NOTICE OF INTENT TO ADOPT A MITIGATED NEGATIVE DECLARATION ON THE ENVIRONMENTAL IMPACT FOR THE SAN JOAQUIN RIVER MULTI-BENEFIT PROJECT

Notice is hereby given that at a meeting scheduled for **September 8, 2026**, the Board of Trustees of Reclamation District No. 341 will consider the approval and adoption of a Mitigated Negative Declaration on the environmental impacts of the project entitled "San Joaquin River Multi-Benefit Project."

Project Description: The purpose of the San Joaquin River Multi-Benefit Project is to rehabilitate the levee section from Station 330+00 – 368+00 to the Delta Specific PL 84-99 Standard and reconstruct a portion of the Sherman Island East Levee Road. The work will include raising the levee crown to achieve sufficient freeboard above the 100-year flood elevation and stabilizing the landside slope through the construction of a toe berm. In addition, the project will establish approximately 1 acre of Hedgerow Habitat at the levee toe berm. Construction will occur in 2027.

Project Location: The project is located on Sherman Island, in southwest Sacramento County, California. The project site is located along a segment of Sherman Island East Levee Road, approximately 1.4 miles east of Sherman Island Cross Road, and its centroid is 38°2'52.78" N, 121°42'30.32" W.

Hazardous Waste Lists: No known hazardous waste sites exist in the project area.

Public Review and Time for Comment: The proposed Mitigated Negative Declaration and Initial Study are available for public review and comment until 5:00 p.m. on **August 14, 2026**. Comments received after this time will not be accepted. At the above scheduled meeting, the Board of Trustees will consider the public comments and will decide whether to adopt a Board resolution approving the proposed Mitigated Negative Declaration. Copies of the Initial Study/Mitigated Negative Declaration are available for review at the District Engineer's office during normal business hours; in addition, submit all comments to the following address:
