

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Summit High School Stadium Improvements Project

Lead Agency: Fontana Unified School District

Contact Name: Samer Alzubaidi

Email: Samer.Alzubaidi@fusd.net Phone Number: 909.357.7521 ext. 29461

Project Location: Fontana San Bernadino
City *County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project includes improvements to the Summit High School's existing track and field to comply with California Interscholastic Federation (CIF) requirements. Proposed improvements include replacement of the existing bleachers and addition of new bleachers on the northern and southern sides of the field thereby increasing spectator capacity; a new press box; replacement of the existing portable lights with six new 80-foot Musco field lights around the perimeter of the field; new home and visitor team rooms; a new cheer/wrestling team building; a new entry building; fire access improvements; and landscaping improvements. The proposed project would allow Summit HS to relocate their home football games, which are currently played at A.B. Miller HS, to their own stadium. The proposed project would result in expanded use of the track and field for the relocated football games and would move existing sport games and practices that are currently played in the afternoons to the evenings.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The environmental assessment presented in the Initial Study/Mitigated Negative Declaration (IS/MND) identified environmental impacts that would be potentially significant unless mitigation measures (MM) are incorporated into the project for Cultural Resources (archaeological resources), Geology and Soils (paleontological resources), and Tribal Cultural Resources.

The Cultural Resources MMs would retain a qualified archaeologist and contact local tribe representatives if cultural resources are discovered during project activities. The MMs would ensure that any impacts to cultural resources, including discovery of human remains that may be of tribal descent, would be less than significant. The Geology and Soils MM requires the retention of a qualified paleontologist if paleontological resources are discovered on-site. The Tribal Cultural Resources MMs require the District contact local tribe representatives upon the discovery of cultural resources on the site. The IS/MND analysis determined that all impacts from the proposed project would less than significant after mitigation.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Project implementation would potentially cause controversy regarding the topic of aesthetics, specifically light and glare.

Provide a list of the responsible or trustee agencies for the project.

The following agencies would have ministerial review and approvals over the proposed project:

- Division of the State Architect (Approval of Construction Drawings)
