| Quarterly Update: | The Criterion Catalyst site comprises 29 acres zoned H-I, Heavy Industrial District, surrounded by other industrial facilities. The facility manufactured catalysts for chemical refining and manufacturing. Manufacturing operations took place in 6 different locations within the facility, and a RCRA Facility Assessment (RFA) identified 10 solid waste management units (SWMUs) and two areas of concern (AOCs). No chemical releases were identified or suspected at 6 of the SWMUs. Two of the SWMUs with documented releases were immediately cleaned up; the cleanup was documented. The final 2 SWMUs had documented contamination that had been removed and verified with confirmation sampling. At machine shop underground storage tank SWMU, contamination with hydrocarbons and metals was detected at the time the tank was removed, but the contamination was removed as part of the UST closure. Confirmation sampling detected no residual contamination or source for groundwater contamination. At the area known as i++Point Gi++, acid sludges from ammonia processing had been spread on the ground surface, resulting in metals and acid contamination. The contamination at Point G was removed and the area has subsequently been paved. Subsequent groundwater monitoring has not detected any contamination. The 2 AOCs were surface impoundments that might have received wastes, but were not included in this EI review because they are now the property of the adjacent PG&E (Pittsburg) facility and are subject to the RCRA Facilities Investigation (RFI) and associated corrective action at the PG&E facility. |

| Violation Description: | Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container. For mobile or portable containers, either provide the type of oil and storage capacity, or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities. |
| Violation Notes: | Returned to compliance on 12/19/2019. OBSERVATION: Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container, or, for portable and/or mobile containers, either provide the type of oil and storage capacity, or an estimate of the potential number of portable or mobile containers, the types of oil, and anticipated storage capacities. The facility has oily shop pad water that should be included in the SPCC plan as a technical amendment. One 275 gal tote was observed on site, but CERS inventory allows for up to 4. Facility shall determine the upper limit needed for the SPCC plan. The transformers and oil filled equipment for the X3/H2 and Sub 2000/Compressor Pad/X2 Load Center appear to have pooled the inventory in the total volume so it is not clear that both oil equipments are covered, so that should be evaluated. The labels on the site diagram should match the Tables used in the plan. CORRECTIVE ACTION: Amend the SPCC Plan to properly address the type and storage [Truncated] |

| | |
|---|---|
| | the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date. |
| Violation Notes: | Returned to compliance on 09/16/2022. OBSERVATION: A number of hazardous waste containers were observed without hazardous waste labels or with incomplete hazardous waste labels. These include the compressor used oil containers, containers/bags of waste catalyst that were mislabeled for physical state, a container/bag of waste catalyst mislabeled as used oil, and the tote of "nitric wash and soda wash." CORRECTIVE ACTION: Properly label all hazardous waste containers on site. Submit photos to the CUPA demonstrating that the containers listed above have been properly labeled. |

| Violation Description: | "Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs." |
| Violation Notes: | Returned to compliance on 01/09/2020. OBSERVATION: Failure to prepare SPCC Plan that meets the following requirements: 1. Follows the sequence of SPCC rule and/or includes cross-reference. 2. Prepared in accordance with good engineering practices. 3. Has the full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC plan. 4. Plan is in writing. 5. Plan addresses additional procedures/methods/equipment not yet fully operational. The August 2016 SPCC plan reviewed during this inspection has a cross reference, but it only includes sections in 112.7 and does not include cross reference to required sections in 112.8 (drainage from diked areas, overfill prevention, etc) and 112.5 which is found in Section 15 (pages 28-29). Additionally, integrity testing utilizes guidance from the SPCC Guidance for Regional Inspectors Feb 3, 2006 to utilize environmental equivalence for visual inspections. Although visual inspections are still the practice, the updated 2013 SPCC [Truncated] |

| Violation Description: | Failure to determine if the waste generated is a hazardous waste. |
| Violation Notes: | Returned to compliance on 12/16/2019. OBSERVATION: Owner/Operator failed to determine if the waste generated from the sand blast operations and in the unknown green drum located in the lube oil area is a hazardous waste. CORRECTIVE ACTION: Submit documentation to the CUPA indicating you have determined that the waste in question is hazardous or not and how this determination was made. i.e. Generator knowledge, lab analysis, etc. If determined to be hazardous waste then you must manage it as such. Specify how it is being managed in response documentation. |

| Violation Description: | Failure to adequately describe in the SPCC Plan, overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container. |
| Violation Notes: | Returned to compliance on 01/09/2020. OBSERVATION: Failure to adequately describe in the SPCC Plan, overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container. CORRECTIVE ACTION: Update the SPCC plan |

**SHELL CATALYSTS & TECHNOLOGIES (Continued)** **S105673338**

to properly address overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container (ex: sticking tank is part of loading and unloading procedures for bulk tanks, but used oil drums might be visually checked, and observed while filling to prevent overfill). Having a cross reference that includes this information will make this clear.

Violation Date: 11-21-2019
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 12/19/2019. OBSERVATION: Leaked ADM material was observed spilled inside a secondary containment in the catalyst processing area. CORRECTIVE ACTION: Submit photos/documentation to the CUPA demonstrating the spill has been properly removed and managed.

| | possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment. |
| Violation Notes: | Returned to compliance on 10/17/2022. OBSERVATION: Trenches in the X1 and X2 areas contained what appeared to be a build up of waste catalyst. Spills were observed in the X2 liquid addition area. Secondary containment for various hazardous waste containers in the 90 day storage warehouse contained spilled material that was presumed hazardous waste. Green and purple liquids (metal-containing) were observed dripping and pooling on the ground in the H2 tank mezzanine area. The trenches in this area also contained standing liquid that contained metals. Bluish green staining was observed on the ground in the ERM tank storage area. CORRECTIVE ACTION: Hazardous waste spills must be cleaned up. Secondary containment must be kept clean. Hazardous waste must be cleaned out of trenches and may not be accumulated in trenches. Trenches may be used to convey liquids but not store them. ERM must be stored in tanks or containers. Submit photos to the CUPA that the spills in these areas have been cleaned up. | Violation Description: | Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container. For mobile or portable containers, either provide the type of oil and storage capacity, or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities. |
| Violation Notes: | Returned to compliance on 12/19/2019. OBSERVATION: Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container, or, for portable and/or mobile containers, either provide the type of oil and storage capacity, or an estimate of the potential number of portable or mobile containers, the types of oil, and anticipated storage capacities. The facility has oily shop pad water that should be included in the SPCC plan as a technical amendment. One 275 gal tote was observed on site, but CERS inventory allows for up to 4. Facility shall determine the upper limit needed for the SPCC plan. The transformers and oil filled equipment for the X3/H2 and Sub 2000/Compressor Pad/X2 Load Center appear to have pooled the inventory in the total volume so it is not clear that both oil equipments are covered, so that should be evaluated. The labels on the site diagram should match the Tables used in the plan. CORRECTIVE ACTION: Amend the SPCC Plan to properly address the type and storage [Truncated] |

| Violation Description: | Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date. |
| Violation Notes: | Returned to compliance on 09/16/2022. OBSERVATION: A number of hazardous waste containers were observed without hazardous waste labels or with incomplete hazardous waste labels. These include the compressor used oil containers, containers/bags of waste catalyst that were mislabeled for physical state, a container/bag of waste catalyst mislabeled as used oil, and the tote of "nitric wash and soda wash." CORRECTIVE ACTION: Properly label all hazardous waste containers on site. Submit photos to the CUPA demonstrating that the containers listed above have been properly labeled. |

| Violation Description: | "Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs." |
| Violation Notes: | Returned to compliance on 01/09/2020. OBSERVATION: Failure to prepare SPCC Plan that meets the following requirements: 1. Follows the sequence of SPCC rule and/or includes cross-reference. 2. Prepared in accordance with good engineering practices. 3. Has the full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC plan. 4. Plan is in writing. 5. Plan addresses additional procedures/methods/equipment not yet fully operational. The August 2016 SPCC plan reviewed during this inspection has a cross reference, but it only includes sections in 112.7 and does not include cross reference to required sections in 112.8 (drainage from diked areas, overfill prevention, etc) and 112.5 which is found in Section 15 (pages 28-29). Additionally, integrity testing utilizes guidance from the SPCC Guidance for Regional Inspectors Feb 3, 2006 to utilize environmental equivalence for visual inspections. Although visual inspections are still the practice, the updated 2013 SPCC [Truncated] |

| Violation Description: | Failure to determine if the waste generated is a hazardous waste. |
| Violation Notes: | Returned to compliance on 12/16/2019. OBSERVATION: Owner/Operator failed to determine if the waste generated from the sand blast operations and in the unknown green drum located in the lube oil area is a hazardous waste. CORRECTIVE ACTION: Submit documentation to the CUPA indicating you have determined that the waste in question is hazardous or not and how this determination was made. i.e. Generator knowledge, lab analysis, etc. If determined to be hazardous waste then you must manage it as such. Specify how it is being managed in response documentation. |

| Violation Description: | Failure to adequately describe in the SPCC Plan, overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container. |
| Violation Notes: | Returned to compliance on 01/09/2020. OBSERVATION: Failure to adequately describe in the SPCC Plan, overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container. CORRECTIVE ACTION: Update the SPCC plan to properly address overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container (ex: sticking tank is part of loading and unloading procedures for bulk tanks, but used oil drums might be visually checked, and observed while filling to prevent overfill). Having a cross reference that includes this information will make this clear. |

| Violation Description: | Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment. |
| Violation Notes: | Returned to compliance on 10/17/2022. OBSERVATION: Trenches in the X1 and X2 areas contained what appeared to be a build up of waste catalyst. Spills were observed in the X2 liquid addition area. Secondary containment for various hazardous waste containers in the 90 day storage warehouse contained spilled material that was presumed hazardous waste. Green and purple liquids (metal-containing) were observed dripping and pooling on the ground in the H2 tank mezzanine area. The trenches in this area also contained standing liquid that contained metals. Bluish green staining was observed on the ground in the ERM tank storage area. CORRECTIVE ACTION: Hazardous waste spills must be cleaned up. Secondary containment must be kept clean. Hazardous waste must be cleaned out of trenches and may not be accumulated in trenches. Trenches may be used to convey liquids but not store them. ERM must be stored in tanks or containers. Submit photos to the CUPA that the spills in these areas have been cleaned up. | Military DOD Site: | No |
| Facility Project Subtype: | Not reported |
| RWQCB Region: | SAN FRANCISCO BAY RWQCB (REGION 2) |
| Site History: | The site includes a right of way associated with the former Standard Oil of California pipeline. The pipeline was used between early 1900s through the 1930s to transport crude oil from the San Joaquin Valley to refineries in the San Francisco Bay area. A soil and groundwater investigation was performed in 2001. The comparison of site data to ESLs concluded that total petroleum hydrocarbons as diesel, benzene, toluene, ethylbenzene, and total xylenes and polynuclear aromatic hydrocarbons at the site do not pose a threat to human health and the environment for an industrial land use scenario. 12/15/2022 Update-Soil vapor still remains a concern for at least two of the residential properties adjacent to the historical PL. Concentrations at depth (10-15 feet bgs) exceed the residential ESLs by at least 10X for TPHg, TPHd, and benzene. Naphthalene is also present above the residential ESL. Shallower samples (5 feet bgs) are not as impacted only exhibiting benzene and naphthalene above the residential ESLs. Oxygen above 4% is present at 5 and 10 feet bgs but below 4% at 15 feet bgs, though this does indicate attenuation is likely occurring. Lastly, indoor air samples that have been collected, access to all of the residential properties has not been granted, does potentially show migration to indoor air. The RP has argued that where data is available, smokers live in the home, however, a convincing argument has yet to be made by the RP to support this claim. |

| Treat To Water: | Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality. |
| Complexity: | Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds. |

**FOOD & LIQUOR (Continued)** **S101306995**

16, Section(s) 2641(h)
Violation Description: Failure to have an approved UST Monitoring Plan.
Violation Notes: Returned to compliance on 02/07/2025. OBSERVATION: The facility has recently upgraded its UDCs from float and chains to sensors. The 3/4 and 7/8 UDC fuel sensors are now 323 and the 1/2 and 5/6 UDC fuel sensors are now 208s. CORRECTIVE ACTION: Update UST monitoring plan and submit to CERS.
Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS,

Site ID: 77148
Site Name: H&S Energy Products, LLC #3047
Violation Date: 01-18-2022
Citation: HSC 6.7 25291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(b)
Violation Description: Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.
Violation Notes: Returned to compliance on 01/21/2022. OBSERVATION: The [E85] Annular sensor is not approved for use with E85, Use only approved sensors for E*% CORRECTIVE ACTION: Correct immediately by having a properly licensed, trained, and certified contractor replace the failed component with a functional component (LG 113-x listed, if applicable) and obtain a permit within 1 business day from the CUPA. If the failed component can t be replaced immediately, there is a possibility that the [E85] UST system may be red tagged to prevent fuel inputs.
Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS,

Site ID: 77148
Site Name: H&S Energy Products, LLC #3047
Violation Date: 01-25-2021
Citation: 23 CCR 16 2632(c)(2)(A)&(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(A)&(B)
Violation Description: Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.
Violation Notes: Returned to compliance on 01/25/2021. OBSERVATION: The 91 Unleaded annular sensor failed to activate an audible and visual alarm when tested and, therefore, the tank is not monitored. The interstitial space shall be monitored with a monitoring system connected to an audible and visual alarm system. The Veeder Root 420 sensor was replced with a Veeder Root 460 sensor during the inspection. The new sensor was tested and observed to pass. CORRECTIVE ACTION: No further action required for this violation.
Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS,

Site ID: 77148
Site Name: H&S Energy Products, LLC #3047
Violation Date: 01-25-2021
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during

**FOOD & LIQUOR (Continued)** **S101306995**

storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 01/25/2021. OBSERVATION: 55 gallon drum of solid hazardous waste located in the hazardous waste storage area was observed open. Drum was closed during the inspection. CORRECTIVE ACTION: Ensure that the container listed above remains closed when hazardous waste is not being added.

Citation: 23 CCR 16 2636(f)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(4)
Violation Description: Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC).
Violation Notes: Returned to compliance on 03/31/2023. OBSERVATION: Failed to maintain a monitoring system capable of stopping the flow of E85 product in

**FOOD & LIQUOR (Continued)** **S101306995**

dispenser 7/8 and 3/4 when a leak is detected in the under dispenser containment. CORRECTIVE ACTION: Maintain a monitoring system that shuts down the pump or stops the flow when a leak is detected in the under dispenser containment. Repair and retest.

Violation Division: Contra Costa County Health Services Department
Violation Program: UST
Violation Source: CERS,

Site ID: 77148
Site Name: H&S Energy Products, LLC #3047
Violation Date: 01-15-2025
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 01/15/2025. OBSERVATION: 85 and 87 spill containers failed 1hour lake test. 87 nipple was tightened and 85 O-ring was replaced. Buckets were tested again and observed to pass. CORRECTIVE ACTION: Corrected on site, no further action required.

Hazardous Waste Summary:

| | |
|---|---|
| Waste Code: | D000 |
| Waste Description: | Not Defined |
| Waste Code: | D001 |
| Waste Description: | Ignitable Waste |
| Waste Code: | D002 |
| Waste Description: | Corrosive Waste |
| Waste Code: | D003 |
| Waste Description: | Reactive Waste |

**HENKEL US OPERATIONS CORPORATION ATT: CHUCK CORNISH (Continued)** **1000401511**

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl

**HENKEL US OPERATIONS CORPORATION ATT: CHUCK CORNISH (Continued)** **1000401511**

Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: LABP
Waste Description: Lab Pack

Waste Code: P048
Waste Description: 2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-

Waste Code: P087
Waste Description: Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U003
Waste Description: Acetonitrile (I,T)

Waste Code: U004
Waste Description: Acetophenone (Or) Ethanone, 1-Phenyl-

Waste Code: U012
Waste Description: Aniline (I,T) (Or) Benzenamine (I,T)

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U096
Waste Description: Alpha,Alpha-Dimethylbenzylhydroperoxide (R) (Or) Hydroperoxide, 1-Methyl-1-Phenylethyl- (R)

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U138
Waste Description: Methane, Iodo- (Or) Methyl Iodide

Waste Code: U151
Waste Description: Mercury

**HENKEL US OPERATIONS CORPORATION ATT: CHUCK CORNISH (Continued)** **1000401511**

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U188
Waste Description: Phenol

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

| Site History: | The 28-acre site was originally part of a larger 85-acre industrial facility that was owned and operated by Shell Chemical Company. From 1930 to 1967, the 85-acre facility was a commerical ammonia fertilizer manufacturing plant, and since 1945, it has manufactured metal catalysts. Several manufacturing and storage facilities have existed on this site, such as aboveground storage tanks, a benzol plant and a compressor plant. In 1988, Limited Partners Catalyst Holding Company (LPCH) assumed ownership of the catalyst manufacturing facility; the facility continues to manufacture several types of catalysts. Currently, administration buildings, a labratory, catalyst manufacturing, storage and shipping facilities, a PG&E substation as well as a change room and training center are located on the 28-acre site. |

Facility Project Subtype: Not reported
RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
Site History: The Site is located in downtown Pittsburg, California and is bounded by 10th Street to the south, Railroad Avenue to the east, vacant unpaved lots (now part of the Marina School site) to the north, and the previous (prior to expansion) Marina School property boundary to the west. The Site had historically been used as a petroleum service station (All Star Gas) and Bell Gas operated the fuel station, mini-mart, and tire shop. The Site was acquired by the Pittsburg Unified School District (PUSD) through eminent domain in January 2008. Prior to acquisition by the PUSD, the Site was comprised of a single-story mini-mart (55 feet by 25 feet) and tire shop (20 feet by 25 feet) buildings, both located at the northwest portion. Two petroleum underground storage tanks (USTs) (one 10,000-gallon gasoline and one 10,000 gallon gasoline/diesel dual compartment tank) were located in the north central portion of the property. Former USTs were removed prior to 1987. The USTs were removed in July-Sept of 2008. The Site has a flat topography and the surface water drains gently toward the streets.

| Violation Description: | Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days. |
| Violation Notes: | OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected. |

Site Name: JASS BOYS TRUCK LINES LLC
Violation Date: 02-12-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 02/13/2020. OBSERVATION: The business failed to establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material. Emergency response plan on site and cers does not evaluate earthquake vulnerability. CORRECTIVE ACTION: Establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material within 30 days.
Violation Division: Contra Costa County Health Services Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 125627
Site Name: JASS BOYS TRUCK LINES LLC
Violation Date: 02-12-2020
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 12/09/2020. OBSERVATION: The business failed to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material including familiarity with the emergency response plan or failure to document and maintain training records for a minimum of three years. CORRECTIVE ACTION: Establish and electronically submit an employee training program containing provisions to ensure initial and annual training for all employees in safety procedures in the event of a release or threatened release of a hazardous material and document and maintain training records for a minimum of three years.

| Site History: | The subject property (Site) is located in the central portion of the city of Pittsburg, California, on the corner of Railroad Avenue and Tenth Street, in an area of commercial and light industrial land use. The site is presently occupied by a Redding Petroleum gasoline station consisting of a one-story structure housing a cashier s booth, one canopy-covered dispenser island with six fuel dispensers, and three 12,000-gallon underground storage tanks (USTs). Two USTs are used for gasoline and one is split as a 6,000-gallon diesel and 6,000-gallon gasoline UST. In August and September 1998, one 10,000-gallon and two 8,000-gallon gasoline USTs, one 6,000-gallon diesel UST, and one 2,000-gallon kerosene UST were removed from the site by Fahy Construction; in addition, a waste oil UST also may have been removed. The gasoline UST excavation site was utilized for the |

**REDDING PETROLEUM INC (Continued)** **U001597893**

placement of new USTs to meet the December 1998 upgrade requirements; the piping and dispensers were also upgraded at this time. Environmental analysis detected total petroleum hydrocarbons quantified as gasoline (TPH-g) and volatile aromatic compounds benzene, toluene, ethylbenzene, and xylenes (BTEX) in soil samples collected from beneath the former gasoline USTs at maximum concentrations of 64 milligrams per kilogram (mg/kg) TPH-g, 17 mg/kg benzene, 87 mg/kg toluene, 61 mg/kg ethylbenzene, and 170 mg/kg xylenes; total petroleum hydrocarbons quantified as diesel (TPH-d) in the diesel and kerosene USTs were detected at a maximum concentration of 25 mg/kg; total petroleum hydrocarbons quantified as oil and grease (TPH-og) in the waste oil UST were detected at a concentration of 11 mg/kg. TPH-g, TPH-d, and BTEX were detected in one of the former piping trenches at maximum concentrations of 26 mg/kg TPH-g, 31 mg/kg TPH-d, 18 mg/kg benzene, 16 mg/kg toluene, 38 mg/kg ethylbenzene, and 79 mg/kg xylenes. Concentrations of TPH-g, TPH-d, and BTEX compounds were also detected in samples collected from the excavated (stockpiled) soil. Methyl tertiary-butyl ether (MTBE) was not found at or above detection limits in any of the samples analyzed.

Completed Document Type: * Discovery
Completed Date: 08/30/2002
Comments: The DTSC s Office of Military Facilities (OMF) became aware of the property in the late 1990s when the Contra Costa Water District collected environmental samples that also indicated that high levels of lead, mercury and other metals remain onsite. Recommended referral to OMF. Further action and evaluation is needed.

Completed Document Type: RFI Report
Completed Date: 04/09/2018
Comments: The Revised Soil Gas Investigation Report documents the sampling results from six soil gas sampling locations throughout AOC-1. Nine locations were originally proposed but three locations were not sampled due to groundwater encountered during boring or sampling activities. One sample location (AOC-1-SG-08) had concentrations of trichloroethylene and vinyl chloride above their respective screening level. Subsequently, a site-specific vapor intrusion assessment was completed using the Johnson & Ettinger Model and concluded that there is a de minimis risk to current and future human health based on a commercial/industrial scenario. A residential risk scenario was not evaluated because all remedial alternatives, except No Action, will include a land use covenant restricting residential use of the Site.

Completed Document Type: Technical Workplan
Completed Date: 09/12/2017
Comments: Proposed Waterfowl Nesting Deterrent Strategy Memo proposes clearing vegetation and deploying coyote decoys to deter waterfowls from nesting in the AOC-2 Former Island. Post -implementation monitoring of the AOC -2 former island includes inspecting the former island for ponded water, and evidence of waterfowl in areas with ponded water. Inspections indicated the presence of waterfowl and evidence of nesting on the AOC -2 former island in April 2017. The deterrent strategy will be implemented before the next rainy season (October 15, 2017).

Completed Document Type: Remedy Selection and Statement of Basis
Completed Date: 02/11/2020
Comments: Statement of Basis is DTSC's decision document for the remedy at the Site. The proposed Corrective Measures would include the following activities to address low pH, elevated metals and volatile organic compounds (VOCs) in soil and groundwater at the Proposed Project Site: Construct subsurface hydraulic barrier walls with French drains around the western, eastern, and northern boundaries of the three AOCs with sections of permeable reactive barriers along the northern boundaries to passively treat groundwater; Sample soil to define conditions near Suisun Bay in the northern portion of AOC-2 and AOC-3; o Remove soil if chemicals are present above cleanup levels, o Backfill with clean fill to create a Clean Zone at the Shoreline;
Pave approximately 1.4 acres of AOC-1; Construct a soil cap with an asphalt skirt over AOC-2 and a portion of AOC-3; Perform groundwater monitoring to confirm reductions in VOC concentrations by natural processes (Monitored Natural Attenuation) and effectiveness of the hydraulic barrier walls, PRBs and soil cover; and Restrict land use, soil disturbance, and groundwater uses by recording a Land Use Covenant.

| Comments: | The investigation was conducted at the request of the DTSC and included the collection of soil and groundwater samples to evaluate the lateral extent of elevated metals detected in well MW ]S17. Four borings were advanced to the southwest, northwest, northeast and 5 feet west of MW-S17. Data from his soil and groundwater investigation show the presence of elevated metals and low pH in soil and groundwater in the MW ]S17 area. |

Completed Sub Area Name: AOC-2 LAGOON AREA
Completed Document Type: Other Report
Completed Date: 06/23/2017
Comments: Site inspection report for the Former AOC-2 Island documented water ponding and the presence of Canada geese on the AOC-2 Island in April. The observed conditions in April prompted an inspection by a wildlife biologist. The wildlife biologists observed the following on the AOC-2 Former Island: no active bird nests or waterfowl, an active nest with one failed egg and no indications of the presence of protected species. Ponding observed in April had subsided by June. A deterrent strategy will be implemented after the nesting season but before the next rainy season as waterfowl and evidence of nesting were observed.

Quarterly Update: Quarterly Update Period: July 2016 to September 2016 Current Activity: Approval of Closure Certification Report for all 5 permitted units regarding Final Facility-wide Closure activity of all permitted units is in progress. Facility Wide Closure of Permitted RCRA Units: DTSC was notified by Chemtrade West on 1/6/2015 that the facility intends to close the permitted tank system. The facility expected to begin final closure in April 2015 in accordance with the approved Closure Plan (Section I of the Part B Permit Application). However after DTSC initial review and site visit, revisions to the

**CHEMTRADE WEST US LLC (Continued)** **S105455156**

Closure Plan where necessary was completed. FACILITY DESCRIPTION/ HISTORY The Facility occupies approximately 26 acres located at 501 Nichols Road in Pittsburg, California. The site includes chemical plants, chemical storage tanks, warehouses, support and service buildings, a RCRA permitted hazardous waste storage tank, a NPDES permitted wastewater treatment lagoon. The General Chemical Bay Point Work Facility is a portion of the original chemical manufacturing facility that started operations in the early 1900's as the Nichols Chemical Company. The Nichols Chemical Company imported pyrite ore from the Sierra Nevada Mountains for the production of low grade sulfuric acid. The acid was produced by burning the pyrite ore and recovering sulfur from the off-gas. In addition to sulfuric acid production, other historic operations included production of nitric acid, hydrofluoric acid and aluminum sulfate (alum). The operation was acquired by Allied Chemical Corporation, with a subsequent name change to Allied Signal, which then changed its name to Honeywell International, Inc. (Honeywell) subsequent to the Allied Signal and Honeywell merger in 1999. General Chemical operations started in 1986 by purchasing the approximately 26 acre operating plant and an associated wastewater treatment lagoon area from Allied Chemical. Since 1986, General Chemical operations have included the production of chemically pure (P) sulfuric, nitric and hydrofluoric acids and etchants. General Chemical also packaged solvents at the facility (including 2-propanol, methanol, n-butyl acetate, acetone and methyl ethyl ketone) although this operation is no longer performed. PERMITTING REGULATORY DESCRIPTION/ HISTORY An operating facility permit was approved in 10/26/1983. The facility permit was renewed in 2006 and is the existing authorization. The Chemtrade West (CW) facility major product line is chemically pure (CP) process acids. Large volumes of water are required to thoroughly clean pipes, pumps and ancillary equipment associated with the CP acid producing process. The water used to perform these functions becomes contaminated with acids and sometimes chromium. These wastewaters are collected in four separate sumps within the facility and sent to two 16,400 gallon capacity storage tanks for greater than 90 days but no longer than one year depending on production process. The hazardous waste permit authorizes the collection of acid waste water in 4 sumps and storage of maximum total of 30,000 gallons of waste in two hazardous waste aboveground storage tanks. On a yearly basis, the total amount of acid wastes to be stored prior to treatment is less than 200,000 gallons. The hazardous waste aboveground storage tanks are two HDPE tanks integrally attached to the bottom of a lined concrete pad with a total secondary containment capacity of 27,500 gallons. The wastewaters are collected in four separate sumps within the facility and sent to one of the two 16,400 gallon capacity hazardous waste aboveground storage tanks as a RCRA hazardous waste. . A RCRA Facility Assessment (RFA) report was issued by the DTSC in 1992. The RFA identified 13 solid waste management units (SWMUs) and one hazardous waste management unit (HWMU) on General Chemical property. A RCRA Facility Investigation was initiated in 1995 and included release investigatio

| Waste Code: | D018 |
| Waste Description: | Benzene |
| Waste Code: | D022 |
| Waste Description: | Chloroform |
| Waste Code: | D035 |
| Waste Description: | Methyl Ethyl Ketone |
| Waste Code: | D038 |
| Waste Description: | Pyridine |
| Waste Code: | F002 |
| Waste Description: | The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures. |
| Waste Code: | F003 |
| Waste Description: | The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures. |
| Waste Code: | F005 |

**GENERAL CHEMICAL BAY POINT WORKS (Continued)** **1000214028**

Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U096
Waste Description: Alpha,Alpha-Dimethylbenzylhydroperoxide (R) (Or) Hydroperoxide, 1-Methyl-1-Phenylethyl- (R)

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

**GENERAL CHEMICAL BAY POINT WORKS (Continued)** **1000214028**

The Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and

**GENERAL CHEMICAL BAY POINT WORKS (Continued)** **1000214028**

reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

| Completed Document Type: | Preliminary Endangerment Assessment Report |
| Completed Date: | 02/16/2000 |
| Comments: | Preliminary Endangerment Assessment was completed and found high levels of metals and fluorides in all four areas. A tidal study, aquifer testing, habitat mapping, soil characterization and testing, groundwater testing, and conceptual modeling were addressed by the PEA. Soil was tested for total metals, fluorides, organochlorine pesticides, pH, and volatile organic compounds (VOCs). Groundwater was analyzed for total metals, fluoride, organochlorine pesticides, and polycyclic aromatic hydrocarbons (PAHs). Two areas (Former Alum Mud Pond and Former Gypsum Stockpile Area) had low soil pH. |

Completed Date: 11/08/2017
Comments: The Updated Groundwater Modeling Report documents construction of a 3-D, numerical, groundwater flow model for the site. The Report incorporates new hydrogeologic data collected during the 2014 Data Gap Investigation and the 2016 Supplemental Data Gap Investigation. Additionally, the Report no longer presents predictive results for specific remedial actions contemplated at the Site. Instead, discussion of such predictive use of the model for remedial alternative evaluation is planned to be incorporated within the upcoming Feasibility Study and Remedial Action Plan.

Completed Document Type: Treatability Study Report
Completed Date: 05/09/2017
Comments: Radionuclide Treatability Study Report that evaluates the effectiveness of several reactive media (bone ash, bone char, zeolite, and ZVI) for treatment of radium, thorium and uranium isotopes should treatment of these radionuclides be determined necessary as part of the future remedial action for the Site. The study has shown that metals and naturally occurring isotopes of Ra,

**POLYCHEMIE INC (Continued)** **S103984246**

Th, and U in groundwater can be treated very effectively using a single PRB consisting of a mixture of ZVI, zeolite, sand, compost, and crushed limestone.

Completed Document Type: Removal Action Completion Report
Completed Date: 12/30/2019
Comments: This memorandum describes mitigation methods and associated success criteria evaluation for activities completed in 2019. This is the final mitigation reporting summary as identified in permits received for the project. All mitigation requirements for construction impacts to salt march have been successfully completed and success criteria have been achieved. Relative percent cover was visually assessed and observed to be near 100% within the treatment area, with very sparse coverage of lepidium. Restoration planting or other contingency actions were not required because dense coverage of native vegetation with few isolated individual lepidium plants was observed throughout the treatment area.

Completed Date: 06/08/2017
Comments: The Gypsum Pond Removal Action Workplan is an interim action measure while a permanent solution is being evaluated and implemented as a part of the overall environmental investigation and remediation activities for the Site. The overall objectives of this RAW are to control the surface water accumulation and associated concern in the Former Gypsum Stockpile Area at the Site while preparing that area for implementation of a permanent solution. The overall objectives will be accomplished by drying the Gypsum Pond and implementing bird deterrence.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/16/2000
Comments: Preliminary Endangerment Assessment was completed and found high levels of metals and fluorides in all four areas. A tidal study, aquifer testing, habitat mapping, soil characterization and testing, groundwater testing, and conceptual modeling were addressed by the PEA. Soil was tested for total metals, fluorides, organochlorine pesticides, pH, and volatile organic compounds (VOCs). Groundwater was analyzed for total metals, fluoride, organochlorine pesticides, and polycyclic aromatic hydrocarbons (PAHs). Two areas (Former Alum Mud Pond and Former Gypsum Stockpile Area) had low soil pH.

Completed Document Type: Site Characterization Report
Completed Date: 11/08/2017
Comments: The Updated Groundwater Modeling Report documents construction of a 3-D, numerical, groundwater flow model for the site. The Report incorporates new hydrogeologic data collected during the 2014 Data Gap Investigation and the 2016 Supplemental Data Gap Investigation. Additionally, the Report no longer presents predictive results for specific remedial actions contemplated at the Site. Instead, discussion of such predictive use of the model for remedial alternative evaluation is planned to be incorporated within the upcoming Feasibility Study and Remedial Action Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Treatability Study Report
Completed Date: 05/09/2017
Comments: Radionuclide Treatability Study Report that evaluates the effectiveness of several reactive media (bone ash, bone char, zeolite, and ZVI) for treatment of radium, thorium and uranium isotopes should treatment of these radionuclides be determined necessary as part of the future remedial action for the Site. The study has shown that metals and naturally occurring isotopes of Ra, Th, and U in groundwater can be treated very effectively using a single PRB consisting of a mixture of ZVI, zeolite, sand, compost, and crushed limestone.

Completed Document Type: Pilot Study/Treatability Workplan
Completed Date: 09/30/2019
Comments: The workplan proposes to characterize the excavation limits at former boring locations DPT-54 and DPT-56, to collect supplemental pre-design geotechnical soil samples at the proposed evaporation cell to evaluate sheet pile anchoring depth, and to conduct an evaporation

**POLYCHEMIE INC (Continued)** **S103984246**

cell pilot-scale test to obtain site-specific evaporation rates which will support sizing of the proposed evaporation cell.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 12/30/2019
Comments: This memorandum describes mitigation methods and associated success criteria evaluation for activities completed in 2019. This is the final mitigation reporting summary as identified in permits received for the project. All mitigation requirements for construction impacts to salt march have been successfully completed and success criteria have been achieved. Relative percent cover was visually assessed and observed to be near 100% within the treatment area, with very sparse coverage of lepidium. Restoration planting or other contingency actions were not required because dense coverage of native vegetation with few isolated individual lepidium plants was observed throughout the treatment area.

Completed Date: 06/08/2017
Comments: The Gypsum Pond Removal Action Workplan is an interim action measure while a permanent solution is being evaluated and implemented as a part of the overall environmental investigation and remediation activities for the Site. The overall objectives of this RAW are to control the surface water accumulation and associated concern in the Former Gypsum Stockpile Area at the Site while preparing that area for implementation of a permanent solution. The overall objectives will be accomplished by drying the Gypsum Pond and implementing bird deterrence.

| Description: | Per the NRC: The caller reports a pump failure caused the scrubber to overload, Materials where released (Formaldehyde and DMA). NOTE 1: System was shut down immediately. Plant is removing material from the scrubber and will replace with fresh waterr, resetting the system. NOTE 2: The amount released is believed to be below the RQ of either Material. The caller reports some odor complaints from people in the area. The caller will contact the LEPC( if it is not Contra Costa) and Ca OES if required. |

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently

**CHEMICAL AND PIGMENT (Continued)** **1000299403**

implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

| Quarterly Update: | An unpermitted hazardous waste facility is located on the property at 600 Nichols Road, Bay Point, Contra Costa, California 94565 (Facility). The Facility's operation included treatment and disposal of hazardous wastes and substances. On November 5, 1997, DTSC issued an administrative enforcement action against the Chemical & Pigment Co. for violations of the California Hazardous Waste Control Law (HWCL). The enforcement action was resolved by a Stipulation and Order, effective March 16, 1998, which required the company to pay fifty thousand dollars ($50,000) in penalties. In addition, DTSC determined that in order for the facility to continue its operations, a hazardous waste facility permit would be required. Although the facility submitted a standardized permit application in 1998, the facility filed for bankruptcy and subsequently ceased operations before a permit decision could be made by DTSC. Susequently, facility was abandoned and is being cleaned up under CERCLA. According to the Remedial Action Certification dated November 18, 2014, CPC has been administered under an Imminent and Substantial Endangerment Determination and Order by DTSC since 2002. Investigation showed elevated levels of metals in the soil of the former plant processing area. From October 2003 to August 2004, remedial and removal action was performed onsite which included excavation, disposal and treatment of soil. Remedial action was completed in May 2012 when a cap was set in place and groundwater monitoring is being performed on the area. |

| Background Info: | Beginning in 1960, Chemical and Pigment Company (CPC) began manufacturing agricultural products, such as fertilizers and soil amendments, using zinc fines from the galvanizing industry. The zinc fines contained metals including lead, cadmium, and copper. The company is bankrupt and abandoned the Site. DTSC is using State funds to investigate the property. |
| Comments Date: | 01012002 |
| Comments: | DTSC's Emergency Response Unit obtained an inspection warrant |
| Comments Date: | 01012002 |
| Comments: | and took measures to stabilize the site including covering the |
| Comments Date: | 01012002 |
| Comments: | soil pile, removing chemicals that had been abandoned onsite, |
| Comments Date: | 01012002 |
| Comments: | and securing the building and fence. This stockpile was |
| Comments Date: | 01012002 |
| Comments: | generated as a result of a 1991 lawsuit by the U.S. Navy |
| Comments Date: | 01012002 |
| Comments: | alleging the Company was the source of zinc and lead |
| Comments Date: | 01012002 |
| Comments: | contamination in the groundwater underlying the Concord Naval |
| Comments Date: | 01012002 |
| Comments: | Weapons Station. Because of this court action, approximately |
| Comments Date: | 01012002 |
| Comments: | 15,000 cubic yards of contaminated soil was excavated and |
| Comments Date: | 01012002 |
| Comments: | stockpiled on an unpaved area of the site. |
| Comments Date: | 01012003 |
| Comments: | Emergency Response Unit removed various sacks, drums, and |
| Comments Date: | 01012003 |
| Comments: | liquids from the property. |
| Comments Date: | 01312003 |
| Comments: | DTSC's State contractor installed a storm water treatment system |
| Comments Date: | 01312003 |
| Comments: | which collects and treats rainwater which accumulates on the |
| Comments Date: | 01312003 |
| Comments: | site. This water is treated by ion exchange to remove |

| Reponsible Party: | BACKLOG SITE CLEANUP PLANNING REPORT |
| Project Revenue Source Company: | Not reported |
| Project Revenue Source Addr: | Not reported |
| Project Revenue Source City,St,Zip: | Not reported |
| Project Revenue Source Desc: | This site is projected to be remediated by the RP. However, if RP funding is not available, another source of funds will need to be established. DHS currently has no plans to commit any funds for this project. |
| Site Description: | This site consists of a chemical products factory, a metal reprocessing facility and a one-half acre pond area located adjacent to the Suisun Marsh, near the San Joaquin River. |
| Hazardous Waste Desc: | Soils are contaminated with zinc, lead, and cadmium. Ground water beneath the site shows elevated levels of zinc. |
| Threat To Public Health & Env: | Surface runoff from the site into the Suisun Marsh may affect the marshland ecosystem. Direct contact by humans is also a potential exposure pathway. |

Completed Date: 04/05/2010
Comments: The total volume of treated surface runoff water discharged to the sanitary sewer system for the period from February 6, 2010 to March 25, 2010 was 115,115 gallons.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 12/24/2010
Comments: The total volume of treated surface runoff water discharged to the sanitary sewer system for the period October 25, 2010 to December 21, 2010 was 168,190 gallons.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Report
Completed Date: 06/26/2017
Comments: DTSC's contractor abandoned four groundwater monitoring wells (M-1,

**CHEMICAL AND PIGMENT CO (Continued)** **S104156012**

M-2R, M-5, and V-5) at the site. All waste generated during the well closure was disposed as non-hazardous waste.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 04/07/2015
Comments: Post-remediation groundwater monitoring workplan approved by DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 07/20/2023
Comments: The technical memorandum documents the burrowing mammal survey and summarizes x-ray fluorescence (XRF) soil sample measurements at the former Chemical and Pigment Company site on May 3, 2023.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 06/13/2023
Comments: Burrowing Mammal Survey Report documented the presence of several species of small burrowing animals within the OU1 portion of the cap and noted that they have the potential to dig to depths greater than two feet into soil, potentially below the vegetative cap. XRF instrument was used to analyze soil from 42 burrow mounds on the cap within OU1. The OU1 contaminants of concern (COCs) in soil include arsenic, cadmium, copper, lead, and zinc. No COCs were detected above OU1 remediation goals at each of the 42 soil mounds

| Completed Document Type: | Site Inspections/Visit (Non LUR) |
| Completed Date: | 10/24/2024 |
| Comments: | On 10/24/24, DTSC and its contractor, ERRG, entered the Chemical and Pigment Company site (Site) premises under inspection warrant MSW24-0728 to conduct a routine site inspection. DTSC and ERRG inspected the weed abatement measures, burrowing mammal population control devices, and also noted the general biological activity at the site such as amount of existing burrows and potential increases in small mammal predators such as hawks, owls, and snakes in order to naturally control the burrowing mammal population. Furthermore, DTSC and ERRG visually inspected the culverts that Nichols Creek flows through as well as the potential locations of four groundwater monitoring wells to be installed. DTSC noted no blockages of any culverts, and an abundance of dry grass on the property as well as signs of biological activity such as disturbed soils, animal droppings, feathers. However DTSC and ERRG were not able to confirm active usage of the raptor boxes or snake coverboards. |

Completed Date: 12/24/2010
Comments: The total volume of treated surface runoff water discharged to the sanitary sewer system for the period October 25, 2010 to December 21, 2010 was 168,190 gallons.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Decommissioning Report
Completed Date: 06/26/2017
Comments: DTSC's contractor abandoned four groundwater monitoring wells (M-1, M-2R, M-5, and V-5) at the site. All waste generated during the well closure was disposed as non-hazardous waste.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 04/07/2015
Comments: Post-remediation groundwater monitoring workplan approved by DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 07/20/2023
Comments: The technical memorandum documents the burrowing mammal survey and summarizes x-ray fluorescence (XRF) soil sample measurements at the former Chemical and Pigment Company site on May 3, 2023.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 06/13/2023
Comments: Burrowing Mammal Survey Report documented the presence of several species of small burrowing animals within the OU1 portion of the cap and noted that they have the potential to dig to depths greater than two feet into soil, potentially below the vegetative cap. XRF instrument was used to analyze soil from 42 burrow mounds on the cap within OU1. The OU1 contaminants of concern (COCs) in soil include arsenic, cadmium, copper, lead, and zinc. No COCs were detected above OU1 remediation goals at each of the 42 soil mounds

| Completed Document Type: | Site Inspections/Visit (Non LUR) |
| Completed Date: | 10/24/2024 |
| Comments: | On 10/24/24, DTSC and its contractor, ERRG, entered the Chemical and Pigment Company site (Site) premises under inspection warrant MSW24-0728 to conduct a routine site inspection. DTSC and ERRG inspected the weed abatement measures, burrowing mammal population control devices, and also noted the general biological activity at the site such as amount of existing burrows and potential increases in small mammal predators such as hawks, owls, and snakes in order to naturally control the burrowing mammal population. Furthermore, DTSC and ERRG visually inspected the culverts that Nichols Creek flows through as well as the potential locations of four groundwater monitoring wells to be installed. DTSC noted no blockages of any culverts, and an abundance of dry grass on the property as well as signs of biological activity such as disturbed soils, animal droppings, feathers. However DTSC and ERRG were not able to confirm active usage of the raptor boxes or snake coverboards. |

| Comments: | Order issued to Chemical & Pigment Co.,ESI Chemicals Inc., CPC Holdings Inc., Armor Equipment Sales Corp. for soil, groundwater and surface water contamination remediation. |
| Completed Area Name: | PROJECT WIDE |
| Completed Sub Area Name: | Not reported |
| Completed Document Type: | Certification |
| Completed Date: | 11/18/2014 |
| Comments: | Remedial activities at the Chemical and Pigment site have been completed. Operation and maintenance of the cap and limited groundwater monitoring will occur in the future. |
| Completed Area Name: | PROJECT WIDE |
| Completed Sub Area Name: | Not reported |
| Completed Document Type: | Lien |
| Completed Date: | 09/09/2004 |
| Comments: | Recorded Lien for $1,229,709. This covers work performed by DTSC to remove contaminated soils from the site. |
| Completed Area Name: | PROJECT WIDE |
| Completed Sub Area Name: | Not reported |
| Completed Document Type: | State/Federal Funded Site Work Order |
| Completed Date: | 04/09/2008 |
| Comments: | Work Order amendment to conduct a topographic survey was approved. |
| Completed Area Name: | PROJECT WIDE |
| Completed Sub Area Name: | Not reported |
| Completed Document Type: | State/Federal Funded Site Contract |
| Completed Date: | 11/23/2020 |
| Comments: | $10,000 added to the contract for long-term maintenance. |
| Completed Area Name: | PROJECT WIDE |
| Completed Sub Area Name: | Not reported |
| Completed Document Type: | State/Federal Funded Site Work Order |
| Completed Date: | 12/07/2020 |
| Comments: | Work order amendment for continued operation and maintenance. |
| Completed Area Name: | PROJECT WIDE |

**CHEMICAL AND PIGMENT CO (Continued)** **S104156012**

Completed Sub Area Name: Not reported
Completed Document Type: State/Federal Funded Site Contract
Completed Date: 02/17/2022
Comments: This contract amendments adds $10,000 and extend the contract to 6/30/2023.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Inspection Warrant
Completed Date: 01/11/2024
Comments: The Inspection Warrant MSW24-0036 was obtained from Contra Costa County Superior Court on January 11, 2024. This inspection warrant allows DTSC access to the Chemical and Pigment site to maintain fencing, the soil cap, and drainage and erosion control features until January 25, 2024.

Completed Area Name: PROJECT WIDE

Completed Document Type: State/Federal Funded Site Work Order
Completed Date: 05/02/2022
Comments: Work Order amendment for Operation and maintenance.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/31/1987
Comments: This report presents results of a hydrogeologic assessment of the surface impoundment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 03/27/1992
Comments: This reports documents soil excavation, stockpiling activities and verification sampling of the south field. The excavation was conducted in response to litigation by the U.S.Department of Navy concerning presence of soils containing heavy metals from Chemical Pigment Facility on the Concord Naval Weapons Station property bodering to the west.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 05/23/2003
Comments: Public Notice for Draft RAP for Interim Measures

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 07/13/2010
Comments: Approved remedial actions are -demolition and offsite disposal of waste concrete and asphalt and the placement of a clean soil cap over the entire former plant area, - excavate two feet of contaminated sediments in the north portion of the Nichols Creek (to be placed under the soil cap in former plant area and place two feet of containment cap in the excavation void in Nichols Creek, and - implement monitored natural attenuation groundwater.

| Description: | The Chemical and Pigment Company (CPC) site (Site) is located at 600 Nichols Road in Bay Point, California. The Site has approximately 12 acres in size. Beginning in 1960, the CPC began manufacturing agricultural products at the Site, such as fertilizers and soil amendments, using zinc fines from the galvanizing industry. The zinc fines contained metals including lead, cadmium, and copper. Although the Site has been owned and operated by different companies, the manufacturing and processing activities have remained the same, producing the same products. Prior to 1978, miscellaneous fluids generated as by-products from the manufacturing process were discharged into a small catch basin which drained into a stream bed. The creek forms the western boundary of the Site. Solid wastes (filtrate and tailings) consisting primarily of metals and silica were placed in a field south of the plant during the same period that liquid wastes were being discharged into the catch basin. In 1978, the catch basin was replaced by a surface impoundment that had a storage capacity of 1.4 million gallons. Engineered liners or leachate collection and removal systems were not part of the impoundment. In 1997, the San Francisco Regional Water Quality Control Board approved the closure of the 1.4-million-gallon surface impoundment. The closure included removal of the impoundment liquids, compaction of the wastes and impacted native soils, backfilling the impoundment, and installation of a semi-impermeable clay mat, 40 mil high-density polyethylene (HDPE) liner, geonet, polyvinyl chloride (PVC) drainpipe, geotextile fabric, and topsoil. Additionally, CPC was required to continue the groundwater extraction and semiannual groundwater monitoring. In 1998, CPC filed Chapter 11 bankruptcy and |

**CHEMICAL AND PIGMENT CO (Continued)** **S104156012**

was subsequently converted to liquidation. The company ceased operations and abandoned the Site, leaving assets in place that could not be liquidated. Historical investigations conducted at the Site showed that metals released to site soils include zinc, cadmium, copper, arsenic, and lead. Metals found in Nichols Creek sediments include cadmium, lead, zinc, and silver. Groundwater contaminants include benzene, ethylbenzene, arsenic, lead, cadmium, copper, zinc, and silver. In October 2002, DTSC issued an Imminent and Substantial Endangerment Determination and Order (Order) to CPC, ESI Chemicals, Inc., Robert Granville Knox, CPC Holding, and Arrnour Equipment Sales Corporation. This Order authorizes DTSC to take action to remove and contain hazardous substances at the site because the site poses an endangerment to public health or welfare or the environment through the release, or threatened release, of a hazardous substance. From October 2003 to August 2004, interim remedial activities were performed at the Site. These activities included removing all building structures, excavating sumps and backfilling them with clean soil, and removing a 15,000 cubic yard Resource Conservation and Recovery Act (RCRA)-hazardous waste soil stockpile from the Site. The soil from the stockpile was sent to the Kettleman Hills landfill for treatment and disposal. In 2012, the recommended remedy activities were completed, including demolition and removal of asphalt and concrete foundations in the former plant processing area (northern portion of the Site), and grading to form a foundation for a clean soil cap. Two feet (ft.) of metals-contaminated-sediment and -soil were excavated from the northern section of Nichols Creek and consolidated in the former plant processing area. After foundation grading activities were completed in Nichols Creek and the former plant processing area, geotextile was placed on the foundation surface as a demarcation and physical boundary between potentially impacted native soil and clean imported cap soil. The geotextile was overlain by a minimum 2-foot thick, clean soil cap, and the cap surface was seeded with native grasses.

The company ceased operations and abandoned the Site, leaving assets in place that could not be liquidated. Historical investigations conducted at the Site showed that metals released to site soils include zinc, cadmium, copper, arsenic, and lead. Metals found in Nichols Creek sediments include cadmium, lead, zinc, and silver. Groundwater contaminants include benzene, ethylbenzene, arsenic, lead, cadmium, copper, zinc, and silver. In October 2002, DTSC issued an Imminent and Substantial Endangerment Determination and Order (Order) to CPC, ESI Chemicals, Inc., Robert Granville Knox, CPC Holding, and Arrnour Equipment Sales Corporation. This Order authorizes DTSC to take action to remove and contain hazardous substances at the site because the site poses an endangerment to public health or welfare or the environment through the release, or threatened release, of a hazardous substance. From October 2003 to August 2004, interim remedial activities were performed at the Site. These activities included removing all building structures, excavating sumps and backfilling them with clean soil, and removing a 15,000 cubic yard Resource Conservation and Recovery Act (RCRA)-hazardous waste soil stockpile from the Site. The |

**CHEMICAL AND PIGMENT CO (Continued)** **S104156012**

soil from the stockpile was sent to the Kettleman Hills landfill for treatment and disposal. In 2012, the recommended remedy activities were completed, including demolition and removal of asphalt and concrete foundations in the former plant processing area (northern portion of the Site), and grading to form a foundation for a clean soil cap. Two feet (ft.) of metals-contaminated-sediment and -soil were excavated from the northern section of Nichols Creek and consolidated in the former plant processing area. After foundation grading activities were completed in Nichols Creek and the former plant processing area, geotextile was placed on the foundation surface as a demarcation and physical boundary between potentially impacted native soil and clean imported cap soil. The geotextile was overlain by a minimum 2-foot thick, clean soil cap, and the cap surface was seeded with native grasses.

| Description: | A drum was spilled inside a packaging area. The run off went off site. It went into the NPDES (National Pollution Discard Elimination System) system, which eventually makes it way to the Suisun Bay. It was neutralized by the automatic neutralizing system before it left the site. |

| Citation: | 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16 |
| Violation Description: | Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position. |
| Violation Notes: | Returned to compliance on 02/18/2020. OBSERVATION: Documented training of personnel was not available at the time of inspection. CORRECTIVE ACTION: Locate training documentation or conduct training with applicable personnel and document it. Submit a copy of the training documentation to the CUPA. |

|---|---|
| Comments: | The purpose of the inspections is to ensure that the encapsulated asbestos containing material (ACM) is not exposed at the ground surface . Based upon the observations, repairs on the fence and filling of animal burrows were recommended. Repairs are to be reported in the next inspection Report. This Report was approved on 11/29/2012. |

| Completed Sub Area Name: | Not reported |
| Completed Document Type: | Site Characterization Workplan |
| Completed Date: | 07/11/2008 |
| Comments: | The Work Plan scope of work included drilling of up to 16 soil borings to investigate for the presence of asbestos-containing materials within 10 feet of the ground surface in the Linear Park Property. The Work Plan was prepared because asbestos-containing materials were observed to extend beyond the southern boundary of the former Johns Manville Plant Site when cleanup activities were conducted. |
| Completed Area Name: | OU 3 - City of Pittsburg Linear Park Property |

**JOHNS MANVILLE (Continued)** **S109443840**

Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 09/14/2009
Comments: The Soil Investigation Report presents the results of a limited, shallow soil investigation that was performed to determine whether asbestos-containing materials (ACM) are present in Linear Park Property. Soil samples were collected from soil borings that were drilled at 16 locations to a depth of 10 feet or less. The samples were also analyzed for total petroleum hydrocarbons as diesel and motor oil, polynuclear aromatic compounds, and volatile organic compounds, although no significant concentrations of these analytes were detected. ACM was found to occur in shallow soil in a localized area around soil borings SB-3 and SB-5 at the northeast corner of the property

Completed Area Name: OU 1 -Plant Site
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 03/20/2014
Comments: This is the second report regarding Rodent Mitigation Plan Summary of Interim Berm Inspections. It is for the period of 11/15/2013 through 3/14/2014.

Completed Area Name: OU 1 -Plant Site
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/10/2014
Comments: This was the first report on results of inspections at the Berm Parcel after implementation of Baits as a Rodent Control Measure for ground squirrels. In general, rodents were not observed during the inspection that took place on December 13, 2014. The number of active burrows identified increased slightly relative to the inspection on November 29 because the mowing allowed for easier burrow identification. This report was for the period of 11/15 & 29/ 2013 & 12/13/ 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Five-Year Review Workplan
Completed Date: 02/25/2016
Comments: DTSC accepts the Work Plan on condition that the following recommendations are addressed: 1. The Five Year Review Report should include an updated cost estimate for Financial Assurance. 2. Section 3.1 Site Inspection & Cap Thickness Evaluation. The text in the second and third paragraphs states that field inspections will include cap thickness measurements. Consideration should be given to installing permanent monuments to help measure cap thickness at the same locations over time.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Financial Assurance Documentation
Completed Date: 11/24/2014
Comments: The Final Cost Estimate Amount of $ 176,705 was accepted by the Branch Chief on 11/24/2014.

| Completed Date: | 02/22/2013 |
| Comments: | Semiannual Operation and Maintenance (O&M) Report is for the North and Berm Parcels. The inspection for the period from July 1 through December 31, 2012 was conducted on December 24, 2012. The North Parcel was in good condition. O&M was done on the irrigation system and there were few animal burrows. The Berm Parcel was in good condition. Burrows were filled in with soil, bare soil was hydro-seeded and the irrigation system was repaired. |

| Completed Area Name: | PROJECT WIDE |
| Completed Sub Area Name: | Not reported |
| Completed Document Type: | Operation and Maintenance Report |
| Completed Date: | 05/23/2014 |
| Comments: | DTSC recommends the following actions at the Berms: 1. Verification of soil cap thickness making sure that the original recommended thickness is maintained. 2. Restoration of plant species (Cape Plumbago, Purple Trailing Lantana and Bearberry Contoneaster) recommended in the Operations and Maintenance Plan. |
| Completed Area Name: | PROJECT WIDE |
| Completed Sub Area Name: | Not reported |
| Completed Document Type: | Operation and Maintenance Report |
| Completed Date: | 06/01/2015 |
| Comments: | The Semi-annual Operation and Maintenance Report is for the North and Berm Parcels for the period from July 1, 2014 through December 31, 2014. The North Parcel consists of a soil cap and the Berm Parcel consists of 2 two berms with a soil cover. In July 2014, a water line was installed within the footprint of the old road which lies adjacent to the North Parcel. No potentially impacted soil was disturbed during the installation. In the Fall of 2014, the Berm vegetation was assessed and barren areas were observed. On December 22, 2014, both the southern and northern berms were hydro-seeded with a mix of Native Ornamental Fine Fescue . The Berms are infested with ground squirrels and gophers (rodents). Baiting has shown to be an effective and long-term mitigation strategy against ground squirrels. Passive Exhaust Rodent Control treatment has been found effective in mitigating gophers. Rodent inspections continue on a quarterly basis |

**JOHNS MANVILLE (Continued)** **S109443840**

and results will be reported in the semi-annual reports.

| Completed Sub Area Name: | Not reported |
| Completed Document Type: | Site Characterization Workplan |
| Completed Date: | 07/11/2008 |
| Comments: | The Work Plan scope of work included drilling of up to 16 soil borings to investigate for the presence of asbestos-containing materials within 10 feet of the ground surface in the Linear Park Property. The Work Plan was prepared because asbestos-containing materials were observed to extend beyond the southern boundary of the former Johns Manville Plant Site when cleanup activities were conducted. |
| Completed Area Name: | OU 3 - City of Pittsburg Linear Park Property |
| Completed Sub Area Name: | Not reported |
| Completed Document Type: | Site Characterization Report |
| Completed Date: | 09/14/2009 |
| Comments: | The Soil Investigation Report presents the results of a limited, shallow soil investigation that was performed to determine whether asbestos-containing materials (ACM) are present in Linear Park Property. Soil samples were collected from soil borings that were drilled at 16 locations to a depth of 10 feet or less. The samples were also analyzed for total petroleum hydrocarbons as diesel and motor oil, polynuclear aromatic compounds, and volatile organic compounds, although no significant concentrations of these analytes were detected. ACM was found to occur in shallow soil in a localized area around soil borings SB-3 and SB-5 at the northeast corner of the property |

3/14/2014.

Completed Area Name: OU 1 -Plant Site
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/10/2014
Comments: This was the first report on results of inspections at the Berm Parcel after implementation of Baits as a Rodent Control Measure for ground squirrels. In general, rodents were not observed during the inspection that took place on December 13, 2014. The number of active burrows identified increased slightly relative to the inspection on November 29 because the mowing allowed for easier burrow identification. This report was for the period of 11/15 & 29/ 2013 & 12/13/ 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Five-Year Review Workplan
Completed Date: 02/25/2016
Comments: DTSC accepts the Work Plan on condition that the following recommendations are addressed: 1. The Five Year Review Report should include an updated cost estimate for Financial Assurance. 2. Section 3.1 Site Inspection & Cap Thickness Evaluation. The text in the second and third paragraphs states that field inspections will include cap thickness measurements. Consideration should be given to installing permanent monuments to help measure cap thickness at the same locations over time.

Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 12/30/2013
Comments: DTSC conducted a site inspection to look for signs of the Tensar Geogrid material in the soil that may have been brought to the surface by the ground squirrels. No Tensar Geogrid material was observed. DTSC recommends verification of soil cap thickness, planting plant species that were recommended in the O&M Plan, mitigation of the squirrels to prevent further damage to the cap, filling in burrows and properly maintaining the irrigation system.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 05/23/2014
Comments: DTSC recommends the following actions at the Berms: 1. Verification of soil cap thickness making sure that the original recommended thickness is maintained. 2. Restoration of plant species (Cape Plumbago, Purple Trailing Lantana and Bearberry Contoneaster) recommended in the Operations and Maintenance Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 06/01/2015
Comments: The Semi-annual Operation and Maintenance Report is for the North and Berm Parcels for the period from July 1, 2014 through December 31, 2014. The North Parcel consists of a soil cap and the Berm Parcel consists of 2 two berms with a soil cover. In July 2014, a water line was installed within the footprint of the old road which lies adjacent to the North Parcel. No potentially impacted soil was disturbed during the installation. In the Fall of 2014, the Berm vegetation was assessed and barren areas were observed. On December 22, 2014, both the southern and northern berms were hydro-seeded with a mix of Native Ornamental Fine Fescue . The Berms are infested with ground squirrels and gophers (rodents). Baiting has shown to be an effective and long-term mitigation strategy against ground squirrels. Passive Exhaust Rodent Control treatment has been found effective in mitigating gophers. Rodent inspections continue on a quarterly basis and results will be reported in the semi-annual reports.

| Site History: | DTSC is the lead agency for this case. Here is the link to the case on Envirostor. https://www.envirostor.dtsc.ca.gov/public/profile_report.asp?global_id=07390022 Manville records indicate that the Roofing Materials Plant was constructed at the Site from 1925 through 1928. Asbestos-cement products, asphalt roofing materials, and asbestos containing pipe covering were the principal products manufactured at the Site prior to cessation of asbestos-containing product manufacturing by Manville. An evaporation pond was located in the southwest quadrant of the Site and received water and oil residuals produced during manufacture of roofing materials. Historic aerial photos and company records were reviewed to determine the operational history of the evaporation pond. A series of four asphalt stills were used to convert heavy oil (purchased in bulk from a number of refineries) to asphalt which was used in the manufacture of roofing products. The stills were initially fired with fuel oil and later with natural gas. Air was delivered to each still via a series of air lines. The addition of air to the heated heavy oil reduced the viscosity of the heavy oil. This process was referred to as |

**DELTA AUTO WRECKER (Continued)** **1001491861**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 10/03/2006
Comments: Enforcement Order identifies hazardous waste management violations and actions required to correct them. Additionally, the Enforcement Order requires that a Preliminary Endangerment Assessment workplan be prepared, submitted to DTSC for review, and implemented. A PEA report with the results and findings of the PEA is also to be submitted to DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 08/15/2002
Comments: Report documents concentration of lead and petroleum hydrocarbons in soils, debris and containers throughout the property. Hazardous Waste management activities identified include illegal disposal into adjacent property (POSCO), ilegal storage, open containers, unlabeled drums and containers, no contingency plan of any kind.

Completed Document Type: Form 1479 - Site and Collections Summary
Completed Date: 06/12/2012
Comments: Sonia Feldstein is the assigned attorney.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Proposed Determination of non-compliance
Completed Date: 12/17/2013
Comments: Letter resent to residential address after return from DBA Address at 6 Industry Road

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: PA/SI Reassessment
Completed Date: 11/26/2014
Comments: Reassessment conducted by DTSC on EPA’s behalf to determine if the site should be considered for listing on National Priorities List.
DTSC concluded that no further federal assessment under CERCLA was necessary as DTSC is actively overseeing environmental investigation and remediation at the site under a consent agreement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 10/03/2006
Comments: Enforcement Order identifies hazardous waste management violations and actions required to correct them. Additionally, the Enforcement Order requires that a Preliminary Endangerment Assessment workplan be prepared, submitted to DTSC for review, and implemented. A PEA report with the results and findings of the PEA is also to be submitted to DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 08/15/2002
Comments: Report documents concentration of lead and petroleum hydrocarbons in soils, debris and containers throughout the property. Hazardous Waste management activities identified include illegal disposal into adjacent property (POSCO), ilegal storage, open containers, unlabeled drums and containers, no contingency plan of any kind.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal NPL (Superfund) sites***

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 06/26/2025
Date Data Arrived at EDR: 07/01/2025

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025

Next Scheduled EDR Contact: 10/06/2025
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Data Release Frequency: No Update Planned

***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/26/2025
Date Data Arrived at EDR: 07/01/2025

***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/05/2025
Date Data Arrived at EDR: 06/20/2025
Date Made Active in Reports: 08/27/2025
Number of Days to Update: 68

Next Scheduled EDR Contact: 01/05/2026
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/26/2025
Date Data Arrived at EDR: 07/01/2025
Date Made Active in Reports: 07/17/2025

Next Scheduled EDR Contact: 10/20/2025
Data Release Frequency: Quarterly

***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 06/26/2025

***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/02/2025

***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/02/2025
Date Data Arrived at EDR: 06/04/2025

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/02/2025

Next Scheduled EDR Contact: 12/29/2025
Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/02/2025

Last EDR Contact: 08/15/2025
Next Scheduled EDR Contact: 12/02/2024
Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/19/2025
Date Data Arrived at EDR: 05/20/2025

***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Local Brownfield lists***

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

Next Scheduled EDR Contact: 01/12/2026
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Data Release Frequency: Varies

**OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/04/2025
Date Data Arrived at EDR: 05/06/2025
Date Made Active in Reports: 07/21/2025
Number of Days to Update: 76

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

## ASTM E1527-21 PHASE I ESA INTERVIEW QUESTIONS

| **Completed by:** Nayeli Basulto | **Title:** Assistant Engineer | **Date:** 12/18/2025 |
|---|---|---|

**(1) Do you know whether any of the documents listed below exist and, if so, whether copies can be provided to the environmental professional upon request within a reasonable time and cost constraints?**

| Documents for Subject Site | Are you aware of such a document? | | If yes, can it be provided upon request? | |
|---|---|---|---|---|
| | **Yes** | **No** | **Yes** | **No** |
| Environmental site assessment reports | | **X** | | |
| Environmental site investigation reports | | **X** | | |
| Environmental compliance audit reports | | **X** | | |
| Environmental permits (e.g., solid waste disposal, hazardous waste disposal, wastewater, NPDES, underground injection, air permits) | **X** | | **X** | |
| Registrations for underground storage tanks and aboveground storage tanks | **X** | | **X** | |
| Registrations for underground injection systems | | **X** | | |
| Safety data sheets | **X** | | **X** | |
| Community right-to-know plans | | **X** | | |
| Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; facility response plans, etc. | **X** | | **X** | |
| Reports regarding hydrogeologic conditions at the subject property or surrounding area | | **X** | | |
| Reports regarding any self-directed or other cleanup activities conducted at the subject property | | **X** | | |
| Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the subject property or relating to environmental liens encumbering the subject property | | **X** | | |
| Hazardous waste generator notices or reports | **X** (runtime hours) | | **X** | |
| Geotechnical studies | | **X** | | |
| Risk assessments | **X** | | **X** | |
| Recorded activity and use limitations (AULs) | | **X** | | |

**(2) Are you aware of any pending, threatened, or past <u>litigation</u> relevant to hazardous substances or petroleum products in, on, at, or from the subject property?**

Shore Acres PS – No
Pittsburg PS – No
Broadway Diversion Facility – No

**(3) Are you aware of any pending, threatened, or past <u>administrative proceedings</u> relevant to hazardous substances or petroleum products in, on, at, or from the subject property?**

Shore Acres PS – No
Pittsburg PS – No
Broadway Diversion Facility – No

**(4) Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?**

Shore Acres PS – Delta Diablo had a force main that failed and caused a spillage November – December 2025. The force main failure occurred outside the Shore Acres PS. The Shore Acres Forcemain Assessment report was completed in March 2025.
Pittsburg PS – No
Broadway Diversion Facility – No

**(5) Are you aware of any of the following features/conditions, either past or present, related to the subject property?**

| Features/Conditions | Yes | No | If yes, then provide comment |
|---|---|---|---|
| Aboveground storage tanks | X | | Shore Acres PS (500-gal double walled steel concrete encased)<br>Pittsburg PS (1,000-gal double walled steel concrete encased), Broadway Diversion Facility (500-gal double walled steel concrete encased) have aboveground storage tanks. |
| Underground storage tanks | | X | N/A for all three PS |
| Hazardous substance containers (e.g., drums and bulk containers) | X | | Shore Acres PS – specific information available upon request<br>Pittsburg PS – specific information available upon request<br>Broadway Diversion Facility – specific information available upon request |
| Petroleum containers (e.g., drums and bulk containers) | X | | Shore Acres PS – specific information available upon request<br>Pittsburg PS – specific information available upon request<br>Broadway Diversion Facility – specific information available upon request |
| PCB containing items (e.g., transformers) | | X | |
| Strong, pungent, or noxious odors | X | | We have odor control systems at the three pump station sites. The odor smell is not ongoing.<br>Shore Acres PS – oxygen to control odor<br>Pittsburg PS – foul air scrubber for wet well<br>Broadway Diversion Facility – N/A |
| Standing surface water and pools | | X | |
| Chemical stains on floors, walls, or ceilings | X | | Shore Acres PS -<br>Pittsburg PS – The Ferrous Chloride containment has chemical stains<br>Broadway Diversion Facility – Ferrous Chloride Containment has chemical stains |
| Corrosion on floors, walls, or ceilings | X | | Shore Acres PS – corrosion on<br>Pittsburg PS – corrosion on<br>Broadway Diversion Facility – corrosion on |
| Drains not connected to public infrastructure | | X | |
| Sumps | X | | Shore Acres PS – Diversion sump, dry well sump pump, pig pit sump pump<br>Pittsburg PS – Diversion structure sump, dry well sump, pig pit sump<br>Broadway Diversion Facility – sump pump |
| Pits, ponds, or lagoons; | | X | |

| Features/Conditions | Yes | No | If yes, then provide comment |
|---|---|---|---|
| Stained soil | | X | |
| Stained pavement | | X | |
| Stressed vegetation<br>(not from in-sufficient water) | | X | |
| Buried waste, containers, or debris | | X | |
| Wells (water, dry, monitoring, injection, other) | X | | Shore Acres PS – (2) wet wells: one is 9’ 2” by 5’ and the second is 9’6” by 5’. Dry well exhaust fan, dry well supply fan.<br><br>Pittsburg PS – (2) wet wells 20.13 by 4.89’ by 5.78’ and the other is 18.67’ by 4.89’ by 5.78’. Dry well 48’ by 18’ by 30’<br><br>Broadway Diversion Facility – Wet well |
| Septic systems or cesspools | | X | |
| Other features of potential Concern | | X | Not aware of any at this time. |

## ASTM PHASE I USER QUESTIONNAIRE

| **Completed by:** Nayeli Basulto | **Title:** Assistant Engineer | **Date:** 12/18/2025 |
|---|---|---|

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

**(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**
*Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?*

No

**(2) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).**
*Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?*

No

**(3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**
*As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?*

No

**(4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).**
*Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?*

No

**(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).**
*Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,*

| | |
|---|---|
| *(a.) Do you know the past uses of the property?* | *No* |
| *(b.) Do you know of specific chemicals that are present or once were present at the property?* | *No* |
| *(c.) Do you know of spills or other chemical releases that have taken place at the property?* | *Yes – At the Pittsburg Pump Station there was a ferrous chloride spillage that occurred in February 2018.* |
| *(d.) Do you know of any environmental cleanups that have taken place at the property?* | *Yes – At the Pittsburg Pump Station the ferrous chloride contaminated the soil, so there were environmental cleanups that occurred for this event in February 2018.* |

**(6) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**
*As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?*

| |
|---|
| No |

# APPENDIX F

# QUALIFICATIONS OF PREPARERS

# Cem Atabek

## Senior Environmental Engineer

### Areas of Expertise

Hazardous Materials, Geology, and Hydrology and Water Quality

### Education

B.S., Environmental Engineering, University of California, Berkeley

### Registrations/Certifications

-40-hour HAZWOPER
- Hazardous Materials First Responder Operational Level

### Years of Experience

18 Years

**Cem Atabek** is an environmental engineer who specializes in hazardous materials management, site characterization, development and implementation of remedial actions, and soil vapor intrusion mitigation for city, county, port, commercial/industrial, and school district clients. His work has included: Phase I and II Environmental Site Assessments (ESAs) in accordance with the ASTM and Caltrans guidelines; soil and sediment characterization in support of wetlands restoration and dredging projects; Preliminary Environmental Assessments (PEAs) and Removal Actions Workplans (RAWs) in accordance with Department of Toxic Substances Control (DTSC) guidelines; coordinating and performing public notification and participation activities during the site investigation and remediation process; and preparation of completion reports to document the implementation of remedial actions.

He has conducted investigations and remediation activities on contaminated properties and leaking underground storage tank (UST) sites, including media contaminated with petroleum hydrocarbons, solvents, metals, polychlorinated biphenyls, and manufactured gas plant wastes. He has designed and provided oversight for the installation of remedial surface caps to prevent exposure to impacted soils, and vapor intrusion mitigation systems (VIMS) to address soil gas contamination. He routinely works with the Regional Water Quality Control Board, DTSC, and local agency staff to develop and implement plans for site investigation and remediation.

## Project Experience

**Port of Oakland Soil and Groundwater Investigations, Remediation, and Groundwater Monitoring,** 2007-2025. Performed demolition oversight, investigations, and remediation activities at the Former Oakland Army Base, including removal of USTs, soil excavation, chemical oxidation treatment, and monitoring well installation, sampling, and destruction. Performed groundwater monitoring, cap inspections, and annual reporting for the Howard Terminal, Former McGuire Chemical Company, and Former Gas Load Center sites. All activities were performed under DTSC oversight.

**Alameda CTC, 7th Street Grade Separation East Project,** 2018-2025. Prepared Phase I/II ESAs and a Construction Risk Management Plan (CRMP) to pre-characterize soils, groundwater, and building materials for disposal and/or reuse, and to inform prospective contractors of soil management requirements and health and safety protocols. The Phase II ESA and CRMP were reviewed and approved by DTSC.

**San Francisco Public Works On-Call Services**, 2016-2025. Prepared Phase I/II ESAs and soil and groundwater management recommendations for various projects including roadway and utility improvements, redevelopment of commercial properties into public parks, and expansion of the Muni Metro East Maintenance Facility.

**Fox-Collins Property, Alameda, Removal Action Workplan Addendum,** 2014-2025. Performed post remediation groundwater and soil gas monitoring and developed a RAW Addendum under DTSC oversight to address residual contamination from a former wood treatment facility. The RAW Addendum proposes installation of a surface cap to address residual soil contamination, VIMS to address soil gas contamination, and a permeable reactive barrier to treat the deeper groundwater bearing zone and reduce the migration of contamination into the adjacent Tidal Canal.

**Oakland Unified School District, La Escuelita Education Center,** 2008-2014. Prepared workplans and performed field work for the investigation and remediation of a large multiphase school redevelopment project under the oversight of DTSC. Indoor air sampling was required due to soil gas contamination discovered beneath an active child development center. Two RAWs were developed and implemented which involved the removal of USTs, an oil/water separator, and contaminated soils, and installation of VIMS.

# Patrick Sutton, P.E.

## Principal Environmental Engineer

### Areas of Expertise

Hazardous Materials, Air Quality, GHGs, Noise, Geology, and Hydrology

### Education

M.S., Civil and Environmental Engineering, University of California – Davis

B.S., Environmental Science, Dickinson College

### Registration

Professional Engineer No. 13609 (RI)

### Years of Experience

20 Years

**Patrick Sutton** is an environmental engineer who specializes in the assessment of hazardous materials released into the environment. Mr. Sutton prepares technical reports in support of environmental review, such as Phase I/II Environmental Site Assessments, Air Quality Reports, and Health Risk Assessments. His proficiency in a wide range of modeling software (AERMOD, CalEEMod, CT-EMFAC) as well as relational databases, GIS, and graphics design allows him to thoroughly and efficiently assess and mitigate environmental concerns.

Mr. Sutton has prepared numerous Phase II Environmental Investigation reports for large infrastructure improvement projects, such as the Freight Intelligent Transportation System (FITS) Project at the Port of Oakland. Hazardous materials investigations include sampling and statistically analysis (as applicable) of contaminants of concern in soil, soil gas, and groundwater.

Mr. Sutton has managed state-funded and privately-financed soil and groundwater remediation projects related to gas stations, landfills, drycleaners, railroads, and other industrial properties impacted by hazardous materials releases. As a current member of ASTM, he is the author and technical advisor for the low-flow purging and sampling standard commonly applied during environmental investigations. Through his work associated with assessing, investigating, and remediating hazardous materials in the environment, he has developed an excellent perspective on how to satisfy both regulatory and technical requirements to properly manage hazardous materials and air quality concerns.

## Project Experience

**Port of Oakland and Alameda CTC, Freight Intelligent Transportation System (FITS) Project,** 2018-2020. Project manager for preparation of an Initial Site Assessment (ISA), Preliminary Site Investigation (PSI), and Construction Risk Management Plan (CRMP) to pre-characterize soils and groundwater for disposal and/or reuse, and to inform prospective contractors of soil management requirements and health and safety protocols. The ISA, PSI, and CRMP were reviewed and approved by DTSC, Port of Oakland, and Alameda CTC.

**Port of Oakland and Alameda CTC, 7th Street Grade Separation West Project,** 2017-2018. Project manager for preparation of an Initial Site Assessment (ISA) to identify contaminants of potential concern in soil and groundwater. The ISA was reviewed and approved by Port of Oakland and Alameda CTC.

**Alameda CTC, I-680 Highway Improvement Projects,** 2013-2020. Project manager for multiple Phase I Initial Site Assessments (ISAs) and Phase II Preliminary Site Investigations (PSIs) for over 24 miles of proposed highway improvement projects along the I-680 corridor from Milpitas to Dublin. Oversaw the collection and analysis of soil and groundwater samples from over 600 borings to characterize wastes for off-site disposal and determine how to maximize on-site soils reuse while minimizing soil handling for each of the proposed highway improvement projects.

**San Francisco Public Works, Muni Metro East Maintenance Project,** 2021-2022. Project manager for preparation of a Phase II Environmental Site Investigation to evaluate potential soil vapor intrusion concerns and characterize the chemical quality of soil and groundwater that would be disturbed during construction.

# William K. Scott, PG, CHg, CEG

## Senior Field Geologist

### Areas of Expertise

Hydrology and Water Quality, Geology, Hazardous Materials, Mitigation Monitoring, and Compliance.

### Education

B.S., Geology, Cal State Hayward

### Registrations/Certifications

40-hour OSHA training

Professional Geologist No. 6104; Certified Eng. Geologist No. 2006; Certified Hydrogeologist No. 579

Part 107 UAS Remote Pilot Certificate

### Years of Experience

39 Years

**Bill Scott** is a senior field geologist with 39 years of experience in groundwater sampling, monitoring, and field project management. His field work has included sampling for a wide range of chemical compounds in soil, soil vapor, and groundwater in a variety of geologic environments. He is thoroughly familiar with state and federal regulatory requirements for site investigation, sample collection, storage, and handling.

Mr. Scott has conducted Phase I site assessments in accordance with the ASTM Standards and performed Phase II environmental site assessments to identify potential hazardous materials issues in soil, soil gas, and groundwater. He has over ten years of experience in site compliance with environmental requirements affecting construction or development activities. He is familiar with mitigation monitoring and reporting programs, risk management plans, standard construction measures, and general and project-specific permits from environmental resource agencies. He has monitored and documented compliance with environmental permits from the San Francisco Bay Regional Water Quality Control Board, U.S. Army Corps of Engineers, National Marine Fisheries Service, San Francisco Bay Conservation and Development Commission, and the California Department of Fish and Wildlife. He has conducted environmental compliance monitoring for new building development for the City of Berkeley to insure that CEQA and MMRP are being addressed.

Mr. Scott is an FAA-certified UAS remote pilot. He has flown many drone missions for the purpose of collecting aerial imagery to document real time project site progress and conditions. He has used the drone imagery to assist in Phase I site reconnaissance, produce orthomosaic site maps, and collect video imagery of construction site activities.

## Project Experience

**SFPW-Under Ramp Park Project.** Phase II to document and characterize the soil and groundwater that would be generated during construction of the Under Ramp Park Project in San Francisco, California, 2024.

**SFPW- 11th and Natoma Park Project.** Phase II ESA and subsurface Investigation to characterize the chemical quality of soil that would be disturbed during construction of the 11th and Natoma Park Project in San Francisco, California, from 2016 to 2024.

**City of Berkeley Environmental Compliance Monitoring.** Construction environmental compliance monitoring on new developments to ensure that CEQA and MMRP are being addressed during construction, 2021 to present.

**Port of Oakland, Oakland Army Base Redevelopment Project**. Risk Management Plan monitoring and reporting from 2019 to 2023.

**SFPUC, Southeast Community Center, Force Main Rehabilitation and Sunol Watershed Center**. Construction Oversite Environmental Field Monitor in San Francisco, California, from 2020 to 2021.
