are not in compliance with the Santa Clara Valley Water District (District) Ordinance No. 90-1 concerning wells in Santa Clara County. The District's Wells Section has been notified for follow-up actions.

2. Please proceed with your recommendations for further work at the subject site. In accordance with your established schedule, please include the results (field and laboratory) of your activities in the next Quarterly Monitoring Report. Also, please include cross sections as discussed in Attachment 1.

3. As stated in the March 18, 1993, report, you do not plan to conduct aquifer pump tests until after the extent of floating product is evaluated. We understand that hydrogeologic conditions and the extent of groundwater contamination must be fully evaluated prior to conducting aquifer pump

tests, etc. However, free and dissolved product appear to be migrating off site. We request that you expedite the investigation process in order to completely evaluate site conditions and interim remedial measures. Please note that free product skimming alone is not considered to be an effective means of interim remediation. Although skimming aids in removing free product from the groundwater at the subject site, it does not control the migration of petroleum hydrocarbons in the groundwater.

4. Information in our files indicates that pea gravel was used to backfill the excavation during September 1988. Please provide us with information concerning the status of this pea gravel in the next Quarterly Monitoring Report requested below.

5. The March 18, 1993, report stated that documentation concerning the final disposition of stockpiled soil at the site does not exist. We request that you investigate and report any knowledge of the disposed soil (e.g., heresay) in the next Quarterly Monitoring Report requested below.

TECHNICAL REPORT REQUEST

We hereby request that you submit the following technical reports according to the schedule below:

- Transmittal Letter from RP—Within 2 weeks of the date of this letter
- Additional Investigation Report—June 30, 1993
- Next Quarterly Monitoring Report—June 30, 1993

These reports are being requested pursuant to the RWQCB's authority under California Water Code Section 13267.

TECHNICAL REPORTING REQUIREMENTS

The format and content of all technical reports submitted to the District are requested to be in accordance with those described in the District Guidelines. All technical reports shall contain a signatory statement attesting to the legitimacy of the report and be signed by an officer or legally authorized representative of Shell Oil Company, as stated in the District Guidelines (Appendix A, page 2).

All work and technical reports containing geologic or engineering evaluations and/or judgements must be performed under the direction of an appropriately registered or certified professional (Sections 6735, 7835, and 7835.1 of the Business and Professions Code). Technical reports must contain a statement of professional certification with the appropriate professional signatures and seals.

Please send copies of all correspondence and technical reports to the Santa Clara Valley Water District (Attention: Ms. Hollis Ude) and to the Regional Water Quality Control Board (Attention: Mr. John West).

AGENCY OVERSIGHT

If it appears as though significant delay is occurring or the reports are not submitted as requested, we will consider referring your case to the RWQCB or other appropriate agency including the County District

Attorney for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

Please note that further delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the State's Underground Storage Tank Cleanup Fund (SB2004) to reimburse you for the cost of cleanup.

If you have any questions, please contact me at the Camden Office, (408) 927-0710, extension 2628.

Sincerely,

ATTACHMENT 1

GEOLOGIC CROSS SECTIONS

In general, presentation of data using geologic cross section diagrams requires that the scale is not to exceed a ratio of 10 feet vertical to 1 foot horizontal, and a box reference scale must appear on the diagram. The wellhead elevations and subsurface lithology must appear as Mean Sea Level (MSL) on the vertical scale, as a survey referenced to a United States Geological Survey datum; presentation of depth below ground surface data in addition to MSL data is encouraged. The ground surface depicted on the diagram must show actual topography. The location of the former underground tanks must appear on the diagrams. All appropriate boring log data must be presented on each diagram, including soil borings, pilot borings, and tank pit excavation. The well construction details and water levels must appear on the diagrams. The orientation of the diagrams must be perpendicular and parallel to the groundwater flow direction, and the diagrams must intersect at a borehole. A description of the units and symbols which appear on the diagrams must be included. Chemical concentrations in soil samples at depth must be identified and appear on the diagrams. Potential pollutant pathways must be identified. More than one set of cross sections may be used to depict the necessary information.

MONTHLY PROGRESS REPORTS

Prior to and until submission of the final Migration Control Report, please submit brief progress reports each month which address the following:

- Site map showing locations of recovery wells
- Progress in obtaining necessary NPDES, POTW, BAAQMD, Fire Department, Building, or other permits
- Problems with system operation, if problems occur
- Work planned for the upcoming month

QUARTERLY REPORTS

The quarterly reports shall be submitted every 3 months and shall contain the following items:

1. A description of activities conducted during the previous quarter.

2. A schedule of activities for the following quarter.

3. A summary table which contains the following information, as applicable, for the previous quarter only:

    - Number of monitoring wells installed
    - Number and type of extraction wells installed (i.e., soil venting or groundwater)
    - Pounds of soil removed
    - Pounds of pollutants removed
    - Gallons of groundwater extracted
    - Gallons of free product recovered
    - Gallons of groundwater reused and its use

4. The results of monitoring well gauging and sample analysis. A minimum of monthly gauging and quarterly sampling of groundwater from all site wells is required. Groundwater gradient, dissolved product plume, and, if applicable, free-floating product plume maps are required in each report. **Please include a discussion of whether the vertical and lateral extent of contamination was completely defined during the quarter.** If the vertical and lateral extent of contamination is not defined, **please discuss where further investigation needs to be conducted and when this investigation will occur.**

5. The analytical results of hydrocarbon concentrations in soil and groundwater samples collected during the quarter in addition to those specified in item 4.

6. If applicable, the volume of air removed, and estimates of the rate of removal of Volatile Organic Compounds and of soil cleanup.

7. Copies of field data sheets, laboratory analytical reports, and Chain of Custody forms.

8. A description of quarterly sampling procedures and sample preservation procedures.

Attachment 3

March 5, 1993

Mr. Charles Tovar
El Camino Paving
924 San Raphael Avenue
Mountain View, CA 94043

Mr. and Mrs. Estevan L. Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Tovar and Mr. and Mrs. Alva:

Subject: Active Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mountain View, California

This responds to the work plan dated December 1, 1992 prepared by Harding Lawson Associates (HLA) and presents our comments concerning activities at the subject site. We are concerned that unnecessary delay of investigative and remedial activities are occurring at this site, and we are considering sending your case to the Regional Water Quality Control Board (Regional Board) or another agency, such as the District Attorney's Office, for enforcement. It is your responsibility to investigate and remediate both soil and groundwater contamination at the subject site since it has impacted the quality of groundwater utilized by the people of Santa Clara Valley.

Santa Clara Valley Water District (District) staff activated your case into the Underground Storage Tank program in March of 1991. You have not implemented investigative and remedial activities required by the District since April of 1991. We have received some Monthly Status Reports and Quarterly Monitoring Reports as originally requested in our April 16, 1991 letter. However, these reports alone provide an insufficient amount of information to properly characterize and remediate the site.

We have cooperated with you and have adjusted reporting schedules until April 6, 1992 when we sent you a late letter. Since our late letter, we have received several letters from the office of Holtzmann, Wise, and Shepard (HWS) informing us that work will be progressing at the site and the work plan dated December 1, 1992. We believe that although the proposed work outlined in your work plan is appropriate, the implementation of investigative and remedial activities at the subject site in a timely manner and the reporting of the results of such activities is your responsibility.

Please submit by March 31, 1993, a technical report documenting the results of your investigation. The technical report should also include recommendations for additional investigation and interim remediation. Please refer to our comments below regarding the referenced work plan.

TECHNICAL COMMENTS

1. Since additional wells are being installed for purposes of defining soil and groundwater contamination at the subject site, we request that soil samples be collected every 5 feet, at significant changes in lithology, and at areas of obvious contamination in accordance with District

Guidelines. All soil samples should then be submitted to a laboratory for the appropriate analyses. Please submit all field and laboratory data which document the results of your soil and groundwater investigation.

2. As stated in our April 16, 1991 letter, please implement a quarterly groundwater monitoring program which consists of a minimum of monthly well gauging and quarterly groundwater sampling and analysis. This information helps establish a hydrogeologic history of the site and helps us understand how fluctuations in groundwater elevations influence petroleum hydrocarbon concentrations in the groundwater. Please submit Quarterly Monitoring Reports as requested below.

3. HLA stated in the referenced work plan that HWS stated that the Discharge Application Report, the Migration Control Report, the Remedial Investigation Report, and the Quarterly Monitoring Reports were submitted in May and June of 1991. As stated in the first few paragraphs of this letter, we have received some Monthly Status Reports, Quarterly Monitoring Reports, and letters, but not complete reports that meet the requirements of a Discharge Application Report, a Migration Control Report, or a Remedial Investigation Report.

   We anticipate that the implementation of the referenced work plan will assist you in meeting the requirements of the above-mentioned reports. Please include recommendations for future work in the Implementation Report requested below. Your recommendations should address how your proposed work will contribute to the information required in our Discharge Application Reports, Monthly Migration Control Status Reports, Migration Control Reports, Remedial Investigation Reports, and Quarterly Monitoring Reports.

4. Per Appendix A of the District Guidelines, all proposals and reports submitted must be accompanied by a cover letter from the responsible party attesting to the legitimacy of the report. The letter must be signed by an officer or legally authorized representative of your company. The referenced work plan did not have the appropriate letter attached to it.

TECHNICAL REPORT REQUEST

We hereby request that you submit the following technical reports according to the schedule below:

- Additional Investigation Report—March 31, 1993
- Quarterly Monitoring Reports—March 31, 1993, June 30, 1993, September 30, 1993, and December 30, 1993

These reports are being requested pursuant to the California Water Code, Section 13267.

TECHNICAL REPORTING REQUIREMENTS

Please refer to the District Guidelines for information regarding report preparation and soil/groundwater sampling and to the "Standards for the Construction and Destruction of Wells and Other Deep Excavations in Santa Clara County" for information regarding well construction procedures.

All proposals and reports which contain engineering or geological information, interpretations, or other opinions as specified by the Business and Professions Code (Sections 6735, 7835, 7835.1), must be

signed and stamped by an appropriately registered professional who is in responsible charge for the work being performed.

Please note that all data and information generated during and relating to the investigation of the reported release(s) of petroleum hydrocarbons must be provided to the District, Regional Board, and the local agency (i.e., local fire department or County Health Department) referenced in our letters.

All technical reports shall be accompanied by a letter signed by an officer or legally authorized representative of the responsible party which contains a statement attesting to the legitimacy of the report, as described in the District Guidelines (Appendix A, page 2).

AGENCY OVERSIGHT

If the reports are not submitted by the requested due date, we will consider referring your case to the Regional Board or other appropriate agency including the County District Attorney for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

Please note that further delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the State's Underground Storage Tank Cleanup fund (SB2004) to reimburse you for the cost of cleanup.

If you have any question, please call Ms. Hollis Ude at the Camden Office, (408) 927-0710, extension 2628.

Sincerely,

Dear Mr. Tovar and Marie and Estevan Alva:

Subject: Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mountain View, CA

The Notification Letter of System Start-up and Schedule for Quarterly System Progress Reporting, requested in the District letters dated December 4, 1991 and February 5, 1992, have not been received by the due date of March 6, 1992. They are currently approximately one month late.

District staff request that interim remediation be implemented at the subject site without delay and that the Notification Letter of System Start-up and Schedule for Quarterly System Progress Reporting be submitted by **May 15, 1992.**

These requests are being made pursuant to the Regional Water Quality Control Board's (Regional Board) authority under the California Water Code, Section 13267.

If the notification letter and schedule are not submitted by the requested due date, District staff may refer your case to the Regional Board for enforcement actions which may include administrative actions or monetary penalties. The Regional Board may impose a penalty of up to $1,000 for each day a report is late or not acceptable.

If you have any questions, please call Hollis Ude at (408) 927-0710.

Sincerely,

Marie S. and Estevan L. Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Tovar and Mr. and Mrs. Alva:

Subject: Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mountain View, CA

Santa Clara Valley Water District (District) staff have reviewed the "Work Plan for a Groundwater Investigation" submitted under the cover letter dated December 30, 1991, the "Quarterly Groundwater Monitoring Report Fourth Quarter, 1991" dated January 24, 1992 and the "Monthly Status Reports" dated December 13, 1991 and January 16, 1992 all prepared by Aqua Terra Technologies and submitted by El Camino Paving. Please address the following comments in the technical reports requested below.

Technical Comments

1. District staff request that El Camino Paving proceed with the referenced work plan. Please note that all work should be performed in compliance with District Guidelines, State and District Well Standards, and according to standard practice. Please submit all field and laboratory results documenting the implementation of the proposed work plan in the Implementation Report requested below.

2. District staff request that El Camino Paving proceed with start up of the groundwater extraction and treatment system at the subject site. Please submit a Notification Letter of System Start Up according to the schedule below. Also, please provide a schedule for Quarterly System Progress Reporting.

   The Quarterly System Progress Reports should include an evaluation of the system effectiveness with respect to its two objectives—free and dissolved product removal and migration control, and should include any field and laboratory results which support this evaluation. The first Quarterly System Progress Report is due four weeks after system start up.

3. Please continue to submit Monthly Status Reports documenting your efforts to implement interim remedial measures at the subject site. Please submit the next Monthly Status Report according to the schedule below.

4. Please continue with the current quarterly groundwater monitoring program which consists of a minimum of monthly well gauging and quarterly groundwater sampling and analysis of all site associated wells. Please include a minimum of 3 groundwater gradient maps (one for each month of gauging), and free and dissolved product plume maps depicting the extent of impacted groundwater. Also, please include recommendations and a schedule of activities for the coming quarter. District staff request that the next Quarterly Monitoring Report be submitted according to the schedule below.

Technical Report Request

Pursuant to the Regional Water Quality Control Board's (Regional Board) authority under California Water Code Section 13267, District staff request that El Camino Paving submit the following reports according to the schedule below:

Monthly Status Report--February 28, 1992 and the last day of every month thereafter

Notification Letter of System Start Up and Schedule for Quarterly System Progress Reporting--within 30 days of the date of this letter

Implementation Report--April 30, 1992

Next Quarterly Monitoring Report--April 30, 1992

The Implementation Report and the next Quarterly Monitoring Report may be submitted as one report.

The format and content of all technical reports submitted to the District are requested to be in accordance with those described in the District Guidelines. All technical reports shall contain a signatory statement attesting to the legitimacy of the report, and be signed by an officer or legally authorized representative of El Camino Paving, as stated in the District Guidelines (Appendix A, page 2).

All work and technical reports containing geologic or engineering evaluations and/or judgements must be performed under the direction of an appropriately registered or certified professional (Sections 6735, 7835, and 7835.1 of the Business and Professions Code). Technical reports must contain a statement of professional certification with the appropriate professional signatures and seals.

Please submit copies of the reports to the Santa Clara Valley Water District (Attention: Mr. David Drury), the Regional Water Quality Control Board (Attention: Santa Clara Valley Local Program Coordinator), and to the Mountain View Fire Department (Attention: Mr. Gary Leinweber).

If you have any questions, please contact Hollis Ude at (408) 927-0710, extension 628.

Sincerely,

Dear Ms. Ude:

I have been designated as the Responding Party representative by our client, El Camino Paving, Inc. (ECP) for purposes of executing cover letters attesting to the legitimacy of reports prepared by ECP's consultant on this site, Harding Lawson Associates (HLA). This designation is pursuant to ECP's letter to you dated June 7, 1993. As such, I hereby declare under penalty of perjury that the information and/or recommendations contained in the attached Work Plan is true and correct.

Please contact me if you should have any questions regarding the enclosed.

Sincerely,

Edward L. Quevedo

Dear Mr. Quevedo:

Subject: Fuel Leak Investigation at El Camino Paving, 924 San Rafael Avenue, Mountain View, CA

This letter confirms your February 18, 1994 letter inquiring about funding sources for the remediation/investigation of the subject site.

- On February 23, 1994, my supervisor, Ms. Hollis Ude, sent you via facsimile, a fact sheet describing the California Loan for Environmental Assistance Now Program. This fact sheet was sent to assist you in exploring potential funding sources.

- During a February 25, 1994 phone conversation, I informed you that the Santa Clara Valley Water District should be informed of any lending institutions that have turned you down with respect to funding your site's investigation/cleanup.

- Also, during our February 25, 1994 phone discussion, we recommended that you explore general business insurance for possible coverage during leakage. However, apparently you have already applied and received "insufficient" funding from this source.

As discussed during our February 17, 1994 phone conference, we will be referring your case to the Regional Water Quality Control Board for appropriate follow up. As per our February 17, 1994 phone conference, we delayed finalizing this referral letter one week in order to incorporate any timeline/work proposal(s) you may have in response to the site issues discussed during our February 17, 1994 phone conference. We did not receive a timeline/work proposal. Therefore, we will be unable to incorporate your proposals into our referral letter.

If you have any questions, please call me at the Camden Office at (408) 927-0710, extension 2645.

Sincerely,

Re: 924 San Rafael Avenue Site (Mountain View)

Dear Ms. Allen:

I am writing to thank you and your staff for participating in the teleconference regarding the above-referenced matter on February 17, 1994. The discussion was illuminating and I believe advanced the understanding of all parties respecting the status of this matter.

You referred during our conversation to a "number of sources from which the Responding Party can seek funding." We have researched and reviewed possible funding sources for the financial strapped Responding Party on this matter and have not identified sources other than the State Water Resources Control Board Underground Storage Tank Fund.

If you have any information regarding other sources, including perhaps loans or grants available from the Santa Clara Valley Water District or other public agencies, please let me know immediately. I appreciate your attention to this matter.

Sincerely,

Edward L. Quevedo

Re: 924 San Rafael Avenue Site

Dear Ms. Ude:

This will confirm our conversation of December 7, 1993, during which we discussed further work to be completed at the above-referenced site. You indicated that although most BETEX constituents are below MCLs, the District's "taste and odor" threshold for TPH (500 PPB) is exceeded by certain cross-radiant well readings.

I informed you that we would be preparing a work plan schedule for 1994 which would address the District's request for additional investigation and/or interim remedial measures at the site.

If you have any further questions about this matter, please do not hesitate to contact me.

Sincerely,

Edward L. Quevedo/HAU

Re: El Camino Paving

Dear Hollis:

I am writing to seek your response to my correspondence dated November 4, 1993, detailing the issues pending at the 924 San Rafael Avenue site.

As we are approaching the end of the year, and the necessity now arises for completing next year's Workplan, I would like to propose a meeting to discuss any pending issues, and the matters which should be addressed in the Workplan. In the alternative, a telephone conference might suffice.

Please contact me at your earliest convenience regarding this matter. I look forward to speaking with you.

Sincerely,

Edward L. Quevedo

Re: 924 San Rafael Ave., Mountain View

Dear Ms. Ude:

This letter follows mine of September 24, 1993, and further responds to your letter of September 8, 1993. I also take account here of our telephone conversation of November 2, 1993. As you know, this firm represents the responding party at this site, El Camino Paving, Inc. (ECP).

I note that in its letter of May 14, 1993, the District requested submission of an additional investigation report. However, in the Harding Lawson Associates (HLA) report dated May 26, 1993 (the May monthly status report, hereinafter referred to as the May Report), HLA carefully detailed current conditions and analytical results at the site and recommended against the significant additional expense of further investigation pending the results of additional sampling events. In addition, in the 1993 Second Quarter Monitoring Report dated June 24, 1993 (the June 24 Report), HLA reiterated this point. In Section 6 of the June 24 Report, HLA recommended against additional investigation expenditures in light of the continuing decline in petroleum hydrocarbon concentrations.

Thus, the additional investigation has not been performed based on the recommendations in the May Report and the June 24 Report. The analytical results referred to in these and the other regular reports submitted to the District are for total petroleum hydrocarbons as diesel (TPH-d), not gasoline. The analytical results of all of the sampling events, while not in all cases below reportable detection limits, are relatively low. For example, the July 1993 concentrations of 0.83 micrograms per liter (ug/l) benzene, 2.7 ug/l ethyl benzene, and 1.6 ug/l xylenes, are below their respective California Maximum Contaminant Levels (MCLs) of 1,680, and 1750 ug/l.

Accordingly, the May Report and June 24 Report recommended against new wells and aquifer tests. The District was timely informed by ECP of the basis for its reply to the request for additional investigation. Your letter of September 8, 1993, was sent more than three months after the May Report in which HLA first explained this reply.

The responding party has taken a proactive approach in that each new set of data is evaluated with respect to the overall investigation. One result of this approach, which we believe is justified given the relative significance of the site, is the changes recommended in the May Report and elaborated in the June 24 Report. The responding party is, of course, through its representatives, willing to further discuss this issue.

We continue to be concerned, however, that the District does not appear to fully evaluate all information submitted by the responding party on a monthly basis. A careful reading of the monthly and quarterly reports clearly indicates that there is no floating material of any sort detected or present in any of the wells. Therefore, there is no material to sample and characterize.

As noted in the analytical summary tables of all of the responding party's monthly reports, the "unknown" substances are in the chromatographic ranges of either gasoline or diesel, depending upon the sample analysis, but do not correspond precisely to "fresh" gasoline or diesel. As you are no doubt aware, this chemical signature commonly occurs when the hydrocarbon has undergone degradation in the environment due to bacterial activity or other degradation mechanisms. It does not mean that the substances are "unknown" and certainly does not mandate further immediate evaluation.

Chlorinated solvents are not known to have been used at this site. No on-site sources are known. The relatively low levels of solvents which have been detected in the site's most upgradient well therefore suggests that the source (if any) is upgradient of this site and therefore not the responsibility of ECP.

As you also know, all monthly and quarterly reports, including the most recent round of reports, have been sent to the District on schedule. Additionally, we object to the reference in your September 8, 1993, letter regarding the California Underground Storage Tank Cleanup Fund. This reference unfairly jeopardizes ECP's ability to be compensated for their efforts solely due to what appears to be difficulties

or limitations in communication. The diligence exhibited and substantial costs incurred by ECP surely merit better treatment by the District.

Sincerely,

Edward L. Quevedo

San Jose, CA 95118-3686

Re: 924 San Rafael Ave., Mountain View

Dear Ms. Ude:

This letter responds to yours of September 8, 1993. Unfortunately, your letter makes clear that substantial misunderstandings exist between the good faith and timely actions of the responsible party and the expectations of the District.

In the first instance, as you know from prior correspondence, confirmed by El Camino Paving, I am the designated representative for communications from and to the property owners regarding this site. I therefore fail to understand why you did not at least provide me with a copy of your letter. In the future, please either address such communications to me or copy me. In addition, please copy Mr. Michael Burns of Harding Lawson Associates (HLA), the environmental consulting firm on this matter, with correspondence as well.

As to the substance of your letter, it ignores the recommendations contained in previous timely submitted reports prepared by HLA and forwarded by this office. All reports and investigation data have been submitted in timely fashion since this office was designated as the responsible party representative. We object to the statements in your letter which claim to the contrary.

Furthermore, contrary to other statements in your letter, all relevant investigation data has been submitted in prior timely filed reports. Specifically, the extent of groundwater contamination at the site has been extensively studied and regularly reported on. With respect to other detected substances in the groundwater, you have been informed

that in our view such substances are not the responsibility of the responsible party.

As you know, the designated responsible party on this site is a small business that has responded diligently and conscientiously to District requirements. This has been accomplished at significant expense to the responding party. We therefore believe that a reasonable approach to collecting and interpreting data at the site must be agreed upon which does not place an undue extent of responsiblity for a large regional condition upon this small business operator.

In order to begin the process of developing this reasonable approach, I will provide you with a detailed analysis of our disagreement with your technical comments on September 27, 1993. Because all relevant technical data has been provided in timely submissions to the District, no additional quarterly report will be forthcoming on September 30, 1993.

However, we maintain the expectation that a productive dialogue, which we earnestly hope will culminate in a reasonable agreed-upon plan for the site consistent with the workplan that the repsonsible party has been diligently performing, can be achieved. Therefore, if we should jointly determine that additional data, beyond that which the responsible party has already agreed to and has provided, should be called for, it will be included in the regularly scheduled October quarterly report.

Sincerely,

Edward L. Quevedo

Mountain View, CA 94043

Mr. and Mrs. Estevan L. Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Tovar and Mr. and Mrs. Alva:

Subject: Active Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mountain View, CA

We have reviewed the Quarterly Monitoring Report dated June 29, 1993, and the Monthly Status Reports dated May 28, 1993, July 29, 1993, and August 27, 1993, concerning the subject site. Please address the following comments and submit the technical reports requested below.

TECHNICAL COMMENTS

1. Additional investigation was not performed as recommended in your March 18, 1993, report and the Additional Investigation Report was not submitted by June 30, 1993, as requested in the Santa Clara Valley Water District (District) letter dated May 14, 1993. Furthermore, your Monthly Status Report dated May 26, 1993, stated that additional well installations are not recommended at this time.

   The extent of groundwater contamination must be defined at the subject site. During the April sampling event, laboratory results for groundwater from monitoring wells MW-7 and MW-2 reported 7,100 parts per billion (ppb) and 1,700 ppb Total Petroleum Hydrocarbons as Gasoline (TPHG), respectively.

   Please note that the Additional Investigation Report requested in our May 14, 1993, letter is considered late. Please submit this report and a proposed schedule for the next phases of work you plan to complete at the above site by the due date below.

   If the report is not submitted by the requested due date, we will consider referring your case to the Regional Water Quality Control Board (Regional Board) or other appropriate agency, including the County District Attorney, for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

2. Your Monthly Status Report dated May 26, 1993, states that the floating product previously observed in wells MW-1, MW-2, MW-3, MW-4B, and MW-4C was not floating product; it was iron-stained organic material that accumulated in the inactive wells. We request that you collect a sample of the material from these wells and have it properly characterized by a laboratory. Please submit the results (field and laboratory) of your investigation in the next Quarterly Monitoring Report requested below.

3. In your August 27, 1993, Quarterly Monitoring Report, laboratory results reported detectable concentrations of an unknown substance. Please evaluate field and laboratory data and determine what this substance is and what its source is. We request that you include your evaluation in the next Quarterly Monitoring Report requested below. Also, please include all supporting documents such as laboratory methodology, chromatograms, and field notes, etc.

4. During the sampling events this year, solvents were detected in the groundwater. We request that you investigate potential sources for these chemicals and include your evaluation in the next Quarterly Monitoring Report requested below.

5. Please continue with your quarterly monitoring program which consists of a minimum of monthly well gauging and quarterly groundwater sampling and analyses. Please submit all field and laboratory results which document your activities in the next Quarterly Monitoring Report requested below.

6. Please note that Monthly Status Reports should only be one or two pages in length and should briefly describe activities at the site. Quarterly monitoring results and supporting documentation should be included in the Quarterly Monitoring Reports.

TECHNICAL REPORT REQUEST

We hereby request that you submit the following technical reports according to the schedule below:

- September 30, 1993—Next Quarterly Monitoring Report
- September 30, 1993—Additional Investigation Report

These reports are being requested pursuant to the Regional Board's authority under Section 13267 of the California Water Code.

TECHNICAL REPORTING REQUIREMENTS

Please refer to the District's "Investigation and Remediation at Fuel Leak Sites," revised October 1990 (District Guidelines), for information regarding report preparation and soil/groundwater sampling and to the "Standards for the Construction and Destruction of Wells and Other Deep Excavations in Santa Clara County" for information regarding well construction procedures.

All proposals and reports which contain engineering or geological information, interpretations, or other opinions as specified by the Business and Professions Code (Sections 6735, 7835, and 7835.1) must be signed and stamped by an appropriately registered professional who is in responsible charge of the work being performed.

Please note that all data and information generated during and relating to the investigation of the reported release(s) of petroleum hydrocarbons must be provided to the District, Regional Board, and the local agency (i.e., local fire department or County Health Department) referenced in our letters.

All technical reports shall be accompanied by a letter signed by an officer or legally authorized representative of the responsible party which contains a statement attesting to the legitimacy of the report, as described in the District Guidelines (Appendix A, page 2).

AGENCY OVERSIGHT

If the report is not submitted by the requested due date, we will consider referring your case to the Regional Board or other appropriate agency, including the County District Attorney, for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

Please note that further delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the State's Underground Storage Tank Cleanup Fund (SB2004) to reimburse you for the cost of cleanup.

If you have any questions, please contact me at the Camden Office, (408) 927-0710, extension 2628.

Sincerely,

Dear Ms. Ude

This will confirm that we have designated our attorney of record in this matter, Mr. Edward L. Quevedo, as our Responsible Party (RP) designee for the purpose of executing letters of authenticity confirming reports and other documents prepared and submitted by our consultant, Harding Lawson Associates. Mr. Quevedo will be executing these documents hereafter, until further notice. Please direct any questions you have regarding this issue to Mr. Quevedo.

Thank you very much for your anticipated cooperation regarding this matter.

Sincerely,

EL CAMINO PAVING, INC.

Mr. and Mrs. Estevan L. Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Tovar and Mr. and Mrs. Alva:

Subject: Active Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mounain View, CA

We have reviewed the Hydrogeologic Investigation Report dated March 18, 1993, and the Monthly Status Report dated April 27, 1993, prepared by Harding Lawson Associates. These reports were submitted in response to our late letters dated April 6, 1992, and March 5, 1993. The referenced reports were not formally submitted as requested in Comment No. 4 of our March 5, 1993, letter and the reports are considered late.

We hereby request that you submit a cover letter from the Responsible Party (RP) attesting to the legitimacy of the two referenced reports within 2 weeks of the date of this letter. Please note that if we do not receive the reports as requested, we may consider sending your case to the Regional Water Quality Control Board (RWQCB) or another enforcement agency, such as the District Attorney's Office for enforcement. Also, please address the following comments and submit the technical reports requested below.

TECHNICAL COMMENTS

1. It appears from information in the referenced report that several site-associated wells are not in compliance with the Santa Clara Valley Water District (District) Ordinance No. 90-1 concerning wells in Santa Clara County. The District's Wells Section has been notified for follow-up actions.

2. Please proceed with your recommendations for further work at the subject site. In accordance with your established schedule, please include the results (field and laboratory) of your activities in the next Quarterly Monitoring Report. Also, please include cross sections as discussed in Attachment 1.

3. As stated in the March 18, 1993, report, you do not plan to conduct aquifer pump tests until after the extent of floating product is evaluated. We understand that hydrogeologic conditions and the extent of groundwater contamination must be fully evaluated prior to conducting aquifer pump

tests, etc. However, free and dissolved product appear to be migrating off site. We request that you expedite the investigation process in order to completely evaluate site conditions and interim remedial measures. Please note that free product skimming alone is not considered to be an effective means of interim remediation. Although skimming aids in removing free product from the groundwater at the subject site, it does not control the migration of petroleum hydrocarbons in the groundwater.

4. Information in our files indicates that pea gravel was used to backfill the excavation during September 1988. Please provide us with information concerning the status of this pea gravel in the next Quarterly Monitoring Report requested below.

5. The March 18, 1993, report stated that documentation concerning the final disposition of stockpiled soil at the site does not exist. We request that you investigate and report any knowledge of the disposed soil (e.g., heresay) in the next Quarterly Monitoring Report requested below.

TECHNICAL REPORT REQUEST

We hereby request that you submit the following technical reports according to the schedule below:

- Transmittal Letter from RP—Within 2 weeks of the date of this letter
- Additional Investigation Report—June 30, 1993
- Next Quarterly Monitoring Report—June 30, 1993

These reports are being requested pursuant to the RWQCB's authority under California Water Code Section 13267.

TECHNICAL REPORTING REQUIREMENTS

The format and content of all technical reports submitted to the District are requested to be in accordance with those described in the District Guidelines. All technical reports shall contain a signatory statement attesting to the legitimacy of the report and be signed by an officer or legally authorized representative of Shell Oil Company, as stated in the District Guidelines (Appendix A, page 2).

All work and technical reports containing geologic or engineering evaluations and/or judgements must be performed under the direction of an appropriately registered or certified professional (Sections 6735, 7835, and 7835.1 of the Business and Professions Code). Technical reports must contain a statement of professional certification with the appropriate professional signatures and seals.

Please send copies of all correspondence and technical reports to the Santa Clara Valley Water District (Attention: Ms. Hollis Ude) and to the Regional Water Quality Control Board (Attention: Mr. John West).

AGENCY OVERSIGHT

If it appears as though significant delay is occurring or the reports are not submitted as requested, we will consider referring your case to the RWQCB or other appropriate agency including the County District

Attorney for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

Please note that further delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the State's Underground Storage Tank Cleanup Fund (SB2004) to reimburse you for the cost of cleanup.

If you have any questions, please contact me at the Camden Office, (408) 927-0710, extension 2628.

Sincerely,

ATTACHMENT 1

GEOLOGIC CROSS SECTIONS

In general, presentation of data using geologic cross section diagrams requires that the scale is not to exceed a ratio of 10 feet vertical to 1 foot horizontal, and a box reference scale must appear on the diagram. The wellhead elevations and subsurface lithology must appear as Mean Sea Level (MSL) on the vertical scale, as a survey referenced to a United States Geological Survey datum; presentation of depth below ground surface data in addition to MSL data is encouraged. The ground surface depicted on the diagram must show actual topography. The location of the former underground tanks must appear on the diagrams. All appropriate boring log data must be presented on each diagram, including soil borings, pilot borings, and tank pit excavation. The well construction details and water levels must appear on the diagrams. The orientation of the diagrams must be perpendicular and parallel to the groundwater flow direction, and the diagrams must intersect at a borehole. A description of the units and symbols which appear on the diagrams must be included. Chemical concentrations in soil samples at depth must be identified and appear on the diagrams. Potential pollutant pathways must be identified. More than one set of cross sections may be used to depict the necessary information.

MONTHLY PROGRESS REPORTS

Prior to and until submission of the final Migration Control Report, please submit brief progress reports each month which address the following:

- Site map showing locations of recovery wells
- Progress in obtaining necessary NPDES, POTW, BAAQMD, Fire Department, Building, or other permits
- Problems with system operation, if problems occur
- Work planned for the upcoming month

QUARTERLY REPORTS

The quarterly reports shall be submitted every 3 months and shall contain the following items:

1. A description of activities conducted during the previous quarter.

2. A schedule of activities for the following quarter.

3. A summary table which contains the following information, as applicable, for the previous quarter only:

    - Number of monitoring wells installed
    - Number and type of extraction wells installed (i.e., soil venting or groundwater)
    - Pounds of soil removed
    - Pounds of pollutants removed
    - Gallons of groundwater extracted
    - Gallons of free product recovered
    - Gallons of groundwater reused and its use

4. The results of monitoring well gauging and sample analysis. A minimum of monthly gauging and quarterly sampling of groundwater from all site wells is required. Groundwater gradient, dissolved product plume, and, if applicable, free-floating product plume maps are required in each report. **Please include a discussion of whether the vertical and lateral extent of contamination was completely defined during the quarter.** If the vertical and lateral extent of contamination is not defined, **please discuss where further investigation needs to be conducted and when this investigation will occur.**

5. The analytical results of hydrocarbon concentrations in soil and groundwater samples collected during the quarter in addition to those specified in item 4.

6. If applicable, the volume of air removed, and estimates of the rate of removal of Volatile Organic Compounds and of soil cleanup.

7. Copies of field data sheets, laboratory analytical reports, and Chain of Custody forms.

8. A description of quarterly sampling procedures and sample preservation procedures.

MEMORANDUM

TO: Dave Zozaya DATE: 05/12/93

FROM: Hollis Ude

SUBJECT: Site Associated Wells at El Camino Paving, 924 San Raphael Avenue, Mountain View, CA – Active Fuel Leak Site

This memo informs you of several wells that appear to be in violation of SCVWD Ordinance No. 90-1 at the subject site. I have included a site map and a table from a report dated March 18, 1993 prepared by Harding Lawson Associates concerning the wells. In addition to the information provided in the attached table, I understand that well permits do not exist for wells MW-4A, MW-5, and MW-6. These wells were previously called P-1 through P-3. However, a direct correlation between these two sets of wells has not been established.

The Responsible Parties of the site will be notified of the potential well violation and the Wells' Section involvement. A copy of the letter will be forwarded to your attention.

If you have any questions, please call me at extension 2628.

Hollis A. Ude

4.0 FIELD INVESTIGATION RESULTS

4.1 Surface Conditions

During our investigation, HLA noted that the general activities of the business have resulted in the release of residual petroleum hydrocarbons to the paved surface of the yard. While minor spillage is to be expected from the nature of this business, the condition of some of the older well boxes is poor, with missing or loosely fitting caps and accumulations of grease on and near the well heads. The poor condition of the well heads has possibly caused the introduction of additional petroleum hydrocarbons to the subsurface. The following table summarizes the condition of the well heads on January 19, 1993, for the previously-installed wells:

Well Number	Diameter (inches)	Properly Capped	Comments
MW-1	15	yes	Greasy box and cap; box contained water with sheen
MW-2	15	no	Well pipe covered with 55-gallon drum lid; box contained water with sheen
MW-3	15	no	No cap
MW-4A	4	yes	Box full of water
MW-4B	15	no	Well pipe is covered with metal lid
MW-4C	6	no	No cap; pipe located in same box as Well 4A
MW-5	4	yes	None
MW-6	4	yes	None

Mr. Charles Tovar
El Camino Paving
924 San Raphael Avenue
Mountain View, CA 94043

Mr. and Mrs. Estevan L. Alva
581 Maple Avenue
Sunnyvale, CA 94086

Dear Mr. Tovar and Mr. and Mrs. Alva:

Subject: Active Fuel Leak Investigation at El Camino Paving, 924 San Raphael Avenue, Mountain View, California

This responds to the work plan dated December 1, 1992 prepared by Harding Lawson Associates (HLA) and presents our comments concerning activities at the subject site. We are concerned that unnecessary delay of investigative and remedial activities are occurring at this site, and we are considering sending your case to the Regional Water Quality Control Board (Regional Board) or another agency, such as the District Attorney's Office, for enforcement. It is your responsibility to investigate and remediate both soil and groundwater contamination at the subject site since it has impacted the quality of groundwater utilized by the people of Santa Clara Valley.

Santa Clara Valley Water District (District) staff activated your case into the Underground Storage Tank program in March of 1991. You have not implemented investigative and remedial activities required by the District since April of 1991. We have received some Monthly Status Reports and Quarterly Monitoring Reports as originally requested in our April 16, 1991 letter. However, these reports alone provide an insufficient amount of information to properly characterize and remediate the site.

We have cooperated with you and have adjusted reporting schedules until April 6, 1992 when we sent you a late letter. Since our late letter, we have received several letters from the office of Holtzmann, Wise, and Shepard (HWS) informing us that work will be progressing at the site and the work plan dated December 1, 1992. We believe that although the proposed work outlined in your work plan is appropriate, the implementation of investigative and remedial activities at the subject site in a timely manner and the reporting of the results of such activities is your responsibility.

Please submit by March 31, 1993, a technical report documenting the results of your investigation. The technical report should also include recommendations for additional investigation and interim remediation. Please refer to our comments below regarding the referenced work plan.

TECHNICAL COMMENTS

1. Since additional wells are being installed for purposes of defining soil and groundwater contamination at the subject site, we request that soil samples be collected every 5 feet, at significant changes in lithology, and at areas of obvious contamination in accordance with District

Guidelines. All soil samples should then be submitted to a laboratory for the appropriate analyses. Please submit all field and laboratory data which document the results of your soil and groundwater investigation.

2. As stated in our April 16, 1991 letter, please implement a quarterly groundwater monitoring program which consists of a minimum of monthly well gauging and quarterly groundwater sampling and analysis. This information helps establish a hydrogeologic history of the site and helps us understand how fluctuations in groundwater elevations influence petroleum hydrocarbon concentrations in the groundwater. Please submit Quarterly Monitoring Reports as requested below.

3. HLA stated in the referenced work plan that HWS stated that the Discharge Application Report, the Migration Control Report, the Remedial Investigation Report, and the Quarterly Monitoring Reports were submitted in May and June of 1991. As stated in the first few paragraphs of this letter, we have received some Monthly Status Reports, Quarterly Monitoring Reports, and letters, but not complete reports that meet the requirements of a Discharge Application Report, a Migration Control Report, or a Remedial Investigation Report.

   We anticipate that the implementation of the referenced work plan will assist you in meeting the requirements of the above-mentioned reports. Please include recommendations for future work in the Implementation Report requested below. Your recommendations should address how your proposed work will contribute to the information required in our Discharge Application Reports, Monthly Migration Control Status Reports, Migration Control Reports, Remedial Investigation Reports, and Quarterly Monitoring Reports.

4. Per Appendix A of the District Guidelines, all proposals and reports submitted must be accompanied by a cover letter from the responsible party attesting to the legitimacy of the report. The letter must be signed by an officer or legally authorized representative of your company. The referenced work plan did not have the appropriate letter attached to it.

TECHNICAL REPORT REQUEST

We hereby request that you submit the following technical reports according to the schedule below:

- Additional Investigation Report—March 31, 1993
- Quarterly Monitoring Reports—March 31, 1993, June 30, 1993, September 30, 1993, and December 30, 1993

These reports are being requested pursuant to the California Water Code, Section 13267.

TECHNICAL REPORTING REQUIREMENTS

Please refer to the District Guidelines for information regarding report preparation and soil/groundwater sampling and to the "Standards for the Construction and Destruction of Wells and Other Deep Excavations in Santa Clara County" for information regarding well construction procedures.

All proposals and reports which contain engineering or geological information, interpretations, or other opinions as specified by the Business and Professions Code (Sections 6735, 7835, 7835.1), must be

signed and stamped by an appropriately registered professional who is in responsible charge for the work being performed.

Please note that all data and information generated during and relating to the investigation of the reported release(s) of petroleum hydrocarbons must be provided to the District, Regional Board, and the local agency (i.e., local fire department or County Health Department) referenced in our letters.

All technical reports shall be accompanied by a letter signed by an officer or legally authorized representative of the responsible party which contains a statement attesting to the legitimacy of the report, as described in the District Guidelines (Appendix A, page 2).

AGENCY OVERSIGHT

If the reports are not submitted by the requested due date, we will consider referring your case to the Regional Board or other appropriate agency including the County District Attorney for possible enforcement follow up. Enforcement follow up may include administrative action or monetary penalties of up to $10,000 for each tank for each day of violation of the California Health and Safety Code, Division 20, Chapter 6.75.

Please note that further delays in investigation, late reports, or enforcement actions may result in your becoming ineligible to receive grant money from the State's Underground Storage Tank Cleanup fund (SB2004) to reimburse you for the cost of cleanup.

If you have any question, please call Ms. Hollis Ude at the Camden Office, (408) 927-0710, extension 2628.

Sincerely,

Dear Messrs. Gioia and Esteven, and Ms. Alva:

Subject: Fuel Leak Site Case Closure—El Camino Paving, 924 San Rafael Avenue, Mountain View, CA 94043; Case No. 07-045

This letter transmits the enclosed underground storage tank (UST) case closure letter in accordance with Chapter 6.75 (Article 4, Section 25299.37[h]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, the Santa Clara Valley Water District is required to use this case closure letter for all UST leak sites. We are also transmitting to you the enclosed case closure summary. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

SITE INVESTIGATION AND CLEANUP SUMMARY

Please be advised that the following conditions exist at the site:

- Residual petroleum hydrocarbons exist in soil and groundwater; however, the levels appear to be below regulatory concern.

If you have any questions, please call Ms. Michelle Martin at (408) 265-2607, extension 2768. Thank you.

Sincerely,

Dear Messrs. Gioia and Esteven, and Ms. Alva:

Subject: Fuel Leak Site Case Closure—El Camino Paving, 924 San Rafael Avenue, Mountain View, CA 94043; Case No. 07-045

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Responsible Staff Person: Michelle Martin	Title: Assistant Engineer

II. CASE INFORMATION

Site Facility Name: El Camino Paving		
Site Facility Address: 924 San Rafael Avenue, Mountain View, CA 94043		
RB LUSTIS Case No.: —	Local Case No.: 06S2W15101f	LOP Case No.: 07-045
URF Filing Date: 06/29/88	SWEEPS No.: —	APN: 153-17-045

Responsible Parties	Addresses	Phone Number
Mr. George Gioia El Camino Paving	924 San Rafael Avenue Mountain View, CA 94043	(650) 965-7283
Mr. Esteven and Ms. Maria Alva	581 Maple Avenue, Sunnyvale, CA 94086	(408) 245-7741

Tank I.D. No	Size in Gallons	Contents	Closed In Place/Removed?	Date
1	4,000	Gasoline	Removed	08/19/88
2	10,000	Diesel	Removed	10/18/88
3	4,000	Gasoline	Removed	10/18/88
Piping (unknown amount)			Removed	08/19/88

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Hole in piping.		
Site characterization complete? Yes	Date Approved By Oversight Agency: 01/20/01	
Monitoring wells installed? Yes	Number: 11	Proper screened interval? Yes
Highest GW Depth Below Ground Surface: 6.8'	Lowest Depth: 11.31'	Flow Direction: Northwest
Most Sensitive Current Use: Potential drinking water resource		
Summary of Production Wells in Vicinity: There are 30 wells within a ¼-mile radius of this site. Of the 30, 23 are abandoned (06S02W15F005, M001 to M006, M008, M010, M011, M013 to M017, M020, L003, L005, L008, L010 to L011, L017, and N003), 5 are active wells (06S02W15M006, M007, M009, M012, and N002), and 2 are cathodic protection (06S02W15M027 and M026). These wells are ~100 feet away from the fuel leak and due to the attenuation of the contaminant plume do not appear to be preferential pathways for contaminant migration.		
Are drinking water wells affected? No	Aquifer Name: Santa Clara Valley Water Basin	
Is surface water affected? No	Nearest SW Name: Stevens Creek, ±1,360 feet east	
Off-Site Beneficial Use Impacts (Addresses/Locations): None		
Reports on file? Yes	Where are reports filed? Santa Clara Valley Water District	

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL			
Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	Three steel	Disposal; Azonic Technology Inc.	08/19/88 to 10/18/88
Piping	Not reported	Disposal; Azonic Technology Inc.	08/19/88 to 10/18/88
Free Product	400 gallons	Disposal unknown	10/28/88
Soil	400 cubic yards	Disposal unknown	08/04/89

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Santa Clara Valley Water District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None		
Should corrective action be reviewed if land use changes? No		
Monitoring Wells Decommissioned: No	Number Decommissioned: 0	Number Retained: 11
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

V. ADDITIONAL COMMENTS, DATA, ETC.

Considerations and/or Variances:

1988- On June 29, an unauthorized release form was filed due to 400 gallons of fuel released from a hole in the piping system. In August, one 4,000-gallon gasoline underground storage tank (UST) was removed from the site and three monitoring wells (MW1 to MW3) were installed. The maximum level of contamination detected in soil beneath the tank at the time of removal was 49 ppm Total Petroleum Hydrocarbons as Gasoline (TPHG), 22,000 ppm Total Petroleum Hydrocarbons as Diesel (TPHD) 0.3 ppm Ethylbenzene, and 1.3 ppm Xylenes. Benzene and Toluene were not detected and there was no analysis of Methyl tert-Butyl Ether (MTBE).

In October, another Unauthorized Release Form was filed when free product (up to 400 gallons) was detected in the excavation. A recovery pump and tank were installed to remove the free product. The two additional USTs (one 10,000-gallon diesel and one 4,000-gallon gasoline) were removed from the site. Also, three additional monitoring wells (MW4 to MW6) were installed at the site. There is no evidence that soil or groundwater samples were retrieved for analysis during well installation.

1989- In May, 400 cubic yards of soil was overexcavated from the former tank pit. The final depth of the excavation was 14 feet below ground surface. The maximum level of contamination detected in soil after overexcavation was 470 ppm TPHD. There was no analysis of TPHG, Benzene, Toluene, Ethylbenzene, Xylenes, or MTBE. There is no evidence in the case file that groundwater was encountered in the tank pit; however, groundwater analysis performed later in December from the monitoring wells indicated that contamination was at 920,000 ppb TPHD.

1993- In January, four additional monitoring wells (MW4B and MW7 to MW9) were installed at the site. The maximum level of contamination detected in soil was 400 ppm TPHD, 37 ppm TPHG, 0.014 ppm Ethylbenzene, and 0.016 ppm Xylenes. Trichloroethene (TCE) was detected in soil at 0.045 ppm in MW9, an upgradient well. Per the responsible party, solvents have never been used at the site. An off-site source survey revealed that the U.S. Navy Housing Project, a Regional Water Quality Control Board (RWQCB) site, is located upgradient within a ¼ mile and may have contributed to the site's groundwater impact. There was no analysis for MTBE. The maximum level of contamination detected in groundwater was 380,000 ppb TPHD, 14,000 ppb TPHG, and all the other constituents were at nondetect.

1994- On June 16, five Cone Penetrometer Test soil borings were drilled on and off site. Grab groundwater samples indicated that TPHD was detected at 600 ppb. Halogenated Volatile Organic Compounds (VOCs) were detected up to 13 ppb TCE. A groundwater pump test was performed; it was concluded that this technology was feasible.

1995- In May, a groundwater extraction system was installed. Groundwater extraction was halted in June of 1996 and up to 1.3 million gallons of groundwater was extracted, remediated, and discharged into the sewer.

2000- In September, current groundwater monitoring indicates that contamination is at 330 ppb TPHD, 62 ppb TPHG, with VOCs up to 25 ppb (TCE).

Conclusions:

Based upon the results of overexcavation sampling and confirmation borings, groundwater extraction petroleum hydrocarbon contamination in soil and groundwater currently exists (400 ppm TPHD, 37 ppm TPHG, 0.014 ppm Ethylbenzene, and 0.016 ppm Xylenes) and (330 ppb TPHD, 62 ppb TPHG, and 25 ppb TCE), respectively. However, the extent of dissolved contamination appears to be localized in the area adjacent to the former tank pit and naturally attenuating.

Based upon the residual concentration of petroleum hydrocarbons in groundwater, Santa Clara Valley Water District staff has concluded that a continuing threat to groundwater, human health, and the environment from residual petroleum hydrocarbons does not exist at this site and that Regional Water Quality Control Board objectives have not been compromised. The investigation was performed in accordance with state and local guidelines. Santa Clara Valley Water District staff recommends closure for this case.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Michelle Martin	Title: Assistant Engineer
Signature:	Date: 3/6/01
Approved by: James S. Crowley, P.E.	Title: Engineering Unit Manager
Signature:	Date: 3/6/01

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

	TEH as Diesel	10000	22000000

BRL - Below reporting limit.
TVH - Total Volatile Hydrocarbons is determined by modified EPA 8015 with either headspace or purge and trap.
TEH - Total Extractable Hydrocarbons is determined by modified EPA 8015 with direct injection.
TOG - Total Oil & Grease is determined by Standard Method 503E.
BTEX- Benzene, Toluene, Ethylbenzene, and Total Xylenes are determined by modified EPA 8020.

All testing procedures follow CRWQCB Region 2 guidelines.

NOTES:

All concentrations in micrograms per liter (µg/l) or parts per billion (ppb)

1,1-DCE = 1,1-dichloroethene

cis-1,2-DCE = cis-1,2-dichloroethene

1,1-DCA = 1,1-dichloroethane

CHL = chloroform

1,1,1-TCA = 1,1,1-trichloroethane

TCE = trichloroethene

PCA = bromodichloromethane

1,1,2-TCA = 1,1,2-trichloroethane

PCE = tetrachloroethene

Freon = 1,2,2-trichloro 1,1,2-triflouroethane (Freon 113)

nd = not detected at analytical method reporting limit

nt = not tested

1. Did cooler come with a shipping slip (airbill, etc) _____ YES (NO)
   Shipping info _____

2A. Were custody seals present? .... ☐ YES (circle) on cooler on samples ☑ NO
   How many _____ Name _____ Date _____
2B. Were custody seals intact upon arrival? _____ YES NO N/A
3. Were custody papers dry and intact when received? _____ YES NO
4. Were custody papers filled out properly (ink, signed, etc)? _____ YES NO
5. Is the project identifiable from custody papers? (If so fill out top of form) ___ YES NO
6. Indicate the packing in cooler: (if other, describe) _____

☐ Bubble Wrap ☑ Foam blocks ☐ Bags ☐ None
☐ Cloth material ☐ Cardboard ☐ Styrofoam ☐ Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: ☑ Wet ☐ Blue/Gel ☐ None Temp(°C) 5.1°

☐ Temperature blank(s) included? ☐ Thermometer# _____ ☑ IR Gun# 4

☐ Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? _____ YES (NO)
   If YES, what time were they transferred to freezer? _____
9. Did all bottles arrive unbroken/unopened? _____ YES NO
10. Are there any missing / extra samples? _____ YES (NO)
11. Are samples in the appropriate containers for indicated tests? _____ YES NO
12. Are sample labels present, in good condition and complete? _____ YES NO
13. Do the sample labels agree with custody papers? _____ YES NO
14. Was sufficient amount of sample sent for tests requested? _____ YES NO
15. Are the samples appropriately preserved? _____ YES NO (N/A)
16. Did you check preservatives for all bottles for each sample? _____ YES NO N/A
17. Did you document your preservative check? (pH strip lot# _____) YES NO (N/A)
18. Did you change the hold time in LIMS for unpreserved VOAs? _____ YES NO (N/A)
19. Did you change the hold time in LIMS for preserved terracores? _____ YES NO (N/A)
20. Are bubbles > 6mm absent in VOA samples? _____ YES (NO) N/A
21. Was the client contacted concerning this sample delivery? _____ YES (NO)
   If YES, Who was called? _____ By _____ Date: _____

COMMENTS
(20) 1/3 VOAs received w/ bubbles for sample 9311.

CASE NARRATIVE

Laboratory number:	**288064**
Client:	**Geosyntec Consultants**
Project:	**WR2330102**
Location:	**Prometheus**
Request Date:	**04/14/17**
Samples Received:	**04/14/17**

This data package contains sample and QC results for three water samples, requested for the above referenced project on 04/14/17. The samples were received cold and intact.

Volatile Organics by GC/MS (EPA 8260B):

GW-3 (lab # 288064-003) had pH greater than 2. No other analytical problems were encountered.

Project Name: Prometheus-El Camino
Project #: WR2330/02
Workorder #: 1704246

Dear Ms. Sara Roy

The following report includes the data for the above referenced project for sample(s) received on 4/17/2017 at Air Toxics Ltd.

The data and associated QC analyzed by TO-15 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics Inc. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Rachel Selenis at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Rachel Selenis

Project Manager

LABORATORY NARRATIVE
EPA Method TO-15
GeoSyntec Consultants
Workorder# 1704246

Four 1 Liter Summa Canister samples were received on April 17, 2017. The laboratory performed analysis via EPA Method TO-15 using GC/MS in the full scan mode.

This workorder was independently validated prior to submittal using 'USEPA National Functional Guidelines' as generally applied to the analysis of volatile organic compounds in air. A rules-based, logic driven, independent validation engine was employed to assess completeness, evaluate pass/fail of relevant project quality control requirements and verification of all quantified amounts.

Receiving Notes

Despite the use of flow controllers for sample collection, the final canister vacuum for sample SG-2 was measured at ambient pressure at the laboratory.

Analytical Notes

Dilution was performed on samples SG-1, SG-2 and SG-3 due to the presence of high level target species.

Dilution was performed on sample SG-4 due to the presence of high level non-target species.

Definition of Data Qualifying Flags

Eight qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit, LOD, or MDL value. See data page for project specific U-flag definition.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

CORNERSTONE EARTH GROUP

Date:	July 30, 2025
Project No.:	118-175-2
Prepared For:	Ms. Kishann Rai **DAVID J. POWERS & ASSOCIATES** 1871 The Alameda, Suite 200 San Jose, California 95126
Re:	Environmental Review 924 and 940 San Rafael Avenue Mountain View, California

Dear Ms. Rai:

Per your request, Cornerstone Earth Group, Inc. (Cornerstone) is pleased to present this letter summarizing our review of the provided environmental report for 924 and 940 San Rafael Avenue in Mountain View, California (Site). This letter was prepared for David J. Powers & Associates in accordance with our June 19, 2025 agreement.

Project Background

We understand that David J. Powers is providing California Environmental Quality Act (CEQA) support services for a proposed development at the Site, which consists of Assessor Parcel Numbers (APNs) 153-17-044 and 153-17-045. The project includes a General Plan Map Amendment from General Industrial to Medium Density Residential, a Zoning Map Amendment from MM (General Industrial) district to R3-2.2 (Residential Multiple-Family) district, a Development Review and Planned Unit Development Permit to allow 37-unit rowhouse development, replacing two existing commercial structures on the 1.8-acre Site.

Documents Reviewed

This letter briefly summarizes selected information obtained from the following provided report:

- Geosyntec Consultants. May 8, 2017. *Phase I and Limited Phase II Environmental Site Assessment, 918, 924 & 940 San Rafael Avenue, Mountain View, California.*

For complete details, please refer directly to the original report.

Reported Site History

Based on the information reviewed, the Site was historically used for agricultural purposes. Historical aerial photographs depict what appears to have been a residence on the southern portion of the Site by 1939. An apparent additional residence and several outbuildings were added on the northern portion of the Site during the 1940s. The southernmost structures were replaced by the current commercial buildings by 1982. The structures on the northern portion of the Site were removed during the 1990s and replaced by the existing paved parking lot.

The 924 San Rafael Avenue parcel reportedly was occupied by Hackett Construction Company during the 1980s. The 940 San Rafael Avenue was used as a commercial landscaping yard (Baumgratz Landscaping Inc) during the early 1990s. Between 1986 and 1991, the Site parcels were acquired by El Camino Paving and used to support paving company operations until 2015. Stored equipment associated with El Camino Paving remained on-Site at the time of the prior report (Geosyntec, 2017).

Recognized Environmental Conditions

Geosyntec (2017) identified the following two Recognized Environmental Conditions[1] associated with the Site:

- Hazardous materials and petroleum products related to El Camino Paving operations were noted to still be on-Site (as of 2017) in a storage shed. These materials were stored in various containers ranging from 5-gallon buckets to a large motor oil AST. Staining was observed by Geosyntec on and around the two floor drains within the storage shed.

- Geosyntec observed an oil/water separator within a steam cleaning area on the west side of the garage/shop building and a large sump on the north side of the garage/shop building.

El Camino Paving at the Site address is listed as a closed case on the Water Board's leaking underground storage tank (LUST) database. This finding was identified by Geosyntec as a Historical Recognized Environmental Condition[2]. Two gasoline USTs and a diesel UST were removed from the Site in 1988. Several studies were conducted between 1988 and 2000 to evaluate the extent of impacts to soil and groundwater. Remedial work included the excavation of approximately 400 cubic yards of impacted soil and extraction and treatment of approximately 1.3 million gallons of groundwater. In 1995, the Santa Clara Valley Water District (Valley Water) approved the shutdown of the groundwater extraction system. After six years of intermittent groundwater monitoring, the Valley Water approved closure of the LUST case in 2001.

Soil, Soil Vapor and Groundwater Quality Evaluation

To obtain updated data, soil, soil vapor and groundwater sampling was performed at the Site by Geosyntec in 2017. Soil samples were collected from four borings located near the former USTs. Groundwater samples were collected from the former UST area and from the down-gradient (northern) portion of the Site. Soil vapor samples were collected from four locations near the steam cleaning area, and the on-Site garage/shop and storage shed structures.

[1] Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

[2] A previous release of hazardous substances or petroleum products affecting the Site that has been addressed to the satisfaction of the applicable regulatory agency and meeting unrestricted use criteria established by the applicable regulatory agency without subjecting the Site to any controls.

Low concentrations of diesel and oil range petroleum hydrocarbons were detected in the soil samples; the detected concentrations did not exceed the Water Board's current residential Environmental Screening Levels (ESLs[3]).

The six collected groundwater samples were analyzed for volatile organic compounds (VOCs). Several VOCs were detected, but most were at concentrations that did not exceed their respective ESLs. Trichloroethene (TCE) was detected in one groundwater sample at 5.8 micrograms per liter (µg/L), which is greater than its ESL of 1.2 µg/L. Similarly, naphthalene was detected at 7.7 µg/L, which is greater than its ESL of 4.6 µg/L. These ESLs are associated with potential vapor intrusion concerns.

In soil vapor, a few VOCs were detected at concentration exceeding current ESLs, including benzene (up to 30 µg/m^3), ethylbenzene (up to 610 µg/m^3) and hexane (up to 13,000 µg/m^3). For comparison, the residential ESLs associated with these VOCs[4] are 3.2 µg/m^3, 37 µg/m^3 and 466 µg/m^3, respectively.

Conclusions and Recommendations

Based on the information obtained during this study, Cornerstone concludes and recommends the following:

- Per ASTM E1527-21 and 40 CFR Part 312, a Phase I ESA report is presumed to be viable when it is conducted within one year prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The provided Phase I ESA is dated May 2017. If uses of the Site have significantly changed since 2017, we recommend that the Phase I ESA be updated.

- An oil/water separator reportedly is present within a steam cleaning area on the west side of the garage/shop building, and a large sump was reported to be present on the north side of the garage/shop building. These items were identified as a Recognized Environmental Condition by Geosyntec (2017). Prior to residential development of the Site, we recommend that these features be removed, and the underlying soil be sampled and analyzed for contaminants of concern to evaluate potential impacts to the Site. If contaminants of concern are identified at concentrations exceeding residential ESLs, remedial measures likely will be required by an oversight regulatory agency.

- Hazardous materials and petroleum products related to El Camino Paving operations were noted to still be on-Site (as of 2017) in a storage shed. Based on recent aerial photographs reviewed by Cornerstone, the storage shed was removed in 2022 or 2023. We presume that the hazardous materials observed by Geosyntec also were removed from the Site. If any hazardous materials remain on-Site, they should be properly disposed prior to redevelopment. Staining also was observed by Geosyntec on and around two floor drains within the storage shed. As with the oil/water separator and the

[3] Environmental Screening Levels (ESLs) established by the Water Board (July 2025) are used to screen sites for potential human health concerns where releases of chemicals have occurred. These screening levels are risk-based concentrations derived from standardized equations combining exposure information assumptions with toxicity data. Under most circumstances, the presence of a chemical at concentrations below the corresponding screening level can be assumed not to pose a significant health risk.

[4] The Water Board has not established an ESL for hexane. The noted value was calculated based on the US EPA's regional screening level (RSL) for hexane in indoor air and using the currently recommended attenuation factor of 0.03.

sump noted above, we recommend that the floor drains be removed, and the underlying soil be sampled and analyzed for contaminants of concern to evaluate potential impacts to the Site.

- The Site historically was used for agricultural purposes. Pesticides may have been applied to crops in the normal course of farming operations. Residual pesticide concentrations may remain in on-Site soil. If elevated concentrations of agricultural chemicals are present, mitigation or soil management measures may be required during construction/earthwork activities. Prior to residential development of the Site, we recommend performing soil sampling to evaluate if agricultural chemicals are present. At agricultural properties, pesticides often were stored within outbuildings such as barns or sheds. The recommended sampling should include an evaluation of these areas, along with the former agricultural field areas.

- What appear to have been two residences and associated outbuildings were additionally previously present on-Site. Soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to control termites. No information was reported that documents the use of lead-based paint or termite control pesticides on-Site; however, if used, residual pesticide and lead concentrations may remain in on-Site soil. Lead and/or pesticides often are identified in soil near old residences and associated outbuildings, such as those historically located on-Site. Prior to residential development of the Site, we recommend that shallow soil at the former structure locations be evaluated for the possible presence of lead and pesticides.

- Sampling by Geosyntec (2017) documented the presence of VOCs in soil vapor and groundwater at concentrations that exceed current ESLs associated with potential vapor intrusion concerns[5]. These VOCs were not identified as a significant concern in 2017 by Geosyntec; however, in recent years, regulatory screening levels associated with vapor intrusion concerns have been lowered (*i.e.*, have become more health-protective).

  Because at-grade residential structures are planned and VOCs were detected at concentrations exceeding current ESLs, we recommend that additional sampling be conducted to evaluate if vapor intrusion mitigation measures are warranted for planned structures at the Site. Also, note that no soil vapor samples were collected near the location of the former USTs or near the sump located on the north side of the garage/shop building. The recommended additional evaluation should include soil vapor sampling at these locations. If contaminants of concern are detected above their respective residential screening levels, subsequent investigation and/or remediation should be conducted with oversight from an appropriate regulatory agency (*e.g.*, Water Board, Department of Toxic Substances Control [DTSC], or Santa Clara County Department of Environmental Health).

  If the additional investigation concludes that vapor intrusion mitigation measures are warranted, the following should be prepared and implemented under regulatory oversight:

[5] Vapor intrusion is the movement of chemical vapors from contaminated ground water or soil into a nearby building. Vapors primarily enter through openings in building foundations, such as cracks in the concrete slab and gaps around utility lines. It is also possible for vapors to pass through concrete, which is naturally porous. Once inside the building, vapors may be inhaled posing potential health risks to building occupants.

- A Vapor Intrusion Mitigation Plan describing the measures to be implemented to help prevent exposure of Site occupants to VOCs in indoor air as a result of vapor intrusion. The plan should present the appropriate structural and engineering design features for the proposed occupied spaces to reduce the risk of vapor intrusion into buildings. The plan also should describe pre-occupancy indoor air monitoring procedures to evaluate the effectiveness of the installed vapor intrusion mitigation system. The indoor air monitoring should include preferential pathway sampling.

- A Completion Report documenting the installation of the vapor control measures identified in the Vapor Intrusion Mitigation Plan, including plans and specifications.

- A Long-Term Operations, Maintenance, and Monitoring Plan (OMMP) presenting the actions to be taken following construction to maintain and monitor the vapor intrusion mitigation system, and a contingency plan should the vapor mitigation system fail. A financial assurance mechanism should additionally be established (*i.e.*, proof that adequate funds are available for long-term maintenance and monitoring of the vapor intrusion mitigation system) and described in the OMMP.

- We also recommend preparing a Site Management Plan (SMP) and Health and Safety Plan (HSP) for the proposed demolition and development activities. The purpose of these documents will be to establish appropriate management practices for handling impacted soil, soil vapor and/or groundwater that may be encountered during construction activities.

Limitations

Cornerstone performed this investigation to support David J. Powers & Associates in the evaluation of the referenced Site. Conclusions presented in this letter are based on limited, readily available information. This letter, an instrument of professional service, was prepared for the sole use of David J. Powers & Associates and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

We thank you for this opportunity to work with you on this important project. Should you have any questions, please contact us at your convenience.

Sincerely,

Cornerstone Earth Group, Inc.

Ron L. Helm, C.E.G.
Senior Principal Geologist

CITADEL EHS
assess • resolve • strengthen

November 3, 2025

Michael Ducote
Prometheus Real Estate Group
1 North B Street, Suite 4000
San Mateo, California

Re: CITADEL Project No. 3067.1038.0
Additional Sampling Investigation - DRAFT
924 & 940 San Rafael Avenue
Mountain View, California

Dear Mr. Ducote:

Citadel EHS (Citadel), is pleased to provide you with this additional sampling investigation report for the property located at 924 and 940 San Rafael Avenue in Mountain View, California (the Site, Figure 1). This report was prepared in general accordance with Citadel's Proposal 3067.1038.P, dated September 4, 2025, and a mutually agreed upon scope of work.

SITE BACKGROUND

The Site is identified as Santa Clara County Assessor's Parcel Numbers (APNs) 153-17-044 and 153-17-045. The Site totals approximately 1.8 acres and is currently developed with a single garage/shop building and associated paved parking areas. The Site is currently vacant. Citadel understands the Site is planned to be redeveloped into a 37-unit at-grade residential townhouse development (Figure 2).

This additional sampling was conducted to assess previously identified recognized environmental conditions (RECs) presented in the *Phase I and Limited Phase II Environmental Site Assessment*, prepared by Geosyntec Consultants, dated May 8, 2017 (Phase I/II) and to address subsequent recommendations provided in the *Environmental Review* letter prepared by David J. Powers & Associates on July 30, 2025 to support the California Environmental Quality Act (CEQA) review process.

SCOPE OF WORK

The additional sampling activities were completed on September 16 through 18, 2025. The scope of work consisted of a combination of on-Site soil and soil vapor sampling, summarized as follows:

- Evaluate soil vapor conditions within the planned future building footprints: 1) near a former underground storage tank (UST) area; and 2) upgradient of a previous groundwater sample location (GW-2) where trichloroethylene (TCE) had been previously detected at a concentration slightly above the California maximum contaminant level (MCL);
- Evaluate soil conditions beneath a reported oil-water separator (OWS) and sump located adjacent to the garage/shop building;
- Evaluate soil conditions beneath a former hazardous material and petroleum products storage shed located at the southern side of the Site;

- Evaluate shallow soil conditions across the Site, adjacent to former buildings and structures, for the presence of lead from suspected historical lead-based paint use; and
- Evaluate shallow soil conditions across the Site for the presence of pesticides, given historical Site use as an orchard.

On September 16 and 17, 2025, drilling activities were conducted by Legacy Remediation, Inc., a C-57 licensed contractor, under the oversight of Citadel personnel. All work was performed under direction of a Citadel California-licensed geologist. Approximate boring locations are shown on the attached Figure 2. For reference, historical borings collected from the Site are also included on Figure 2.

Pre-Field Activities

Prior to initiating field work, Citadel performed the following pre-field activities:

- Marked the proposed sampling locations for Underground Service Alert (USA);
- Prepared a Site-specific Health and Safety Plan (HASP) with task-specific job safety analysis (JSA) forms;
- Coordinated subcontractors (drillers and analytical laboratories) required for Site investigation activities; and
- On September 11, 2025, conducted an underground utility survey to confirm the presence or absence of the reported OWS and sump, and to clear the proposed drilling locations of underground utilities and other possible subsurface obstructions. The OWS and sump were found to be present, identified both visually and with the aid of underground utility scanning equipment. The bottoms of both features were measured at approximately 2.5 feet below ground surface (bgs).

Santa Clara Valley Water District (SCVWD) drilling permits were not required as borings did not extend deeper than 45 feet bgs.

Soil Borings and Logging

A total of 21 borings (CSB-1 through CSB-9; SSB-1 through SSB-6; and SVP-1 through SVP-6) were advanced during the September 2025 investigation:

- Soil borings near the former hazardous material and petroleum product storage shed (CSB-1, CSB-2, and CSB-3) were advanced to a depth of 3 feet bgs;
- The six shallow soil borings advanced to evaluate lead and pesticides across the Site (SSB-1 through SSB-6) were advanced to a depth of 3 feet bgs;
- Soil borings near the OWS (CSB-7, CSB-8, and CSB-9) and sump (CSB-4, CSB-5, and CSB-6) were advanced to a depth of 6.5 feet bgs, approximately 4 feet below the bottom of both features.
- Soil vapor borings (SVP-1 through SVP-6) were advanced to a depth of 5.5 feet bgs.

Each soil boring and soil vapor boring were advanced using a hand auger to total depth. During hand augering at each borehole, soil was visually characterized and described using the Unified Soil Classification System (USCS). Soil samples were field screened for total volatile organic compounds (VOCs) using a handheld photoionization detector (PID).

Soil conditions at the Site consisted primarily of silty and poorly graded sand to depths of approximately 0.5 to 2 feet bgs, underlain by lean clay containing varying amounts of sand and gravel to the maximum depths explored. Faint petroleum odors were observed in several borings. Groundwater was not encountered in any of the borings. Boring logs included as Attachment A.

Soil Sampling

At each boring in the OWS and sump area, soil samples were collected below the bottom of these features (the bottoms of the OWS and sump were both measured at 2.5 feet bgs), at depths of 3 and 6 feet bgs. At each boring in the former hazardous material and petroleum products storage shed and at each of the shallow soil borings located across the Site, soil samples were collected at depths of 0.5 and 3 feet bgs. Soil samples were collected in laboratory-supplied sample containers, labeled, placed in a chilled cooler, and transported under standard chain-of-custody (COC) protocol to Pace Analytical, a California-certified laboratory, for analysis.

The soil samples were analyzed as follows:

- Soil samples collected from the OWS, sump, and former hazardous material and petroleum products storage shed were analyzed for total petroleum hydrocarbons as gasoline (TPHg), diesel (TPHd), and motor oil (TPHmo) using United States Environmental Protection Agency (USEPA) Method 8015; VOCs using USEPA Method 8260; and semivolatile organic compounds (SVOCs) using USEPA Method 8270.
- Soil samples collected from the shallow soil borings located across the Site were analyzed for California Administrative Manual (CAM)-17 Metals using USEPA Method 6010/7471 and organochlorine pesticides (OCPs) using USEPA Method 8081.

Following receipt of the initial analytical results, additional leachability analyses were performed on samples using the following industry rules-of-thumb:

- If 10 times the absolute value of the detected soil concentration exceeded the Soluble Threshold Limit Concentration (STLC), then a California Waste Extraction Test (CA WET) was performed; and
- If 20 times the absolute value of the detected soil concentration exceeded the RCRA Toxicity Characteristic Leaching Procedure (TCLP), then a TCLP was performed.

Given the above criteria, one sample (SSB-2-0.5') underwent CA WET/STLC for barium and seven samples (SSB-1-0.5', SSB-1-3', SSB-2-3', SSB-4-3', SSB-5-3', SSB-6-0.5', and SSB-6-3) underwent CA WET/STLC for chromium.

Soil Vapor Probe Installation

Temporary soil vapor probes were installed at a depth of 5 feet bgs in accordance with the methods and procedures outlined in the Advisory – Active Soil Gas Investigations (Advisory). The soil vapor probes were constructed using 1/4-inch diameter Teflon™ tubing, fitted with a vapor probe implant installed at the target depth with a three-way valve at the surface. The annulus surrounding the implant was filled with #2/12 Monterey sand to six inches above and below the implant, followed by a 6-inch layer of dry granulated bentonite, and hydrated bentonite chips to ground surface. Soil vapor probe construction details are presented in the boring logs in Attachment A.

Soil Vapor Probe Sampling

Soil vapor probes were sampled on September 18, 2025. Each sample was collected in accordance with the Advisory. At each sampling point a shut-in test was conducted and a total of three system volumes were removed prior to sampling. A helium shroud was used to conduct a leak test at each sampling point. An average of 20 percent (%) helium was monitored and maintained under the helium shroud during sample collection. Soil vapor samples were collected from each location in 1-liter SUMMA canisters, labeled, handled under standard COC protocols, and transported to Pace Analytical, a California-certified laboratory, for analysis. The samples were analyzed for VOCs and TPHg using USEPA Method TO-15 and fixed gases, including the leak check compound helium, using modified American Society for Testing and Materials (ASTM) Method D 1946. Field data sheets are provided in Attachment B.

INVESTIGATION DERIVED WASTE MANAGEMENT

Investigation derived waste (IDW) consisted of soil cuttings. IDW is stored on-Site in a properly labeled 55-gallon drum. Following waste characterization profiling, IDW will be disposed of in accordance with applicable laws and regulations.

INVESTIGATION RESULTS

Soil

Soil analytical results were compared to the San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Tier 1 ESLs and direct exposure human health risk levels for residential shallow soil exposure (residential ESLs) and commercial shallow soil exposure (commercial ESLs). Published background levels for metals were also considered in the comparative analysis.

TPH and VOC concentrations are presented in Table 1. Constituents reported above Tier 1 ESLs (the most stringent value considering all screening levels) are summarized as follows:

- TPHmo was detected in 15 of 18 soil samples at concentrations ranging from 4.92 J[1] milligrams per kilogram (mg/kg) to 4,320 mg/kg. The TPHmo concentration in one sample (CSB-2-0.5') exceeded the Tier 1 ESL of 1,600 mg/kg but was below the residential ESL of 12,000 mg/kg.
- Naphthalene was detected in three of 18 soil samples at concentrations ranging from 0.0155 mg/kg to 0.0841 mg/kg. The naphthalene concentration in one sample (CSB-7-3') exceeded the Tier 1 ESL of 0.030 mg/kg but was below the residential ESL of 2.0 mg/kg.
- TPHg, TPHd, and other VOCs were detected above laboratory reporting limits in one or more soil samples but were either below the Tier 1ESL or there is no established ESL and are not considered drivers for future investigation or remediation.

SVOC and OCP concentrations are presented in Tables 2 and 3, respectively. No SVOCs or OCPs were reported above their respective ESLs in any of the soil samples analyzed.

Metals concentrations are presented in Table 4. Metals with reported concentrations above Tier 1 ESLs, residential ESLs, commercial ESLs, and/or background levels are summarized as follows:

- Barium was detected above the Tier 1 ESL of 390 mg/kg and the Bay Area background level of 410 mg/kg in three of the 12 samples (SSB-2-0.5', SSB-3-0.5', and SSB-4-0.5') at concentrations ranging from 572 mg/kg to 1,090 mg/kg. Barium was detected above the threshold to require CA WET/STLC analysis of 1,000 mg/kg in one sample (SSB-2-0.5'). CA WET/STLC analysis for barium was performed by the laboratory and results indicated the soil would not be characterized as California Hazardous (Non-RCRA) hazardous soil. STLC results are included on Table 4.
- Chromium was not detected above the Tier 1 ESL of 160 mg/kg[2] in any of the soil samples analyzed; however, chromium was detected above the threshold to require CA WET/STLC analysis of 50 mg/kg in seven samples (SSB-1-0.5', SSB-1-3', SSB-2-3', SSB-4-3', SSB-5-3', SSB-6-0.5', and SSB-6-3'). CA WET/STLC analysis for chromium was performed for each sample by the laboratory and results indicated the soil would not be characterized as California Hazardous (Non-RCRA) hazardous soil. STLC results are included on Table 4.
- Arsenic, nickel, and vanadium were detected in each of the soil samples at concentrations above their respective Tier 1 ESLs but below their respective Bay Area background levels.

[1] J flagged = estimated value.
[2] ESL value is for total chromium.

- No additional metals were detected above the Tier 1 ESLs and background levels in the analyzed soil samples.

Laboratory analytical reports are included in Attachment C.

Soil Vapor

Soil vapor samples were analyzed for VOCs and TPHg using USEPA Method TO-15. VOC constituents were compared to SFBRWQCB subslab/soil gas ESLs for residential and commercial land use (residential and commercial ESLs). A summary of the detections is shown in Table 5 and summarized below:

- Benzene was detected in five of six soil vapor samples at concentrations ranging from 0.776 to 9.26 micrograms per cubic meter (µg/m^3). Two soil vapor samples (SVP-5 and SVP-6) had concentrations above the residential ESL of 3.2 µg/m^3, but below the commercial ESL of 14 µg/m^3.

Other VOCs were detected above laboratory reporting limits but were either below the residential and commercial ESLs or there is no established ESL and are not considered drivers for future investigation or remediation.

Soil vapor samples were additionally analyzed for fixed gases (oxygen, carbon dioxide, and methane) using ASTM Method D-1946. Results are shown in Table 6 and are summarized below:

- Oxygen was detected in each of the soil vapor samples at concentrations ranging from 18.1 to 20.2%.
- Carbon dioxide was detected in three of six soil vapor samples at concentrations ranging from 0.677 to 1.29%.
- Methane was not detected above laboratory reporting limits in any of the soil vapor samples.

Laboratory analytical reports are included in Attachment C.

Quality Assurance/Quality Control Sampling

Helium was used as a leak check compound for collection of the soil vapor samples for analysis of VOCs by USEPA Method TO-15. To evaluate the potential leak at the soil vapor probes, a ratio of the concentration of helium measured in the samples to the average concentration of helium under the shroud during sample collection was estimated. According to the Advisory, a leak threshold of 5% is considered acceptable when a quantitative leak check compound is used under the sampling shroud. Helium was detected above the laboratory reporting limit in one soil vapor sample (SVP-2) at a concentration of 0.235%. This resulted in a calculated leak ratio of 1.00%, which is below the acceptable leak threshold. Therefore, the TO-15 data were considered valid and representative. A summary of helium data is shown on Table 6. Laboratory analytical reports are included in Attachment C.

DISCUSSION OF KEY RESULTS AND CONCLUSIONS

TPH, VOCs, SVOCs, and OCPs were not reported in soil above Tier 1 ESLs with the exception of TPHmo in one sample (CSB-2-0.5') and naphthalene in one sample (CSB-7-3'). The Tier 1 ESLs are based on terrestrial habitat for TPHmo and soil leaching for naphthalene, which are not applicable for an urban development that is primarily capped with buildings and hardscape. Furthermore, these Tier 1 exceedances are isolated to a single location, and the detected concentrations are relatively low, not indicative of a significant release or widespread impact. The reported TPHmo and naphthalene concentrations in these samples are well below the more applicable residential and construction worker ESLs.

Metals were not reported above Tier 1 ESLs and background levels with the exception of barium in three shallow (0.5 feet bgs) soil samples located in the central-eastern portion of the Site. The

Tier 1 ESL for barium is based on terrestrial habitat, which is not applicable for an urban development that is primarily capped with buildings and hardscape. The reported barium concentrations in these samples are below the more applicable residential ESL of 15,000 mg/kg and construction worker ESL of 2,200 mg/kg. Results of the CA WET/STLC analysis for barium indicate the soil would not be characterized as California hazardous soil.

Benzene was reported in two soil vapor samples at concentrations that exceed residential ESLs; however, the ESLs do not account for bioattenuation and can be overly conservative at Sites where biodegradation is occurring. The CalEPA Supplemental Guidance: Screening and Evaluating Vapor Intrusion (Supplemental Guidance)[3] recommends the application of bioattenuation factors (BAFs) to risk-based soil vapor SLs at sites where biodegradation has been demonstrated. The Supplemental Guidance specifies the use of the following BAFs based on oxygen concentrations:

- 1.0 BAF for oxygen content less than 1% (inadequate bioattenuation zone)
- 0.1 BAF for oxygen content at least 1% and less than 4% (weak bioattenuation zone)
- 0.001 BAF for oxygen content equal or greater than 4% (strong bioattenuation zone)

Resulting oxygen concentrations in soil vapor samples were between 18.1 and 20.2%, indicating a strong bioattenuation zone. Using the 0.001 BAF for strong bioattenuation zones, the screening evaluation results are as follows:

$$C_{IA} = C_{SV} \times AF \times BAF$$

Where:

C_{IA} = Indoor air concentration;

C_{SV} = soil vapor concentration;

AF = soil vapor to indoor air attenuation factor; 0.03; and

BAF = bioattenuation factor; 0.001.

Using the equation above, the calculated screening-level estimate for potential indoor air concentrations associated with the maximum detected benzene soil vapor concentration of 9.26 µg/m^3 is 0.000278 µg/m^3. This value represents a theoretical upper-bound estimate for potential vapor intrusion and is well below the residential indoor air ESL of 0.097 µg/m^3.

Based on the presence of a strong bioattenuation zone at both soil vapor probe locations, the benzene concentrations in soil vapor will bioattenuate and are not considered to represent a vapor intrusion concern or a driver for further investigation or mitigation during property redevelopment.

LIMITATIONS

This report was prepared in accordance with generally and currently accepted engineering practices and principles. Although the data in this report is indicative of subsurface conditions in areas investigated, no further conclusions regarding the absence or presence of subsurface contamination at the site should be construed or inferred other than those expressly stated in this report. The conclusions made are based on information obtained from field observations, and from relevant Federal, State, regional, and local agencies.

Notes:

Samples analyzed using USEPA Method 8081B.

[Note 1] SFRWQCB Tier 1 Environmental Screening Levels, 2025 (Rev. 3).

[Note 2] SFBRWQCB, Direct Exposure Human Health Risk Levels for Commercial Shallow Soil Exposure, 2025 (Rev. 3).

[Note 3] SFBRWQCB, Direct Exposure Human Health Risk Levels for Residential Shallow Soil Exposure, 2025 (Rev. 3).

bgs = Below ground surface.

OCP = organochlorine pesticide.

SFBRWQCB = San Francisco Bay Regional Water Quality Control Board.

ESL = Environmental Screening Level.

-- = No value established, Not analyzed.

ND <0.50 = Not detected above the noted laboratory reporting limit.

mg/kg = Milligrams per kilogram.

DDE = Dichlorodiphenyldichloroethylene

Notes:

Yellow shaded values exceed the Tier 1 ESL and the Bay Area Background Level.

Values shown in red font exceed the threshold which triggers STLC analysis for waste characterization.

Note 1 SFRWQCB Tier 1 Environmental Screening Levels, 2025 (Rev. 3).

Note 2 SFBRWQCB, Direct Exposure Human Health Risk Levels for Commercial Shallow Soil Exposure, 2025 (Rev. 3).

Note 3 SFBRWQCB, Direct Exposure Human Health Risk Levels for Residential Shallow Soil Exposure, 2025 (Rev. 3).

Note 4 Lawrence Berkeley National Laboratory, Analysis of Background Distributions of Metals in Soil at Lawrence Berkeley National Laboratory, Table 5. Revised April 2009.

Note 5 For arsenic, the background concentration was based on the document titled Establishing Background Arsenic in Soil of the Urbanized San Francisco Bay Area (Duverge, 2011).

Note 6 ESL value shown is for total chromium.

bgs = Below ground surface.

SFBRWQCB = San Francisco Bay Regional Water Quality Control Board.

ESL = Environmental Screening Level.

-- = No value established, Not analyzed.

ND <0.50 = Not detected above the noted laboratory reporting limit.

mg/kg = Milligrams per kilogram.

mg/L = milligrams per liter.

STLC = Soluble Threshold Limit Concentration.

J = Estimated value.

Soil Vapor Field Measurement Log

Date:	9/8/25	Sampler:	Fanny L
Project:	San Rafael Ave	Project #:	3067.1038.0
Container Type:	Summa	Container ID:	01379
Sample ID:	SVP-2	Manifold ID:	021833
Duplicate Sample ID:	n/a		
Weather:	Overcast	Temperature:	75

Precipitation: Has it rained >0.5 inch during a 24-hour period in the last 5 days? No ☑ Yes ☐ Rainfall _____ in

If no, proceed with collection of sample. If yes, contact PM.

Sampling Device:		Leak Test:	Shut-In
Purge Volume:	~ 4,600	Leak Check Compound:	Helium
Purge Flow Rate:	200 ml/min	Sample Start Time:	1433
Purge Duration:	23 min	Start Vacuum:	27
Purge Start Time:	1409	Sample End Time:	1437
Purge End Time:	1432	End Vacuum:	5

Field Measurements

Purge

Time	Flow Rate (mL/min)	Helium In-Line (%)	Helium in Shroud (%)	Helium Ratio* (%)	Comments
1410	200	0.2	23.0		
1411	"	0	19.3		
1412	"	0	20.8		
1413	"	0.4	24.1		
1414	"	0.3	30.1		

*If ratio of in-line helium to shroud helium is >5%, stop work and notify project manager before collecting sample.

Sample Collection

Time	Flow Rate (mL/min)	Vacuum (in Hg)	Helium in Shroud (%)	Comments
1434	200	20	22.4	
1435	"	15	20.9	
1436	"	11	20.7	
1437		8	22.7

Unless qualified or notated within the narrative below, all sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Mandi Edwards
Project Manager

Volatile Organic Compounds (GC) by Method 8015C

The analyte concentration exceeds the upper limit of the calibration range of the instrument established by the initial calibration (ICAL).

Batch	Lab Sample ID	Analytes
WG2604569	(MS) R4277694-4	TPHG C5 - C12
WG2604569	(MSD) R4277694-5	TPHG C5 - C12

Volatile Organic Compounds (GC/MS) by Method 8260D

The reported concentration is an estimate. The continuing calibration standard associated with this data responded low. Method sensitivity check is acceptable.

Batch	Lab Sample ID	Analytes
WG2604145	L1899525-01	1,1,2,2-Tetrachloroethane, 1,2-Dibromo-3-Chloropropane, 2-Butanone (MEK), Methyl tert-butyl ether and Naphthalene
WG2604145	L1899525-02	1,1,2,2-Tetrachloroethane, 1,2-Dibromo-3-Chloropropane, 2-Butanone (MEK), Methyl tert-butyl ether and Naphthalene
WG2604145	L1899525-03	1,1,2,2-Tetrachloroethane, 1,2-Dibromo-3-Chloropropane, 2-Butanone (MEK), Methyl tert-butyl ether and Naphthalene
WG2604145	L1899525-04	1,1,2,2-Tetrachloroethane, 1,2-Dibromo-3-Chloropropane, 2-Butanone (MEK), Methyl tert-butyl ether and Naphthalene
WG2604145	L1899525-05	1,1,2,2-Tetrachloroethane, 1,2-Dibromo-3-Chloropropane, 2-Butanone (MEK), Methyl tert-butyl ether and Naphthalene
WG2604145	L1899525-06	1,1,2,2-Tetrachloroethane, 1,2-Dibromo-3-Chloropropane, 2-Butanone (MEK), Methyl tert-butyl ether and Naphthalene
WG2604145	L1899525-07	1,1,2,2-Tetrachloroethane, 1,2-Dibromo-3-Chloropropane, 2-Butanone (MEK), Methyl tert-butyl ether and Naphthalene
WG2604149	L1899525-08	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-09	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-10	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-11	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-12	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-13	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-14	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-15	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-16	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-17	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane
WG2604149	L1899525-18	1,1,2,2-Tetrachloroethane and Dichlorodifluoromethane

Volatile Organic Compounds (GC/MS) by Method 8260D

The reported concentration is an estimate. The continuing calibration standard associated with this data responded high. Data is likely to show a high bias concerning the result.

Batch	Lab Sample ID	Analytes
WG2604149	L1899525-14	Tetrachloroethene
WG2604149	L1899525-16	Tetrachloroethene
WG2604149	L1899525-17	Tetrachloroethene
WG2604149	L1899525-18	Tetrachloroethene

Surrogate recovery limits have been exceeded; values are outside upper control limits.

Batch	Analyte	Lab Sample ID
WG2604149	Toluene-d8	L1899525-11

The associated batch QC was below the established quality control range for accuracy.

Batch	Lab Sample ID	Analytes
WG2604149	(LCS) R4276510-1, L1899525-08, 09, 10, 11, 12, 13, 14, 15, 16, 17, 18	1,1,2,2-Tetrachloroethane

The associated batch QC was above the established quality control range for accuracy.

Batch	Lab Sample ID	Analytes
WG2604149	(LCS) R4276510-1, L1899525-08, 09, 10, 11, 12, 13, 14, 15, 16, 17, 18	Methylene Chloride, trans-1,3-Dichloropropene and Trichlorofluoromethane

Semi-Volatile Organic Compounds (GC) by Method 8015C

Surrogate recovery cannot be used for control limit evaluation due to dilution.

Batch	Analyte	Lab Sample ID
WG2606613	o-Terphenyl	L1899525-13, 15, 17

Pesticides (GC) by Method 8081B

RPD between the primary and confirmatory analysis exceeded 40%

Batch	Lab Sample ID	Analytes
WG2605157	L1899525-20	4,4-DDE
WG2605157	(MS) R4277314-3	4,4-DDD, Endrin and Methoxychlor
WG2605157	(MSD) R4277314-4	4,4-DDD, Endrin and Methoxychlor
WG2605999	(MS) R4277677-6	13 analytes

Surrogate recovery limits have been exceeded; values are outside upper control limits.

Batch	Analyte	Lab Sample ID
WG2605157	Decachlorobiphenyl	(MS) R4277314-3, L1899525-19, 23

Surrogate recovery cannot be used for control limit evaluation due to dilution.

Batch	Analyte	Lab Sample ID
WG2605999	Decachlorobiphenyl	L1899525-29
WG2605999	Tetrachloro-m-xylene	L1899525-29

The associated batch QC was below the established quality control range for accuracy.

Batch	Lab Sample ID	Analytes
WG2606601	(LCS) R4278602-2, L1899525-30	Endrin

The associated batch QC was above the established quality control range for accuracy.

Batch	Lab Sample ID	Analytes
WG2606601	(LCS) R4278602-2, L1899525-30	Endrin ketone

The sample matrix interfered with the ability to make any accurate determination; spike value is high.

Batch	Lab Sample ID	Analytes
WG2605157	(MS) R4277314-3, L1899525-25	Methoxychlor

Pesticides (GC) by Method 8081B

The associated batch QC was outside the established quality control range for precision.

Batch	Lab Sample ID	Analytes
WG2605157	(MSD) R4277314-4, L1899525-25	Methoxychlor

Semi Volatile Organic Compounds (GC/MS) by Method 8270E

The reported concentration is an estimate. The continuing calibration standard associated with this data responded low. Method sensitivity check is acceptable.

Batch	Lab Sample ID	Analytes
WG2605155	L1899525-01	2,4-Dimethylphenol

STORM/SANITARY SEWER DISCHARGE AUTO FACILITY INSPECTION NOTICE

☐ Zero Discharger ☑ Permitted Facility (__Sample Collected) ☐ Applying for Permit ☐ Fleet

Business Name: El Camino Paving Business Phone: [redacted]

Business Address: 924 San Rafael Ave. Business Contact: Stephanie Alva

Inspection Date: 8/30/16 Inspector: Corrie Sandahl Facility ID: 722

Inspection Number (circle one): 1 / 2 / 3 / 4 / 5 *Principal Business Activity:* paving contractor

CITY AND STATE CODE REQUIRE COMPLIANCE WITH THE ITEMS CHECKED BELOW:

An up-to-date and accurate HMBP shall be maintained on-site at all times. (MVCC 24.4.0)

☐ IP-1.1. Update the "Facility Directory" form.
☐ IP-1.2. Update the "Facility Map" form.
☐ IP-1.3. Update the "Wastewater Process Discharge" form (incorporating any new or deleted local categories).

Implement the following Pollution Prevention Procedures: (MVCC 35.33.11)

☐ IP-2.10. Repair treatment system and provide receipt for repair work.
☐ IP-3.1. Clean up the following spills: _____
☐ IP-3.2. Provide the following spill/clean-up equipment: _____
☐ IP-3.4. Cap and seal the following drains: _____
☐ IP-3.7. Remove the drain(s) from the following equipment: _____
☐ IP-3.8. Obtain a wastewater discharge permit for the following: _____
☐ IP-3.9. Establish collection pails/drums for your wet sanding wastewater and label accumulation start date.
☐ IP-3.10. Solids from the settling of wet sanding water shall be hauled off as hazardous waste.
☐ IP-3.11. Obtain an industrial wastewater discharge permit for wash/rinse water discharge.
☐ IP-3.12. Install an approved treatment systems for treating the wash/rinse water.
☐ IP-3.13/ 3.14. Wash with water only (no soap or detergent) / Cease and desist all washing/rinsing operations.
☐ IP-3.15. Provide secondary containment for (waste, batteries, etc): _____
☐ IP-3.16. Provide lids for the following open containers: _____
☐ IP-3.17. Clean and rinse floors using the following three-step floor cleaning process:
(i) Clean up gross spills with rags or other absorbent materials; **(ii)** Sweep up any remaining absorbent materials; and **(iii)** Mop areas requiring additional cleaning and discharge mop water to toilet or sink.

It is unlawful to discharge to any curb gutter, storm drain gutter, or creek any polluted water other than stormwater. *Eliminate discharges or potential to the storm drain from the marked items:*

URP-2. OUTDOOR ACTIVITIES:
☐ URP-2.1. Vehicle or equipment fueling area
☐ URP-2.2. Vehicle or equipment washing
☐ URP-2.3. Vehicle and equipment maintenance area
☐ URP-2.4. Raw material storage area
☑ URP-2.5. Hazardous materials/waste storage area — stockpile
☐ URP-2.7. Pressure-cleaning or power-washing
☐ URP-2.8. Equipment or vehicle storage area
☑ URP-2.9. General housekeeping
☑ URP-2.10. Other uncovered stockpile

URP-3. EQUIPMENT:
☐ URP-3.1. Air compressors
☐ URP-3.2. Air Scrubbers
☐ URP-3.3. Boilers, chillers
☐ URP-3.4. Compactors/dumpsters
☐ URP-3.7. Floor sinks or drains
☐ URP-3.11. Loading/unloading docks
☐ URP-3.12. Leaking vehicle
☐ URP-3.13. Other _____

All employees shall be **trained**, upon hiring and annually thereafter, regarding best management practices to reduce or eliminate discharges to the sanitary sewer and storm drain. (MVCC 35.33.15)

☐ IP-4.1/URP-4.1. Provide copy of training curriculum.
☐ IP-4.2/URP-4.2. Provide copy of personnel training log.

All storm drains shall be **stenciled** in accordance with the City's stenciling program. (MVCC 35.33.11.1(J))

☐ URP-4.3. Stencil all storm drains.

(*FOR OFFICE USE ONLY*: Any stormwater infiltration devices (SWIDs) on-site? Yes ☐ No ☐)

INSPECTION REMARKS: Stock pile is still on-site & only partially covered. Stockpile needs to be removed before rain event. Site needs to be swept before rain event.

☐ No violations have been identified. Thank you for your cooperation.
☑ Please correct the violations indicated above by 9/13/16 (date). A reinspection shall be conducted in _____ days.
☐ All violations have been corrected. Thank you!

- ☐ IP-3.9. Establish collection pails/drums for your wet sanding wastewater and label accumulation start date.
- ☐ IP-3.10. Solids from the settling of wet sanding water shall be hauled off as hazardous waste.
- ☐ IP-3.11. Obtain an industrial wastewater discharge permit for wash/rinse water discharge.
- ☐ IP-3.12. Install an approved treatment systems for treating the wash/rinse water.
- OK 12/3/15 ☐ IP-3.13/ 3.14. Wash with water only (no soap or detergent) / Cease and desist all washing/rinsing operations.
- ☑ IP-3.15. Provide secondary containment for (waste, batteries, etc): tires (outdoors)
- ☐ IP-3.16. Provide lids for the following open containers: _____
- ☐ IP-3.17. Clean and rinse floors using the following three-step floor cleaning process:
  (i) Clean up gross spills with rags or other absorbent materials; **(ii)** Sweep up any remaining absorbent materials; and **(iii)** Mop areas requiring additional cleaning and discharge mop water to toilet or sink.

It is unlawful to discharge to any curb gutter, storm drain gutter, or creek any polluted water other than stormwater. *Eliminate discharges or potential to the storm drain from the marked items:*

large stockpiles of concrete must be covered or removed from site to a proper disposal location — in meantime please put a pig or wattle around perimeter of pile

URP-2. OUTDOOR ACTIVITIES:

- ☐ URP-2.1. Vehicle or equipment fueling area
- ☐ URP-2.2. Vehicle or equipment washing
- ☐ URP-2.3. Vehicle and equipment maintenance area
- ☐ URP-2.4. Raw material storage area
- ☑ URP-2.5. Hazardous materials/waste storage area
- ☐ URP-2.7. Pressure-cleaning or power-washing
- ☐ URP-2.8. Equipment or vehicle storage area
- OK 12/3/15 ☑ URP-2.9. General housekeeping
- OK 12/3/15 ☑ URP-2.10. Other Partially full, open containers are still scattered throughout yard. All containers must have lids (tightly fitting) at all times.

URP-3. EQUIPMENT:

- ☐ URP-3.1. Air compressors
- ☐ URP-3.2. Air Scrubbers
- ☐ URP-3.3. Boilers, chillers
- ☐ URP-3.4. Compactors/dumpsters
- ☐ URP-3.7. Floor sinks or drains
- ☐ URP-3.11. Loading/unloading docks
- ☑ URP-3.12. Leaking vehicle(s) - throughout yard
- ☐ URP-3.13. Other absorbant not swept since last insp. on 11/18/15 - oil is now leaching out of absorbant throughout the site.

All ~~employees shall be trained~~, upon hiring and annually thereafter, regarding best management practices to reduce or eliminate discharges to the sanitary sewer and storm drain. (MVCC 35.33.15)

- ☐ IP-4.1/URP-4.1. Provide copy of training curriculum.
- ☐ IP-4.2/URP-4.2. Provide copy of personnel training log.

All storm drains shall be **stenciled** in accordance with the City's stenciling program. (MVCC 35.33.11.1(J))

- ☐ URP-4.3. Stencil all storm drains.

(*FOR OFFICE USE ONLY*: Any stormwater infiltration devices (SWIDs) on-site? Yes ☐ No ☐)

INSPECTION REMARKS: Re-inspection in regard to primary inspection on 11/18/15. Absorbant has not swept; some containers w/out lids are still scattered throughout yard. Concrete wash-out/sediment not cleaned. Raining during inspection and run-off is sediment-laden & has an oily-rainbow sheen on the flows.

- ☐ No violations have been identified. Thank you for your cooperation.
- ☑ Please correct the violations indicated above by Immediately (date). A reinspection shall be conducted on 12/1/15 ~~in _____ days~~.
- ☐ All violations have been corrected. Thank you!

☐ IP-3.2. Provide the following spill/clean-up equipment: _____
☐ IP-3.4. Cap and seal the following drains: _____
☐ IP-3.7. Remove the drain(s) from the following equipment: _____
☐ IP-3.8. Obtain a wastewater discharge permit for the following: _____
☐ IP-3.9. Establish collection pails/drums for your wet sanding wastewater and label accumulation start date.
☐ IP-3.10. Solids from the settling of wet sanding water shall be hauled off as hazardous waste.
☐ IP-3.11. Obtain an industrial wastewater discharge permit for wash/rinse water discharge.
☐ IP-3.12. Install an approved treatment systems for treating the wash/rinse water.
☐ IP-3.13/ 3.14. Wash with water only (no soap or detergent) / Cease and desist all washing/rinsing operations.
☐ IP-3.15. Provide secondary containment for (waste, batteries, etc): _____
☐ IP-3.16. Provide lids for the following open containers: _____
☐ IP-3.17. Clean and rinse floors using the following three-step floor cleaning process:
(i) Clean up gross spills with rags or other absorbent materials; (ii) Sweep up any remaining absorbent materials; and
(iii) Mop areas requiring additional cleaning and discharge mop water to toilet or sink.

It is unlawful to discharge to any curb gutter, storm drain gutter or creek any polluted water other than storm water. *Eliminate discharges or potential to the storm drain from the marked items:*

URP-2. OUTDOOR ACTIVITIES:

☐ URP-2.1. Vehicle or equipment fueling area
☐ URP-2.2. Vehicle or equipment washing
☑ URP-2.3. Vehicle and equipment maintenance area — use absorbant & sweep up all oil spills. Lots of spills around perimeter of yard.
☐ URP-2.4. Raw material storage area
☐ URP-2.5. Hazardous materials/waste storage area
☐ URP-2.7. Pressure-cleaning or power-washing
☑ URP-2.8. Equipment or vehicle storage area
☑ URP-2.9. General housekeeping (wash) (trash again...)
☐ URP-2.10. Other clean up all trash

URP-3. EQUIPMENT:

☐ URP-3.1. Air compressors
☐ URP-3.2. Air Scrubbers
☐ URP-3.3. Boilers, chillers
☐ URP-3.4. Compactors/dumpsters
☐ URP-3.7. Floor sinks or drains
☑ URP-3.11. Loading/unloading docks — get dumpster repaired, lids closed at all times
☐ URP-3.12. Leaking vehicle
☑ URP-3.13. Other sweep yard cover stockpiles

All employees shall be **trained**, upon hiring and annually thereafter, regarding best management practices to reduce or eliminate discharges to the sanitary sewer and storm drain. (MVCC 35.32.14)

☐ IP-4.1/URP-4.1. Provide copy of training curriculum.
☐ IP-4.2/URP-4.2. Provide copy of personnel training log.

All storm drains shall be **stenciled** in accordance with the City's stenciling program. (MVCC 35.32.10.1(J))

☐ URP-4.3. Stencil all storm drains.

(FOR OFFICE USE ONLY: Any storm water infiltration devices (SWIDs) on-site? Yes ☐ No ☐)

INSPECTION REMARKS: Overall facility looks good - please haul trash (in progress, dumpster currently full) & cover or haul tires in rain weather.

☐ No violations have been identified. Thank you for your cooperation.
☑ Please correct the violations indicated above by 7/26/13 (date). A reinspection shall be conducted in 10 days.
☐ All violations have been corrected. Thank you!

Review Chain of Custody Chain of Custody is to be complete and legible.

- Are these regulatory (~~NPDES~~) samples? CWA — (Yes) / No
- Is pH requested? — Yes / (No)
  - N/A Was Client informed that hold time is 15 min? Yes / No Continue Yes / No
  - N/A Was ortho-Phosphate filtered with in 15 min? Yes / No Continue Yes / No
- Are sample within hold time? — (Yes) / No
  - Are sample in danger of exceeding hold-time — Yes / (No)
- Existing Client? (Yes) / No Existing Project? (Yes) / No
  - If No: Is Report to info complete and legible, including;
    - deliverable Name Address phone e-mail
    - Is Bill to info complete and legible, including;
    - PO# Credit card Contact address phone e-mail
    - Is Contact and/or Project Manager identified, including;
    - phone e-mail
- Project name / number Special requirements? — (Yes) / No
- Sample IDs / date & time of collection provided? — (Yes) / No
- Is Matrix listed and correct? — (Yes) / No
- Analyses listed we do or client has authorized a subcontract? — (Yes) / No
- Chain is signed and dated by both client and sample custodian? — (Yes) / No
- TAT requested available? (Yes) / No Approved by PM

Review Coolers: Temperature Blank | 1.3 + 0.3 = 1.6°C @ 13:05

- Were Coolers temperatures measured at ≤6°C? Cooler # 1 Temp 1.6 °C
  - If cooler is outside the ≤6°C; note down below the affected bottles in that cooler
  - Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)
- Shipment Received Method walk In CDET)
- Custody Seals: Present: Yes / (No) If Yes; Unbroken: Yes / No

Review of Sample Bottles: If you answer no, explain to the side

- Chain matches bottle labels? (Yes) / No Sample bottle intact? (Yes) / No
- Is there enough sample volume in proper bottle for requested analyses? (Yes) No
- Proper Preservatives? (Yes) / No Check pH on preserved samples except 1664, 625, ~~8270~~ and ~~VOAs~~. 250mL poly (@ HNO3)
- N/A Headspace-VOAs? Greater than 6mm in diameter Yes / No
  List sample ID and affected container

200.7-metals

Client Sample ID	pH Check	Other Comments/Issues
-1	pH<2	250mL poly (@ HNO3) 200.7

Non-Compliance issues and discrepancies on the COC are forwarded to Project Management

Job#: C9715
Sample Control Rep. Initial: EK

DECASM2288

Review Chain of Custody Chain of Custody is to be complete and legible.

- Are these regulatory ~~(NPDES)~~ samples? CWA — (Yes) / No
- Is pH requested? — Yes / (No)
  - Was Client informed that hold time is 15 min? N/A — Yes / No
  - If yes, did Client consent to continue? N/A
- Are sample within hold time? — (Yes) / No
  - Are sample in danger of exceeding hold-time — Yes / (No)
- Existing Client? (Yes) / No — Existing Project? (Yes) / No
  - If No: Is Report to Info complete and legible, including;
    - deliverable Name Address phone e-mail
    - Is Bill to info complete and legible, including;
    - PO# Credit card Contact address phone e-mail
    - Is Contact and/or Project Manager identified, including;
    - phone e-mail
- Project name / number Special requirements? — (Yes) / No
- Sample IDs / date & time of collection provided? — (Yes) / No
- Is Matrix listed and correct? — (Yes) / No
- Analyses listed we do or client has authorized a subcontract? — (Yes) / No
- Chain is signed and dated by both client and sample custodian? — (Yes) / No
- TAT requested available? (Yes) / No — Approved by PM

Review Coolers:

- Were Coolers temperatures measured at ≤6°C? Cooler # 1 Temp 2.8 °C
  - If cooler is outside the ≤6°C; note down below the affected bottles in that cooler
  - Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)
- Shipment Received Method Accutest Courier
- Custody Seals: N/A Present: Yes / (No) If Yes; Unbroken: Yes / No

Review of Sample Bottles: If you answer no, explain to the side

- Chain matches bottle labels? (Yes) / No — Sample bottle intact? (Yes) / No
- Is there enough sample volume in proper bottle for requested analyses? (Yes) / No
- Proper Preservatives? (Yes) / No — Check pH on preserved samples except 1664, 625, 8270 and VOAs. 250mL poly (HNO3)
- Headspace-VOAs? Greater than 6mm in diameter Yes / No
  N/A List sample ID and affected container

Client Sample ID	pH Check	Other Comments/~~Issues~~
-1	PH<2	250mL poly (HNO3) 200.7 metals

Non-Compliance issues and discrepancies on the COC are forwarded to Project Management

Accutest Laboratories Northern California
STANDARD OPERATING PROCEDURE

Sample Receiving Checklist

Job # C5489
Sample Control Initial EK

Review Chain of Custody The Chain of Custody is to be completely and legibly filled out by Client.
- ☑ Are these regulatory (NPDES) samples? Yes / (No) circle one
- ☑ Is pH requested? Yes / (No) circle one ☐ Was Client informed that hold time is 15 min? Yes / No circle one
  If yes, did Client consent to continue? —
- ☑ Are sample within hold time? (Yes) / No circle one Are sample in danger of exceeding its hold-time within 6-48 hours?
- ☑ Report to info is complete and legible, including;
  - ☑ Type of deliverable needed ☑ Name ☑ Address ☑ phone ☑ e-mail ON-FILE
- ☑ Bill to info is complete and legible, including; ☐ PO# ☐ Credit card ☐ Contact ☐ address ☐ phone ☐ e-mail
- ☑ Contact and/or Project Manager identified, including; ☑ phone ☑ e-mail
- ☑ Project name / number ☐ Special requirements? (Yes) / No circle one
- ☑ Sample IDs / date & time of collection provided? (Yes) / No circle one
- ☑ Is Matrix listed and correct? (Yes) / No circle one
- ☑ Analyses listed are those we do or client has authorized a subcontract? (Yes) / No circle one
- ☑ Chain is signed and dated by both client and sample custodian? (Yes) / No circle one
- ☑ TAT requested available? Approved by EK

Review Coolers: NOT Iced
- ☑ Were Coolers temperatures measured at ≤6°C? Cooler # — Temp 18.8°C
  - If cooler is outside the ≤6°C; note down below the affected bottles in that cooler
  - Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)
- ☑ Shipment Method Walk In Chysert Environmental
- ☑ Custody Seals: Present : Yes / (No) circle one Unbroken: (Yes) / No circle one

Review of Sample Bottles: If you answer no, explain below
- ☑ Sample ID / bottle number / Date / Time of bottle labels match the COC? (Yes) / No circle one
- ☑ Sample bottle intact? (Yes) / No circle one
- ☑ Is there enough samples for requested analyses? If so, were samples placed in proper containers? (Yes) / No circle one
- ☑ Proper Preservatives? Check pH ✓ on preserved samples except 1664, 625, 8270 and VOAs and list below (2) HNO_3
- ☐ Are VOAs received without headspace? Size of bubble (not greater than 6mm in diameter) Yes / No circle one N/A
  List sample ID and affected container

Lab #	Client Sample ID	pH Check	Other Comments/Issues
-1	PERMIT 722	pH < 2	250mL Poly (2) HNO_3 MET (200.7)

Non-Compliance issues and discrepancies on the COC are forwarded to Project Management

STANDARD OPERATING PROCEDURE

Sample Receiving Checklist

Job # C4347
Sample Control Initial EK

Review Chain of Custody The Chain of Custody is to be completely and legibly filled out by Client.
☑ Are these regulatory (NPDES) samples? Yes / (No) circle one
☑ Is pH requested? Yes / (No) circle one ☐ Was Client informed that hold time is 15 min? Yes / No circle one
If yes, did Client consent to continue? ____
☑ Are sample within hold time? (Yes) / No circle one Are sample in danger of exceeding its hold-time within 6-48 hours?
☑ Report to info is complete and legible, including;
☑ Type of deliverable needed ☑ Name ☑ Address ☑ phone ☑ e-mail ON FILE
☐ Bill to info is complete and legible, including; ☐ PO# ☐ Credit card ☐ Contact ☐address ☐ phone ☐ e-mail
☑ Contact and/or Project Manager identified, including; ☑ phone ☑ e-mail
☑ Project name / number ☐ Special requirements? (Yes) / No circle one
☑ Sample IDs / date & time of collection provided? (Yes) / No circle one
☑ Is Matrix listed and correct? (Yes) / No circle one
☑ Analyses listed are those we do or client has authorized a subcontract? (Yes) / No circle one
☑ Chain is signed and dated by both client and sample custodian? (Yes) / No circle one
☑ TAT requested available? Approved by EK
Review Coolers:
☑ Were Coolers temperatures measured at ≤6°C? (Yes) Cooler # 1 Temp 4.1 °C
- If cooler is outside the ≤6°C; note down below the affected bottles in that cooler
- Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)

☑ Shipment Method walk In (Desert Environmental)
☑ Custody Seals: Present : Yes / (No) circle one Unbroken: (Yes) / No circle one
Review of Sample Bottles: If you answer no, explain below
☑ Sample ID / bottle number / Date / Time of bottle labels match the COC? (Yes) / No circle one
☑ Sample bottle intact? (Yes) / No circle one
☑ Is there enough samples for requested analyses? If so, were samples placed in proper containers? (Yes) / No circle one
☑ Proper Preservatives? Check pH on preserved samples except 1664, 625, 8270 and VOAs and list below
☐ Are VOAs received without headspace? Size of bubble (not greater than 6mm in diameter) Yes / No circle one N/A
List sample ID and affected container

Lab #	Client Sample ID	pH Check	Other Comments/Issues
-1	Permit 722	pH < 2	RSCML perf (soluble) metals:
			CITY OF MOUNTAIN VIEW FIRE Dept.
			"PERMIT SAMPLES"

Non-Compliance issues and discrepancies on the COC are forwarded to Project Management

  - Type of Deliverable needed name address phone email
- Bill to info is complete and legible, including: PO# ☐ Credit card contact address phone email
- Contact and/or Project Mgr identified, including; phone email
- Project name / number ☐ Special requirements? (Yes) / No circle one
- Sample IDs / date & time of collection provided? (Yes) / No circle one
- Matrix listed and correct? (Yes) / No circle one
- Analyses listed are those we do or client has authorized a subcontract? (Yes) / No circle one
- Chain is signed / dated by both client and sample custodian? (Yes) / No circle one
- TAT requested available? Approved by ELK

Review Coolers:

- Samples / Coolers are at 0-6°C? 3.2°C If sampled within 4hrs, then "on ice" is acceptable.

If a cooler is outside the 0-6°C range; note below the bottles in that cooler below.

Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)

Shipment Method: AC

Custody Seals Present: Yes / (No) circle one Un-broken: Yes / No circle one

Review of Sample Bottles: If you answer no, explain below

- IDs / bottle number / Date / Time of bottle labels match CoC?
- Sample bottle intact? (Yes) / No circle one
- Proper containers and volumes? (Yes) / No circle one
- Proper preservatives? Check pH on preserved samples except 1664, 625, 8270, and VOAs and list below.
- ☐ VOAs received without headspace? Yes / No circle one N/A

Lab #	Client Sample ID	pH Check:	Other Comments / Issues
-1	Permit 722	pH<2	250mL poly (w/HNO3) -> metals

C2953: Chain of Custody

Sample Receiving Checklist

Job # C1989

Review Chain of Custody: The Chain of Custody is to be completely and legibly filled out by Client.

- ☐ Are these regulatory (NPDES) samples? Yes / (No) circle one ☐ Is pH requested? Yes / (No) circle one
- ☐ Was Client informed that the hold time is 15mins Yes / No circle one If yes, did they consent to continue? _____
- ☐ Are sample within one-half hold-time? Yes / No circle one If no, was the lab informed? _____
- Yes Report to Info is complete and legible, including:
  - ☒ Type of Deliverable needed ☒ name ☒ address ☒ phone ☒ email
- ☐ Bill to Info is complete and legible, including: ☐ PO# ☐ Credit card ☐ contact ☐ address ☐ phone ☐ email
- ☑ Contact and/or Project Mgr identified, including: ☒ phone ☒ email
- ☑ Project name / number ☐ Special requirements? (Yes) / No circle one
- ☑ Sample IDs / date & time of collection provided? (Yes) / No circle one
- ☑ Matrix listed and correct? (Yes) / No circle one
- ☑ Analyses listed are those we do or client has authorized a subcontract? (Yes) / No circle one
- ☑ Chain is signed / dated by both client and sample custodian? (Yes) / No circle one
- ☑ TAT requested available? Approved by ELK

Review Coolers:

- ☒ Samples / Coolers are at 0-6°C? 5.6 °C If sampled within 4hrs, then "on ice" is acceptable.

If a cooler is outside the 0-6°C range; note below the bottles in that cooler below.
Note that ANC does NOT accept evidentiary samples. (We do not lock refrigerators)

Shipment Method: AC

Custody Seals Present Yes / (No) circle one Un-broken: Yes / No circle one

Review of Sample Bottles: If you answer no, explain below

- ☑ IDs / bottle number / Date / Time of bottle labels match CoC?
- ☑ Sample bottle intact? (Yes) / No circle one
- ☑ Proper containers and volumes? (Yes) / No circle one
- ☑ Proper preservatives? Check pH on preserved samples except 1664, 625, 8270, and VOAs and list below.
- ☐ VOAs received without headspace? Yes / No circle one N/A

Lab #	Client Sample ID	pH Checks	Other Comments / Issues
-1	Permit 122	pH<2	250mL poly (1:1) HNO_3

Certificate of Analysis - Final Report

On April 21, 2008, a sample was received under chain of custody for analysis.
Entech analyzes samples "as received" unless otherwise noted. The following results are included:

Matrix	Test / Comments
Liquid	Metals by ICP: EPA 3010A / EPA 6010B for Groundwater and Water - EPA 200.7 for Wastewater

Entech Analytical Labs, Inc. is certified for environmental analyses by the State of California (#2346).
Subcontracted work is the responsibility of the subcontract laboratory, this includes turn-around-time and data quality.
If you have any questions regarding this report, please call us at [redacted]

Sincerely,

Laurie Glantz-Murphy
Laboratory Director

Tank Monitoring: Option #9

I. Describe Monitoring Requirements:

1) Tanks and Piping: Continuous Aspirated Vapor Monitoring Using Azonic Enviro-Ranger 12-Port System

2)

II. Well Characteristics:

Well No.	GWater/ Vapor	Backfill/ Native	Well Depth	Relative Distances
Mw-00	Vapor	Native	N/A	33'from Unleaded Tank
MW-1	Vapor	Backfill		0-5'from Diesel Tank
MW 2	Vapor	Backfill	11'6"	0-5'from Unleaded Tank
MW 3	Vapor	Backfill	11'	0-5'from Regular Tank
MW 4	Vapor	Backfill	8'6"	0-5'from Regular Tank
MW 5	Vapor	Backfill		Adjacent to Dispenser

III. Tank Characteristics

Tank No.	Product	Size	Single/ Double Wall	Construction Type	Overspill Size	Cathodic Protect?	Inst. Date
1	Diesel	10K	Single	Steel	Grout Seal	No	
2	Regular	4K	Single	Steel	Grout Seal	No	
3	Unleaded	4K	Single	Steel	Grout Seal	No	
4							
5							
6							
7							
8							

IV. Monitoring Characteristics

1) Device Brand Name: Azonic Enviro-Ranger 12-Port System

2) Principle of Detection: MOS Vapor Sensor with Diaphragm Pump

3) Static or Aspirated? Aspirated

Alarm or Alarm and Memory or No Alarm? Alarm and Memory

Periodic or Continuous? Continuous

4) Date of Installation: 12/87

5) Initial Alarm Set Points: 2000 ppm

6) Vapor Probe Calibrated to What Chemical? Isobutane

7) Calibration Frequency: Annually

8) Calibrated to What Concentration? 1000 ppm Isobutane

9) Calibrated By: M.V. Fire Dept.

10) Background Soil Analysis: None Performed

SUBJECT: TANK MONITORING PLANS FOR 824 San Rafael
PC # 881606

Plans APPROVED, Subject to following conditions:

1) Sumps will be covered and product-tight;

2) A new site map showing probe #'s and well depths will be submitted after installation is completed;

3) The remaining tanks will be precision-tested (if not already done so) and results submitted to us prior to installation

FIRE DEPARTMENT
CITY OF MOUNTAIN VIEW
1000 Villa Street
Mountain View, CA 94041
ATTN: Chris Steck

Dear Chris,

The technical approach for El Camino paving re-installation of ER-1200 and Double-wall piping.

1. Testing procedure on sumps and piping will be as follows:

   Primary product piping will be pressure tested per requirements to be witnessed by Mountain View Fire Department. Upon successful completion of test, secondary containment piping will be tested in the presence of Mountain View Fire Department. Additionally, piping sumps will be water tested concurrently with the secondary piping test. Upon successful completion of tests, monitoring system will be re-installed.

2. Re-installation of monitoring system and sump monitoring will be as follows:

   Aspirated vapor system will be re-installed per manufacturers specifications and per illustrations (attached). Piping sumps to be monitored via the use of probes installed at each sump termination. Overspill protection will be installed (OPW 15 gallon) so as to eliminate alarms from surface fill contamination.

Thank you.

Sincerely,

Kevin Krause
Tank Management Consultant

CERTIFICATION BY WELL OWNER/AGENT AND DRILLER/AGENT:

I certify that the information given above is correct to the best of my knowledge. I certify that the well will be constructed in compliance with the conditions of this permit, the Santa Clara Valley Water District's Ordinance 75-6 and, if applicable, the Hazardous Materials Storage Permit Ordinance of the County or City, as appropriate. It is my responsibility as the well owner to notify this District of any changes in the purpose of this well from that which is indicated on this application form.

Signature of Well Owner/Agent ____ Date ____

Signature of Driller/Agent ____ Date ____

MONITORING WELL PLAN APPROVAL

City/County: MTN. VIEW

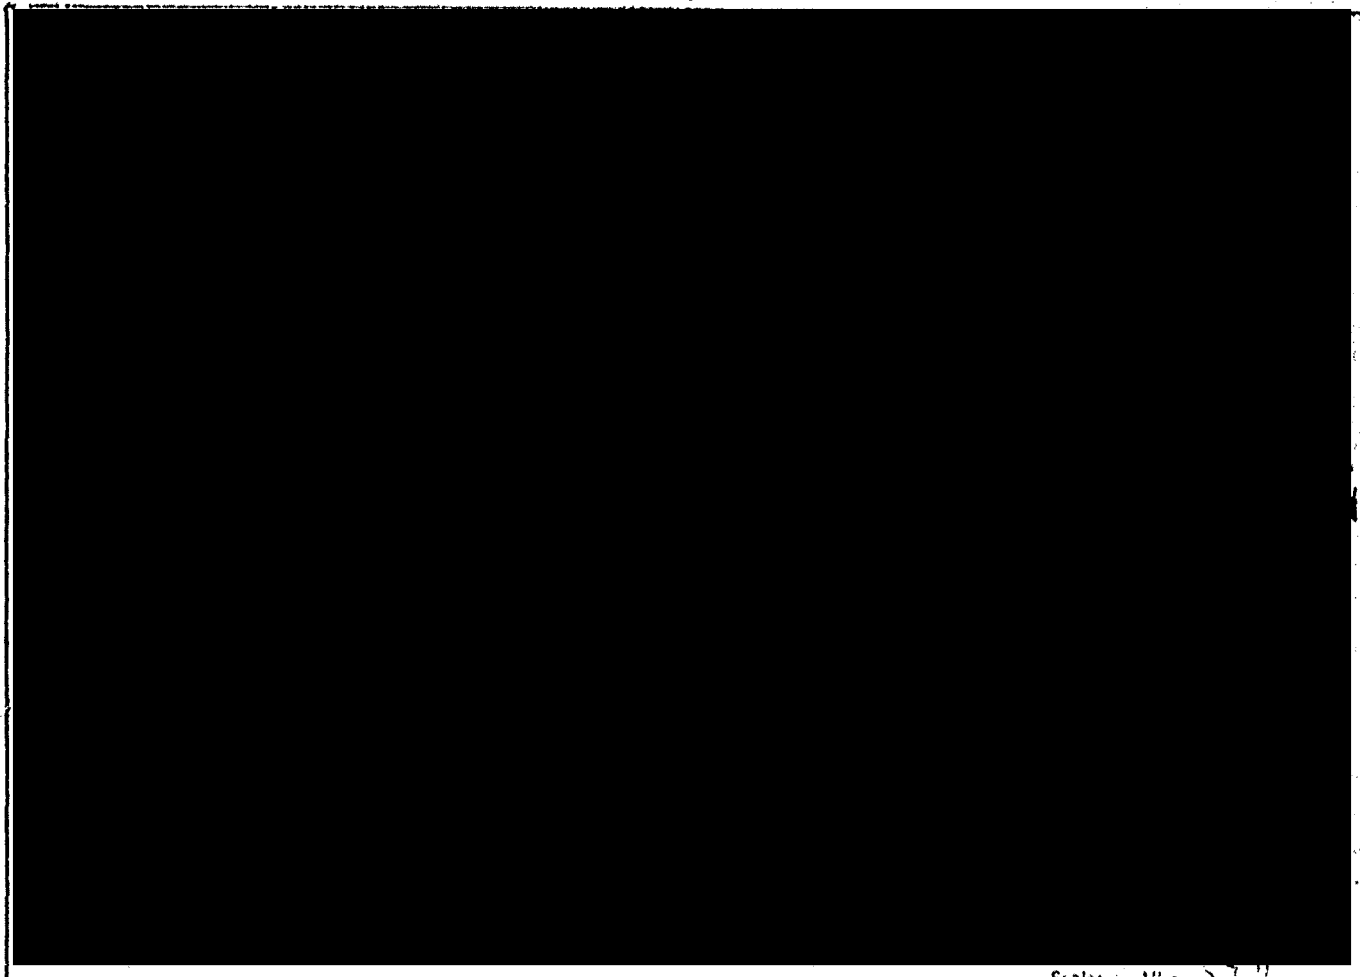
Approved by: K. Daly

Date: 6-9-86

IMPORTANT: A minimum 24-hour notice must be given to SCVWD Inspection Dept. prior to installing the annular seal. [redacted]

 DISTRICT WELL PE[redacted]Y NO.: _____ WELL C[redacted]STRUCTION APPLICATION

Based on information on the application and attachment(s) hereto (if any) and subject to approval noted below, permission is hereby granted to construct (drill) the described well. Permission to start may be withheld until a field check verifies all statements made on application by Permittee and is also subject to the "General" and "Special" Conditions stated below.



Scale: 1" = [redacted]

GENERAL CONDITIONS:

A. Construction under this Permit is subject to any instructions by District representative relative to the "Standards for the Construction of Wells in Santa Clara County".

B. Permit may be voided before work begins if field check reveals any misrepresentation under "well location" or "Topographic Features" on application.

C. This Permit is valid only for the purpose specified herein. No change in construction procedure as prescribed on attached Standards and in Special Conditions below will be allowed except upon written permission of the District.

D. Permittee shall assume entire responsibility for all activities and uses under this Permit and shall indemnify, defend and save the District, its officers, agents and employees free and harmless from any and all expense, cost or liability in connection with or resulting from the exercise of this Permit including, but not limited to property damage, personal injury and wrongful death.

E. Compliance with "CAL/OSHA", California Labor Code Section 6300 (and following) is required.

F. Water quality and production from all wells to be used for public water supply must be approved by the County Environmental Health Services.

G. Permit will be automatically cancelled if not exercised or if extension is not requested by Permittee within 90 calendar days of above date.

H. Driller is to complete State DWR Form 188 and mail original to Santa Clara Valley Water District within 7 days of completion of well construction.

I. For the construction of water producing wells, a Permittee must be a licensed water well drilling contractor unless the work is to be done by the landowner or employees of the landowner. (See Business & Professions Code § 7026.3, 7028).

J. For monitoring wells refer SCVWD Groundwater Monitoring Guideline Dec. 1983, p. 17, for licensing requirements. Dry holes shall be back-filled within one week of drilling. Backfilling shall be done in accordance with District Standards.

K Each well requires a separate Well Construction Application, and permit.

El Camino Paving 6/24/88

1) Vapor Probe ALARM (#4) on 6/24, noticed & reported on 6/27. Small crack in piping below dispenser was discovered.

2) 6/27 - 7/1 Dirt & pea gravel around leak removed.

3) 7/6 Met Doug Coker on site. Probe #3 & 5 are now also in alarm. Unit placed in Print Run mode. Appears contamination has spread parallel to dispenser island toward probe #3. El Camino Paving to cut additional concrete, expose, & remove additional pea gravel/dirt. We will monitor vapor levels.

4) 7/11: Charlie TOUAR SAID HE MAY REPLACE ALL PRODUCT LINES. TOLD HIM THAT NEW LINES MUST BE SECONDARILY CONTAINED; SHOULD SUBMIT PLANS BEFORE HE DOES WORK.

5) 7/14: More dirt removed toward well #2. Tankpad being exposed. Hwy has self made overfills. Suggested that they precision test new lines (and tank if curious). Tanks are 4 years old. Petroleum Engineering to do new lines.

6) 7/19 Dropped off Tankremoval permit for 4K Tank. Monitoring now disconnected.

7) 7/27 (408) 729-4990
Kevin Krause/Azonic called to announce proposal. Will excavate around tanks, Tanks to be steamed up, lines to be replaced. Will call us to inspect

8) Called 7/29/88 Still working on quote

9) 8/9/88 Kevin Krause/Azonic to do tankremoval and reinstall lines; will deliver permit forms today. Est removal 8/17/88

OPTION #9

1) Is system functioning? Yes

2) Is system in alarm mode? No

3) Is alarm status checked daily and a log kept of the results? No

I. Genelco/Azonic 4-Probe Aspirated System

1) If system is in alarm, press "Reset" button and count the number of tones.
List alarm conditions: _____

2) Determine system status by removing cover, powering down and powering up again. List all information below:

Port #/Low Alarm Level: #1/_____ #2/_____ #3/_____ #4/_____

Port #/Extreme Alarm Level: #1/_____ #2/_____ #3/_____ #4/_____

Number of Records: _____

Date of Last Access: _____

3) Perform data dump. Start Date: _____ End Date: _____

4) Has system been functional since last inspection? _____
If not, specify reason and dates for alarms:

Probe No.	Date From ,,.To	Reason (Vapor,Power,etc)

1 Green
2 Yellow
3 Orange
4 Red
5 Blue

5) Check alarm thresholds. Are they set appropriately? _____

II. Genelco/Azonic 12-Port Aspirated System

IF SYSTEM IS IN ALARM, PROCEED DIRECTLY TO STEP #9.

1) Determine current vapor levels by pressing "Set" button, and after "Set Mode" is printed, press "Test 3". After this has been printed, enter the two digit probe number.

Port Number/Vapor Level: #1/ 37 #2/ 50 #3/ 85 #4/ 85

#5/ 59 #6/_____ #7/_____ #8/_____ #9/_____ #10/_____

#11/_____ #12/_____

When finished, press "Set", wait for the printer to show "Test 3", and press "Set" again. The printer should display "Set Mode".

2) Determine alarm level settings by pressing the "Set" key, followed by the "Enter" key. List information below:

Port Number/Alarm Level: #1/ 8000 #2/ 8000 #3/ 8000 #4 8000

#5/ 8000 #6/_____ #7/_____ #8/_____ #9/_____ #10/_____

#11/_____ #12/_____

3) Obtain copy of daily vapor level printout from facility operator.
Start Date: N/A End Date: _____

4) Has system been functional since last inspection? YES
If not, specify reason and dates for alarms:

Probe No.	Date From...To	Reason (Vapor, Power, etc)

5) Check alarm thresholds. Are they set appropriately? No - will have
lower to 2000ppm - done 4/1/88

6) Check alarm operation. (If system was in alarm initially, this need not be repeated). Press "Set" button, and after "Set Mode" appears, press "Test 0".
Is alarm in working condition? YES
Clear the alarm by pressing the "Set" key, and after "Set Mode" appears, press "Clear Alarm" key and "Enter" key.

7) Check self-diagnostics. (If system was in alarm initially, this need not be repeated). Press "Set" button, and after "Set Mode" appears, press "Test 6". If system diagnostics are acceptable, the words "Test Complete" will print within 2 minutes.
Do self-diagnostics show acceptable operation? YES

8) Check sensor callibration by first placing unit into "Print & Run" mode. Next, press "Set" key, and after "Set Mode" appears, press "Test 6". The printed "Set Number" should be within the 25-45 range.
Do probes show acceptable callibration? YES
Turn "Print & Run" mode OFF.

9) IF SYSTEM IS IN ALARM, PROCEED AS FOLLOWS:

A) Press "Set" button, and after "Set Mode" appears, press "Clear Alarm" and "Enter" button. The words "Alarm Clear" should be displayed.

B) Press "Set" button, and after "Set Mode" appears, press "Test 3". Press "13" (for port 13). Within 5 minutes, a printout of "garbage" should be displayed.

C) Press "Set" button, and after "Set Mode" appears, press "Test 6". If system diagnostics and background well are acceptable, the words "Test Complete" will print within 2 minutes.
Do self-diagnsotics show acceptable operation?_____
If so, proceed to STEP 1.

If not, stop trouble-shooting and call for service.

III. All Systems

1) Current vapor readings:

Well No.	Reading	Well No.	Reading

Mountain View, CA 94043

Dear Mr. Johnson:

On February 19, 1987, I inspected your facility for compliance with the underground tank monitoring requirements of the Hazardous Materials Storage Ordinance (Chapter 24, MVMC).

This letter is to confirm that continuous monitoring is now being performed at El Camino Paving at 924 San Rafael, Mountain View, and that this does meet the monitoring requirements.

During the course of monitoring, if a leak is found, our office should be contacted immediately. Also, when Azonic removes the tape from the unit, please forward a copy to us.

If you have any questions, feel free to call me at (415) 966-6378. Thank you for your cooperation.

Sincerely,

Gary Leinweber

UNDERGROUND TANK VIOLATIONS AT 924 SAN RAFAEL, MOUNTAIN VIEW

Dear Mr. Alva:

The Mountain View Fire Department has informed this office that this location has underground tanks which are not being monitored at the present time, and no removal plans have been submitted. It has requested that this office file a criminal complaint against you for the following violations of the Mountain View Municipal Code:

Section 24.3 of the Municipal Code requires a hazardous material storage permit.

Section 24.10 requires monitoring of underground tanks.

The violation of these sections has specifically been made a criminal offense which could result in your arrest, conviction and imprisonment for up to six months in jail, along with a $500 fine. Additionally, you could be found guilty of a separate offense for each day that these violations have been committed or permitted. Further injunctive action could be filed to prohibit continued or further use of underground tanks. If this matter is not corrected by you on or before 15 days from the date of this letter, this office will file a criminal complaint against you. If you wish to avoid such harsh criminal penalties, please comply immediately.

I sincerely hope that legal action against you may be avoided. If improvements are not made to install the appropriate monitoring systems, the tanks will have to be emptied and removed in accordance with local regulations. A closure plan must be filed

and approved by the Mountain View Fire Department, Hazardous Materials Section. If you have any questions concerning this matter, please do not hesitate to call this office or the Mountain View Fire Department at (415) 966-6378 at your earliest convenience.

Very truly yours,

Peter D. Bulens
City Attorney

HAZARDOUS MATERIALS STORAGE PERMIT

Mr. Bryan Hackett
Hackett Construction
924 San Rafael Ave
Mountain View, CA 94043

PROVISIONAL PERMIT TO STORE HAZARDOUS MATERIALS AT
924 San Rafael Ave

This signed and dated letter is to be used as a Provisional Permit to Store Hazardous Materials, pursuant to the Mountain View Municipal Code, Chapter 24, Section 24.37. This Provisional Permit evidences that the firm or corporation named above has paid the applicable fees and is authorized to store hazardous materials at the facility indicated above in accordance with Chapter 24 of the Mountain View Municipal Code (MVMC). This Provisional Permit covers the use and operation of underground storage tank(s) that DO NOT have a MONITORING SYSTEM meeting the requirements of the MVMC.

Once in compliance with the MVMC, facilities with underground storage tank(s) will be issued Full Term Permits. Full Term Permits are to be renewed annually. THIS PROVISIONAL PERMIT IS VALID UNTIL SEPTEMBER 30, 1986. After said date, owners of underground storage tank(s) that are NOT in compliance with the MVMC will discontinue the use and remove the tank(s).

Kenneth R. Daly, Inspector
Hazardous Materials Division

CERTIFICATES OF DISPOSAL

August 25, 1988

H & H Ship Service Company certifies to AZONIC TECHNOLOGY that:

1. The storage tank(s), size(s) One (1) 4,000 Gals.

   removed from the EL CAMINO PAVING COMPANY

   facility at 924 San Rafael

   Mountain View, California

   were transported to H & H Ship Service Company, 220 China Basin Street, San Francisco, California 94107.

2. The following tank(s), H & H Job Number: 8575 have been steamed cleaned, cut with approximately 2' X 2' holes, rendered harmless and disposed of as scrap metal.

3. Disposal site: Levin Metals Corporation, Richmond, California.

4. The foregoing method of destruction/disposal is suitable for the materials involved, and fully complies with all applicable regulatory and permit requirements.

5. Should you require further information, please contact (415) 543-4835.

Very Truly Yours,

Cleveland Varrey
Q.A. & Safety Coordinator

August 24, 1988
Work Order Number 8808181
Date Received 08/22/88
Proj. No. EL CAMINO PAVING

Dear Mr. Krause:

Three soil samples were received for analysis of BTEX plus total hydrocarbons as gasoline and diesel by gas chromatography, using the following EPA method(s):

ANAMETRIX I.D.	SAMPLE I.D.	METHOD(S)
8808181-01	EL CAMINO PAVING S-1	8015/8020
-02	" S-2	"
-03	" S-3(COMP.)	"

RESULTS

See enclosed data sheets, Pages 2 thru 4.

If there is any more that we can do, please give us a call. Thank you for using ANAMETRIX, INC.

Sincerely,

Sarah Schoen

PERMIT CONDITIONS/PROCEDURES

I. TANK PREPARATION PROCEDURES

1. An inspection must be completed by the Fire Department before the tank(s) may be removed from the excavation. Appointments must be made 48 hours in advance. Call (415) 966-6378 to arrange for an inspection appointment. The Demolition Permit must be displayed at the job site.

2. Arrange for a **State Certified** laboratory to analyze the required soil sample(s) and for sampling by a qualified independent third party.

3. Tank(s) shall be emptied of all liquid product.

4. Render tank(s) inert with a minimum 15 pounds of dry ice per each 1,000 gallons of tank volume. Tank oxygen level must be reduced to less than 10 percent. Keep the dry ice sales receipts available at the tank site for the Inspector to review.

5. Cap all tank(s) opening(s) except for vent pipe(s) and allow a minimum 2 hours for oxygen displacement. Excavation and pipe removal may proceed during this period, but the tank(s) CANNOT be removed from the excavation.

6. Begin excavation to expose tank and pipelines for removal.

7. Remove all pipelines at the tank and cap or plug each tank opening immediately after the pipeline is disconnected. Leave a 1/8" to 3/8" pressure relief hole at the top of the tank for carbon dioxide venting.

8. After the 2-hour period for oxygen displacement has passed, call (415) 966-6378 for an inspection by the Fire Department.

II. REMOVAL PROCEDURES

1. Tank removal may commence only after the Fire Department Inspector has given his approval.

2. Remove the tank(s) from the excavation and load on a vehicle(s). Position the tank(s) so the pressure relief hole is close to the top of the tank.

3. Check tank(s) for leaks or holes, and if present, seal immediately.

4. Properly transport the tank(s) outside of the City limits to the designated location:

   a. If tanks ARE NOT cleaned on-site, only a licensed Hazardous Waste hauler can transport them away from the site. Make sure the tank transporter has a Transporter EPA ID Number. The tank must be taken to a licensed Treatment, Storage, and Disposal (TSD) Facility.

   b. If tanks ARE cleaned on-site, the <u>cleaning effluent</u> can only be transported by a licensed Hazardous Waste Hauler. Make sure the effluent transporter has a Transporter EPA ID Number. The effluent must be taken to a licensed Treatment, Storage, and Disposal (TSD) Facility. In this case, the <u>tank</u> transporter need not be a Hazardous Waste hauler.

   c. In either case, the shipper (i.e. tank owner) must complete a Hazardous Waste Manifest to transport the tank or effluent. The manifest must be used instead of the standard Bill of Lading document.

5. Have the soil sample(s) taken and analyzed as required below.

6. Secure the area around the tank excavation site until soil analyses are complete. At that time, the FIRE DEPARTMENT will notify you as to whether the excavation may be backfilled or further soil removal will be required.

7. Have the monitoring well(s) destroyed as required. When an abandoned well is destroyed, a permit from SCVWD is required.

8. An additional $40 per hour will be charged for inspection time exceeding the allowable time specified in the Demolition Permit (job card).

(The following sections are to be completed by the Fire Department)

III. SOIL SAMPLING PROCEDURES

1. A minimum of 2 representative soil samples shall be taken from the area beneath the tank(s). (2 per tank). Additional samples: 1 sample per 20ft PRODUCTLINE.

2. All soil sampling shall be completed by a qualified independent third party to include delivery of the samples to a State Certified laboratory. A CHAIN OF CUSTODY <u>MUST</u> be maintained throughout the sample transfer process.

3. Soil samples MAY NOT be composited by the laboratory and analyzed together.

4. Testing of samples shall employ EPA standard procedures in all appropriate cases.

5. Laboratory test analysis shall test for:

   X GC scan for Total Petroleum Hydrocarbons (Gasoline), and BTX (analyzed individually)

   X GC scan for Total Petroleum Hydrocarbons (Diesel), and BTX (analyzed individually)

   _____ GC scan for Total Oil and Grease, Total Petroleum Hydrocarbons (High Boiling Hydrocarbons), Volatile Organic Compounds (EPA 8240 or 8010 and 8020 with ten largest peaks identified).

   _____ GC scan for Solvents: _____

   _____ pH, Heavy Metals: _____

   _____ _____

6. A site drawing showing tank and sampling locations must be included in all submitted laboratory analysis so that sampling results can be traced directly to a specific sampling location.

7. **The applicant shall have a copy of ALL LABORATORY TEST RESULTS, CHAIN OF CUSTODY RECORD, AND SITE MAP OF SAMPLING LOCATIONS mailed DIRECTLY to:**

   Mountain View Fire Department
   Hazardous Materials Section
   1000 Villa Street
   Mountain View, CA 94041

   Underground tank removals are not considered complete unless we receive a hard copy of all items listed above.

   IF CONTAMINATION IS FOUND, A CLEAN-UP PROPOSAL MUST BE SUBMITTED TO OUR OFFICE WITHIN 10 DAYS OF RECEIPT OF ANALYSIS.

8. Samples shall be taken only by the modified California sampler technique.

CONTAMINATION AT 924 SAN RAFAEL AVE, MOUNTAIN VIEW

Dear Mr. Alva:

We have been notified of soil contamination at your facility on 924 San Rafael Ave, Mountain View.

The Fire Department has notified the Regional Water Quality Control Board of the contamination. This letter is to inform you of your reporting requirements as a responsible party per the California Regional Water Quality Control Board "Guidelines For Addressing Fuel Leaks".

For any fuel leak notification received, the owner and/or operator should be notified of their responsibility to provide immediate written notification to the Regional Board (California Water Code, Sections 13271 and 13272). This notification should be in the form of a letter, signed by the owner or a responsible corporate official. The letter should describe the available evidence indicating that a discharge has occurred, all steps that have been taken to locate and eliminate the source of discharge, and any immediate remedial actions that have been taken.

The initial report should be followed within thirty days, by a more complete report containing drawings and descriptions of excavation, soil sampling, and any additional soil borings and monitoring well construction, and the results of associated soil and groundwater analysis. This report should include a proposal for any necessary additional remedial actions (such as additional excavation or removal of free product from groundwater), along with a time schedule for their implementation.

The performance, interpretation, and reporting of the initial investigation require professional judgements and important field decisions. Therefore the owner/ operator is responsible for the enlistment of a qualified professional to assume the technical responsibility for performance. For the purposes of the guidelines the overall technical responsibility for performance, interpretation, and report preparation is to be assumed by a State Certified Engineering Geologist or a State Registered Civil Engineer.

Subject: Excavated Soil and Soil Sampling
El Camino Paving, Inc.
924 San Rafael Avenue
Mountain View, CA
[ATT Job #9021]

Dear Mr. Tovar:

Aqua Terra Technologies, Inc. (ATT) is pleased to submit the results of our soil investigation for the property at 924 San Rafael Avenue, Mountain View, CA.

Aqua Terra Technologies
Consulting Engineers
& Scientists

The objective of the project was to excavate additional diesel contaminated soil in areas where soil samples taken on March 28, 1989, indicated diesel concentrations exceeding agency guidelines. Four additional soil samples were collected on May 11, 1989, after the diesel contaminated soil was removed. Field investigation reports, sample analytical results, and copies of the appropriate hazardous waste manifests for the March 28, and May 11, 1989, soil samples are attached.

SITE SETTING

The site is zoned as general industrial (MM) and borders a residential area (Plate 1, Attachment A). The property currently contains a one-story office building, garage, and an asphalt paved parking area. The surrounding area includes small commercial businesses and residential dwellings.

In general, the site is underlain at the surface by a layer of clayey and silty soils with sandy lenses. The geologic description was obtained from a visual inspection of the 14 feet deep excavation walls. The groundwater interface is exposed at the bottom of the pit. Groundwater flow direction during March 28, 1989, using water level data from monitoring wells MW4, MW5, and MW6, was estimated to be approximately in a northeast direction.

PROJECT HISTORY

During June 1988 the structural integrity of piping which transports diesel fuel between one of three underground diesel tanks and a pump island was

compromised due to an onsite accident. The failed piping caused leakage of over 400 gallons of diesel from The tank to occur. This leaking necessitated the removal of all three underground tanks (Plate 2, Attachment A).

On August 19, 1988, Azonic Technology, Inc. removed the center tank, and installed a recovery sump which recovered 400 gallons of diesel fuel. The remaining two tanks were removed on October 18, 1988, and three monitoring wells, MW4, MW5, and MW6, were installed the following day (Plate 3, Attachment A). Monitoring Wells MW1, MW2, and MW3, located 40 feet north of the excavation, were installed at the site prior to the excavation. A recovery pump and tank were installed on October 28, 1988, to remove the floating product found in the monitoring wells. The recovery pump and tank were leased to El Camino Paving on a monthly basis. The diesel contaminated soil excavated from the pit was disposed at a Class I hazardous waste landfill on November 21, 1988.

SITE INVESTIGATION

To delineate the extent of diesel saturated soil along the walls of the excavation, ATT collected eight soil samples on March 28, 1989 (Attachment B).

On May 11, 1989, ATT supervised the excavation of additional soil and the collection of four soil samples. Soil was excavated to a specified distance from the edge of the pit: six feet at the southeastern corner, three feet at the southwestern corner, three feet along the eastern edges of the pit, and five feet at the center of the northern side of the pit (Plate 2, Attachment A). Soil samples were collected from the backhoe bucket using two inch diameter by six inch long brass tubes which were pounded into the excavated soil. This was done in lieu of samples taken directly from the pit because of the hazard of personnel entering an unshored open pit. Sample results are summarized in Table 2 (Attachment C).

All soil samples were submitted to a California Department of Health Services (DHS) certified laboratory. Samples were analyzed using EPA Method 8015 for total petroleum hydrocarbons (TPH) as diesel and waste oil. Laboratory analyses are summarized in Table 1, Attachment C. Certified laboratory sheets and

accompanying chain of custody forms are included in Attachment D.

RESULTS

Laboratory analyses for the soil samples collected on March 28, 1989, showed that no detectable quantities of TPH diesel and waste oil were found for soil samples along the western side of the excavation. At the request of El Camino Paving, Inc., additional soil was excavated to a depth of 14 feet and transported to the contaminated soil pile located onsite, 20 feet west of the excavation.

Soil sample SSA-10 was collected at a depth of 10.0 feet below grade. Sample results show no detectable TPH diesel or waste oil. Soil sample SSB-8, collected at a depth of 8.0 feet, contained the TPH diesel at a concentration of 470 mg/Kg but did not contain TPH waste oil at concentrations above instrument detection limits. Soil sample SSC-8 was taken at a depth of 8.0 feet below grade. TPH diesel and waste oil concentrations were both below instrument detection limits. Soil sample SSD-9 was collected at a depth of 9.0 feet. The TPH diesel concentration was 280 mg/Kg and the waste oil concentration was below instrument detection limits.

SUMMARY AND CONCLUSION

Analytical results show a TPH diesel concentration of 470 mg/Kg for sample SSB-8 and a TPH concentration of 280 mg/Kg for sample SSD-9. Sample SSB-8 was collected from the south wall of the excavation which is currently eight feet north of the garage building. Further excavation could adversely affect the stability of the foundation of the garage building; therefore, no further excavation should be attempted and the pit should be backfilled using appropriate backfill procedures. Before backfilling procedures can be implemented local agency approval is required. Once backfilling has been approved the local agency should be notified of backfill dates, data and procedures.

The stockpiled soil containing TPH diesel must remain onsite pending completion of the bioreclamation process to be initiated after the excavation has been backfilled. A bioreclamation plan has been submitted

and approved by Don Marchant of Petroleum Engineering, Inc. Once the bioreclamation process is completed, El Camino Paving, Inc. may dispose of the material, in an appropriate manner.

If you have any questions or comments concerning this report, please do not hesitate to contact us.

Sincerely,

AQUA TERRA TECHNOLOGIES, INC.

Soil and Groundwater Sample Collection & Handling Protocol

ATTACHMENT B

SOIL & GROUNDWATER SAMPLE
COLLECTION & HANDLING PROTOCOL

INTRODUCTION & PURPOSE

Because reliable and representative test results must be generated from soil and groundwater samples, it is essential to establish a sampling procedure which assures that all samples are:

- Collected by approved and repeatable methods
- Representative of the materials(s) at the desired location and depth
- Uncontaminated by container and sampling equipment

The following sampling protocol was designed to be a guide to the sampling and handling procedures for soil and groundwater samples. Based on conditions which may be encountered in the field, some modifications to this protocol may be required to fit the needs of an individual site.

SAMPLING PROCEDURES

Groundwater Sampling

Prior to collecting groundwater samples, monitoring wells were purged by bailing until pH, conductivity, and temperature levels stabilize. Wells were purged and groundwater samples were obtained using a Teflon bailer and nylon rope. New nylon rope is used for each well.

The appropriate number of sample containers and type were used for each sample collected, in accordance with the analytical laboratory requirements and EPA protocol. The bottles were filled using the bailer. All sample bottles were pre-cleaned by the supplier according to EPA protocols.

To prevent cross contamination of groundwater samples by the sampling equipment, all equipment used in sampling was washed with a trisodium phosphate solution, triple rinsed with distilled water, and allowed to air dry prior to each use. A sample of the distilled water used

in the final rinse was retained for analysis as part of sample quality assurance.

Soil Sampling

After the soil sampler is driven to the desired depth and the samples are retrieved, each end of the ring containing the soil sample is retained for laboratory analysis was sealed with Teflon sheeting, covered with plastic end caps, and sealed with PVC tape. All sample containers (tubes and end caps) were steamed cleaned and air dried prior to use. The soil sample recovered in the ring just above the sample retained for chemical analysis was examined in the field for visual and olfactory indications of chemical contamination and used for lithologic description.

The Unified Soil Classification System (USCS) was used to log and describe the soil by the on-site geologist. These logs also include details of the sampling process such as depth, apparent odors, discoloration, and any other factors which may be required to evaluate the presence of contamination at the site.

POST SAMPLING PROCEDURES

One field/travel blank consisting of one sample bottle filled with distilled water accompanied soil and groundwater sample containers at all times, including during transport to and from the site. Distilled water field/travel blanks were analyzed according to the appropriate EPA Methods corresponding to the soil/groundwater sample analyses.

Sample containers were labeled with sample number, project number, date, and the initials of the person collecting the sample. A separate sample collection record was maintained for each groundwater sample collected.

Soil and groundwater samples collected were analyzed by an analytical laboratory certified by the California Department of Health Services (DHS) for complete chemical analysis of hazardous waste as well as drinking water samples. Quality assurance documentation accompanied all analytical reports generated by the laboratory.

The samples were placed in an ice cooler immediately following collection, and remained in the ice cooler until refrigerated at the analytical laboratory. The samples were delivered to the laboratory direct by

courier or overnight freight within 48 hours of time of collection. Appropriate chain of custody forms were used for all samples.

Work Order Number 8810135
Date Received 10/18/88
Site: El Camino Paving
924 San Rafael
Mountain View, CA

Dear Mr. Krause:

Three soil samples were received for analysis of BTEX plus total hydrocarbons as gasoline and diesel by gas chromatography, using the following EPA method(s):

ANAMETRIX I.D.	SAMPLE I.D.	METHOD(S)
8810135-01	EL CAMINO PAVING #1	TPH/BTEX
-02	" #2	"
-03	" #3	"

RESULTS

See enclosed data sheets, Pages 2 thru 4.

NOTE: Amounts reported are net values, i.e. corrected for method blank contamination.

If there is any more that we can do, please give us a call. Thank you for using ANAMETRIX, INC.

Sincerely,

Sarah Schoen

The following MUST BE completed by the laboratory accepting samples for analysis:

1) Have all samples received for analysis been stored in ice? yes Dry ice

2) Will all samples remain in ice until analyzed? yes

3) Did samples requiring volatile organic analysis have head space? No.

PERMIT CONDITIONS/PROCEDURES

I. TANK PREPARATION PROCEDURES

1. An inspection must be completed by the Fire Department before the tank(s) may be removed from the excavation. Appointments must be made 48 hours in advance. Call (415) 966-6378 to arrange for an inspection appointment. The Demolition Permit must be displayed at the job site.

2. Arrange for a **State Certified** laboratory to analyze the required soil sample(s) and for sampling by a qualified independent third party.

3. Tank(s) shall be emptied of all liquid product.

4. Render tank(s) inert with a minimum 15 pounds of dry ice per each 1,000 gallons of tank volume. Tank oxygen level must be reduced to less than 10 percent. Keep the dry ice sales receipts available at the tank site for the Inspector to review.

5. Cap all tank(s) opening(s) except for vent pipe(s) and allow a minimum 2 hours for oxygen displacement. Excavation and pipe removal may proceed during this period, but the tank(s) CANNOT be removed from the excavation.

6. Begin excavation to expose tank and pipelines for removal.

7. Remove all pipelines at the tank and cap or plug each tank opening immediately after the pipeline is disconnected. Leave a 1/8" to 3/8" pressure relief hole at the top of the tank for carbon dioxide venting.

8. After the 2-hour period for oxygen displacement has passed, call (415) 966-6378 for an inspection by the Fire Department.

II. REMOVAL PROCEDURES

1. Tank removal may commence only after the Fire Department Inspector has given his approval.

2. Remove the tank(s) from the excavation and load on a vehicle(s). Position the tank(s) so the pressure relief hole is close to the top of the tank.

3. Check tank(s) for leaks or holes, and if present, seal immediately.

4. Properly transport the tank(s) outside of the City limits to the designated location:

   a. If tanks ARE NOT cleaned on-site, only a licensed Hazardous Waste hauler can transport them away from the site. Make sure the tank transporter has a Transporter EPA ID Number. The tank must be taken to a licensed Treatment, Storage, and Disposal (TSD) Facility.

   b. If tanks ARE cleaned on-site, the cleaning effluent can only be transported by a licensed Hazardous Waste Hauler. Make sure the effluent transporter has a Transporter EPA ID Number. The effluent must be taken to a licensed Treatment, Storage, and Disposal (TSD) Facility. In this case, the tank transporter need not be a Hazardous Waste hauler.

   c. In either case, the shipper (i.e. tank owner) must complete a Hazardous Waste Manifest to transport the tank or effluent. The manifest must be used instead of the standard Bill of Lading document.

5. Have the soil sample(s) taken and analyzed as required below.

6. Secure the area around the tank excavation site until soil analyses are complete. At that time, the FIRE DEPARTMENT will notify you as to whether the excavation may be backfilled or further soil removal will be required.

7. Have the monitoring well(s) destroyed as required. When an abandoned well is destroyed, a permit from SCVWD is required.

8. An additional $40 per hour will be charged for inspection time exceeding the allowable time specified in the Demolition Permit (job card).

(The following sections are to be completed by the Fire Department)

III. SOIL SAMPLING PROCEDURES

1. A minimum of 4 representative soil samples shall be taken from the area beneath the tank(s). (2 per tank). Additional samples: 1 per 20 feet of piping.

2. All soil sampling shall be completed by a qualified independent third party to include delivery of the samples to a State Certified laboratory. A CHAIN OF CUSTODY MUST be maintained throughout the sample transfer process.

3. Soil samples MAY NOT be composited by the laboratory and analyzed together.

4. Testing of samples shall employ EPA standard procedures in all appropriate cases.

5. Laboratory test analysis shall test for:

X GC scan for Total Petroleum Hydrocarbons (Gasoline), and BTX (analyzed individually)

X GC scan for Total Petroleum Hydrocarbons (Diesel), and BTX (analyzed individually)

____ GC scan for Total Oil and Grease, Total Petroleum Hydrocarbons (High Boiling Hydrocarbons), Volatile Organic Compounds (EPA 8240 or 8010 and 8020 with ten largest peaks identified).

____ GC scan for Solvents: _____

____ pH, Heavy Metals: _____

____ _____

6. A site drawing showing tank and sampling locations must be included in all submitted laboratory analysis so that sampling results can be traced directly to a specific sampling location.

7. **The applicant shall have a copy of ALL LABORATORY TEST RESULTS, CHAIN OF CUSTODY RECORD, AND SITE MAP OF SAMPLING LOCATIONS mailed DIRECTLY to:**

Mountain View Fire Department
Hazardous Materials Section
1000 Villa Street
Mountain View, CA 94041

Underground tank removals are not considered complete unless we receive a hard copy of all items listed above.

IF CONTAMINATION IS FOUND, A CLEAN-UP PROPOSAL MUST BE SUBMITTED TO OUR OFFICE WITHIN 10 DAYS OF RECEIPT OF ANALYSIS.

8. Samples shall be taken only by the modified California sampler technique.

UNDERGROUND TANK REMOVAL AUTHORIZATION

September 5, 2017

Stephanie Alva
El Camino Paving, Inc.
924 & 940 San Rafael Avenue
Mountain View, CA 94043

To Stephanie Alva,

This is to confirm that the facility closure for El Camino Paving, Inc. at 924 & 940 San Rafael Avenue in Mountain View, California has been completed according to the current guidelines established by the City of Mountain View Fire Department.

If you have any questions, do not hesitate to call our office at (650) 903-6378. Thank you for your cooperation in this project.

Sincerely,

Patrick Mauri
Hazardous Materials Specialist

RE: Preliminary Final Interim Closure Report
El Camino Paving

Dear Mr. Mauri:

Beyond Compliance LLC ("Consultant") is pleased to present the attached preliminary draft closure report which addresses the above-ground portion of the El Camino facility located at 924 and 940 San Rafael Avenue in Mountain View.

As we discussed, I will be on vacation during the week of July 31. However, I would greatly appreciate it if you would conduct an initial review on Friday and call me with any questions or thoughts on Friday. If there are any items I need to address, I can attempt to set them in motion before I leave.

Many thanks for all of your assistance along the way.

Sincerely,

Gary Lucks, JD CPEA
Principal
Beyond Compliance, LLC

Hazardous Materials Facility Closure Report
El Camino Paving Inc.

1. Background

A. Location of Facility

924 San Rafael Avenue, Mountain View California 94043

B. Business activity and duration of activity

El Camino Paving, Inc. began operations in 1976. The company was a union shop engaged in paving and grading operations throughout the Silicon Valley. Estevan Alva ran the field operations and operated the paver and Verne Grafton ran the office. Verne Grafton retired in the early 1980s at which time Estevan Alva became the sole owner. Marie Alva became the new owner on July 17, 2009 and was assisted with operations by Melissa Campos, Christine Alva, and Stephanie Alva. The business closed on January 31, 2016.

C. Known soil or groundwater contamination areas on or adjacent to the site

According to the Phase 1 report (prepared by Professional Service Industries, Inc., February 26, 2016—attached), the site historically experienced a historical hydrocarbon release from two former 4,000-gallon gasoline underground storage tanks (UST) and one 10,000-gallon diesel UST that were removed in 1988. During the UST removal, petroleum hydrocarbon impacted soil and groundwater was identified. Four hundred cubic feet of impacted soil was removed from the property.

Seven groundwater monitoring wells were later installed and five CPT borings were drilled in an attempt to define the extent of potential groundwater impact. Trichlorethylene (TCE) was detected, which was potentially attributed to a hydraulically up-gradient source. A groundwater extraction system was installed in 1995 and 1.3 million gallons of groundwater was removed and treated as part of the remediation of the project.

By 2000, the petroleum hydrocarbon concentrations were reduced to the point that groundwater monitoring was deemed to be no longer necessary. The site received official closure from the Santa Clara Valley Water District on March 14, 2001. Closure was granted with residual impact in the soil and groundwater of gasoline, diesel, and volatile organic compounds. According to the phase one report, the residual impact does not represent a "recognized environmental condition" (REC) but does represent a "vapor encroachment condition" (VEC). According to the Phase One ESA, future development around residual impact may require vapor control or removal and disposal of impacted material.

As part of its due diligence efforts, the prospective buyer (Prometheus) voluntarily performed a Phase II environmental site assessment (ESA) of the 924 San Rafael property. The site is not currently listed as a source of contamination in publicly available records. Based on its due diligence efforts, they are satisfied with the property condition from a business perspective and are prepared to close escrow and do not see an immediate need to perform any remediation at the site. Please see the letter appearing in attachment 1 A (signed by Prometheus) reflecting its intent to await a closure letter from the Mountain View Fire Department before commencing construction on the property.

El Camino engaged Langan Engineers to perform soil sampling on the yard where vehicles and equipment were located historically. At the direction of the City of Mountainview Fire Department, Langan Engineers collected samples at three locations. Langan Engineers collected six samples from borings reflecting depths of three feet and five feet at each location on August 11, 2017. Samples were analyzed for total petroleum hydrocarbons as gas, diesel, and total oil and grease (TPHg, TPHd, and TOG). A copy of the Langan Engineering report including methodology, sampling results, site location map, and site plan showing the sample locations can be found in Attachment 8.

The soil analytical data was compared to Tier 1 San Francisco Regional Water Quality Control Board's (RWQCB) Environmental Screening Levels (ESLs) which are conservative screening levels for residential and commercial use of property. Detected concentrations of petroleum hydrocarbons are low and all are below Tier 1 ESLs. These results in appear in Table below:

Soil Analytical Results

Sample ID	Depth	Date Sampled	TPHg	TPHd	TOG
	Feet		(mg/kg)		
B-1-3.0	3.0	8/17/17	15	8.9	190
B-1-5.0	5.0	8/17/17	3.1	2.4	140
B-2-3.0	3.0	8/17/17	< 1.0	< 1.0	<50
B-2-5.0	5.0	8/17/17	< 1.0	< 1.0	<50
B-3-3.0	3.0	8/17/17	< 1.0	< 1.0	<50
B-3-5.0	5.0	8/17/17	< 1.0	< 1.0	<50
Tier 1 ESLs			100	230	Not Established

Notes:

- TPHg: Total petroleum hydrocarbon as gasoline
- TPHd: Total petroleum hydrocarbons as diesel
- TOG: Total oil and grease
- Mg/kg: Milligrams per kilogram
- <1.0: Analyte was not detected above the laboratory reporting limit of 1.0 mg/kg

Tier 1 ESLs: RWQCB Environmental Soil Screening Levels based on a generic conceptual site model designed for use at most sites. The Tier 1 ESL summary table is generally derived from the most conservative ESL for each compound (February 2016 Rev.3)).

II. Site Assessment

The project site is located on a 1.8-acre sites at 924 and 940 San Rafael Avenue in Mountain View, California. The site consists of an office, an employee parking lot, and a facility operations yard to the west which is enclosed by a fence. As depicted in attachment 2, the facility buildings consist of an open-air shed located in the southwest portion of the fenced area. A closed shop is located immediately west of the shed and a wash rack is located just west of the shop. The processes, regulated materials, and structures, and related information pertaining to these buildings and the yard is depicted in Table 3A.

The paved area north of the buildings was comprised of vehicles, trailers, and assorted yellow iron equipment displayed in Table 2. No processing historically occurred on this north western portion of the property. The functional vehicles were driven from the site and sold. Fuels and lubricating oils were drained from the vehicles and equipment that were not ambulatory and were towed off-site.

*Yes: Connotes ability to drive without assistance or being towed.
**Fluids drained from all external tanks

This closure plan describes the approach for removing and cleaning materials and equipment located aboveground.

Table 2 Site Assessment

Room or Area Name	Processes Employed and Principal Uses	Regulated Hazardous Materials and Structures	Physical Appearance (floors, walls, ceiling)	Sumps, pits, aboveground tanks (ASTs), & underground structures	Final Destination (Name & address) for Items Removed
Shed	Storage (drums, aboveground tank (AST), & sump)	Lubricants, used oil, tires, & tar storage), empty drums	Open air wood structure, cement floor, & sump	Sump & used oil AST	• US Ecology [redacted] • Enviroserv [redacted]

Room or Area Name	Processes Employed and Principal Uses	Regulated Hazardous Materials and Structures	Physical Appearance (floors, walls, ceiling)	Sumps, pits, aboveground tanks (ASTs), & underground structures	Final Destination (Name & address) for Items Removed
					• Bay Area Tire Recycling [redacted]
Shop	Formerly used for maintenance and general repair of vehicles with occasional welding activity.	Limited chemical storage including propane, compressed gases, solvents, fire extinguishers, aerosols, fluorescent bulbs in fixtures	Cement floor, metal walls and ceiling	NA	• Cylinder Depot [redacted] • [redacted] • Chemical Waste Management [redacted] • Stericycle [redacted]
Outside (of buildings)	Air compressor, vehicles, yellow iron equipment, trailers, and a covered pile of concrete and asphalt. Trailer	Some vehicles and yellow iron equipment contained diesel, gasoline, coolant, solvents, and lubricating oils (in the crank case). Oily	Wire fencing	NA	• Demeno [redacted] • Stericycle [redacted] • Stericycle

Room or Area Name	Processes Employed and Principal Uses	Regulated Hazardous Materials and Structures	Physical Appearance (floors, walls, ceiling)	Sumps, pits, aboveground tanks (ASTs), & underground structures	Final Destination (Name & address) for Items Removed
	(used as an office) located on the northeast portion of the property [redacted]	debris (kitty litter absorbent)			HHW Facility [redacted]
Steam Cleaning Pad/Sump	Formerly used as a vehicle washing facility	Detergents, oils, and grease	Grate cover above sump	Sump connected to three chamber wash rack	US Ecology [redacted]

All hazardous materials were removed from the site by Waste Management Enviroserve as hazardous waste or universal waste to a licensed facility (see Attachment 3). Copies of hazardous waste manifests and bills of lading appear in attachment 4. Miscellaneous household hazardous wastes including oily absorbent, fire extinguishers, gasoline, and paint were disposed of at the Stericycle Household Hazardous Waste facility in San Jose. As more fully described in the attached letter from Prometheus (attachment 1), El Camino is obligated to remove the remaining contents within the shop and shed after the sale.

III. Remediation

As more fully described in Table 3 A the oil drums, tar, oily water, and oil (from the sump and the AST), along with miscellaneous aerosols were packaged, labeled, and manifested off-site to licensed recycling or treatment, storage, and disposal facilities. The compressed gas cylinders were shipped pursuant to a bill of lading to Cylinder Depot. The 500-gallon aboveground storage tank (AST) was closed and scrapped pursuant to the attached tank removal permit. The scrap metal was shipped to Alco Metals for recycling.

There is one, uncontaminated air handling unit that will remain on the roof above the shop. In addition, one air compressor is located immediately to the south of the shop. This air compressor is uncontaminated and will remain on site. Tables 3 A- C below describes the outcome of the above-ground remediation efforts.

Table 3A Remediation

Structure	Associated Equipment	Brief Description of Remediation (decontamination, neutralization, removal, etc.) to be performed	Contaminant Removal Verification	Disposition of Equipment	Final Destination (Name/address) for Items Removed	Shipping Document
Shed	Oil drums, tar, AST, sump, tires	Oil and oily water from the sumps were pumped into drums. The floor and sumps were steam-cleaned with 300 PSI	Photos (see attachment 6)	NA	Drums of oil (product and used oil, oily water) were removed and manifested as hazardous waste to: Demeno [redacted]	Manifest and BOL for tires
		The AST containing used oil was closed pursuant to the Aboveground Closure Permit.	See Hazardous Waste Tank Closure Certification in Attachment 5.	The metal was cut, collected in a roll-off bin.	The metal scrap was transported to Alco Metals [redacted]	Bill of Lading
		Nineteen 55-gallon drums of oil and oily water generated from cleaning two sumps and repackaging oil products previously stored in 55-gallon drums	Photos (see attachment 6)	NA	Drums of oil (product and used oil, oily water) were removed and manifested as hazardous waste to: Demeno [redacted]	Manifest

Air Compressors	Remediation is deemed not necessary. Equipment will remain at the site.	NA	Remaining on site	NA

Section: Soil and Subsurface Contamination

The site has not been identified or listed as a source of contamination in publicly available records. Based on the due diligence efforts, the prospective buyer is satisfied with the property condition from a business perspective and is prepared to close escrow. A letter from the prospective buyer (see attachment 1 B) is submitted to supplement the facility closure report and reflects the intent of the prospective buyer to await a final closure letter from the Mountain View Fire Department before commencing construction on the property.

Recent sampling (i.e., August 17, 2017) revealed that there is no subsurface contamination exceeding the San Francisco RWQCB's conservative ESLs.

Conclusions

All hazardous chemicals and wastes have been removed from the facility. In addition, the shed has been steam cleaned. As a result, the facility has been sufficiently cleaned of all contaminants that would present a danger to human health or the environment. Based on the Phase II performed by Prometheus and the subsurface sampling performed by Langan Engineers, the subsurface conditions are below ESLs.

PROMETHEUS

May 9, 2017

Mr. Patrick Mauri
Fire and Environmental Protection Division
500 Castro Street
Mountain View, CA 94041
Subject: 924 San Rafael Closure

Dear Mauri:

Prometheus and El Camino are under contract for the purchase of 924 and 940 San Rafael Avenue in Mountain View. We understand that El Camino is finalizing submission of an application to close the facility and will be responsible for addressing above-ground conditions.

As part of our due diligence efforts, Prometheus voluntarily chose to perform a Phase II environmental site assessment of 924 San Rafael Avenue ("Property"). The site is note currently listed as a source of contamination in publicly available records. Based on our due diligence efforts, we are satisfied with the property condition from a business perspective and are prepared to close escrow.

This letter is submitted to supplement the facility closure application. We are awaiting approval of the closure application by the Mountain View Fire Department before we purchase the Property. Pursuant to its development plans for the Property, Prometheus will address any potential subsurface contamination (i.e., ground, soil, and groundwater), if any, that may be discovered upon further site investigation and sampling, as needed or required by said development plans, unless the contamination is determined to be coming from an off-site source. This commitment in no way waives the right of Prometheus to pursue potentially responsible parties for source contamination.

Please contact me with any thoughts or questions at [redacted]

Regards,

Pat Calihan | Vice President of Acquisitions
Prometheus Real Estate Group, Inc.

PROMETHEUS

July 7, 2017

Mr. Patrick Mauri
Fire and Environmental Protection Division
500 Castro Street
Mountain View, CA 94041

Subject: 924 San Rafael Closure

Dear Mauri:

Prometheus Real Estate Group, Inc., a California corporation ("Prometheus"), is under contract to purchase real property located at 924 and 940 San Rafael Avenue in Mountain View, California (the "Property") from Marie S. Alva, Trustee of the Alva Living Trust, dated February 14, 1997, and El Camino Paving, Inc., a California corporation (collectively, "Seller"). Seller has informed Prometheus that it is finalizing an "interim" closure report (the "Report") in connection with efforts and outcomes associated with the closure of a certain former paving facility previously operated on the Property. Although Seller has not provided a copy of the Report to Prometheus, Seller has requested that Prometheus submit this letter to supplement the Report.

Pursuant to the purchase agreement between Prometheus and Seller, it is Seller's obligation to remove the trailer located at 924 San Rafael Avenue and the contents within the two structures located at the industrial yard located at 940 San Rafael Avenue before the date that is 90 days after the consummation of the sale of the Property. If Seller fails to satisfy that obligation, then, in addition to Prometheus' other rights and remedies, Prometheus has the right to remove such property after the passage of such 90 day period, and plans to do so, if necessary. This commitment in no way waives the rights and remedies of Prometheus or any of its affiliates at law, in equity or under any contract.

Please feel free to contact me with any questions at [redacted]

Regards,

Pat Calihan | Vice President of Acquisitions
Prometheus Real Estate Group, Inc.

Re: El Camino Paving

Hello Gary,

I appreciate the opportunity to provide you with a proposal for your cleanup project located at 924 San Rafael Avenue, Mountain View, CA 94043.

Item		**Price**
Oily Debris *(Non RCRA Solid- Kettleman Hills)*	2 – 55 Gallon Drums	$175.00 per drum
Grease *(Non RCRA Solid- Kettleman Hills)*	10 – 15/30 Gallon Drums	$175.00 per drum
Waste Oil/Coolant *(Non RCRA Liquids – Demenno Kerdoon)*	6 – 55 Gallon Drums	$165.00 per drum
Waste Oil Filters *(Non RCRA Solid- Kettleman Hills)*	1 – 55 Gallon Drum	$160.00 per drum
Propane Cylinders *(Disposal at Cylinder Depot)*	8 Cylinders	$ 75.00 each
Waste Aerosols *(Universal Waste - Kettleman Hills)*	1 – 55 Gallon Drum	$260/00 per drum
Waste Grease	3 Boxes	$925.00 per box

(18 – 5 gallon pails per box. It is estimated that we will fill 3 boxes. Pricing includes cost of triwall box to pack into. Non RCRA Solid - Kettleman Hills)

Above Ground Oil Storage Tank

All liquids will be drained from the above ground storage tank (AST) and secondary containment. It is assumed that the contents is approximately 100 gallons (2 – 55gallon drums). Once emptied, the tank and containment will be triple rinsed using a pressure washer. The rinsates will be collected and containerized into 55 gallon drums. It is assumed that the total rinsate will not exceed 100 gallons (2 – 55gallon drums). Lastly, the tank will be tested and certified by a Certified Marine Chemist that they are clean and can be scrapped.

Waste Oil from storage tank (Non RCRA Liquids – Demenno Kerdoon)	2 – 55 Gallon Drums	$165.00 per drum
Waste Oily Rinsate from storage tank *(Non RCRA Liquids – Demenno Kerdoon)*	2 – 55 Gallon Drums	$165.00 per drum
Labor (2 – 40 hour hazwoper trained environmental technicians) *(Per hour rate will be billed portal to portal and assumes a 4 hour minimum. Actual hours are assumed at 8 hours total. Labor includes the packing of the waste grease into boxes as well as tank cleaning.)*		$65.00 per hour/man
Certified Marine Chemist		$1,000.00 total
Pressure Washer		$125.00 total
Drum Head Vacuum		$50.00 total
PPE		$100.00 total
4 – 55 Gallon Steel Drums		$40.00 each
Delivery/ Pickup Fee		$100.00 each
Energy Surcharge		11% of total invoice

This proposal includes all labor, profiling, manifesting, labeling, transportation and disposal. Prices quoted are contingent upon waste stream meeting profile data and disposal facility acceptance. All work performed will comply with State, Local and Federal Regulations. If you should have any questions, please do not hesitate to contact me. I may be reached at [redacted]

Sincerely,

Kent Olsen

$ _____ per _____

Subject to Section 7 of the conditions, if this shipment is to be delivered to the consignee without recourse on the consignor, the consignor shall sign the following statement.

The carrier shall not make delivery of this shipment without payment of freight and all other charges.

(Signature of Consignor)

FREIGHT CHARGES Check Appropriate Box:

☐ Freight prepaid

☐ Collect

RECEIVED, subject to the classifications and lawfully filed tariffs in effect on the date of the issue of this Bill of Lading, the property described above in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated above which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or any of said property over all or any portion of said route to destination and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in Uniform Freight Classifications in effect on the date hereof, if this is a rail or a rail-water shipment; or (2) in the applicable motor carrier classification or tariff, if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

Mark with "X" if appropriate to designate Hazardous Materials as defined in the U.S. Department of Transportation Regulations governing the transportation of hazardous materials. The use of this column is an optional method for identifying hazardous materials on Bills of Lading per 172.201(a)(1) (a) of Title 49 Code of Federal Regulations. Also when shipping hazardous materials, the shipper's certification statement prescribed in section 172.204(a) of the Federal Regulations, as indicated on the Bill of Lading does apply, unless a specific exception from the requirement is provided in the Regulation for a particular material.

The format and content of hazardous materials is the responsibility of individual company interpretation of requirements as described in 49 Code of Federal Regulations 172, Subpart C-Shipping Papers. Such descriptions consists of the following per Regulations 172.201 (Hazardous Material Table) and Sections 172.202 and 172.203: Proper shipping name, hazardous class, UN identification number, packing group, and subsidiary class(es).

Note: Liability limitation for loss or damage in this shipment may be applicable. See 49 United States Code, Sections 14706(a (1)(A) and (B).

Gary Lucks

From: Stephanie Alva <[redacted]
Sent: Thursday, July 27, 2017 2:07 PM
To: Gary Lucks
Subject: Yard Clean Up - 924 San Rafael Ave MV

Hello Gary

As for the items that were in the yard that needed to be removed here is the status:

The radiator is going to be recycled. There was no fluid in them so they were ready to be recycled.

The air compressor as well as the vibrator/wacker plate are both now at mother's house (back yard). They are safely stored there.

Let me know if any further information is needed.

Stephanie Alva

Attachment 5 AST Closure Certification

 Tank Site Address: 924 San Rafael Avenue Mountain View, CA 94043

Applicant Certification

I certify that I have read the Tank System On-Site Cleaning Requirements (UN-065) guidance document and California Code of Regulations, Title 22, Div. 4.5, Chapter 32, and declare that the above information is accurate and complete to the best of my knowledge.

El Camino Paving Inc.	Marie A Alva	5/18/17
Applicant's Name (Print) Marie Alva	Applicant's Signature	Date

Tank Operator Certification

This certification must be completed by the operator of the tank system, not the contractor or agent. If the most recent hazardous contents of the tank(s) are unknown, and residuals remain in the tank(s) in sufficient quantity to be collected and analyzed, a report of chemical analysis by a State certified analytical laboratory must be submitted with this application. **Tanks whose usage history is not known and which do not contain sufficient residuals for analysis cannot be certified as non-hazardous.**

I am/was the operator of the following tank system(s). I hereby certify that the tank(s) last held the following hazardous material(s)/waste(s):

	Hazardous Substance Last Contained	Or
Tank 1	Oil	☐ Analysis of residuals is attached
Tank 2		☐ Analysis of residuals is attached
Tank 3		☐ Analysis of residuals is attached
Tank 4		☐ Analysis of residuals is attached
Tank 5		☐ Analysis of residuals is attached
Tank 6		☐ Analysis of residuals is attached

TANK SYSTEM ON-SITE CLEANING APPLICATION

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: California Code of Regulations, Title 22, Section 67383.3(a)(1)

This application form, and a Tank System Closure Permit Application, must be completed and submitted to the local Unified Program Agency (UPA) prior to on-site cleaning to render non-hazardous any aboveground or underground storage tank system that previously stored a hazardous material/waste.

1. Facility Name (Tank Site): El Camino Paving, Inc. Bldg. No.: Shed
   Address: 924 San Rafael Avenue City: Mountain View Zip: 94043

2. Proposed Date of Tank System Cleaning: May 22, 2017

3. The following individual will directly supervise cutting and/or cleaning activities and prepare the Hazardous Waste Tank Closure Certification form:
   Name: Kent Olsen or Ken Haskell [redacted] Phone No.: [redacted]
   Address: [redacted] City: [redacted] Zip: [redacted]
   Submit a copy of this person's "statement of qualifications" including experience and professional credentials (e.g., state license or registration) demonstrating that he/she is technically and legally qualified to certify tank cleaning activities.

4. The following procedures will be used for the on-site cleaning and closure of these tank systems: *[Describe the specific tools and techniques proposed for cleaning, cutting (if applicable), and visual inspection of tank interior(s)]* **Attach copies of your site-specific Work Plan and site-specific Safety Plan with this completed permit application.**
   - Using a high pressure hot water pressure washer and a pH neutral cleaning agent such as Simple Green, the AST will be triple rinsed.
   - All rinsates will be collected and packaged into DOT containers for off-site disposal as a hazardous waste.
   - Secondary containment areas will be emptied, cleaned and the rinsates collected and packaged into DOT containers for off-site disposal as a hazardous waste.

5. Where will rinseate be shipped?
   Facility Name: DK EPA ID No.: CAT080013352
   Name of Transporter: Eniroserve EPA ID No.: CAR000188201

6. Do the tank(s) have manways? ☐ Yes; ☐ No. If No, describe in your attached Work Plan how you will access the tank interior(s) to perform the required visual inspection of the entire tank interior [i.e., describe the specific methods will be used to cut openings in the tank(s) large enough to facilitate the required visual inspection, or what remote viewing equipment/methods will be used). *[If openings must be cut, **Fire Department approval is required prior to cutting.**]*

Fire Department Tank Cutting Approval

If tank closure is being overseen by Santa Clara County CUPA and the tank(s) will be cut, this section must be submitted to, and completed by, the local Fire Department prior to submittal of this application to the CUPA.

This Department has reviewed the proposed non-sparking tank cutting methods and/or remote viewing equipment and lighting systems described in Section 4, above, and approves their use.

Subject: **DRAFT Soil Sampling and Analysis Letter**
924 San Rafael Avenue
Mountain View, CA
Langan Project: 731705800

Dear Mr. Koehler and Ms. Alva:

Langan Engineering and Environmental Services Inc. (Langan) has prepared this Soil Sampling and Analysis Letter for the former El Camino Paving site at 924 San Rafael Avenue in Mountain View, California, (site; Figure 1). The existing improvements on the approximately 1.8-acre property include a 2,500 square-foot building, an approximately 2,500 square-foot covered work area, an approximately 1,540 square-foot office building, and paved yard containing parking spaces and storage. We understand that three underground storage tanks were formerly located on site and subject to a cleanup action. The site received regulatory closure from the Santa Clara Valley Water District's (SCVWD) Leaking Underground Storage Tank Oversight Program in 2001. This letter was prepared in response to the request by the Mountain View Fire Department (Certified Unified Program Agencies [CUPA]) for additional shallow soil sampling and testing to evaluate possible releases from equipment stored at the site following closure.

On 20 August 2017, Langan advanced three borings by hand-auger to five feet below ground surface (bgs; Figure 2). Two samples were collected at each boring at three and five feet bgs. Samples were collected by slide hammer into stainless steel liners and sealed with Teflon and plastic caps. Sampling equipment was decontaminated prior to advancing each boring and following collection of each sample. Samples were labeled and placed in an ice-cooled chest and sent to McCampbell Analytical, Inc., a California-certified laboratory, under chain of custody procedures. Per CUPA's request, soil samples were analyzed for total petroleum hydrocarbons as gas, diesel, and total oil and grease (TPHg, TPHd, and TOG). Soil analytical results are summarized in Table 1.

Langan compared the soil analytical results from this sampling event to current Tier 1 San Francisco Bay Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs). TPHg and TPHd were detected at levels below the Tier 1 ESLs in Boring 1 and were not detected above the laboratory reporting limits in Borings 2 and 3. ESLs are not established for TOG.

Please feel free to contact Christina Rain for additional information at [redacted] or at [redacted]

Sincerely yours,
Langan Engineering and Environmental Services, Inc.

Christina Rain, P.E.

Project P.O.:
Project Name: 731705800; El Camino

Project Received: 08/18/2017

Analytical Report reviewed & approved for release on 08/22/2017 by:

Angela Rydelius,
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: Langan
Project: 731705800; El Camino
WorkOrder: 1708892

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

The following SampIDs: 001A, 002A, 003A, 004A, 005A, 006A contain testgroup Multi Range_S.

Comments:

NOTE: Soil samples are discarded 60 days after results are reported unless other arrangements are made (Water samples are 30 days).
Hazardous samples will be returned to client or disposed of at client expense.

SENT CERTIFIED

RE: 924 SAN RAFAEL AVENUE- EXPIRATION OF HAZARDOUS MATERIALS PERMIT

This letter shall serve as official notice that the Hazardous Materials permit issued to El Camino Paving, Inc., located at 924 San Rafael Avenue, has expired.

El Camino Paving, Inc. was issued an annual Hazardous Materials permit on November 6, 2014, which was valid through May 1, 2015. This permit requires renewal each year in the form of payment of annul fees, and electronic submittal of your Hazardous Materials Business Plan (HMBP) through the California Environmental Reporting System (CERS) at least thirty (30) days prior to the expiration date of the permit. Permit fees not paid by the May 1, 2015 permit expiration date are late and subject to a late fee equal to double the (local) annual permit fees.

The annual permit renewal invoice was mailed to you February 19, 2015, along with instructions for electronically submitting your Hazardous Materials Business Plan elements through the California Environmental Reporting System (CERS). A second permit renewal notice (**Late Notice)** was mailed to you on April 8, 2015. On June 10, 2015 this department issued you a **Compliance Order** with a compliance deadline of June 24, 2015. To date, you have made no attempt to comply with the Compliance Order corrections.

Without a valid Hazardous Materials permit El Camino Paving, Inc. is in violation of Mountain View City Code, Chapter 24, and shall not store, handle or use hazardous materials in excess of those quantities requiring a permit as specified in MVCC Chapter 24.

To renew your Hazardous Materials permit you are required to electronically submit all Hazardous Materials Business Plan elements through CERS. Additionally, you are required to submit payment of your permit renewal fees, inclusive of penalties, in the amount of $ 3,888, as well as the enforcement cost of $220 as ordered in the August 10, 2015 Administrative Decision issued as a result of the August 4, 2015 Administrative Hearing. The electronic submittal of all Hazardous Materials Business Plan elements and payment of outstanding fees totaling $4,108 shall be completed no later than 5:00pm October 30, 2015.

If you chose to abandon your efforts to conduct business using hazardous materials in quantities requiring a Hazardous Materials permit, you shall reduce the quantity of hazardous materials inventory below the permittable amounts, as set forth in Chapter 24 of the Mountain View City Code, and notify this office in writing of your intentions no later than 5:00pm, October 30, 2015. Additionally, the enforcement cost of $220, as ordered in the August 10, 2015 Administrative Decision, shall be paid no later than 5:00pm, October 30, 2015, or this matter may be referred to collections.

Failure to renew your Hazardous Materials permit or reduce the quantity of hazardous materials below the permittable amounts no later than 5:00pm, October 30, 2015 will result in the assessment of Administrative Penalties up to $1000.00 per day, with an Abatement Order issued to the property owner requiring removal of all hazardous materials from your business immediately.

Sincerely,

Jaymae Wentker
Fire Marshal

ADMINISTRATIVE HEARINGS

CITY OF MOUNTAIN VIEW, CALIFORNIA

IN THE MATTER OF	COMPLIANCE ORDER OF JUNE 10, 2015
MARIA S. ALVA,	ADMINISTRATIVE DECISION
Respondent.	

I

STATEMENT OF THE CASE

Due notice having been given, this matter came on regularly for hearing before Administrative Hearing Officer Louis L. Amadeo, Jr. on August 4, 2015, at City Hall, City of Mountain View, California ("the City"). Stephanie Alva appeared in behalf of Respondent Maria S. Alva, by telephone conference call.

The hearing was held pursuant to Mountain View City Code (MVCC) 1.29, as the City sought to enforce the compliance order of June 10, 2015 ("the Compliance Order"), relating to the real property located at 924 San Rafael Avenue, Mountain View, California ("the Subject Property"). The Compliance Order alleged that on June 10, 2015, at the Subject Property,

operations at the Subject Property.

2. Respondent's operations included the handling and storage of hazardous materials.

3. On June 10, 2015:

(a) Respondent had not obtained a current City permit to handle or store hazardous materials at the Subject Property as required by MVCC 24.7.0.

(b) Respondent had not electronically filed a current Hazardous Materials Business Plan as required by MVCC 24.7.1.

(c) Respondent had not paid current permit fees per MVCC 24.7.3.

4. The Compliance Order required that Respondent correct the foregoing deficiencies by a Compliance Date of June 24, 2015.

5. Prior the date of the hearing herein, Respondent electronically filed a current Hazardous Materials Business Plan as required by MVCC 24.7.1.

6. As of the date of the hearing herein, Respondent had not obtained a permit per MVCC 24.7.0 and had not paid current permit fees per MVCC 24.7.3.

7. In order to obtain a current permit per MVCC 24.7.0 Respondent is required to pay permit fees in the sum of $3,888.00.

8. Prior to June 10, 2015, Respondent had received multiple written and oral deadline reminders regarding City hazardous materials reporting and permit requirements.

9. Respondent has had multiple, prior, similar violations.

10. The City did not seek the imposition of administrative penalties in this matter.

11. The City incurred enforcement costs in this matter in the total sum of $220.00 as follows:

Cost Description	Hours	Rate Per Hour	Cost
City Staff Time	2.0	$110.00	$220.00

El Camino Paving Enforcement Write Up

7/15/2016

Enforcement actions taken against:
El Camino Paving
924 San Rafael Avenue
Mountain View, CA 94043

Owner: Marie S. Avla (*Copy of Metroscan Report – Section 3)*
Operator: Stephanie Alva

Inspectors:
Patrick Mauri – Hazardous Materials Specialist
Carrie Sandahl – Water Environment Specialist
Eric Anderson – Environmental Safety Coordinator

500 Castro Street, 4th Floor
Mountain View, CA 94041
650-903-6378

Background

El Camino Paving is a medium sized paving company located at 924 San Rafael Avenue in Mountain View. The company is owned by Marie S. Alva and is operated by her daughter Stephanie Alva. Their property consists of an office/client area, a yard, a maintenance shop and maintenance shed. The maintenance shed and shop are currently used to store hazardous materials and hazardous waste such as new and used oil, batteries, asphalt emulsifiers, paints, lubricants and welding equipment. Only minor repairs are made to the equipment and any major repairs are conducted off-site by third party vendors. The yard is used to store equipment including heavy equipment (tractors, trailers, etc.), new asphalt and various construction materials. Currently a large part of the yard is storing construction and asphalt waste and inoperable heavy equipment.

Recycled Paper

Past Enforcement

On May 1, 2010, El Camino Paving's hazardous materials storage permit expired. They continued to operate without a permit until it was renewed on June 7, 2011 through an administrative enforcement order.

On May 1, 2012, El Camino Paving's hazardous materials storage permit expired. They continued to operate without a permit until it was renewed on November 6, 2014 through an administrative enforcement order.

Copy of past enforcement documentation – Section 20

Current Enforcement:

On May 1, 2015, El Camino Paving's hazardous materials storage permit expired. They are currently operating without a hazardous materials permit. A compliance order was issued by Fire Marshal Wentker on June 10, 2015 for the expired permit with a compliance deadline of July 24, 2015. As of this date, El Camino Paving has not renewed their hazardous materials permit.

Copy of current enforcement documentation – Section 19

July 9, 2015 - Initial Routine Inspection

On July 9, 2015 I conducted a hazardous material and fire life safety inspection at El Camino Paving. I met with Stephanie Alva in the office to review paperwork and then walked the entire facility by myself. Ms. Alva was informed that her hazardous materials permit had expired. She acknowledged that her permit was expired and indicated that she would renew it in the near future. I noted this as a violation on my inspection report. During the paperwork review Ms. Alva was unable to provide any documentation for the proper disposal of the hazardous waste generated by El Camino Paving including waste oil, waste oil filters and waste antifreeze. I informed her that hazardous waste manifests must be kept for 3 years and should be made available for review during an inspection. I noted this as a violation on the inspection report.

On my walkthrough of the construction yard and maintenance shop/shed I noticed many large diesel, motor oil and hydraulic oil spills throughout the property. Many of these spills appeared to have been there for some time as they had already been absorbed into the ground. Most of the spills originated from old equipment and vehicles (graders, tractors, etc.) that were no longer being used but some were due to improper handling of hazardous materials. I also noticed several other issues including improper secondary containment, failure to secure propane and welding gas cylinders and un-labeled hazardous waste and hazardous materials.

When my yard inspection concluded, I returned to the office and informed Stephanie Alva of the violations. I had her sign the inspection report on my tablet computer and then emailed her a copy of the inspection report.

Code Violations Observed: MVCC - Chapter 24 – 24.4.0.b, 24.3.0.a, 24.3.0.q, 24.3.0.q.2(d), 24.3.4, 24.3.9.a

Copy of inspection report: Section 4

August 11, 2015 – Re-Inspection 1

On August 11, 2015 I conducted a re-inspection of El Camino Paving. I spoke with Stephanie Alva about the status of the violations from the initial inspection. She informed me that everything was corrected except she was unable to locate the past years hazardous waste disposal paperwork (hazardous waste manifests). She informed me that she was still unable to locate them but that she did update her hazardous materials business plan (HMBP) in the California Environmental Reporting System also known as CERS. I was able to verify that she updated her HMBP on my tablet computer.

I got permission from Stephanie Alva to conduct a re-inspection of the yard. I walked the yard to verify that all of the violations had been corrected. No one from El Camino Paving accompanied me on my walkthrough. While walking through the site I noticed a large diesel spill in the middle of their yard. The spill looked fairly recent as it had not absorbed into the ground yet. There was no effort by El Camino Paving staff to clean up the spill and it was apparent that several vehicles had driven through the spill and tracked it throughout the yard. I reworded the spill cleanup violation in my inspection report to add the new spill. Most of the spills noted on the first inspection report were still there and no attempt had been made to clean them up. The other violations including, compressed gas securement, open containers, batteries sitting on the ground and not in secondary containment and missing labels on hazardous materials and waste had been corrected.

After my inspection of the yard, I spoke with Stephanie Alva and informed her that all spills needed to be cleaned up as soon as they occur and that absorbent used to clean up the spills should be swept up and stored in a container. I had her sign my re-inspection report in my tablet computer and put a cleanup deadline of September 14, 2015. I emailed a copy of my report to her.

Code Violations Observed: MVCC - Chapter 24 – 24.4.0.b, 24.3.4

Copy of inspection report, email and photos: Section 5

November 19, 2015 - Re-Inspection 2

On November 19, 2015 I was notified by Water Environment Specialist Carrie Sandahl that El Camino Paving had a large stockpile of asphalt at the site. Carrie and I agreed to conduct a joint inspection at El Camino Paving later that afternoon.

That afternoon Carrie Sandahl and I inspected El Camino Paving. We spoke with Stephanie Alva and she informed us that the stockpile was from all of the recent jobs they had been working on. She informed us that they didn't have the money to bring it directly to the dump as they had not been paid for the jobs they were working on. She informed us that the large stockpile would be removed in a few days. Stephanie granted us permission to inspect the property but she did not accompany us during our walkthrough.

We then walked through the yard to inspect the stockpile and to see if any of my previous violations had been corrected. In the center of the yard there was a large stockpile of broken up asphalt, asphalt emulsifier, and other construction waste products (*See map of property – Section 3*). The stockpile was uncovered and not contained by a berm or absorbent. This was a concern as it was winter and rain was predicted over the next couple of weeks. Because the stockpile was not contained or covered, sediment and surface oils from uncured asphalt and emulsifiers could be pulled off of the pile by rainwater and washed into the storm drain.

Next to the stockpile there was also a large spill of concrete wash. Concrete wash is a mixture of cement, water and aggregate material. It is a caustic material with a pH near 12 that can be toxic to aquatic life. The spill was generated when an El Camino Paving employee washed out a concrete mixer to remove the leftover concrete. The spill had dried by the time we conducted our inspection, but if water was reintroduced it could potentially runoff into the storm drain system.

Throughout the yard of El Camino Paving, I noticed many petroleum hydrocarbon spills. The majority of the spills were located under decommissioned heavy equipment vehicles such as dump trucks, graders, paving trailers and staff vehicles. There were also several large petroleum hydrocarbon spills coming from in service vehicle.

During my inspection, I also noted many open and uncovered 5 gallon pails of various asphalt emulsifiers, sealers and unknown hydrocarbons. They appeared to be drying these materials out so they could throw them into the trash. Asphalt Emulsifiers typically contain petroleum asphalt, an emulsifying agent (typically a soap containing hydrochloric acid, latex compounds and hydrogen sulfide) and water. These materials if unused need to be treated as hazardous waste and disposed of properly. There were also batteries that were not properly contained and propane and welding gases that were not properly secured.

Stephanie also informed me that she was still unable to find her hazardous waste disposal records for the past year.

I informed Stephanie Alva that the stockpile needed to be covered and contained or removed, that all spills must be cleaned up and all spill clean-up material must be disposed of properly. I gave her detailed instructions on the proper way to clean up petroleum hydrocarbon spills and methods to prevent future spills such as emptying the hydraulic fluid and motor vehicle fuel from vehicles that are no longer in service. I also informed her to properly contain used vehicle batteries and secure all compressed gas cylinders. I also informed her that the 5 gallon pails needed to be closed and covered and disposed of as hazardous waste. I gave her several options of how to dispose of the asphalt containers including having a licensed hazardous waste hauler pick them up or schedule an appointment to bring them to the Household Hazardous Waste (HHW) center in Sunnyvale.

I prepared my inspection report and had Stephanie Alva sign my inspection report on my tablet computer and gave her until November 24, 2015 to correct the violations. The short amount of time was due to a significant rain event that was supposed to occur on November 25, 2015. I emailed a copy of the report to her.

Code Violations Observed: MVCC - Chapter 24 - 24.3.0.i, 24.3.0.q, 24.4.0.b, 24.3.4; CFC Section 5303.5.3

Copy of inspection report, email and photos: Section 6

November 24, 2015 – Re-Inspection 3

I conducted a re-inspection of El Camino Paving on November 24, 2015 with Carrie Sandahl. We walked the site with Stephanie Alva. During our walkthrough I noticed that the yard area had not been cleaned up. The stockpile, petroleum hydrocarbon and concrete wash spills were still in the yard and new ones had occurred. A small percentage of the spills had absorbent put on them but the absorbent had not been cleaned up and was still sitting on top of the spill. The asphalt pile was uncovered and no actions had been taken to prevent runoff from the leaving the property during a rain event. We informed her that it was supposed to rain the following day and that they needed to take preventative actions to prevent contaminated runoff from reaching the storm drain system. She informed us that she would try to cover the pile and clean up the spills before the rain.

During my inspection of the yard I noticed many of the same violations I noted on the initial inspection were present again. I noticed all of the propane cylinders were unchained, used batteries were stored out of containment and the same open and uncovered 5 gallon pails of asphalt emulsifiers, sealers and unidentified petroleum

hydrocarbons. Asphalt Emulsifiers typically contain petroleum asphalt, an emulsifying agent (typically a soap containing hydrochloric acid, latex compounds and hydrogen sulfide) and water.

Stephanie also informed me that she was still unable to find her hazardous waste disposal records for the past year.

I informed her that the stockpile needed to be covered and contained or removed, that all spills must be cleaned up and all spill clean-up material must be disposed of properly. I gave her detailed instructions on the proper way to clean up petroleum hydrocarbon spills and methods to prevent future spills such as emptying the hydraulic fluid and motor vehicle fuel from vehicles that are no longer in service. I also informed her to properly contain used vehicle batteries and secure all compressed gas cylinders. I also informed her that the 5 gallon pails needed to be closed and covered and disposed of as hazardous waste.

I prepared my inspection report and had Stephanie Alva sign my inspection report on my tablet computer and gave her until December 1, 2015 to correct the violations. I emailed a copy of the report to her.

Code Violations Observed: MVCC - Chapter 24 – 24.3.0.i, 24.3.0.q, 24.4.0.b, 24.3.4; CFC Section 5303.5.3; 19 CCR 4; HSC 6.95

Copy of inspection report, email and photos: Section 8

December 2, 2015 – Attempted Re-inspection

On December 2, 2015, Carrie Sandahl and I attempted to conduct a re-inspection of El Camino Paving. On the morning of December 2, 2015, Inspector Sandahl had emailed Stephanie Alva to let her know we would be coming that afternoon. The weather forecast indicated that it was going to rain on December 3, 2015 so we wanted to verify that the debris pile had been properly covered and contained or removed and all of the spills had been cleaned up. When I arrived on-site the gate leading to the yard was locked and no employees were present. I walked around the parking lot just outside the yard and noticed that the stock pile was still there and had not been covered. I also noticed many of the oil/diesel spills had not been cleaned up or were only partially cleaned up by spreading absorbent over the spill. I did not prepare an inspection report as no one was present to sign it.

December 3, 2015 – Re-inspection 4

On December 3, 2015, Carrie Sandahl and I conducted a re-inspection of El Camino Paving. Carrie Sandahl had contacted Stephanie Alva via email on December 2, 2015 to schedule an inspection. Stephanie Alva confirmed that she would be on-site for our inspection.

We were met on-site by Stephanie Alva and Juan an El Camino Paving employee. It was raining during our inspection of the site and we noticed large amounts of petroleum hydrocarbons (motor oil and diesel fuel) and sediment emanating from the yard and making its way towards the street. The site is graded so that all rain water flows towards San Rafael Avenue at 2 drainage locations *(The locations are listed on the site map as downstream and mid-stream: Section 3)*. There was a petroleum absorbent boom blocking off the midstream drainage path which stopped most of the petroleum hydrocarbons and sediment from making it to the storm water system. The downstream drainage path did not have any petroleum absorbent booms and all of the sediment and petroleum hydrocarbons flowing into this drainage path freely flowed into the storm drain system.

While walking through the yard I noticed that the debris pile was still on-site and had not been covered and no effort had been made to contain runoff from the pile due to the rain. I also noticed the same petroleum hydrocarbon spills noted in previous inspections were still there. Some of these spills had oil absorbent on them. Most of the contaminated site run-off was emanating from these petroleum hydrocarbon spills and from the run-off of the stock pile. The concrete wash spill was not present but I was not able to verify if they were cleaned up or washed away into the storm drain system.

I also noted that several propane cylinders were still not chained up properly and Stephanie was unable to find any hazardous waste manifests. El Camino Paving did clean up the shop and chemical storage areas. Most of the open 5 gallon pails of asphalt emulsifiers were moved to a covered area and sealed and the used batteries were secondarily contained.

I informed Stephanie that she needed to cover the debris pile and contain any run-off from the pile. I also instructed her to clean up the spills and the proper ways to do that and to secure all compressed gas cylinders.

I prepared my inspection report and had Stephanie Alva sign my inspection report on my tablet computer and gave her until December 9, 2015 to correct the violations. I emailed a copy of the report to her.

Code Violations Observed: MVCC - Chapter 24 -24.4.0.b; CFC Section 5303.5.3; 19 CCR 4; HSC 6.95

Copy of inspection report, email and photos: Section 11

December 9, 2015 – Re-inspection 5

On December 9, 2015, Carrie Sandahl and I conducted a re-inspection of El Camino Paving. Inspector Sandahl scheduled the inspection through email with Stephanie Alva. We were met on-site by Stephanie Alva and Juan an El Camino Paving Employee and conducted a full site inspection.

During my inspection I noticed that the debris pile was still on-site and remained uncovered and not contained. I also saw that the majority of the petroleum hydrocarbon spills were still on site. The recent rain had washed away some of the free standing liquid on the spills but dark oil staining still remained. Stephanie Alva was unable to locate any hazardous waste disposal manifests for waste generated by El Camino Paving. I also noticed that several compressed gas cylinders were not secured properly.

I informed Stephanie that she needed to cover the debris pile and contain any run-off from the pile. I also instructed her to clean up the spills and the proper ways to do that and to secure all compressed gas cylinders.

I added a new violation to indicate that the hazardous materials storage permit for El Camino Paving had expired and that they were currently storing permittable quantities without a permit.

I prepared my inspection report and had Stephanie Alva sign my inspection report on my tablet computer and gave her until December 9, 2015 to correct the violations. I emailed a copy of the report to her.

Code Violations Observed: MVCC - Chapter 24 -24.4.0.b; CFC Section 5303.5.3; 19 CCR 4; HSC 6.95.

Copy of inspection report, email and photos: Section 13

December 21, 2015 – Storm Water Run-off Sampling

On December 21, 2015, Environmental Safety Coordinator, Eric Anderson and I witnessed Dysert Environmental taking samples of the storm water run-off coming from El Camino Paving. Earlier in the day I had stopped by El Camino Paving to check on the storm water runoff from a rain storm that occurred that day. No one from El Camino Paving was on the property during this site visit and the gate to the yard was locked. I was there to verify if any of the containment measures noted in the December 9, 2015 inspection report had been completed as it was currently raining. During my inspection from the main parking lot, I noticed that a lot of sediment and petroleum hydrocarbons were being carried by the rain water from the main yard to the storm drain system. This water was escaping the few absorbent booms placed by El Camino

Paving and entering the street where it flowed into a storm drain. Based on the visual inspection I determined that a hazardous materials release was occurring and wanted to determine the extent of the release.

When I returned to the office I contacted Dysert Environmental, a sampling firm contracted by the City of Mountain View, and scheduled a time for them to meet me at El Camino Paving and take storm water samples. I asked them to bring equipment to sample for Total Petroleum Hydrocarbons (TPH) Diesel and Oil, Hexane Extractable Material (HEM) Oil and Grease, Total Suspended Solids, Total Dissolved Solids, pH and CAM -17 metals

Dysert Environmental arrived at El Camino Paving at approximately 3:30 pm. Eric Anderson and I arrived at the site at approximately 3:40pm. When I arrived on-site I made contact with Stephanie Alva in the front office and informed her that we would be taking samples of the storm water run-off from her site. She verbally gave us permission to take the samples.

Three sample locations were chosen by Eric Anderson and me. We chose the 2 locations where the majority of storm water runoff was leaving the site and labeled them as Mid-Stream and Down Stream *(See map and street view of sampling locations – Section 3)*. The third location was upstream of El Camino Paving which we titled Up Stream *(See map and street view of sampling locations – Section 3)*. The Up Stream sample was to take to determine the level of contamination present before any of the runoff coming from El Camino Paving entered the storm water system. This was then used as a comparison to the Mid-Stream and Down Stream levels to determine the levels of contamination emanating from El Camino Paving. Dysert Environmental completed the sampling at approximately 4:45 pm and took the samples to Accutest Laboratories to have them analyzed. Eric Anderson and I left the site after Dysert Environmental left.

Copy of photos: Section 15

January 4, 2016 – Sample Results

On January 4, 2016, I received an email with the sample results from the storm water runoff at El Camino Paving. The results showed that the storm water runoff coming from the Mid-Stream and Down Stream sample sites had higher quantities of petroleum hydrocarbons, suspended solids, dissolved solids and metals, when compared to the Up Stream sample results. This indicates that the storm water runoff coming from El Camino Paving was contaminated with these constituent. Based on the sample results I determined that an unauthorized release of hazardous materials had occurred on December 21, 2015 and that release was not reported or contained or mitigated.

I met with Inspector Carrie Sandahl and we decided to conduct a re-inspection of El Camino Paving on January 6, 2016 and to inform her of the sample results and the unauthorized release.

Copy of sample results: Section 18

January 6, 2016 – Attempted Re-inspection

On January 6, 2016, I attempted to conduct a re-inspection of El Camino Paving and inform Stephanie Alva of the sampling results and that an unauthorized release had occurred at her property. No one was present at the site and the gate to the yard was locked. I noticed from the main parking lot that the debris pile was still present and uncovered. I also noticed many petroleum hydrocarbon spills were still present and had not been cleaned up properly. I left the site and attempted to contact Stephanie Alva by phone but was unable to reach her.

Current Status

To the present day I have been unable to contact Stephanie Alva. I have driven by the site on several occasions and have not seen Stephanie Alva or any El Camino Paving employees at the property. The debris pile is still on site as well as many of the spills. There are still hazardous materials visible at the site and no one from El Camino Paving has made any attempts to renew the hazardous materials storage permit.

NOTE FOR FILE

El Camino Paving – Payment of Past Due Permit Fees

El Camino Paving made a payment of 7572.00 on May 23, 2017. The payment was for all past due hazardous materials permit fees. El Camino Paving had failed to pay the hazardous materials permit fees for the 2015/2016 and 2016/2017 permit. During this time they were storing quantities of hazardous materials that required a hazardous materials storage permit.

The following fees were paid:

2015/2016 Hazardous materials permit
Permit fees: $2552.00
Late penalties: 1336.00

2016/2017 Hazardous Materials Permit Fees
Permit fees: $2308.00
Late Penalties: $1376.00

Total Fees Due: $7572.00

05/23/17 463580 8,154.00

POST IN A CONSPICUOUS PLACE AT THE "PERMITTED FACILITY" SITE

I. Discharge Limitations:

Process Discharge (industrial waste) shall not exceed 100 Gallons Per Day (GPD).
(Location A1: 100 GPD)
Total Discharge (industrial and domestic waste) shall not exceed 500 Gallons Per Day (GPD).

II. Special Conditions/Requirements:

1. Sump cleaning and sludge removal shall be conducted once each quarter. Maintain cleaning records on site.

III. Self-Monitoring Sampling Analysis:

Pollutant	Sampling Frequency	Sample Type	Sampling Location(s)*	Federal Maximum for any 1 day (mg/L)	Federal Avg. of daily values for 30 consec.days (mg/L)	Local Limit (mg/L)
Copper	Semi-Annually	Grab	A1	No Limit	No Limit	2
Lead	Semi-Annually	Grab	A1	No Limit	No Limit	.5
Zinc	Semi-Annually	Grab	A1	No Limit	No Limit	4

*Sampling Location A1 is at the discharge end of the oil-water separator (clarifier) sump at the east end of the building.

IV. Wastewater Discharge Limits: (MVCC 35.32.12 & CFR 40)

Your industrial wastewater effluent shall not exceed the following limits:

Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]	Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]
Arsenic	No Limit	No Limit	0.1 mg/L[1]	**Manganese**	No Limit	No Limit	1.0 mg/L[1]
Barium	No Limit	No Limit	5.0 mg/L[1]	**Mercury**[2]	No Limit	No Limit	0.01 mg/L[2]
Berrylium	No Limit	No Limit	0.75 mg/L[1]	**Nickel**	No Limit	No Limit	0.5 mg/L
Boron	No Limit	No Limit	1.0 mg/L[1]	**Oil & Grease**	No Limit	No Limit	200 mg/L
Cadmium	No Limit	No Limit	0.1 mg/L[1]	**Phenols**	No Limit	No Limit	1.0 mg/L
Chromium Hex.	No Limit	No Limit	1.0 mg/L[1]	**pH**	No Limit	No Limit	5.0-11
Chromium, Total	No Limit	No Limit	2.0 mg/L[1]	**Selenium**	No Limit	No Limit	1.0 mg/L[1]
Cobalt	No Limit	No Limit	1.0 mg/L[1]	**Silver, Photo**	No Limit	No Limit	0.50 mg/L
Copper[4]	No Limit	No Limit	2.0 mg/L[1]	**Silver, Non-Photo**	No Limit	No Limit	0.25 mg/L
Copper	No Limit	No Limit	0.25 mg/L	**Single Toxic Organic**	No Limit	No Limit	0.75 mg/L
Cyanide	No Limit	No Limit	0.5 mg/L[1]	**Suspended Solids**	No Limit	No Limit	6000 mg/L
Fluoride	No Limit	No Limit	65 mg/L	**Total Dissolved Solid**	No Limit	No Limit	10000 mg/L
Formaldehyde	No Limit	No Limit	5.0 mg/L[1]	**Total Toxic Organics**[5]	No Limit	No Limit	1.0 mg/L
Lead	No Limit	No Limit	0.5 mg/L[1]	**Zinc**[6]	No Limit	No Limit	2.0 mg/L[1]

[1] If the daily discharge (averaged over a one year period) at any single sampling location exceeds 50,000 gpd, the local discharge limit for that location shall not exceed ONE-HALF (1/2) of the local limit listed above.

[2] Dental facilities using mercury-containing amalgam shall not exceed a local discharge limit of 0.05 mg/L for mercury.

[3] These limits refer to either grab or 24-hour composite samples.

[4] This limit applies only to the following EPA categories: Non-EPA Non-SIUs, Metal Finishing (Copper), and Electroplating. This limit also applies to cooling towers discharging < 2,000 gpd at any facility.

[5] See Section XIII of this permit for a list of components of Total Toxic Organics.

[6] Vehicle service facilities shall not exceed a local discharge limit of 4.0 mg/L for zinc.

V. Quality Assurance/Quality Control: (MVCC 35.32.13 & 40 CFR 136)

All metals samples must be collected in duplicate and stored and preserved until the next sampling event for that parameter. The duplicate sample must be labeled as a duplicate and made available to any City inspector.

VI. Sample Collection and Analysis: (MVCC 35.32.13.3, 40 CFR 403.12(g)&(h), 40 CFR 136)

All metals shall be collected as specified in the individual permit requirements. Cyanide and Total Toxic Organics (TTO) shall always be collected as grab samples. Samples shall be analyzed by an analytical laboratory approved by the State of Cal. Dept. of Health Services. Sample collection, preservation, and analysis shall be in accordance with EPA regulations (40 CFR 136) and the City of Mountain View's "Sample Collection, Analysis and Reporting Instructions".

VII. Violation Reporting & Follow-Up: (MVCC 35.32.6.2 & 40 CFR 403.12(f) & (g))

If the results of sampling or pH analysis exceed applicable limit(s), or any discharges meet the definition of hazardous waste, you shall:

1) VERBALLY NOTIFY THE CITY OF MOUNTAIN VIEW AT 650-903-6378 AND THE PALO ALTO WATER QUALITY CONTROL PLANT AT 650-329-2598 WITHIN 24 HOURS of knowledge of the violation. If an accidental discharge, slug discharge, or upset or failure of the pretreatment system occurs, verbal notification shall be made within 15 minutes of knowledge of the condition;

2) SUBMIT A WRITTEN REPORT WITHIN 15 WORKING DAYS of knowledge of the violation explaining: the cause, nature volume and duration of the violation, and mitigation measures taken to correct it and prevent reoccurrence;

3) INITIATE A SAMPLING/ANALYSIS PROGRAM demonstrating up to 21 consecutive days of compliance. The first sample result shall be submitted within 30 days of becoming aware of the violation.

VIII. Penalty Provisions: (MVCC 35.32.15)

Any person who violates any provision of this permit, "Notice of Violation", or Chapter 35 MVCC, may be subject to criminal, civil, or administrative penalties. Civil penalties shall not exceed $25,000/day per violation. Administrative penalties shall not exceed the following: (1) $2,000/day for failing or refusing to furnish technical or monitoring reports; (2) $3,000/day for failing or refusing to comply with a compliance schedule; (3) $5,000/day/violation for discharges in violation of any waste discharge limitation, permit condition, or requirement; and (4) $10/gallon for discharges in violation of any suspension, cease and desist order, or any prohibition issued by the City.

IX. Record-Keeping Requirements: (40 CFR 403.12(o))

All Industrial Users shall maintain records for all information resulting from any monitoring activities conducted. Such records shall include for all samples:

1) The date, exact place, method, and time of sampling and the names of the peron or persons taking the samples;
2) The dates analyses were performed;
3) Who performed the analyses;
4) The analytical techniques/methods used; and
5) The results of such analysis.

All Industrial Users shall maintain for a minimum of 3 years any records of monitoring activities and results, and shall make such records available for inspection and copying by the City of Mountain View and Palo Alto Water Quality Control Plant. This period of retention shall be extended during the course of any unresolved litigation regarding the discharge of pollutants by the Industrial User or the operation of the POTW Pretreatment Program or when requested by the Director or the Regional Administrator.

X. Notification of Changed Discharge: (40 CFR 403.12(j))

All Industrial Users shall promptly notify the City of Mountain View at 650-903-6378 and the Palo Alto Water Quality Control Plant at 650-329-2598 in advance of any substantial change in the volume or character of pollutants in their discharge, including the characteristic hazardous wastes for which the Industrial User has submitted initial notification under 40 CFR 403.12(p).

XI. Notification of Bypass: (40 CFR 403.17(c)(2))

All Industrial Users shall verbally notify the City of Mountain View at 650-903-6378 and Palo Alto Water Quality Control Plant at 650-329-2598 of an unanticipated bypass (intentional diversion of its wastestream from the treatment facility) within 24 hours from the time the Industrial User becomes aware of the bypass. A written submission shall also be provided within 5 days of the time the Industrial User becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

XII. Transferability of Permit: (MVCC 35.32.2.4)

This permit is not transferable without prior written notification to and approval by the City and the assumption of all permit conditions by the new owner/operator.

XIII. Definition of Total Toxic Organics: (40 CFR 469.12)

The term "total toxic organics" (TTO) means the sum of the concentrations for each of the following toxic organic components found in the discharge at a concentration greater than ten (10) micrograms per liter. The facility's local TTO and STO limits apply to all of the compounds listed below. Those compounds analyzed using EPA Method 601/602 or 624 are identified by a "■".

■Acenaphthene	■2-Chlorophenol	■Methyl bromide	■Diethyl phthalate	■4,4-DDT
■Acrolein	■1,2-Dichlorobenzene	■Bromoform	■Dimethyl phthalate	■4,4-DDE
■Acrylonitrile	■1,3-Dichlorobenzene	■Dichlorobromomethane	■1,2-Benzanthracene	■4,4-DDD
■Benzene	■1,4-Dichlorobenzene	■Chlorodibromomethane	■Benzo(a)pyrene	■Alpha-endosulfan
■Benzidine	■3,3-Dichlorobenzidine	■Hexachlorobutadiene	■3,4-Benzofluoranthene	■Beta-endosulfan
■Carbon tetrachloride	■1,1-Dichloroethylene	■Hexchlorocyclopentadiene	■11,12-Benzofluoranthene	■Endosulfan sulfate
■Chlorobenzene	■1,2-Trans-dichloroethylene	■Isophorone	■Chrysene	■Endrin
■1,2,4-Trichlorobenzene	■2,4-Dichlorophenol	■Naphthalene	■Acenaphthylene	■Endrin aldehyde
■Hexachlorobenzene	■1,2-Dichloropropane	■Nitrobenzene	■Anthracene	■Heptachlor
■1,2-Dichloroethane	■1,3-Dichloropropylene	■2-Nitrophenol	■1,12-Benzoperylene	■Heptachlor epoxide
■1,1,1-Trichloroethane	■2,4-Dimethylphenol	■4-Nitrophenol	■Fluorene	■Alpha-BHC
■Hexachloroethane	■2,4-Dinitrotoluene	■2,4-Dinitrophenol	■Phenanthrene	■Beta-BHC
■1,1-Dichloroethane	■2,6-Dinitrotoluene	■4,6-Dinitro-o-cresol	■1,2,5,6-Dibenzanthracene	■Gamma-BHC
■1,1,2-Trichloroethane	■1,2-Diphenylhydrazine	■N-nitrosodimethylamine	■Indeno(1,2,3-cd) pyrene	■Delta-BHC
■1,1,2,2-Tetrachloroethane	■Ethylbenzene	■N-nitrosodiphenylamine	■Pyrene	■PCB-1242
■Chloroethane	■Fluoranthene	■N-nitrosodi-n-propylamine	■Tetrachloroethylene	■PCB-1254
■Bis(2-chloroethyl) ether	■4-Chlorophenyl phenyl ether	■Pentachlorophenol	■Toluene	■PCB-1221
■2-Chloroethyl vinyl ether	■4-Bromophenyl phenyl ether	■Phenol	■Trichloroethylene	■PCB-1232
■2-Chloronaphthalene	■Bis(2-chloroisopropyl)ether	■Bis(2-ethylhexyl)phthalate	■Vinyl chloride	■PCB-1248
■2,4,6-Trichlorophenol	■Bis(2-chloroethoxy)methane	■Butyl benzyl phthalate	■Aldrin	■PCB-1260
■Parachlorometa cresol	■Methylene chloride	■Di-n-butyl phthalate	■Dieldrin	■Toxaphene
■Chloroform	■Methyl chloride	■Di-n-octyl phthalate	■Chlordane	■TCDD

Periodic Report of Continued Compliance (PRCC)
From: 1/1/2014 to 6/30/2014

COMMENTS/EXPLANATION FOR MISSING WASTEWATER ANALYSIS:

I certify that the wastes discharged during the reporting period do not constitute hazardous waste under Chapter 6.5 of the Health and Safety Code [Sec. 25115 and 25117] and Title 22 of the California Code of Regulations [Sec. 66680-66746] at the point of discharge into the City sanitary sewer system. If I am a zero discharger, I certify that I have not discharged any categorical wastes and will not discharge them without prior notification to the City.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. [40 CFR 403.12(l)]

POST IN A CONSPICUOUS PLACE AT THE "PERMITTED FACILITY" SITE

I. Discharge Limitations:

Process Discharge (industrial waste) shall not exceed 100 Gallons Per Day (GPD).
(Location A1: 100 GPD)
Total Discharge (industrial and domestic waste) shall not exceed 1,100 Gallons Per Day (GPD).

II. Special Conditions/Requirements:

1. Sump cleaning and sludge removal shall be conducted once each quarter. Maintain cleaning records on site.

III. Self-Monitoring Sampling Analysis:

Pollutant	Sampling Frequency	Sample Type	Sampling Location(s)*	Federal Maximum for any 1 day (mg/L)	Federal Avg. of daily values for 30 consec.days (mg/L)	Local Limit (mg/L)
Copper	Quarterly	Grab	A1	No Limit	No Limit	2
Lead	Quarterly	Grab	A1	No Limit	No Limit	.5
Zinc	Quarterly	Grab	A1	No Limit	No Limit	4

*Sampling Location A1 is at the discharge end of the oil-water separator (clarifier) sump at the east end of the building.

IV. Wastewater Discharge Limits: (MVCC 35.32.12 & CFR 40)

Your industrial wastewater effluent shall not exceed the following limits:

Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]	Discharge Parameter	Federal Max. for any 1 day	Federal Avg. of daily values for 30 consecutive days	Local[3]
Arsenic	No Limit	No Limit	0.1 mg/L[1]	Manganese	No Limit	No Limit	1.0 mg/L[1]
Barium	No Limit	No Limit	5.0 mg/L[1]	Mercury[2]	No Limit	No Limit	0.01 mg/L[2]
Berrylium	No Limit	No Limit	0.75 mg/L[1]	Nickel	No Limit	No Limit	0.5 mg/L
Boron	No Limit	No Limit	1.0 mg/L[1]	Oil & Grease	No Limit	No Limit	200 mg/L
Cadmium	No Limit	No Limit	0.1 mg/L[1]	Phenols	No Limit	No Limit	1.0 mg/L
Chromium Hex.	No Limit	No Limit	1.0 mg/L[1]	pH[5]	No Limit	No Limit	5.0-11
Chromium, Total	No Limit	No Limit	2.0 mg/L[1]	Selenium	No Limit	No Limit	1.0 mg/L[1]
Cobalt	No Limit	No Limit	1.0 mg/L[1]	Silver, Photo	No Limit	No Limit	0.50 mg/L
Copper[4]	No Limit	No Limit	2.0 mg/L[1]	Silver, Non-Photo	No Limit	No Limit	0.25 mg/L
Copper	No Limit	No Limit	0.25 mg/L	Single Toxic Organic	No Limit	No Limit	0.75 mg/L
Cyanide	No Limit	No Limit	0.5 mg/L[1]	Suspended Solids	No Limit	No Limit	6000 mg/L
Fluoride	No Limit	No Limit	65 mg/L	Total Dissolved Solid	No Limit	No Limit	10000 mg/L
Formaldehyde	No Limit	No Limit	5.0 mg/L[1]	Total Toxic Organics[6]	No Limit	No Limit	1.0 mg/L
Lead	No Limit	No Limit	0.5 mg/L[1]	Zinc[7]	No Limit	No Limit	2.0 mg/L[1]

[1]If the discharge at any single sampling location exceeds 50,000 gpd, the local discharge limit for that location shall not exceed ONE-HALF (1/2) of the local limit listed above.

[2]Dental facilities using mercury-containing amalgam shall not exceed a local discharge limit of 0.05 mg/L for mercury.

[3]These limits refer to either grab or 24-hour composite samples.

[4]This limit applies only to the following EPA categories: Non-EPA Non-SIUs, Metal Finishing (Copper), and Electroplating. This limit also applies to cooling towers discharging < 2,000 gpd at any facility.

[5]Where pH is monitored continuously, no individual deviation from this range may exceed 20 minutes in length for discharges < 10,000 gpd, nor 10 minutes in length for discharges > 10,000 gpd. The total time of deviations during any seven day period shall not exceed 60 minutes. Any pH reading ≤ 2.0 or ≥ 12.5 is prohibited.

[6] See Section XIII of this permit for a list of components of Total Toxic Organics.

[7]Vehicle service facilities shall not exceed a local discharge limit of 4.0 mg/L for zinc.

V. Quality Assurance/Quality Control: (MVCC 35.32.13 & 40 CFR 136)

All metals samples must be collected in duplicate and stored and preserved until the next sampling event for that parameter. The duplicate sample must be labeled as a duplicate and made available to any City inspector.

VI. Sample Collection and Analysis: (MVCC 35.32.13.3, 40 CFR 403.12(g)&(h), 40 CFR 136)

All metals shall be collected as specified in the individual permit requirements. Cyanide and Total Toxic Organics (TTO) shall always be collected as grab samples. Samples shall be analyzed by an analytical laboratory approved by the State of Cal. Dept. of Health Services. Sample collection, preservation, and analysis shall be in accordance with EPA regulations (40 CFR 136) and the City of Mountain View's "Sample Collection, Analysis and Reporting Instructions".

VII. Violation Reporting & Follow-Up: (MVCC 35.32.6.2 & 40 CFR 403.12(f) & (g))

If the results of sampling or pH analysis exceed applicable limit(s), or any discharges meet the definition of hazardous waste, you shall:

1) VERBALLY NOTIFY THE CITY OF MOUNTAIN VIEW AT 650-903-6378 AND THE PALO ALTO WATER QUALITY CONTROL PLANT AT 650-329-2598 WITHIN 24 HOURS of knowledge of the violation. If an accidental discharge, slug discharge, or upset or failure of the pretreatment system occurs, verbal notification shall be made within 15 minutes of knowledge of the condition;

2) SUBMIT A WRITTEN REPORT WITHIN 15 WORKING DAYS of knowledge of the violation explaining: the cause, nature volume and duration of the violation, and mitigation measures taken to correct it and prevent reoccurrence;

3) INITIATE A SAMPLING/ANALYSIS PROGRAM demonstrating up to 21 consecutive days of compliance. The first sample result shall be submitted within 30 days of becoming aware of the violation.

VIII. Penalty Provisions: (MVCC 35.32.15)

Any person who violates any provision of this permit, "Notice of Violation", or Chapter 35 MVCC, may be subject to criminal, civil, or administrative penalties. Civil penalties shall not exceed $25,000/day per violation. Administrative penalties shall not exceed the following: (1) $2,000/day for failing or refusing to furnish technical or monitoring reports; (2) $3,000/day for failing or refusing to comply with a compliance schedule; (3) $5,000/day/violation for discharges in violation of any waste discharge limitation, permit condition, or requirement; and (4) $10/gallon for discharges in violation of any suspension, cease and desist order, or any prohibition issued by the City.

IX. Record-Keeping Requirements: (40 CFR 403.12(o))

All Industrial Users shall maintain records for all information resulting from any monitoring activities conducted. Such records shall include for all samples:

1) The date, exact place, method, and time of sampling and the names of the peron or persons taking the samples;
2) The dates analyses were performed;
3) Who performed the analyses;
4) The analytical techniques/methods used; and
5) The results of such analysis.

All Industrial Users shall maintain for a minimum of 3 years any records of monitoring activities and results, and shall make such records available for inspection and copying by the City of Mountain View and Palo Alto Water Quality Control Plant. This period of retention shall be extended during the course of any unresolved litigation regarding the discharge of pollutants by the Industrial User or the operation of the POTW Pretreatment Program or when requested by the Director or the Regional Administrator.

X. Notification of Changed Discharge: (40 CFR 403.12(j))

All Industrial Users shall promptly notify the City of Mountain View at 650-903-6378 and the Palo Alto Water Quality Control Plant at 650-329-2598 in advance of any substantial change in the volume or character of pollutants in their discharge, including the characteristic hazardous wastes for which the Industrial User has submitted initial notification under 40 CFR 403.12(p).

XI. Notification of Bypass: (40 CFR 403.17(c)(2))

All Industrial Users shall verbally notify the City of Mountain View at 650-903-6378 and Palo Alto Water Quality Control Plant at 650-329-2598 of an unanticipated bypass (intentional diversion of its wastestream from the treatment facility) within 24 hours from the time the Industrial User becomes aware of the bypass. A written submission shall also be provided within 5 days of the time the Industrial User becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

XII. Transferability of Permit: (MVCC 35.32.2.4)

This permit is not transferable without prior written notification to and approval by the City and the assumption of all permit conditions by the new owner/operator.

XIII. Definition of Total Toxic Organics: (40 CFR 469.12)

The term "total toxic organics" (TTO) means the sum of the concentrations for each of the following toxic organic components found in the discharge at a concentration greater than ten (10) micrograms per liter. The facility's local TTO and STO limits apply to all of the compounds listed below. Those compounds analyzed using EPA Method 601/602 or 624 are identified by a "■".

■Acenaphthene	■2-Chlorophenol	■Methyl bromide	■Diethyl phthalate	■4,4-DDT
■Acrolein	■1,2-Dichlorobenzene	■Bromoform	■Dimethyl phthalate	■4,4-DDE
■Acrylonitrile	■1,3-Dichlorobenzene	■Dichlorobromomethane	■1,2-Benzanthracene	■4,4-DDD
■Benzene	■1,4-Dichlorobenzene	■Chlorodibromomethane	■Benzo(a)pyrene	■Alpha-endosulfan

ENVIRONMENTAL COMPLIANCE PLAN
Certification Form

Facility ID:	**722**
Updated:	**2/10/2011**

Business Name
El Camino Paving, Inc.

Facility Street Address
924 San Rafael Avenue

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the above facility:

I certify that: (Check the appropriate box.)

☐ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. (See bottom of page for details.) If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☒ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: Daniel Campos Title: Maintenance Supervisor

Signature: [signature] Date: 5-25-11

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) I
Emergency Procedures

Facility ID:	722
Updated:	8/12/2009

Business Name
El Camino Paving, Inc.

Facility Street Address
924 San Rafael Avenue

Emergency response to hazardous materials spills or releases is the responsibility of the ***business owner.*** The role of the Fire Department is to provide ***assistance*** to your primary response actions. This site-specific Emergency Response (Contingency) Plan describes your facility's plan for dealing with reportable discharges and shall be implemented immediately whenever they occur. Employees must understand their roles and responsibilities during such an emergency through on-going training and drills. For larger facilities, a more detailed plan may be substituted, but it must include all the items listed here. ***This plan shall be maintained on site for use in the event of an emergency and for inspection by the Fire Department.***

1. Evacuation Plan:

The following alarm signal(s) will be used to begin evacuation of this facility:
☐ Bells ☐ Horns/Sirens ☒ Verbal (i.e. Shouting) ☐ Other (Alarm
☒ Evacuation map is displayed throughout the facility inc. entrances to hazmat locations.

2. a. Emergency Contacts:

Fire/Police/Ambulance ..... Phone No. [redacted]
California Emergency Management Agency..... ..... Phone No.

b. Post-Incident Contacts:

Fire Department Fire and Environmental Protection Division ..... Phone No.
Santa Clara County Department of Environmental Health..... Phone No.
Cal-OSHA Division of Occupational Safety and Health..... Phone No.
Bay Area Air Quality Management District ..... Phone No.
Regional Water Quality Control Board ..... Phone No.

c. Emergency Resources:

Poison Control Center..... Phone No.
Nearest Hospital: El Camino Hospital Phone No.
Address [redacted] City: Mountain View
Hazwaste Cleanup Contractor: Nor Cal Oil Phone No. [redacted]
Contact Name: Emma Puitt EPA ID#: CAD982417255

3. Arrangements With Emergency Responders:

If you have made arrangements with any police department, fire department, hospital, cleanup contractor, or State or local emergency response team to provide specific emergency services, describe them below:

4. Emergency Procedures:

Emergency Coordinator (EC) Responsibilities:
a. Whenever there is a reportable hazardous materials spill or release emergency, the EC (or his/her designee) whose name is **Estevan L. Alva** and job title is **President** shall:
i. Identify the character, source, amount, and aerial extent of any released hazardous materials.

Daniel Campos Maintenance Supervisor

ENVIRONMENTAL COMPLIANCE PLAN
Emergency Response (Contingency Plan) I
Emergency Procedures (Con't)

Facility ID:	722
Updated:	8/12/2009

Business Name
El Camino Paving, Inc.
Facility Street Address
924 San Rafael Avenue

Emergency Coordinator (EC) Responsibilities (Continued):

ii. Assess possible hazards to human health or the environment that may result from the emergency. This assessment must consider both direct and indirect effects.

iii. Activate internal facility alarms or communication systems, where applicable, to notify all facility personnel.

iv. Notify and act as a liasion with the "Emergency Contacts" listed in item 2.a on the previous page.

v. Monitor for leaks, pressure build up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the emergency.

vi. Take all reasonable measures necessary to ensure that the emergency does not occur, reoccur, or spread to

b. Before facility operations are resumed in areas of the facility affected by the emergency, the EC shall:

i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from the emergency at the facility.

ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the emergency until cleanup procedures are completed.

iii. Ensure that all emergency equipment is cleaned, fit for use, available for use, or properly disposed of.

iv. Notify the applicable "Post-Incident Contacts" listed in item 2.b on the previous page.

Responsibilities of Personnel **Other** Than the EC:

Function:	*Name and Job Title:*
Shutdown of Operations/Systems:	Estevan L. Alva/President Melissa A Campos
Evacuation of Building Personnel:	Estevan L. Alva/President Melissa A. Campos
Oversight of Outside Assembly Areas:	Walter Roland/Foreman Daniel Campos
Medical Treatment For Injuries (First Aid, CPR, etc.):	Estevan L. Alva/President Melissa A Campos

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials emergency that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any emergency situation which triggers implementation of this plan, a written Emergency Incident Report must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control and the Fire and Environmental Protection Division of the Mountain View Fire Department. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and complete description of the emergency;
d. Name and quantity of the hazardous material(s) involved;
e. The extent of personal injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where applicable;
g. The estimated quantity and disposition of recovered material that resulted from the emergency;
h. The cause(s) of the emergency;
i. The actions taken in response to the emergency; and
j. Administrative or engineering controls installed to prevent such emergencies in the future.
