EXECUTIVE SUMMARY

AdvancedGeo, Inc. (AGI) conducted this Phase I Environmental Site Assessment for the property located at 2601 South California and 213 and 217 Novice Lane, Monrovia, Los Angeles County, California (subject property or property) in conformance with the scope and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries 'AAI' (40 CFR Part 312).

PROPERTY USE

The subject property is composed of three adjoining parcels, totaling 1.445-acres, located on the west side of South California Avenue, in the City of Monrovia, California. Two single-family dwellings (213 and 217 Novice Lane) are developed on the west portion of the property. The central area of the property (219 Novice Lane) is utilized as a storage yard. The east side of the property (2601 South California Avenue) is occupied by Don's Automotive, an auto repair shop.

Based on a review of historical documents, the subject property was developed agriculturally (orchards) in the late 1920s. By the late 1930s, the property was also developed residentially. The two current single-family dwellings were constructed on the west side of the property by the early 1950s. The current commercial building on the east side of the property was constructed by the mid-1970s. The central area of the property has been utilized for storage since the mid-2000s. The property has been occupied by various automotive repair tenants since at least the mid-1980s.

FINDINGS

Based on the standards set by ASTM Standard Practice E1527-13, a recognized environmental condition (REC) is the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Conditions that are determined to be *de minimis*, which do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies, are not recognized environmental conditions. Conditions that are considered Business Environmental Risk include the presence of asbestos-containing materials, lead-based paint, mold or moisture conditions, or non-hazardous regulated materials.

The standard further identifies historical RECs and controlled RECs. An historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. A controlled REC (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

The following findings are differentiated below as Business Environmental Risks and *de minimis* conditions unlikely to be subject to government enforcement, HRECs, CRECs and RECs.

BUSINESS ENVIRONMENTAL RISKS

This assessment has revealed no evidence of Business Environmental Risks in connection with the subject property except for the potential presence of asbestos-containing materials and lead based paint on all property structures. AGI recommends full asbestos and lead paint surveys be performed by a licensed contractor prior to any remodeling or demolition.

DE MINIMIS CONDITIONS

This assessment revealed no evidence of potential or *de minimis* conditions in connection with the subject property.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITION

This assessment has revealed no evidence of HRECs in connection with the subject property.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITION

This assessment has revealed no evidence of CRECs in connection with the subject property.

RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of RECs in connection with the subject property.

OTHER POTENTIAL ENVIRONMENTAL ISSUES

This assessment has revealed no evidence of other potential environmental issues in connection with the subject property, with the exception of the previous soil borings that were noted in Don's Automotive shop and in the welding shop area within the storage yards. The borings were drilled two years ago as part of a previous due diligence investigation by a residential developer. According to Mr. Gary Lorenzini, owner of the property, the data was to be provided to them by the developer, however, the results were never received. An attempt was made to obtain the results recently, however, the attempt was unsuccessful. Mr. Rick Ryan, owner of Don's Automotive, was told that the samples were clean.

In March 2021, AGI conducted a limited Phase II investigation, which included sampling near previous boring locations, with soil samples collected at 2 and 5 feet and soil vapor samples collected at 5 feet. Total petroleum hydrocarbons in the gasoline, diesel and oil ranges and volatile organic compounds were not detected in any of the soil samples. Metals that were detected in the soil were within normal background levels. Total petroleum hydrocarbons in the gasoline range and volatile organic compounds were not detected in the soil vapor.

CONCLUSIONS AND OPINION

AdvancedGeo, Inc. (AGI) has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-13, US-EPA AAI for the property located at 2601 South California and 213 and 217 Novice Lane, Monrovia, California. It is the opinion of the environmental professionals that the findings and conclusions presented in this report are reasonable and prudent, given

the evidence as presented. AGI did not identify any REC’s on the subject property during the course of the Phase I.

However, during the site visit, AGI observed previous soil borings in Don's Automotive shop and in the welding shop area within the storage yards. The borings were drilled two years ago as part of a previous due diligence investigation by a residential developer. According to Mr. Gary Lorenzini, owner of the property, the data was to be provided to them by the developer, however, the results were never received. An attempt was made to obtain the results recently, however, the attempt was unsuccessful. Mr. Rick Ryan, owner of Don's Automotive, was told that the samples were clean. Because the results could not be provided to AGI for review, AGI recommended that shallow soil and soil vapor samples be collected from the same areas to validate that no impact the subsurface had occurred in these areas.

AGI conducted a limited Phase II investigation, which included sampling near previous boring locations, with soil samples collected at 2 and 5 feet and soil vapor samples collected at 5 feet. Total petroleum hydrocarbons in the gasoline, diesel and oil ranges and volatile organic compounds were not detected in any of the soil samples. Metals that were detected in the soil were within normal background levels. Total petroleum hydrocarbons in the gasoline range and volatile organic compounds were not detected in the soil vapor.

Based on the findings of this investigation, it is AGI's opinion that no further environmental investigations are warranted at this time.

1.0. INTRODUCTION

AdvancedGeo, Inc. (AGI) has been retained by Chalmers Equity Group to perform a Phase I Environmental Site Assessment (Phase I) of the property located at 2601 South California and 213 and 217 Novice Lane, Monrovia, Los Angeles County, California (hereafter referred to as subject property or property). The Phase I was performed in conformance with the scope and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for 'All Appropriate Inquiries (AAI)' (40 CFR Part 312). The Phase I is designed to provide the Client (user) with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

1.1. PURPOSE

The purpose of the Phase I is to identify and assess environmental characteristics of the subject property that could lead to liability in the event of ownership, that could have a potential impact on property value or that could impact the present or future use of the subject property.

The purpose of ASTM Standard Practice E1527-13 and USEPA AAI is to define good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability: that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B). An evaluation of business environmental risk associated with a parcel of commercial real estate may necessitate investigation beyond that identified in this practice (based on ASTM Practice E1527-13).

The goal of ASTM Standard Practice E1527-13 is to identify recognized environmental conditions (RECs) in connection with the subject property. A REC is defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Conditions that are determined to be de minimis, which do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies, are not recognized environmental conditions.

The standard further identifies historical RECs and controlled RECs. An historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. A controlled REC (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

1.2. SITE DESCRIPTION

The subject property is composed of three adjoining parcels, totaling 1.445-acres, located on the west side of South California Avenue, in the City of Monrovia, California. Two single-family dwellings (213 and 217 Novice Lane) are developed on the west portion of the property. The central area of the property (219 Novice Lane) is utilized as a storage yard. The east side of the property (2601 South California Avenue) is occupied by Don's Automotive, an auto repair shop. Further property location descriptions, characteristics, improvements and site vicinity characteristics are discussed below.

1.2.1. Location and Legal Description

The subject property location can be identified as the following:

Site Address(es)	1. 2601 S California Ave Monrovia CA 91016-8216 2. 213 Novice Ln Monrovia CA 91016-5033 3. 217 Novice Ln Monrovia CA 91016-5033
Assessor's Parcel Number(s) (APN)	1. 8534-016-045 2. 8534-016-047 3. 8534-016-046
Property Owner	1. Rossiter Ronald D Co Tr Lorenzini G Cotr Lorenzini Trust 2. Lorenzini Gary L Co Tr Rossiter R 3. Rossiter Ronald D Co Tr
Land Use Type	1. Industrial 2. Resid. Single Family 3. Resid. Single Family
Zoning	Mom*
Legal Description	1. 1 H Polk Tract S 36.63 Ft of E 403.25 Ftex of St of Lot 4 and N 58.22 Ft of E 353.25 Ft Ex of St of Lot 5 2. I H Polk Tract W 50 Ft of E 403.25 Ft of N 142.22 Ft of Lot 5 3. 1 H Polk Tract S 84 Ft of N 142.22 Ft of E 353.25 Ft Ex of St of Lot 5
Size of Property	1. 0.719-acres 2. 0.167-acres 3. 0.559-acres Total: 1.445-acres

The parcel map and owner information were obtained from the County Assessor's Office or independent parcel search company. Copies of the parcel map and the owner information are provided in Appendix B.

1.2.2. Site and Vicinity General Characteristics

The subject property is located within a mixed residential and commercial area of the City of Monrovia, Los Angeles County, California. Figure 1 shows the setting of the subject property (7.5 Minute United States Geological Survey [USGS] Topographic Series, El Monte, California). Photographs of the subject property are provided in Appendix A.

1.2.3. Current Use of Property

Two single-family dwellings (213 and 217 Novice Lane) are developed on the west portion of the property. The central area of the property (219 Novice Lane) is utilized as a storage yards. The east side of the property (2601 South California Avenue) is

occupied by Don's Automotive, an auto repair shop, as well as a unit that is occupied by an independent window installer.

1.2.4. Proposed Use of Property

It is AGI's understanding that the proposed future property use is commercial/industrial.

1.2.5. Property Utilities

Current and known historic utilities serving the subject property are summarized in the following table:

Potable Water Source	City of Monrovia
Sanitary Sewer Utility	City of Monrovia
Storm Drain Utility	City of Monrovia
Electric Utility	Southern California Edison
Natural Gas Utility	So Cal Gas

1.3. DETAILED SCOPE-OF-SERVICES

Except where identified in Section 8.1., the scope of work for this Phase I conforms to ASTM Standard Practice E1527-13 and the USEPA AAI (40 CFR Part 312). Any additional User requested scope of services are discussed in Section 7.0.

1.4. SIGNIFICANT ASSUMPTIONS

Our professional services were performed using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar fields. Findings were based mainly upon examination of historical records, maps, aerial photographs and government agency lists, on a site reconnaissance visit, and on information obtained during personal interviews with persons of long term familiarity with the subject property as specified in ASTM E1527-13 and the USEPA AAI. Hazardous waste site lists presented in this report represents only a search of specific government records as listed below. AGI is aware additional government records may exist. It should be noted that government agencies often do not list all sites with environmental contamination or that the list could be inaccurate and/or incomplete.

Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent sites, are assumed based on geologic interpretations from available sources. AGI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.5. LIMITATIONS AND EXCEPTIONS

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AGI makes no warranty, expressed or implied, except that the services have been performed in

accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified as beyond the scope of an ASTM Phase I that may affect business environmental risks at a property include the following: asbestos-containing materials (ACMs); biological agents; cultural and historic resources; ecological resources; endangered species; health and safety; indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment; industrial hygiene; lead-based paint (LBP); lead in drinking water; mold; radon; regulatory compliance; and wetlands. These environmental issues may warrant assessment based on the type of property or transaction, however, they are considered non-scope issues under ASTM Practice E1527-13. Any addition of non-scope items must be agreed upon between the user and AGI prior to initiation of the Phase I.

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of investigation into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property visit.

1.6. SPECIAL TERMS AND CONDITIONS

There were no special terms or conditions, agreed upon by the environmental professional, beyond the initial agreed upon scope of work, used in preparation of this report.

1.7. USER RELIANCE

Conclusions and recommendations in this report are based on findings regarding historical use of the site, and on features noted during the site reconnaissance. The absence of any potential gross contamination sources, historic or present, does not necessarily imply that the site is free of any contamination. This report only represents a ‘due diligence’ effort as to the current environmental status of the site. No other warranty, expressed or implied, is made as to the professional recommendations contained in this report.

2.0. USER PROVIDED INFORMATION

According to the ASTM Standard E1527-13 and the USEPA AAI, in order to qualify for one of the Landowner Liability Protections (LLPs) to CERCLA liability offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the client (user) must provide to the environmental professional the following information (if available) in relation to the subject property:

AGI was not provided any specialized knowledge by the user and does have not any specialized knowledge of this property outside of what is contained in this report. The property ownership and tenants as well as all individuals who were interviewed as part of this investigation, have not reported any specialized knowledge of this property outside of what is contained in this report.

Title Records	A review of Title Records was not requested by the user.
Environmental Liens or Activity and Use Limitations	An environmental lien or AUL's (activity and usage limitations) search was not requested by the user.
Specialized Knowledge	AGI was not provided any specialized knowledge by the user and does have not any specialized knowledge of this property outside of what is contained in this report. The property ownership and tenants as well as all individuals who were interviewed as part of this investigation, have not reported any specialized knowledge of this property outside of what is contained in this report.
Commonly Known or Reasonably Ascertainable Information	The user provided no commonly known or reasonably ascertainable information available within the local community about the subject property that is material to recognized environmental conditions in connection with the property.
Valuation Reduction for Environmental Issues	No property valuation reduction related to environmental issues or concerns was reported by the user.
Owner, Property Manager, and Occupant Information	No written or verbal communication with the property owner, manager and/or occupant revealed any information which suggested that there are currently or historically any recognized environmental conditions associated with the subject property not noted in this assessment.
Reason for Performing Phase I	Potential property transaction
Other	No modifications to the ASTM E1527-13 standard scope-of-services were requested by the user for special circumstances that might be encountered at the subject property. Any additional user requested scope of services are discussed in Section 7.0.

Failure to provide the above information could result in a determination that 'all appropriate inquiries' are not complete. Additional items should be collected, if available, and provided to AGI.

3.0. RECORDS REVIEW

The purpose of obtaining and reviewing subject property and site vicinity historical, physical setting, and regulatory records is to help identify *recognized environmental conditions* in connection with the subject property.

3.1. HISTORICAL USE INFORMATION

The objective of consulting historical sources for a Phase I is to develop a history of previous uses of the property and surrounding area to help identify the likelihood of past uses having led to recognized environmental conditions with respect to the property. All obvious uses shall be identified from the present to the property's first obvious developed use, or back to 1940, whichever is earlier. Review of standard sources at less than five year intervals is not required.

3.1.1. Historical Use Information on Subject Property

Subject property history was researched by reviewing historical Sanborn Fire Insurance Maps (no coverage), aerial photographs, topographic maps, telephone directory information, the City of Monrovia Community Development Department records, and the Los Angeles County Assessor's Office records.

Based on a review of historical documents, the subject property was developed agriculturally (orchards) in the late 1920s. By the late 1930s, the property was also developed residentially. The two current single-family dwellings were constructed on

the west side of the property by the early 1950s. The current commercial building on the east side of the property was constructed by the mid-1970s. The central area of the property has been utilized for storage since the mid-2000s. The property has been occupied by various automotive repair tenants since at least the mid-1980s.

In summary, review of the historical documents revealed no features on the subject property of environmental concern. Representative historical records are provided within Appendix B.

3.1.1.1. Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas but are now utilized as a valuable source of historical and environmental risk information. EDR owns the largest collection of Sanborn Fire Insurance Maps. AGI requested EDR to provide any Sanborn Fire Insurance Maps that might cover the subject property. Sanborn map coverage was not available for the subject property.

3.1.1.2. Aerial Photographs

AGI reviewed aerial photographs of the subject property and surrounding area that were provided by EDR for the years 1928, 1938, 1948, 1952, 1964, 1972, 1977, 1979, 1983, 1989, 1990, 1994, 2002, 2005, 2009, 2012, and 2016. The following is a summary of our review of the aerial photographs:

Year(s)	Subject Property	Surrounding Area
1928	The property is developed agriculturally (orchards).	North: Developed as part of a large agricultural field (orchards). East: A road is visible in the location of South California Avenue. Beyond are orchards. South: The property appears to be a tilled agricultural field. West: Developed as part of a large agricultural field (orchards).
1938, 1948	The property is developed with two to three single-family dwellings and small outbuildings. A small area in the northern portion of the property remains developed as orchards. By 1948, a dirt road is visible along the southern property boundary.	North: Developed as part of a large agricultural field (orchards). By 1948, the property is developed with a single family dwelling. East: South California Avenue, the property beyond appears to be a tilled agricultural field. South: The property appears to be a tilled agricultural field. Several dwellings/farm structures are developed along California Avenue. West: Developed as part of a large agricultural field (orchards). By 1948, the property is developed with a single family dwelling.

Year(s)	Subject Property	Surrounding Area
1952, 1964, 1972	The property appears to remain developed with at least one dwelling in the southeast corner of the lot. Two new dwellings are constructed on the west side of the property. The remainder of the property is undeveloped.	North: The property is developed with numerous single family dwellings. East: South California Avenue, beyond are several single family dwellings. South: The property appears to be undeveloped. West: The property is developed with several single family dwellings.
1977, 1979, 1983, 1989, 1990, 1994, 2002	The property is developed with the current commercial building in the northeast corner of the lot. A parking area is present south of the building. Two dwellings and a garage remain on the west side of the property. The yard behind the homes appear to be utilized for storage/parking. The central area of the property is undeveloped land.	North: The property is developed with numerous single family dwellings. East: South California Avenue, beyond are several single family dwellings. By 1983, the property to the southeast is developed with the current multi-tenant warehouse. South: The property appears to be undeveloped. By 1983, the property is developed with the current multi-tenant warehouse. By 1989, Novice Lane is developed to the adjacent south. West: The property is developed with several single family dwellings.
2005, 2009, 2012, 2016	Between 2005 and 2016, the central areas of the property are utilized for storage. In 2016, the current shade canopy is added to the central, southern area of the property. The remainder of the property appears similar to previous photographs.	North: The property is developed with numerous single family dwellings. East: South California Avenue, the property beyond is developed with several single family dwellings to the northeast and a multi-tenant warehouse to the southeast. South: Novice Lane, followed by the current multi-tenant warehouse. West: The property is developed with several single family dwellings.

A review of historical aerial photographs did not reveal any items of environmental concern in connection with the subject property.

3.1.1.3. Historical Topographic Maps

AGI reviewed historical topographic maps of the subject property and surrounding area that were supplied by EDR for the years 1894, 1896, 1898, 1900, 1923, 1926, 1933, 1939, 1953, 1966, 1972, 1981, 1988, 1994, and 2012. The following is a summary of our review of the topographic maps:

Year(s)	Subject Property	Surrounding Area
1894,1896, 1897, 1900, 1904, 1923, 1925, 1926, 1927, 1928, 1939, 1941, 1953	The subject property is undeveloped vacant land.	California Avenue is located to the immediate east of the subject property. A single residence is located to the north of the property.

Year(s)	Subject Property	Surrounding Area
1966, 1972, 1981, 1988, 1994	The subject property is shaded red with urban tint. (The property and adjoining properties to the north, east, and south are unmapped in 1988 and 1994.)	Adjoining properties to the north, east and west are shaded with urban tint. The adjacent property to the south is undeveloped. The surrounding area has been developed. South Myrtle Avenue is mapped to the west, California Avenue to the east and Novice Lane to the south. Further to the west, water tanks are mapped. Further south large gravel pits are mapped.
2012	No buildings or property use details are mapped.	South Myrtle Avenue is mapped to the west, California Avenue to the east and Novice Lane to the south. Further south, large gravel pits are mapped.

A review of historical topographic maps did not reveal any items of environmental concern in connection with the subject property.

3.1.1.4. Street Directories

AGI requested that EDR provide a review of city and street directories to determine the occupancy history of the property for the years 1957, 1966, 1975, 1980, 1985, 1994, 1995, 1996, 1999, 2004, 2006, 2009, and 2014. The following is a summary of the city directory search:

Address	Year(s)	Directory Listing Summary
2601 South California	1985	Dons Automotive
	1994, 1995, 1999, 2004, 2009	C J Transmission Dons Automotive
	2014	Dons Automotive
213 Novice Lane	1957	Wright Donald R
	1980, 1985, 1994, 1995, 1999, 2004	Flores Martin J Flores Jackie
	2006	Flores Martin J Flores Jackie Elmore Kenneth
	2009	Flores Martin
	2014	Melissa Alexander
217 Novice Lane	1966	Holtquist Elsie A
	1975	Moreno Abel
	1980, 1985	Elmore Andrew N
	1996	Holtquist Elsie A
	2014	Rosie Munoz

A review of historical telephone directory listings of the subject property address did not reveal any items of environmental concern.

3.1.1.5. Building Department Records

A review of City of Monrovia Community Development Department records is summarized in the following table:

Address	Year(s)	Summary
213 Novice Lane	1969	Plumbing permit issued for the existing house.
217 Novice Lane	1979	Permit to install electrical service at a house.
2601 South California Avenue	1965	Correspondence addressed to the property owner indicating that the permit for construction of an apartment building has expired.
	1976	Renewed permit issued for an auto repair building. Notice of Change of Address. The property located at 2603 South California Avenue is now 2601 (A through E) South California Avenue.
	1984	Sign permit issued for C.J.'s Transmission. Correspondence from the owner of C.J.'s Transmission indicates that they have occupied a single stall at the property for seven years and recently acquired a second stall.
	2011	Reroofing permit.

A review of historical public building of the subject property address did not reveal any items of environmental concern, with the exception of the use of 2601 South California Avenue for auto repair.

3.1.1.6. Assessor's Records

AGI was unable to review property ownership records from the Los Angeles County Assessor due to closure of the Assessor's office during the COVID-19 pandemic.

3.1.1.7. Previous Phase I and II Environmental Site Assessments

No previous Phase I or II Environmental Site Assessments were provided to AGI by the user and/or property owner during the course of this Phase I.

3.1.2. Historical Use Information on Adjoining Properties

Historical use of immediately adjoining properties was agricultural land (orchards) from the late 1920s to late 1940s. Between the late 1930s and late 1940s, the properties to the north, south, and west are also developed residentially. The current single-family dwellings are developed to the north, northeast and west by the early 1950s. The properties to the southeast and south are developed with multi-tenant warehouse buildings in the early 1980s.

Historical uses of adjoining properties do not appear to be of environmental concern to the subject property.

3.2. PHYSICAL SETTING

Geology

The subject property is located in the Peninsular Range geologic province, which is characterized by northwest-trending topographic and structural features. The Peninsular Range province is bound by the Transverse Range province to the north and the Colorado Desert province to the west. The inland part of the Peninsular

Geology	Range province consists of numerous mountain ranges that are composed predominantly of igneous and metamorphic rocks of Mesozoic and Paleozoic age. An irregular coastal plain is located on the western edge of the province (including the Los Angeles Coastal Plain) which is composed predominantly of marine and non-marine clastic deposits of Upper Cretaceous, Tertiary and Quaternary age (CDM, 1954).
Hydrology	The subject property and surrounding area lie within the San Gabriel Valley Groundwater Basin (4-013). The San Gabriel Valley Groundwater Basin is located in eastern Los Angeles County and includes the water-bearing sediments underlying most of the San Gabriel Valley and includes a portion of the upper Santa Ana Valley that lies in the Los Angeles County. This basin is bounded on the north by the Raymond fault and the contact between Quaternary sediments and consolidated basement rocks of the San Gabriel Mountains. Exposed consolidated rocks of the Repetto, Merced, and Puente Hills bound the basin on the south and west, and the Chino fault and the San Jose fault form the eastern boundary (DWR 1966). The water-bearing materials of the basin are dominated by unconsolidated to semi-consolidated alluvium deposited by streams flowing out of the San Gabriel Mountains. These deposits include Pleistocene and Holocene alluvium and the lower Pleistocene San Pedro Formation. Based on information obtained from the State of California's Geotracker database, groundwater in the vicinity of the property is found at approximately 170-feet below surface grade and is inferred to flow to the south.
Topography	The property is located at an elevation of approximately 371 feet above mean sea level (MSL), in an area of moderate topographic relief. Regional slope of the area is toward the general south.
Surface Soils	EDR provides a report listing dominant soil composition in the general area of the subject property based on information from the United States Department of Agriculture's Soil Conservation Service STATSGO (State Soil Geographic Database) soil maps. Soil surface texture at the subject property consists of soil identified as urban land with a variable surface texture. Corrosion potential of this soil for uncoated steel is not reported.
Surface Water Features	There are no surface water features on the subject property. The nearest surface water feature in the vicinity of the subject property is the Sawpit Wash approximately 400-feet to the southeast.
Flood Zone	The EDR database report shows that the subject property is not located within either a 100-year or 500-year Flood Zone. This data, available in select counties across the country, was obtained by EDR from the Federal Emergency Management Agency (FEMA) which has maps depicting FEMA-defined 100-year and 500-year flood zones.
Wetlands	The EDR database report shows that the subject property is not located within the National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR from the U.S. Fish and Wildlife Service.

3.3. STANDARD ENVIRONMENTAL RECORD SOURCES

A computer search of federal, state and regional regulatory agency databases was performed by Environmental Data Resources Inc. (EDR), a data retrieval company, to identify and locate properties in areas of concern that have been reported as sites known or suspected to contain underground storage tanks, or to have been the scene of hazardous materials spills. Additionally, sites permitted to manufacture, utilize, generate, store, treat or dispose of hazardous materials and/or hazardous wastes are identified and located. A list and description of databases investigated, in compliance with ASTM E1527-13 and USEPA AAI, is included in EDR Report provided in Appendix C.

3.3.1. SUBJECT PROPERTY DATABASE SEARCH

Subject property address 2601 South California and 213 and 217 Novice Lane, Monrovia, California was listed on the following governmental databases in the EDR Report:

Site Name: HP TRANSMISSION
Databases: HWTS
Comments: 2007 - 2008
Not otherwise specified

Site Name: DONS AUTOMOTIVE
Databases: HAZNET, HWTS
Comments: 1998-2005
The site generated organic liquids with metals, and aqueous solution with total organic residues less than 10 percent.

Site Name: DONS AUTOMOTIVE
Databases: EDR Hist Auto
Comments: 1991-2014
The site is listed under Automotive repair shops for:
Don's Automotive, CJ's Transmission, HP Transmissions,

Site Name: C JS TRANSMISSION
Databases: EDR Hist Auto
Comments: 1986-1990
The site is listed as a Automotive/ Transmission repair shop for CJs Transmission

Site Name: BICOL MOTORS
Databases: CERS, HAZNET, HWTS, CERS HAZ WASTE
Comments: 2003, 2010, 2012, 2014, 2016, 2017, 2018, 2019, 2020
The site was a hazardous waste generator, waste oil and mixed oil, other recovery of reclamation for reuse including acid regeneration, chemical storage facilities

Site Name: CJ'S TRANSMISSION, INC.
Databases: HWTS
Comments: 2002 - 2007
The site is listed as a automotive transmission repair shop

Site Name: CJS TRANSMISSION INC
Databases: EDR Hist Auto
Comments: 1996-1997
The site is listed as a automotive transmission repair shop

Site Name: DONS AUTOMOTIVE
Databases: FINDS
Comments: 2013-2016
The site is listed as a general automotive repair shops

Site Name: CJ'S TRANSMISSIONS, INC
Databases: HAZNET, HWTS
Comments: 1996-2003
The site generated waste oil and mixed oil.

3.3.2. SITE VICINITY DATABASE SEARCH

Sites with recognized environmental conditions surrounding the subject property are typically of concern to the subject property when they are located in an up-gradient direction from the property with respect to the ground water flow direction. Typically,

groundwater would represent the migration medium for contaminants over significant distances. Sites located in equi-gradient or down-gradient directions from the subject property are less likely to impact the subject property.

AGI retained EDR to provide current regulatory database information compiled by a variety of federal and state regulatory agencies. A copy of the complete database is included in Appendix C. The following information was obtained:

Regulatory Agency Database	Appropriate Minimum Search Distance (AMSD)	Number of Sites within AMSD
National Priority List	1	1
RCRA - Large Quantity Generators	0.25	1
RCRA - Small Quantity Generators	0.25	1
Engineering Controls Sites List	0.5	1
Superfund (CERCLA) Consent Decrees	1	1
Facility Index System/Facility Registry System	0.001	1
EDR Exclusive Historical Auto Stations	0.125	3
Superfund Enterprise Management System	0.5	1
Records Of Decision	1	1
RCRA - Non Generators / No Longer Regulated	0.25	5
Solid Waste Information System	0.5	7
Leaking Underground Fuel Tank Report (GEOTRACKER)	0.5	9
Hazardous Substance Storage Container Database	0.25	2
Aboveground Petroleum Storage Tank Facilities	0.25	1
"Cortese" Hazardous Waste & Substances Sites List	0.5	7
SWEEPS UST Listing	0.25	2
CERS HAZ WASTE	0.25	3
EnviroStor Database	1	1
Hazardous Waste Tracking System	TP	8
Proposition 65 Records	1	1
Methane Producing Landfills	0.5	2
Well Investigation Program Case List	0.25	1
Waste Management Unit Database	0.5	4
Facility and Manifest Data	0.001	3
EnviroStor Permitted Facilities Listing	1	1
Hazardous Waste & Substance Site List	0.5	6
Facility Inventory Database	0.25	1
CalEPA Regulated Site Portal Data	0.001	1
California Environmental Reporting System (CERS) Tanks	0.25	2
Statewide SLIC Cases (GEOTRACKER)	0.5	3
National Priority List	1	1
RCRA - Large Quantity Generators	0.25	1
RCRA - Small Quantity Generators	0.25	1
Engineering Controls Sites List	0.5	1
Superfund (CERCLA) Consent Decrees	1	1

Regulatory Agency Database	Appropriate Minimum Search Distance (AMSD)	Number of Sites within AMSD
Facility Index System/Facility Registry System	0.001	1

Facility Inventory Database	0.25	1
CalEPA Regulated Site Portal Data	0.001	1
California Environmental Reporting System (CERS) Tanks	0.25	2
Statewide SLIC Cases (GEOTRACKER)	0.5	3

AGI's review of the referenced databases also considered the potential or likelihood of contamination from adjoining and nearby sites. To evaluate which of the adjoining and nearby sites identified in the regulatory database report present an environmental risk to the subject property, AGI considered the following:

- The type of database on which the site is identified;
- The topographic position of the identified site relative to the subject property;
- The direction and distance of the identified site from the subject property;
- Local soil conditions in the subject property area;
- The known or inferred groundwater flow direction in the subject property area;
- The status of the respective regulatory agency-required investigation(s) of the identified site (if any); and

- Surface and subsurface obstructions and diversions (e.g., buildings, roads, sewer systems, utility service lines, rivers, lakes and ditches located between the identified site and the subject property.

Only those sites that are judged to present a potential environmental risk to the subject property and/or warrant additional clarification are further evaluated. Using the referenced criteria and based on a review of readily available information contained within the regulatory database report, AGI did not identify adjacent or nearby sites (e.g. within ¼-mile radius) listed on the regulatory database report that were judged to present a potential environmental risk to the subject property with the exception of the following:

Site	Distance	Direction	Database(s) & Summary	Environmental Concern
San Gabriel Valley (Area 1), Peck Road and Real	650 feet SW, approx. 0.5-miles NW	SW, down to equi-gradient and NW, upgradient	NPL, SEMS - The site is a regional groundwater plume that runs along the axis of the Rio Hondo Wash and the Salt Pit Wash in the San Gabriel Groundwater Basin in the El Monte area of Los Angeles County.	No indication - Based on distance and direction from the SP. The area has been under investigation and remediation since 1983 and PRPs have been identified.

3.4. ADDITIONAL ENVIRONMENTAL AGENCY RECORD SOURCES

In addition to the EDR computer search of federal, state and regional regulatory agency databases, AGI contacted appropriate regulatory agencies to review records regarding the property and surrounding sites identified as having recognized environmental conditions that have the potential to impact the subject property based on ground water flow direction, distance from the subject property and nature of the releases causing the environmental condition.

Additional agency searches include the following:

- Los Angeles County Department of Public Works (LADPW), City of Monrovia Fire Department - Hazardous Materials Division (MFD-HMD) and the Los Angeles Regional Water Quality Control Board (Regional Board) maintain records of industrial violations for this area and are the lead agencies for the enforcement of the State Underground Storage Tank and Hazardous Waste Laws for Los Angeles County. AGI requested to review any files that were available.

- The Regional Board also maintains and online computer database, GeoTracker, that provides listings of closed and active sites related to unauthorized releases of hydrocarbons as well as solvents, metals, and other materials. For listed sites, online reports are commonly available. AGI reviewed the GeoTracker database for information that may be available for the subject property or surrounding sites.

- The California Department of Toxic Substances Control (DTSC) is the State of California agency responsible for oversight of hazardous waste regulations, cleanup of existing contamination, pollution prevention and reduction in hazardous waste and toxic materials and identification of potential new pollutants. The DTSC maintains the EnviroStor Data Management System (ENVIROSTOR) which allows for the search for information on investigation, cleanup, permitting and/or corrective actions that are planned, being conducted or have been completed under DTSC oversight. AGI reviewed the ENVIROSTOR database for any information that may be available.

- The United States Environmental Protection Agency (USEPA) provides an online computer database, ENVIROFACTS, providing lists of sites listed on multiple USEPA databases. AGI reviewed the ENVIROFACTS database for any information that may be available.

- South Coast Air Quality Management District Facility Information Detail (SCAQMD FIND) which searches for public information about SCAQMD-regulated facilities AGI reviewed SCAQMD FIND for any information that may be available.

- City of Monrovia Fire Department - Hazardous Materials Division (MFD-HMD) is the emergency responder for the City ofMonrovia, and issues hazardous materials permits. The MFD-HMD was contacted by AGI to determine if they had any permit, inspection and/or violation records for the subject property.

- The Geologic Energy Management Division's (CalGEM) online mapping application presents California's oil and gas industry information from the geographic perspective. AGI reviewed the CalGEM Well Finder database for information that may be available for the subject property or surrounding sites.

3.4.1. Additional Subject Property Record Sources

The subject property address was searched on the following record sources:

SOURCE	SUMMARY
Regional Board & GeoTracker database	Property address was not listed on the GeoTracker database and did not have any records on-file with the Regional Board.
DTSC & ENVIROSTOR database	Property address was not listed on the ENVIROSTOR database and did not have any records on-file with the DTSC.
USEPA ENVIROFACTS	Property address was not listed on the ENVIROFACTs database.
SCAQMD FIND	Property address was listed on the SCAQMD FIND database under the former tenant Fiber Tech. The facility is listed under the SIC code for custom compounding of purchased plastic resins. No permits or notices of violation were issued to the property.
LADPW	Property address was not identified as having records on-file with the LADPW.
MFD-HMD	Property address was identified as having inspection records on-file with the MFD-HMD. Additional information is provided below.
CalGem	According to the CalGem, no oil and/or gas wells are located in the vicinity of the subject property.

MFD-HMD Records

- 2011 to 2018 - Inspection Reports for Bicol Motors, 2601 South California Avenue, Unit A. The facility stores oxygen and acetylene in 20-pound containers. No other hazardous waste is generated on-site. Minor violations for poor housekeeping were reported in 2016.

- 2004 to 2020 - Inspection Reports for Don's Automotive, 2601 South California Avenue, Unit C. The facility stores 100 to 150 gallons of new oil and 200-gallons of waste oil. No violations were reported.

- 2012 to 2014 - Inspection Reports for Century Screen Arts, 2601 South California Avenue, Unit E. The facility is listed as storing materials (including plastisol, paint, and thinner) below the reporting thresholds. No violations were reported.

3.4.2. Additional Site Vicinity Record Sources

The MFD-HMD, LADPW and Regional Board maintain records for, and are responsible for, enforcement of state UST and hazardous waste laws. AGI commonly reviews files for up-gradient sites under active environmental regulation to ascertain the current site status and its potential to impact the subject property. No sites, under active or past environmental regulation, were identified by the database search within the required search radius of potential concern to the property.

3.5. PROVIDED SUBJECT PROPERTY RECORDS

No records were provided to AGI by the user and/or property owner during the course of this Phase I.

3.6. VOLATILE ORGANIC COMPOUND VAPOR ENCROACHMENT

The encroachment of hydrocarbon and volatile organic compound (VOC) vapors into soil pore space occurs when organic chemicals migrate from contaminated groundwater or soil into the airspace between soil particles. Some typical organics involved are petroleum based or chlorinated solvents (e.g, BTEX and dry cleaning chemicals). They may have leaked into the groundwater and/or soil from underground storage tanks, or buried waste, or from disposal in septic systems.

In compliance with ASTM Standard E2600-15 (Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions), AGI evaluated the potential for a Vapor Encroachment Condition (VEC) at the subject property. Based on a VEC screening, it was determined that ‘a VEC exists’ at the property. A copy of the AGI-generated Tier 1 VEC screening form is provided within Appendix E.

4.0. SITE RECONNAISSANCE

A subject property site reconnaissance was conducted by an AGI representative on 25 February 2021. At the time of the site visit the weather was clear and cool. Primary features of the property are shown in a site plan provided in Figure 2. Photographs of selected features of the subject site are included in Appendix A.

4.1. METHODOLOGY AND LIMITING CONDITIONS

Mr. Gary Lorenzini provided access to the property. The two residences were occupied at the time of the investigation and interior inspections could not be made. No other limiting conditions were noted.

4.2. GENERAL SITE SETTING

The following is a description of the primary features of the subject property observed at the time of the site visit:

The subject property is an irregular-shaped parcel situated on the northwest corner of South California Avenue and Novice Lane. The property is developed with a commercial building at 2601 South California Avenue, storage yards (including one developed with a small trailer office building and canopy and two single family residences at 213 and 217 Novice Lane.

2601 South California Avenue

The eastern portion of the property is developed with a single-story brick commercial building that is currently occupied by Don's Automotive, a window installer and storage units.

Currently, the westernmost unit is used as a storage unit for two off-road vehicles. A restroom is present in the northeast corner of the unit. The floor is concrete and is in good condition. The yard area to the north of the unit is used to store a Jeep.

The two units immediately east of the storage unit is occupied by Dan's Automotive, an automotive repair shop. The western unit contains an above ground hydraulic lift. A 350 gallon tote is present and is used to store waste oil. Two 55 gallon new oil tanks are also present in the unit as well as a parts cleaner. A former soil boring from a previous Phase II investigation conducted two years ago is located in the center of the unit. The eastern unit includes the sales desk, a restroom and tool and merchandise storage. The yard area for the business is located immediately north of the two units. An above ground hoist and a compressor area are present. An approximately 2'x4' concrete cut out is located near the hoist and a previous soil boring is near this cutout. According to Mr. Rick Ryan, owner of Don's Automotive, this was a former sump to collect waste water from the previous tenant.
The unit immediately east of Don's Automotive is used to store a boat and automobile. The flooring is concrete and in good shape. The yard area is also used for storage.

The easternmost unit of the building is occupied by a window installer. The unit is currently undergoing tenant improvements with the construction of a small office area. The concrete floor in this unit is in good condition. In the yard, an approximately 2'x6' by 10" deep concrete trench is present. The trench has no plumbing. The trench was empty on inspection and is in good condition with no cracking or etching noted.

The southern portion of the property is a concrete and asphalt parking lot.

Storage Yards

Two storage yards are located west of the commercial property. The eastern dirt lot is utilized for construction equipment storage for RC Masonry. Work trucks, a mini-backhoe, trailers, and pallets of concrete are stored in this area.

The western storage yard (219 Novice Lane) has two small modDonular trailers and a metal canopy that covers a storage area and a small metal welding area. A 55-gallon drum of diesel is present in the welding area and minor spillage and absorbent was noted around the drum. The asphalt floor in this area is in good condition. A possible former boring location was noted in this area.

Residences

The westernmost portion of the property includes two single family residences (213 and 217 Novice Lane). Both residences are single-story, wood-framed and stucco sided buildings. Both units are occupied and the interiors could not be examined. Each property has front and rear yards. A work truck is parked in the rear of the back yard at 217 Novice Lane. Oil staining from the truck was noted in the dirt beneath the truck.
The following is a description of the property improvements:

Structures	The property is developed with a commercial building at 2601 South California Avenue, storage yards (including one developed with a small trailer office building and canopy and two single family residences at 213 and 217 Novice Lane.
Adjoining / Access / Egress Roads	Access to the property is from a driveway off of California Avenue and from entrances along Novice Lane

Surface Types	Varies. Concrete and asphalt at 2601 S. California Avenue. Asphalt, dirt and grass on the remainder of the property.
Additional Features	None.
Surface Water	None.

At the time of the site reconnaissance, current uses of adjacent properties included the following:

North	Single family residences
South	Novice Lane, followed by Dootson Industrial Park - 2640 and 2650 Myrtle Avenue. Offices, printer shop, woodworking shop, metal polishing shop, copy shop, construction company, laser cutting company.
East	Single family residences.
West	California Avenue, followed by California Suites - 2600 - 2610 S. California Avenue. Offices, furniture shop, screen arts, Molly Maid, etc., self storage spaces and Monrovia Well No. 5.

Current uses of the adjoining properties do not appear to be of potential environmental concern to the subject property.

4.3. EXTERIOR AND INTERIOR OBSERVATIONS

The following was observed at the time of the property reconnaissance:

OBSERVED	CONDITION OBSERVED ON/AT SUBJECT PROPERTY
No	Pits, ponds or lagoons with respect to waste treatment or disposal
Yes	Stained soil or pavement, patched pavement
	Minor staining noted in the auto repair shop area, welding shop and under a truck parked in the back yard area of one of the residences.
No	Stressed vegetation (from causes other than insufficient water)
No	Fill dirt from unknown source, or contaminated source
No	Solid waste (mounds or depressions suggesting waste disposal)
No	Waste water / storm water discharged into a drain, ditch or stream
No	Wells (abandoned, irrigation, domestic, monitoring or oil and gas)
No	Dry wells
No	Septic systems or cesspools
No	Movement of hazardous materials to adjacent properties
Yes	Hazardous substances and/or petroleum products
	Waste oil, new oil, etc. are present in the auto repair shop. A 55 gallon drum of diesel fuel is located in the welding shop area.
Yes	Above-ground storage tanks (ASTs) for storage of petroleum products and/or hazardous substances
	Waste oil is stored in a 330 gallon tote while two 55 gallon tanks of new oil are present in the auto repair shop.
No	Underground storage tanks (USTs) for storage of petroleum products and/or hazardous substances
No	Strong, pungent or noxious odors
No	Pools of liquid (other than water)
Yes	55-gallon drum or large sack storage
	A 55 gallon drum of diesel fuel is located in the welding ship area.
No	Unidentified substance containers
No	Stains and/or corrosion on floors, walls or ceiling (except water)

OBSERVED	CONDITION OBSERVED ON/AT SUBJECT PROPERTY
Yes	Drains and sumps
	A former sump is present in the yard area of the auto repair shop and a 2'x'6'x10" deep trench is located in the yard area of the window installer unit.
No	Oil-water separator/clarifier
No	Electrical or hydraulic equipment known to contain PCBs
Yes	Obvious signs of possible ACMs
	Based on the age of the buildings, ACMs are likely. The residences include stucco-siding and composite type roofing materials.
No	Obvious signs of mold
Yes	Other areas of environmental concern
	Two previous soil borings are located in the auto repair shop area. In addition, a third boring location was potentially identified in the welding shop area. The borings were drilled two years ago as part of a previous due diligence investigation. Mr. Gary Lorenzini, owner, was never provided the results. Mr. Rick Ryan, owner of Don's Automotive, indicated that "air" (assumed to be soil vapor) and soil samples were collected and he was verbally conveyed that the samples were clean.

5.0. MATERIAL STORAGE

Currently, a 330 gallon tote is used to store waste oil and two 55 gallon tanks of new oil are present in Don's Automotive shop.

No other current or historic containers, storage vessels, and containment systems (e.g., clarifiers, oil/water separators, vaults, frac ponds, tanks, drums, storage lockers, silos) of 55 gallons or more for individual containers, or 100 gallons in aggregate for smaller containers, were observed on the subject property or have been historically utilized on the property.

6.0. INTERVIEWS

Interviews performed during the course of this Phase I are described below.

Interviewee	Interview Summary
Property Owner	Mr. Gary Lorenzini, current property owner, was interviewed using an ASTM-compliant questionnaire on 25 February 2021. The following information was obtained from Mr. Lorenzini: • The property was purchased by Mr. Lorenzini's group approximately 12 years ago. • The property usage was similar to today's uses at the time of purchase. • No asbestos or lead-based paint surveys have been conducted on the property. • The 2601 S. California Avenue building has been occupied for automobile repair services, including Don's Automotive and the former Jasper Engine and Transmission, for many years. • Other than the petroleum products used by the automobile repair companies, Mr. Lorenzini is unaware of the use or storage of hazardous materials on the property. • No USTs, clarifiers or sumps are known to have been on the property. • No environmental liens, violations or lawsuits have been filed against the property.

Interviewee	Interview Summary
	• Mr. Lorenzini is unaware of any additional environmental issues on the property.
Property Occupant(s)	Mr. Rick Ryan, owner of Don's Automotive, was questioned about the concrete cut out in the yard area of his business as well as the borings that were previously drilled. Mr. Ryan indicated that a prior tenant had a sump type feature to capture waste water from their business. Borings had been drilled two years ago inside his shop area and near the concrete cutout. Mr. Ryan was told the samples obtained from the borings had been clean.
Local Government Officials	With the exception of file review requests, no local government officials were interviewed during the course of this Phase I.
Others	No additional interviews were performed during the course of this Phase I.

ASTM-compliant interview/questionnaire documentation is provided as Appendix D.

7.0. BUSINESS ENVIRONMENTAL RISKS - NON-ASTM SERVICES

Additional environmental considerations beyond the scope of the standard ASTM practice that have the potential to pose business environmental risks are discussed below.

7.1. MOLD

Molds are part of the natural environment. Outdoors, molds play a part in nature by breaking down dead organic matter such as fallen leaves and dead trees, but indoors, mold growth should be avoided. Molds reproduce by means of tiny spores; the spores are invisible to the naked eye and float through outdoor and indoor air. Mold may begin growing indoors when mold spores land on surfaces that are wet. There are many types of mold, and none of them will grow without water or moisture.

Molds are usually not a problem indoors, unless mold spores land on a wet or damp spot and begin growing. Molds have the potential to cause health problems. Molds produce allergens (substances that can cause allergic reactions), irritants, and in some cases, potentially toxic substances (mycotoxins).

At the time of the property reconnaissance, no obvious signs of mold/microbiological growth, were observed.

7.2. ASBESTOS CONTAINING BUILDING MATERIALS

Asbestos is a mineral fiber that has been used commonly in a variety of building construction materials for insulation and as a fire-retardant. Because of its fiber strength and heat resistant properties, asbestos has been used for a wide range of manufactured goods, mostly in building materials (roofing shingles, ceiling and floor tiles, paper products, and asbestos cement products), friction products (automobile clutch, brake, and transmission parts), heat-resistant fabrics, packaging, gaskets, and coatings.

Prior to the late 1970s, building products and insulation materials commonly contained asbestos. In 1989, the USEPA banned all new uses of asbestos; however, uses developed before 1989 are still allowed. When asbestos-containing materials are damaged or disturbed by repair, remodeling or demolition activities, microscopic fibers become airborne and can be inhaled into the lungs, where they can cause significant health problems.

The existing subject property residential structures were constructed by the early 1950s and the commercial building constructed by the mid-1970s, making the presence of ACMs possible. Prior to any demolition or remodeling of the buildings, AGI recommends conducting a full asbestos survey by a licensed contractor.

7.3. LEAD-BASED PAINT

Lead is a toxic metal that was used for many years in products found in and around our homes. Lead-based paint (LBP) was used extensively in buildings constructed before 1950. In 1978, LBP was banned by the federal government. Lead may cause a range of health defects, from behavioral problems and learning disabilities, to seizures and death.

The existing subject property residential structures were constructed by the early 1950s and the commercial building constructed by the mid-1970s, making the presence of ACMs possible., making the presence of LBP-coated materials possible. Prior to any demolition or remodeling of the buildings, AGI recommends conducting a full lead paint survey by a licensed contractor.

7.4. RADON

Radon is a naturally occurring, colorless, odorless gas that is soluble in water. It is produced through the radioactive decay of uranium and radium, which is naturally present in soil and in minerals in bedrock. Radon is radioactive, which means that it breaks down or decays to form other elements. Radon concentrations generally differ among different rock types and can vary considerably within the same geologic formation. Radon moves from its source in rocks and soils through voids and fractures. It can enter buildings as a gas through foundation cracks or it can dissolve in ground water and be carried to buildings through the use of water-supply wells. Buildings with basements and concrete slab foundations are more susceptible to elevated levels of indoor radon gas. The inhalation of radon gas can cause damage to lung tissue.

A common unit of radioactivity measurement is picocuries per liter (pCi/L). The USEPA established the recommended safe radon level at 4 pCi/L. According to the USEPA, Los Angeles County, is in a moderate radon potential area (Zone 2), defined as having a ‘predicted average indoor radon screening level between 2 and 4 pCi/L.’

7.5. WETLANDS

As reported in Section 3.2., according to the EDR Report (Appendix C) the subject property is not located within a National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR from the U.S. Fish and Wildlife Service.

7.6. REGULATORY COMPLIANCE

AGI searched the subject property address, 2601 South California and 213 and 217 Novice Lane, Monrovia, California, on local, state and federal databases. No records were found regarding any outstanding regulatory permitting or requirements/directives in connection with the property.

8.0. EVALUATION

Any deviations from the ASTM Standard Practice 1527E-13 and USEPA AAI are presented below, along with the findings, conclusions, and opinions identified during the course of this Phase I.

8.1. DATA GAPS AND LIMITATIONS

A data gap occurs when a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance, and interviews. The following data gaps and/or limitations were identified during the course of this Phase I, which may deviate from the ASTM standard practice:

- The largest data gap in research was 23 years, between 1900 and 1923, with the earliest researched information being a Topographic Map dated in 1894. Data gaps generally do not exceed five years between 1923 through the present, except between 1939 and 1948, 1957 and 1964. AGI does not believe any gaps in the data reviewed have affected the ability to identify recognized environmental concerns.

8.2. FINDINGS

Based on the standards set by ASTM Practice E1527-13, the following findings are differentiated below as Business Environmental Risk (including the presence of asbestos-containing materials, lead-based paint, mold or moisture conditions, or non-hazardous regulated materials may constitute a Business Environmental Risk), de minimis conditions unlikely to be subject to government enforcement, HRECs, CRECs and RECs, as defined in Section 1.1. of this report.

8.2.1. Business Environmental Risk

This assessment has revealed no evidence of potential Business Environmental Risks in connection with the subject property, except for the for ACMs and LBP to be present in the structures on the property. Prior to any demolition or remodeling, AGI recommends full ACM and LBP surveys be conducted by an appropriately licensed contractor.

8.2.2. De Minimis Conditions

This assessment revealed no evidence of potential or *de minimis* conditions in connection with the subject property, with the exception of minor oil staining in the auto repair shop area, the welding shop in the storage yards area and under a truck parked behind the residences. Good housekeeping procedures should be practiced.

8.2.3. Historical Recognized Environmental Conditions

This assessment has revealed no evidence of HRECs in connection with the subject property.

8.2.4. Controlled Recognized Environmental Conditions

This assessment has revealed no evidence of CRECs in connection with the subject property.

8.2.5. Recognized Environmental Conditions

This assessment has revealed no evidence of RECs in connection with the subject property.

8.2.6 Other Potential Environmental Issues

This assessment has revealed no evidence of other potential environmental issues in connection with the subject property, with the exception of the previous soil borings that were noted in Don's Automotive shop and in the welding shop area within the storage yards. The borings were drilled two years ago as part of a previous due diligence investigation by a residential developer. According to Mr. Gary Lorenzini, owner of the property, the data was to be provided to them by the developer, however, the results were never received. A recent attempt to obtain the results was unsuccessful. Mr. Rick Ryan, owner of Don's Automotive, was told that the samples were clean.

9.0. SUBSURFACE INVESTIGATION

In order to validate the verbal results that the soil borings drilled previously were "clean", AGI conducted a limited Phase II investigation at the two previous boring locations at Dan's Automotive (2601 South California Avenue) and the previous boring location in the small welding area at 219 Novice Lane.

SOIL AND SOIL VAPOR SAMPLING

On 03 March 2021, three sampling locations were established near the previous borings. Sampling points S1 and S2 were established at Dan's Automotive while S3 was established at the small welding area at 219 Novice Lane.

Soil samples were collected at 2 and 5 feet from each sampling point and analyzed for total petroleum hydrocarbons (TPH-gas, diesel and oil ranges), volatile organic compounds (VOCs) and CAM 17 Metals in accordance with EPA methods 8105m, 8260B and 6010B/7471A, respectively.

Soil vapor samples were collected from 5 feet at each sampling point and analyzed for total petroleum hydrocarbons as gasoline (TPH-g) and volatile organic compounds (VOCs) in accordance with EPA method 8260B.

FINDINGS

The soil profile was generally consistent in the three borings, consisting predominantly of brown, dry to slightly damp, silty fine to medium/coarse sand. Sandy silt was encountered at 2 feet in sample point S2. Groundwater was not encountered during this investigation.

TPH in the gasoline, diesel and oil ranges and VOCs were not detected in any of the soil samples. Of the metals detected, all were within normal background levels. Total chromium was detected at 51.5 mg/kg and 88.4 mg/kg in samples S1-2’ and S2-5’,

respectively. Those samples were also analyzed for hexavalent chromium which were detected at trace concentrations of 0.32 mg/kg and 0.20 mg/kg, respectively.

TPH in the gasoline range and VOCs were not detected in any of the soil vapor samples.

Based on the findings of this investigation, AGI did not find evidence in the areas investigated of subsurface impacts related to the past and current use of the subject property. It is AGI's opinion that no additional environmental investigation is warranted at this time.

A copy of the Limited Phase II Environmental Site Assessment report, dated 04 March 2021, is attached in Appendix E.

10.0. CONCLUSIONS AND OPINION

AGI has performed a *Phase I Environmental Site Assessment* in conformance with the scope and limitations of ASTM Practice E1527-13, US-EPA AAI for the property located at 2601 South California and 213 and 217 Novice Lane, Monrovia, California. Any exceptions to, or deletions from, this practice or scope of work are described in Section 8.1. of this report or presented as non-ASTM services in Section 7.0. It is the opinion of the environmental professionals that the findings and conclusions presented in this report are reasonable and prudent, given the evidence as presented. This assessment has revealed no evidence of RECs in connection with the property.

However, during the site visit, AGI observed previous soil borings in Don's Automotive shop and in the welding shop area within the storage yards. The borings were drilled two years ago as part of a previous due diligence investigation by a residential developer. According to Mr. Gary Lorenzini, owner of the property, the data was to be provided to them by the developer, however, the results were never received. An attempt was made to obtain the results recently, however, the attempt was unsuccessful. Mr. Rick Ryan, owner of Don's Automotive, was told that the samples were clean. Because the results could not be provided to AGI for review, AGI recommended that shallow soil and soil vapor samples be collected from the same areas to validate that no impact the subsurface had occurred in these areas.

AGI conducted a limited Phase II investigation, which included sampling near previous boring locations, with soil samples collected at 2 and 5 feet and soil vapor samples collected at 5 feet. Total petroleum hydrocarbons in the gasoline, diesel and oil ranges and volatile organic compounds were not detected in any of the soil samples. Metals that were detected in the soil were within normal background levels. Total petroleum hydrocarbons in the gasoline range and volatile organic compounds were not detected in the soil vapor.

Based on the findings of this investigation, it is AGI's opinion that no further environmental investigations are warranted at this time.

11.0. SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental professional as defined in §312.10 of 40 CFR § 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

12.0. QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Qualifications of the environmental professionals involved in the preparation of this Phase I are included in Appendix F.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AdvancedGeo, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AdvancedGeo, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

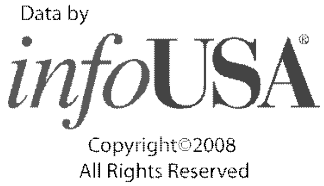

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

ROOFING PRODUCTS (COOL ROOFS) §151(f)12

When the area of exterior roof surface to be replaced exceeds 50% of the existing roof area, or 1,000 ft², whichever is less, the new roofing area must meet the roofing product "Cool Roof" requirements of §152(b)1Hi, 152(b)1Hii, or 152(b)1Hiii

Check applicable alternative or exception below if the roof alteration is exempt from the roofing product Cool Roof requirements

- ☐ Cool roofs not required in Climates Zones 1 12 14 and 16 with a low sloped roof pitch (less or = 2 12 pitch)
- ☐ Cool roofs not required in Climates Zones 1 9 and 16 with a steep sloped roofs (greater pitch than 2 12) and product weight less than 5 lb/ft²

Alternatives to §152(b)1Hi and §152(b)1Hii, Steep-slope roof (pitch > 2 12)

- ☐ Insulation with a thermal resistance of at least 0 85 hr ft² °F/Btu or at least a 3/4 inch air space is added to the roof deck over an attic or
- ☐ Existing ducts in the attic are insulated and sealed according to §151(f)10 or
- ☐ In climate zones 10 12 and 13 with 1 ft2 of free ventilation area of attic ventilation for every 150 ft2 of attic floor area and where at least 30 percent of the free ventilation area is within 2 feet vertical distance of the roof ridge or
- ☐ Building has at least R-30 ceiling insulation or
- ☐ Building has radiant barrier in the attic meeting the requirements of §151(f)2 or
- ☐ Building has no ducts in the attic or
- ☐ In climate zones 10 11 13 and 14 R-3 or greater roof deck insulation above vented attic

Exception to §152(b)1Hiii, Low-slope roof (pitch ≤ 2 12)

- ☐ Building has no ducts in the attic

Other Exceptions

- ☐ Roofing area is covered by building integrated photovoltaic panels and solar thermal panels are exempt from the Cool Roof criteria
- ☐ Roof constructions that have thermal mass over the roof membrane with at least 25 lb/ft2 are exempt from the Cool Roof criteria

NOTE *If any one of the alternatives or exception is checked the Aged Solar Reflectance and Thermal Emittance requirements for roofing products in §118(i) are not applicable Do not fill table below*

CRRC Product ID Number[1]	Roof Slope ≤ 2 12	Roof Slope > 2 12	Product Weight < 5lb/ft²	Product Weight ≥ 5lb/ft²	Product Type[2]	Aged Solar Reflectance[3,4]	Thermal Emittance	SRI[5]
	☐	☐	☐	☐		☐[4]		
	☐	☐	☐	☐		☐[4]		

Note *If no CRRC-1 label is available this compliance method cannot be used use the Performance Approach to show compliance*

1 The CRRC Product ID Number can be obtained from the Cool Roof Rating Council s Rated Product Directory at www coolroofs org/products/search php
2 Indicate the type of product is being used for the roof top i e single ply roof asphalt roof metal roof etc
3 If the Aged Reflectance is not available in the Cool Roof Rating Council s Rated Product Directory then use the Initial Reflectance value from the same directory and use the equation (0 2+0 7(ρ_Initial − 0 2)) to obtain a calculated aged value Where ρ is the Initial Solar Reflectance
4 Check box if the Aged Reflectance is a calculated value using the equation above
5 Calculate the SRI value by using the SRI Worksheet at http://www energy ca gov/title24/ and enter the resulting value in the SRI Column above and attach a copy of the SRI Worksheet to the CF 1R

To apply Liquid Field Applied Coatings, the coating must be applied across the entire roof surface and meet the dry mil thickness or coverage recommended by the coatings manufacturer and meet minimum performance requirements listed in §118(i)4 Select the applicable coating

☐ Aluminum Pigmented Asphalt Roof Coating ☐ Cement Based Roof Coating ☐ Other _____

NOTE *When a Cool Roof is required the installing contractor shall complete and submit the CF-6R-ENV-01 for final inspection*

Declaration Statement

- I certify under penalty of perjury under the laws of the State of California the information provided on this form is accurate and complete
- I certify that the energy features and performance specifications identified on this Certificate of Compliance conform to the requirements of Title 24 Parts 1 and 6 of the California Code of Regulations

LICENSED CONTRACTORS' DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Lic. Class C-39 Lic. No. 926420 Date 4/23/11

Contractor

OWNER - BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors' License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the Contractors' License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors' License Law does not apply to an owner of property who builds improvements thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors' License Law does not apply to an owner of property who builds improvements thereon, and who contracts for such projects with contractor(s) licensed pursuant to the Contractors' License Law).

☐ I am exempt under Sec. _____, B & P.C. for this reason: _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier STATE FUND Policy Number 23-20011 72

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that, if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: Applicant:

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. G).

Lender's Name _____ Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

May 6, 1965

Noel McHone
167 E. Scenic Drive
Monrovia, California

Re: Permit #4098
Issued Oct. 9, 1964

Dear Mr. McHone:

This is to notify you that permit #4098, issued October 9, 1964 for construction of a 36 unit apartment at 2601 S. California Ave., Monrovia, has expired by limitation and is now null and void.

Section 302(d) of the Uniform Building Code, made a part of Section 31-1 of the Monrovia Municipal Code by reference, states that permits shall expire by limitation and become null and void if work authorized by such permit is not commenced within sixty (60) days from date of said permit. Before work can commence, a new permit shall be obtained.

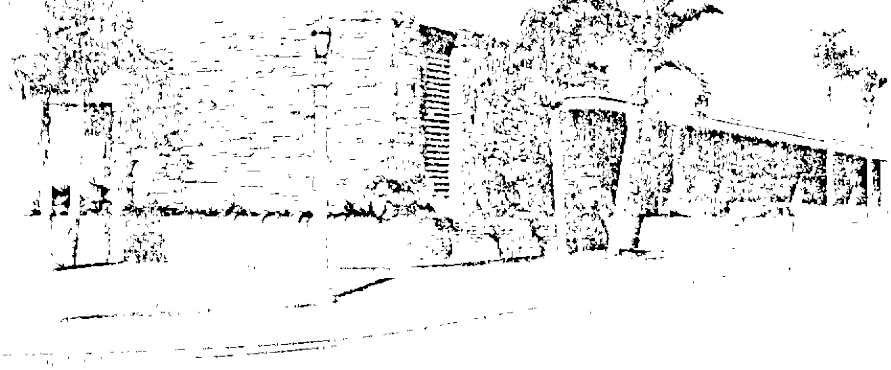

If you have any questions, or if further information is desired, please feel free to call this office at any time.

Very truly yours,

Richard D. Beal

Proposed Public Improvements: ☐ Streets ☐ Curbs and Gutters

☐ Sidewalks ☐ Street Trees ☐ Street Lights

☐ Street Name Signs ☐ Traffic Control Devices

☐ Storm Drains ☐ Other(s) _____

Proposed Public Utilities: ☐ Water ☐ Electricity ☐ Gas ☐ Telephone ☐ Sewer (If private disposal system, give percolation rates of soil).

Time Schedule for Project Completion: _____

List and describe any other related permits and other public approvals required for this project, including those required by City, regional, state and federal agencies: _____

ENVIRONMENTAL IMPACTS

Check the appropriate answers to the following questions:

	YES	NO
a. Will the proposed project result in a substantial alteration of ground contours and/or alteration of existing drainage pattern?	___	___
b. Will the proposed project result in an increase in noise, vibration, dust, dirt, smoke, fumes, odor or solid waste during and/or after construction?	___	___
c. Will the proposed project result in the use or disposal of potentially hazardous materials?	___	___
d. Will the proposed project result in a substantial increase in demand for municipal services and/or energy consumption?	___	___
e. Will the project result in a change in scenic views or vistas form existing residential areas, public lands or roads?	___	___

Explain in detail any "YES" answers to the above questions on additional sheets.

Provide any additional information which would elaborate on the potential environmental consequences resultant from the proposed project.

STATEMENTS OF VERTIFICATION

April 27, 1984

Gentlemen:

My name is Charlie Jones, and I am the owner and operator of a small auto transmission repair shop in the City of Monrovia. It is located at 360 So. California Avenue.

I have operated this business for seven years, as a one-stall operation until 1 year ago when I was able to lease the 2nd stall.

A few months ago, I decided to expand my services by offering to install lifetime mufflers. This has cost me a considerable investment in equipment and stock. It is scheduled to began on May 16, 1984.

In order to realize benefit from my investment, I need to let the public know where I am, and the services I can now provide.

I have had a sign (4 by 6) made (see picture) and I would like to have some direction on how I may post it within the City's requirements.

By posting it on the side of the building, the problem seems to be that the street curves so that an auto approaching from the south or north would not be able to see the sign. (See picture).

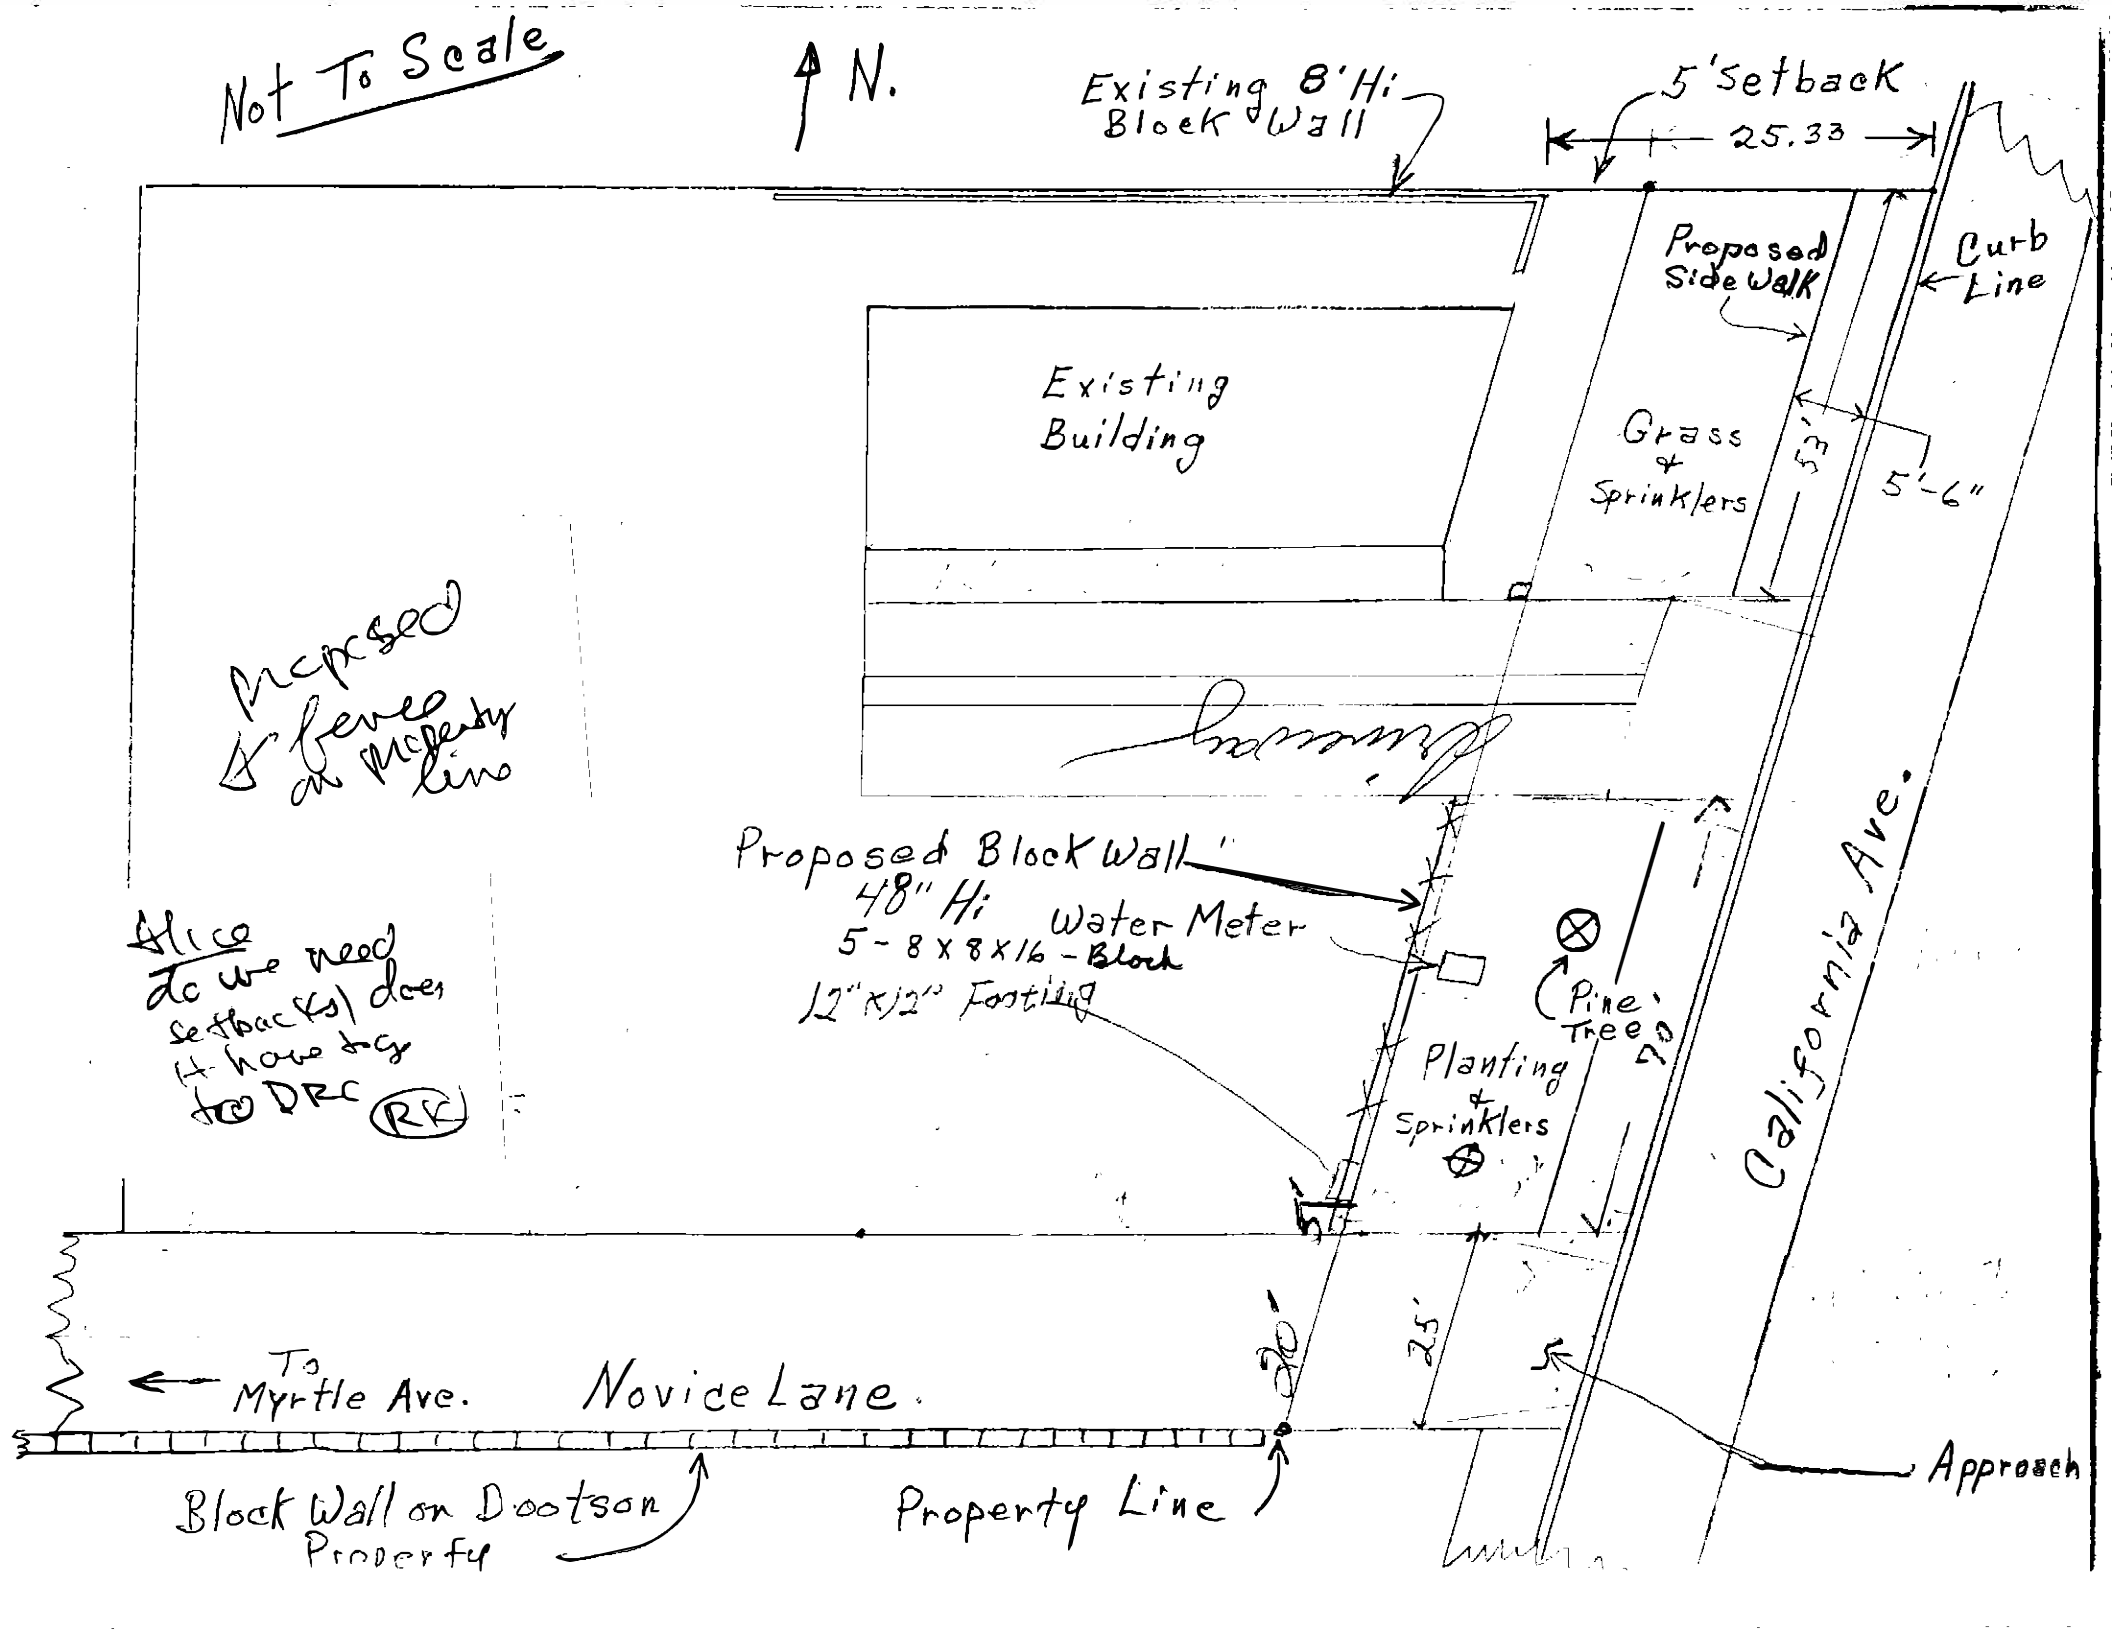

Because of this, I am requesting that I be permitted to post the sign on 2 poles about eight feet high - and about 5 feet from the building in an area where I have planted grass & where I will be adding flowers & shrubs to beautify the area. The sign will not be lit and it will meet all other City requirements.

If for some reason this is not possible, please advise me on what I can do. This is very important to the future success of my business.

Your consideration in this matter will be greatly appreciated.

Sincerely,

Charlie Jones

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1

RCRA-SQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there is 1 CA ENVIROSTOR site within approximately 1 mile of the target property.

Facility Status: Historical				

CA LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the CA LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 04/30/2012 has revealed that there are 2 CA LOS ANGELES CO LF METHANE sites within approximately 0.5 miles of the target property.

Violation Description: Hazardous Waste Generator Program - Administration/Documentation -

BICOL MOTORS (Continued) **S113128495**

General
Violation Notes: Returned to compliance on 01/08/2019. OBSERVATION: Owner/Operator failed to submit accurate EPA ID on his hazardous waste notification electronically to CERS. CORRECTIVE ACTION: Owner/Operator shall submit a notification of hazardous waste generated by the facility in accordance with HSC 25158 electronically to CERS. HSC 25404(e)(4) No later than three years after the statewide information management system is established, each CUPA, PA, and regulated business shall report program data electronically. The secretary shall work with the CUPAs to develop a phased in schedule for the electronic collection and submittal of information to be included in the statewide information management system, giving first priority to information relating to those chemicals determined by the secretary to be of greatest concern. The secretary, in making this determination shall consult with the CUPAs, the California Emergency Management Agency, the State Fire Marshal, and the boards, departments, and offices within the [Truncated]
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 380502
Site Name: DONS AUTOMOTIVE
Violation Date: 10/17/2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 01/15/2019. OBSERVATION: One tote bin of used oil 75% full located in the west garage and one 55-gal drum of used oil filters 75% full were observed without an accumulation start date and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of the used oil and used oil filters and submit a copy of the manifest/receipt to the CUPA.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 01-08-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Revisit conducted with Richard Ryan; HW notification submitted; used oil and filters collected; unable to locate original manifiest but stated he emailed the manifest to the CUPA; he would call bookkeeper for copy and forward to CUPA, followup required.
Eval Division: Los Angeles County Fire Department
Eval Program: HW

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

3M UNITEK CORP (Continued) **S112999136**

Name:	3M UNITEK CORP
Address:	2724 S PECK RD
Address 2:	Not reported
City,State,Zip:	MONROVIA, CA 910160000
Contact:	EUGENE LEE
Telephone:	6265744496
Mailing Name:	Not reported
Mailing Address:	2724 PECK RD
Year:	2019
Gepaid:	CAD008256356
TSD EPA ID:	NED981723513
CA Waste Code:	141 - Off-specification, aged or surplus inorganics
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.00200
Year:	2019
Gepaid:	CAD008256356
TSD EPA ID:	CAD028409019
CA Waste Code:	132 - Aqueous solution with metals (< restricted levels and (Alkaline solution (pH >= 12.5) with metals))
Disposal Method:	H135 - Discharge To Sewer/Potw Or Npdes(With Prior Storage--With Or Without Treatment)
Tons:	11.67600
Year:	2019
Gepaid:	CAD008256356
TSD EPA ID:	MND006172969
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	-
Tons:	0.02150
Year:	2019
Gepaid:	CAD008256356
TSD EPA ID:	MND006172969
CA Waste Code:	512 - Other empty containers 30 gallons or more
Disposal Method:	-
Tons:	0.27900
Year:	2019
Gepaid:	CAD008256356
TSD EPA ID:	UTD981552177
CA Waste Code:	551 - Laboratory waste chemicals
Disposal Method:	H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons:	0.05200
Year:	2019
Gepaid:	CAD008256356
TSD EPA ID:	MND006172969
CA Waste Code:	141 - Off-specification, aged or surplus inorganics
Disposal Method:	-
Tons:	0.23200
Year:	2019
Gepaid:	CAD008256356
TSD EPA ID:	MND006172969

3M UNITEK CORP (Continued) **S112999136**

CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 3.26950

Year: 2019
Gepaid: CAD008256356
TSD EPA ID: MND006172969
CA Waste Code: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 0.71950

Year: 2019
Gepaid: CAD008256356
TSD EPA ID: MND006172969
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 1.08150

Year: 2019
Gepaid: CAD008256356
TSD EPA ID: MND006172969
CA Waste Code: 343 - Unspecified organic liquid mixture
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 0.09450

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D011
Waste Description: SILVER

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P014
Waste Description: BENZENETHIOL (OR) THIOPHENOL

Waste Code: U007
Waste Description: 2-PROPENAMIDE (OR) ACRYLAMIDE

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Source: CERS

Site ID: 87331
Site Name: 3M UNITEK CORP
Violation Date: 7/8/2019
Citation: 22 CCR 15 66265.192(k) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(k)

3M MONROVIA ORAL CARE (Continued) **S103648530**

Violation Description:	Failure to include all required information in the new tank system assessment.
Violation Notes:	Returned to compliance on 01/16/2020. OBSERVATION: The written hazardous waste tank system assessment for the waste acid and caustic tank system did not include the sump pit transfer tanks. CORRECTIVE ACTION: Complete a written hazardous waste tank system assessment for the waste acid and caustic transfer tanks and piping in accordance with 22 CCR 15 66265.192(a, h, and k) and submit a copy to the CUPA.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HWLQG
Violation Source:	CERS
Site ID:	87331
Site Name:	3M UNITEK CORP
Violation Date:	6/2/2016
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 01/13/2017. Log onto the California Environmental Reporting System (CERS) to correct the deficiencies in the submittals. Observed the following corrections required; 1. On the section for BUSINESS ACTIVITIES, specify that this facility does not "recycle exclude or exempted recyclable materials" on site 2. On the section for HAZARDOUS MATERIALS INVENTORY, update the inventory for the entire facility to show all hazardous materials that are stored within this site; numerous discrepancies observed, for example, the 9,000 gal tank for the liquid hydrogen is reported as "1,200 cu. ft", the diesel tank in the backup generator and three 55 gal drums of diesel have not been reported, the 750 gal tank for the liquid argon has not been reported, 3. Revise and resubmit the site maps to include all the required components; including the locations of all hazardous waste and hazardous materials storage areas, locations of fire extinguishers, etc, see sample map. Due to the size of this facility; [Truncated]
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	87331
Site Name:	3M UNITEK CORP
Violation Date:	6/1/2016
Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 08/16/2016. A. Perform general house-keeping in the area by the electropolish line. Remove accumulation of white colored crusts/salts and debris on the floor and between the process tanks. B. Maintain facility to prevent release. Observed one of the CNC machines, G HAAS UFOEG leaking oil onto the floor. Make the necessary repair to eliminate the source of leak and promptly clean up all releases.

Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation. The tank assessment shall be valid for five (5) years.
Violation Notes: Returned to compliance on 01/16/2020. OBSERVATION: Owner/Operator failed to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service, and/or the tank assessment is not complete. CORRECTIVE ACTION: Complete a written tank assessment on the transfer tanks. Assessment must be reviewed and certified by an independent, qualified, professional engineer.

WMUDS/SWAT:
Edit Date: Not reported
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.
Primary Waste: SLDWST
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 1) is a ground water plume that runs along the axis of the Rio Hondo Wash and the Salt Pit Wash in the San Gabriel ground water basin in El Monte, Los Angeles County, California. The plume also parallels the San Gabriel River to the east. It is approximately 4 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene TCE), perchloroethylene PCE), and carbon tetrachloride CTC) according to analyses by State agencies and local water companies. Many public wells in this area exceed the EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 200,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion ppb) of TCE and 4 ppb PCE, levels considered safe for human consumption. When alternative methods of reducing the TCE and PCE levels below such levels are not effective, wells are removed from service. Currently, three small mutual water companies have no alternate water supply and have advised their customers to use bottled water. Status June 1984): As a result of EPA s analysis of initial remedial measures, completed in December l983, EPA will install water treatment systems to provide clean water to two of the three companies that have no alternate supply. The third company has already purchased a treatment system and will begin operation of the system soon. A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA arepreparing to initiate a

SAN GABRIEL VALLEY (AREA 1) (Continued) **1000114959**

remedial investigation/feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of contamination. This site, along with the three other San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Environmental Interest/Information System:
SUPERFUND NPL
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 03/10/1992
Comments: The Dept completed the review of PEA on October 9, 1991 and requested additional information within 30 days of the correspondance. The Dept did not recieve any reply until March 10, 1992. The Dept notified the RP that the PEA was considered to be completed and recommended further action.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 08/01/1991
Comments: The 22-acre site was formerly a part of Nu-way Inert Landfill, which originally convered 86 acres, EPA id #CAD099990947. The site was not permitted to receive haz wastes, but it accepted auto shredder wastes and asbestos. Three 20,000 gallon USTs on the site to store gasoline and diesel fuel. Recent trenching operation discovered buried asbestos on-site. The trenching operation probably disturbed the asbestos and is a potential for release to soil, water, and air. A medium priority PEA recommended because of potential release of asbestos. Also, the nearby 890 E. and 400 E Live Oak Ave sites were contaminated with asbestos and metals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Discovery
Completed Date: 07/30/1991
Comments: Facility identified from RP notification.

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

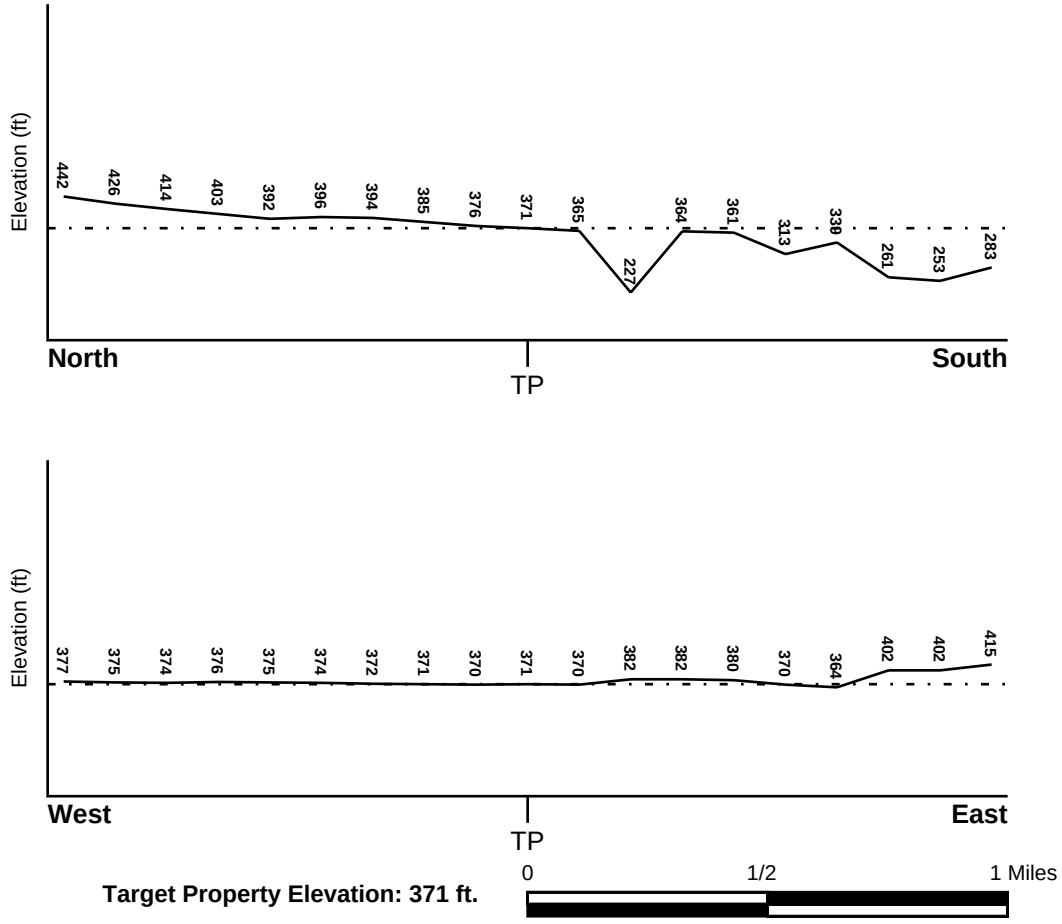

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1675F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1400F	FEMA FIRM Flood data
06037C1415F	FEMA FIRM Flood data
06037C1700F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BALDWIN PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Interview Documentation

ASTM Transaction Screen Questionnaire
for the Phase I Environmental Site Assessment (E1527-13)
& Environmental Transaction Screen Processes (E1528-14)

In accordance with ASTM Standard Process E1527-13, the objective of an interview/questionnaire is to obtain information indicating Recognized Environmental Conditions (RECs) in connection with the property. This questionnaire is to be completed by the current/past property owner, occupant or anyone with past knowledge concerning the property, either in written form or verbally, with questions asked by AdvancedGeo, Inc. (AGI) or User (Client) designated parties. All questions should be answered to the best of the respondent's actual knowledge and must be answered in good faith. Explanations to any answers, especially "Yes" answers, should be made in the space following the question or on a separate sheet, noting the question number. Please be as complete as possible; if you do not know the answer to a question, please check unknown. Following the site visit, it may be necessary for AGI or the preparer to ask clarifying questions of the interviewee(s).

GENERAL HISTORY OF THE PROPERTY

When did you first obtain or begin managing this property? If you are not an owner, what is or was your relationship to the subject property? Are you still associated with the property?

APPX 10 YEARS

From whom did the current owner obtain the property? How long did the former owner hold the property?

What is the general history of the property? Please include what residential or business uses have been made of the property and when, and what structures were built or demolished and when. If it is agricultural, what general crops have been grown and when.

SIMILAR USAGE PRIOR TO OWNERSHIP

What is the general history and use of the adjacent properties and the general surrounding area?

North: RESIDENTIAL

South: SMALL BUSINESS

East: RESIDENTIAL / COMMERCIAL (OFFICE) LT. INDUSTRIAL

West: RESIDENTIAL

PRESENCE OF ASBESTOS IN ON-SITE STRUCTURE(S)

Has an asbestos survey been performed on the property buildings? ☐ Yes ☒ No ☐ Unknown

If YES, assuming the survey included physical sampling by a qualified firm, was the property free of asbestos, or not free of asbestos? ☐ Free ☐ Not Free ☐ Unknown

Explain as appropriate; do you have a copy of the survey report? ☐ Yes ☐ No
*If a copy is available, please provide to AGI

Do you have any past or present knowledge of asbestos-containing materials (ACMs) on the property? ☐ Yes ☐ No ☐ Unknown

If yes, describe:

ADDITIONAL HAZARDS

Lead-based Paint (LBP): Are you aware of the presence of LBP-coated surfaces on the property structure(s)? ☐ Yes ☒ No ☐ Unknown

If yes, describe:

Is there any evidence on the subject property of illegal or dangerous on-site application, handling or storage of maintenance chemicals such as pesticides, rodenticides, fertilizers, cleaners, paint solvents, swimming pool cleaners, etc? ☐ Yes ☒ No ☐ Unknown

If yes, describe:

Have there ever been any dry wells, sumps, separators (or clarifiers or grease traps) or in-ground hydraulic lifts on the property? ☐ Yes ☒ No ☐ Unknown

If yes, describe (include where, what use and size, if known):

SUBJECT PROPERTY UTILITY INFORMATION

Is water currently provided by: ☒ public water system ☐ well ☐ private company

List name of utility provider and/or location of well, connection date: ☐ none or list-

City of Monrovia (+ Sewer)

Electrical utility provider and estimated connection date: ☐ none or list-

SCE

Natural gas utility provider and estimated connection date: ☐ none or list-

So Cal Gas

Does the property discharge waste water to a: ☒ municipal sewer sanitary system; ☐ on-site sewage treatment system; ☐ on-site septic system; or ☐ there is no sewer utility/septic on-site.

If the property is served by a septic system or systems, please list the location of the system (is a permit available?):

TRANSACTION SCREEN QUESTIONNAIRE (attach additional pages, if needed)

(1a.) Is the property *currently used*, or used in the *past*, for research, military and/or industrial use?

☐ Yes ☒ No ☐ Unknown -If yes, describe:

(1b.) Are any of the adjoining properties *currently used*, or have been used in the *past*, for research, military and/or industrial use? ☐ Yes ☒ No ☐ Unknown -If yes, describe:

(2a.) Is the property *currently used*, or used in the *past*, as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing lab, junkyard or landfill or as a waste treatment, storage, disposal, processing or recycling facility? ☒ Yes ☐ No ☐ Unknown

If yes, describe (and identify which):

MOTOR/AUTO REPAIR

(2a.) Are any of the adjoining properties *currently used*, or have been used in the *past*, as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing lab, junkyard or landfill or as a waste treatment, storage, disposal, processing or recycling facility?

☐ Yes ☒ No ☐ Unknown -If yes, describe (and identify which):

(3.) Are there *currently*, or have there been in the *past*, any damaged or discarded automotive or industrial batteries, pesticides, paints or other chemicals in individual containers larger than 5-gallon stored or used at the property or facility? ☐ Yes ☒ No ☐ Unknown -If yes, describe:

(4.) Are there *currently*, or have there been in the *past*, any industrial drums, typically 55-gallon, or sacks of chemicals located on the property or facility? ☐ Yes ☒ No ☐ Unknown -If yes, describe:

AdvancedGeo
An Employee-Owned Company

(5.) Did you observe evidence or do you have prior knowledge that fill dirt has been brought onto the property that originated from a *contaminated site* or from an *unknown origin*?

☐ Yes ☒ No ☐ Unknown -If yes, describe:

(6.) Are there *currently*, or have there been in the *past*, any pits, ponds or lagoons located on the property in connection with waste treatment or waste disposal?

☐ Yes ☒ No ☐ Unknown -If yes, describe:

(7.) Is there *currently*, or has there been in the *past*, any stained soil on the property?

☐ Yes ☒ No ☐ Unknown -If yes, describe:

(8.) Are there *currently*, or has there been in the *past*, any registered or unregistered storage tanks (above or under-ground) located on the property? ☐ Yes ☒ No ☐ Unknown

If yes, where are they located? Number, Size, Content

(9.) Are there *currently*, or has there been in the *past*, any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property? ☐ Yes ☒ No ☐ Unknown -If yes, describe (include location):

(10.) Are there *currently*, or has there been in the *past*, any flooring, drains or walls located within the facility that are stained by substances other than water or are emitting foul odors?

☐ Yes ☒ No ☐ Unknown -If yes, describe:

AdvancedGeo
An Employee-Owned Company

(11a.) If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system? ☐ Yes ☐ No ☐ Unknown ☐ Non-applicable

-If yes, describe:

N/A

(11b.) If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency? ☐ Yes ☐ No ☐ Unknown ☐ Non-applicable

-If yes, describe:

NA

(12.) Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to *past* or *recurrent* violations of environmental laws with respect to the property or any facility located on the property? ☐ Yes ☒ No ☐ Unknown

-If yes, describe:

(13.) Has the owner or occupant of the property been informed of the *current* or *past* existence of hazardous substances or petroleum products with respect to the property or any facility located on the property? ☒ Yes ☐ No ☐ Unknown -If yes, describe:

AUTO REPAIR - OIL

(14.) Has the owner or occupant of the property been informed of the *current* or *past* existence of environmental violations with respect to the property or any facility located on the property?

☐ Yes ☒ No ☐ Unknown -If yes, describe:

(15.) Does the owner or occupant of the property have any knowledge of any past environmental site assessments of the property or facility. (Phase II, III, sampling etc.) ☒ Yes ☐ No ☐ Unknown

If Yes, did the assessment indicate the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?

☐ Yes ☒ No ☐ Unknown

Can you provide AGI with a copy (or copies) of any previous environmental assessments and/or documents in relation to the property? ☐ Yes ☐ No

WILL ATTEMPT TO GET REPORT

(16.) Does the owner or occupant of the property have any knowledge of any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substances or petroleum products involving the property by any owner or occupant of the property? ☐ Yes ☒ No ☐ Unknown -If yes, describe:

(17a.) Does the property discharge waste water, on or adjacent to the property, other than storm water, into a storm water sewer system? ☐ Yes ☒ No ☐ Unknown -If yes, describe:

(17b.) Does the property discharge waste water, on or adjacent to the property, other than storm water, into a sanitary sewer system? ☐ Yes ☒ No ☐ Unknown -If yes, describe:

(18.) Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the property?

☐ Yes ☒ No ☐ Unknown -If yes, describe:

(19.) Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs? ☐ Yes ☒ No ☐ Unknown -If yes, describe:

(20.) Are there any additional items of possible environmental concern regarding the property that have not been discussed in this interview? ☐ Yes ☒ No -If yes, describe:

Note: Helpful subject property documents that should be transmitted to AGI include the following:

- Environmental Site Assessment Reports
- Environmental Compliance Audit Reports
- Environmental permits
- UST/AST registrations
- Underground injection system registrations
- Hazardous Materials Inventories and Hazardous Materials Management Plans
- Risk assessments
- Geotechnical studies
- Recorded AULs (Activity and Use Limitations)

VAPOR ENCROACHMENT SCREENING (ASTM E2600-15)
CALIFORNIA AND NOVICE PROPERTY
2601 South California, 213 and 217 Novice Lane, Monrovia, California 91016
January 2021

In accordance with ASTM Standard E2600-15 and the Buonicore Area of Concern determination (2011)[i], AdvancedGeo, Inc. performed the initial Tier 1 Vapor Encroachment Screening which includes determining the presence or likely presence of volatile organic compounds (VOCs) vapors in the sub-surface of the subject property (SP) caused by the release of vapors from contaminated soil or groundwater either on or near the Target Property within an Area of Concern (AOC) to determine if a potential Vapor Encroachment Condition (VEC) exists. Should sites fall within the AOC, a limited Tier 2 screening will be performed.

TIER 1 SCREENING

(1) Ground Water Flow Direction: Is the groundwater flow direction known?

	No	Proceed to **(1a)**
X	Yes	Proceed to **(1b)** Identify the groundwater flow direction here: **South**

(1a) If groundwater flow direction is **unknown**, the AOC is:

- Non-Petroleum Hydrocarbon Contaminants of Concern (COC): **1,760 feet (1/3-mile)** from the contaminated site boundary to the boundary of the SP.
- Dissolved Petroleum Hydrocarbon COC: **528 feet (1/10-mile)** for from the contaminated site boundary to the boundary of the SP.
- Free Product (Light non-aqueous phase liquids [LNAPL]) COC: **528 feet (1/10-mile)** for from the contaminated site boundary to the boundary of the SP.

Are sites located within the AOC? **Not Applicable**

(1b) If groundwater flow direction is known, the AOC for non-petroleum hydrocarbon COC and dissolved petroleum hydrocarbon or free product (LNAPL) COC is:

- Non-Petroleum Hydrocarbon COC: **1,760 feet (1/3-mile)** in the up-gradient position, **365 feet** in the equi-gradient position, and **100 feet** in the down-gradient position.
- Dissolved Petroleum Hydrocarbon COC: **528 feet (1/10-mile)** in the up-

gradient position; **95 feet** in the equi-gradient position, and **30 feet** in the down-gradient position.

- Free Product (LNAPL) COC: **528 feet (1/10-mile)** in the up-gradient position, **165 feet** in the equi-gradient position, and **100 feet** in the down-gradient position.

Are sites located within the AOC?

	No	Tier 1 screening is complete, and no VEC currently exists, proceed to **CONCLUSIONS**
X	Yes	Proceed to **(2)** **Identify potential and/or known contaminated site(s) here**: **Subject property:** Long-term automotive use (mid-1980s to present)

(2) Subsurface Characteristics

(2a) Is there a hydraulic (e.g., a river) or physical barrier (e.g., clay barrier) between the SP and the suspected contaminated site (or sites)?

X	No	Proceed to **(2b)**
	Yes	A VEC does not exist, proceed **CONCLUSIONS**

(2b) Are **non-petroleum hydrocarbon COC** and **dissolved petroleum hydrocarbon** or **free product (LNAPL) COC** known to be in the groundwater beneath the subject property.

X	No	Proceed to **TIER 2 SCREENING**
	Yes	A VEC exists, proceed to **CONCLUSIONS**

TIER 2 SCREENING

If the Tier 1 screening indicates that a VEC exists, the Tier 2 non-invasive screening can be used to refine screening. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas and/or groundwater monitoring results to provide greater certainty to whether or not a VEC exists. The Tier 2 screening involve a Plume Test and Critical Distance Determination. **The Critical Distance Determination requires that the edge of the plume be known**. The Critical Distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest SP boundary.

(1) Plume Test: Is the contaminated plume boundaries known?

X	No	A VEC Exists proceed to **CONCLUSIONS**
	Yes	proceed to **(2)**

(2) **Critical Distance Determination:** The critical distance for non-petroleum hydrocarbon COC and dissolved petroleum hydrocarbon or free product (LNAPL) COC is:

- Non-Petroleum Hydrocarbon COC: **100 feet** from the subject property boundary.
- Dissolved Petroleum Hydrocarbon COC: **30 feet** from the subject property boundary.
- Free Product (LNAPL) COC: **100 feet** from the subject property boundary.

Does the plume edge fall within the critical distance from the subject property boundary? **Not Applicable**

CONCLUSIONS

(1) **Conclusions**: Impact on Subject Property

X A VEC exists

A VEC does not exist

A VEC exists based on the long-term use of the site for automobile repairs. AdvancedGeo, Inc. may recommend invasive Tier 2 screening, which can include soil, and/or soil-vapor sampling.

Subject: Limited Phase II Environmental Site Assessment Report
CALIFORNIA and NOVICE PROPERTY
2601 South California Avenue & 219 Novice Lane, Monrovia, California

Dear Mr. Devling:

At your request, AdvancedGeo, Inc. (AGI) has prepared this *Limited Phase II Environmental Site Assessment Report* for the property at 2601 South California Avenue and 219 Novice Lane, Monrovia, California.

1.0. BACKGROUND

AGI is currently preparing a Phase I Environmental Site Assessment. On 26 February 2021, AGI conducted the site visit. Within the auto repair area of the building, AGI noted two former soil borings locations, including one in the center of the shop and one near a former sump behind the unit. In addition, AGI noted an apparent boring location in a small welding shop on a parcel to the west of the auto repair building. The property owner, Mr. Gary Lorenzini, indicated that a Phase II investigation had been conducted as part of previous due diligence investigation, however, the results were never provided.

In order to determine if the areas previously investigated had been impacted by operations on the property, AGI proposed shallow soil sampling and soil vapor sampling at the three locations.

2.0. SCOPE OF WORK

The following scope of work was performed:

- Marking of the sampling locations and notification of Dig Alert for utility location demarcation.

- Preparation of a site-specific health and safety plan.
- Advancement of three 5-foot deep borings at the site. Soil samples were collected at 2 and 5 feet in each boring.
- The soil samples were analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs) and Title 22 metals.
- Soil vapor samples were collected at 5 feet in each boring and analyzed on site for TPH in the gasoline range and VOCs using a mobile laboratory.
- Backfilling of the borings.

3.0. PROCEDURES

Prior to conducting the assessment activities, AGI visited the site on 27 February 2021 to mark the boring locations. Dig Alert was notified on the same day to contact utility companies to mark existing underground utilities (Ticket Nos. B210570348 and B210570352).

Soil and soil vapor sampling was conducted on 03 March 2021. AGI contracted with Optimal Technology, a soil gas survey contractor, to collect the soil and soil vapor samples and analyze the soil vapor samples on-site. Three sampling points were established in the immediate area of the previous borings (sampling points S1, S2 and S3: Figure 1).

3.1. SOIL SAMPLING AND ANALYSIS

Discrete, undisturbed soil samples were collected at 2 and 5 feet by driving 1” x 6” stainless steel sleeves attached to a 5-foot steel rod into the soil using a roto-hammer. Once the sleeve was removed from the sampling rod, the ends of the sleeve were covered with Teflon sheets and capped. The sample sleeves were then labeled and stored in a chilled container.

The soil was visually logged using the Unified Soil Classification System (USCS).

The samples were transported under chain-of-custody procedures to ASC Laboratory, a California ELAP-certified laboratory. The samples were analyzed for total petroleum hydrocarbons (TPH-gas, diesel and oil ranges), volatile organic compounds (VOCs) and CAM 17 Metals in accordance with EPA methods 8105m, 8260B and 6010B/7471A, respectively.

3.2. SOIL VAPOR SAMPLING AND ANALYSIS

Soil vapor samples were collected from each sampling point at 5 feet by hydraulically driving a 1-inch diameter soil vapor probe with a vapor tip. The surface around the probe was then sealed with hydrated bentonite.

Prior to purging, a tracer gas (isobutane) was applied at the top of the surface bentonite seal to determine if ambient air could enter the sampling system. At each sampling location an electric vacuum pump set to draw 0.2 liters per minute (L/min) of soil vapor was attached to the probe or existing well and purged prior to sample collection. Vapor samples were obtained in SGE gas-tight syringes by drawing the sample through a Luer Lock which connects the sampling probe and the vacuum pump. Samples were immediately injected into the gas chromatograph/purge and trap after collection. New tubing was used at each sampling point to prevent cross contamination.

A total of 3 purge volumes were removed prior to collecting the soil vapor samples in accordance with the Cal-EPAs Advisory – Active Soil Gas Investigations (2015).

OT analyzed the vapor samples, a duplicate sample and a blank, on-site using a laboratory-grade Agilent model 6890N gas chromograph equipped with an Agilent model 5973N Mass Spectra Detector and Tekmar LSC 3100 Purge-and-Trap. Samples were analyzed for total petroleum hydrocarbons (TPH) in the gasoline range and volatile organic compounds (VOCs) in accordance with EPA method 8260B.

4.0. FINDINGS

4.1. SOIL PROFILE

The soil profile was generally consistent in the three borings, consisting predominantly of brown, dry to slightly damp, silty fine to medium/coarse sand. Sandy silt was encountered at 2 feet in sample point S2. Groundwater was not encountered during this investigation.

4.1. SOIL SAMPLE RESULTS

TPH in the gasoline, diesel and oil ranges, and VOCs were not detected in any of the soil samples. Of the metals detected, all were within normal background levels. Total chromium was detected at 51.5 mg/kg and 88.4 mg/kg in samples S1-2’ and S2-5’, respectively. Those samples were also analyzed for hexavalent chromium which were detected at trace concentrations of 0.32 mg/kg and 0.20 mg/kg, respectively.

The analytical report and chain-of-custody form are attached.

4.2. SOIL VAPOR SAMPLE RESULTS

TPH in the gasoline range and VOCs were not detected in any of the soil vapor samples.

The OT analytical report is attached.

5.0. CONCLUSIONS

Based on the findings of this investigation, AGI did find not find evidence in the areas investigated of subsurface impacts related to the past and current use of the subject property. It is AGI's opinion that no additional environmental investigation is warranted at this time.

6.0. LIMITATIONS

Our professional services were performed using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar localities. Findings were based upon field observations. Evaluation of the hydrogeologic conditions at the site for the purpose of this investigation was made from a limited number of available data points (e.g., soil and soil vapor samples) and subsurface conditions may vary away from these data points. No other warranty, expressed or implied, is made as to the professional interpretations, opinions, and recommendations contained in this report.

The opportunity to prepare this proposal is greatly appreciated. If you have any questions regarding this proposal or the services we provide, please call our office at (800) 511-9300.

Sincerely,

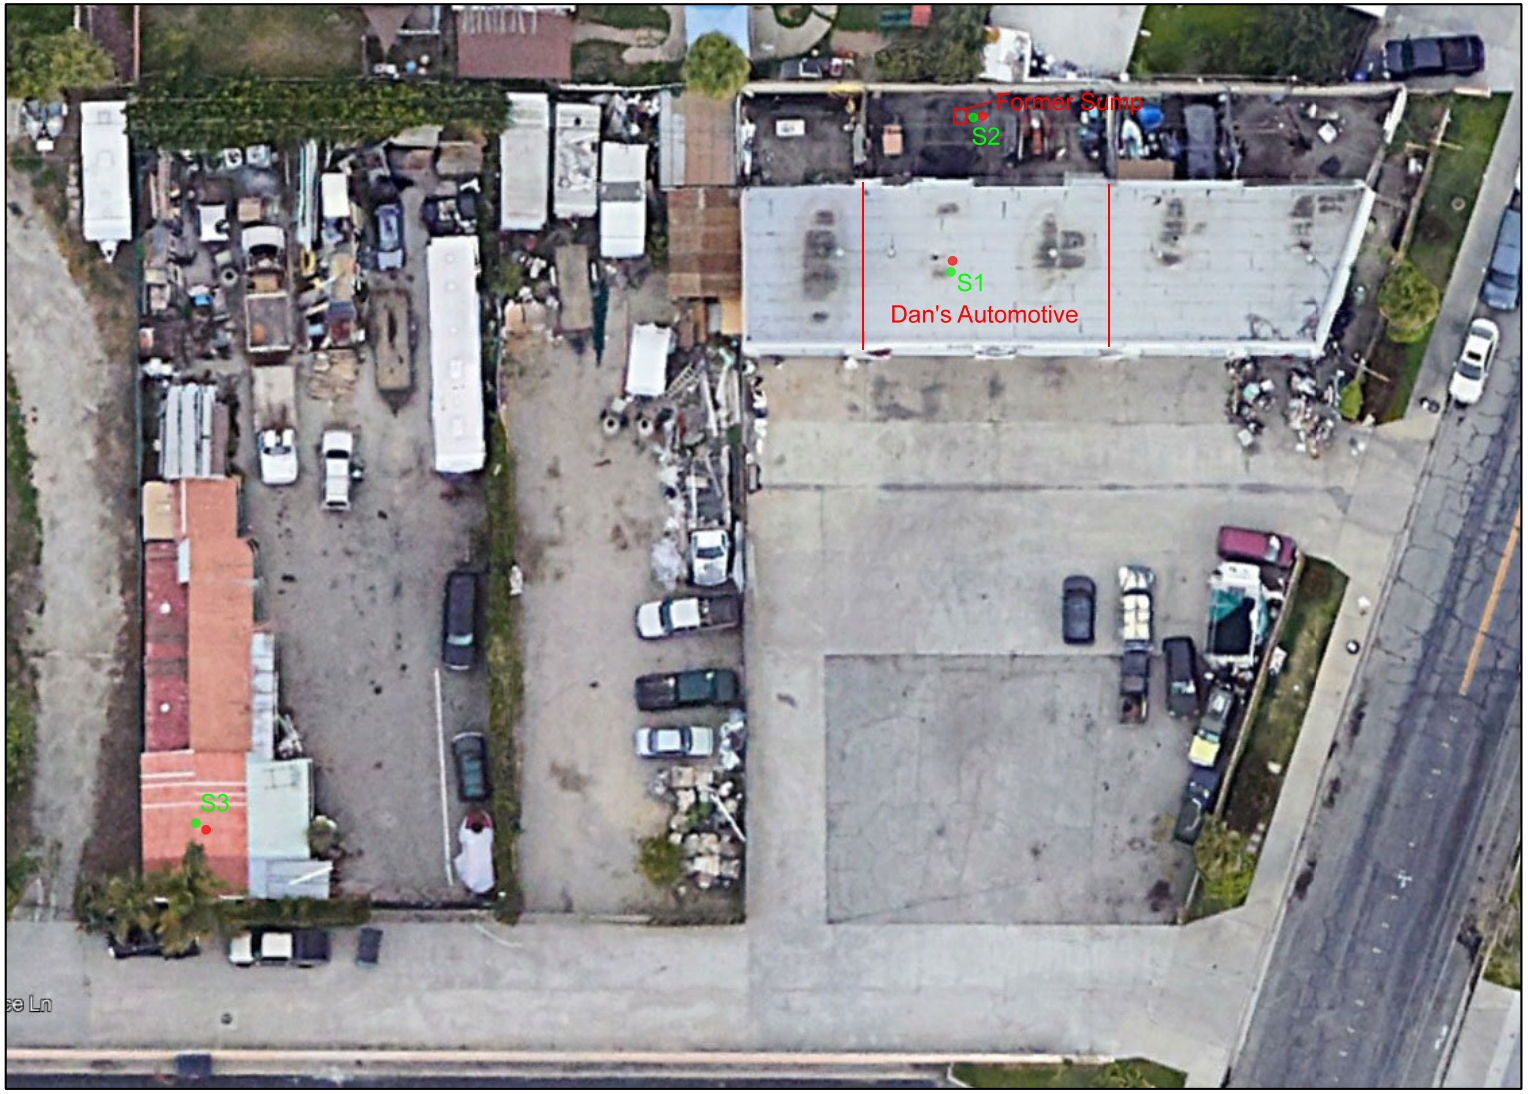

AdvancedGeo, Inc.

SOIL ANALYTICAL REPORT

ALPHA SCIENTIFIC CORPORATION
Environmental Laboratories

03-04-2021

Mr. Robert Loeffler
Advanced Geo, Inc.
3335 E. Miraloma Ave., Suite 142
Anaheim, CA 92806

Project: California Ave/Novice Ln
Project Site: 2601 California Ave/219 Novice Ln, Monrovia, CA
Sample Date: 03-03-2021
Lab Job No.: AE103008

Dear Mr. Loeffler:

Enclosed please find the analytical report for the sample(s) received by Alpha Scientific Corporation on 03-03-2021 and analyzed by the following EPA methods:

EPA 8015M (Total Petroleum Hydrocarbons)
EPA 8260B (VOCs & Oxygenates by GC/MS)
EPA 6010B/7471A (Title-22 Metals)

All analyses have met the QA/QC criteria of this laboratory.

The sample(s) arrived in good conditions (i.e., chilled, intact) and with a chain of custody record attached.

Alpha Scientific Corporation is certified by the CA ELAP (Certificate Number 3007). Thank you for giving us the opportunity to serve you. Please feel free to call me at (562) 809-8880 if our laboratory can be of further service to you.

Sincerely,

Roger Wang, Ph. D.
Laboratory Director

RE: AE103008

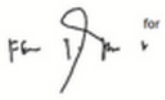

Attention: Roger Wang

Enclosed are the results for sample(s) received on March 04, 2021 by ASSET Laboratories. The sample(s) are tested for the parameters as indicated in the enclosed chain of custody in accordance with the applicable laboratory certifications.

Thank you for the opportunity to service the needs of your company.

Please feel free to call me at (562) 219-7435 if I can be of further assistance to your company.

Sincerely,

Andrew Garaniel
Laboratory Director

The cover letter is an integral part of this analytical report. This Laboratory Report cannot be reproduced in part or in its entirety without written permission from the client and ASSET Laboratories - California.

CASE NARRATIVE

SAMPLE RECEIVING/GENERAL COMMENTS:

All sample containers were received intact with proper chain of custody documentation.

Information on sample receipt conditions including discrepancies can be found in attached Sample Receipt Checklist Form.

Cooler temperature and sample preservation were verified upon receipt of samples if applicable.

Samples were analyzed within method holding time.

CLIENT: Alpha Scientific Corp

SOIL VAPOR ANALYTICAL REPORT

OPTIMAL TECHNOLOGY
Specializing in Environmental Field Services

March 4, 2021

Mr. Rob Loeffler
Advanced Geo
3335 E. Miraloma Avenue, Suite 142
Anaheim, CA 92806

Dear Mr. Loeffler:

This letter presents the results of the soil vapor investigation conducted by Optimal Technology (Optimal), for Advanced Geo on March 3, 2021. The study was performed at 2601 California St., Monrovia, California.

Optimal was contracted to perform a soil vapor survey at this site to screen for possible chlorinated solvents and aromatic hydrocarbons. The primary objective of this soil vapor investigation was to determine if soil vapor contamination is present in the subsurface soil.

Gas Sampling Method

Gas sampling was performed by hydraulically pushing soil gas probes to a depth of 5.0 feet below ground surface (bgs). An electric rotary hammer drill was used to drill a 1.0-inch diameter hole through the overlying surface to allow probe placement when required. The same electric hammer drill was used to push probes in areas of resistance during placement.

At each sampling location, an electric vacuum pump set to draw 0.2 liters per minute (L/min) of soil vapor was attached to the probe and purged prior to sample collection. Vapor samples were obtained in gas-tight syringes by drawing the sample through a luer-lock connection which connects the sampling probe and the vacuum pump. Samples were immediately injected into the gas chromatograph/purge and trap after collection. New tubing was used at each sampling point to prevent cross contamination.

All analyses were performed on a laboratory grade Agilent model 6890N gas chromatograph equipped with an Agilent model 5973N Mass Spectra Detector and Tekmar LSC 3100 Purge and Trap. A Restek column using helium as the carrier gas was used to perform all analysis. All results were collected on a personal computer utilizing Agilent's MS and chromatographic data collection and handling system.

Quality Assurance

5-Point Calibration
The initial five-point calibration consisted of 20, 50, 100, 200 and 500 ul injections of the calibration standard. A calibration factor on each analyte was generated using a best fit line method using the Agilent data system. If the r^2 factor generated from this line was not greater than 0.990, an additional five-point calibration would have been performed. Method reporting limits were calculated to be 0.001-1.0 micrograms per Liter (ug/L) for the individual compounds.

A daily calibration check was performed using a pre-mixed standard supplied by Scotty Analyzed Gases. The standard contained common halogenated solvents and aromatic hydrocarbons (see Table 1). The individual compound concentrations in the standards ranged between 0.025 nanograms per microliter (ng/ul) and 0.25 ng/ul.

TABLE 1

Dichlorodifluoromethane	Carbon Tetrachloride	Chloroethane
Trichlorofluoromethane	1,2-Dichloroethane	Benzene
1,1-Dichloroethene	Trichloroethene	Toluene
Methylene Chloride	1,1,2-Trichloroethane	Ethylbenzene
trans-1,2-Dichloroethene	Tetrachloroethene	m-/p-Xylene
1,1-Dichloroethane	Chloroform	o-Xylene
cis-1,2-Dichloroethene	1,1,1,2-Tetrachloroethane	Vinyl Chloride
1,1,1-Trichloroethane	1,1,2,2-Tetrachloroethane	Freon 113
4-Methyl-2-Pentanone	Cyclohexane	Acetone
Chlorobenzene	2-Butanone	Isobutane

Sample Replicates
A replicate analysis (duplicate) was run to evaluate the reproducibility of the sampling system and instrument. The difference between samples did not vary more than 20%.

Equipment Blanks
Blanks were run at the beginning of each workday and after calibrations. The blanks were collected using an ambient air sample. These blanks checked the septum, syringe, GC column, GC detector and the ambient air. Contamination was not found in any of the blanks analyzed during this investigation. Blank results are given along with the sample results.

Tracer Gas Leak Test
A tracer gas was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points include the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. Isobutane was used as the tracer gas. No Isobutane was found in any of the samples collected.

Purge Volume
The standard purge volume of three volumes was purged in accordance with the July 2015 DTSC/RWQCB Advisory for Active Soil Gas Investigations.

Shut-in Test
A shut-in test was conducted prior to purging or sampling each location to check for leaks in the above-ground sampling system. The system was evaluated to a minimum measured vacuum of 100 inches of water. The vacuum gauge was calibrated and sensitive enough to indicate a water pressure change of at least 0.5 inches.

Scope of Work

To achieve the objective of this investigation a total of 4 vapor samples were collected from 3 locations at the site. Sampling depths, vacuum readings, purge volume and sampling volumes are given on the analytical results page. All the collected vapor samples were analyzed on-site using Optimal's mobile laboratory.

Subsurface Conditions

Subsurface soil conditions at this site offered sampling flows at 0" water vacuum.

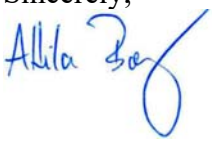

Results

During this vapor investigation, none of the compounds listed in Table 1 above were detected above the listed reporting limits. A complete table of analytical results is included with this report.

Disclaimer

All conclusions presented in this letter are based solely on the information collected by the soil vapor survey conducted by Optimal Technology. Soil vapor testing is only a subsurface screening tool and does not represent actual contaminant concentrations in either the soil and/or groundwater. We enjoyed working with you on this project and look forward to future projects. If you have any questions, please contact me at (877) 764-5427.

Sincerely,

Attila Baly
Project Manager

Appendix F -

Qualifications of the Environmental Professionals

ROBERT D. LOEFFLER

POSITION
VICE PRESIDENT, SENIOR GEOLOGIST

EDUCATION
B.S. Geological Sciences – California State University, Fullerton
Course work in ground water technologies - UC Davis Extension

PROFESSIONAL REGISTRATION
California Professional Geologist No. 6709
Nevada Environmental Manager No. 1260
Arizona Registered Geologist No. 34944
Washington Licensed Geologist No. 2751
Texas Professional Geoscientist No. 10890
Registered Environmental Property Assessor No. 136161 (NREP)
Qualified SWPPP Practitioner (QSP) and Qualified SWPPP Developer (QSD) No. 24014

DUTIES
Mr. Loeffler's current duties include design, planning, coordination, and supervision of various environmental projects. These projects include all phases of environmental assessment, site assessments, and mitigation of contaminated soil and ground water. During the course of projects, he acts as liaison between the client and regulatory agencies, schedules work, supervises projects from start to finish, and prepares and reviews work plans and reports.

EMPLOYMENT HISTORY

2020 - Present:	Vice President, Senior Geologist AdvancedGeo, Inc. (an Employee-Owned Company)
1992 - 2019:	Vice President, Senior Geologist Advanced GeoEnvironmental, Inc.
1989 - 1992:	Project Geologist Geological Audit Services, Inc., Yorba Linda, California
1988 - 1989:	Staff Geologist Applied Hydrogeologic Consultants, Santa Ana, California
1988:	Geologist USGS - Pacific Marine Division, Seattle, Washington

JACQUELINE HYMAN

POSITION PROJECT GEOLOGIST

EDUCATION B.S. Earth Science – University of California, Santa Cruz, 2014
A.A. Natural Sciences, Pasadena City College, 2012

EXPERIENCE Ms. Hyman's current duties include field research and preparation of Phase I Environmental Assessments along with design and implementation of Phase II Environmental Assessments related to the due diligence field. In addition, Ms. Hyman assists project managers in the assessment of soil and groundwater impacted sites. Her prior experiences include five years of performing geologic field work and report writing. Experiences include geologic mapping, geophysical investigations and laboratory analysis.

EMPLOYMENT HISTORY

2020 – Present: Project Geologist
AdvancedGeo, Inc. (an Employee-Owned Company)

2014 - 2019: Staff Geologist
Advanced GeoEnvironmental, Inc.

2013 - 2014: Geology File Internship
University of California, Santa Cruz

2009: Teaching Assistant
Pasadena City College
