Project Title: Open Space Element Update

Lead Agency: City of West Hollywood

Contact Name and Title: Emily Rotman, Assistant Planner

Email: erotman@weho.gov Phone Number: (323) 848-6802

Project Location: West Hollywood Los Angeles
City *County*

Project Description (Proposed actions, location, and/or consequences).

The City proposes a citywide General Plan amendment to update its existing Parks and Recreation Element and proposes to rename it the "Open Space Element" ("Project"). The amendment is being prepared in response to Senate Bill (SB) 1425, which requires local jurisdictions to address equitable access to open space, climate resilience, and rewilding opportunities in the open space element of the general plan. The Project addresses SB 1425 through updated background information, inventories, goals, policies, and implementation actions related to parks, recreation, and open space in West Hollywood. The Project includes information regarding disadvantaged communities, existing park service levels, current rewilding and urban greening efforts, and ongoing or planned parks and open space initiatives. The Project also includes revised and new policy direction intended to guide future decisions regarding parks, recreational facilities, and open space, with particular attention to equitable access, climate resilience, and rewilding. The Project is a policy document and does not approve or authorize any site-specific park, recreation, or open space improvement projects. The Project does not approve land acquisition, rezoning, subdivisions, construction, or funding for any specific capital improvement. Any future physical improvement or discretionary actions that may be pursued to implement the Project would be subject to separate review under CEQA, as applicable.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Project would result in no impacts in the categories of aesthetics, agriculture and forestry resources, air quality, biological resources, cultural resources, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, mineral resources, noise, population and housing, public services, recreation, transportation, tribal cultural resources, utilities and service systems, and wildfire.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None are known at this time.

Provide a list of the responsible or trustee agencies for the project.

None have been identified at this time.
