Present Land Use/Zoning/General Plan Designation:

utility rights-of-way and paved roadways, residential, Southeast Area Specific Plan

Project Description: (please use a separate page if necessary)

The proposed project involves the reconstruction of the existing Sewer Lift Station S-7 to conform with current City standards and facilitate continued, long-term use. Proposed improvements include the demolition of the existing lift station and the installation of a new circular wet well with submersible pumps and a rectangular valve vault and flow meter vault. Additionally, a new 8-inch-diameter sewer main would be constructed to connect the existing infrastructure to the new wet well. The total length of pipeline installed would be approximately 1,450 linear feet in existing City rights-of-way. The proposed project would also install a new generator building with associated electrical equipment. Upon completion, the proposed project would provide a total pumping capacity of 860 gallons per minute and a force main flow velocity of between 3 to 6 feet per second. The Project is not located on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
