1 INTRODUCTION

Ninyo & Moore was retained by DRP Engineering (herein referred to as the client) to perform a Phase I Environmental Site Assessment (ESA) of the property at 349 Lakeview Avenue in Long Beach, California (hereinafter referred to as the subject property; Figure 1). We understand the subject property is currently vacant. The following sections discuss the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with the Phase I ESA.

1.1 Purpose

The objective of this ESA is to identify, to the extent feasible pursuant to the process described in ASTM International (ASTM) E1527, recognized environmental conditions (RECs), which are defined by ASTM as *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment*." Ninyo & Moore performed this ESA in conformance with the scope and limitations of ASTM E1527-21.

Identification of RECs fall into the following three categories: existing RECs (as defined above); Historical RECs (HRECs); or Controlled RECs (CRECs); additionally, *De Minimis* conditions, which are not RECs, may be identified as well. HRECs, CRECs, and *De Minimis* conditions are defined as follows:

- HREC – An HREC is defined as "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations [AULs] or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition." An example of an HREC could be a former gas station where a release of gasoline had occurred, but the subject property was cleaned up to an unrestricted land use standard.

- CREC – A CREC is defined as a "recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)." An example of a CREC could be a former gas station where a release of gasoline has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria.

- *De Minimis* condition – A *De Minimis* condition is defined as "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis* condition is not a recognized environmental condition nor a controlled recognized environmental condition." An

example of a *de minimis* condition could be oil staining of pavement which does not appear to impact the subsurface below pavement.

Additionally, per ASTM E1527-21, Section 1.5: "*This practice offers a set of instructions for performing one or more specific operations. This document cannot replace education or experience and should be used in conjunction with professional judgment. Not all aspects of this practice may be applicable in all circumstances. This ASTM standard is not intended to represent or replace the standard of care by which the adequacy of a given professional service must be judged, nor should this document be applied without consideration of a project's many unique aspects. The word "Standard" in the title means only that the document has been approved through the ASTM consensus process.*"

1.2 Scope of Services

Ninyo & Moore's scope of services for this Phase I ESA consisted of the activities listed below.

- Reviewed physical setting and background information.
- Performed a subject property reconnaissance.
- Reviewed federal, state, tribal, and local regulatory agency databases for the subject property and for properties located within a specified radius of the subject property.
- Reviewed reasonably ascertainable local regulatory agency files for the subject property, as applicable.
- Reviewed historical information for the subject property, such as historical aerial photographs, historical topographic maps, reverse street directories, Sanborn® Fire Insurance maps, and building department records.
- Reviewed user-provided information, as available.
- Reviewed other documents provided from third party sources, as available.
- Interviewed the property owner representative (if available) regarding the environmental status of the subject property.
- Prepared this Phase I ESA report, summarizing findings and providing opinions and conclusions regarding RECs at the subject property.

1.3 Significant Assumptions

Ninyo & Moore assumes the information sources from the third-party environmental database vendor, regulatory agencies, and interviewees utilized for this report provided adequate and accurate information. Other significant assumptions were not made during the preparation of this report.

1.4 Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental

consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The findings, opinions, and conclusions are based on an analysis of the observed subject property conditions and the referenced literature. It should be understood that the conditions of a subject property could change with time as a result of natural processes or the activities of man at the subject property or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control. Ninyo & Moore cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the subject property. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty altogether.

1.5 Special Terms and Conditions

This study did not include an evaluation of geotechnical conditions or potential geologic hazards. In addition, unless otherwise indicated in this report, this Phase I ESA does not include analysis of the following, which is not intended to be all-inclusive: asbestos-containing materials, methane gas, lead-containing surfaces, underground pipelines, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, or high voltage power lines.

1.6 User Reliance

This report may be relied upon by, and is intended exclusively for, the client and its assigns. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than these is undertaken at said parties' sole risk.

1.7 Involved Parties

Ms. Marlene Mattola, Senior Staff Scientist, performed regulatory and historical research and conducted the subject property reconnaissance on September 19, 2025. Mr. Benjamin White, Project Geologist, and Mr. Jeff Aguilar, Principal Geologist, performed quality review.

2 SITE DESCRIPTION

The following table provides a general description of the subject property. Photographs taken during the subject property reconnaissance are provided in Appendix A.

Table 1 – General Site Setting

General Site Setting	Description
Location	The subject property is located at 349 Lakeview Avenue in Los Angeles County, California (Figure 1).
Assessor Parcel No.	7249-002-900 (County of Los Angeles)
Property Owner	City of Long Beach
Size (approximate)	0.09-acre sewer lift station and proposed force main that runs 1,450 linear feet from the sewer lift station across Apian Way and Wendy Lane and northwest adjacent to Alamitos Bay
Subject Property Use / Occupants	Sewer lift station and proposed sewer force main
Structures	One structure
Roads	The subject property is bound to the northeast by Monrovia Avenue
Heating and Cooling Systems	None observed
Electricity Provider	Southern California Edison (SCE)
Sewer Disposal Provider	Long Beach Utilities Department (LBUD)
Potable Water Provider	LBUD
Natural Gas	Southern California Gas Company (SoCalGas)
Subject Property Vicinity Description	The surrounding area consists of residential and commercial developments.

2.1 Physical Setting

The following table summarizes topographic, geologic, and hydrogeologic conditions in the vicinity of the subject property, based upon the referenced documents review and/or our visual reconnaissance of the subject property.

Table 2 – Physical Setting

Physical Settings	Reference	Summary
Topography	B, D	The site elevation is approximately 10 feet above mean sea level (MSL). The site vicinity is relatively flat, with regional topography sloping gently to the east. According to flood zone and National Wetland Inventory (NWI) data presented in the EDR® Radius Map™ reviewed, the subject property does not lie within wetland delineated areas or the 100- year flood plains. However, the entire site boundary does lie within a designated 500-year flood plain. Flood zone and NWI data were obtained by EDR from the Federal Emergency Management Agency (FEMA) and the United States Fish and Wildlife Service, respectively.
Geology	C, E	The subject property is located within the Peninsular Ranges Geomorphic Province. The subject property is situated within the Coastal Plain of the Los Angeles Basin, which is bounded by the San Gabriel Mountains to the north, Santa Ana Mountains to the east, and the Pacific Ocean to the north-northwest. According to the "Geotechnical Evaluation" report, published in August 2023 by Ninyo & Moore, the materials encountered in exploratory borings at the subject property consisted of relatively small amounts of fill and marine shelf sediments. Fill associated with previous site grading was encountered from the ground surface to a depth of approximately 2 feet. The fill generally consisted of moist, very loose to loose, clayey sand. Marine shelf sediments were encountered beneath the fill to the total depths explored of up to approximately 56 feet. The shelf sediments generally consisted of moist to wet, soft to very stiff, fat clay and lean clay, and wet, loose to very dense, sandy silt, silty sand, poorly graded sand, and poorly graded sand with silt. According to the EDR report, 51 state groundwater wells and 272 oil and gas wells are present within a 1-mile radius of the subject property. No federal groundwater wells or public water supply wells are present within a 1-mile radius of the Subject Property. The subject property representatives were not aware of any current or former wells at the facility, and none were observed at the time of the subject property visit.

Table 2 – Physical Setting		
Physical Settings	Reference	Summary
Surface Water	A	Surface water bodies are not present on the subject property. The nearest surface water body is the Alamitos Bay, approximately 470 feet northeast of the subject property.
Groundwater	E	According to the "Geotechnical Evaluation" report, published in August 2023 by Ninyo & Moore, Groundwater was encountered at depths ranging from approximately 8 to 10 feet below the ground surface, with groundwater flow suspected of being tidally influenced. Groundwater levels and gradient can fluctuate due to seasonal variations, groundwater withdrawal or injection, changes in land use, and other factors.

3 USER-PROVIDED INFORMATION

Ninyo & Moore provided a user questionnaire which was completed by LBUD Engineering Manager Danna Monzon (respondent), and reviewed by Ninyo & Moore. A summary table of the responses is included below.

Table 3 – Summary of User-Provided Information	
User's Responsibilities	User's Responses
Title Records	Title records were not provided by the respondent.
Environmental Liens or Activity and Use Limitations (AULs)	The respondent was unaware of any Environmental Liens or AULs on the subject property.
Specialized Knowledge	The respondent was unaware of specialized knowledge about the subject property relevant to an environmental investigation.
Commonly Known or Reasonably Ascertainable Information	The respondent was unaware of any information about the subject property relevant to an environmental investigation.
Valuation Reduction for Environmental Issues	The respondent indicated that this is not applicable because there is no property purchase involved.
Reason for Performing Phase I ESA	The respondent stated that the purpose of the Phase I ESA was to determine the confirmed presence, likely presence, or material threat of the presence of any hazardous substances or petroleum products to the subject property.

4 RECORDS REVIEW

The following sections summarize records reviewed for the subject property.

4.1 Standard Environmental Record Source - Environmental Database Search

A computerized, environmental information database search was performed by Environmental Data Resources, Inc. (EDR) on September 8, 2025. The search included federal, state, tribal, and local databases. A summary of the environmental databases searched, their corresponding search radii, and number of noted properties of potential environmental concern, is presented in the EDR report (Appendix C). The review was conducted to evaluate whether the subject property or properties within the site vicinity have been documented as having experienced significant

unauthorized releases of hazardous substances or other events with potentially adverse environmental effects.

4.1.1 Geocoded (Mapped) Listings

Properties within up to one-mile radius of the subject property were listed on various regulatory agency databases. The following table lists databases that were searched and the number of listings (excluding non-geocoded [unmapped] properties).

Table 4 – Summary of Database-Provided Information

Database Name	Search Radius (mile)	Number of Listings
Federal Databases		
NPL (National Priority List)	1	0
Proposed NPL	1	0
NPL LIENS (Federal Superfund Liens)	1	0
Delisted NPL	1	0
FEDERAL FACILITY (Federal Facility Site Information listing)	0.5	0
SEMS (Superfund Enterprise Management System; formerly Comprehensive Environmental Response Compensation and Liability Information System)	0.5	0
SEMS-ARCHIVE (Superfund Enterprise Management System Archive)	0.5	0
CORRACTS (facilities subject to Corrective action under RCRA)	1	0
RCRA-TSDF (hazardous waste treatment, storage, or disposal facilities)	0.5	0
RCRA-LQG (large quantity generator)	0.25	2
RCRA-SQG (small quantity generator)	0.25	0
RCRA-VSQG (very small quantity generator)	0.25	0
US ENGINEERING CONTROL (EC)	0.5	0
US INSTITUTIONAL CONTROL (IC)	0.5	0
ERNS (Emergency Notification System)	TP	0
State/Tribal Databases		
Brownfields	0.5	0
RESPONSE (State Response Sites, State- and Tribal-equivalent NPL)	1	0
ENVIROSTOR (The DTSC's Site Mitigation and Brownfields Reuse Program; CERCLIS-equivalent)	1	5
SWF/LF (Solid Waste Information System)	0.5	0
LUST (GeoTracker's Leaking Underground Fuel Tank Report)	0.5	1
SLIC (Spills, Leaks, Investigation and Cleanup database by the California Regional Water Quality Control Board)	0.5	2
UST (registered underground storage tanks [USTs])	0.25	5
AST (registered aboveground storage tanks [ASTs])	0.25	0
FEMA UST (Underground Storage Tank Listing)	0.25	0
VCP (Voluntary Cleanup Program Properties)	0.5	0
Additional Environmental Databases		
CERS Haz Waste	0.25	1
CERS Tanks	0.25	1
RCRA NonGen/ NLR	0.25	33
FUDS (Formerly Used Defensive Sites)	1	1
UST FINDER	0.25	1
E MANIFEST	0.25	29
Hist Cortese (Hazardous Waste and Substance Site List)	0.5	1
Notify 65	1	1
EDR Hist Auto (EDR Exclusive Historical Auto Stations)	0.125	1

Notes:
DTSC – Department of Toxic Substances Control
TP – Target Property
LUST – Leaking Underground Storage Tank
RCRA – Resource, Conservation, and Recovery Act

According to the EDR report, the target property was listed in the CHMIRS database. The listing refers to a small sewage release in January 2018. The caller stated a pump station had failed, causing the release. The material impacted a flower bed and grass. However, the release was secured and a contractor completed the cleanup. This incident is not considered an environmental concern to the subject property.

Based on the environmental database review, ongoing impact concerns and open release cases were not identified in association with the subject property.

Off-site properties/facilities listed in the database report were evaluated as to their potential to impact soil, soil vapor, and/or groundwater at the subject property. To supplement the information in the EDR report, the State Water Resources Control Board (SWRCB) GeoTracker (SWRCB, 2025) and Department of Toxic Substances Control (DTSC) EnviroStor databases (DTSC, 2025) were reviewed. Information from the EDR database report and supplemental sources is included in the facilities of potential concern summaries below. The following property/facility was interpreted to represent a potential environmental concern to the subject property, based on the proximity to the subject property, the nature of the database on which it is listed, and/or the assumed direction of the groundwater flow in the site vicinity (east).

Table 5 – Summary of Off-Site Facilities of Potential Concern

Facility Name/ Address	Distance/ Direction from Site (Approximation by EDR)	Database	Summary
City of Long Beach Fire Station 14 5200 Eliot Street	Adjacent to the Northeast	UST, UST FINDER, CERS HAZ WASTE, CERS TANKS, CERS, E MANIFEST	The UST, UST FINDER, and CERS TANKS listings refer to two active 12,000-gallon USTs containing regular unleaded fuel and diesel fuel. Both USTs were installed in 1988. The CERS HAZ WASTE listing indicates that the facility is a generator of hazardous waste. Information regarding the type of waste was not provided. The CERS listing refers to multiple compliance violations including failure to continuously monitor the interstitial space of the tank, piping and/or sumps such that the leak detection activates an audible/visual alarm when a leak is detected and failure to report program data electronically. The violations are noted as having returned to compliance. No other violations have been identified for the facility. Given that no known releases have occurred and being hydrogeologically cross-gradient relative to the subject property, this facility is not considered an environmental concern to the subject property.

It is our opinion that there is a low likelihood that the listings for the other off-site properties listed in the database report represent a REC to the subject property at the current time. This opinion is based on one or more of the following factors:

- The nature of the database(s) on which the property is listed, and/or because the property was not listed on a database that reports unauthorized releases of hazardous substances;
- Reported regulatory agency status (i.e., case closed);
- Reported nature of the case (i.e., soil contaminated only);
- Reported distance of the property from the subject property; and/or
- Location of the property in relation to the subject property with respect to topography or expected groundwater flow direction (east).

4.1.2 Non-Geocoded (Unmapped) Listings

Unmapped properties are shown by EDR as Orphan Sites. According to the EDR Radius Map Report, Orphan Sites were not found for the subject property or site vicinity within the corresponding radii.

4.2 Additional Environmental Record Sources

According to the ASTM Standard, “if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed.” Records were requested from local regulatory agencies for the subject property address of 349 Lakeview Avenue. The review of regulatory agency records for the subject property address is discussed in the following sections. Other off-site facilities of potential concern to the subject property were reviewed on online environmental databases (i.e., GeoTracker and EnviroStor), which are discussed in Section 4.1.1. Regulatory records for the subject property are provided in Appendix D.

4.2.1 California Department of Toxic Substances Control (DTSC)

Ninyo & Moore requested records from the DTSC Cypress office for the subject property on September 17, 2025. According to representatives of the DTSC Cypress Offices, files were not found for the subject property address.

4.2.2 California Regional Water Quality Control Board (RWQCB), Los Angeles Region

Ninyo & Moore requested records for the subject property from the LARWQCB on September 17, 2025. According to representatives of the LARWQCB, files were not found for the subject property address.

4.2.3 City of Long Beach City Clerk

Ninyo & Moore requested records from the City of Long Beach City Clerk for the subject property on September 17, 2025. According to representatives of the City of Long Beach City Clerk, files were not found for the subject property address.

4.2.4 Los Angeles County Fire Department (LACFD)

Ninyo & Moore requested records for the subject property from the LACFD on September 17, 2025. As of the writing of this report, Ninyo & Moore has not received a response. This is not a data gap for the subject property, as information from the LACFD is unlikely to affect the conclusions of the report.

4.2.5 Los Angeles County Sanitation District (LACSD)

Ninyo & Moore requested records from the LACSD for the subject property address on September 17, 2025. As of the writing of this report, Ninyo & Moore has not received a response. This is not a data gap for the subject property, as information from the LACSD is unlikely to affect the conclusions of the report.

4.2.6 City of Long Beach Public Works

Ninyo & Moore requested records for the subject property from the City of Long Beach Public Works on September 17, 2025. As of the writing of this report, Ninyo & Moore has not received a response. This is a data gap for the subject property.

4.2.7 California, Department of Conservation, Geologic Energy Management Division (CalGEM)

Ninyo & Moore reviewed the CalGEM Well Finder Website for information regarding potential oil and gas wells in the vicinity of the subject property. The subject property is not within the administrative boundaries of an oil/gas field. The nearest oil and gas well (API 0403722104) listed as active is located approximately 1,200 feet to the southeast of the subject property. This is not considered an environmental concern for the subject property.

4.2.8 Online Regulatory Databases

Online regulatory databases were reviewed by Ninyo & Moore to supplement the environmental database search conducted by EDR. The following is a summary of information.

Table 6 – Online Regulatory Databases	
Online Database/Website	Findings
California Department of Toxic Substances Control (DTSC) EnviroStor	The subject property was not listed in the EnviroStor database. Off-subject property facilities were included in the EnviroStor database review within a ½-mile radius of the subject property. Information of environmental concern was not found.
State Water Resources Control Board GeoTracker	The subject property was reviewed on the GeoTracker database for pertinent information. The subject property was not listed in the Geotracker database. Off-subject property facilities were reviewed on the GeoTracker database review for pertinent information, which is discussed in Section 4.1.1.
City of Long Beach Methane Zone Map	According to the City of Long Beach online methane zone map, the subject property is within a mapped methane gas mitigation zone. Please refer to Section 9.5 for more information.
South Coast Air Quality Management District (SCAQMD) Facility Information Detail (FIND) Database	The subject property was reviewed on the SCAQMD FIND database for pertinent information. Information was not found for the subject property.

4.3 Site Historical Use Information

Ninyo & Moore conducted a historical record search for the subject property. This included a review of city directories, historical fire insurance maps, historical aerial photographs, topographic maps, and building department records. The following sections summarize information obtained from the historical sources utilized for this assessment.

4.3.1 City Directories

Available historical reverse street directories from 1920 through 2022 were researched by EDR. The subject property address of 349 Lakeview Avenue was not found within the EDR report.

4.3.2 Sanborn® Fire Insurance Maps

Sanborn® Fire Insurance maps were provided for the subject property and vicinity for the years 1950 and 1963. The Certified Sanborn Map Report is provided in Appendix E.

Table 7 – Sanborn® Fire Insurance Maps Summary	
Date	Summary
1950	The pump house appears constructed on the subject property. Appellation Way is present in its current configuration.
1963	No additional developments of environmental concern to the subject property.

4.3.3 Historical Aerial Photographs

Historical aerial photographs were provided by EDR for select years from 1928 through 2022. A 2025 aerial photograph was reviewed online using Google Earth™. A listing of the photographs reviewed and summary of notable observations from the photograph review are provided in the table below. EDR-provided aerial photographs are included in Appendix E.

Table 8 – Aerial Photographs Summary			
Date	**Source**	**Subject Property Summary**	**Subject Property Vicinity Summary**
1928	A	The subject property appears as undeveloped land with a rail line (Pacific Electric Railway) traversing the southern end of the subject property form northwest to southeast.	The site vicinity appears as vacant land with Alamitos Bay adjacent to the north and east and Pacific Electric Railway to the west-northwest and southeast of the subject property.
1947	A	The sewer lift station appears to be constructed on the southern end of the subject property; the proposed location of the force main east of the lift station along Monrovia Avenue and Lakeview Avenue also appears to have been constructed. The remainder of the subject property remains vacant land with sparse vegetation.	Single-family homes were constructed north, south, east, and west of the sewer lift station, while the surrounding area of the proposed force main remained vacant land; Will Rogers Middle School was also constructed to the west of the subject property during this time.
1952	A	The subject property was depicted similar to that observed in the 1947 aerial photograph.	The site vicinity was similar to that observed in the 1947 aerial photograph.
1963	A	The Pacific Electric Railway was removed and replaced with a paved road (Appian Way).	Appian Way is present west-northwest and southeast of the subject property.
1977	A	The remaining northern portion of the subject property was constructed with a paved parking lot.	Alamitos Bay no longer borders the northern property boundary; vacant land appears to be to the north of the subject property.
1979	A	The subject property was depicted similar to that observed in the 1977 aerial photograph.	A future park appears to be to the northeast of the subject property.
1983	A	The subject property was depicted similar to that observed in the 1979 aerial photograph.	Single-family homes were built to the west of where the run of the proposed force main.
1989	A	The subject property was depicted similar to that observed in the 1983 aerial photograph.	A paved bike path has been constructed to the north of the run of the proposed force main.
1994, 2002, 2005, 2010, 2014, 2018, 2022	A	No additional developments of environmental concern to the subject property.	No additional developments of environmental concern to the subject property vicinity.
2025	B	The latest aerial photographs provided by Google Earth Pro, dated September 2025, show the subject property and properties in the vicinity to be similar to the ones encountered during the property reconnaissance.	The subject property vicinity was similar to that observed during the site reconnaissance.

Sources:
A – Environmental Data Resources, Inc.
B – Google Earth™

The subject property appears as vacant/undeveloped land with Pacific Electric Railway traversing the southern end of the subject property from northwest to southeast as early as 1928. By the late-1940s, the sewer lift station appears to be constructed on the southern end of the subject property; the proposed location of the force main along Monrovia Avenue and Lakeview Avenue located east of the lift station also appears to have been constructed during this time; the remainder of the site appeared vacant. By the early 1960s, Pacific Electric Railway was removed and replaced with Appian Way. By the late 1970s, the remaining

northern portion of the subject property was constructed with a paved parking lot, bringing the subject property to its present-day configuration.

4.3.4 Historical Topographic Maps

Historical topographic maps for select years between 1896 and 2022 were provided by EDR from the Downey (1896, 1899, 1902, 1943, 1947), Long Beach, (1925, 1949, 1964, 1965, 1972, 1981, 2012, 2015, 2018, 2021, 2022), and Los Alamitos (1935, 1950, 1974) California Quadrangle Maps. Copies of the historical topographic maps are included in Appendix E.

Table 9 – Historical Topographic Maps Summary

Date	Site Summary	Site Vicinity Summary
1896, 1899, 1902	The subject property was depicted as undeveloped land with Alamitos Bay present on the southern half of the subject property.	The site vicinity appears as undeveloped land and Alamitos Bay.
1925	The subject property appears as undeveloped land with the Pacific Electric Railway traversing the southern end of the subject property.	The site vicinity appears as undeveloped land with Alamitos Bay adjacent to the north and east and the Pacific Electric Railway to the west-northwest and southeast of the subject property.
1935	The subject property is unmapped.	The subject property vicinity is unmapped.
1943, 1947,1949	The subject property was depicted similar to that observed in the 1925 topo map	Rogers Middle School is depicted to the west of the subject property.
1950	The subject property is unmapped.	The subject property vicinity is unmapped.
1964, 1965	The Pacific Electric Railway was removed and replaced with Appian Way.	Appian Way is present west-northwest and southeast of the subject property.
1972	The subject property was depicted similar to that observed in the 1965 topo map.	Alamitos Bay no longer borders the north-northeast property boundary. Undeveloped land appears to the north-northeast of the subject property.
1981	The subject property was depicted similar to that observed in the 1972 topo map.	The site vicinity was similar to that observed in the 1972 aerial topo map.
2012, 2015, 2018, 2021, 2022	Structures were not depicted on the subject property.	Structures were not depicted in the site vicinity.

4.3.5 Building Department Records

Ninyo & Moore searched for building department records for the subject property address on the City of Long Beach Public Works website. Records were not found for the subject property address.

4.4 Previous Reports

Previous environmental reports for the subject property either provided by the client, owner, or publicly accessible were reviewed for this Phase I ESA. The following section summarizes our review of the Ninyo & Moore geotechnical evaluation report of the subject property.

According to the “Geotechnical Evaluation” report, published in August 2023 by Ninyo & Moore, in July 2022, a geotechnical evaluation was performed to evaluate the cause of settlement and cracking of interior and exterior walls of the lift station that is approximately 100 years old, and to

provide recommendations for the rehabilitation work and for construction of a new force main. This assessment did not reveal any environmentally pertinent information.

4.5 Adjoining Property History

Historical maps indicate that the adjoining property was undeveloped land with Alamitos Bay adjacent to the north and east from as early as 1928; Pacific Electric Railway was also located to the west-northwest and southeast of the subject property during this time. By 1947, single-family homes were constructed adjacent to the north, south, east, and west of the sewer lift station, while the surrounding area of the proposed force main remained undeveloped land; Will Rogers Middle School was also constructed to the west of the subject property during this time. By the early 1960s, the Pacific Electric Railway was removed west-northwest and southeast of the subject property and replaced with Appian Way. By the late 1970s, Alamitos Bay no long bordered the north-northeastern property boundary; undeveloped land appears to be to the north-northeast of the subject property. By the early to late 1980s, single- family homes were built to the west and a bike path was constructed to the north of where the proposed force main will be developed on the subject property, bringing the surrounding area to its present-day configuration.

5 PRELIMINARY VAPOR ENCROACHMENT SCREENING

Ninyo & Moore conducted a preliminary vapor encroachment screen (pVES) for potential chemicals of concern (COCs) that may migrate as vapors onto the subject property as a result of contaminated soil and/or groundwater near the subject property. The purpose of the pVES is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of COC vapors in subsurface soils at the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject property. The potential for VEC beneath the subject property was evaluated using a Vapor Encroachment Screening Matrix (VESM). The VESM included performing a Search Distance Test to identify if there are any known or suspect contaminated sites surrounding or upgradient of the subject property within specific search radii, a COC Test (for those known or suspect contaminated sites identified within the Search Distance Test) to evaluate whether or not COCs are likely to be present, and a Critical Distance Test to evaluate whether or not COCs in a contaminated plume may be within the critical distance of the subject property (100 feet for non-petroleum contaminants, and 30 feet for petroleum hydrocarbon contaminants). Based on the results of the VESM, a VEC cannot be ruled out beneath the property due to historical rail line operations. A copy of the VESM is included in Appendix F.

6 SUBJECT PROPERTY RECONNAISSANCE

The objective of the subject property reconnaissance was to obtain information indicating the potential for RECs in connection with the subject property. Ms. Marlene Mattola conducted the

reconnaissance on September 19, 2025. Ms. Mattola was accompanied by Mr. Raymond Tan of DRP Engineering. A site plan is provided as Figure 2 and photographic documentation is provided in Appendix A.

6.1 Methodology and Limiting Conditions

The subject property reconnaissance consisted of walking on the subject property and along public sidewalks (for viewing of adjoining/nearby properties). Limiting conditions were encountered during the subject property reconnaissance: according to the site representative, the sewer lift station is owned by the City of Long Beach, and Ninyo & Moore did not have access to the interior of the sewer lift station at the time of the subject property visit, but made observations from of the lift station from beyond the boundary during the subject property reconnaissance.

6.2 General Site Setting

The sewer lift station is located on an approximately 0.09-acre parcel of land in Long Beach, California. A concrete sidewalk and driveway provide access to the 400 sq. ft. fully enclosed lift station on the southeast side of the property. The lift station is a two-level structure, with the upper level being an at-grade building and the lower level consisting of a wet well and dry pits. The bottom of the lower level is approximately 25 feet deep.

According to Mr. Raymond, the proposed new force main will run approximately 1,450 linear feet north-northeast and southeast from the lift station. The force main will start southeast of the lift station along Monrovia Avenue, continue northeast along Lakeview Avenue, cross over Appian Way and advance along Wendy Lane. At the end of Wendy Lane, the force main will continue northwest within the parking lot, alongside Alamitos Bay and will continue north until it reaches East 3rd Street.

According to Mr. Raymond, the existing lift station is inadequate for continued long term use and LBWD has decided to replace it with a new lift station. The new wet well and valve vault will be located parallel to the alley of Appian Way, in an open area on the north side of the existing lift station.

6.3 Adjoining Property Observations

Adjoining properties were observed from the subject property and from publicly accessible vantage points (e.g., streets, sidewalks) during the site reconnaissance. The properties adjacent to the subject property are as follows and as depicted on Figure 2:

- **North:** The north adjoining properties, across from Monrovia Avenue are single-family homes.

- **South:** The southeast adjoining property is a single-family home.
- **East**: The east adjoining properties, across from Monrovia Avenue are single-family homes.
- **West:** The west adjoining properties are single-family homes.

6.4 Site Observations

Ninyo & Moore evaluated the subject property for evidence of the following potential environmental concerns:

Table 10 – On-Site Observations

Conditions	Observed or Noted	Comments
Hazardous Substances/Petroleum Products		Not observed
Waste Generation/Storage/Disposal		Not observed
ASTs		Not observed
Potential Evidence of USTs		Not observed
Potential PCB-Containing Equipment		Not observed
Chemical/Petroleum Odors		Not observed
Concrete Patches/Pads		Not observed
Pools of Liquid		Not observed
Sewage Discharge Pipes		According to Mr. Raymond, the new force main will run approximately 1,450 linear feet north-northeast and southeast from the lift station. The force main will start southeast of the lift station down Monrovia Avenue, continue northeast down Lakeview Avenue, cross over Appian Way and advance down Wendy Lane. At the end of Wendy Lane, the sewer force main will continue northwest within the parking lot, alongside Alamitos Bay and will continue north until it reaches East 3rd Street. The integrity of the pavement was in good condition with no evidence of cracking or deterioration. No staining or signs of release were identified.
Floor Drains/Sumps		Not observed
Elevator		Not observed
Wells		Not observed
Drums		Not observed
Unidentified Substance Containers		Not observed
Stained Soil or Pavement		Not observed
Stressed Vegetation		Not observed
Pits, Ponds, or Lagoons		Not observed
Wastewater Discharges Disposal Systems		The existing lift station is a two-level structure, with the upper level being an at-grade building and the lower level consisting of a wet well and dry pits. No staining or signs of release were identified in the vicinity of the lift station.
Septic Systems/Cesspools		Not observed
Municipal Solid Waste Disposal Areas		Not observed

7 INTERVIEWS

The following table details information provided by the site owner for the subject property. The owner questionnaire is provided in Appendix B.

Table 11 – Interviews	
Representative	**Summary**
Owner	The property owner was not interviewed during the subject property reconnaissance. Information provided by DRP for the City of Long Beach is included in Section 7.
Past Owners	Past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past site owners were not conducted.

8 FINDINGS

Based upon the results of this Phase I ESA, the following findings are provided for the subject property.

- The subject property is located at 349 Lakeview Avenue in Los Angeles County, California. The Assessor's Parcel Number associated with the subject property is 7249-002-900. At the time of the property reconnaissance, the subject property was a sewer lift station and proposed force main that runs 1,450 linear feet north-northeast and southeast from the lift station.

- The subject property appears as undeveloped land with Pacific Electric Railway traversing the southern end of the Subject Property form northwest to southeast as early as 1928. By the late-1940s, the sewer lift station appears to be constructed on the southern end of the subject property; the proposed location of the force main along Monrovia Avenue and Lakeview Avenue located east of the lift station also appears to have been constructed during this time. The remainder of the site remains undeveloped. By the early 1960s, Pacific Electric Railway was removed and replaced with Appian Way. By the late 1970s, the remaining norther portion of the subject property was constructed with a paved parking lot, bringing the subject property to its present-day configuration.

- The historical presence of railroad tracks formerly operated by the Pacific Electric Railway traversed the southern end of the Subject Property form northwest to southeast from the mid-1920s through the early 1950s.

- A VEC cannot be ruled out beneath the property due to on-site historical rail line operations from approximately 1920s to the 1950s.

- Based on historical aerials and the estimated construction date of the structure located on the subject property (1947), asbestos containing materials (ACMs), lead-based paints (LBP), and polychlorinated biphenyls (PCBs) may be present in building materials on the subject property.

- According to the ArcGIS website, the subject property lies within a "methane gas mitigation zone".

9 OPINIONS

The rationale for concluding whether or not the conditions listed in Section 8, above, do not represent RECs, HRECs, or CRECs (i.e., the presence or likely presence of hazardous substances or petroleum products on a property under conditions indicative of releases, past releases, or a material threat of a release of hazardous substances, pollutants, contaminants, and/or petroleum/petroleum products at the subject property) is provided below.

9.1 RECs

Former Onsite Railroad: The historical presence of railroad tracks formerly operated by the Pacific Electric Railway traversed the southern end of the subject property form northwest to southeast from the mid-1920s through the early 1950s presents a potential for contamination in shallow soil resulting from leaks or spills from the railcars or historic application of surface chemicals during railroad operations. This is therefore, considered a REC to the subject property.

Vapor Encroachment Condition (VEC): A VEC may exist beneath the property due to on-site historical rail line operations (mid-1920s through the early 1950s) which represents a REC for the subject property.

9.2 CRECs

CRECs were not encountered during the preparation of this report.

9.3 HRECs

HRECs were not encountered during the preparation of this report.

9.4 De Minimis Conditions

De minimis conditions were not encountered during the preparation of this report.

9.5 Other Business Environmental Risks

Asbestos Containing Materials (ACMs) and Lead-Based Paint (LBP): Asbestos was banned in most friable building materials (spray-applied surfacing materials and thermal system insulation) in 1978, but the Occupational Safety and Health Administration (OSHA) deems thermal system insulation and surfacing materials as “presumed asbestos-containing materials” (PACMs) if they are present in buildings constructed no later than 1980 (Title 29 of the Code of Federal Regulations [CFR], Parts 1910.1001 and 1926.1101). Based on historical aerials, the estimated construction date of the subject property (1947), lead-based paint (LBP) and asbestos-containing materials may be present in building materials. In 1978, both LBP and ACMs were banned. However, due to the age of the building on the subject property, there is a potential that LBP and ACMs are present. Local regulations may apply to LBP and ACMs in association with building demolition/renovations and worker/occupant protection. Any construction activities that disturb the presence of ACMs or LBP may be subject to certain requirements under the Occupational Safety and Health Administration (OSHA). Further sampling and analysis of these materials would better determine whether LBP and/or ACMs are present onsite. During the subject property reconnaissance, Ninyo & Moore observed several suspect ACMs, including mastic, and roofing materials. These materials were observed to be in good condition during the subject property reconnaissance.

Ninyo and Moore inspected the subject property for types of electrical or hydraulic equipment that have been historically associated with the use of PCBs as a dielectric fluid coolant and stabilizer. Some examples of the types of equipment that potentially contain PCBs or PCB contaminated oil include electrical equipment such as transformers, capacitors, and high-voltage, liquid-filled switches. Ninyo and Moore identified building materials, primarily caulk, sealants, paints, roofing, and piping located within the sewer lift station on the south side of the subject property (built prior to 1980) that may be PCB-containing material.

According to the City of Long Beach, Community Development Department online methane zone website, the subject property is located within a "methane gas mitigation zone". Methane gas mitigation zones include sites immediately surrounding gas sources and where testing and sometimes mitigation are required.

9.6 Data Gaps

Ninyo & Moore requested records for the subject property from the LACFD, LACSD, and the City of Long Beach Public Works. As of the writing of this report, Ninyo & Moore has not received further responses.

10 CONCLUSIONS

We have performed a Phase I ESA, in conformance with the scope and limitations of the ASTM Practice E 1527-21, of the subject property located at 349 Lakeview Avenue in Long Beach, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 and in the body of this report. In connection with the property, this assessment has revealed the following RECs in connection with the subject property:

- The historical presence of railroad tracks formerly operated by the Pacific Electric Railway traversed the southern end of the subject property, which are suspect for environmental impacts to shallow soil at the subject property; and
- A VEC cannot be ruled out beneath the property due to on-site historical rail line operations, which represents a REC for the subject property.

Other Business Environmental Risks:

- Based on the construction of the onsite structure (1947), LBP, ACMs, and PCBs may be present in building materials on the subject property.
- According to the City of Long Beach, Community Development Department online methane zone website, the subject property lies within a "methane gas mitigation zone".

12 PROFESSIONAL STATEMENT

As required by 40 Code of Federal Regulations (CFR) §312.21(d) and Section 12.14 of ASTM 1527-21, the following statement is included:

> *I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.*

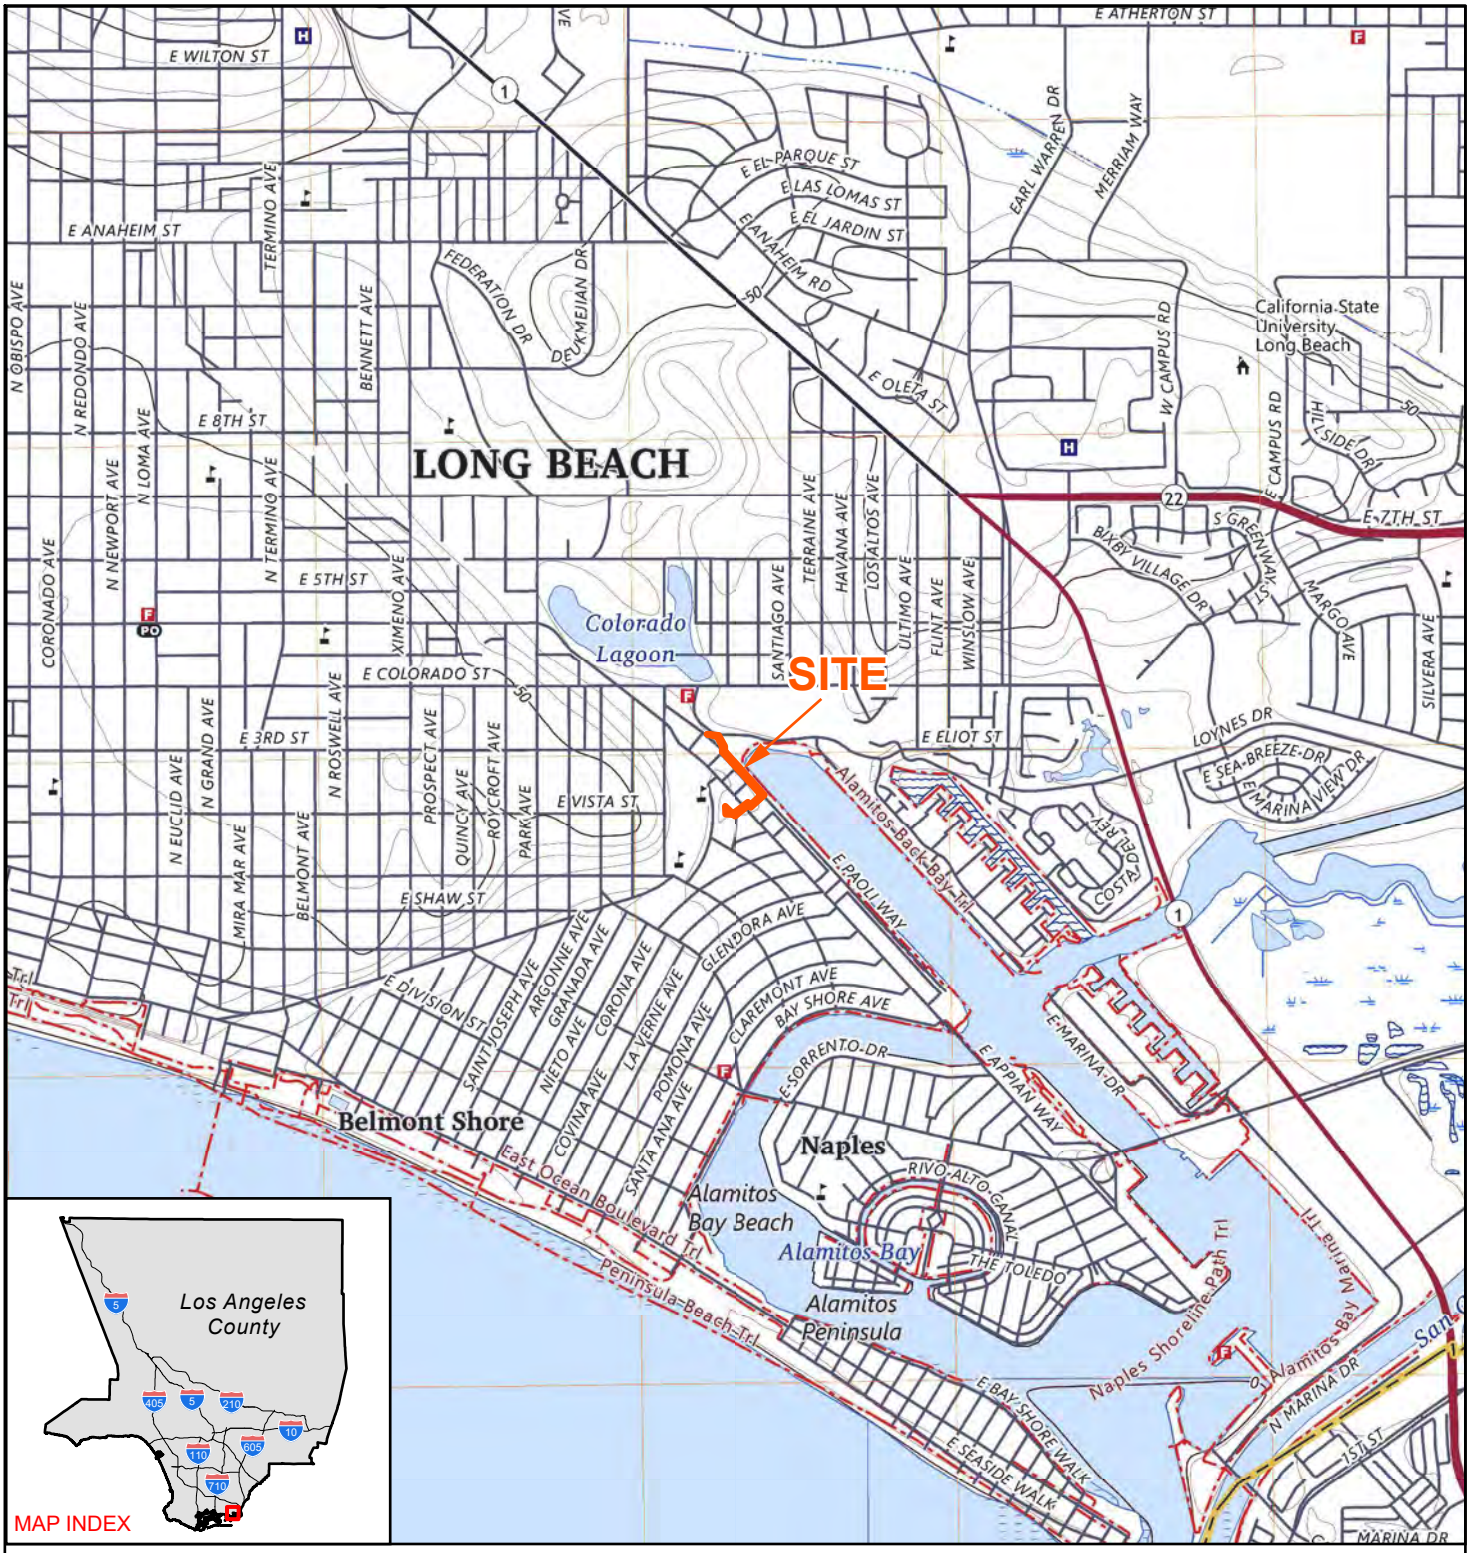

Jeff Aguilar, PG
Principal Geologist

13 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

Resumes, which document the professional qualifications, pursuant to 40 CFR §312.10(b)(2), of the persons that prepared and reviewed this report are provided as Appendix F.

User and Property Owner Information

PHASE I ESA QUESTIONNAIRE

Ninyo & Moore
Geotechnical & Environmental Sciences Consultants

Purpose: The property described below is referred hereafter as the "Subject Property". The purpose of this questionnaire is to facilitate the Environmental Professional in conducting an Environmental Assessment of the Subject Property on behalf of its Client. Please answer this questionnaire to the best of your ability by providing your personal as well as the institutional knowledge of your organization regarding the Subject Property.

Subject Property description:

Form Completed By:

Name: _____

Organization: _____

Address: _____

Telephone Number: _____

Email: Sewer Lift Station

You are:

The current owner ☑

The current occupant ☐

Past owner ☑

Past occupant ☐

Signature: _____ Date Completed: _____

Are any chemicals, such as (but not limited to) hazardous materials, pesticides, herbicides, petroleum products, or hazardous waste **Currently** or **Formerly** Brought/Used/Stored on the Subject Property?
S-7 Sewer Lift Station/ 349 Lakeview Ave, Long Beach,CA 90803

Has the site been graded or fill material ever brought onto the Subject Property?

Are or were Underground or Aboveground Storage Tanks **Currently** or **Formerly** present on the Subject Property?
No

Are you aware of any releases of hazardous materials or petroleum products onto the ground, groundwater or surface waters of the Subject Property?
No

Are or were there any wells, septic systems, or clarifier on the Subject Property?
No

Documents of Interest	Available	
Do You Have Any of the Following Documents of Interest With Respect to the Subject Property:	YES	NO
Phase I Environmental Site Assessment Reports		✔
Phase II Environmental Site Assessment with Subsurface Investigation Reports		✔
Environmental Audit Reports		✔
Property Information Sheet (Non-Residential properties)		✔
Environmental Permits (NPDES, industrial wastewater, solid waste, hazardous waste, etc.)		✔
Underground or Aboveground Tank Registration		✔
Hazardous Waste Generator Notices or Reports		✔
Material Safety Data Sheets (for chemicals in quantities greater than 5 gallons)		✔
Community Right-to-Know Plans		✔
Spill Prevention and Control Plans		✔
Past or Current Violation Notices at the Subject Property		✔
Environmental Liens on the Subject Property (or the parcel it is located on)		✔
Geotechnical Investigations or Studies		✔
Other Reports		✔

Knowledge With Respect to the Subject Property	Knowledge	
Do You Possess Knowledge Regarding Any of the Following with Respect to the Subject Property:	YES	NO
Pending, Threatened, Past Litigation Involving Hazardous Materials/Petroleum Products		✔
Pending, Threatened, Past Admin. Proceedings Involving Hazardous Materials/Petroleum Products		✔
Government Notice of Violation of Environmental Laws		✔
Government Notice of Possible Liability Involving Hazardous Materials/Petroleum Products		✔

PHASE I ESA
USER
QUESTIONNAIRE

Property Name/Address: **S-7 Sewer Lift Station/ 349 Lakeview Ave, Long Beach,CA 90**

Please respond to all of the following questions to the best of your knowledge. The purpose of this questionnaire is to assist the user (the client or party seeking to use the Phase I ESA) and the environmental professional in gathering information from the user that may be material to documenting Recognized Environmental Conditions (RECs) at the site. Please note that the user of the Phase I ESA (the client), if seeking protection from CERCLA liability, must adhere to a set of user responsibilities as defined by the American Society for Testing and Materials (ASTM) Standard Practice E1527-21 and the United States Environmental Protection Agency (EPA) 40 Code of Federal Regulations Part 312 titled "Standards and Practices for all Appropriate Inquiries (AAI)". Failure to provide this information could result in a determination that AAI is not complete.

Per ASTM Standard E1527-21 and 40 CFR Part 312 of the AAI rule, the user's responsibilities include, but are not limited to, the following:

- review reasonably ascertainable land title records, lien records, and/or judicial records to search for environmental cleanup liens or activity and use limitations (AULs) against the site filed or recorded under federal, tribal, state, or local law, or engage a title company to review such records. Evidence of environmental liens and/or activity and use limitations on the site, if discovered, must be provided to the environmental consultant;
- report to the environmental professional specialized knowledge or experience material to RECs in connection with the property;
- report to the environmental professional knowledge of environmental liens or AULs encumbering or in connection with the property;
- consider the relationship of the purchase price of the property to its fair market value and whether a lower purchase price is related to potential contamination;
- report to the environmental professional commonly known or reasonably ascertainable information material to RECs; and
- report to the environmental professional the reason for conducting the Phase I ESA.

User responsibilities, CERCLA liability relief, and AAI components are discussed in the AAI rule and in the ASTM E1527-05 standard.

1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

1a. Have you conducted a search for environmental cleanup liens that are filed or recorded under federal, tribal, state or local law?

◯ Yes ◯ No If yes, please describe:

1b. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

◯ Yes ◯ No If yes, please describe:

2) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry.

2a. Have you conducted a search for the existence of AULs, such as engineering controls, land use restrictions or institutional controls, that have been filed or recorded in a registry under federal, tribal, state or local law?

◯ Yes ◯ No If yes, please describe:

2b. Are you aware of any AULs that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

◯ Yes ◯ No If yes, please describe:

3) Specialized knowledge or experience of the person seeking to qualify for the liability protections (40 CFR 312.28).

As the user of this Phase I ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

◯ Yes ◯ No If yes, please describe:

4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

4a. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

◯ Yes ◯ No ◯ Not applicable (No Property Purchase Involved)

4b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

◯ Yes ◯ No If yes, please describe:

5) Commonly known or reasonably ascertainable information about the property (40 CFA 312.30).
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as the user,

a) Do you know the past uses of the property?
◉ Yes ○ No If yes, please describe: Sewer Lift Station

b) Do you know of specific chemicals that are present or once were present at the property?
○ Yes ○ No If yes, please describe:

c) Do you know of spills or other chemical releases that have taken place at the property?
○ Yes ○ No If yes, please describe:

d) Do you know of any environmental cleanups that have taken place at the property?
○ Yes ○ No If yes, please describe:

6) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?
○ Yes ○ No If yes, please describe:

7) What is the reason for having the Phase I ESA performed (ASTM 1527-21)?

Confirmed presence, likely presence, or material threat of the presence of hazardous substances or petroleum products.

8) Are you aware of any previously prepared documentation for the site, such as:

- previous Phase I ESA or Phase II ESA reports
- environmental sampling, compliance audit, or assessment reports
- environmental permits
- registrations for aboveground or underground storage tanks
- registrations for underground injections systems
- material safety data sheets (MSDS)
- community right-to-know plans,
- safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans
- geotechnical or hydrogeologic reports
- storm water documents
- risk assessments
- hazardous waste generator notices

◉ Yes ○ No If yes, please describe:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/21/2025 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 04/14/2025 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 33 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

U.S. NAVAL HOSPITAL		NE 1/2 - 1 (0.834 mi.)	Q56	207

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 06/02/2025 has revealed that there are 29 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Eval Notes: On-site to conduct a routine CUPA Hazardous Waste inspection of City of Long Beach Fire Station #14 on 12/11/24. Permission to inspect the facility was granted by Oliver Cruz Fuel Operations Program Officer. This facility is subject to Hazardous Waste generator requirements for generating wastes with fuel/hydrocarbons. Please note that there was no hazardous waste storage on site at the time of inspection. Facility has submitted to a full Hazardous Materials Business Plan to the California Environmental Reporting System. Additional details of the inspection are provided in this report. If you have any questions, please contact me at allan.cabudol@longbeach.gov This report was emailed to Oliver.Cruz@longbeach.gov

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators,

LONG BEACH USD-ROGERS JUNIOR HIGH (Continued) **1000231555**

transporters, and treatment, storage, and disposal facilities.

RWQCB Region:	LOS ANGELES RWQCB (REGION 4)
Site History:	Site is a currently a group of 128 occupied residential houses and residential properties which were developed in 2002 and 2003. It is

BAY SHORE LONG BEACH MANILA AVE TRACK (Continued) **S106483991**

located in the City of Long Beach, bordered by Colorado Street to the north, Eliot Street to the south, Bellflower Boulevard to the east, and Ultimo Avenue to the west. The Site is a flat, rectangular area of approximately 600 feet by approximately 850 feet, with a total area of approximately 12 acres. Ground surface elevation at the Site is approximately 5-feet above mean sea level. Historically, the Site was used for the production of crude oil between the late 1920s and 1999. The Site is within 300 feet of the Pacific Ocean at Alamitos Bay (Marina Pacifica), and groundwater is encountered at a depth of approximately 5 to 10 feet below ground surface (bgs). Soil at the Site is sand to silty sand in the upper 10 feet bgs, and clayey sands to clays in deeper zones. There are no designated beneficial uses for the groundwater at the Site due to saltwater intrusion. The nearest groundwater production well is approximately 2.5 miles to the north. Prior to 2003 the Site was owned by the former Bayshore Long Beach LLC (Bayshore), a defunct company, and it included at least one active oil production well (close to Ultimo Avenue and Eliot Street), twenty-seven abandoned oil wells, two above-ground storage tanks, a concrete sump and clarifier. Since 2003, New Urban West, Inc. (NUW), a currently active property management company administered development and sales, is the current responsible party for the Site, and the Site has been subdivided and sold to individuals as a group of residential properties. It is reported that between the late 1920s and late 1950s, approximately thirty-one oil wells, twelve sumps, and thirty above-ground storage tanks were located at the Site. A shallow soil investigation was conducted in December 1997 from 7 trenches and 5 hand augured borings. Results from eleven soil samples taken indicated concentrations of; total recoverable petroleum hydrocarbons (TRPH) up to 15,000 milligrams per kilogram (mg/kg), total petroleum hydrocarbons (diesel) (TPH-diesel) up to 14,000, total petroleum hydrocarbons (gasoline) (TPH-gasoline) up to 38,000 mg/kg, and lead up to 53 mg/kg. The highest concentrations were found in samples taken at 9 feet bgs. No VOCs were detected, with the exception of benzene detected at 0.01 mg/kg, toluene at 0.006 mg/kg, and xylenes at 0.03 mg/kg.

Completed Document Type: Request for Tribal Outreach
Completed Date: 04/14/2023
Comments: DTSC requested a Sacred Lands File search from the Native American Heritage Commission (NAHC) for this Site and a response was received. Letters were drafted and forwarded to the respective Tribes identified on the NAHC s contact listing. The letters detailed the anticipated work associated with the Site. This was done in July 2022. No response was received afterwards.

Completed Sub Area Name: Not reported
Completed Document Type: Request for Tribal Outreach
Completed Date: 04/14/2023
Comments: DTSC requested a Sacred Lands File search from the Native American Heritage Commission (NAHC) for this Site and a response was received. Letters were drafted and forwarded to the respective Tribes identified on the NAHC s contact listing. The letters detailed the anticipated work associated with the Site. This was done in July 2022. No response was received afterwards.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/26/2025
Date Data Arrived at EDR: 07/01/2025

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025

Next Scheduled EDR Contact: 10/06/2025
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/26/2025

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/05/2025

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Next Scheduled EDR Contact: 10/13/2025
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

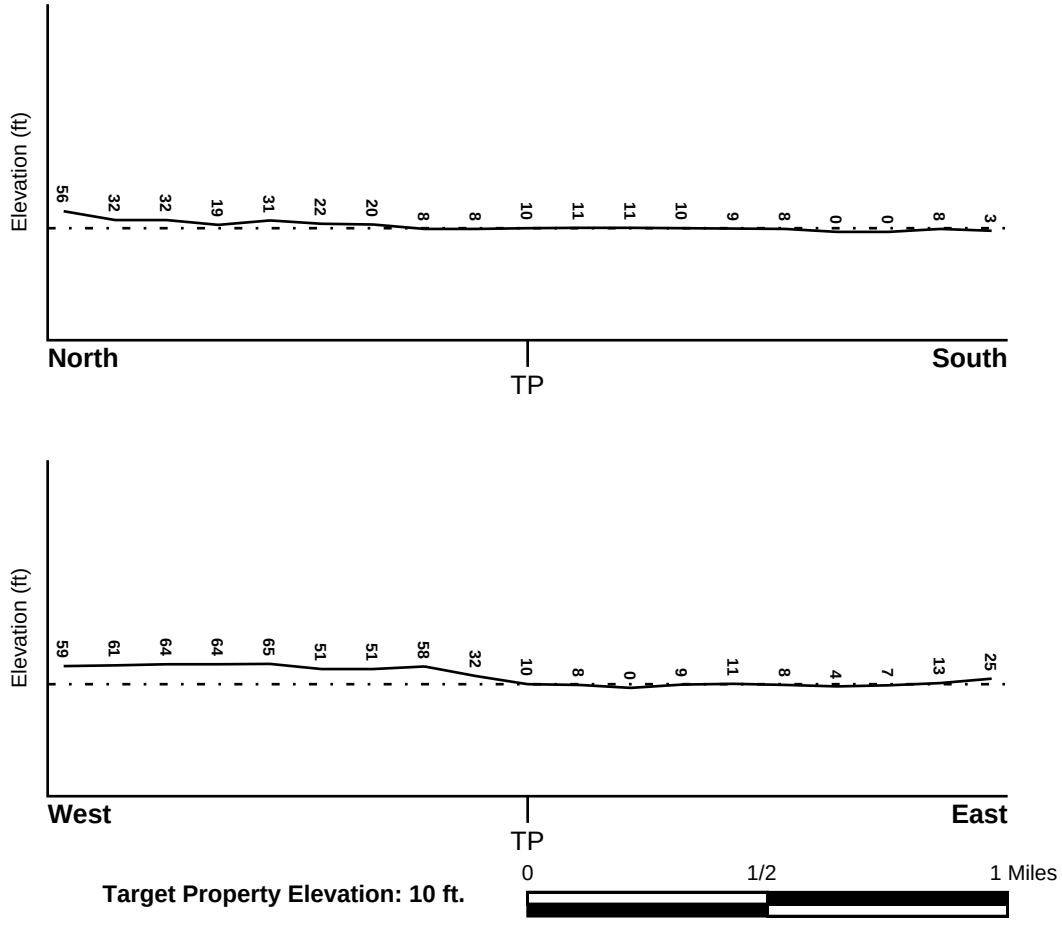

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 10 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1970F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1988F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NORTH LONG BEACH (OE)	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

APPENDIX E

Vapor Encroachment Screening

Phase I ESA Vapor Encroachment Conditions (VEC) matrix includes a (1) Search Radius Test, (2) Chemicals of Concern Test (COC), and (3) a Critical Distance Test [1].

(1) Search Radius Test: Are there any known or suspect contaminated properties in the primary area of concern within the corresponding search radii (including the site)?

☑ Yes ☐ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(2) Chemicals of Concern Test: Are COC likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?

☑ Yes ☐ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(3) Critical Distance Test*: A plume test to determine whether or not COC in the contaminated plume(s) may be within the critical distance.

☑ Yes ☐ No — (3a) Is information related to the contaminated(s) plume available (i.e. iso-concentration maps, site drawings, etc.)?
(3b) If ***No***, then a VEC cannot be ruled out; check ***Yes*** in #4 below indicating it is likely a VEC exists. If ***Yes***, then:

☑ Yes ☐ No — (3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

☑ Yes ☐ No — (3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

*If the distance from the nearest edge of a contaminated plume to the nearest existing or planned structure on the site is less than 100 feet for non-petroleum hydrocarbon COC, or less than 30 feet for dissolved petroleum hydrocarbons, then it is presumed that a VEC *currently* exists beneath the site. If the distance from the nearest edge of the contaminated plume is greater than or equal to 100 feet for non-petroleum hydrocarbons, or 30 feet for dissolved petroleum hydrocarbon chemicals of concern, then it is presumed unlikely that a VEC *currently* exists beneath the site.

(4) Is it likely that a VEC *currently* exists beneath the site?

☑ Yes ☐ No — If ***No***, then the VEC screening is complete and no further investigation is recommended at this time. If ***Yes***, Ninyo & Moore recommends performing additional assessment, such as a Tier 2 VEC assessment according to ASTM E 2600-10.

[1] Based on guidance presented in the ASTM E 2600-10 Standard.

The VEC to the subject property is associated with on-site historical rail line operations (1920 - 1950) which represents a REC for the subject property.

Benjamin White

Project Geologist

As a Project Geologist with Ninyo & Moore, Mr. White assists in the performance of Phase I and II Environmental Site Assessments, Third- Party Environmental Peer Review Services, Air Quality Monitoring, Groundwater and Soil Sampling, Human Health Risk Assessments, and the production of Health & Safety Plans. Mr. White is very familiar with soil vapor and indoor air screening levels and toxicity reference values, interpreting historical aerial photography for potential environmental concerns, basic surveying and Geographic Information Systems data workflows, and serving clients in escrow so that lender requirements regarding environmental due diligence and liability are addressed satisfactorily.

PROJECT EXPERIENCE

Robert Jones Ranch and Seco Ranch, Phase I Environmental Site Assessment, Oxnard, California: As a Project Geologist, Mr. White performed a Phase I Environmental Site Assessment (ESA) of a property in Ventura County with for various APN parcels and two property addresses located in Oxnard, California located southeast of Highway 232 and northwest of North Rose Avenue in Oxnard. The objective of this ESA is to identify, to the extent feasible pursuant to the process described in ASTM International (ASTM) E1527, recognized environmental conditions (RECs), which are defined by ASTM as the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; and the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."

City of Los Angeles, Phase I Environmental Site Assessment, Los Angeles, California: As a Project Geologist, Mr. White prepared the Phase I ESA for the Homeless Facilities Project located at 483 N. San Fernando Road Tiny Home Village. This work is being performed under Ninyo & Moore's current on-call contract with the City of Los Angeles for geotechnical and environmental services.

City of Corona, Phase I Environmental Site Assessment, Corona, California: As a Project Geologist, Mr. White prepared the Phase I ESA for a property at 901 W. Sixth Street in Corona. The study will generally follow the standard practices described in Section 6.2 of ASTM International (ASTM) Standard E 1527-21 and the United States Environmental Protection Agency's (EPA) All Appropriate Inquiries (AAI) rule (40 Code of Federal Regulations Part 312 Section 312.25).

Benjamin White,
Project Geologist

City of Inglewood, Phase I Environmental Site Assessment, Inglewood, California: As a Project Geologist, Mr. White prepared the Phase I ESA for properties at 1011 & 1035 South Prairie Avenue in Inglewood. The study will generally follow the standard practices described in Section 6.2 of ASTM International (ASTM) Standard E 1527-21 and the United States Environmental Protection Agency's (EPA) All Appropriate Inquiries (AAI) rule (40 Code of Federal Regulations Part 312 Section 312.25).

City of Lancaster, Phase I Environmental Site Assessment, Lancaster, California: As a Project Geologist, Mr. White prepared the Phase I ESA for properties Southeast of the East Avenue K and Division Street Intersection in Lancaster. Ninyo & Moore understands that the subject site is a vacant property that will be developed with a commercial building that will be 7,600 square feet of retail and two 2,400 square feet buildings that will be restaurants with drive thrus.

Former Chemical Manufacturing Site, Santa Fe Springs, California: As a Project Geologist, Mr. White provided environmental services to a private client related to Operations and Maintenance of a groundwater extraction and treatment system. Mr. White completed the regular servicing of field meters, an entrainment tank, bag filter housings, carbon vessels, and the recurring sampling of influent to, and effluent from, the primary carbon vessel to ensure that groundwater treated by the system was meeting Los Angeles County Sanitation Districts (LACSD) effluent discharge requirements prior to entering the LACSD water treatment system.

Active Dry-Cleaning and Former Grocery Store Site, Lancaster, California: As a Staff Geologist, Mr. White provided environmental consulting services to a private client related to a Phase II Environmental Site Assessment of soil vapor and indoor conditions for private client to assess whether historical operations of a dry cleaner that have utilized PCE may have impacted the site. Mr. White's environmental consulting services included on- site oversight of the subcontractor, preparation of a report documenting field operations and analytical results, and advising the client on results and any potential environmental concerns for future use of the site.

Former Refinery Site, Long Beach, California: As a Staff Geologist, Mr. White provided environmental and environmental consulting services to a private client related to SCAQMD Rule 1166 impacted soil emission monitoring during demolition of underground oil refining and storage appurtenances and installation of new underground appurtenances, soil sampling for impacts from historical refining and storage operations, on-site supervision of the installation of underground collection piping for a large soil vapor extraction system, and a Phase I Environmental Site Assessment for the site following completion of a warehouse building.

Jeff Aguilar, PG

Principal-in-Charge

EDUCATION

Bachelors in Geology, 1995, University of Nebraska, Lincoln

REGISTRATIONS/ CERTIFICATIONS

PG 8178 (California)

OSHA 40-hour HAZWOPER with

8-hour refreshers

OSHA 8-hour HAZWOPER Site Supervisor Training

First Aid and CPR Training

PROFESSIONAL AFFILIATIONS

South Coast Geological Society

As a Principal Geologist, Mr. Jeff Aguilar has extensive experience as an environmental geologist and project manager and is skilled in portfolio and project management, regulatory and client interactions, technical report writing and data analysis. His areas of expertise include developing investigative scopes of work, cost proposals; permitting; feasibility studies; remedial design and implementation; subcontractor management; operation of treatment systems; compliance monitoring; reporting and regulatory negotiations. He is knowledgeable in the regulatory process of federal, state, and local agencies including the United States Environmental Protection Agency (USEPA), California Regional Water Quality Control Board (RWQCB) Cal-EPA Department of Toxic Substances Control (DTSC), Southern California Air Quality Management District (SCAQMD) and Orange County Health Care Agency (OCHCA).

RELEVANT PROJECT EXPERIENCE

Weber Metals, 10700 & 10710 Sessler Street Phase I ESA, South Gate, California: Principal Geologist retained to conduct a Phase I Environmental Site Assessment (ESA) at 10700 and 10710 Sessler Street in South Gate, California (site) as part of a potential property acquisition. The Phase I ESA was conducted in accordance with ASTM Standard E1527-21. At the time of the site reconnaissance, the site was developed with two rectangular structures which are occupied by Precision Forging Dies, Inc. By 1949, structures were constructed west, northwest and south of the subject property.

City of Fontana, Phase I Environmental Site Assessment for 17001 Upland Avenue, Fontana, California: Principal Geologist for preparation of the Phase I ESA to evaluate the possibility that adverse environmental conditions are present at the site, due to past or present use of the site, and/or other properties in the site vicinity. The study followed the standard practices described in Section 6.2 of ASTM International (ASTM) Standard E 1527-21 and the United States Environmental Protection Agency's (EPA) All Appropriate Inquiries (AAI) rule (40 Code of Federal Regulations Part 312 Section 312.25).

David Grant Group, Phase I Environmental Site Assement for APNs 367-180-042 and -049 and 367-300-002 and -003, Wildomar, California: Principal Geologist for preparation of the Phase I ESA to evaluate the possibility that adverse environmental conditions are present at the site, due to past or present use of the site, and/or other properties in the site vicinity. The study followed the standard practices described in Section 6.2 of ASTM International (ASTM) Standard E 1527-21 and the United States Environmental Protection Agency's (EPA) All Appropriate Inquiries (AAI) rule (40 Code of Federal Regulations Part 312 Section 312.25).

ECORP Consulting, Phase I Environmental Site Assessment for Devil's Punchbowl Nature Center, Pearblossom, California: Principal Geologist for preparation of the Phase I ESA to evaluate the possibility that adverse environmental conditions are present at the site, due to past or present use of the site, and/or other properties in the site vicinity. The study followed the standard practices described in Section 6.2 of ASTM International (ASTM) Standard E 1527-21 and the United States Environmental Protection Agency's (EPA) All Appropriate Inquiries (AAI) rule (40 Code of Federal Regulations Part 312 Section 312.25).
